THE CZAR'S MARCH.

Bewildering Scenes in the City of Mos cow-The Imperial Procession.

Moscow, May 22.-The Czar, on his entry into Moscow, rode a pure white horse. The imperial procession was headed by a squad of mounted gendarmes, led by a master of police. After the police came a portion of the Czar's bodyguard and a squadron of Cossacks of the Guard. His Majesty the Czar was followed by Ministers of the State, aides-de-camp. Then came the Russian grand dukes and all the important foreign princes, all on horseback. Her Majesty the Czarina rode in the imperial carriage, surmounted by the imperial crown, the passed a resolution for a national by an officer of the imperial stables on world according to the suggestion. and it was followed by six pages of the chamber and two equerries of the court stables, all on horseback.

London, May 22.-After the scene in the House early this morning, Mr. Balfour said the Government proposed to continue sitting until the Agricultural Rates Bill was completed. The Secretary of State for the Colonies, Mr. Joseph Chamberlain; Mr. Balfour; the Under Secretary of the Foreign Office, Mr. George N. Curzon, and the Secretary of State for India, Lord George Hamilton, occupied the Treasury benches all night long, in the evening dress they had worn on the night previous. Throughout the night suppers were in progress in the coffee room, and from the fact that 1,000 eggs alone were consumed, it may be judged that the appetites of the members were sharpened considerably by their stay

Address an Open Letter to Rea. Wilfrid Laurier.

Why the Manufacturers Are Ready to

Trust Him. Business Policy. Which Will Restore Confidence and Prosperity and

Settle the Northwest,

Needed.

To the Hon. Wilfrid Laurier: Dear Sir,-Much is again being urged by those opposed to you in politics as to the disastrous effects on the manufacturing interests of the country which they claim and profess to believe would follow your accession to

power at the approaching elections. Your manly independence during the last session of Parliament under the most trying circumstances that could have been imposed upon you shows us that no hasty or illadvised action would be likely to be taken by you on,

any important question. Speaking for ourselves as manufacturers in one of the leading industries of Canada (the manufacture of furniture), we take this opportunity of assuring you that we believe you are so imbued with the spirit of justice and fair play that manufacturers in any branch of industry need have no fear that they will be treated unfairly in any readjustment of the tariff which may be made by any Government of which you are the head. We realize that the necessity for a venue to meet our heavy nual obligations demands such a rate of taxation as must afford to manu-facturers a very reasonable protec-

tion for an indefinite time. VITAL QUESTIONS. Were all other things equal, and this the only matter requiring the attention of the electors, it could make but little difference to manufacturers as such whether yourself or Sir Charles Tupper should have control in the next Parliament; but we believe there are other matters of vital importance to the welfare of the Dominion which should receive consideration at the hands of the electors at the present time, and in considering them we are bound to keep in view the character,

and records of those asking our suf-As business men we believe that the government of the country should be conducted on strictly business principles, and that those intrusted with it should be not only capable but free from any taint of scandal. The general trade of the country was never in a worse condition than it is at the present time, whatever politicians may say to the contrary. We therefore take the liberty of placing before you a few things which we believe as business men would assist in restoring confidence and prosperity in the coun-

try. We would like to see: THE COUNTRY'S NEEDS. A more rigid and economical ad-ministration of public affairs. 2. An honest Administration, guarding the public funds, and rendering mpossible the scandals which have disgraced Canadian politics in recent

years. 3. An active immigration policy for the peopling of our great Northwest and the consequent extension of the home market for our manufactures. 4. The development of our mineral 5. A policy that will weld together rather than sow the seeds of dissen-sion among the different creeds and

ences at Earl's Court. Quite a party nationalities that compose our population. These are a few matters which suggest themselves to our minds, and it is because we have the highest regard for you as a statesman and an honorable politician that we feel that under your guidance the affairs of our country would be carried on in the

Fan for the Crowd-Dr. Cl. T. Campbell ords the Evidence-Decision Adjourned.

against Dr. Hutchinson, medical health inspector, occupied the board of health for several hours last night and furnished amusement for the same length of time for all who attended, excepting perhaps those who were under cross-examination while the fun was on. Dr. Campbell took the evidence himself and the witnesses signed it. He had no power to administer the oath, but otherwise the proceedings were strictly courtlike. Mr. T. H. Luscombe we present on behalf of the milkmen and R. M. C. Toothe defended Dr. Hutchinson. A score or more of milk vendors were present and were active in their applause or dissent, according to what evidence was being The members of the board

Dr. Cl. T. Campbell (chairman), Ald. Wm. Skinner, Ald. John Heaman, John Christie, Inspector Bell, and Dr. Hutch-

Inspector Bell made his report on the recent house to house inspection. Premises visited numbered 7,563; closets dirty, 1,899; yards dirty, 232; cesspools, 19. There were 315 more houses for you. visited this year than last and the cost was \$105 01; last year \$98 75. Not a case of infectious disease had been reported for many weeks.

Dr. Campbell verbally reported that It was necessary to take a survey of the Cove flats before anything further could be done in the sewerage matter. Neither the city engineer or his assistant had the requisite time to do the work, and the doctor asked if another engineer should be engaged. The members thought it would be inexpedient to do so, owing to the smallness of the board's funds and the matter was allowed to rest. The doctor reported incidentally that the Cove flats did not come up to Mr. Goodenough's ideas altogether, but that there were

other places in view. Ald. Heaman complained of a stagnant pool which exists where the Hunt's millrace formerly ran. Dr. Hutchinson replied that he had informed the city engineer, who had promised to notify the company.

Dr. Campbell advised that the suggestions contained in the recommendatem of testing milk should be referred to a committee to bring in a report on the way such things were managed

in other cities. Ald. Skinner did not think that necessary, and argued that the board was competent to deal with the matter. It was deferred for future con-

The hearing of the charges against Dr. Hutchinson began with the reading of a letter from Joseph McLeod, asking that his name be withdrawn from the list of signatures to the charges. He said that he thought the petition asked only for an increase in the cost of license or he would not have signed it. Personally, he did not have any complaint to make as to Dr. Hutchinson.

The following list of charges was then submitted by the milkmen; THE CHARGES.

I. The medical health officer tests the milk only twice in the year. 2. Samples are not always taken from the milk vendors about the same times charges were unreliable, and that it

3. Mr. Yeo, having twice applied to left a sample of his milk for testing, was told by the medical health officer that the milk was not of good quality, that in fact it was very bad and that a license could not be issued. Subsequently Mr. Yeo's stables were visited by the medical health officer, who asked for and received from Mr. Yeo one taken in May. a sitting hen and immediately thereafter Mr. Yeo received his license. The medical health officer offered Mr. Mc-Leod \$25 for a \$40 cow and said he would make up the balance in the milk

4. Last year the medical health officer asked Mr. Alfred Pack for a sample of milk. The medical health officer did not himself select a sample from the bulk of the milk, but Mr. Pack gave him a sample out of a separate can containing one cow's milk. 5. The medical health officer does not himself take the samples from the bulk of the milk as vended, but simply asks the milk vendor for a sample. This will be shown to be the case by the evidence of Mr. Wm. Phoenix. Robert McCoullagh will also give evi-

6. About the 21st day of April, A.D., 1896, the medical health officer in-structed John Butson to bring to the house of the medical health officer a sample of milk for testing and the said John Butson selected and brought a sample for testing as instructed. Mr. Yeo has also delivered samples at the house of the medical health officer. Joseph O'Brien was also instructed to bring samples of Spettigue's milk to the house of the medical health officer, although the medical health officer was requested to take samples for himself. 7. The medical health officer reported on the milk vended by Mr. W. I. Spettigue without having any sample

8. The medical health officer has reported on the condition of the cows kept by John McKay, Charles McMurray, William O'Brien and F. Spettigue without however having made any examination of the cows.

9. In the year 1895 the medical health officer, instead of inspecting the cows kept by Mr. F. Spettigue, merely asked him (after he had seen the stable and just as he was about to drive away) "if he had any sick cows?" 10. The medical health officer in 1895 The hearing of the milkmen's charges reported Mr. O'Brien 4.30, Mrs. Miller (supplied by Wm. O'Brien) 5.00 and Thomas Hammond (supplied by Wm. O'Brien) 3.70. The medical health officer informed Mr. Peter Lawson that sample of Wm. O'Brien's milk went up to 6.00 and one sample was better than 6.00.

11. The medical health officer has on several occasions told Mr. Yeo that he was about to visit his (Mr. Yee's) stables, and that Yeo was to be careful to have them clean so that a good report might be made.

The medical health officer has endeavored to intimidate the witnesses and those who signed the petition for investigation herein as shown as follows: On or about Thursday, the 30th day of April, 1896, the said medical health officer, speaking to one J. W. Jarvis, said to him, "If you do not take your name off that petition and advertise through the press that you have done so I will make it hot for you;" and on a subsequent occasion the said medical health officer, speaking to one George Tupholme asked why he (Tupholme) signed the papers. Tupholme said, "I had no complaints against the medical health officer, but thought the milk should be inspected oftener," to which the medical health officer replied, "It will be all the worse

DR. HUTCHINSON'S DENIAL. Mr. Toothe said that he had no power to make oath in this matter, but he had drawn up a statuary declaration which Dr. Huteninson had subscribed to. This he claimed was as

binding as an oath. The doctor's statement was an emphatic denial of the majority of the charges, or where anything was admitted an entirely different interpretation was placed upon the doctor's actions or words from the construction placed upon them by the milkmen. He said that it was his custom to inspect the herds four or five times in the course of the year, at no stated time. This was just what the milkmen were asking for. The doctor denied "in toto" any charge of malfeasance or improper conduct. The charges of Mr. Yeo that he had accepted a hen as a bribe were denied entirely. If he had taken the hen, which he did not admit, it was with the intention of paying for it. He also denied offering Mr. McLeod \$25

for a \$40 cow. Continuing, Mr. Hutchinson claimed that he had always done his duty or so and got a faithfully. He had no recollection of the street. the Pack incident. In the case of charge 6, where milk was taken to his office, it was done for the purpose of seeing the difference between the milk so left, and the milk as vended. Charge 7 was also denied, as was charge 8. In regard to charge 9, the doctor said it him if it was supposed to be milk he was customary to ask every milkman if he had any sick cows. He explained at length how it was possible for three samples of milk primarily from the same dealer to vary on the test. He denied the charge of partiality in regards to Mr. Yeo. It was customary for him to tell all the milkmen that he was coming to see them, and so keep "in terrorem," so that they them would look after their stables and herds on general principles. Anent the charge of intimidation, the doctor admitted making the remarks, but said those who made the charges by taking

them into court.
Mr. Toothe followed, saying that the was impossible for any officer to do his duty to the satisfaction of everythe medical health officer for a recom- body. Dr. Hutchinson had attended to idation for a license and having his duties faithfully for ten or eleven years, and this was the first slur or insinuation that had ever been made

against him. Mr. Luscombe argued in support of the first clause of the summary that it was unfair to compare a sample taken in the beginning of March with

Mr. Luscombe said that he could not understand Mr. McLeod's withdrawal. Before taking any evidence Dr. Campbell warned the witnesses to be perfectly consistent in case they had to give the same evidence in court. THE WITNESSES.

Mr. W. D. Yeo said that, starting in the business six years ago he went to Dr. Hutchinson's office for a license, and the doctor told him that milk generally was of a very low standard that spring, and he expected there would be the very devil to pay. Mr. Yeo was going on to say that Dr. Hutchinson felt his pulse considerably about some matter, but Mr. Toothe registered a vigorous protest against allowing any new charges to be made. Mr. Yeo told of his inability to obtain a license, and shortly afterwards Dr. Hutchinson visited his stables when only his mother was there. He seemed to be perfectly satisfied with the

'Well," continued Mr. Yeo, "he fell in love with the gobbler; mother could not spare that. He saw a clucking hen strutting by. He said that was just what he wanted. He had some game eggs he wanted to set. My mo-ther said, 'All right; I will send it in with Will in the morning.' I brought it in, and my milk test was satisfac-

tory that year." The cross-examination hinged principally upon the clucking hen, and it was of such a nature as to frequently bring smothered laughter from the crowd hanging over the railing. The cross-examination hinged prin-

cipally upon the clucking hen, and it was of such a nature as to frequently bring smothered laughter from the crowd hanging over the railing. "How long ago was it that this hen transaction took place?"

"Six years ago."
"Swear to that?" "I am not swearing just now." "Are you taking advantage of that fact to get out of telling the truth?" Campbell-Now, now; I hope both the counsel will treat the wit-

nesses courteously.

Mr. Toothe still talked about the date. He brought out the doctor's ledger and flourished it in front of

After a dispute as to the price of

"Why didn't you take the hen when you first went for the license?"

"I don't believe the milk was below

standard?" "I don't believe it was." "What were you doing? Watering

'No, sir; we never do that." The next witness was then called. Alfred Pack gave evidence to substantiate his charge, and escaped without a severe cross-examination.
Wm. Phoenix aired his complaint against the system of testing, but said nothing against the personal integrity of the doctor. He said it was ossible for a milkman, as long as the sample was taken from the serving can, to put in a pint of cream from one of the large cans, and so increase his percentage.

Robert McCullough was introduced to prove that the doctor had taken cream from him instead of milk. Mr. Luscombe did not charge the doctor with corruption in this case, Toothe said that it was evi-Mr.

dent that the witness wished to charge partiality.
When the witness was heard, he said he had a bet with a man that he would get a high standard. The doctor met him at the corner of Bathurst and Horton streets, and after handing up his bottle and asking for the sample of the milk he turned to talk to another man. Then McCullough put cream in the bottle, and naturally got a very high standard his wager.

Mr. Toothe began his cross-examin-"You worked for Spettigue then?"

"And this was part of Spettigue's "Of Spettigue's cow's milk," plained the witness, and the crowd laughed heartily. "Who did you make the bet with?"

"A gentleman."
"His name?" "Mr. Spettigue. It was not exactly a bet. We didn't put up any money. We both belong to the church." "And it was on those holy princi-

ples that you put up the cream on doctor, was it not?" "Oh. yes. "You and Spettigue both belong to

the same church. "That's nobody's business." "Still, when he asked for milk you gave him cream.' "He asked for milk."

did well. "Are you through with me?" John Butson testified that at Dr. Hutchinson's request he took a sample to his office. The milkmen made their complaint public the next day.

"And you gave him cream. You

and the doctor came around in a day Joseph O'Brien also made fun for the crowd, with Mr. Toothe's aid. It appeared that O'Brien bought a milk route from Mr. Spettigue. One customer kicked when O'Brien was learn-

was peddling. "After that the milk got worse. At least the customers said it was half water," said O'Brien. "Did you blame that on the doc-

ing the route, and quit, after asking

"That's funny."
"You didn't think it was milk at all you were getting from Spettigue? "Well, it looked something like milk, but it was very thin.

O'Brien—The doctor said he had

lost the record of the sample. "Did you give the doctor the milk?"
"Yes; I don't know whether he drank it, or what he did with it.' "You could not get the standard of

Dr. Campbell-It seems to me that this is very unimportant evidence.
Wm. I. Spettigue asserted that Mr. Hutchinson reported on his milk without getting any sample whatever. Mr. Spettigue said that the doctor had his "knife" into him because he complained of his method of samoling the milk, and in order to "quiet nim" he reported his milk as "4.00." "Which it never went," added Mr.

Spettigue. "You are not used to dealing with high percentages, evidently," retorted Mr. Toothe.
Wm. O'Brien complained that the

doctor reported on the condition of his cows in 1894, without seeing the herd. Mr. F. Spettigue made the same complaint on an occasion in 1893, and Mr. Toothe said that the charge ought to have been "outlawed" since that time. Later on Mr. Toothe asked witness

if he ever gave the doctor anythinga gobbler, or a hen, or such. (Laugh-Mr. Spettigue-No; not even a receipt for a month's rent he owes me.
"The doctor always gave you the

they would hold me responsible. Mr. Spettigue—Show your receipt, doctor. You never did.
Mr. John O'Brien, who got rather excited under Mr. Toothe's management, asserted that the doctor reported three samples of milk obtained from him at 5, 481, and 2,70. The milk from him at 5., 4.81, and 3.70. The milk was obtained from some of Mr. O'Brien's customers, and Mr. Toothe asserted that the milk might have been tampered with after it had left his cans.

Mr. Yeo was again called to prove that Dr. Hutchinson had notified him that he would be out "shortly," to examine the herd. Mr. Toothe said that the doctor did the same to every milkman, so as to keep them in an expectant state and their herds clean.

Special Bindings Dr. Campbell acknowledged that the

excuse was satisfactory. ledger and flourished it in front of Mr. Yeo, asking him if he would swear it was not in 1888. Mr. Toothe turned the pages over as if he were just leaves was satisfactory.

Charge 12, and last was not gone into. It related to the question of intimidation, and the doctor admitted making the remarks, but in saying

that he would get even he meant that he would seek legal redress. This was also accepted, and Mr. Luscombe commenced summing up. He argued that from the evidence submitted Dr. Hutchinson had not done his duty in the way that he should, and he hoped that the whole matter would result in some protection of the vendors in future with regard to the inspection of milk. He pointed out that Dr. Hutchinson's averages were considerably higher than those made at the Government

dairy farms.

Mr. Toothe referred to the age some of the charges, and to their "unsatisfactory, flimsy and mythical He acknowledged that Dr. nature.' Hutchinson may have placed more confidence in the men than he ought to have for his own good, but he argued that animus was the cause of the whole affair, and that the charges were simply made to gratify the spleen of one or two concerned. It was 11:20 p.m., and the board adjourned, to meet privately this afternoon to consider the evidence.

Never before this day has the hall contained such a large and enthusiastic crowd. It was filled to its utmost by Liberals, Conservatives and ladies, many of them having driven 25 miles to come to greet the chief. At least 5.000 participated in the demonstration grove: S. the town of Levis has always given about 500 majority to the Conserva-tive nominee. Judging by the enthusi-asm which prevailed at the meeting tonight the majority will be totally reversed on the 23rd of June next. When Mr. Laurier was called to the front of the platform a storm of cheers burst forth from everyone present. The chief of the Opposition argued with ability the various political questions of the day. His speech was well lis-tened to by the Bleus as well as the

Rouges. Far from being interrupted, as predicted by some fanatics, Mr. Laurier was acclaimed with great favor. "Should the intelligent voters of the country elect me in preference to Sir Charles Tupper," said Mr. Laurier, "I would settle the school question within six months after the election. Senator Pelletier and Mr. Lemieux also made good speeches, after which the meeting broke up amid frantic

cheers. EAST BRUCE.

Mr. Little has been identiied with the Patrons and asked until Another Great Demonstration in Saturday to decide. A committee was appointed to deal with his decision on

that day. A FLAT AFFAIR. Most Unscrupulous Tactics of His rally" for East and West Lambton at Forest on Tuesday was undoubtedly the flattest and most spiritless political demonstration ever held in the county of Lambton. The reception of the Finance Minister on his arrival at fashionable, correct and season- Yesterday's Gatherings in Various Forest was a chilling one. There were not ovrr 50 persons present, and of those fully one-half were opponents in politics. A brass band, hired for the occasion, failed to arouse the small crowd from the apathy and gloom that covered it as with a pall. At the evening meeting over one-third of the seats in the town rink were empty. Of those who were seated fully one-half were ladies, and of the voters present more than one-half were supporters of Mr. Moncrieff's opponents. The speech following in the two ridings is split end enthusiasm of former years have oozed out of the remnant of the old party. Mr. Foster left Lambton sad-dened and depressed, and his lieutenants here are in a more hopeless state of funk now than they were before they brought him into the county to expose their weakness.—Sarnia Ob-

- Prominent Conservative Manufacturer Joins the Liberals.

A Stirring Speech in Favor of a Change of Men at Ottawa. Halifax, N. S., May 20.-At a mass

meeting of electors last night, Mr. Thomas Forhan, a well-known manufacturer and shipowner, was asked to say a few words. Mr. Forhan said he did not expect to be called upon, as he only came as a listener, but he felt that in this campaign, if a man could only say even half a dozen words to try and change the wretched administration of public affairs, these words should be said. He had been a Conservative all his life time, and had worked hard in past campaigns to maintain the Conservative Government, but he now felt that it was in the best interests of the country that there should be a change of Government at Ottawa. (Cheers.) After what occurred at Ottawa during the past few months it was surely time for the people to wake up and let the scales drop from their eyes. (Cheers.) The Conservative Government had promised wonderful things to the people of Halifax for years. This city was to be the great Liverpool of America. (Laughter.) In fact, our commerce in the harbor was to be so

great that we would not be able to see the town across the water because of the many ships in the way. (Laughter.) Well, gentlemen, Dartmouth could still be seen, notwithstanding the glowing predictions. (Laughter.) Today he only saw two coal barges and a steamer laying in the harbor, and these were laying up, but the Spanish Government had come to the rescue and had taken pity on us, and sent us a warship to corroborate the old predictions. (Roars of laughter.) He sincerely thought for years that some of the benefits promised by the Conservative Government would be realized, but it must be frankly confactories established that the people would hardly be able to see the sky because of the volumes of smoke from

Some years ago a number of merchants and others, carried away by these rosy predictions, had invested money in a cotton factory in Halifax which was to bring wonderful prosperity to the investors, but the result was that after running a few years the investors were paid off at the rate of 50 cents on the dollar.

Since then these factories were place ed in a combine, and in order to get any article from that combine the purchaser was compelled to pay the

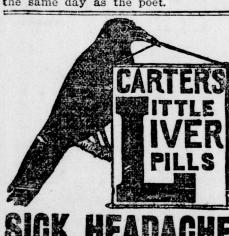

combine price. What constitutes the prosperity of country? He was inclined to think the true test was population. It was claimed, indeed, that every good citi zen of a country was worth yearly to that country \$500. But what did the census returns in Canada show? During the ten years from 1881 to 1891, so published must have been a shock and a sad surprise to every well-wisher of his country. The total increase for the city and county of Halifax during these ten years was only 3,441 perthese ten years was only 3 Why, he felt inclined to believe that almost that many people came here from Newfoundland during that period. In the Province of New Brunswick the census returns were even more shocking. In the important seaport of St. John there had actually falling off in population to the extent of 1,940 persons. What did that test of prosperity show? If any elector took a walk through Water street in Halifax, he would find within a radius of 200 feet from Pickford & Black's wharf some of the finest property in the city completely idle. One fine property in that vicinity, which had cost \$22,000, was offered for sale, and the highest bid was \$7,000. In that vicinity there were properties in which years ago a splendid business was conducted, now unused and affording no employment. It was curious to observe many of his fellow-Conservatives ready to grumble at dull times throughout the year on every occasion except when an election

campaign was inaugurated—(cheers and laughter)—when, of course, everything was bright and prosperous. (Re newed laughter.)
Anyone who studied the tariff would have to admit that it bore heavily on the poorer classes. In the matter of wall paper, carpets, oil, nails, tools, clothing and many of the necessaries of comfortable existence the struggling classes were oppressed by a burden-

some taxation. (Hear, hear.)
Now, gentlemen, I have not been speaker at elections, but, as many of ou know, I have been a worker, and want to be a worker with you all Cheers.) I sincerely believe that it is the duty of independent men in this campaign to support the Liberal can-

Government by Combines.

One of the glass factories in Hamilton has long been idle, because the combine which rules that business found it expedient to limit production and keep up prices. The same thing happened to the rope walk, bought up and closed by the cordage trust. The nail combine has kept the Hamilton nail works idle more than half the time during the last five years. These things affect consumers seriously, but disastrously. - Hamilton employes

Our contemporary could make many additions to its list, showing how little the combine managers care for the interests of the workers so long as they can amass their millions by the agency of class legislation obtained for them at Ottawa, in exchange for supporting the men now in power. No more convincing argument could be adduced than the experience of the cotton factory workers in the neighboring town of Dundas. This factory was started away back in the fifties, run at a profit right on the sixties and the seventies, times of world-wide depres-Many of the workers grew up from childhood in the factory, married and settled down in their little homes. But in an evil day the high tax policy was agreed to by the electors-or, rather, that "judicious readjustment" of taxes, which, it was promised, would not result in increased taxation or in class favoritism. The outcome of the hig tax policy was the speedy formation of a combine, which resolved to shut up some of the leading factories, in order that the supply might be curtailed and the profits increased. What that meant to the unfortunate operatives in towns like Dundas it is unnecessary here to state. It brought want, and it drove them in numbers to seek a living in a foreign land. What the combine brought those men who engineered it, with the aid of the Government at Ottawa, now on trial, was conclusively proved in the House of Commons. In the four and a half years ended Aug. 31, 1895, the cotton combine, comprising ten mills, made profits amounting to \$1,982,551, nearly two million dollars. The average profits in each year were \$490,000, reaching in one year 39 per cent upon the paid-up stock, and equivalent to an average annual dividend of 293-4 per cent for each of the four years and a half of the combine's short but golden existence. During that period the members of the combine paid themselves in dividends \$902,500, and piled

up a revenue fund of \$1,075,167. And the professional politicians of the country are now going to and fro alleging that a Government which passes laws having these inequitable results, deserves the support of the independent electorate!

Trust Him Not.

Dr. Montague is going about the be from Right Hon. Walter Long, of the Board of Agriculture in England, stating that the Canadian Government was not to blame for the imposition of the cattle embargo by the imperial Government, as the Patrons allege. If this is the same Dr. Montague who fooled the Indians with a bogus proclamation from the Queen, and was accused of writing anonymous letters about Sir Adolphe Caron, it will be necessary for him to get Long's letter certified to before it will be accepted .-Dundas Banner.

Our contemporary can rest assured that he is the same Dr. Montague; that so far he has not repented of the royal bogus proclamation, and that he has not yet vindicated himself in the courts on the anonymous letter matter, though months ago he solemnly pledged his word to Parliament that he had gone to Toronto and set the law agoing to punish his alleged traducer, who, by the way, he more than insinuated was a fellow-Minister of the Crown. Under all these circumstances, it will perhaps be as well for the public to demand that the alleged letter from Mr. Long be certified to as authentic beyond question before any faith is put in it.

Still They Come. Joseph Ford, jun., Mayor of Portneuf, Quebec, a well-known manufachitherto a Conservative, has come out strongly in favor of the Laurier-Mowat Administraan influential business man, and will bend his best energies to secure the election of Sir Henri Joly. He presided at the recent meeting held in Sir Henri's interest by Mr. Laurier. Mr. Ford is only one of hundreds who have hitherto supported the Conservatives, but who is alarmed at the Tupperian programme, and determined it shall not be put in force.

Padded.

The official list of Conservative man-Tuesday, with the object of devising ways and means to help their party, contained the names of three persons alleged to be doing business in London, but only one of these is known to the tax collector. The others are not even named in the city directory. A rather significant fact is that similar padaing has been resorted to with regard to Brantford. The Expositor says: "A long list of names is given in the Toronto papers of those present, but if the other places are no better represented than Brantford, the men who got up the meeting are in sore straits. The Brantford contingent is as follows:

"T. A. Staunton, Brantford Box Company. "Staunton & Son, Brantford.

"A. W. Allan, Allan Manufacturing Company. "We know something here of the Brant Box Company, which is composed principally of that stalwart Tory, Mr. John F. Ellis, of Toronto, whose name appears elsewhere in the list, but as for the rest of the alleged manufacturing establishments of Branford, we are in complete ignorance. Yet it is by such methods that it is persistently sought to get up an industrial boom' for the N. P."

Britain's Pre-eminence.

In 1861 the United States had shipping of 2,500,000 tons. In 1890 this tonnage had decreased to 982,000 tons, though the foreign trade of the country had increased threefold. / Great Britain's merchant navy progress, unmarked contrast with that of the United States, blighted by trade restriction. The Glasgow Herald points out that the total tonnage of the merchant navy of the British Empire reaches at the present moment to upwards of 10,-000,000 tons. In making this calculation, it is evident that the Board of Trade authorities take the net tonnage of steamers as well as of sailing If, however, they were to they would calculate steamers on the gross tonnage, with the result that the total could fall very little short acted with Kate Claxton for of 13,000,000. How do these figures compare with former years or with the shipping owned by other maritime nations? Half a century ago the whole British tonnage did not come to onefourth of what it is now, while even in 1870 it was little more than half. A not by steam but by sails. Now steamers preponderate, and thus add immensely to the carrying power of our slive. mercantile marine. As to the comparison with the trading fleets of other generally that the British tonnage is larger than that of the whole of the stop Mr. McKinley's nomination rest of the world put together. The exact figures are: Total tonnage of the world, 24,569,946; total British tonnage, 12,969,951."

And Great Britain is the country a which the junior Tupper recently ing on, and which will not be ended pointed the finger of scorn as a nation until the nomination is made at St. baffled in its commercial development by its rivals, and on the down grade!

By the Way.

Sir Charles Tupper asserts that he made his millions out of the medical profession. Is there a medical man in Ontario who believes it? The most successful doctor in the Province today is not a millionaire. 11 11 11

No mechanic or workingman will be injured by putting a stop to the plundering and blundering that has for some time been the rule at Ottawa.

The friends of good government who are convinced that a change of Administration at Ottawa is absolutely necessary for the future welfare of Canada, should everywhere get tocountry reading a letter purporting to gether. Holding to principles is very good, but without organization to secure their triumph there can be no improvement.

Ottawa City Council has voted that the members of the Court of Revision, as established under the new act, shall receive \$50 a year for their services. The probability is that the aldermen assume that because they used to do the work for nothing, the pay should be merely nominal.

11 11 11 The Liberal policy can be embraced in two words: Investigation and conciliation .- Hon. Geo. W. Ross.

J. H. Ashdown, the great Winnipeg merchant, was left off the Dominion voters' lists in that city. Of course he is a Liberal. Fortunately, the high tax candidate in the Prairie capital can be elected without the vote of this representative citizen, but it would interest many to learn the excuse for his disfranchisement.

It may not be generally known, but Sir Charles Tupper expects to be shortly able to assert that he, and not Columbus, discovered America.

The cardinal offense charged by the Spectator against one of the Liberal candidates in Hamilton is that he does not always wear the same description of headgear when he goes canvassing contemporary has not raised any question as to the candidate's trousers, coat or underclothing, but as the campaign goes on the criticism will doubt less be extended.

An Old Lady Accidentally Poisoned at Lindsay.

Shot Near Stratford - A Tragedian Drowned.

Lindsay, Ont., May 22.-Mrs. Walker, aged 94, has lived with her son-in-law, Mr. Henly, where she has been tenderly cared for by daughter for the last 25 years. terday morning Mrs. Henly wished to give Mrs. Walker a dose of cascara, which medicine was in a vial beside another of the same shape and size containing carbolic acid. By a mis-take a teaspoonful of carbolic acid was swallowed by the feeble old lady. The mistake was noticed at once, and medical aid summoned, but all too She died in an unconscious state about two hours after taking the dose.

TWO MEN SHOT. A peculiar and possibly fatal accident occurred Wednesday evening in the township of Downie, near Strat-Wm. Kelly was shooting at a mark with a double-barrelled gun, which, being overcharged, "kicked" violently, causing the second barrel also to be discharged, the contents of the barrel striking Kelly's brother Michael and John Welsh, who were behind him. Over a hundred shot entered Kelly's breast and abdomen, Welsh received some in the face, one shot entering his eye. The ultimate result of their injuries is oblematic, none of the shot having en removed as yet.

SMOTHERED IN A CHURN. The wife of Mr. J. D. Felker, of 7:15 a.m. Gainsboro, Ont., was found dead beside her own house. It seems that her husband had set out the churn, and she is supposed to have been churning at the time, as the churn was upset and she was found lying the milk. can you expect but nervous prostra-tion, debility and nervous headaches? If the cause is found in impure blood, the cure must be in making the blood pure. This is just what Hood's Sarsaparilla does, and it has proved the true nerve tonic because it is the true blood purifier, and the solace, comfort and defender of thousands of housewives,

of both sexes. Just read this letter:

"I think it is my duty to tell what Hood's Sarsaparilla has done for me and my family. Two years ago I was in a weak, nervous condition and had dreadful palpitations or jumping of my heart, followed by sinking spells, which would last for several minutes. Sometimes it would seem as though I would never come out of them. I was treated by the best physicians, but only for a little time did they help me. I seemed to be growing worse instead of better. I would often seem hungry, but when I ate, no matter how little, it would cause me such misery that I was often wicked enough to wish myself dead. I had that

ful distress in my stomach. I had given up all hopes of ever being well, when my mother wished me to try Hood's Sarsaparilla. I consented, to please her, and before I had taken the whole of one bottle I could see I was improving, and soon was indeed very much better. Its effects have been truly wonderful and I hope this letter may be the means of help-ing other suffering men and

THEDFORD.

Thedford, May 21 .- A fatal accident occurred on Wednesday on the first concession, township of Bosanquet. A young man named Robson was engaged for the summer with D. McKellar, and while taking a roller from one farm to the other the horses ran away. The roller passed over Robson's head wounding him seriously. Dr. McEdwards, of Thedford, was sent for, but before he arrived life was extinct. The young man's parents live in Arkona. William Rae, who has been attending Knox College, Toronto, is home for the holidays.

A very pleasant time was spent at the residence of Harry Cutt, fourth concession of Bosanquet, on Wednesday, when the marriage of his daughter, Annie, to Joseph Moloy took place. The ceremony was performed by the Rev. Mr. Thompson, of Corbett's Corners. The happy couple took the train for the West, intending to spend a short time in Uncle Sam's dominions before settling down to the stern reality of married life. Mr. and Mrs. E. Moloy spent Sunday

last in Sarnia. The death of Miss Bethia Ironside cast a gloom over our village. It occurred on Wednesday, the 20th inst. of pneumonia. She will be greatly missed, not only by her relatives, but by her friends. The funeral takes place on Friday to the Presbyterian cemetery at Pinehill.

Queen Victoria has sent a donation of 3,000 francs for the poor of Nice. A number of officials have received handsome presents, and the new Royal Victorian Order is to be conferred on the prefect.

LIFE SAVED .- Mr. James Bryson Cameron states: "I was confined to my bed with inflammation of the lungs, and was given up by physi-cians. A neighbor advised me to try Dr. Thomas' Eclectric Oil, stating that his wife had used it for a throat trouble with the best results. Acting on this advice, I procured the medi-cine, and less than a half-bottle cured me; I certainly believe it saved my life. It was with reluctance that consented to a trial, as I was reduced to such a state that I doubted the power of any remedy to do me any good."

A woman in Arkansas shaves her husband then gives the proceeds to the church. And yet they say there are no martyrs in these latter days.

The first clause of the motion was passed, and the streets will be cleaned on Saturday nights, but instead of being flooded, they will be watered earlier in the morning. Ald. Cooper's motion that the men be paid a quarter of a day for two

hours at night cleaning the streets, was dropped. Engineer Graydon reported that cost of laying a drain in Hunt's old mill race would be \$70. He asked that the work be done.

Ald. Pritchard moved that the recommendation be carried out, and the work proceeded with. He drew attention to the state of the old mill race,

that he had notified them that someing must be done. On motion of Ald. Pritchard the matter was recommended to the Board of Health, urging them to take the mat-

ter up, as much danger existed of contracting fever. Ald. Dreaney drew attention to the fact that the street railway had left the road in a bad shape on Dundas street by not filling in the track. He said Mr. Carr promised to attend to the matter and have it done, but that had not been carried out. He also spoke about no extension being under way, and the engineer explained that the street railway company had eighteen months from the date of the agreement to make the extension.

expended in each ward in the pay sheet. Carried. The engineer stated it to be utterly impossible for him to do any more than at present. He said the street railway company accounts had not been posted, while he and his assistant had to work many extra hours to keep up at all.

THE BAPTIST WOMEN.

Thursday's Session of the Mission Convention-Officers Elected. Chatham, May 22.-At the Baptist

Women's Missionary convention yesterday, an important resolution, embodying the suggested basis on which Indian fund is to be in future administered, and which was amended by the convention of Manitoba and Northwest Territories, and also the Women's Society, was submitand after discussion adopted, the following resolution being passed: "That this convention, assembled in following resolution being Chatham, expresses its approval the suggested basis, as amended by the convention of Manitoba and the Northwest Territories, also the Women's Society, and trust that it will be accepted by the Baptist convention of Ontario and Quebec, assembled at Montreal." The abolition of the Indian committee was also voted on and approved, subject to the work being taken up by the general com-

OFFICERS ELECTED. The Foreign Mission Board re-elected the old officers.

The officers of the Home Mission Board elected are: President, Mrs. C. J. Holman, Toronto; first vice-president, Mrs. R. W. Laird, Toronto; second vice-president, Mrs. D. Hutchinson. Last night, after receiving the repor f the corresponding secretary, Lilly, and hearing a capital address from the Rev. C. A. Eaton, of Toronto the convention concluded its labors.

Mrs. Celeste Coon, Syracuse, N. Y. writes: "For years I could not eat many kinds of food without producing a burning, excruciating pain in my stomach. I took Parmelee's Pills ac cording to directions under the head of Dyspepsia or Indigestion.' One box entirely cured me. I can now eat anything I choose without distressing me in the least." These pills do not cause pain or griping, and should be used when a cathartic is required.

The executive of the Ontario Alliance for the prohibition of the liquor traffic have decided to call a convention for July 16 and 17, to be held in Toronto, to discuss the action to be taken in view of the decision of the engineer replied that the property in question was the street railway's, and powers of the Province.

ordinary in Algoma. The Port Arthur Herald gives an ccount of the astonishing experience of Alexander Anderson, of Pearl River, with a she bear and her family, who resided near Ouimet, Algoma. Anderson and a Mr. Atwell were out looking for bears. While examining some tracks in a wooded ravine Mr. Anderson was startled to hear the angry whough! whough! of a bear close at hand. Looking up he saw a big female bear close upon him. Before he could move the animal was standing up in front of him ready to give him a good tight hug. Anderson, unable to use his axe, had recourse to the hypnotic power he possesses over the brute creation. He fastened his eyes upon those of the monster. The bear couldn't stand the hypnotic

stare and turned and fled. Mr. Anderson is still unaware whether he can hypnotize more than one bear at the same time, but at any rate he had just begun to congratulate himself upon the happy termination of his adventure, when he was frightened out of a year's growth by having a 2-year-old bear drop out of the tree under which he was standing and take to its heels after the old Then another one came tumbling down beside him and away up the hill it went. AN ALARMING INCREASE.

The Prevalence of Female Complaints Found to Result Largely from the Kidneys.

Saginaw, Mich., May 18.-Doctors are beginning to turn their attention more exclusively to the causes for the great increase of what are known as female complaints during the past ten years, and to the remedies for the same. Many cases have been in vestigated, and among others that of Mrs. Reany, of Ashland, Wis., who was cured of this form of trouble by the use of a kidney medicine known as Dodd's Kidney Pills, which originated in Canada, but has now become widely known and used throughout the Western States. This and other similar cases go to show that these troubles are largely due to the kidneys, and that the above mentioned remedy is likely to have a great effect in lessening the number

tims to this form of complaint. A disastrous cyclone and waterspout passed over Oklahoma Thursday night, causing great damage Several fatalities are reported.

Fair Movement of Merchandise-Shrink age in Call Loans-The Crop

Toronto, Ont., May 22.-According to Bradstreet's, the movement of mer-chandise in Ontario during the past week has been fair, considering that the general elections always hamper trade to some extent. Crop prospects are generally good. Pasture is abun dant, and the fruit crop is looking The winter wheat crop is no so important as heretofore. statement of chartered banks shows a decrease in commercial discounts and a further curtailment in call loans. Loans on grain are now maturing, and the paper is being taken up. The shrinkage in call loans is due to several of the banks withdrawing loans, so as to show a strong position at the end of their fiscal year.
R. G. Dun & Co.'s weekly statement of trade in Canada says: The trade

situation at Montreal is little

changed since a week ago. A mark-

volume of business cannot be more than moderate. Sugar is dull. Drygoods sorting business is hardly so good, but there is an improvement in collections. The leather market shows a little improvement, and som important transactions are reported in sole. Sides are stiffer, and dealers have advanced their quotations a cent since last week. Sheet zinc and spel-ter are both advanced. Dealers in oils, paints and glass report a fairly steady movement. Prices for new cheese have opened low, and for choice creamery butter the quotation has hardly got beyond 15 cents. The money market has eased off, and call funds are now available at 5 per cent. The trade situation at Toronto presents no new features. Reports generally are not satisfactory, and probably with the exception of drygoods and millinery business is quiet. Stocks of nearly all classes of merchandise are large, and the tendency of prices is consequently downwards. tion has increased more rapidly than requirements demand. There is a further decline in wheat and hog products this week. Butter, cheese and live stock are very low, and the outlook for wool is anything but bright. Manufactured goods, too, are exmarkets are steady. Prime commercial paper is discounted at 6 to 1-2 per cent, and call loans are quoted at 5 1-2 per cent. An easier market is expected after June 1. It declares all labor contracts with aliens void and makes parties thereto within jurisdiction of the United States punishable by a fine of \$1,000 or imprisonment not exceeding one year; makes it a misdemeanor for naturalized citizens, who have returned to a foreign country. make same his home, to again perform labor in the United States: makes it a misdemeanor for any alien to cross the border for labor in the United States except at a port of entry, and imposes a head tax of 50 cents on each immigrant.

The Family Doctor

Could pack his grip and leave the country without inconveniencing anybody if men permanently cure diseases caused by and women only knew the plain every-day principles underlying a healthy system. Take the kidneys for instance, possibly the most important organs in the whole body. When they are healthy the blood is pure and it is almost impossible to get sick; when they are not healthy it is almost impossible to get well without restoring the kidneys to

Backache is the warning note of diseased kidneys. Doan's Kidney Pills make weak kidneys strong, make diseased kidneys well. They never fail even in most distressing stages of kidney disease. A case in point was reported to one of our representatives the other day. Mr. Robert Bryanton, cooper, 419 Ontario street, London. Ont., states:

"For a long time I have been a suffere from kidney complaint, with distressing pain in the back and rheumatic pains all over my body, particularly in my feet. I had an itching, burning sensation all over; sometimes it was almost intolerable. The urine was very high-colored and variable in quantity. I was very restless and weak, badly troubled at times with palpitation of the heart, so much so that I had to prop myself up in bed. In fact I was a physical

"I saw the Doan's Kidney Pills advertise ment, and got a box from Strong's drug store. The result of taking them has been surprising to me. I am not a little better, but a great deal better. My back is all right, rheumatic pains almost gone; I scarcely notice them. Urine is natural in color and quantity, and all the disagreeable sensations have left me. I rest well and feel like work. The itching, burning sensation of my skin has disappeared, and be yond question the pills in removing my other troubles have relieved me of the palpitation of the heart and strengthened my entire system.

"I pronounce them the best medicine that I have ever taken, and I have tried a number of remedies for kidney troubles. I am really thankful for what they have done for

Makes thousands of women suffer in silence, rather than tell their troubles to anyone. To such Indian Woman's Balm is a per-fect boon. It cures all womb troubles, corrects monthly irregu-larities, abolishes the agonies of child-birth, makes weak women strong, and renders life worth living.

"Girofie-Girofia," as Presented by the London Operatic and Dramatic Association.

The London Amateur Operatic Association, to which theater-goers have been annually indebted for some very fine performances, produced Lecocqu's charming opera, "Girofle-Girofla," last night at the Grand. If the audience was not so large as the merit of the company justifled, it was because of the lateness of the season and the warmth of the weather. The association has certainly given the public nothing better than "Girofle-Girofla." The stage management was excellent, and the perfomance went smoothly over the boards. The settings were admirable and the wardrobe effects were unusually rich and appropriate. Of the six principals, three were new to the audience in operatic work, but all acquitted themselves with credit and even distinction. In the title role Miss Eva N. Roblin achieved a decided success. Her brilliant soprano was heard to the greatest advantage, and won for her several hearty recalls, notably in the drinking song, which was splendidly given. Miss Roblin united with her vocal abilities dramatic talent of a high order, acting with delightful vim and vigor. Miss Tillie Barnard is no stranger, and though the part did not call for the display of her fine alto voice to any extent, she filled her somewhat difficult character with great acceptance. Miss Katie McLaughlin made a bewitching Paquita, and played with sprightliness and grace. Her enunciation was clear ant, sure and effectual. If your drug- and melodious. HYAMS HEARD FROM.

Have Settled at Buenos Ayres and Are Engaged in the Real Estate Business.

Toronto, May 21.-A letter has been received here by one of the counsel engaged in the defense of Harry P. and Dallas T. Hyams, who were acquitted of the charge of murdering Willie Wells, the brother-in-law of the latter, and forfeited their bail in prefery and fraud. The twins have decided to locate at Buenos Ayres in the Argentine Republic, from which place mended a real estate and brokerage business in that refuge for men who have fled to escape the consequences of their crimes. The letter, which covers several pages of foolscap, gives a detailed history of their movements since the eventful Sunday upon which they went on a special train from the Union Station. The twins first sailed remained several weeks before finally deciding upon locating in the Southern Republic. Harry made no inquiries whatever with reference to his wife, the sister of the boy for whose murder they were tried and acquitted, nor has she received any communication direct from her husband since the day of his arrest. The first installment of the money deposited to the credit by Chapman Hyams, of New Orleans. the brother of the twins, has been paid her since her release from Dr. Temple's hospital some weeks ago. Her health, which then showed signs of improvement, has continued to mend, and she has now been sent to another climate, where it is thought she will
