KINGSTON, ONTARIO

No. 7379

THE
BROCKVILLE ALMANAC,
OR
EASTERN CALENDAR,
FOR THE YEAR OF OUR LORD

1843:

Being the third year after Bissextile or Leap year; and
until the 20th of June, the 6th year of the Reign of
QUEEN VICTORIA.

Besides the usual Astronomical calculations, this Almanac
contains a variety of useful information, relating to
Public Offices, Courts, Township Meetings, As-
sessments, &c. with many valuable Recipes.

Brockville is in Latitude 44 degrees 34 minutes north, and
Longitude 75 deg. 51 minutes West from Greenwich.

BROCKVILLE:
Printed and sold, Wholesale and Retail, by Wm. BULL,
at his Book & Stationary store on main street.
[Great allowances to wholesale purchasers.]

W.P.
F1056. B8 1843

HERSHELL'S WEATHER TABLE.

For foretelling the weather, through all the Lunations of each year, forever.

	IN SUMMER.	IN WINTER.
If the new moon, the first quarter, the full moon, or the last quarter, happen		
Between midnight & 2 in the morning,	Fair.	Hard frost, unless the wind is s. or w.
— 2 and 4, morn.	Cold with showers.	Snowy and stormy.
— 4 and 6, "	Rain.	Rain.
— 6 and 8, "	Wind and Rain.	Stormy.
— 8 and 10 "	Changeable.	Cold rain if the wind be w. snow if e.
— 10 and 12, "	Frequent showers.	Cold and high wind
At 12 noon & 2 P.M.	Very rainy.	Snow and rain.
Between 2 & 4 P.M.	Changeable.	Fair and mild.
— 4 and 6 "	Fair.	Fair.
— 6 and 8 "	Fair if wind n. w.	Fair and frosty, if wind is n. or n. e.
— 8 and 10 "	Rainy if s. or s. w.	R'n or sn'w if s.s.w.
— 10 and midnight	Ditto.	Ditto.
	Fair.	Fair and frosty.

Observations.—1. The nearer the time of the moon's change, first quarter, full, and last quarter are to midnight, the fairer will the weather be during the seven days following.

2. The space of this calculation occupies from ten at night till two next morning.

3. The nearer to mid-day or noon, the phases of the moon happen, the more foul or wet weather may be expected during the next seven days.

4. The space of this calculation occupies from ten in the forenoon to two in the afternoon. These observations refer principally to the summer, though they affect spring and autumn nearly in the same ratio.

5. The moon's change, first quarter, full, and last quarter happening during six of the afternoon hours, i. e. from four to ten, may be followed by fair weather; but this is mostly dependent on the wind as is noted in the table.

THE WEATHER.

In compliance with the usual custom, the publisher has inserted through the calendar pages of this Almanac, a running account of the weather. It is however, known that very little reliance is to be placed in such matters.

THE SIGNS.—EXPLANATIONS.

The Moon's place in the Zodiac is also given. It has been an ancient custom to apply this to the human frame, as operating on particular portions of it. Those who place reliance in this notion (which has long since been exploded by the learned) will find out what they desire, by substituting the parts of the body, for the astronomical name given in the last column of the calendar pages, as annexed :

Aries, head,	Leo, heart,	Sagittarius thighs,
Taurus, neck,	Virgo, belly,	Capricornus, knees,
Gemini, arms,	Libra, reins,	Aquarius, legs,
Cancer, breast,	Scorpio, secrets,	Pisces, feet.

Apogee—The greatest distance from the earth. *Perigee*—The least distance from the earth. *Aphelion*—The greatest distance from the sun. *Perihelion*—The least distance from the sun. *Digit*—One-twelfth part of the diameter of the sun or moon.

MOVEABLE FEASTS AND FASTS FOR 1843.

Septuagesima, Sunday, Feb. 12	Rogation Sunday, May 21
Shrove Sunday, Feb. 26	Holy Thursday, " 25
Ash Wednesday, Mar. 1	Whit Sunday, June, 4
First Sunday in Lent, " 5	Trinity Sunday " 11
Easter Sunday, April 16	Advent Sunday. Dec. 8

ECLIPSES FOR 1843.

There will be three Eclipses this year, two of the Sun and one of the Moon, as follows :

- 1st. Of the Sun, June 27th—invisible.
- 2d. Of the Moon, December 6th slightly visible at 7 o'clock 28 min. in the evening.
- 3d. Of the Sun, December 21st—invisible in this latitude.

CHRONOLOGICAL CYCLES FOR 1843.

To Protect Fruit from late Spring Frost.

Sir—Many expedients have been resorted to for the protection of fruit from the blighting influence of late frosts. Throwing a sheet over the tree, hanging iron upon it, kindling a fire under it, &c. have each been found to have a beneficial influence, but none have been more efficient than the experiment which I am about to describe.

My friend Major Ruff, who is a virtuoso, lately informed me that many years ago he saw it stated in a French Paper, that by throwing a hemp rope over the top of a fruit tree, when in bloom or near the time of blooming, and by letting its lower end touch the ground, the tree would be protected from the influence of frost. This I thought quite rational and philosophic—I accordingly made the experiment. To prove more fully the *modus operandi*, I took two dishes half filled with water, and set them a few feet distant, under the tree, on the night before an expected frost, the tree being nearly in full bloom. Throwing the rope over the top of the trees, I let the other end hang in the water of one of the dishes—the event proved the correctness of the theory. There was a hard frost on the morning of the 27th inst. and the dish into which the rope was deposited, contained ice of the thickness of a dollar, while that in the other dish was scarcely of the thickness of paper.

The philosophy of the above experiment is this: the rope which was previously wetted, was a conductor of heat; the air, and of course the limbs of the tree, became COLDER in the night than the earth—the rope conducted the heat from the earth to the tree, thus keeping up an equilibrium, and preserving the tree from frost.

As far as my observation extends, the critical time for fruit is long before it is in blossom; but it is nevertheless true, that severe and protracted cold at that time, or even later, will destroy the fruit. This was the case last year. The fruit was killed by severe frost after it had been formed.

There is not in my mind a doubt, that by attaching a rope to each tree of choice fruit, and thus letting it permanently remain through the winter and spring, that the fruit would be secured from the effects of frost.

To the incredulous and the supercilious who balance their grist all their lives with a big stone—who sufficiently wise, despise knowledge and instruction, the above may appear unworthy their attention. Let such be informed that it is not less philosophic than lightning rods attached to buildings to protect them from the influence of electricity—Let them be informed that

“There are more things in Heaven and Earth
Than their philosophy has ever dreamed of.”

GERMINATION OF SEEDS.—There is a complaint frequently made by those who purchase their garden and other seeds, that they do not grow; and hence it is inferred that unripe and inferior seeds are put up to increase the sales; and consequently the profits of the gardner and the seedsman. This inference may in some cases possibly be true, but that it is so in all cases where seeds do not grow, is certainly wrong; for no fact is more clearly ascertained, than that good seeds do not always germinate. Two things are indispensable to

the germination of seeds—heat and moisture, if either of these is absent, the process must be suspended. It follows as a necessary consequence, that seeds planted so deep that the rays of the sun cannot influence them must remain in a state unfavourable to their growth; and implanted in a soil where there is warmth but no moisture, the same result will ensue. Some seeds have a coating so hard that they rarely grow under ordinary circumstances. The man who should condemn his locust seed because they did not grow, when planted without preparation, would only manifest his ignorance: by pouring boiling water upon them, allowing them to stand 48

hours. he would find that most of them would germinate. The germination of beet seed is much accelerated and rendered more certain by the application of water nearly at the scalding heat, and allowing them to remain in it for twelve hours.

CHEMISTRY—When butter is to be made, if a little old butter be put into the cream, the butter will come from much less churning. When soap is to be made, if a little old soap be put into the ley and grease, the soap will be made with considerable less boiling.

NEW WAY OF RAISING BEETS.—A writer in the Farmer's Cabinet, says that the best crop of beets he ever raised, was an alternate rows with corn. The corn was a full crop; and he obtained three hundred bushels of beets to the acre, besides the shade of the corn seems to be useful, in dry weather, as the beets with the corn did better than others in an open patch along side. This was practiced in Pennsylvania, where it may be more successful than in colder climates; but we would suggest to farmers who have a warm, dry soil, an experiment in a small scale.

TINCTURE FOR THE TEETH AND GUMS.—Mix six ounces of the Peruvian bark with half an ounce of sal ammoniac. shake them well a few minutes every time before the tincture is used. The method of using it is, to take a teaspoonful and hold it near the teeth; then with a finger dipped in it rub the teeth and gums, which are afterwards to be washed with warm water. This tincture not only allays the tooth-ache, but preserves both the teeth and gums, and makes them adhere to each other.

SAVE-ALL PIE.—In every family there are pieces of fresh meat left of roasted meats: these take from the bones, boil and season, put in butter and flour; make a paste and place in a deep dish, put your meat in, cover it and bake it one hour. All meats can be used in this way, and with good paste and seasoning make a clever dinner.

PRESERVING MEAT SWEET IN SUMMER.—Veal, mutton, beef or venison, may be kept for nine or ten days, perfectly sweet and good, in the heat of summer, by lightly covering

DAIRY SECRET FOR INCREASING CREAM.—Have ready two pans in boiling water, and on the new milk's coming, take out the hot pans, put the milk into one of them, and covering it over with the other. This will occasion, in the usual time, a great augmentation of the thickness and quantity of the cream.

SUBSTITUTE FOR CREAM IN COFFEE.—Boil a pint of milk and let it cool, beat the yolks of three eggs, and stir in, it will make the coffee much richer.

To PRESERVE EGGS.—Take a piece of unslacked lime as large as a pint bowl, slack it by degrees, when well slacked put ten quarts of water to it and add salt till your eggs will rise, then put them in with care that none get cracked, and lay a cloth on the eggs that will keep them wet on the top.

PURIFYING TAINTED BUTTER.—Let the butter be melted and scummed as for clarifying, then put into it a piece of bread well toasted all over, In a minute or two the butter will lose its offensive taste and smell, but the bread will become perfectly fatid.

TO KEEP CLEAR OF BEDBUGS.—Take the white of four eggs, six pence worth of quicksilver, put them into a bowl, beat them until a perfect froth, take a feather and dip in and apply it to every part of your bedstead where bugs ever conceal themselves, do this early in the spring and but once a year and you will never see a bed bug in your house.—Never wet your bedsteads.

Never leave for to-morrow what should have been done to-day.

COURT OF CHANCERY.

The Lieutenant Governor is Chancellor ; Vice Chancellor, Robert S. Jameson ; Registrar, William Hepburn. There are besides two Masters, an Accountant and a Sergeant-at-Arms.

COURT OF QUEEN'S BENCH.

Chief Justice, the Hon. John B. Robinson ; Puisne Judges, Hon. James B. Macaulay, Hon. Jonas Jones, Hon. Archibald McLean, and the Hon. C. A. Hagerman. Attorney General, Robert Baldwin ; Solicitor General, J. E. Small. This court has a Reporter, whose duties are now regulated under the direction of an act of the Legislature passed in February, 1840.

The Court of Oyer and Terminer, General Gaol Delivery, and Nisi Prius, is held in the several Districts throughout the Province twice in the year ; being at some convenient time in the spring and fall.

A Court of General Quarter Sessions, under the superintendence of the Magistrates, of which the Judge of the District is Chairman, and a District Court, in which a Judge, appointed by the Executive presides, is held in every District throughout the Province, four times a year—Also a Probate and Surrogate Courts, having jurisdiction in matters relating to wills, &c.

Terms of the Courts of Queen's Bench.

There are four in the year, and at these times the Judges sit at Toronto and listen to the arguments of the Barristers and decide Law questions, etc.

EASTER TERM, commences on the first Monday in February and ends on the Saturday of the following week.

TRINITY, on the second Monday in June, and ends on the Saturday of the following week.

MICHAELMAS, on the first Monday in August, and ends on the Saturday of the following week.

HILARY, on the first Monday in November, and ends on the Saturday of the following week.

Time of holding the Courts of General Quarter Sessions.

JOHNSTOWN DISTRICT.—On the 31 Tuesday in February and May, and on the 21 Tuesday in August and November.

BATHURST DISTRICT.—On the 31 Tuesday in March, September, and December, and on the 2d Tuesday in June.

MIDLAND DISTRICT.—On the 4th Tuesday in January, and April, and on the 21 Tuesday in July and October.

EASTERN DISTRICT.—On the 4th Tuesday in January and April, and on the 2d Tuesday in July and October.

VICTORIA DISTRICT.—On the 2d Tuesday in January and April, and on the 4th Tuesday in July and October.

PRINCE EDWARD.—1st Tuesday in January, April, July and October.

District Court.—These are held in every District at the time and place of holding the Quarter Sessions.

The *Term Court*, in which Law points and other matters of practice are settled, always precedes the time of holding the Quarter Sessions, and the District Court as follows:—that is, the terms of the District Court, severally commence on the Monday in the week next but one preceding the week, and at the place, in which the sessions are holden, and end on the Saturday in the same week.

The District Court has jurisdiction in all matters of contract from forty shillings to £15; and when the amount is liquidated or ascertained, either by the act of the parties or the nature of the transaction, to forty pounds. For instance, a promissory note under forty pounds can be sued in this Court, and an open, but unsettled account of fifteen pounds, or under, but not over that amount. Also it has jurisdiction in all matters of tort respecting personal chattels, when the damages to be recovered do not exceed £15, and the title to land is not brought into question. By a statute of the United Parliament, the Judge of the District Court, presides in the Court of Requests. The ordinary costs of a suit range from £5 to £10—in the Queen's Bench from £10 to £30.

There are also Courts of Request, for the recovery of small debts under £10. By a recent statute, The District Judges preside in these and hold Courts in six divisions in each District once in two months.

TOWNSHIP OFFICERS.

Township Meetings to be held annually on the first Monday in January, by notice of the Township Clerk, after receiving a warrant from any two Justices of the Peace acting for the division in which the townships are situated, at such place as they may appoint. All Freeholders and Householders over 21 years of age are entitled to vote. The Officers to be chosen are: one Township Clerk, one Assessor, one Collector, a sufficient number of persons to serve as Pound Keepers and Overseers of Highways, three Town Wardens, and by stat. 4 Wm. IV. ch. 12, from three to eighteen Fence Viewers. No Magistrate is liable to serve; nor other person officer than once in three years, without his consent. Persons elected are liable to a penalty, if they do not within 20 days after their appointment subscribe to a declaration, to be prepared by the Township Clerk. Town Meetings regulate matters relating to cattle running at large, fines for breach of rules, height and description of fences, dangerous pits, obnoxious weeds, &c. Magistrates to hold a special sessions on or before the 3d Saturday in April in each year, at which road divisions &c. are to be arranged. For the duties of Township Officers generally, see chap. 29 1 Victoria. 1837—8; also the By-laws of the District Council.

By the late District Council Act, two Councillors are to be elected in each township having over 300 qualified voters, and one Councillor for each Township having a less number. — Seven School Commissioners are also to be elected for each of the former class of Townships, and five for the latter.

DISTRICT OF JOHNSTOWN.
