

FOR THE YEAR.

THE VICTORIA SEMI-WEEKLY COLONIST MONDAY, OCTOBER 31, 1898.

VOLUME XLII—NO. 41

## VANCOUVER'S BUDGET

### Steamship Men Ask Bonus From City for Proposed Line to San Francisco.

Free Milling Rock Rich in Gold Mysteriously Located by German Professor.

### Balloon Excursion Across the Gulf—Extensive Timber Limits—Oriental Freight.

From Our Own Correspondent.

Vancouver, Oct. 28.—Capt. Smythe and officers of the warship *Borgia* were banqueted at the Hotel Vancouver last night by prominent citizens.

The Hastings Mill Co. are opening up timber limits twenty-five miles long on Campbell river, 135 miles up coast. They will average 80,000 feet to a section.

The steamer *Curt* arrived in Port to-day from Fort Simpson.

Promoters of the marine railway for Vancouver gave assurance to-day that it will be built.

So great is the quantity of freight offered for the Orient that it is difficult to place it. A shipper of 1,000 tons of salmon was compelled to secure space on the *Nippon* Yusei Kaisha line as there was no space on the *Empress*.

Property on Hastings street purchased recently for the erection of a building of stone blocks sold for \$800 a front foot.

The military rifle association has changed its name to the Garrison Artillery Association of Vancouver with Col. Wornum as honorary president and Lieut. Elye as president. The annual matches of the association will take place at the Central Park ranges on Saturday next.

Geo. Smith, a sailor from Liverpool, England, was drowned at Boston Bar, B.C., on Saturday last, while working on a gold dredging machine for the Bently Gold Mining Company.

The balloon shipped here to be used in search for Andrea having been abandoned by the French scientist, who has gone to digging gold at Last Chance creek.

The balloon has been purchased by German scientists, who have invited city reporters to accompany them in the balloon across the Gulf of Georgia.

Prof. Vertgen returned from the wilds of interior British Columbia to-day having gone in by Stave lake for a German expedition. The professor led himself and his party for months with a wild Indian who had no communication with whites. He reached here to-day with all the specimens of his trip, which are very valuable as to where it has come from.

With respect to the new steamship service in progress of arrangement, between here and San Francisco, it is a fact that the steamer *Manitou*, said to-day: "Friends in England are extremely anxious to see the British Columbia enterprise when an interest of 8 or 10 per cent. may be reasonably expected on the capital invested. I am giving them an opportunity of investing their money in my enterprise. Vancouver city will be asked to guarantee a profit of 10 per cent. on the line which should they decline it will not stop the enterprise, the fact may make some difference in my plan, but I will not be deterred and two other steamers of less tonnage will be placed on the route between here and San Francisco before the two other steamers are actually handed over. I have had promises of coal and merchandise sufficient to make me believe the line will pay for its initiation.

Besides the Vancouver and San Francisco line two river steamers are being built at the Lake Bennett yards and arrangements have already been made to run to the Yukon. These boats will be shipped from here. One steamer will run from Bennett to White Horse and the other from White Horse to Dawson.

Capt. Marshall says that in no case will be conflict with Victoria interests. In carrying out his duties he has been greatly encouraged, the business community promising to aid him in any way their services besides giving him their moral support.

### WILLIAM IN PALESTINE.

Haifa, Palestine, Oct. 27.—Yesterday Emperor William and Empress Augusta visited Caserta and the Plain of Sharon. This morning they started for Jaffa.

Jaffa, Palestine, Oct. 27.—Their German imperial majesties arrived here this afternoon at 5 o'clock. They were accompanied by the Vali of Damascus and by the governors of Jaffa and Jerusalem. A multitude of natives came a considerable distance to meet them.

### TOLERANT ENGLISHMEN.

London, Oct. 27.—The absence of anti-French feeling among Englishmen was demonstrated at the Empire theatre in Birmingham last evening. The orchestra played the *Marseillaise*, whereupon a great majority of the audience thrapped their hats and cheered loudly, completely drowning the few blases which the music elicited from the minority.

### MORPHINE AND A BULLET.

Philadelphia, Oct. 27.—Nathaniel Childs, press agent of the Way Down East company died today at the Jefferson hospital. He had swallowed 45 grains of morphine, after which he shot himself in the heart with a revolver. The cause of the tragedy is not known. Childs was one of the best known men in theatrical circles. His home was in Boston. He first went to this country was made some 20 years ago.

## THE CZAR'S PEACE IDEA.

### As the Powers Will Send Delegates to Fully Receive the Details of the Scheme.

London, Oct. 28.—It is announced from St. Petersburg that all the powers have now accepted the Czar's invitation to send delegates to the proposed disarmament conference.

Each power will be represented by three delegates and it will be a record diplomatic assembly in point of numbers.

Count Muraviev, the Russian minister of foreign affairs, is going to Havania, where he will confer with the Czar on the outlines of the programme which will be submitted to the delegates. The Russian minister is very optimistic as to the result of the conference.

## CANTON FOREIGNERS UNEASY.

### Too Many Chinese Soldiers Arriving—Sham Empress Submitted to Visiting Physician.

London, Oct. 28.—News received this morning from the Far East has been of a somewhat disquieting nature. It appears that residents of Canton are in a state of alarm at the drafting into that city of large bodies of Chinese troops as a counter move to the recent arrival there of Russian for the foreign legations.

The native soldiers are very turbulent and coupled with the anti-foreigner riots at Canton their advent has caused great uneasiness among the foreigners, who number about 150.

In connection with the summoning of a French doctor to examine the Empress of China the Saturday Review says it sees in this a ruse on the part of the Emperor Dowager, and adds that it would have been an easy matter to paint out a sickly youth of 25 on the European physician, as the Emperor is scarcely visible to foreigners.

## POLITICS AT A FEAST.

### Mr. Clarke's Wallace Pricks the Bubble of Liberal Boastings to Canadian Bankers.

Special to the Colonist.

Toronto, Oct. 28.—The banquet of the Canadian Bankers Association last night was a brilliant affair. Lieut. Governor Patterson, of Winnipeg, was one of the chief speakers, with Hon. Clifford Sifton, Hon. G. W. Ross, Ontario minister of education, and Mr. Clarke Wallace, Mr. Wallace followed Hon. G. W. Ross, who referred to the prosperity prevailing throughout the country and had incidentally mentioned the long period of twenty-five years during which the Ontario government had been in power.

Mr. Wallace in replying to the same toast said the fact that the Ontario government had been in power so long, was in his opinion a reason why it should abide out.

Mr. Ross had said that our elevators were hunting with corn, but said Mr. Wallace, he did not say it was Yankee corn which was coming in free of duty and displacing the Canadian product.

Conservatives rejoiced with Liberals at the great increase in the trade of Canada. He only regretted that the Liberal party would always rejoice in Canada's prosperity.

He would have been better pleased if he had seen the exports had increased instead of falling off, as exports and not imports are the life of a country.

As to the despatch of the canal, the government was now finishing a job begun twenty years ago.

## CHINA WANTS GUNNERS.

### Advertising in English Papers for Time Expired Fighting Men.

London, Oct. 28.—The following advertisement appeared in many of the English papers recently: "Sold as First class time expired gunners, for service abroad." Enquiries reveal the fact that no less a personage than "John Bull" is looking for the services of English skilled fighting men to enable him to re-establish his navy, which was so ruthlessly blown to fragments by the Japanese. For the past six months men who have served their time in the Royal navy have received most flattering and tempting offers from certain agents in this country to go to the assistance of China, who it will be recollected, has three warships at the stocks at the present time. They are on the stocks, but the experienced men to man them are wanting, and apparently the Chinese government could do with no other choice than the English army as a poaching ground.

Investigations show that exceptionally high wages are offered to all those men who care to accept service for three years, which will be at the rate of \$100 a month, and also to those who are to and from China. The men who have responded to the advertisement have been told that they will have the job of "gunners" and will be expected to bring the natives up to a state of training which will enable them to "cope with the European soldiers or sailors."

But Messrs. Thomas Atkins and Jack Tar are not being permitted to forget their loyalty to the state, and also that the Foreign Enlistment act, not only forbids the exportation of arms and ammunition to a foreign country in times of war, but also looks after those men who have been educated in the secrets of war at the cost of the taxpayers. That being so, the attention of the war office and the admiralty is drawn to these tempting announcements, with the result that the police were consulted and effectual steps taken to prevent men leaving this country for China under agreement with the government of that country.

## NEWS OF THE CAPITAL.

### Beauties of New Franchise Illustrated in St. John Deputy Minister's Fruitless Suit.

### Minister of Railways Goes Abroad for Rolling Stock—The Prohibition Vote.

### Westminster Officers Receive Their Promotion—Royal Military College Appointments.

From Our Own Correspondent.

Ottawa, Oct. 28.—Major Gourdeau, deputy minister of marine, has lost his suit against the Citizen. He took offence at a heading over a paragraph which he felt was meant to apply to his daughter, but which the content clearly showed referred to a domestic servant. The Citizen explained that there was no reference to the daughter of the deputy minister's daughter and that the editor who wrote the heading was a comparative stranger in Ottawa and did not even know that such a personage existed.

Out of a million and a quarter voters in the last slightly more than a year, voted on the prohibition issue: Thirty more returns will be gazetted to-morrow, leaving eleven still to come, chiefly from the Far West.

The New Brunswick majority for prohibition will have to be reduced by 1,485, the people of St. John having voted both there and in the constituency of St. John city and county. As the question on which they were voting was one of principle and not one of electing a member, it has been decided that the double vote will not be allowed.

Inquiries as to the fate of Inspector Moodie and party of the Mounted Police, who left Edmonton for Klondike by the Peace River route, were received here to-day. The department has every reason to believe that Inspector Moodie is now in Dawson. Only yesterday a report was received from him dated August 30. He was then at the junction of the Peace and Liard rivers, all the party being well.

Mr. Blair has gone to New York to place an order for palace cars for the Intercontinental.

The Hamilton promoters of the nickel steel works of Canada were here to-day, to urge the government to place an export duty on nickel ore and matte.

The Royal Society of Canada presented a farewell address to Lord and Lady Aberdeen to-day.

Capt. Van Straubense, R.A., has been appointed professor of military tactics at the Royal Military College. Lieut. H. S. Logan, of the Leicestershire Regiment, has been appointed professor of tactics and reconnaissance.

The officers of the Westminster company of the Second battalion of the Buffs, having duly qualified, the following promotions are gazetted to-day: To be Major, John Connell Whyte, to be Lieutenant, Alexander Henderson; to be Lieutenant, George M. Dockrill.

## IMMIGRANT TRAFFIC.

### The Railroads Forming a Great Pool for Regulation.

Chicago, Oct. 27.—No tangible results were achieved at to-day's conference in this city of committees of the Western Passenger Association and representatives of the Canadian Pacific, Grand Trunk and Southern Pacific railways in regard to the immigration law situation.

The main object of the meeting was to unite all roads interested in the transportation of immigrants from the Atlantic coast to Canada. The Canadian Pacific and the Grand Trunk and Southern Pacific are in one grand combination, the business to be divided among the various roads by the immigration law.

Prior to the inauguration of the Klondike rate war the Canadian Pacific was a member of the clearing house but upon the outbreak of that trouble it dropped out, and since that time has had a somewhat hostile relations between Western roads and the Canadian Pacific it is now proposed to admit it to membership again.

The failure of the conference thus far to secure tangible results is attributed to the neglect of the smaller roads and Great Northern roads to attend. They have promised to be represented at to-morrow's conference.

## HE KIDDED KELLY.

### Omaha's Fighting Kidder Entertained a New York Club for Fourteen Hard Rounds.

New York, Oct. 28.—Oscar Gardner, "the Omaha Kid," knocked out Sammy Kelly, of this city, in the fourteenth round of what was to have been a twenty-five round fight at 116 pounds before the Lenox Athletic Club to-night.

Gardner proved himself to be Kelly's superior by hard hitting and bulldog tenacity. Kelly was undoubtedly the better ring general but it was a case of a boxer against a fighter and the latter won.

Kelly's knowledge of ring tactics was apparent all the time, but while Gardner probably understands the fine points of the game as well as Sammy, his peculiar style impressed onlookers as if he were giving an exhibition of buffoonery. He left himself wide open and drew Kelly's lead, only to counter them with jab, short blows and right swings which played havoc with Kelly's natty appearance.

When Kelly was taken to his corner after being counted out he complained of his left side and said he thought some of his ribs were broken.

## ILLINOIS COAL RIOTS.

### The Mine Owners Have Turned From Process of Law to Arbitration.

Springfield, Oct. 29.—The injunction case against E. Canill and twenty-five other miners of the Virden coal district, brought by the Chicago-Virden Coal Co., to-day dismissed in the Circuit court at the instance of the complainant.

A temporarily restraining order was issued, good until December 1, when the case will be heard.

## THE VIRDEN RIOTS.

### Coroner's Jury Return an Open Verdict—Not Fixing Responsibility.

Carlinville, Ill., Oct. 27.—The coroner's jury, which has been in session four days holding an inquest on the bodies of nine of the victims of the riot at Virden, October 22, between miners and guards of the Chicago-Virden Coal Company, rendered a verdict this evening.

The verdict in each instance was that the deceased came to his death by gunshot wound inflicted by weapons in the hands of parties unknown to the jury.

The Grand Jury will convene November 9th in special session to investigate causes of the riot and indict the guilty parties.

## ONTARIO ELECTIONS.

### A Conservative Resigned and a Liberal Unseated—Minister Hartly Likely to Retire.

Toronto, Oct. 28.—(Special)—A long list of particulars has been filed in connection with the protest against A. L. Gibson, Conservative member for North River. There are 104 charges.

W. J. Allan, Conservative M. P. for North Hastings, whose resignation was protested, has resigned, both parties having their own cases.

Mr. Henry, Liberal member for Halton, was to-day unseated for illegal acts as agent.

A rumor that Hon. William Hartly is to resign is again current.

## TRADE REVIEW.

### Pacific Coast Leads in Expansion of Business—Victoria Wholesale Report Favorable.

New York, Oct. 28.—Dun's report to-day shows that Canadian reports this week are but moderately encouraging. The weather and other conditions have retarded business in many lines. Montreal reports weather not helping, but very fair trade in dry goods, groceries and shoes, with collections generally good. Retail trade at Toronto is good with a moderate amount of buying in dry goods, notions and holiday stuff. Winnipeg reports a better feeling since close investigation has cleared away fear of a famine, though the markets are not slow.

At Victoria wholesale business is good and the feeling in the market is better. Collections are good with a gradual increase in the clearing.

The Dominion of Canada were: Montreal, \$1,740,295; Toronto, \$1,480,770; Vancouver, \$1,100,000; Seattle, \$1,248,800; decrease 24.7 per cent.; Halifax, \$1,248,708; increase 9.1 per cent.; St. John, \$577,352; increase 4.1 per cent.; Vancouver, \$587,694.

Bradstreet's tomorrow will say: Irregularity in prices and trade movements has been rather more marked this week than in the immediate past, but measured by all the usual standards of business development, the situation is one of extreme activity. The market is showing signs of active foreign demand, advancing prices for American cereals and other products.

The main object of the meeting was to unite all roads interested in the transportation of immigrants from the Atlantic coast to Canada. The Canadian Pacific and the Grand Trunk and Southern Pacific are in one grand combination, the business to be divided among the various roads by the immigration law.

Prior to the inauguration of the Klondike rate war the Canadian Pacific was a member of the clearing house but upon the outbreak of that trouble it dropped out, and since that time has had a somewhat hostile relations between Western roads and the Canadian Pacific it is now proposed to admit it to membership again.

The failure of the conference thus far to secure tangible results is attributed to the neglect of the smaller roads and Great Northern roads to attend. They have promised to be represented at to-morrow's conference.

## STREET RAILWAY FARES.

### Cleveland, Ohio, Oct. 29.—The city council recently passed ordinances increasing the fare on the street railway from 5 cents to 6 cents.

To-day both companies entered suit in the Circuit court at Cleveland, Ohio, for an injunction preventing the city from carrying the ordinance into effect. The ground taken by the companies is that the ordinance is arbitrary and capricious.

A temporarily restraining order was issued, good until December 1, when the case will be heard.

## DREYFUS MAY GO FREE.

### To Liberate Him Without New Trial Would K-w-p Conceal Awkward Facts.

### Public Prosecutor Argues Against This and for Punishment of the Culprit.

### Strong Arraignment of Major Esterhazy Made by the Public Prosecutor.

By Associated Press.

Paris, Oct. 28.—When the court of cassation resumed to-day M. Bard's case and his report of the Dreyfus case, the first part of which was presented yesterday, when just before adjournment, after dealing with Col. Picquart's charges that the minister of war and the general staff had tampered with documents and had manufactured evidence in the Dreyfus case, he made a presentation of the contradictory statements of Col. Picquart and the minister of war relative to secret documents said to have been communicated to the court-martial.

The session of M. Bard's report yesterday was caused by the shorthand notes of the examination of the late Lieut. Col. Henry by M. Carvalignac, then minister of war, after Henry's arrest, then discovered. These notes showed that the decision in the Dreyfus case, as rendered by the court-martial, was obtained by the effect that he only added to a genuine letter, there has been one driven to the last corner protesting that he only acted for the country's good, the drift of M. Bard's report was that the court-martial would be upheld.

If looked as though an attempt was being made to stifle the real truth by liberating Dreyfus without a new trial. To-day's sitting of the court was therefore awaited with great interest, though the report was crowded short of the Palais de Justice. Only a few people assembled about the building, the streets in the neighborhood presented their "every-day appearance."

In resuming the case M. Bard held that the court should make every investigation necessary to place the facts on their true basis. He stated that the court to decide what should be done. The task was a delicate one, but that was not to be avoided. He concluded with remarking: "I have a great duty to fulfill. Do what your conscience dictates."

M. Gouard counsel for Mme. Dreyfus, urged that an investigation be ordered concerning the deliverance of the testimony of the experts who examined the *Bordereaux* in 1894 and in 1897, and also to ascertain whether secret documents had been communicated to the members of the court-martial.

The public prosecutor, M. Mann, addressing the judges, said: "You must fix the responsibility. If Dreyfus is innocent, bring about his liberation. If guilty, condemn him to the guillotine."

M. Mann attacked with denunciations "the villainous attacks on the part of revisionists" and made a plea that a revision of the case and the immediate provisional liberation of Dreyfus.

At this stage of the proceedings, M. Bard read a letter from General Gouard to the president of the court of cassation, in which the General said:

"I have just heard of a memorandum introduced in court yesterday in which Picquart accused me of a dishonourable action. I have heard previously of this memorandum and I wish to deny most formally Picquart's allegations. I think my word is of greater value than that of a man imprisoned on the suspicion of forgery."

The reading of the last statement called forth loud protests in court. The report added that General Gouard's memorandum was publicly read, it was only justice to read Gen. Gouard's denial. The president of the court ordered that the general's denial be added to the documents in the case, and the court adjourned.

To-day's proceedings at the court of cassation were devoid of sensation. The only noteworthy event was the reading of pathetic letters from Dreyfus. A significant point was the revelation of the fact that General Gouard's defence was ordered to be burned, and was supposed closed for the dossier containing the *Bordereaux* to be burned, and expressed surprise afterwards to find that his orders had not been executed.

Thus far the war office has not been represented at the present proceedings, and there is still but little hope of the secret dossier being produced, especially from there it is not regarded as a serious matter. M. Dupuy succeeds in forming a cabinet. He was Premier during the

## DREYFUS TRIAL.

### Dreyfus trial and his appointment delights the anti-Dreyfusites, who see in it an indication that President Faure has a greater sympathy for the army than for the discovery of the truth.

### It is asserted that the father-in-law of Dreyfus has received a letter from the prisoner in his own handwriting. Formerly only copies of his letters were transmitted, and the new departure is regarded as a favorable sign.

The *Courier du Soir* says the revelation of the truth before the court of cassation as to the part played by some members of the staff have produced a strong effect here to-day, and are "likely to result in a reaction tending to put an end to the antagonism between the civil and military authorities."

London, Oct. 28.—According to the National Review, Emperor Nicholas of Russia has become an advocate of Dreyfus' revision.

## PAUPER EMIGRATION.

### Kingston, Jamaica, Oct. 28.—The recent wholesale emigration of indigent Jamaicans to the island of Cuba has evoked a protest from the American authorities at Santiago, and the local government here to-day issued a memorandum, warning British subjects not to proceed to Cuba without adequate means of support.

## NEWFOUNDLAND HERRING.

### St. John's, Oct. 28.—Ten American vessels have arrived at the Bay of Islands, on the west coast of Newfoundland, and 15 at Placentia Bay, for cargoes of salt and frozen herring. The colonial fisheries department is strictly enforcing the fisheries regulations, with a view to demonstrating before the Queen's conference the value of the colonial herring trade. Herring are plentiful, the weather is good and the catches are to be the best known for some years.

## MARCHAND COMING OUT.

### Proceeding to Cairo to Despatch a Report But His Party Yet at Fashoda.

By Associated Press.

London, Oct. 28.—The first cabinet minister to speak publicly since the court of cassation on Thursday is Lord Balfour of Burleigh, secretary for Scotland, who when addressing a meeting last evening at Galahelds, Scotland, declared that it was the settled policy of the government that the valley of the Nile must be Egyptian territory.

Lord Balfour's speech was regarded as a strong rival to M. Casimir-Perier in the canvas for succession to the late M. Carnot as president of the French republic.

London, Oct. 27.—The Paris correspondent of the Daily News says: "The Brisson cabinet was overturned, ostensibly because it failed to protect the army from the army, but in reality because the ministers constantly but vainly urged the staid staff officers to take orders against their own interests. General Froissart, General Zurlinden and General Chanoiné all declined to assist the government to vindicate the army's honor. The resignation was not a protest against 'filthy newspaper rags.' General Chanoiné's resignation was not a protest against the army's honor, but a protest against the army's honor."

ATLINS ALL RIGHT.

Cottage City Brings Contingent of Miners Telling of Bright Promise.

Idle Population of Dawson Soon to Move Towards the Coast.

One hundred and twenty passengers, evenly distributed between Dawson, Atlin lake, the upper Stikine and the town of the Lynn Canal, arrived here by the Cottage City last night, that steamer having enjoyed a smart run down and passed the disabled Britham three days ago, lying precisely as she did when sighted on the up trip. The crew are still retaining possession of the wreck, but very little appears to have been done as yet in the direction of attempting salvaging operations.

The Atlin Lake people by the Cottage City seem the most contented of all. There is no better general mining field in the North, they declare, than that in which they have become particularly interested, and next season's development may be expected to open the eyes of the skeptical. Of course, the season for active development at the new camp, Lewis Meyers, secretary and treasurer of the Latuya Bay Gold Placer Mining company, was one of the passengers, who was glad to see a Colonist miner aboard the Cottage City, for when here he will be able to read an editorial on "Peace Negotiations," which pleased him well that he clipped it out and sent it to the President of the United States, Dr. Dechambre, the letter, which he produced, stating that the gold was discovered and preserved. Mr. Meyers is going to San Francisco to secure a granite mining plant, which he intends taking north to Latuya Bay next spring. This company, which is under the presidency of Mr. Bernard Stahl, of New York, and the management of Mr. O. R. Savage, of Juneau, has mining rights covering 10 miles of beach, three miles wide, that produces gold in well paying quantity. Bedrock is on an average of 12 feet from the surface, and the sand can be worked to economic advantage from the fact that all the water required can be obtained from a stream 150 feet wide flowing through the property.

J. W. Van Winkle, of San Francisco, was a passenger just out from Atlin, who had new confirmatory of the richness of this place. He had returned from Dawson through being refused a passage to the intensity of the season, and is now congratulating himself that his plans had been changed. This country is beautiful, he says—almost enough for a bicycle, and the climate is just what that he could desire. A few days before he left several large nuggets had been found on Bonanza power near Wright's creek, which fact was causing quite a stampede to that section.

Dick Lov, a noted prospector, who has been noted for some of the richest strikes in the Yukon, was one of the fortunate men aboard the Cottage City. He carried a sack of gold weighing 100 lbs., and is credited with having made \$230,000 in the upper Yukon. He is now on his way to San Francisco.

H. J. Miller, Ed. Kenne and L. Refle, pursuer on the steamer Willie Irving, were among the latest out from Dawson. The crowd to which they were attached, has been left behind at White Horse, and can be expected to reach Victoria on the Farallon in five days. Refle reports that the Willie Irving arrived at White Horse on the 21st inst. with 60 passengers, the Gold Star the previous night with 50 and the Flora, the last steamer to make the run up the lakes this season, a day or so later. There were 1000 in and out of the 1000 in dust and drabs on the Willie Irving and Gold Star. The former carried 60 passengers, the latter 50.

Mr. C. R. Hawkins, C.E. of the Pacific and Arctic Exploring Company, sent engineers to survey a route to Atlin by East river. When this is successfully accomplished men will be sent to establish a trail through the woods, and the road will then carry freight clear through to Atlin. Every indication of a big trail here within 100 miles of Skagway, and there is every indication of a big trail there when the lakes and rivers put off their mantle of ice. The rival cities of Atlin and Tika are considering desperate efforts to obtain advantages over the other. It is very likely that the first town that is springing up at discovery on the coast.

HOW TO LIVE 300 YEARS.

Scientists Believe Such an Age Will Be Possible, and Point Out the Way to It.

Dr. W. Kinneer, a London scientist, claims to have discovered how old age can be greatly prolonged by abstinence from certain foods. Old age, he says, is to a great extent due to deposits of uric acid, and phosphate of lime, mixed with other salts, which are thrown off by the system. In later years they are not.

The anatomists all agree that man begins in a gelatinous condition and ends in a bony one. An infant's skull is soft like rubber, while an aged person's bones are so brittle that they will not knit when broken. This, according to Dr. Kinneer, is almost entirely due to the deposit of uric acid, and phosphate of lime, mixed with other salts, which are thrown off by the system. In later years they are not.

Dr. Kinneer is not the only one who believes that the human body can be partially realized before the close of the dawnning century.

The writer a day or two ago talked over the matter with Dr. Kinneer, who is a progressive inventor and experimenter.

It is my belief," said Dr. Gates, "that man should be able to live as well as many animals do—live eight or nine times as long as the period before manhood. I believe that the human race has probably not yet produced a single child the result of fullest scientific preparation. It will not be long, I wonder, that life is so short."

Dr. Kinneer is not the only one who believes that the human body can be partially realized before the close of the dawnning century.

Dr. Kinneer is not the only one who believes that the human body can be partially realized before the close of the dawnning century.

MAJOR WALSH A FAILURE.

An Ontario Liberal Tells Why—The Present and Future of Dawson.

From the Winnipeg Telegram. Dr. H. A. Bonnar, of Chateau, Ont., is registered at the Leland hotel. The doctor is on his way home from Dawson City and stopped over yesterday to pay a short visit to his brother, Mr. E. A. Bonnar, barrister, of this city. Dr. Bonnar is a strong Liberal in politics, and at the last general Dominion elections was the Liberal candidate for North Bruce, but was defeated in a three-cornered contest by the present Conservative member, A. McNeil, by a majority of thirty-one votes.

Dr. Bonnar returned at Tugh last night on the 29th inst. He arrived at Dawson City on the 29th inst. He arrived at Dawson City on the 29th inst. He arrived at Dawson City on the 29th inst.

SHORTAGE OF TONNAGE.

Carriers in Strong Demand on the Coast Consequently Rates Will Advance.

With a scarcity of tonnage on this coast and with between eight and nine hundred thousand tons of grain awaiting shipment on the Columbia river, lumbermen are looking for rates to take a sudden rise. It is next to impossible to charter now, particularly a steamship large enough to handle a good sized cargo. There is also a big demand for tonnage in California, so that between the burning of a mill, and though having a large tonnage, it will require a long time to get ready to start.

According to the Seattle Post-Intelligencer of Wednesday, the overhauling about to be given to the big steamship Garonne, now in Esquimaux, is preparatory to her initial voyage to Hawaii, under the flag of the British-American line. It is expected that the Garonne will sail from Seattle on November 15, and it is the intention to paint and put her in first-class condition for the Eastern people taken on the occasion of this initial trip, and the P.-I. says that the vessel already has passengers.

THE COQUITLAM ARRIVES. Having been at Vancouver and Stevenson for several days since her return from the North, the steamer Coquitlam entered port yesterday, and will be put on the coast on November 15, and it is the intention to paint and put her in first-class condition for the Eastern people taken on the occasion of this initial trip, and the P.-I. says that the vessel already has passengers.

DISCOVERIES IN POMPEII. Interesting Finds in Recent Excavations—The Surgeon's House. London Times. The excavations at Pompeii have been continued during the past year, and have resulted chiefly in the discovery of small houses containing objects of secondary interest and importance. In the neighborhood of the Gate of Vesuvius, a portion of the city wall belonging to the earliest period of Pompeian history was laid bare, and is interesting as it is apparently more ancient than such other portions of the wall as have been discovered. It appears to be the remains of a wall of the time of the House of Augustus, and is of the same height as the House of Augustus, and is of the same height as the House of Augustus.
