POLICE CORRAL DESPERATE GANG

Toronto Detectives Round Down Men Believed to Have Made Sensational Gem Steal.

Toronto, Dec. 25 .- Joseph Warren, 25 Center avenue; John Warren, 25 Center avenue; John Milligan, 4 Leonard avenue; Fred Marsh, 77 Nelson street With the arrest of the foregoing men the police say that the sensational robbery of Mr. David Ward's loan office at 104 Adelaide street east on Saturday night was cleared up.

Milligan was taken in a hard chase after the robbery, and Marsh and John Warren on Monday morning. Joseph Warren was placed under arrest early this morning at his home, 25 Center

Marsh has been employed at Front street hotel as a handy man, and John Warren as assistant engineer. Milligan also worked at the hotel, bu Joseph Warren is said to have been without steady employment.

If the information in the possession of the authorities is correct the robbery at the loan office is only one of a number planned in the fall of 1905. It is singular that the big Lugsdin fur robbery took place just a year ago Christmas eve. Milligan and John Warren were tried on the charge, but owing to the lack of identification were acquitted.

The Moneypenny warehouse, where John Warren worked as engineer, was also on the list of places slated for robbery.

The detectives assert that they are now in full possession of the details of

the robbery. They believe that Joseph Warren arranged at the Wilson livery, Yonge street, on Dec. 10, for the horse and on the night of Saturday, Dec. 15, drove down to the Ward loan office, and after laying out their plans concluded that it would not be safe to go through the job with only himself, his brother

John, and Milligan, They wanted a fourth man, and it is alleged that Marsh when approached consented to join them in the daring robbery.

The night of the raid it is alleged that Joseph Warren and Milligan got the horse and cutter at Wilson's, and, driving downtown, picked up the other Warren and Marsh on Adelaide. The scoria block thrown through the window was obtained at the new Rich. mond street loop. Marsh, the police say, sat in the cutter; Joseph Warren

threw the stone block: Jack Warren held the door, and Milligan grabbed for the precious stone. After the robbery the detectives assert that Milligan and Marsh drove off in the sleigh and the two Warrens

made off by running down Francis and Wellesey street, on Jarvis street, and Milligan was chased and caught on the property of the late G. W. Kiely, at

Charles and Jarvis streets. From the information secured by the police it would appear that the robbery was planned away back in the the ropes attached used to fasten the doors were made in a city park. The Ward loan office was on the list for a raid that fall, but the good de-

Casemates formerly occupied by big guns, with walls of mmense thickness, will be used as cells. It is believed that the official figures, according to which more than 30,000 persons

charged with political offences have been deported to Siberia during the past twelve months without trial, refer exclusively to deportations for such political offences as are recognized by the legal code, otherwise the numbers would have to be multiplied tenfold. Nearly an equal number of prisoners are known to have lost their lives during the same period.

It is stated that 300,000 persons are at this moment either in prison on political charges or proceeding to exile, while the number of those who have already reached Siberia or other places of deportation con prises about 200,000.

The Pure Food Movement

is very strong in Canada today. In no article of diet is purity so important as in flour, for flour is the basis of more than half your food. It is your duty, therefore, to see to it that the flour you use is pure.

"FIVE ROSES" FLOUR is made by a process which insures absolute purity, in as far as it can be secured by the most scientific milling methods. From the time the wheat enters the mill until the flour reaches the cook it is untouched by human hands. The grain itself is thoroughly cleaned before grinding, whilst the flour is sifted, time after time, through the finest silk cloth, in order to remove the smallest impurities.

These processes render "FIVE ROSES" an easy and satisfactory flour to use, and insure better results on Baking Day than can be obtained with any ordinary brands.

Coal Values safest business propositions in Canada for any investor. One of our properties alone-the Chipman Creek Mine-is estimated by J. E. Woods, C. E., to have Twelve Million Tons of high-grade coking and domestic coal. That amount of coal alone will pay at least

Two Hundred per cent dividends on the par value of our whole capitalization. We can get our coal to market, and get it there cheaply, and the market is waiting and will pay good prices. You may have been offered coal mining propositions which cannot develop for years because they are far away from railways. Don't class this with them, for everyone of our properties is easily tapped by trunk line railroads. Besides our sure-paying coal lands, we own

oil fields that in all probability will be producing 500 barrels of oil a day within a year. We own two wells that experts say will deliver 100 barrels of oil a day. A contract has been let for drilling five oil wells to be sunk on the Company's oil lands, which are in the heart of the great crude oil belt of the Northwest. For every barrel of oil the Company produces the Government pays 52 1/2 cents

bounty, and the Company still owns the oil. If the wells produce only 100 barrels a day all told the Company will earn \$15,750 a year in bounties in addition to the value of the oil. That value at wholesale will be not less than seven dollars a barrel, and the whole cost of production and refining deducted, the net profits per barrel will exceed six dollars a barrel.

Bear in mind that we own our lands; we have Prospect prospected them: We know the coal and oil are of Great there-lots of it, and with a market waiting for Profits it. We own the only known oil lands in British Columbia that are on a railway. We own two wells that experts tell us will produce a hundred barrels of oil a day. We have let contracts for drilling five more wells that will almost certainly be productive. We believe honestly that within five years we shall have fully one hundred producing wells on our oil lands. Under our charter we have the very valuable right to build pipe lines anywhere, and the railway runs so close to the lands we have already successfully prospected for oil that a gravity pipe-line will deliver the product without any expensive pumping relays. J. W. Warren, of the Winnipeg Oil Co., says in an official report that he never found anywhere a crude oil equal to our Alberta product, and he adds that "it seems impossible to doubt that the Alberta wells will in the future be able to supply the Canadian

Think for a moment what our offer really means Certainty to you. For every hundred dollars you invest of Good you receive Ten Shares of Preference Stock, on Interest which you receive six per cent on the par value. You also receive, free of all cost, ten ordinary shares, which share equally in the Company's profits after the preference shares are paid their dividends. So that your dividends from the very start will pay you six per cent a year on your investment, with a strong probability that they will be much larger in a very short time. Savings banks will pay you not more than four per cent and

you do not share in their profits at all. Now if the Company earns a net profit of only \$250,000 per annum, and at that time 10,000 shares of each class have been sold, just 120,000 shares of stock would share in the dividends. which would figure over Twenty Per Cent. on the par value of each share.

That is to say, your hundred-dollar investment would earn you Forty Dollars every year. If you wished to sell at any time, shares earning 20 per cent would readily bring four times their par value, or \$40 each. Then the stock, which had cost you a hundred dollars, would be worth Eight Hundred Dollars-a net profit to you of \$700, besides your dividends.

That elongated red man, Longboat, captured some more scalps yesterday at Hamilton, and, incidentally, clipped off the course record in so doing. As was expected, the Indian had a walkover, and the matter of handing over the trophy was a mere formality, he having been presented, so 'tis said, with first prize in advance of the event. He came here to consult "Bonesetter" Reese about an injured knee. He says he was to have received \$1,200 for playing with the team this year, but all he got was \$180. He had signed to coach the Virginia Polytechnic team at \$900, but was prevailed upon to go with Canton. "No more professional football for me," he says.

Another argument against professionalism in athletics.

A disgraceful barn setto, near New York, recently resulted in the knocking out of the referee. His decision dian't meet the approval of a few tinhorn sports present, so they played football with him, and otherwise handled him roughly. A referees' protective union will now be in order. Suggestions should be submitted to Mr. Thomas Burns, en route for the Golden Gate.

Baseball players are, to all intents and purposes, reposing gracefully on that proverbial shelf. In reality they are toasting their shins around the fireside and popping yarns. Here is one of the latest:

IN F.ERCE FIGHT

One Man Killed and Three Stabbed During Row in Parry Sound District.

Parry Sound, Ont., Dec. 26. - A message from Grant's camp, on the Canadian Northern Railway construction works, reached here today with news of the murder of one man and the stabbing of three others in that vicinity last night. It was said a party of Italians, probably under the influence of liquor, started from the camp and went to the farmhouse of Mr. McCormick. Here they started to kick up a row and attempted to assault Mrs. Mc-Cormick. Word having been sent to the camp of the disturbance, a party of Swedes, headed by Mr. McDodd, a nephew of Grant, the contractor started out. On their arrival at McCormick's a fight took place, in which Mc-Dodd was fatally stabbed, dying shortly afterwards. Three of the Swedes Common Three were also stabbed, one probably fataltion of the recapture at Port Severn of ly. "I had stricture for eleven years. It finally brought on Bright's Disease of the Kidneys. I had an uncomfortable shooting pain in the groin and feeling as though something was in the urethra. My back was weak and I could scarcely stoop over. Urine was full of sediment. Had a desire to urinate frequently Family dectors, so-called specialists, patent medicines, electric belts, all failed. I was discouraged. I had spent hundreds of dollars in vain. Finally I consulted Drs. Kennedy & Kergan as the last resort. I had heard a great deal about them and concluded from the fact that they had been established over 25 years that they understood their business. I am delighted with the results, In one week I felt better and in a few weeks was entirely cured. Have gained sixteen pounds in weight."

AN APPRECIATION:

Again it is our privilege, and no less our pleasant duty, to express to the discriminating public our deep sense of appreciation of their favor this Christmas time, and of the confidence in our purposes, ideals and method's which that favor implies. Each year surpasses by a heavy percentage all our best precedents in volume of business, and the implicit public reliance upon our quarantee of good value constitutes the best assurance that we shall adhere to the same rules of business conduct which for so many years have been epitomized in the "Ward Guarantee." During this Christmas season we believe we have made more new friends than ever before within the same period, and we trust that all of the old friends have been retained. If any errors or disappointments have crept into even the smallest transactions, the patrons concerned will receive our thanks for an opportunity to rectify them without delay.

With Respect,
