## Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- Coloured covers / Couverture de couleur
- Covers damaged / Couverture endommagée
- Covers restored and/or laminated / Couverture restaurée et/ou pelliculée
- Cover title missing / Le titre de couverture manque
- Coloured maps / Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations / Planches et/ou illustrations en couleur
- Bound with other material / Relié avec d'autres documents
- Only edition available / Seule édition disponible
- Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.
- Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from filming / Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- Additional comments / Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire qu'il a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages / Pages de couleur
- Pages damaged / Pages endommagées
- Pages restored and/or laminated / Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed / Pages décolorées, tachetées ou piquées
- Pages detached / Pages détachées
- Showthrough / Transparence
- Quality of print varies / Qualité inégale de l'impression
- Includes supplementary material / Comprend du matériel supplémentaire
- Pages wholly or partially obscured by errata slips, tissues, etc., have been reshelved to ensure the best possible image / Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.
- Opposing pages with varying colouration or discolourations are filmed twice to ensure the best possible image / Les pages s'opposant ayant des colorations variables ou des décolorations sont filmées deux fois afin d'obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below / Ce document est filmé au taux de réduction indiqué ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last page of each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et se terminant soit par le dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et se terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant la nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

OTTAWA, CANADA.

BULLETIN No. 205

Arsenate of Lead.

W. J. GERALD, Esq.,

OTTAWA, March 31, 1910.

Deputy Minister of Inland Revenue.

SIR,—I beg to hand you a report dealing with 26 samples purchased as Arsenate of Lead. This collection was made at the suggestion of the Fruit Division of the Department of Agriculture; the Ontario Agricultural College, Guelph, and others interested. Paris Green is specifically named, in Schedule 5, of the Adulteration Act, and has been the subject of four reports by this department (see Bulletins 40, 42, 88 and 158). It was considered that the newer insecticide, which is to some extent replacing Paris Green, should be examined; and the accompanying report will enable agriculturists to form an idea of the commercial article, as purchased by our inspectors.

Instructions were issued quite distinctly, for the purchase of Arsenate of Lead; but certain of our inspectors have not been guided by these, and I find such substances as helleoore, pyrethrum, &c., accepted by the official, instead of Arsenate of Lead. This is particularly the case with the inspectors for Quebec, London and Kingston districts.

In consequence of these mistakes, I find only eighteen (18) samples, true to name.

The methods of analysis used are essentially those prescribed by the Association of Official Agricultural Chemists (see Bull. No. 107, revised, p. 239, Bureau of Chemistry, Wash.)

It will be noted that the chemical condition in which this article is offered for sale varies from practical to theoretical, water content amounting to 49 per cent. As calculated upon the original material, and also upon the dry material, the variations are as follows:—

Arsenic ( $\text{As}_2\text{O}_5$ )—

	Original.	Dry.
Maximum .....	29.90	30.90
Minimum .....	12.44	22.28
Mean .....	19.57	27.09
Lead ( $\text{PbO}$ )—		
Maximum .....	72.10	72.10
Minimum .....	33.46	62.53
Mean .....	48.55	66.54

As we have no Standards for this article, I am unable to offer any opinion. It is however quite evident that it varies greatly in value, and that legal standards, and limits of variability should be defined.

I beg to recommend the publication of this report as Bulletin No. 205.

I have the honour to be, sir,

Your obedient servant,

A. MCGILL,  
*Chief Analyst.*
