Edge-Sinclair Wedding

A very pretty wedding took place at St. Matthew's Church, Aldershot, Saturday afternoon at 3 o'clock when Pearl, youngest daughter of Mr. Robert Sinclair, was united in marriage by Rev. H. J. Leake, M. A., to Mr. Oscar Edge, elder son of the late John Franklin Edge and Mrs. Edge of this village. Mr. Stanley Edge, brother of the groom, acted as groomsmen, and Miss Alice Sinclair, sister of the bride, as bridesmaid. Miss Olive Serwood played the wedding march, and the choir, fully vested, sang the marriage hymn. Tasteful decorations were added to the Harvest Thanksgiving decorations. After the ceremony a dainty supper was served at the home of the bride's father. Mr. and Mrs. Edge will reside on Mill street, Waterdown.

Millgrove

Rev. John Pepper of Muskoka paid a flying visit to this neighborhood on Wednesday.

Harold and Mrs. Cummins of Toronto visited at the home of Mr. Ken. Cummins on Sunday last.

Harvest Home services were well attended here last Sunday. Rev. J. F. Wedderburn of Waterdown preached two powerful sermons. Millgrove choir in the morning and Carlisle choir in the evening rendered very fine music.

Mrs. Oldfield of Riverview is visiting in this neighborhood.

Masonic services will be held here next Sunday at 2.30 p. m. Rev. J. M. Copeland of Hamilton will preside.

The Women's Institute are giving a pumpkin pie social in the public hall on Halloween.

Mr. Miles Markle is on the sick list.

Mrs. C. R. Albright is home from the hospital where she underwent an operation for nasal trouble.

Grace Church

REV. H. J. LEAKE, M. A., Rector
19th Sunday after Trinity

11 a. m.—Holy Communion. Sermon. "Do it well and do it now."

Anthem by the Choir—"Lord, in the morning."

7 p. m.—A Sign, Spoken Against Yet Followed.

Sunday School and Bible classes meet at 10 a. m.

The W. A. meets in the Parish hall Thursday, Oct. 6th at 2.30 p. m. The A. Y. P. A. at 8.30 p. m.

Knox Church

REV. J. F. WEDDERBURN, B. A., B. D., Minister

Services at 11 a. m. and 7 p. m.

Mission Band meets Sunday afternoon at 3 o'clock.

Sunday School and Bible Classes at 9.45 a. m.

Methodist Church

REV. C. L. POOLE, B. D., Pastor

Sunday School 10 a. m.

Public Services 11 a. m. and 7 p. m.

Prayer Service on Thursday evening at 8 o'clock.

Ann Dundon

The funeral of the late Ann Dundon, who died at St. Joseph's Hospital on Sunday afternoon, September 18th, took place Tuesday morning from Dwyer Funeral Parlors at 8.30. The remains were conveyed to St. Mary's Cathedral where High Mass was celebrated by the Rector, Rev. Joseph O'Sullivan. The boys cathedral choir was assisted with solos by Mr. John Bingham, and Mr. Chas. E. Staunton who sang Offertory "Mimine Jesu" and "Libera Me" after the mass.

The pallbearers were Peter Ryan, Matthew Hayes, John Jamieson, Thos. J. Curran, M. J. Ball and J. P. Ball. The grave-side services were conducted by the Rev. Father McNeil, senior curate of the cathedral. Many friends from Waterdown and vicinity were present to pay their last respects to the deceased, who was well and favorably known for her kindly disposition.

Deceased had been in the employ of Mrs. Samuel Cook, of the American Hotel here, for the past 25 years. She is survived by two nephews, M. J. and J. P. Ball, and two nieces, Mrs. Thos. W. Curran and Mrs. John L. Jamieson, all of Hamilton.

Women's Institute to Meet October 5th

The Waterdown Women's Institute will hold their regular monthly meeting in Grace Church Parish Hall on Wednesday, October 5th at 2.30 p. m. Members are requested to be on hand promptly at the appointed hour in order to have the business part of the meeting over with on time. From 4 to 6 a reception will be held for the teachers of the High and Public schools and the Trustees and their wives. Rev. C. L. Poole will speak on co-operation between home and school. There will also be a musical program. The committee in charge have spared no effort to make the afternoon both pleasant and profitable. Each member is requested to bring two cups and plates.

Methodist Church Harvest Home

The Anniversary Services in the Methodist church last Sunday were a splendid success. The Rev. H. B. Christie of Brantford preached two eloquent and convincing sermons to large congregations. The male choir assisted by Mr. Thomas McKerr of Burlington won for themselves many words of praise. The collection amounted to \$436. The supper and entertainment on Monday evening was largely attended, the supper was all that could be desired and the program excellent. The evening's proceeds were \$145.

NOTICE

Will the owner of the stepladder which was loaned for the St. Thomas Church Garden Party, please notify John O'Connor.

BORN—At Waterdown, Monday, September 26th, to Mr. and Mrs. Russell Place, a daughter.

Remember the King's Daughters Concert in the Rink Tuesday Evening, October 4th.

Locals

Mrs. Dale of London is the guest of Mrs. Keir this week.

Miss Jennie Johnston is visiting friends at Grand Valley.

Mr. and Mrs. E. E. Bossence have moved to the city for the winter.

Mrs. A. D. Keir spent a few days with friends at St. Mary's last week.

Miss Nellie Prudham of Hamilton is visiting her aunt, Mrs. Martha Prudham.

A large number from here attended the Burlington and Ancaster Fairs yesterday.

Miss Cicely Hawkins of Hamilton spent Wednesday of this week with Mrs. G. H. Greene.

Mr. Wm. Guerin and son Joseph of Chicago are renewing acquaintances in the village.

Mrs. Jane Baker left last Friday for a week's visit with relatives at Niagara Falls, N. Y.

Mrs. Chas. Thompson of Kilbride visited with her daughter, Mrs. John Daley, a few days this week.

Mrs. R. J. Hamilton of Strabane is spending a few days with her daughter, Mrs. Wm. Attridge.

The Waterdown Agricultural Fair will be held this year in the Drill Hall on October 18th and 19th.

Mr. and Mrs. Fred Jones of Cheltenham visited with Mr. and Mrs. Chas. H. Drummond on Sunday.

Mrs. Wm. Louns and little daughter, of Toronto, are visiting her parents, Mr. and Mrs. E. T. Sawell.

Mr. and Mrs. Stuart Gallagher of Woodstock called on a few of their old friends in the village on Sunday.

Miss Ann Raybould of Mt. Hamilton hospital has been enjoying a two week's vacation calling on friends here.

Rev. J. H. Wedderburn of Knox church exchanged pulpits with Rev. C. R. Albright of Millgrove on Sunday last.

Mr. and Mrs. Jas. Rutledge and little daughter Jean left on Saturday to spend a few days with relatives in London.

The many friends of Mr. Rueban Sparks, who has been seriously ill, will be pleased to know that he is recovering nicely.

Mr. and Mrs. Chas. H. Drummond left Tuesday evening on a two week's visit with relatives in Port Elgin, Underwood and Kincaidine.

Mr. Bovard and family have moved back to the village and are living on the property formerly owned by Mr. Geo. Allison on Flamboro street.

Mrs. David Corral of England, Mrs. Morley Shaver and Mrs. Theron McDonough of Westover, spent the week end with their mother, Mrs. H. Heatherington, Kelly street.

On Sunday last Rev. C. L. Poole preached at Grand Valley. This was Mr. Poole's first charge in the ministry, and his visit was the occasion of a very full house to greet him.

Mrs. W. J. Spence and children, who have been visiting in Manitoba for the past three months, arrived home last Thursday evening. They were accompanied by Mrs. Spence's mother, Mrs. Skinner.

NOTICE OF APPLICATION FOR DIVORCE

NOTICE IS HEREBY GIVEN that Mildred Emma Blachford, of the City of Hamilton, in the County of Wentworth, in the Province of Ontario, will apply to the Parliament of Canada at the next Session thereof for a Bill of Divorce from her husband, Albert Charles Blachford, of the City of Detroit, Michigan, in the United States of America, Editor, on the ground of adultery.

Dated at Hamilton, Province of Ontario, the 22nd day of August, 1921.
SNIDER, MORGAN & WALSH,
Solicitors for Applicant.
ANDREW T. THOMPSON, K.C.,
Ottawa Agent.

VOTERS' LIST, 1921

MUNICIPALITY OF THE Village of Waterdown

Notice is hereby given that I have transmitted or delivered to the persons mentioned in Sec. 3 of the Ontario Voters' List Act, the copies required by said section to be so transmitted or delivered of the list made pursuant to said act, of all persons appearing by the last revised Assessment Roll of the said municipality, to be entitled to vote in the said municipality at elections for members of the Legislative Assembly, and at Municipal elections, and that the said List was first posted up at my office at Waterdown, on the 19th day of September, 1921, and remains there for inspection.

And I hereby call upon all voters to take immediate proceedings to have any errors or omissions corrected according to law.

J. C. MEDLAR,
Clerk of Said Municipality

Light Fall Pruning Is Safe.

Light pruning in fall is permissible, but heavy pruning is dangerous and likely to result in serious damage from winter killing, especially if the succeeding winter is severe. The injury is caused by drying out of the cut area and may be prevented by covering all wounds of any size with a good covering of paint made from pure lead and oil. Do not use prepared paints, as these contain injurious benzine or turpentine driers. To make an effective covering it will be necessary to give not less than two coats, because one coat will not prevent checking and drying of green wood. Coal tar makes an excellent wood covering and is easily applied.

This matter of covering wounds made in fall or early winter is frequently slighted by orchard men, but the writer has seen such serious damage result from neglect of this precaution that he feels justified in warning fruit growers with regard to the practice. In experimental trials in the College apple orchard, varieties so hardy as Duchess of Oldenburg, Wolf River, Snow and Scott's Winter have suffered very serious injury following November pruning with the cuts left unprotected. The wounds dry out around the edges and by spring the dead area is greatly enlarged, frequently extending down the trunk or branch a foot or more. The dead bark comes away later leaving a large dead area, detrimental to the parts above and certain also to decay later.

It is not likely that injury would follow the cutting of branches below an inch in size unless many were removed and there probably would be no necessity for covering such wounds. All above this size, however, should be thoroughly protected.—J. W. Crow, O. A. College, Guelph.

Barberry Hedge Spoiled Ten Crops.

Hundreds and hundreds of instances can be cited to show that the common barberry is the most important factor in the spread of rust in northwest states. In a Government bulletin on rust and barberry, Dr. C. E. Stakman of Minnesota University Farm relates the experience of a farmer at Crystal Bay, Lake Minnetonka, Minn., who had a barberry hedge of 635 bushes. He had tried to grow oats on his farm for ten years, but each year the black stem rust destroyed almost all the grain. Then one spring he destroyed the hedge before the bushes had become rusted. Ten days before the harvest the field was examined thoroughly and no stem rust could be found. The yield and quality proved to be excellent. It was the first time in ten years that a crop had been grown successfully on that farm. Every land owner should begin early in the spring to destroy the barberry for the protection of grain crops.

War Knits.

He (after he had watched her knitting for an hour) — What are you knitting?
She — I don't know yet.

NUNGESSER'S RECORD

GREAT AVIATOR IS PAYING A VISIT TO AMERICA.

Famous Frenchman Claims to Have Brought Down More Planes Than Any Other Flying Fighter in the War — His Unofficial Score Is Given as 105 Kills, Although His Official Mark Is Much Smaller.

NUNGESSER, one of the greatest aviators in the war, is visiting in the United States, and receiving the public notice and compliments to which he is entitled. Some of his admirers contend that Nungesser brought down more planes than any other aviator, his unofficial score being 105. Officially he is credited with only 44. Probably no other aviator had so many narrow escapes from death as the famous Frenchman. To-day his skull, one arm, one foot and one leg carry metal supports, but nevertheless he moves about spryly and occasionally indulges in dancing, which is his favorite amusement. One of his compatriots says that in France Nungesser is more famed for his fetish than for his exploits. He attributes his remarkable escape from death to the fact that he invariably carried in his pocket a little gold medal upon which was carved a death's head. The same sign was invariably painted on his plane, and perhaps there was no other plane so well known to the Germans. Knowing the value he set upon the pocket piece the Germans are said to have offered rewards which eventually reached the sum of 500,000 marks to the Hun aviator who would secure it. Not while he lived would Nungesser surrender his mascot, and its possession would be taken as proof of his death.

Nungesser had experience as a flyer before the war broke out but he entered the army as a cavalryman in the Second Regiment of Hussars, which became part of the famous Fourth Division, and it was as a hussar that he first distinguished himself. The incident occurred "in the bad days of Charleroi" in August, 1915, when the French army was retreating under the protection of cavalry. French and German forces mingled in the dark one night, and Nungesser seeing a German automobile with nobody in it, sprang into the machine, and made off with his commander as passenger. The Germans gave chase. They fired on the car and swarmed toward it from all sides. They overtook it standing by

the road, but when they searched they could find no trace of the Frenchmen. For a moment as they explored the neighborhood, the car was again unguarded. Once more Nungesser with his commander sprang from the darkness, and whirled away with the car. This time they got free and rejoined their regiment. Nungesser was wounded, and by saving his commander he had performed a service so important that he was awarded the medaille militaire, one of the most coveted of French decorations. He still retains his rank of a lieutenant of hussars which he prefers to use instead of his aviator rank of captain. The scarcity of trained flying men led him to offering himself for this branch of the service and his first flight distinguished himself by bringing down a Hun who had made some reputation as a layer of French flyers. He used several planes from first to last, but his favorite was a Nieuport, a small, light machine of 130 horsepower. It was on this that his famous death's head was first displayed, and the little white plane soon became a special target for German airmen. On account of the reward offered for the killing or capture of Nungesser, the enemy was particularly keen to engage him, but not single-handed. Frequently he had to fight six or eight at a time.

Not counting the wounds he received as a hussar, Nungesser was wounded seventeen times in the war. It is said that time and again the surgeons despaired of ever being able to patch him together. Nungesser, himself, always attributed his recovery to his fetish. He was badly wounded in one side of the head, and had two bullet wounds in the other side. His jaw was splintered by an exploding shell. A bullet passed through each side of his chest. At various times, elbow, leg and foot were shattered. In addition he sustained several flesh wounds in different parts of his body. Not only were several of the wounds ordinarily sufficient to cause death, but the doctors were further hampered by the difficulty of keeping Nungesser in hospital long enough for him to completely recover. As soon as he was sewn up enough to sit in his plane he would insist upon returning to duty. The flames of fury against the Hun burned no more strongly in any soldier's breast than in that of Nungesser.

As soon as the war was over, Nungesser applied himself to the task of devising improvements for airplanes. He is an engineer and already is said to have several inventions to his credit, at least one of which seems destined to be extremely important. He is also the head of a school of aviation near Paris, for which office the French Government pays him more than a million francs a year. Nungesser says that while existing planes meet all demands for sport and war there is no type suitable for the needs of commercial transportation. It is his ambition to supply this need, and it is said that already he has made substantial progress toward his goal.

Best Methods in Preservation of Hay.

In a season of labor scarcity haying is a problem on the average farm. It is necessary to make use of all the modern machinery available in order to expedite the saving of this important crop. First, then, we must emphasize the use of machinery in curing and storing. Men are not to be had in plentiful supply, but, in most cases some form of co-operation may be resorted to in order to obtain the use of tedders, hay loaders and horse forks to handle the bulk of the crop. By all means plan to use machinery in place of men this year or otherwise considerable of the crop will not be harvested in the best possible condition.

It is usually safe to cut after a rain when the weather appears to have cleared. Red clover should be cut when about one-third of the heads have turned brown. The tedder should then be used until the crop is dry enough to rake—a period which will vary according to the weight of the cutting, the weather and the amount of sap in the stalk. Gather with a side-delivery rake if possible, or in small windrows with an ordinary dump rake. The hay loader works best with a small windrow. By all means use a loader if possible and to facilitate matters a sliding rack may be used so that when one-half the rack is loaded it may be pulled ahead and the remainder loaded. In a pinch this will save a man. The horse fork and slings save much time in unloading.

We mention red clover because it is the commonest and most satisfactory hay crop, and is used in all general farming hay mixtures.

Timothy should be cut either after it is out of the first blossom or after the second blossom has fallen—generally the latter. It will require less tending than clover, is more easily cured, and may be drawn in sooner after cutting. Do not let it get too ripe and woody.

Alfalfa should be cut when the young shoots are noticed starting out from the axils of the lower leaves on the stalks, and should be handled much like red clover, only greater care is necessary to preserve the leaves, a very valuable portion of the plants.—Wade Toole, O. A. College, Guelph.

Good seeds are uniformly bright colored, whereas seeds that have been exposed to moisture, or that are dead, are duller and darker in color. Some good disinfectant such as cresoline, zenoleum, or carbolic acid solution applied to the navel of foals immediately they are born and each day for a week or more will often save the colt from navel ill.

The Cunard Line.

Samuel Cunard was the founder of the Cunard line of steamers, and dispatched the first subsidized vessel, the Unicorn, from Liverpool to Halifax in 1840, followed by the Britannia, the first regular steamer of what became known as the Cunard Line. Samuel Cunard lived in Halifax.

To the Farmer:

The purchase of a Piano or Victrola is only purchased invariably once in a lifetime. Therefore it behoves the purchaser to get the best and make sure you have the best.

I have had 25 years experience in tuning and repairing musical instruments, therefore feel quite confident I can choose the best instruments on the market.

I shall be pleased to place any instrument in your home beside any other in fair competition and let you yourself be the judge, without you feeling under any obligations absolutely. I can also save the purchaser quite a few dollars on account of my expenses being so low. I will always give you my best personal service and devote the whole of my time to supplying the country people. A postcard or telephone call will oblige.

FEEDING OF NEW GRAIN

Is Apt to Cause Trouble to Live Stock.

Horses More Susceptible Than Cattle —Pigs Do Better on It Than the Other Stock—Best Methods in Preservation of Hay.

(Contributed by Ontario Department of Agriculture, Toronto.)

Each year brings a certain amount of trouble through the feeding of new grain to live stock, and consequently greater care should be exercised to avoid digestive derangements.

The horse is generally considered a little more susceptible to digestive troubles following changes in feeding practice than are other classes of farm live stock: It is always well to make changes very gradually and carefully. The main grain feed of the horse in this country is oats, and new oats should always be fed with great care. Hard-worked horses should, if it is at all possible, be fed old oats, and the new grain left to dry and cure for a few weeks after threshing. At any rate to avoid colic, acute indigestion and inflammation new oats should at first form only a part of the grain ration, being mixed with old oats and possibly a little bran and the percentage of the new grain gradually increased until the horses are on full feed. Sudden changes from old to new grain are especially dangerous with the horse and particularly with the horse at heavy work and on a heavy concentrate ration. There is, of course, a difference due to the time of threshing. Grain which remains in stack or mow for several weeks and thus becomes dry and cured is not so dangerous as that threshed directly from the field or immediately after harvesting.

As a rule heavy feeding of grain is not practiced with cattle and sheep on pasture. Where such is the case, however, changing from old to new grain should be done with care and the substitution should be, if possible, gradual. If the ration must, of necessity, be composed entirely of newly-threshed grain it should at first be comparatively light and increased very gradually.

Pigs usually handle newly-threshed grain without much trouble, although if on very heavy rations when finishing for market a little care should be taken that they be not thrown off their feed. Newly-threshed grain is difficult to grind fine and is not easily stored and large quantities of the ground grain may not be stored in bulk as heating and musting will result, lowering the feeding value of the grain by rendering it unpalatable and less digestible. Musty grain is more dangerous than clean, new grain.

These points should be kept in mind. First make all changes from old to new grain gradually. Secondly, if no old grain is fed as part of the ration start the new grain in small quantities, gradually increasing until the desired quantity is reached. Feed no heated or musty grain. —Wade Toole, O. A. College, Guelph.

Marine Fire Extinguisher.

Electrical operation through thermostatic controls is the feature of a new fire-extinguishing system intended especially for shipboard use, which has successfully met recent tests, and which is interestingly described in Popular Mechanics Magazine. Vaporized carbon tetrachloride is the extinguishing medium, stored in tanks of ten to fifty-gallon capacity, with suitable empty-alarm connections. An electromagnetic relay and valve opens the 3-16-inch pipe leading to a number of electric float-type vaporizers, located at the points of possible fire danger and connected in parallel to the relay contacts. The coils of the relay are wired to a current source through a parallel series of electric thermostats, also located at the danger points. When the heated thermostats close the circuit the vaporizers immediately throw off gases that, in the tests, extinguished a large fire in less than thirty minutes. Back contacts on the thermostats indicate when the fire is out, and a switchboard equipped with instruments and indicators accurately reports the location of an incipient fire.

Wealth in Beads.

Probably the choicest and most valuable beads in the world are those possessed by the natives of Borneo. In many cases they are very old, and have been kept for centuries in one family.

Some are thought to be of Venetian origin, while others resemble a Roman variety.

It is difficult to induce the natives to sell their beads, which they guard as heirlooms. A rich chief may possess old beads to the value of thousands of pounds.

When children are small they are carried on the backs of their northern in a kind of cradle, which is often elaborately adorned with beads. One chief possesses a cradle valued at £200.—Tit-Bits.

A Russian inventor has developed a method of making felt boots and knit goods from dog hair.
