The copy filmed here has been reproduced thanks to the generosity of:

Library of the Public
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol $\rightarrow$ (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper-left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas; le symbole $\rightarrow$ signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

*A large emigration, and houses at West end destroyed by fire, some years since, not rebuilt, is the principal cause of decrease in the population of St. John's.

It will be seen that the falling off of the population is much greater in the Western than in the Eastern Division.

†A large migration has taken place, chiefly to Fortune Bay, from Placentia and St. Mary's.

Eclipses, 1876.

In the year 1876 there will be *Two Eclipses*—both of the Sun.

First—A total Eclipse of the Sun, April 5, 1876, invisible at Greenwich.

This Eclipse begins on the Earth generally, April 5, 15h. 38m. 28s., Mean Time at Greenwich, in longitude $35^{\circ}.14'$ E. of Greenwich, and latitude $33^{\circ}.4'$ S. Ends on the Earth generally, April 5, 21h. 16m. 28s., in longitude $134^{\circ}.16'$ E. of Greenwich, and latitude $23^{\circ}.27'$ N.

This Eclipse being visible only E. of Greenwich, will consequently be invisible in this Hemisphere.

Second—An annular Eclipse of the Sun, September 28-29, 1875, visible (as a partial Eclipse) at Greenwich.

This Eclipse begins on the Earth generally, September 28, 22h. 1m. 6s., Mean Time at Greenwich, in longitude $60^{\circ}.56'$ W. of Greenwich, and latitude $38^{\circ}.9'$ N. Ends on the Earth generally, September 29, 3h. 54m. 1s., in longitude $29^{\circ}.55'$ E. of Greenwich, and latitude $20^{\circ}.14'$ S.

This Eclipse, which begins at sunrise on September 28, in the Western Hemisphere, will first be visible from Panama, along the Eastern coast of the North American continent, $8^{\circ}.14'$ W. of Newfoundland to the North Pole. In the Eastern Hemisphere the Eclipse first begins at sunset, and will be visible from Crozet's Islands in the Southern Pacific, about 30° S. of Cape St. Mary, in the Island of Madagascar, to the entrance of the Persian Gulf, E. of the Peninsula of Arabia.

Planetary Notices.

The Planets of the Solar System are 29 in number. Of them 11 are primary and 18 secondary or Moons. Of these Moons, our Earth has one. Jupiter four, Saturn seven, and Uranus six. Of the primary planets, two are called inferior, viz., Mercury and Venus, because they are nearer the Sun than the earth: and

others are called *superior* because further from the *Sun* than the *Earth*.

<i>Distance from the Sun.</i>	<i>Magnitude—diameters in miles.</i>	<i>Length of year.</i>
Mercury, 37 millions of miles	3,140	3 months
Venus, 68 millions of miles	7,700	7½ do
Earth, 95 millions of miles	7,912	1 year
Mars, 142 millions of miles	4,200	2 do
Jupiter, 485 millions of miles	89,000	12 do
Saturn, 890 millions of miles	79,600	29 do
Uranus, 1800 millions of miles	35,000	84 do

The *Solar year* is the time which the sun takes in passing over the twelve signs of the Zodiac, which is 365 days, 5h. 48m. 48s. The *Civil year* is 365 days 6 hours, or rather 365 days for three years in succession, and every fourth year 366 days. The *Sidereal year* is 365 days, 6h. 6m. 18-5s. The *Anomalistic year* is 355 days, 6h. 14m. The *Lunar* astronomical year is 354 days, 8h. 48-6m. or 12 lunations. The Anomalistic year is an advance of the orbit as part of the solar system in space, and its excess over the Sidereal or Tropical year, is the stellar measure of the annual advance of the whole system.

St. John's.

True Latitude of Church Hill 47° 34' North.

Longitude (West of Greenwich) 52° 42' West.

Variation of the Compass, 32° 30' and increasing *seven seconds* annually.

NOTE.—The Tide Tables (in the Calendar pages) may be rendered applicable to various other places on the coast, by simply adding or subtracting as the case may be, the difference between the times of High Water on the Full and Change of the Moon at St. John's, and the time of the full tide at any other harbor; for example, to find the time of High Water at any of the principal harbors of Conception Bay, add 45 minutes to the time at which it will be High Water at St. John's; for Placentia Bay, add 2 hours; for St. Peter's, 1h. 50m.; for Ferrolle, on the French Shore, 4 hours, &c.—See table LVII of Norie's Epitome.

will be fair: but if the mist hangs upon the hills, and drags along the woods, there will be rain.

Clouds.—Against much rain the clouds increase very fast, especially before thunder. When they are formed like fleeces, but dense in the middle, and bright towards the edge, with the sky bright, they are signs of a frost, with hail, snow or rain.—

If they form high in the air, in thin white trains, like locks of wool, they portend wind and probably rain. When a general cloudiness covers the sky and small black fragments of clouds fly underneath, they are a sure sign of rain, and probably will be lasting. Two currents of clouds always portend rain, and in summer, thunder.

stellation, Argo Navis is a vast nebular cluster, in which from 2,000 to 6,000 stars have been revealed by the telescope, besides large nebulous tracts which no telescope has yet resolved into stars. This nebula is seen through the Milky Way, but is supposed to lie at an immeasurable distance beyond it.

METEORS.—The Aurora Borealis, after warm days, are generally succeeded by cooler air. Shooting stars are supposed to indicate wind.

A Table,

For telling the Weather through all the Lunations for each Year, for ever.

This table is the result of many years' actual observation; the whole being constructed on a due consideration of the attraction of the Sun and Moon, in their several positions respecting the Earth, and will, by simple inspection, show the observer what kind of weather will most probably follow the entrance of the Moon into any of its quarters, and that so near the truth as to be seldom or never found to fail.

MOON.	TIME OF CHANGE.	IN SUMMER.	IN WINTER.
	Between midnight and 2 in the morning.	Fair.	Hard frost unless the wind be South or West.
	Between 2 and 4 morning.	Cold—frequent showers.	Snow and stormy.
	4 and 6 morning.	Rain.	Rain.
	6 and 8 morning.	Wind and rain.	Stormy.
	8 and 10 morning.	Changeable.	Cold rain if wind be West.
	10 and 12 morning.	Frequent showers.	Snow, if East.
	At 12 o'clock, at noon, and 2 p.m.	Very rainy.	Snow or rain.
	Between 2 and 4 p.m.	Changeable.	Fair and mild.
	4 and 6 p.m.	Fair.	Fair.
	6 and 8 p.m.	Fair if wind N.W.	Fair and frosty if wind N, or N.E.
	8 and 10 p.m.	Rainy if S. or S.W.	Rain or snow, if S. or S.E.
	10 and midnight.	Ditto.	Ditto.
		Fair.	Fair and frosty.

OBSERVATIONS. 1.—The nearer the times of the Moon's change, first quarter, full and last quarter, are to midnight, the fairer the weather will be during the seven days following.
 2.—The space of this calculation occupies from ten at night till two next morning.
 3.—The nearer to mid-day or noon the phases of the moon happen, the more foul or wet weather may be expected during the next seven days.
 4.—The space of this calculation occupies from ten in the forenoon to two in the afternoon. These observations refer principally to the summer; though they affect spring and autumn, nearly in the same ratio.
 5.—The moon's changes—first quarter—full, and last quarter, happening during six of the afternoon hours, *i. e.*, from four to ten, may be followed by fair weather; but this is mostly dependent upon the wind, as is noted in table.

LIGHT HOUSES, HARBOR LIGHTS, &c.

Fort Amherst Light, at the entrance of St. John's—A light was first established at this station in 1813; in 1850 a new House, Lantern and apparatus were erected. The Light burns at an elevation of 114 feet, is produced by a double argand burner placed in the focus of an annular lens of the fourth order, and in favorable weather can be seen 16 nautical miles. When Cape Spear is enveloped in fog a heavy piece of ordnance is also discharged at this Fort every hour during daylight, to assist vessels in making the harbor. It is situated in lat. $47^{\circ}33'54''$ N., and long. $52^{\circ}40'18''$ W. John Sheppard, Keeper; Thomas Moore, Assistant.

St. John's—Two red lights are exhibited every night from sunset until sunrise, intended as leading marks for vessels entering the narrows. The lower Light on the roof of the Custom House—the other 400 yards in the rear, on a white post, within a few yards of the N.E. angle of the Congregational Church, and 180 feet above the level of the sea. These Lights will be readily distinguished from any other Lights in the town; and keeping them in a line bearing N.W. $\frac{3}{4}$ W., will lead in the largest vessel clear of all danger. To serve as leading marks also during the day, the pediment of the Custom House has been painted white; this is to be kept in line with the upper lantern, also painted white. Exhibited 1st September, 1863.

Cape Spear Light—This Light was first exhibited on the 1st September, 1835; it is produced by seven argand burners and silvered reflectors burning at an elevation of 264 feet—it revolves, shewing a bright Light every minute, and in favorable weather can be seen 26 nautical miles. It is situated in $47^{\circ}31'11''$ N. lat., and $52^{\circ}36'59''$ W. longitude. James Cantwell, Keeper; Dennis Cantwell, Assistant.

Cape Bonavista Light—Situate in lat. $48^{\circ}41'56''$ N., long. $53^{\circ}5'20''$ W.; is a revolving Light, showing alternately every 90 seconds a white and red Light. It is produced by 16 argand burners and reflectors, burns at an elevation above the sea of 150 feet, and in favorable weather can be seen 18 nautical miles. By keeping this Light open with Cape L'Argent, it will carry you clear of the Flower Rocks; first exhibited 11th September, 1843. Nicholas White, Keeper; Matthew White, Assistant.

Cape Pine Light—This tower is of iron, built by the Imperial Government in 1849-50, and first put into requisition on the 1st January, 1851. It is a fixed white Light, has 17 argand burners and reflectors—elevated above the level of the sea 314 feet—situated in lat. $46^{\circ}37'4''$ N., and in long. $52^{\circ}31'45''$ W. In a favorable state of the atmosphere it can be seen 26 nautical miles. George Hewitt, Keeper; Thomas Doran, Assistant.

Harbor Grace Beach Beacon and Light—First exhibited 11th September, 1850; stands on the point of Beach at the entrance of Harbor Grace. Sailing into Harbor Grace with a fair or leading wind, bring the Beach Beacon to bear W. or W. by S., and by keeping the Light or Building a little on the starboard bow it will bring you clear of the Bar, on which at low water there is not more than 8 feet of water. It is situated in lat. $47^{\circ} 41' 28''$ N., and in long. $53^{\circ} 12' 33''$ W.; elevation above the sea level 40 feet; in clear weather it may be seen at a distance of 11 nautical miles. George Brown, Keeper.

Green Island Light at the entrance of Catalina Harbor, Trinity Bay—Situate in lat. $48^{\circ} 36' 16''$ N., long. $53^{\circ} 2' 46''$ W. This is a fixed white light, burns at an elevation of 92 feet above high water, and in favorable weather will be seen from E.N.E. seaward, to S.W., 15 nautical miles. Vessels bound Northward by keeping this Light open with the North Head of Catalina until Beravista Light opens with Cape LeJean, will give the Flower Rocks an ample berth—or when coming from the Northward and bound for Catalina, by giving the N. Head a moderate berth, you will clear the Brandies Rocks by steering for Green Island Light. It was first exhibited in 1857. Peter Woods, Keeper; Henry Roper, Assistant.

Cape Race Light—Exhibits a revolving white Light, from sunset to sunrise. The light will be visible to seaward from N. E. by E., round by the S. E. and S. to W. The Light is elevated 180 feet above the mean water level of the sea, and may be seen in clear weather 19 nautical miles from a ship's deck. The tower is striped red and white vertically. It stands close to the old Beacon, which has been cut down. The Light House is in lat. $46^{\circ} 39' 30''$ N., long. $53^{\circ} 4' 30''$ W., and was first exhibited in 1856. Michael J. Hally, Keeper; George Simms, Assistant.

Cape Race Steam Fog Alarm—A powerful Steam Whistle has been placed on Cape Race, about 250 feet south of the Light House, which is sounded during thick or foggy weather or snow storms, for ten seconds, with intervals of silence of fifty seconds in each minute. The Whistle will probably be heard in calm weather 20 miles; with the wind 30 miles; and in stormy weather against the wind, from seven to ten miles.

Dodding Head, Great Burin Island Light—This Light was put in requisition on the 3rd August, 1858, and is exhibited every night from sunset to sunrise. It is revolving, catoptric of the second order, producing a brilliant White Light every minute, with intermediate flashes, at intervals of twenty seconds, burning at an elevation of 430 feet above the level of the sea, and in favorable weather can be seen 29 miles—situated in $47^{\circ} 0' 26''$ North Latitude, $55^{\circ} 8' 43''$ West Longitude. Austin Sheppard, Acting Keeper; John Churchill, Assistant.

Offer Wadham Island Light—Was first exhibited on the 4th October, 1858, and is lighted every night from sunset to sunrise. The Light is a steady, fixed lens-light, burning on a circular Brick Tower, 100 feet above the level of the sea, and can be

seen in a favorable state of the atmosphere 15 nautical miles. Situated in Latitude $49^{\circ}33'.0''$ North, Longitude $53^{\circ}47'.6''$ West. Charles Browne, Keeper; Henry Waterman, Assistant.

Baccalieu Island Light—This light is exhibited every night from the going away of daylight in the evening to the return of daylight in the morning. The Light house is situated on the Northern end of the Island—Latitude $48^{\circ}8'.51''$ North, Longitude $52^{\circ}47'.53''$ West—the tower is of brick, the keeper's dwelling (a square building detached from the tower,) is painted white, with the roof red.

The light is a catoptric first class Holophotal revolving white light, showing a flash every twenty seconds. It is elevated 412 feet above high water, and can be seen in clear weather 20 nautical miles, and a lesser distance according to the state of the atmosphere. When the Southern end of the Island bears N.N.E., the Light will not be visible when nearer the Island than 8 miles. It was first exhibited in 1858. James Ryan, Keeper; John Ryan, Assistant.

Cape St. Mary's Light—Was put in requisition on the 20th September, 1860; it is a revolving catoptric Light of the first order, producing alternately every minute a brilliant red and a white light, burning at an elevation of 500 feet above the level of the sea, and will be seen in a favorable state of the atmosphere 26 nautical miles from a vessel's deck; situated in $46^{\circ}49'.56''$ N. lat., $54^{\circ}11'.34''$ W. long. The tower is of brick, and on each side of which stands the dwellings of the Keeper and Assistant, the sides of which are painted white, roofs red. John Rielly, Keeper; William J. Collins, Assistant.

Brunet Island Light, Mercer's Head, Fortune Bay—First exhibited 27th June, 1865. It is a powerful flashing white Light, and attains its greatest brilliancy every ten seconds. It burns at an elevation of 405 feet above the level of the sea, and in clear weather may be seen at a distance of 35 miles, and be visible in every direction from North round East and South, to W.N.W. Mercer's Head is a bold headland, and situated in long. $55^{\circ}59'.30''$ W., and lat. $47^{\circ}16'$ N. Martin Sparrow, Keeper; Jas. Gaulton, Assistant.

Harbor Grace Island Light—The fixed Light for many years past exhibited at Harbor Grace Island, in Conception Bay, was discontinued on the 1st December, 1869. The Light at that station is now revolving, showing in every direction two white flashes, followed by one red flash. The interval between each flash in attaining its greatest brilliancy will be 20 seconds. This Light, in a favorable state of the atmosphere, will be seen 25 nautical miles. It is situated in lat. $47^{\circ}42'.45''$ N., and long. $53^{\circ}8'.15''$ W. Austin Oke, Keeper; Patrick Houlahan, Assistant.

Ferryland Head Light—First exhibited on the 1st October, 1871. From sunset to sunrise a steady white Light of the 3rd order, burning on a brick tower 200 feet above the level of the sea, visible in favorable weather 16 nautical miles. Ferryland Head Light is situated in lat. $47^{\circ}00'.58''$ N., and long. $52^{\circ}51'.07''$ W. The tower is of red brick; the keepers dwelling, detached from

the tower, is painted white and the roof red. Michael Kearney, Keeper; Thomas Costello, Assistant.

1872. *Puffin Island, Greenspond*.—The Light House on this Island is built of granite. The tower and keeper's dwelling are attached. The illuminating apparatus is dioptric of the 4th order, and a *fixed red* Light is exhibited every night from sunset to sunrise; it is 85 feet above the level of the sea, and in clear weather should be seen a distance of 12 miles. The Light is visible from North by East, through South to West by North by compass, and is situated in $49^{\circ}31'37''$ North lat., and $53^{\circ}32'27''$ West long. Robert K. Oakley, Keeper.

No. 1, 1873. *Belloram, Fortune Bay*.—A *fixed white* Light is exhibited nightly at this place from sunset to sunrise, at an elevation of 35 feet above the level of the sea, and in clear weather should be visible seven miles. The building is a wooden tower, painted white, and is situated in lat. $47^{\circ}29'$ North, and $55^{\circ}27'15''$ West long. The apparatus is dioptric of the 8th order, with a single argand burner, and illuminates an arc of the horizon of 270° . In entering the harbor the light must be kept on the port hand. Samuel Clewett, sr., Keeper.

No. 2, 1873. *Rose Blanche Point*.—This Light House is built of granite, upon the eastern head. The tower and keeper's dwelling are attached. The illuminating apparatus is dioptric, of the 4th order, and a *fixed white* Light will be exhibited from sunset to sunrise, at an elevation of 95 feet above the level of the sea, and it should be seen in clear weather for 13 miles. The light illuminates the horizon from East by South, through South to West by compass, and is situated in lat. $47^{\circ}35'48''$ North, and $58^{\circ}41'30''$ West long. Shag Island Black Rock bears West from the light and distant about one mile. Rose Blanche shoals W.S.W. half a mile, and Petites Black Rock E. by S. three miles. Keeper, John A. Roberts.

No. 3, 1873. *Fort Point, Trinity*.—On and after 1st January, 1874, a *fixed white* light will be exhibited nightly from sunset to sunrise at this place upon a wooden tower painted white, and at a height of 75 feet above the level of the sea, and it should be visible in clear weather for eleven miles. The erection is situated in $45^{\circ}21'55''$ North lat., and $53^{\circ}29'51''$ West long. The apparatus is dioptric of the 8th order, with a single argand burner, and illuminates an arc of the horizon of 320° . In entering the harbor the light must be kept on the port hand. Keeper, William Rowe.

No. 4, 1874. *Cann Island, Seidonecome*.—A *fixed white* Light is exhibited nightly at this place, from sunset to sunrise, at an elevation of 85 feet above the level of the sea, and should be visible 12 miles. The tower and dwelling are of wood and attached, and are situated in latitude $49^{\circ}10'30''$ North and longitude $54^{\circ}10'22''$ W. The apparatus is dioptric of the 4th order, with a single argand burner, and illuminates an arc of the horizon of 227° . John Dochett, Keeper.

No. 5, 1874. *Boar Island, B. Bay*.—A *fixed white* Light is exhibited nightly at this place, from sunset to sunrise, at an elevation of

160 feet above the sea, and should be visible 17 miles. The tower and dwelling are of wood and attached, and are situated in latitude $47^{\circ}36'12''$ N., and longitude $57^{\circ}35'13''$ W. The apparatus is dioptric of the 6th order, with a single argand burner, and illuminates an arc of the horizon of 270° . Edward Dicks, Keeper.

No. 3: *Channel Head, Port-au-Basques*—A wooden tower has been erected on this head, upon which a *fixed white* light will shortly be exhibited nightly. Latitude $47^{\circ}33'47''$ N., longitude $59^{\circ}07'10''$ W. Keeper not yet appointed.

There have been erected at the following places, Beacon Towers of wood, each carrying an octagon and lantern, in which a red light will be exhibited nightly, from sunset to sunrise.

Rocky Point, Harbor Breton, Fortune Bay—Situate in latitude $47^{\circ}27'30''$ N. Longitude $55^{\circ}47'45''$ W. William Lorenzen, Keeper.

Garnish, Fortune Bay—Latitude $47^{\circ}14'$ N., longitude $55^{\circ}24'$ W., (approximate.) Geo. T. Snelgrove, Keeper.

Beacon, Ireland Island, entrance of La Poile Bay—A square building of wood, painted white, with three black bands, has been erected on this Island. It is 75 feet high, and is supported by four chains.

J. T. Nevill, General Inspector of Light-houses.

Light Dues—One shilling per ton on all vessels entering any port or harbor of the Colony, except coasting, sealing, or fishing vessels; but not to be levied more than once in one year. Sealing and coasting vessels—Sixpence per ton on registered vessels of 40 tons and upwards; Fifteen shillings per annum on all vessels less than 40 tons.

The 19th of Victoria, Cap. 5, Sec. 5, enacts—"That no greater sum than £25 sterling shall be in any year levied for Light Dues on any steamer or vessel entering any port of this Colony; and no steamer plying between Europe and any port of North America, and entering any port of this Colony as a port of call, shall be liable to pay any Light Dues or other port charges except pilotage."

Gallantry Head, Island of St. Peter's—The Fixed Light on Gallantry Head, (Island of St. Peter's), since the 10th August, 1862, has been replaced by a Flash Light, with intervals of twenty seconds, and by one red flash after two white flashes; situated in lat. $46^{\circ}45'30''$ N., long. $58^{\circ}27'00''$ W.; elevation above high water, 64 metres, (204 English feet.) Distance at which the light is visible, 18 miles. The Light is hidden at the Northward by the high land of St. Peter's.

Light at the South Entrance of St. Peter's—Since 1st October, 1862, the entrance of the harbor of St. Peter's, called South Channel, has been marked by two small fixed Lights, one of which is a white Light, illuminating three-fourths of the horizon, and placed on the Battery—and the other a red Light, on

the plain at the north of the town. The white Light has an elevation of 11 metres, and is visible 6 miles. The Red Light is elevated 19 metres, visible 3 miles distant. The line connecting these two Lights indicates the Middle Channel.

The position of the red Light has also been so determined that as soon as it is seen on the left of Cape Eagle, vessels coming from Columbiar in beating into the N.E. entrance will have nothing to fear from the shoals of Cape Rouge.

Light on the South West point of the Islands of Dogs, called Pointe a Leconte—Commencing on the 1st of August, 1874, a Light will be exhibited on the South West Point of the Island of Dogs, at the place called Pointe a Leconte at 400 metres (427 English yards) to the West, $\frac{1}{4}$ N.W., from the point marked on the chart by the name of Pointe Plate. The Light will be fixed and placed in an iron tower painted red, at an altitude of 19 metres (100 English feet) above the level of the sea. It will be seen in clear weather 7 miles. The extent of the Light is circumscribed in a sector of 163° presenting two cones of Light, one white, of 40° , will Light the passage of the S.E. so as to permit vessels which maintain position within this cone to avoid at the right the shoal Bataille, and to the left the rock of Cape Noir and the rock Bertrand. The second cone will be red, of 123° . It should be avoided by vessels entering by the S. E. passage, and will enable them, when they shall have quitted the white cone, to come to anchor in the roadstead or in the Barachois, in following the line of the white light from Pointe aux Canons, and of the red light from the interior of the city.

A Light House has been erected by the Government of Canada, on the Western side of Cape Ray, on the South-West coast of the Island of Newfoundland. Latitude $47^{\circ}37' N.$, Longitude $59^{\circ}18' W.$ A powerful flash White Light is exhibited, making a complete revolution in two and a quarter minutes, and flashing every ten seconds; at a long distance, however, it has the appearance of a steady light. The light can probably be seen at a distance of twenty miles in clear weather.

The Tower is a wooden building, hexagonal in shape, forty-one feet high, and painted white. The keeper's dwelling, also of wood, stands at a little distance from the Tower, and is also painted white.

The illuminating apparatus is Catoptric and consists of twelve Lamps and Reflectors.

A Fog Whistle is in operation at Cape Ray. It will be blown in thick and foggy weather and during snow storms, for 10 seconds in each minute, leaving an interval of 50 seconds between each blast. It can be heard from 3 to 15 miles.

MONEY ORDER BRANCH.

Thomas S. Dwyer, Superintendent.

Office hours—From 9 a.m., to 4 p.m.

Money Orders are now interchanged with the United Kingdom, Dominion of Canada, and P. E. Island, at the following rates of commission:—

Scale for United Kingdom—Orders up to £2 stg., 1s. stg.; from £2, up to £5, 2s.; from £5, up to £7, 3s.; from £7, up to £10, 4s.

Scale for the Provinces—Orders up to £5, 1s.; from £5, to £10,

2s. ; from £10 to £15, 3s. ; and from £15 to £20, 4. No single order can be granted for more than £20. No half-pence to be introduced in the orders.

Business of Money Order Office closes one hour before closing the Mails by the Halifax Steamer.

SYSTEM.

1—Money Orders are made out in forms supplied for the use of the Money Order Offices.

2—Persons applying for Money Orders are recommended to use printed "Application Forms," printed for that purpose.

3—Place of payment of a Money Order may be changed in accordance with instructions provided therefor.

4—Alteration of payee's name may be effected, by issue of a new order and payment or commission thereon.

5—Applicants for Money Orders are expected to observe due care in the examination of the same, relative to filling and stamping ; defect in Orders when presented for payment may cause difficulty and delay, for which the paying office is not to be held accountable.

6—Postmasters should be particularly careful to obtain from the person who presents a Money Order, whether the rightful owner or not, full information as to the christian name, surname, and address of the party who originally obtained it, unless such party be a firm, when the name of the firm will suffice. *The only exception to this rule is—*When an Order is presented through the Bank, in which case it will suffice that the Order, being properly signed, be also crossed with the Banker's name.

7—As however, *after once paying a Money Order, by whomsoever presented, the Office will not be liable to any further claim*, the public are strictly cautioned,—

1st—To take all means to prevent the loss of the Money Order.

2nd—To be careful on taking out an Order, to state correctly the christian as well as the surname of the person in whose favor it is to be drawn.

3rd—To see that the name of the person taking out the Money Order is correctly known to the person in whose favour it is drawn.

8—Payment of a Money Order must be obtained before the end of the sixth calendar month after that in which it was issued, otherwise a new Order will be necessary, for which a second commission will be charged ; and if the order be not paid before the twelfth calendar month after that in which it was issued, all claims to the money will be lost.

Neglect of the foregoing instructions will risk the loss of the money, besides leading to delay and trouble in obtaining payment.

The Money Order Offices, are :—General Post Office, St. John's ; Post Offices at Bay Bulls, Bonaville, Briggs, Gargoe, Earle, Channel, Carbonar, Ferryland, Fogo, Greenspond, Harbor

Breton, Harbor Grace, Placentia, Trepassey, Trinity, Twillingate.

9.—Postmasters should recommend the use of Money Orders for the transmission of money, in preference to such transmission otherwise.

Suggestions to the Public.

Facility will be given to the Post Office in the discharge of its daily duties, and greater security afforded to the Public, by careful attention to the following recommendations:—

Post all Letters and Newspapers, &c., as early as practicable, especially when sent in large numbers.

When a number of Newspapers are addressed to the same office, put them up in one parcel.

When a number of circulars are posted, tie them up in a bundle, with the addresses all in one direction.

Address letters, papers, &c., in a legible and complete manner, always giving the name of the Post Office; and if there be more than one Post Office of that name, the name of the district in which situated. In case of letters going abroad, the name of the country, as well as of the town and city, should be given in full. Letters, for example, intended for London, England, if simply addressed "London," would be forwarded to London, Canada West, and thus be delayed.

Letters, Papers or Parcels for Outports should have the name of the District, the Post or Way Office, distinctly written as part of the address. For instance, Letters for Bonne Bay, French Shore, are sometimes sent to Bonne Bay, Fortune Bay District, being simply directed Bonne Bay—there are several settlements named Broad Cove, Little Bay, English Harbor, Blackhead, Balline, Caplin Cove, Deer Island, Flat Islands, Fortune, Fox Cove, Freshwater, Island Cove, Long Harbor, Burgeo, New Harbor, Salmon Cove, Seal Cove, Ship Cove, and unless properly directed, are liable to go to wrong office for delivery. The loss and inconvenience arising from imperfect directions, is caused by the carelessness of the sender, and no blame can attach to the Post Office—other places besides those named, have settlements with corresponding appellation, hence the necessity of being particular in addressing all letters, &c.

See that every letter, newspaper, or other packet sent by post, is securely folded and sealed. Every such packet has to be several times handled; and even when in the mail bag, is exposed to pressure and friction. Unless, therefore, the article be light and pliant, it should be enclosed in strong paper, linen, parchment, or some other material which will not readily tear or break.

Fasten the covers of newspapers firmly, so as to prevent them from slipping out.

When dropping a letter or newspaper into a letter-box, always see that the packet falls into the box, and does not stick in its passage.

Never seal letters for the East and West Indies and other hot

climates, with wax. Such a practise is attended with much inconvenience, and frequently with serious injury, in consequence of the melting of the wax, and the adhesion of the letters to each other. In all such cases use wafers or gum, and advise your correspondents in the country referred to, to do the same.

Never send money or other articles of value through the Post Office, except either by means of a money order, or in a registered letter. "Any person who sends money or jewellery in an unregistered letter, not only runs a risk of losing his property, but exposes to temptation every one through whose hands his letter passes, and may be the means of ultimately bringing some clerk or letter carrier to moral ruin." Carefully secure every letter or packet containing money or value, first with gum and afterwards with good sealing-wax, on which mark the clear impression of the seal.

On posting a registered letter or packet, always obtain a receipt for the same at the office where posted.

When letters or papers are delayed or missing, at once communicate the fact to the Postmaster of the division in which is situated the Post Office at which the delay or missing letters were posted. In case of a missing letter enclose value, state the exact contents, the exact address, and the office at which posted; the name of the person by whom posted, and the name of the person by whom received at the office. In the case of a delayed letter or paper, send the cover or wrapper in an entire state, in order that the place of delay may be ascertained by an examination of the post marks.

Trouble and loss occasionally arise out of the carelessness or dishonesty of parties employed in the Post Office service; yet instances are not wanting in which it has been shown to the satisfaction even of the complainants, that the fault at first attributed to the Post Office, in truth rested in other quarters.— Theft by private hands, although very difficult of proof, have not unfrequently been brought to light; and it is greatly to be desired that those who suffer loss should, in the first instance, and while the circumstances are fresh, endeavor to ascertain with the utmost precision all particulars respecting the despatch or receipt of the lost letters or papers, and lose no time in communicating this information to the Postmaster. Indeed, generally speaking, it is only by careful inquiry into minute details that the offender can be detected, whether he be a servant of a Department or not.

The Post Office is a department which admits of constant improvement and expansion. The public, by sending to the Postmaster General, clear and correct information respecting faulty arrangements, may materially benefit the service. It must be remembered, however, that changes in machinery so extensive and intricate as that of the Post Office, must be made cautiously and with much previous consideration.

Time is generally required to carry out any material change in postal arrangements; for even when decided upon, old contracts, requiring notice of termination, may have to be got rid

of, and tenders of new contracts invited by public advertisements, before the decision can take effect.

New Post Offices are established by the Department wherever it is ascertained that a sufficient number of inhabitants can be accommodated, and a sufficient amount of postal revenue collected to warrant such a measure. When a new Post Office is required, a petition should be addressed to the Postmaster General, signed by as many of the inhabitants as can conveniently subscribe the same. The petition should state the name of the settlement and district in which it is desired the office should be established; the distance from the neighboring offices; whether at the sight of the proposed Post Office there is a village; the number of mills, stores, taverns, and houses thereat; the extent of the settlement to be served and the probable cost of the mail; together with any other facts which may form any ground for the accommodation applied for.
