OTTAWA, MARCH 1, 1878. Mr. Cartwright has brought down his budget, and an empty budget it is. The chief point of it that is worthy of notice is the deficit. The question of unpaid claims for d-mages done to property on the line of the Intercolonial for depriving mills of water and the destruction of property through which it was taken was brought up by a Quebec member, who complained of the manner in which the rights of the people on the line had been trampled on. Mr. Mitchell took up the matter and spoke at some length of the grievances suffered by his constituents, showing how the officials had mock examinations and acquitted the railway employees of blame on their own evidence. He also enquired what the intentions of the Gov't were regarding the building a telegraph line from Chatham to Escuminac, as recommended by a Committee of the House, and the Premier said he had no recollection of any such recommendation. The Premier has a wonderful facul y of not knowing anything that it would be inconvenient to remember, Mr. Mitchell told him his ignorance of the action of the Commendation.

people. Such a violation of the rights of settlers was never before known, the people never knew the advertisement was in the Gazette, and great advantage was taken of Hon. Surveyor Gen'l said the hon, gentleman was entirely in error, as the lots referred to were not under license, it was not intended they should be under license. nor was any one authorized to cut lumber upon them. The interests of the settlers were most zealously guarded by the Department.

Mr. O'Leary said that when complaints were made by the settlers in reference to lumber being cut off their lots, he applied to the Sur. Gen. to protect the poor people, and he was glad to be able to say that the Sur. Gen'l'had acted promptly in the settlers bebeit, and had taken steps to protect their interests against trespassers. No licenses had been given by the Department to cut lumber on those lands.

Mr. Johnson said O'Leary ought to resent the action of the Sur. Gen. who, when \$500 were to be expended to open a road in Kent, a man was sent from Fton to take charge of the work. That was a great compliment to the members from Kent. The motion passed, and Johnson, Covert and Crawford wer appointed Committee to prepare and present the address for the papers. Hon. Surveyor Gen'l said the hon, gentleman was

were appointed Committee to prepare and present the address for the papers.

By the pursuant to notice, moved for full financial statements, and said his object in doing so was to ascertain the exact financial condition of Province and set at rest the disputed points on the subject between the Gov't and the Opposition. Secretars aid the information would be furnished without a address, and motion was withdrawn.

To Hon. Wm. M. Kelly, A. A. Davidson, Wm Newcastle, on Swim, and L. J. Tweedie, Esquires, M. P. P. GENTLEMEN,-Let me again direct your attention to the necessity of making some provision towards the commencement of a ridge over the North West River at near Rolphs. The people require one bad-ly, and while other portions of the County have been carefully attended to, our district has been shamefully neglected. We have cen led to believe that the Commission of Public Works, some time ago spuke of the necessity of having one built and of causing an appropriation to be made for that purpose at this present session.— We ask Messrs. Davidson, Swim—and Tweedie, to work together and interview the Commissioner and get from him some decid-

motives, and showed that he had moved in the public interestatione. Year after year the incidental expenses of the Governor Generalship had gone on increasing, until the amount had grown very large, and he believed that it was time to stop it. The taking of so many thousands of the people's earnings for purposes of display should be stopped; the country could not afford it. He had a right as an independent member of the House, to ask for any information in reference to public expenditure, no matter how distinguished the party might be, and the Gov'than or right to refuse. If defailed expenditure was objected to—in order to meet the Premier he would strike out the word detail from his motion, and press it if he stood alone. He was supported by Dr. Tupper and others, while Mr. Holton, who is always ready with sophistry for the support of the Gov'th, defended the Premier's refusal as long as he could, and then came to his rescue with a flank movement amendment. As this amendment offered something, and was sure to be earried by the mechanical majority on Ministerial benches. Mr. Mitchell did not divide the House on it, but contented himself vith telling the Gov't that they would be held responsible for refusing the information which the people had a right to get, and that tas he had gained his point and the Gov'that they would be held responsible for refusing the information which the people had a right to get, and that tas he had gained his point and the Gov'that they would be without it. I have tried to be carried by the mechanical majority on the foreward that as he had gained his point and the Gov'thous the more than the conditions. The Government's canal contracts were ventilated last night quite freely. Mr. Mackenzie met the first intimation with his customary tone of virtuous indignation, but after Tupper, Pope, Plumb and Rochester had gone over some of the facts of the Welland Canal contracts and the Gov'th had for point and the more than the conditions. HOME MANUFACTURE!

The subscriber would call attention to his large and varied assortment of Marbleized Slate Mantels

And washtub stand.

Combining a greater excellence, of mechanical simplicity together with greater durability and entire reliability for all the requirements of the field, than any other Mower extant.—In construction they are similar to the celebrated Walter A. Wood's Iron Frame Mowers and the Richardson Buckeye, both American machines. Of the former there are of the States. We have over 500 of our manufacture of 200,000 in use, and the extraordinary pumber of 200,000 were manufactured and sold last season, by the Wood Company of United States. We have over 500 of our manufacture now in use, every one of which (no exceptions) stands as a monument of the great, and unprecedented success of home manufacture to them relative to our Mowers in use in their respective localities, which will establish beyond doubt their unquestionable superiority over any other mower to be had in our market.

The tacility of procuring all parts or pieces within a nominal length of time mist show beyond the shadow of a doubt the claims such an enterprise has upon the tarmers of the Maritime Provinces.

For the coming Harvest of 1877 we will manufacture LARGELY in excess of our numbers of last Season, and trust that our growing enterprise may find such inducements held out to it as will be commensurate with its merits.

Let it be remembered we have no hesitation at all times, in entering in a friendly competition in the field with any other machine in our market.
