DONALDSON LINE BETWEEN GLASGOW AND HALIFAX.

Canada Life Assurance Co'y,

ESTABLISHED 1847.

HEAD OFFICE: HAMILTON, ONT.

CAPITAL AND FUNDS:

OVER 15,000,000 DOLLARS.

Annual Income nearly - - - $3,000,000.
Assurances in force nearly - $66,000,000.

President, - - - - - - - A. G. RAMSAY.
Secretary—R HILLS. Superintendent—W. T. RAMSAY.

THE CANADA LIFE

Has on its books about half of all the business held by all other Canadian Companies.
Has nearly twice as much as the British Companies.
Has three-fourths as much as all the American Companies, and 21% of the total Life Insurance in force in Canada.

THE REASON WHY

Because it writes policies on all approved systems.
Its rates being low, its profits large.
No vexations restrictions, and claims paid as soon as proofs are completed.

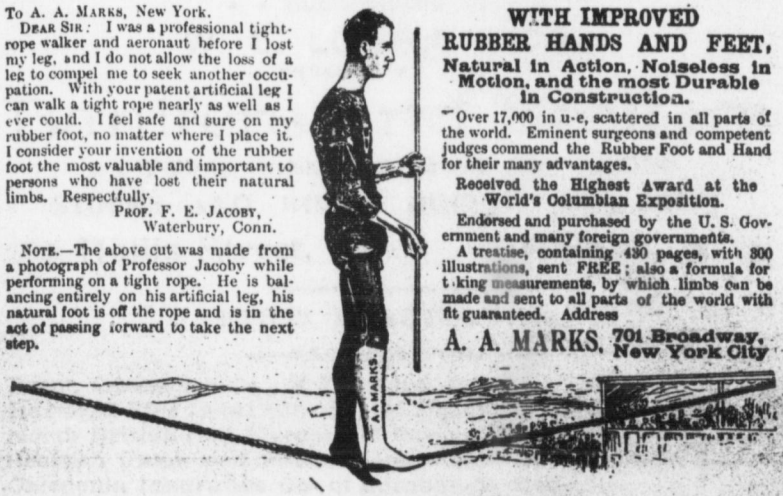
PASSENGER ELEVATOR TAKES YOU TO THE TOP OF THE BUILDING WHERE A FINE VIEW OF THE CITY IS OBTAINED.



Marks' Patent Artificial Arms and Legs,

To A. A. MARKS, New York.

DEAR SIR: I was a professional tight-rope walker and aeronaut before I lost my leg, and I do not allow the loss of a leg to compel me to seek another occupation. With your patent artificial leg I can walk a tight rope nearly as well as I ever could. I feel safe and sure on my rubber foot, no matter where I place it. I consider your invention of the rubber foot the most valuable and important to persons who have lost their natural limbs. Respectfully,

PROF. F. E. JACOBY,
Waterbury, Conn.

NOTE.—The above cut was made from a photograph of Professor Jacoby while performing on a tight rope. He is balancing entirely on his artificial leg, his natural foot is off the rope and is in the act of passing forward to take the next step.

WITH IMPROVED RUBBER HANDS AND FEET,

Natural in Action, Noiseless in Motion, and the most Durable in Construction.

Over 17,000 in use, scattered in all parts of the world. Eminent surgeons and competent judges commend the Rubber Foot and Hand for their many advantages.

Received the Highest Award at the World's Columbian Exposition.

Endorsed and purchased by the U. S. Government and many foreign governments.

A treatise, containing 430 pages, with 300 illustrations, sent FREE; also a formula for taking measurements, by which limbs can be made and sent to all parts of the world with fit guaranteed. Address

A. A. MARKS, 701 Broadway, New York City

HALIFAX LADIES' COLLEGE,

(IN AFFILIATION WITH DALHOUSIE UNIVERSITY.)

ART STUDIO

AND

Conservatory of Music.

SUBJECTS OF STUDY.

I.—**LITERARY and SCIENTIFIC.**—English Mathematics, Science, French and German, Latin and Greek, Elocution, Calesthenics, Shorthand and Typewriting.

II.—**FINE ART.**—Drawing, Water Colors, Oils, China Painting, Modelling.

III.—**MUSIC.**—Piano, Violin, Organ, Voice Culture, Sight-singing, Theory, Harmony, Clarionet, Flute, Bassoon, String Bass.

All departments in the College and Conservatory are fully and efficiently equipped, there being in all a staff of 23 instructors. These instructors are Honor graduates of the first Universities of England and Canada, and of the best musical schools in Germany and the United States. It is the aim of the Governors to make this institution of learning the first in every respect in which excellence in a Ladies' College is desirable.

PREFACE.

THE PUBLISHERS have great pleasure in placing before the public this edition of the Nova Scotia Directory. The matter contained in this work has been arranged in such a systematic form as to render it very easy for those who peruse it. The fact that this has been such a tremendous undertaking, and the desire to have it published and ready for their advertisers and subscribers in the time specified, has occasioned a great outlay of time and money. For any shortcoming, the publishers must appeal to their readers. They have experienced great difficulty in getting the names spelled properly; especially is that the case in some counties. Errors, of course, will be found (as they are in all works of this kind), but the strict and very careful manner in which this work has been compiled has made the errors that have been committed unavoidable.

The publishers here acknowledge their indebtedness to all who have in any way forwarded this work.

The publishers also express their thanks to one and all of the advertisers and subscribers who responded to make this edition a success, so much so that we find when this very large edition is supplied to the advertisers and subscribers, very few will be left.

Sketch of Nova Scotia.

NOVA SCOTIA—"New Scotland"—was so named by James I. of England. There was a "New England" in America, and he was determined that his own Scotland should in like manner have a part of the mysterious new world called after her. There were "Baronets of Nova Scotia" created by the same monarch, but these worthies have left no mark—hardly the shadow of a name—on our history as a Province.

SCENERY.

Nova Scotia is a peninsula on the eastern coast of North America. It is about 300 miles in length, and no part of it is more than 25 miles from the waters of the sea. It is bounded on the east and south by the Atlantic ocean. The coast seaward is rugged and rocky in the extreme; but happily it is broken by many beautiful and well-sheltered bays, harbors and havens, some of which run far inland, and are useful for purposes of commerce. The coast is also protected and rendered picturesque in many places by islands, large and small—resorts of sea fowl, and frequently favourite resorts of summer pleasure seekers. No spots could be healthier in the hot summer time, for the breezes are very cool and bracing, and the coves and creeks, sandy and sheltered, invite to frequent ablutions and to exercise in swimming. From islet to islet, from cove to cove, from headland to shining pebbly beach—how lovely either in the early morning or the dewy eve. How refreshing the landscape, the sea view, the pure air, to the weary seeker after rest and health! Yarmouth, Shelburne, Liverpool, the long beaches of Petite Riviere, LaHave, Lunenburg, Mahone Bay, Chester, Margaret's Bay, to the south-west of Halifax; Cow Bay, Lawrencetown, Sheet Harbor, Guysboro, Port Mulgrave, and many a lovely spot in Cape Breton, to the east of Halifax, furnish every attraction that natural beauty and amenity of situation can impart. It is safe to predict that these and other places yet unmarked in our *Guide Books* will attract the inhabitants of the interior in the heated season of each successive year. The other side of the Province is certainly not less attractive, though it is widely different. Digby, Annapolis, the shores of the Minas Basin, the whole westerly coast of the Bay of Fundy, is remarkably picturesque in the collocation of sea and land. The tides of the bay come and go at times with bewildering swiftness and volume—with a rush and a roar scarcely less wonderful than Niagara itself. Long stretches of reddish flats, leagues and leagues in extent, may at this moment extend bare and dry under the scorching sun. Before the lapse of four or five hours a billowy sea covers all—boiling, foaming, hurrying as if time pressed for some great end to be accomplished. The reverse progress goes on with equal swiftness; the swelling sea becomes a sandy plain. The most surprising thing to strangers is to see at one time of day large vessels riding in buoyant pride on the turbid waters, and at another hour the same vessels high and dry on a forsaken bank of sand.

NORTH SHORE.

The north coast of Nova Scotia is washed by Northumberland Straits, which separate P. E. Island from the mainland. There are many long, level beaches, favorite resorts of those who are fond of safe sea-bathing. There are several harbors, such as Pugwash, Wallace, Tatamagouche, Pictou and Antigonish. The Strait of Canso separates Cape Breton from the Nova Scotia proper. This Strait is over 20 miles long, and furnishes a safe passage for vessels of all sizes. It is a favorite resort in stormy weather for fishing vessels that cannot safely stand the rough buffetings of the Gulf or of the Atlantic. Cape Breton is almost devided into two by the beautiful and picturesque Bras d'Or Lake—a large sheet of salt water, surrounded by bold, varied, lovely scenery, a favorite resort of summer tourists.

We have rich and noble valleys like those of the Gaspereaux, Cornwallis and Annapolis in the west; like the central valleys of Shubenacadie, Musquodoboit,

Stewiacke, Truro; like the northern valleys of River Philip, Wallace River, East River and Margaree. We have long ranges of hills like the Cobequid range running through Cumberland, Colchester, Pictou and Antigonish; like the North and South Mountains of Cornwallis, and like the round, well-wooded hills of Mabou. Salmon rivers abound, and nowhere need the angler look for finer sport. The country abounds in lakes, some of which may be measured in miles, but most of which are small, the gleaming blue eyes of the landscape give it life and character, and ever bringing heaven down to earth. These lakes and lakelets are usually well stocked with trout. Along the Atlantic coast the soil is thin, the slate rock being usually very near the surface and marked by old glacial action. There are frequent and extensive moss bogs. But some districts contain a good deal of fertile land and are well cultivated. The coast waters abound in fish,—and herring, haddock, hake, mackerel, alewives, halibut, salmon, smelts and lobsters. Many of our enterprising people reap rich harvests yearly from the unwilling sea.

Nova Scotia, thus almost surrounded by the sea, and being favored with numerous harbors, its people are naturally fond of the sea. In large numbers they look to its stormy waters for their sustenance. There is scarcely a sea that is not plowed by our adventerous keels—scarcely a shore but has been visited by our people wooing the rewards of commerce. Our hills and vales abound in noble forests of pine, spruce, hemlock, hacmatack, birch, maple, beach and elm.

The soil in the interior of the country is as rich as could be wished; it is in many cases inexhaustively fertile, and a source of perennial wealth to the farmer who is happy enough to be proprietor. Along the nothern coast, too, the soil is usually rich and good. On the flanks of the Cobequid hills the soil is usually thin and requires more manure than is easily available; but in the "intervals" of those hills, the quiet spaces where the brooks and rivers begin, there is fertility as well as beauty, and it often happens that prosperous farms lie nestled and hid away in the bosom of the hills.

CLIMATE.

The mean temperature of Halifax summer is 62½ degrees; of winter, 30 degrees. At Pictou the mean summer heat is about the same as at Halifax, but the winter temperature is lower, nearly 21 degrees. At Antigonish the summer temperature is 59, and that of winter 18 degrees. The maximum heat in Nova Scotia rarely exceeds 80 degrees, and the mercury rarely drops beyond 12 below zero. Our mean annual temperature is about 44 degrees.

AREA AND POPULATION.

Nova Scotia covers an area of 21,731 square miles. Its population is about 525,000. Its largest city is Halifax, with a population of say 45,000. Its shire towns are Yarmouth, Shelburne, Liverpool, Lunenburg, Digby, Annapolis, Kentville, Windsor, Truro, Amherst, Pictou, Antigonish, Guysboro, Port Hood, Arihcat, Baddeck, Sydney.

There are 18 Counties, viz: Annapolis, Antigonish, Cape Bretou, Colchester, Cumberland, Digby, Guysboro, Halifax, Hants, Inverness, Kings, Lunenburg, Pictou, Queens, Richmond, Shelburne, Victoria and Yarmouth.

King's College, Windsor, is the oldest college of British origin in Canada. Founded in 1789, it received a Royal Charter in 1802. It confers degrees in Arts, Divinity, Civil Law and Engineering.

Dalhousie College and University was founded in 1821. It was reorganized in 1863, since which time it has steadily advanced, until now it is far stronger than any college in the Maritime Provinces. It has eight professors and two tutors in Arts, and it has a strong and brilliant law faculty. It grants degrees in arts, literature, law and medicine.

The Presbyterian College, Halifax, is an exclusively Theological institution.

Acadia College, Wolfville, was founded in 1838 by the Baptists of Nova Scotia. It is a prosperous and useful institution. The Board of Governors are appointed by the Convention, which also have under their control Horton Academy and Wolfville Seminary.

Mount Allison College, though located in New Brunswick, is the College of the Methodists of Nova Scotia. It was founded say about 1845. There has been added lately an immense brick and stone building for boarders. Also a seperate beautiful art building.

The Halifax Ladies' College was founded in 1887. It has proved remarkably successful.

St. Francis Xavier's College, at Antigonish, is under the control and patronage of the Roman Catholic Church. So is the Convent School, Halifax, and the large institution of Mount St. Vincent, near Halifax. A Provincial School of Agriculture has been established at Truro.

COMMUNICATIONS PROMPTLY and CHEERFULLY FURNISHED.

THE

Robb=Armstrong Engine

WAS designed for us by a prominent American Engineer, and contains the best points of the leading American high speed engines with several improvements. Great care is taken in the selection of all materials, and the workmanship is as perfect as it is possible to get by the most modern machine shop methods. In the tandem and cross compound engines both valves are controlled by the governor (arranged so as to give equal work to both pistons) which tends to extremly quick regulation under sudden changes of load, gives better steam distribution and higher economy than can be obtained by a fixed cut-off on the low pressure valve. The high pressure cylinder of the tandem is placed next the frame and both pistons and cylinder heads may be withdrawn through the low pressure cylinder without disturbing it.

The Monarch Economic Boiler

Has an outer casing doing away with the necessity of brickwork and making it portable, It has been proved by careful tests to give a much higher economy than the common brick-set boiler, some tests showing 30 per cent. saving. The causes for this are: 1st. The furnace is surrounded by water so that no heat is wasted and no cold air can leak into furnace. 2nd. The gases pass through the tubes directly from the furnace at a high temperature, keeping the tubes much cleaner than in the return tublar boiler 3rd. The gases return between the shell and casing, rendering every inch of the boiler effective as heating surface. 4th. The circulation of water is more natural and more rapid than in any other form of boiler and it is less liable to become clogged with scale or sediment. For portable mills where lightness is of more importance than economy, we supply this boiler without case mounted on wheels or skids.

See Adv. Page 701.

The University of Mount Allison College.

SACKVILLE, N. B.

THE attention of young men and women proposing to graduate in Arts, or to take Special Courses in advanced studies, preliminary to the professions, is confidently directed to the advantages offered by this Institution. The University building is the handsomest edifice of its class in the Maritime Provinces, containing Chapel, Library, Lecture Rooms and Laboratory. The Residence (opened in 1894) at once spacious and elegant, provides on reasonable terms splendid boarding accommodation for resident Students. Young Ladies taking the University Course are elegantly domiciled in the adjoining Ladies' College.

For Calendar or any Special Information needed address the President,

D. ALLISON, LL. D.

Mount Allison Ladies' College,

OWENS MUSEUM OF FINE ARTS & CONSERVATORY OF MUSIC.

Courses of study are provided, extending from the primary branches through the whole University curriculum to the degree B. A. The staff consists of seventeen Teachers in addition to the University Professoriate. Piano, Pipe Organ, Violin, Vocal Culture, Shorthand, Typewriting, Book-keeping and Commercial courses are all taught after the latest and most improved methods.

The Owens Art Institution which with its magnificent gallery is still in charge of Prof. Hammond, R.C.A., an exhibitor in the Paris Salons, the Royal Academy, London, etc.

The Conservatory of Music employs eight instructors, at the head of whom is an experienced Teacher from the staff of the Grand Conservatory of New York, who is a graduate of Leipzig.

Mr. C. L. Chisholm, who has studied successfully for four years under some of the greatest masters in Germany, has charge of the Violin Department.

Voice Culture is taught by an accomplished Vocalist, who has studied in Germany.

Every care is taken to make the School a refined Christian home, where lady-like manners and nobility of character shall be cultivated.

For Calendar address:

REV. B. C. BORDEN, D. D.

SACKVILLE, N. B.

Mount Allison Wesleyan Academy.

J. M. PALMER, M. A., PRINCIPAL.

No Institution of Learning in the country has had a more successful history and none is more worthy of patronage for the future. Many of the most prominent men now in professional, commercial and political life in Canada, and in other lands, had their training at Mount Allison Academy. The arrangements for the future are such as will guarantee a continuation and extension of the efficiency of the Institution. A thorough English and Commercial Education is imparted, and students are prepared for College Matriculation and for Civil Service examinations. Instructions can be obtained in Shorthand and Typewriting, also in music, both vocal and instrumental. If desirable. Students can take, in addition to their work in the Academy, one or more classes and lectures in College. Every care is given to the private interests of the boys, so as to insure their comfort and happiness.

The building is commodious, well heated throughout by the hot water system, and comfortably furnished.

EXPENSES VERY MODERATE.

For Particulars Apply to the Head Master or to the President of the University.

CHAS. H. HARVEY, Wholesale Groceries and Fruits. Stock Large and Fresh. Prices Right.

TELEPHONES

THE "UNIQUE."

Main Line and Warehouse TELEPHONES.

THESE Telephones are thoroughly well made, and will stand the constant use to which they are subjected.

There is no economy in buying instruments that will give out after short use and become a constant source of worry and expense.

Competitive tests have proved the "UNIQUE" to be superior to others.

The "UNIQUE" is the simplest and most efficient electric telephone made. It has no spring or screw adjustment in Transmitter to work loose.

Sold Outright. *No Exorbitant Royalties.*

SOLE MANUFACTURERS

JOHN STARR, SON & CO., LIMITED,

134 Granville Street, HALIFAX, N. S.

Dealers in ELECTRICAL SUPPLIES and Contractors for ELECTRICAL EQUIPMENT of every kind.

THE EQUITABLE LIFE ASSURANCE SOCIETY

OF THE UNITED STATES.

January 1st, 1895.

Assets,	**$185,044,310**
Surplus, 4 per cent.,	**37,479,803**
New Assurance written in 1894,	**217,115,988**

B. A. FIELDING,

Manager for the Maritime Provinces,

Office: Queen Building, Hollis Street,

HALIFAX, N. S.

W. B. KEELOGG, Cashier.

Results on Policy Maturing in 1895.

20-YEAR ENDOWMENT.

20-Year Tontine Period.

Policy No. 94,591, for $2,000, was issued in 1875, on the life of James G. Smith, of Boston,

Total sum paid in Premiums $1,907.20.

OPTIONS

At end of Tontine Period.

1. Cash,	$3,038.34
2. Paid-up Policy	7,338.00*
3. Annuity for Life,	214.18

Extract from Letter dated Feb. 2, 1895:

"These results are even better than I anticipated, and are much better than those I have knowledge of in other Companies. Indeed, I am so well pleased with the advantages offered by the Equitable that I have this day applied for another policy.

JAMES G. SMITH.
