POLITICAL.—From the minaufacturing districts, the accounts are satisfactory. The news from India and China has bad a favorable tendency, and has imparted increased firmness.

ENGLAND:—The effect of the withdrawal of the French Ambassador produced a sensible effect on the Funds, but they soon tallied, and the belief was general that the movement on the part of France was a mere ruse of the ministers, to enable them to carry the new electoral law. Circulation has been given to an insulting note from Russia, addressed to Lord Palmerston, condemning in alrong terms the policy of the English Government in which Lord Palmerston understands the protection due to English subjects in foreign countries, carries with it such serious inconvenience, Russia will not henceforth grant the Heerty of residence to English subjects in foreign countries, carries with it such serious inconvenience, Russia will not henceforth grant the Heerty of residence to English subjects a foreign countries, carries with it such serious inconvenience, Russia will not henceforth grant the Heerty of residence to English subjects acception the condition of their remounting the protection of their Government,"

Under due of Paris, Thursday evening, the London Times, in allusion to the difficulty with England, says that Lord Palmerston's offer of componiuse has been rejected by the French Government, and at a Cabinet Council, the Presidet of the Republic declared that the acceptance of the conditions, and expressed their intention to adhere to and adopt them.

An attempted assistantion of the English is oredeted a great sensation throughout Europe.

France.—The alchate on the observed.

After the presentation of measurement number of peritions from all parts of France against the bill, and after a preliminary contention on the duestion of urgency, it was carried against the Mountain, by 461 votes to 239.

General Cavatigned, whose untile was first on the list of speakers, ascended the tribune. He rested his opposition to the measure on the letter and spirit of the Constitution, which required, as its first principle, the right of universal auffrage, and this was not to requisite, but to destroy that right. Besides, it was ill-tuned and despendent all timed, because it would have for effect, to raise, for the next, twa years, insurmountable difficulties in the way of Government; and dangerous, because it would serve to make and consolidate a hostile parity, composed of all show who should feel that they had been any stylepsived of privileges that had been conferred upon them by the Constitution. He was listened to with shooting attention, and not with no interruption, in the course of a long speech, and sitting down, was loudly cheered by the whole left.

The next important orator was Tictor Rugo, who delivered a glowing panegyric on universal splings. Of Wednesday, the hest apsaker of importance was M. & Mountembert, who gave the Legitimist argument in favot of the Rif. Emanuel Arago replied to him. M. Thiss was to speak on Thursday. On Wednesday there were 700 members present, and immunes crowds around the Hall of Amenthy. A consulton was created by the presentation of a petition dem

Prospect of a War with Spain.

-Warrington, June 3, 1850.

The chief topic of conversation this evening is the ramoned probability of a raintine with Spain on account of the refusal of the Captain-General of Cabe to deliver by the Languandins taken of the Island of Contoy, on the demand of Campbell, the American Consul. The substance of the reports in circulation is that of the incarceration of those worthy gentlemen in the calabooze of the More, General Campbell promptly represented that most of them were American citizens who had been illegally stresses by the Spanish Commander, and could not be detained without a violation of the neutral relations between Spain and the United States.

He argued vegt sensibly that Contoy was an unoccupied island belonging to Mexico, a power, or weakness, as the case might be, in amity with the United States; that when arrested, they had committed an overt act of hostility against Spain, and as to their intentious, that was a matter to be inquired into inder the laws of the United States. The Captain General paid no attention to the Consul's demand for ten days; at the end of that time he repeated it, find then it as sene by a refusal. Mr. Campbell then directed the Commander of the Monand for the days, at the end of that time he received with the Vanington. On Fridry lant, the despatches thus received were made the subject of solemn consideration in the Cabinet Council, and it was resolved to dispatch a messenger with instructions to telegraph the state of facts to the Government at Washington. ANALYSIS OF THE ST. LEON WATER.

I HAVE submitted to analysis the Water from the Source of St. Leon, and find it to be strongly sultne. It contains chlorids of sodium in large quantity, with suggests and lime, parity as carbonans, dissolved by the excess of eacherin soid, and parity as chlorids. Like most of the other saline vaters of the country, it centains bromine and iodine; in addition to which, I have detected, in small quantities, salis of barytes and stronia which had bitherto been met with only in the Waters of Varentees. In its general characters, it is allied to the Sources of Caxton, Plantagenct, and the Intermittent of Calcionia.

CREDIT RATES OF PREMIUM.

THE greet and decided success which has altended this institution has induced the Directors to REDUCE the RATES originally required in British North America to the ordinary European Rates. The result of such Reduction is to emble parties to avait filements of the invitoritant benefits of Life Assurance at much lower Rates of Premium than those of any other Assurance Company transacting bushless in Canada. The Directors have also resolved to extend to British North America the advantages afforded by the HALF CREDIT RATES of PREMIUM which have been so highly approved and are so generally adopted by Policy Holders in the United Kingdom. The most liberal conditions are likewise offered to "he Assured in the limits to which they may proceed by sea or land, to other parts of North America without affecting their Interest in their respective Policies.
