There approaches the season when the mischievous will pack up her lingerie frocks and try to look sad when saying good-bye to hubby at the station. Tanlac is a family medicine, as good for children as it is for grown folks.—P. E. Lumley.

The time is coming when about the only thing that will scare a horse will be to see another horse in town. Dread of Asthma makes countless thousands miserable. Night after night the attacks return and even when brief respite is given the mind is still in torment from continual an-

Women Drivers
 are growing in number each year and the cars they drive are Fords.
 Simplicity of operation and the ease with which service can be obtained appeal to women—but a greater appeal lies in the fact that the car is hundreds of dollars lower in price than any other. This saving in price placed in a bank account or a payment on a new home means more to a woman than a car with unnecessary equipment, power and size.
 It is a year for common-sense buying—that means Fords.
 Order now if you want early delivery.

DISTRICT AND GENERAL
 Grand Trunk car ferries may be used at Windsor to relieve the automobile traffic across the Detroit River.
 The northern watermelon market is likely to be glutted by shipment of 25,000,000 due within a month from the south.
 The Cobourg town council has purchased some 3,800 pounds of calcium chloride, which is to be used on the streets this summer instead of oil.
 A child three years old near Vandear wandered into the meadow on its father's farm and had both feet severed by the knives of a mower.
 The office of the district representative of the department of agriculture, which has been located in Dutton since its establishment some 12 years ago, is to be moved to St. Thomas.
 Wheat cutting commenced in Dover township two weeks earlier than usual. Reports indicate that great damage has been done by the Hessian fly and some fields will not yield over five bushels to the acre.
 Among the laws which came into force recently is one of interest to the travelling public by which hotel owners have to post in the entrance of their establishments and in the bedrooms and dining-rooms prices of accommodation under its various forms.
 Warning is issued by the provincial police to the effect that any person or persons allowing their cattle or horses to graze unattended on the sides of the roads are liable to prosecution. It is pointed out that this practice is one of utmost danger to motorists, especially at night.
 According to the reports which come from the lake shore the raspberry crop in Kent this year will be a bountiful one. Tomatoes are also an abundant crop and the home grown variety made their appearance on the local market Saturday for the first time this year.
 John Smith, who settled with his father's family on the tenth concession of Brooke township in 1856, died a few days ago at the home of his daughter, Mrs. Sole, in Sarnia. He was in his 85th year. The funeral took place from the old homestead at Alvinston cemetery.
 John Sinclair, one of the oldest residents of Aldborough, died at the home of his daughter, Mrs. A. Munroe, Talbot street, after a few days' illness with paralysis, aged 87 years. He was born in Middlesex and lived in the township for 50 years. His wife, who was Margaret McKellar, of Lobo, died two years ago.
 The West Middlesex U. F. O. picnic at Stratroy on Dominion Day was a big success, an attendance of 12,000 being estimated. The program of races and games was faithfully carried out and the community dance in the evening was much enjoyed. The proceeds of the day were divided between the Stratroy hospital and rest room and the U. F. O.
 The mysterious death last month of nine young cattle belonging to Wm. Moore, a well-known Shelden farmer, is still unsolved. An analysis of the contents of the stomachs and bladders of two of the dead animals, which were sent to Ottawa, gave no clue to the cause of the death and the Dominion authorities are puzzled to know the nature of the malady.
 Don't suffer any longer. Get your stomach in shape by taking Tanlac and eat what you want.—P. E. Lumley.

LIBRARY FOR GLENCOE
 The obtaining of a Carnegie Library for our village, which has for the past few months aroused the interest of many of our citizens, is at last practically assured.
 On Thursday of last week Glencoe was fortunate in having a visitor from W. O. Carson, inspector of libraries for Ontario. After conferring with him the library board definitely decided to notify the trustee of the Carnegie Trust Fund of their intention to proceed with the erection of a \$5,000 library.
 Following this meeting a delegation from the board, accompanied by Mr. Carson, met with the I. O. O. F., and we are pleased to report that this organization has signified its willingness to donate land for the said building.
 On Monday evening the library board presented their proposition to the village council, meeting with a hearty response and the assurance that the civic fathers will assist in any way they can in bringing about the completion of the library.
 The Carnegie library will be a splendid thing for the community, and those interested in its erection are hoping for the friendly support of all citizens.

CHILDREN'S ORCHESTRA GIVES FINE CONCERT
 Seating capacity at the Carman Arena was filled on Friday evening when Prof. Howard Gordon's stringed instrument classes from Stratroy, Alvinston, Tillsonburg, Aylmer, Fort Stanley and Glencoe as an orchestra of sixty pieces occupied a stage specially constructed. Their performance was a unique one and made a decided hit with the large audience. It was also remarkably clever inasmuch as the classes had not met together for practice until the evening before, when they performed at Stratroy.
 Owing to a heavy rain during the afternoon there were a few disappointments in some of the artists announced not being able to reach Glencoe. The program, nevertheless, was splendidly carried out. It was well selected and consisted of hymnology and simple classics.
 Featured in the program were songs by James Barnum, of Aylmer; concertina solos by Manfred Gare, of Stratroy; violin solos by Miss Ella Sexton, of Stratroy; piano solos by Theodore Gray, of London; violin duet by Miss Virgie Clarke, of Glencoe, and Master Jack Ellison, of Port Stanley; violin solo by Wm. Coal, of Glencoe; cello solo by Master Donald Wright, of Stratroy; violin solo by Billie Ellison, of Port Stanley; violins and cello trio by Miss E. Sexton, Billie Ellison and Donald Wright. Practically every number on the program was given a hearty encore.
 Miss Grace Blackburn, of London, spoke briefly and to the point on the splendid benefits of young people's orchestras to a community in training the mind to appreciate the higher class of music. Mr. York, principal of the high school, spoke in a similar strain and gave a hearty welcome to the performers on behalf of the high school and town in general. Both praised highly the work being accomplished by Mr. Gordon in the development of musical talent in the schools and homes.
 Similar entertainments to the one in Glencoe were given by the orchestra at Stratroy, Thursday evening; Tillsonburg, Monday evening; and Aylmer, Tuesday evening.

APPOINTMENT OF CROWN ATTORNEY
 Toronto, July 10.—According to information received from an authoritative source at the Parliament Buildings Monday morning, the stage is set for the announcement this week that J. C. Elliott, ex-M. L. A. for West Middlesex, will be the new crown attorney for London and Middlesex county.
 Revocation of the order that the new crown attorney must relinquish his private law practice has removed every barrier to the appointment of Mr. Elliott.

DEATH OF JOHN LUMLEY
 The death occurred at his home on the Longwoods Road, Mosa, on Monday, July 10th, of John Lumley, aged 71 years. The funeral was held on Wednesday from his late residence to the Simpson cemetery. Mr. Lumley was a well-known and prominent farmer of the township. He leaves a family of seven girls and three boys; also two brothers, Hiram Lumley, of Glencoe, and Elijah Lumley, of Wardsville. His wife died in January last.

DEATH OF JAMES CORBETT
 There passed away on Monday, July 3rd, at his residence, Park avenue, Glencoe, James Corbett, in his 66th year, son of the late Mr. and Mrs. James Corbett, formerly of Glencoe.
 Although ailing for some time from a stubborn complication which gradually sapped life's vital springs beyond any earthly aid, the end came as a shock to his many friends and acquaintances.
 Born in Ireland, he came to Glencoe when a young man and was a resident of Glencoe for 45 years and employed by the Pictorial Mfg. Co. for the past 18 years. He leaves to mourn his loss his sorrowing widow; one daughter, Mrs. James Grover; two grandchildren; five brothers, Maxwell of Stratford, David of St. Clair, Mich., William of Hamilton and Ernest and Robert of Calgary, and one sister, Mrs. Jane Galbraith of Poughkeepsie, N. Y.
 After a short service, conducted by Rev. T. J. Charlton, of St. John's church, and by Rev. Mr. Robertson under the auspices of the I. O. O. F., on Thursday afternoon, interment was made in the family plot at Oakland cemetery. The floral offerings were beautiful. D. Munroe, of Shelden, had charge of the funeral.

CIVIC HOLIDAY
 Monday, August 7, has been selected as civic holiday for Glencoe, and the municipal council has passed a resolution to that effect.

GLENCOE COUNCIL
 At a special meeting of the town council on Monday evening the following business was transacted:
 Accepted tender of F. W. Nichol for sidewalks at 60c sq. yd. and storage tank at \$200; granted request of G.W.V.A. and I.O.O.F. for use of Main street for street carnival; accepted offer of Imperial Oil Co. for 5,000 gallons liquid asphalt, the village to pay for only one-half of the same.
 Charles George, Clerk.

GLENCOE CHAUTAUQUA
AUG. 14-17
FOUR DAYS

SPEAKS TO SIMCOE FARMERS
 J. G. Lethbridge, M.L.A. for West Middlesex, was one of the speakers at the annual picnic of the North Simcoe Farmers' Political Association held at Wasaga Beach, at which Premier Drury gave the address of the day.
 In his report of the picnic the Elmville Lance says—Mr. Lethbridge of Middlesex is one of those solid headed sons of the soil who have made the western counties of Ontario what they are—the agricultural paradise of the Dominion. Mr. Lethbridge does not crave for the vulgar notoriety of the time-serving politicians, but when he speaks the House treats his opinions with respect, and his honesty of purpose is appreciated even by his political opponents.

STANDING OF BALL LEAGUE
 During the week the following games in the West Middlesex Baseball League have been played:
 July 6, at Delaware—Delaware 7, Glencoe 6.
 July 6, at Newbury—Newbury 3, Appin 2.
 July 10, at Appin—Appin 3, Newbury 1.
 July 10, at Glencoe—Delaware 4, Glencoe game called at fourth inning on account of rain.
 Present standing of league—Delaware, won 8, lost 1; Appin, won 6, lost 6; Glencoe, won 4, lost 8; Newbury, won 3, lost 6.

CAMPBELLTON GARDEN PARTY
 Campbellton's sixth annual garden party will be held on the school grounds, S. S. No. 10, Dunwich, on Friday evening, July 14th. The following high-class artists will take part:—Andrew W. Murdison, of Buffalo, N.Y., Scottish comedian, known as the "Rale McKie"; The Joe Williams Co., of Toronto, composed of Joe Williams, English comedian; Miss Angas Adie, soprano, who never fails to please; Miss D. Brown, accompanist; Master David Ralibhai, violinist; the Harmonas as may be required to meet current expenses of the township until such time as taxes are levied and can be collected.
 The reeve and councillor were authorized to build a concrete bridge on range 34, lot 6.
 Accounts were paid, and council adjourned to meet again on Thursday, the 27th day of July, at 10 o'clock forenoon.
 A. P. McDougald, Clerk.

AN OMISSION
 In copying the minutes of the meeting of the Glencoe council of July 3rd, the following motion was omitted by an oversight on my part:
 "It was moved by Mr. Parrott, seconded by Mr. Lumley, and carried, that Monday, August 7th, be held as Glencoe civic holiday."
 Charles George, Clerk.

Had Your Iron Today?

The Delicious Bread —of Energy and Iron

SERVE raisin bread twice weekly on your table for three reasons:

1. Flavor; 2. Energy; 3. Iron

You remember how good a generously filled, full-fruited raisin bread can be. Your grocer or baker can supply a loaf like this.

Insist—if he hasn't one he can get it for you.

Full-fruited bread is full of luscious seeded Sun-Maid raisins—rich in energizing nutrient in practically predigested form.

Raisins also furnish fatigue-resisting iron for the blood.

Serve plain raisin bread at dinner or as a tasty breakfast toast with coffee.

Make delicious bread pudding with leftover slices. No need to waste a crumb of raisin bread.

Begin this week the habit of raisin bread twice weekly in your home, for raisin bread is both good and good for you.

Sun-Maid Seeded Raisins

Make delicious bread, pies, puddings, cakes, etc. Ask your grocer for them. Send for free book of tested recipes.

Sun-Maid Raisin Growers

The Cow Puncher

BY ROBERT J. C. STEAD.

(Copyright The Houson Book Co.)

Synopsis of Preceding Chapters.

Dr. Hardy, famous specialist, and his daughter Irene, meet with an accident while on a motoring trip in the foothills of Alberta and find a refuge in the cabin of the Elden ranch where dwell David and his dissolute father. The girl and boy promise to meet again in the future. After his father's drunken death David goes to seek his fortune in town and loses all his money at a pool table. He attends the theatre with Conward whom he met in the poolroom.

CHAPTER V.—(Cont'd.)

But there was a whirr from the forest, and the girl reappeared, this time all in red, but not nearly so much in red as she had previously been in white. My, what a quick change she had made! And how her skirt stood out like a rim when she whirled herself! And the young man left all the rest and went to dance with her again. Dave was not altogether pleased with that turn of events. But presently the dance broke up, and they were flung again in line across the stage. And there she was, all in red—no, not all in red, but certainly not in any other color—right before him. And then she looked down and smiled again at him. And he smiled back. And then he looked at Conward and saw him smiling, too. And then he felt a very distressing uncertainty, which brought the color slowly to his face. He resolved to say nothing, but watch. And his observations convinced him that

RADIO

the smiles had been for Conward, not for him. And then he lost interest in the play. They hustled into their overcoats to the playing of the national anthem. "Hurry," said Conward, "let's get out quick! Ain't she some dame? There—through the side exit—the stage door is that way. She promised to have her chum with her—they'll be waiting if we don't hurry."

Conward steered him to the stage entrance, where a little group was already congregated. In a moment the girl appeared, handsomely dressed in furs. Dave would not have known her, but Conward recognized her at once, and stepped forward. With her was another girl, also from the chorus, but Dave could not recall her part. He was suddenly aware of being introduced. "This is my friend Belton," Conward was saying. Dave was about to correct him when Conward managed to whisper, "Whist! Your stage name. Mine's Edward. Don't forget."

Conward took the first girl by the arm, and Dave found himself following rapidly with the other. They cut through certain side streets, up a stairway, and into a dark hall. Conward was rattling keys and swearing amiably in his soft voice. Presently a door opened; Conward pressed a button, and they found themselves in a small but comfortably furnished room—evidently bachelor apartments.

The girls threw off their wraps and sauntered about the place, commenting freely on the furnishings and decorations, while Conward started a gas grate and put some water to boil. "Sorry I've nothing for you to eat," he said, "but I've some good medicine for the thirst."

"Eating's poor business when there's a thirst to be quenched," said one of the girls, with a yawn. "And believe me, I've a long one."

Conward pulled a table into the centre of the room, set chairs about, and produced glasses and a bottle. Dave experienced a sudden feeling as of a poor swimmer beyond his depth. He had never drunk, not even beer, not so much from principles of abstinence as from disgust over his father's drunkenness and enmity toward the means of it.

The glasses were filled and raised. "Ho!" said Conward.

"Here's looking!" said one of the girls.

Dave still hesitated, but the other girl clicked her glass against his. "Here's looking at you," she said, and she appeared to lay special emphasis on the last two words. Certainly her eyes were on Dave's as she raised her glass to her lips. And under the spell of those eyes he raised his glass and drained it.

Other glasses were filled and drain-

ed. The three were chattering away, but Dave was but vaguely conscious of their talk, and could weave no connected meaning into it. His head was buzzing with a pleasant, dreamy sensation. A very grateful warmth surrounded him, and with it came a disposition to go to sleep. He probably would have gone to sleep had his eye not fallen on a picture on the wall. It was a picture of a girl pointing her finger at him. He suspected that she was pointing it at him, and as he looked more closely he became very sure of it. No girl could point her finger at him. He arose and made a lunge across the room. He missed her, and with difficulty retraced his steps to the table to make a fresh start.

"She's makin' fun of me," he said, "I don't stand for that. Nobody can do that with me. Nobody—see, I don't 'low it."

"Oh, you don't," laughed one of the girls, running into a corner and pointing a finger at him. "You don't!"

He turned his attention to her, steadying himself very carefully before he attempted an advance. Then, with wide-stretched arms, he bore down cautiously upon her. When he had her almost within reach she darted along the edge of the room. He attempted a sudden change in direction, which ended disastrously, and he found himself very much sprawled out upon the floor. He was aware of laughter, but what cared he? He was disposed to sleep. What better place to sleep than this? What better time to sleep than this? In a moment he was lost to all consciousness.

It was later in the night when he felt himself being dragged into a sitting posture. He reconstituted in a mumbled voice. "Is too early," he said. "Altogether too early. Early. Whew! Watch'er spin. Jus' his job. Paid for it, ain't he?"

"Well, I ain't paid for this," said Conward, rather roughly. "And you go to pull yourself together. Here, take a little of this; it'll put some gimp into you." He pressed a glass to his lips, and Dave swallowed.

"Where am I?" he said, blinking at the light. "I rose uncertainly to his feet and stood about the room in returning consciousness.

"Where's the girls?" he asked.

"Gone," said Conward, sulkily. "Couldn't expect 'em to stick around all night to say good-by, could you, and you sleeping off your drunk?"

Dave raised his hand to his head. A sense of disgrace was already upon him. Then he suddenly turned anger on Conward.

"You put this upon me," he cried. "You made a fool of me. I've a mind to bash your skull in for you."

"Don't be silly," Conward retorted. "I didn't enjoy it any more than you did—introducing you as my friend, and then have you act out like that. Why didn't you tip me? I didn't know it would put you to sleep."

"Neither did I," said Dave.

"Well, the next thing is to get you home. Can you walk?"

"Sure," Dave said for the door, but his course suddenly veered, and he found himself leaning over a chair. Conward helped him into his overcoat, and half led, half shoved him to his boarding-house.

CHAPTER VI.

Elden awoke Sunday morning with a feeling that his head had been boiled. Also he had a prodigious thirst, which he slaked at the water pitcher. It was the practice of Metford's gang to select one of their number to care for all the horses on Sundays, while the others enjoyed the luxury of their one day of leisure. In consequence of this custom the room was still full of snoring sleepers, and the air was very close and foul.

Dave sat down by the little table that fronted the open window and rested his head on his hands. It was early spring; the snow was gone; a zing sunshine bathed the prairies in the distance, and near at hand were the twitter of birds and the ripple of water. It was a day to be alive and about.

But the young man's thoughts were not of the sunshine, nor the fields nor the water. He was recalling, with considerable effort, the events of the previous night; piecing them together in impossible ways; reasserting them until they offered some sequence. The anger he had felt toward Conward had subsided, but the sting of shame rankled in his heart. He had no doubt that he had furnished the occasion for much merriment upon the part of the young women, in which, quite probably, Conward had joined.

"Fool," he said to himself. And

New Life

for Rheumatic Sufferers

The shortest thing in the world is not a mosquito's eye lash—it is the memory of the public.

We again remind sufferers from Rheumatism, Sciatica, Lumbago, Gout, Neuralgia and Neuritis of our marvelous remedy, "New Life."

Thousands of grateful testimonials received during past twenty-five years.

One bottle for One Dollar; Six bottles for Five Dollars. Mailed direct to customers.

New Life Remedy Company
78 West Adelaide St., Toronto
Canada

because he could think of no more specific expression to suit his feelings, and because expression of any kind brought a sort of relief, he kept on repeating the word, "Fool, fool, fool!" And as his self-condemnation gradually won him back to a sense of perspective he became aware of the danger of his position. He went over the events of the recent months, and tried to be rational. He had left his ranch home to better himself, to learn things, to rise to be somebody. He had worked harder than ever before, at more disagreeable employment; he had lived in conditions that were almost nauseating, and what had he learned? That you can't beat a card man at his own game, price sixty dollars, and that the gallery seats are cheaper, and sometimes safer than the orchestra. Then in a sudden he thought of Reenie. He had not thought of her much of late; he had been so busy in the days, and so tired at nights, that he had not thought of her much. True, she was always in the back of his mind, in his subconscious mind, perhaps, but he seemed to have put her away, like his revolver and lasso. Now she burst upon him again with all that beauty and charm which had so magnetized him in those glad, golden days, and the frank clearness of her girlishhood made him disgusted and ashamed. It was to fit himself for her that he had come to town, and what sort of mess was he making of it? He was disposed to sleep. What better place to sleep than this? He had been drunk.

Dave's nature was one in which emotions were accelerated with their own intensity. When he was miserable his misery left no place in his soul for any ray of sunshine. It fed on itself, and grew to amazing proportions. It spread out from its original cause and enveloped his whole life. It tinted all his relations, past, present, and future. When a cloud of gloom settled upon him he felt that it would never lift, but become heavier and heavier until he was crushed under its weight. And the sudden manner in which Reenie had now invaded his consciousness intensified the blackness in which he was submerged, as lightning darkens the storm. . . . He saw her on that last night, with the moonlight wooing her white face, until his own body had eclipsed it in a warmer passion, and he heard her words, "I know you are true and clean."

True and clean. "Yes, thank God, I am still that!" he cried, springing suddenly to his feet and commencing to dress. "I've been spattered but nothing that won't wash off. Perhaps," and he stopped as the great thought struck him, "perhaps it was the luckiest thing in the world that the booze did put me out last night. I'll wash it off."

There was considerable comfort in this thought. He had wasted some precious months, but he had not gone too far, and there was still time to turn back. But he must begin work at once on the serious business of life. With this resolve his spirits returned with a rush, and he found himself whistling as he completed his toilet. There was no breakfast for the late sleepers Sunday mornings, and he went at once into the warm air outside. The sun fondled his body, his limbs, his face; the spring ozone was

in his lungs; it was good to be alive. Alive—for a purpose. Well, he would start at once; how could he begin a life of purpose to-day? He was quite set on the necessity of doing something, but quite at sea as to what that something should be. It occurred to him for the first time that Society had been much more generous in supplying facilities for a boy to go down hill than to go up.

(To be continued.)

Woman's Interests

A Home Canning Budget.

Canning is one of the most desirable means of preserving fruits, vegetables and meats, for it preserves food in a condition more nearly like that of freshly cooked foods than is the case with dried, pickled, or brined foods. A further advantage in canning is that the housewife has the food all cooked and ready for serving, except perhaps in some cases, seasoning and sauces are to be added. The housewife who really maps out a canning program before she begins, may fill her canning shelves with a variety of canned goods, such as vegetables, fruits and meats as will answer the problem of "What shall I have for dinner?" very satisfactorily.

It is always a wise plan to can in terms of the family rather than in terms of the food at hand. Too often the housewife will can in abundance these products which she has at hand without giving careful consideration to the needs of the family. For instance, we will say she has a large supply of tomatoes, and she canes in large amounts, even though the family eats this vegetable sparingly.

Every housewife should plan her canning program as regards the likes and dislikes as well as the size of her family. She should decide from her experience of former years as to the amount of canned products of each variety the family will consume and adhere quite rigidly to this program. By this method a greater degree of efficiency in the daily menu will be obtained.

Product For Person for Eight Months.

1. Greens, spinach, dandelions, chard and other greens, five quarts.
2. Tomatoes, ten quarts.
3. Other vegetables, peas, beans, beets, carrots, etc., fifteen quarts.
4. Fruits (including jellies), thirty quarts.
5. Meats. Fresh meat in winter, (canned for spring, summer and fall), thirty quarts. This makes a total of ninety quarts per person.

Ratio of Uncooked to Canned Products

Peas, 1 bushel 18 qts.
Peas, 1 bushel 30 qts.
Plums, 1 bushel 30 qts.
Blackberries, 16 qts. 14 qts.

Minard's Liniment for Burns, etc.

WRIGLEY'S

Satisfies the sweet tooth, and aids appetite and digestion. Cleanses mouth and teeth. A great boon to smokers, relieving hot, dry mouth. Combines pleasure and benefit. Don't miss the joy of the new NIPS—the candy-coated peppermint tid bit! Chew it after every meal.

SHIFTING DUNES OF PRINCE EDWARD CO.

THE MOST REMARKABLE FORMATION OF KIND.

Ontario Government Employing Unique Method of Planting to Stabilize Sand.

The Ontario government is winning in its fight against the sand banks of Prince Edward county. Judging by present progress, in a very few years the famous moving hills in the southwest corner of the county will be reduced to their position previous to the middle of the last century—simply mounds of fine sand covered with forest growth.

These famous hills are the most remarkable sand formations to be found in the world, being much larger and higher than similar hills on the shores of Lake Michigan, and in Denmark, or on the island of Java. They are moving hills of sand, constantly drifting inland, by the action of the winds, submerging trees and farms, and even houses and barns, as they gradually add to their inland banks.

The largest of the hills is 150 feet high, from the summit of which a magnificent panoramic view is had of lake and forest, of farm and easy some, of winding roads and curving bays. While the sand is as fine as flour, it packs so hard, that walking is easy upon it. By digging a few feet in the sand hills, snow and ice are easily found all through the summer, the drifting sand forming a natural ice house by covering the winter ice and snow.

Seventy-five years ago the area of the sand banks consisted of high hills with swampy valleys between. On the lead side of the hills was a fair growth of timber, while in the hollows an excellent stand of cedar had reached maturity. On the lake side of the hills there was some scrubby bush and much grass. Lumbering removed the tree protection, and occasional cattle grazing killed the grass, giving the prevailing northwesterly winds a chance to loosen up the soil. By 1852 the whole mass was in motion, steadily covering the crown level beneath thirty feet of sand and leaving nothing but a marsh behind. Little-Serious attempted to build a bank of sand until private holdings became menaced. Then some local effort was put forth. Grasses were experimented with and Holland willows were planted by laying branches in shallow trenches. The attempt only succeeded in hindering the sand and roads and seed fields were buried, and buildings had to be moved out of the path of the banks.

The Result of Timber Removal.

On the north side, West Lake was sheltered by seven hundred feet, while east of this, with nothing to stop it, the sand has swept forward more than half a mile in the last seventy years. On the southeast side dense clumps of cedars have halted the banks, though many of the trees have become buried, and all of them until last year were imperilled.

Last season the Ontario forestry branch came on the scene, and under the direction of Arthur H. Richardson opened hostilities against the banks. Profiting by the experience of private planters, shallow trenches sixty feet apart on the landward side of the banks were filled with willow branches, and cuttings of poplars and willows were planted between the solid belts. While the cuttings have not done so well, the limb plantings have made an excellent start, an average growth of three feet being registered, while some of the roots traced have grown fifteen feet.

Some land is being purchased by the forestry branch at the foot of the sand hills for the purpose of establishing a distributing nursery station, and also to give the owners some compensation for the good soil buried. At this station planting material will be stored, and it is intended to cover the entire banks with belts of willow and birch up the hollows and sections between limb plantings with poplars, cedar and other more valuable trees. One hundred and fifty acres have been purchased and the remainder—between four and five hundred acres—will be covered in the near future.

While the sand banks of Prince Edward offer an extreme example of what may be expected when timber growth is removed from light soils and the same excessively pitted, a partial repetition of the drifting dunes near West Lake is going on in many parts of the province. Along the north shore of Lake Erie, particularly in Norfolk county, several farms have been abandoned, while along the ridge north of Lake Ontario from York county to Peel Lake there is a belt of territory which is not only of little value itself, but threatens surrounding agricultural land.

New Memory System.

"How is it you have such a good memory, Norah?" her mistress inquired.

"Well, mum, I'll tell ye. Since me child, God never a lie have I told, and when ye don't have to be taxin' yer memory to be rememberin' what you told this one or that, or how ye explained it, or what, sure ye don't overwork it an' it lasts ye good as new, till ye die."

Begin—The rest is easy.

BRITISH COLUMBIA SWEPT BY DISASTROUS FOREST FIRES

A despatch from Vancouver says:—The forest fire situation in British Columbia this season is the worst experienced for many years, it was announced at the District Forestry Office here on Friday. From all parts of the province reports have been received that fires are burning, and in some districts, fanned by strong winds, the flames have got out of control of the fire-fighters and have done serious damage to towns, villages and ranches, as well as threatening to destroy valuable standing timber.

REVEAL BIG PLANS OF MONARCHIST PARTY

Nearer to Persons of Ex-Kaiser and Crown Prince Than at First Suspected.

Berlin, July 9.—The monarchist plot was of greater proportions and is coming nearer to the persons of the ex-Kaiser and the Crown Prince than was previously suspected.

Deutsche Volkische Gruppe, of the Deutsche National Volkspartei, which has constantly advocated the Kaiser's restoration and is known to be in continuous touch with Doorn and Wieringen, was caught red-handed preparing arms and ammunition caches in the region about Madgeburg and about Hamburg. The murder bond, which was responsible for Rathenau's death, is also involved.

That all the Deutsche Volkische group knew or approved of the assassination plans is extremely unlikely, but that all were prepared for a counter-revolutionary move to restore the Hohenzollerns is borne out by the large quantities of arms found, which evidently comprise but a small portion of those hidden.

About Madgeburg were found 600 rifles, 16 machine guns and several large cases of automatics and hand grenades. There was sufficient ammunition for several weeks' fighting. It is also known that there are other caches that have not yet been discovered.

In the Hamburg region were found hundreds of rifles, cases of automatics and hand grenades and enough field grey uniforms and steel helmets to outfit a regiment.

All these discoveries were made as a result of the activity of local Republicans in districts like East Prussia, Bavaria and Silesia.

It is impossible at this time to uncover all the ramifications of the plot because state officials themselves protect the conspirators.

There are not enough contraband arms, it is believed, to cope with the Reichswehr, if the Reichswehr remains faithful to the Republic, but with the simultaneous arming of monarchists in various sections it was hoped that local garrisons could be won over.

Icebergs Still a Menace in North Atlantic

A despatch from Washington says:—The Naval Hydrographic Office warned officials of the Shipping Board and other operators of United States ships that ice is still coming into the North Atlantic in dangerous quantities and the southern trans-Atlantic lanes should be followed indefinitely.

While the lanes now generally traveled are somewhat longer, the Hydrographic experts feel that the safety factor should receive first consideration so long as ice continues to come down from the north in dangerous volume.

Prince of Monaco Leaves Legacies to Science

A despatch from Paris says:—The will of the late Prince Albert of Monaco leaves legacies amounting to five million francs to various scientific organizations. These include a million francs each to the French Academy of Science, the Academy of Medicine, the Oceanographical Institute, the Institute of Paleontology in Paris, and the Oceanographical Museum at Monaco.

WORLD PERIL SEEN IN IMMINENT COLLAPSE OF GERMAN REPUBLIC

A despatch from London says:—Secret reports of the gravest character were received by Downing Street from Berlin on Friday. It is stated that Germany is hovering on the brink of financial disaster, which is almost certain to entail the fall of the Republican Government. With the Government's fall the road will be left clear for open conflict between Royalists, aiming at the restoration of the Monarchy, and extremists, urging Communism.

Prime Minister Lloyd George is seriously alarmed at the portent in private advices from British agents in Germany. He is now conferring personally with Foreign Minister Schanzer of Italy regarding the measures the

points since the first of June. These conditions have added to the menace of fire.

One known dead, several persons missing and ten houses destroyed is the early toll of casualties in a fire which descended on the soldier settlement at Merville, on Vancouver Island Thursday night. A change in the wind brought into the settlement a fire which had been raging in the bush near here for two weeks. Many settlers fled in a panic, and no check has been possible as yet. Meantime citizens of Courtenay, nine miles away, are fighting the flames, along with the soldier settlers here.

REBELS CHASED FROM HILL REFUGE

Free State Troops Invest Blessington, Ensuring Security for Dublin.

Dublin, July 8.—The investing of Blessington by National troops took place at 6 o'clock this morning, to the intense delight and relief of the population, harassed by irregulars since the campaign began. The irregulars had seized two banks, using one as their headquarters and the other as their transport centre, and leaving both bereft of money, but full of destruction of all the valuables and furniture.

This success means the ridding of Dublin of the menace of an attack from the south. The scattering of the irregulars also prevents concentrated action, though the army authorities will not desert till they have driven them farther from the Wicklow Hills, whither the fragments have fled.

This morning's success was the result of a cleverly planned operation from the south of Dublin and Curragh, culminating in an almost perfect encircling movement around the Brittas, Blessington and Kildare areas, whither large numbers of the irregulars retired.

More than 100 prisoners were taken, including leaders Andy MacDonnell and Jerry Boland, the latter a brother of Deputy Harry Boland, one-time Dail envoy to America.

Commandant Dinneen was wounded and some volunteers of the National forces were killed.

Documents captured on prisoners showed their objective was to retire to the town of Naas, County Kildare, and cut off communications between Dublin and Curragh. In this they have been foiled.

It had been reported that Eamon de Valera was with the rebels at Blessington.

Victim of Monarchists.

Maximilian Harden, the Socialist leader, who was attacked by Monarchists in Berlin and severely injured.

Optimistic Reports on Crops in Southern Alberta

A despatch from Calgary says:—Crop conditions based on reports of the United Grain Growers, were given out Thursday by E. J. Fream, newly appointed Commissioner of the Southern Alberta Drought Relief Act, and which were said to be the most optimistic reports yet issued on the crops this season. True, in some districts lack of rain has been more or less destructive, but this will be more than offset by the yields where plenty of moisture has been recorded.

Prince of Monaco Leaves Legacies to Science

A despatch from Paris says:—The will of the late Prince Albert of Monaco leaves legacies amounting to five million francs to various scientific organizations. These include a million francs each to the French Academy of Science, the Academy of Medicine, the Oceanographical Institute, the Institute of Paleontology in Paris, and the Oceanographical Museum at Monaco.

The Prince of Wales on the balcony of Buckingham Palace, acknowledging the cheers of the huge crowds which greeted him on his return from the Orient.

CALL BUSH WORKERS TO COMBAT FIRES

Lieut.-Governor of B.C. Issues Proclamation for Lumber Camps.

Courtenay, B.C. July 9.—Two men are missing and camp No. 2 of the Comox Logging Company, comprising headquarters and 14 houses, was totally destroyed today when caught in the crush of forest fires which destroyed Merville soldiers' settlement.

So fast did the flames travel that the residents had no time to remove belongings, and the fourteen families are fleeing to Courtenay, where the Merville refugees are quartered.

Victoria, B.C., July 8.—A special proclamation by Lieut.-Governor W. C. Nichol issued this afternoon calls for the cessation of all logging operations on Vancouver Island and mainland coast districts, the last-mentioned district embracing the territory from the international boundary as far north as Ocean Falls, B.C.

The purpose of the proclamation is to enrol bush workers to combat the fire menace. Several thousand men employed in their scores of camps will be released from regular work and turned to fighting the flames.

Many logging camps have already abandoned work.

There is no immediate probability of rain that will halt forest fires which are sweeping Vancouver Island and coast districts at present, according to P. Napier Denison, Superintendent of Gonzales Observatory here. The barometer dropped, but rose again yesterday morning. Rain, however, has fallen in the Okanagan district and in parts of Kootenay.

Fire is still burning fiercely at Merville and late reports are that twenty-seven houses have been burned, and the total loss is estimated at \$75,000. Efforts to place the fire under control have been almost abandoned, as the whole town is practically wiped out. Efforts are being made to save as much personal property as possible.

Residents of Kettle River and Kitty Combe settlements in the vicinity of Courtenay, have been warned to flee and they are coming into Courtenay by the score with wagonloads of salvage.

The fire is burning fiercely in almost every direction, but it is believed that Courtenay is not in danger. No further loss of life has been reported.

Premier John Oliver, on his return from the fire area, declared there is

need for public aid for the sufferers, and appealed to the people to supplement the aid which the Government is ready to give. He also announced the Government will co-operate in the restoration of the soldiers' settlement of Merville.

The Government firefighters in every part of the province are working under maximum pressure. Aeroplanes are being used to rush pumps and supplies to the fighters.

The total number of fires so far this season is 1,038, which sets a record, according to forest officials.

CANADA'S ENVOYS TO LEAGUE MEETING

Will be Represented at Geneva by Fielding, Larkin and Lapointe.

A despatch from Ottawa says:—Hon. William Stevens Fielding, Canada's veteran Minister of Finance; Hon. Ernest Lapointe, Minister of Marine and Fisheries, and Hon. P. C. Larkin, Dominion High Commissioner in London, will represent Canada at the third assembly of the League of Nations, which opens at Geneva, Switzerland, on September 4 next.

The two Cabinet Ministers will leave for Europe about the third week of August, and they will be joined in London by Mr. Larkin. Mr. Fielding, in addition to attending the League Assembly, will spend considerable time in London and Paris on matters relating to his department.

One of the matters which it is thought may engage his attention while in Paris will be that of resuming negotiations with the French Government for a more comprehensive trade treaty between Canada and France than now exists. There is also the question of a treaty with Greece, which may be taken up while the Minister is overseas.

Canadians Win British Scholarships

A despatch from London says:—The appointment of three Canadians to post-graduate science and research scholarships of the Exhibition of 1851 is announced by the commissioners. These appointments are: James Murray Luck of the University of Toronto, for biology; William Harold McCurdy, B. A., Dalhousie University, for physics, and Donald Frank Stedman of British Columbia University, for chemistry.

PANIC CAUSED BY FIRE IN NEW YORK SUBTERRANEAN RAILWAY

Gas Fills Ten Cars in New York Tubes 75 Feet Below Surface with 500 Persons Aboard—160 in Hospital.

A despatch from New York says:—Fire, smoke, carbon monoxide gas and panic imperilled the lives of more than 350 men and women trapped in a short-circuited Interborough subway express train, 50 feet below the surface of Lexington avenue, at east 59th street, shortly after 11 o'clock on Thursday, and 125 passengers were overcome by the choking gas and smoke, with several burned or injured by falls or trampling, and three firemen hurt in effecting rescues.

Eighty-seven persons were attended in Bellevue, Flower and other hospitals in the central section of the city for partial asphyxiation. Of that number 57 were able to go to their homes after being treated, but the condition of thirty was so serious that they had to remain at the hospitals.

The comfortably filled ten-car train, bound uptown, had just left Grand Central Station, when passengers and guards smelled smoke. The train's next stop would have been Eighty-sixth street. It dashed down to the lower level of the subway tunnel at terrific speed. Just before it reached Fifty-ninth street, where there is a

local station, and the express tracks are depressed ten feet below the level of the local track, there was a flash of fire and a loud detonation.

Clouds of smoke rolled up from burning insulation as the train came to a stop in darkness broken only by small storage battery lights at either end of each car. Guards played the chemicals from small emergency hand extinguishers on insulation above heads the three forward cars and one fire in the emergency motorman's switch box in the front of the third car. The smoke, occasioned immediately discomfort to passengers throughout the train. As the tunnel filled with smoke and the noxious gas, alarm grew into panic. More excitable male passengers fought frantically with guards who refused to open the car doors opening above the deadly third rail on one side of the train, and against a solid wall supporting up-town local tracks on the other side.

Calmer men used their flats to subdue others who were bowling over women and children alike, breaking windows and seeking to force their way to escape from the choking fumes.

Convocation Week at the Provincial University.

The week ending June 10th was in many respects the important week of the year at the University of Toronto—important because, for those who were graduating, it marked the culmination of four years of study and the commencement of their life's work. Never in the history of the University have so many degrees been granted in one year—there were this year one thousand and ninety-six graduates in Arts, Medicine, Applied Science and Engineering, Education, Forestry, Music, Agriculture, Dentistry, Law, Veterinary Science, and Pharmacy.

But the newly-fledged graduates were not by any means the only people concerned in the activities of Convocation Week. The Alumni, graduates of almost all previous years, were back in large numbers at the University to renew the acquaintances and the interests of earlier days.

The "twos" and the "sevens" held class reunions and it was inspiring to see graduates of the years 1872, 1877, 1882, 1887, 1892, 1897, 1902, 1907, 1912, and 1917, men and women who have attained distinction in various walks of life, enjoying the companionship of the college friends of years ago. Truly, the University of Toronto has reason to be proud of her thousands of graduates. In his address to the alumni, Sir Robert Falconer stated that the year just closed has been in every respect the best during his presidency of fifteen years.

Widow of Field Marshal May Enter Parliament

A despatch from London says:—The Times states that Lady Wilson, widow of Field Marshal Henry H. Wilson, will be invited to stand as a Unionist candidate for Parliament for North Down, her late husband's constituency.

AIRMAN BURNS IN PLANE CRASH

Noted U.S. Army Pilot Killed When Motor Fails to Function.

A despatch from Mt. Clemens, Mich., says:—Capt. George C. Tinsley, an army aviator with overseas services in the world war, was killed when his plane fell and burst into flames at Selfridge Field on Thursday afternoon.

Tinsley, flying a Spad, was about 150 feet in the air, when he turned sharply to avoid striking a hangar. The motor went dead and the plane fell. As it struck the ground it burst into flames. Witnesses rushed to the scene, but were unable to reach Tinsley until they had put out the fire. He was found in his seat, his body covered with burns, and a hole in his chest, apparently made by a sharp piece of wreckage.

Physicians expressed the opinion that Tinsley had been killed instantly or rendered unconscious by the fall and suffocated by the flames and smoke.

Tinsley was a member of the first pursuit group of the Army Air Service, which reached Selfridge Field last week after a flight from Ellington Field, Houston, Texas. The plane in which he fell was the same ship that he had flown north.

Timber District Near Regina Destroyed by Caterpillars

A despatch from Regina, Sask., says:—Caterpillars have eaten up fifty square miles of timber in the Kipling district near here. Scarcely a green leaf remains and the district presents the stark appearance of a winter scene, forestry officials say.

It is a grander thing to be nobly remembered than to be nobly born.

Weekly Market Report

Toronto.	
Manitoba wheat—No. 1 Northern, \$1.42½; No. 2 Northern, \$1.40; No. 3 Northern, \$1.26½.	Manitoba oats—No. 2, 58c; No. 3 CW, 55c; extra No. 1 feed, 56c; No. 1 feed, 55c.

Margarine—20 to 22c.	Eggs—No. 1 candied, 32 to 33c; No. 2, 30 to 31c; cartons, 37 to 38c.
Beans—Can. hand-picked, bushel, \$4.95; primes, \$3.75 to \$3.90.	Maple products—Syrup, per imp.

BITS OF LONDON NEWS

A despatch from London says:—The blaze of jewelry at this year's Court has been quite up to the standard of other years, but an interesting story lies behind many of the diamond tiaras and necklaces worn by the King and Queen's guests.

Fully half of the jewelry which glistened and sparkled that night was the property of its wearers for the night only, and in many instances it was returned to the safes of the jewelers to whom it actually belonged at midnight.

This practice, which London jewelers say has become more and more prevalent since the war, is brought about by the fact that many of the old and established families have been forced to get rid of their jewelry in order to keep their family establishments going.

"We do not make a practice of lending jewelry," said a representative of one of London's biggest firms, "but we oblige our customers when we know that they have had to get rid of their own jewels."

"We do not charge anything for the loan of the jewelry, but we insure it for the night and the customer pays the insurance. We only do it for customers with whom we have done business for years."

Surgeons Operate on Milk Can.

An ambulance drove up to a London hospital late one night this week and a milk can was trundled out.

"What am I supposed to do with this?" asked the surgeon.

"Operate on it," he was told, "there is a boy inside."

The doctor and his assistants, after obtaining some robust tools not ordinarily used, did as they were directed, and after two hours' hard work made a breach in the can through which they were able to remove Sidney Weinberg, aged nine. Sidney tells his own story.

"How did you get into the can?" he was asked.

"I slipped in," he said. "Some of the boys dared me to get in and stay there for five minutes. I did it and they put the lid on. I was down on one knee, as if I were firing a gun, and I found I could not get out. Of course, an opener weren't any good, so they took me to a hospital. I felt like an Easter egg."

Finds Remains of War Comrade.

After an interval of more than five years, a former English soldier, while on a trip to France over the battlefields, discovered the skeleton of a war comrade who had fallen at his side while they both were taking part in operations against the Hindenburg line.

The incident occurred in Havrincourt Wood, while the living veteran was idly inspecting one of the scenes of his army life. He stumbled over the skeleton lying beneath some foliage with a rifle at its side. The dead man's identification disc, which had not been destroyed by time, left no doubt of his identity. He had been reported missing and had never been found.

The strangest part of the occurrence was that before leaving his home for the trip to France the former Tommy had promised the dead man's relatives that he would make a search for any traces or information about his comrade.

Bumping Head Restores Sight.

An ex-soldier who lost his sight in the war has just regained it by a remarkable accident.

He was out walking with a companion when he hit his head against a street lamp-post. The blow apparently struck the optic nerve, for immediately afterward the man, who had been blind for five years, was able to distinguish light from dark. For a few days his vision was blurred, but after that he regained virtually normal vision and is now able to read with ease. The doctors say that the cure probably will remain permanent.

Teach Languages by Wireless.

London experts have displayed great interest, but doubt the feasibility of the conference which has been summoned in the United States to consider the establishment of the universal language for the purpose of international communication by wireless.

Prof. Sir Israel Gollancz, of London University, is one who feels the task impossible.

"You might create a fictitious commercial language," he said, "but I do not believe in any international language becoming a living force unless it is one of the living languages, such as English, or French, or Spanish, or even Latin, if living force could be given to it again. You might create a language for the elements of commerce, but I do not think it would even be useful for the science of commerce."

Godfrey Isaacs, director of the Marconi Company, also expressed doubt as to the establishment of a universal language as a result of the development of wireless telephony. He thinks in regard to Esperanto that it is exceedingly improbable.

"At the same time," he said, "we are keeping in view the possibility of teaching languages by wireless telephony. I think this will play a highly important part of the educational section of wireless and it will in time come to supersede the use of gramophone records for this purpose. I can foresee the engagement of eminent professors of language for the purpose of wireless tuition."

The Transcript

Published every Thursday morning from The Transcript Building, Main Street, Glencoe, Ontario. Subscription—in Canada, \$2.00 per year; in the United States and other foreign countries, \$2.50 per year.

Advertising.—The Transcript covers a wide section of territory in Western Ontario, and its readers are the leading farmers and townspeople. It is a first-class advertising medium. Rates on application.

Job Printing.—The Jobbing Department has superior equipment for turning out promptly books, pamphlets, circulars, posters, blank forms, programs, cards, envelopes, office and wedding stationery, etc. A. E. Sutherland, Publisher.

BIBLE THOUGHT FOR TODAY

Bible thoughts memorized, will prove a priceless heritage in after years.

WHERE IS YOUR TREASURE?—Where your treasure is, there will your heart be also.—Matthew 6: 21.

A sufficient commentary on the manners of this age is that when a man is polite you suspect him of having something to sell.

Persons installing radio must pay the government \$1. Is this to pay for the use of the air or to give someone a job seeing the fee is paid?

Jack Dempsey is to make a tour of eight Canadian cities. He will be able to tell them all about the horrors of the European war, because he visited the cemeteries in France three years after the armistice.—St. Catharines Standard.

A member of his congregation once said to Henry Ward Beecher: "Mr. Beecher, I like your preaching, but you make us laugh." "My dear woman," said Mr. Beecher, "if you saw all the funny things I see from the pulpit, and knew all the funny thoughts that come into my mind, you would think that I practiced great restraint in the pulpit."

Please don't drop paper on the streets. It is surprising to pick up an envelope or a newspaper wrap-

per and find the address of some prominent citizen or business man to whom it was addressed. The thoughtlessness of dropping these on the streets causes untidy streets. The names on the papers are a cunning tell-tale as to the offenders.

An extensive licensing system has just been introduced by the Elmira council for the purpose of protecting local business from itinerant peddlers and to raise revenue. Other small towns are suffering severely from losses to their merchants by all kinds of itinerant peddlers being allowed to come to town and peddle their goods scot free, while local dealers with whom they come directly in competition are forced to pay their share of the highest taxes in the history of the municipality. Surely something can be done to compel peddlers to contribute to the upkeep of the towns they work in.

PROMOTION RESULTS

S. S. No. 3, Mosa Jr. IV. to Sr. IV.—Jean Moore, Dora Squire, Donald Coyne, Richard Fry, Marion Grover, John Whitfield, Blanche Whitlock.

Jr. III. to Sr. III.—Helen Goff, Gordon Squire, Earl Harvey, Margaret Whitfield, Ross Edwards.

Jr. II. to Sr. II.—Kathleen Giles, Viola Edie, Miree Winger, John Smith, Dorothy Moore.

A. E. Peters, Teacher.

S. S. No. 13, Ekfrid Jr. IV. to Sr. IV. (pass 450)—Veryle Gast 540, Lorne Thornicroft 535, Stewart Allan 518, Harold Lotan 478, Harold Cushman 476, Earle Edwards 472.

Jr. III. to Sr. III. (pass 330)—Jessie Jeffery 352, John Jeffery 340, Evelyn Stephenson 337.

Jr. II. to Sr. II. (pass 330)—Howard Cushman 352, Luke Jeffery 346, Alfred Rankin 345, Leo Cushman 342.

NOTICE TO CREDITORS

In the Estate of James Gilmour Hutchison, Late of the Village of Wardsville, in the County of Middlesex, Gentleman, Deceased.

Notice is hereby given, pursuant to "The Revised Statutes of Ontario, 1914, Chapter 121, Section 56," that all Creditors and others having claims against the Estate of the said James Gilmour Hutchison, who died on or about the first day of October, A. D. 1921, are required to send by post prepaid or to deliver to the undersigned, Solicitors for Elizabeth Hutchison, Administratrix of the Estate of the said James Gilmour Hutchison, deceased, their names and addresses and full particulars in writing of their claims and statements of their accounts and the nature of the securities, if any, held by them.

And take notice that after the thirty-first day of July, A. D. 1922, the said Elizabeth Hutchison will proceed to distribute the assets of the said deceased among the persons entitled thereto, having regard only to the claims of which she shall then have had notice, and that the said Elizabeth Hutchison will not be liable for the said assets or any part thereof to any person of whose claim she shall not then have received notice.

ELLIOTT & MOSS, Glencoe, Ontario, Solicitors for the said Administratrix. Dated at Glencoe, Ontario, this fifth day of July, A. D. 1922.

NOTICE TO CREDITORS

In the Joint Estate of James Humphreys, Farmer, and Lexy Humphreys, Widow of the said James Humphreys, both Late of the Village of Wardsville, in the County of Middlesex, Deceased.

Notice is hereby given, pursuant to "The Revised Statutes of Ontario, 1914, Chapter 121, Section 56," that all Creditors and others having claims against the Joint Estate of the said James Humphreys and Lexy Humphreys, who died on or about the sixteenth day of September, A. D. 1921, and on or about the twenty-eighth day of March, A. D. 1922, respectively, are required to send by post prepaid or to deliver to the undersigned, Solicitors for Elijah Lumley, Executor of the Joint Estate of the said James Humphreys and Lexy Humphreys, both deceased, their names and addresses and full particulars in writing of their claims and statements of their accounts and the nature of the securities, if any, held by them.

And take notice that after the thirty-first day of July, A. D. 1922, the said Elijah Lumley will proceed to distribute the assets of the said James Humphreys and Lexy Humphreys, both deceased, among the persons entitled thereto, having regard only to the claims of which he shall then have had notice, and that the said Elijah Lumley will not be liable for the said assets or any part thereof to any person of whose claim he shall not then have received notice.

ELLIOTT & MOSS, Glencoe, Ontario, Solicitors for the said Executor. Dated at Glencoe, Ontario, this fifth day of July, A. D. 1922.

Remember

IMPERIAL POLARINE OIL (Light Medium Body) is the lubricant recommended for your Ford.

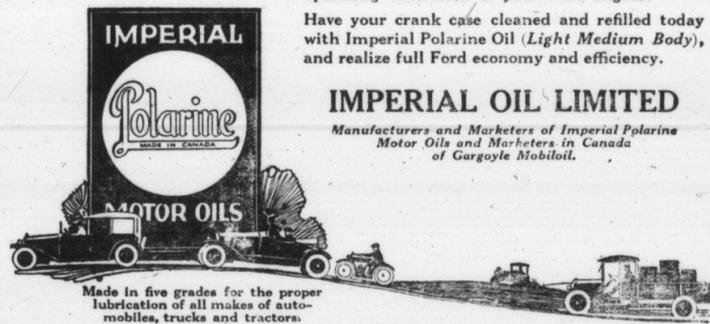

A Passenger You can't afford to haul -

Briefly, these are some of the results of using too heavy an oil for your Ford.

- (1) Engine drag and loss of power.
- (2) Improper oil distribution.
- (3) An overheated engine.
- (4) Excess carbon deposit.
- (5) Unnecessary friction and wear.
- (6) Large repair bills.
- (7) Rapid depreciation.
- (8) Excess fuel and oil consumption.

What is the remedy? Use Imperial Polarine Motor Oil (Light Medium Body), which is especially adapted to the mechanical requirements and operating conditions of your Ford engine.

Have your crank case cleaned and refilled today with Imperial Polarine Oil (Light Medium Body), and realize full Ford economy and efficiency.

IMPERIAL OIL LIMITED

Manufacturers and Marketers of Imperial Polarine Motor Oils and Marketers in Canada of Gargoyle Mobiloil.

DON'T

DON'T take any chances with fire in Ontario's forests.

DON'T throw away cigarette or cigar butts, pipe "heels" or burnt matches until you are dead sure they are out.

DON'T neglect to drown out your camp fire thoroughly with lots of water. Stir up the ashes and throw on more water.

DON'T build your camp fire against a rotten log or stump — nor on high exposed windy points; nor near moss patches; nor at the base of a tree.

Build it in a former fire place, if any at hand, or on a flat rock, or on a spot cleared down to the true soil below, preferably by the edge of the water.

DON'T forget that the upper layer of ground in the forest consists of partially rotted wood which holds fire and slowly burns. The only real soil which will not burn is beneath.

JAS. WRIGHT & SON

Frost Fence Sherwin-Williams Paints

Born
CORNELL.—In Glencoe, on Tuesday, July 4, 1922, to Mr. and Mrs. Hubert M. Cornell, a son.
SMITH.—In Glencoe, on Monday, July 10, 1922, to Mr. and Mrs. W. H. Smith, a son.
Card of Thanks
Mrs. James Corbett and family wish to thank their many friends for their kindness and sympathy and beautiful floral offerings in their sad bereavement. Special thanks to Rev. T. J. Charlton.

TOWN AND VICINITY
Orangemen of Glencoe and vicinity celebrated the Twelfth at St. Thomas.
Rev. F. Ballantyne, of London, is expected to occupy the Glencoe Presbyterian pulpit next Sunday.
Miss Florence Keith has been engaged to teach the primary room of the public school at Newbury.
J. L. Hull loaded out 101 head of butchers' cattle at Inwood last week, all purchased in that vicinity.
Arrangements are being made for a masquerade street dance in Glencoe on the evening of July 21st.
Miss Grace McLachlan has resigned as teacher of the Tupperville school and will not teach the coming term.
"Arrive here on 49th anniversary of their golden wedding," reads a daily newspaper headline. Some old couple, surely.
Rev. Mr. Murphy, rector of the Church of England at Wardsville, conducted the funeral service of the late Mrs. Cecil Galbraith at Rodney on Thursday.
Several farmers in Middlesex county have recently been fined for cruelty to animals. The cruelty consisted in nearly all cases of working horses with shoublers sore from chafing.
A number from Glencoe and vicinity attended the annual garden party held in connection with Lees church, near Highgate, on Wednesday evening, the proceeds of which amounted to nearly \$1,000.
The male quartette from Lees Methodist church, on the Highgate circuit, visited Glencoe Methodist church on Sunday evening and de-

lighted the congregation with several excellent selections.
Glencoe and vicinity experienced a windstorm on Friday which did considerable damage to standing grain crops and blew much fruit off the orchard trees. The wind subsided late in the afternoon and was followed by a heavy rain.
The Grand Trunk Railway announces that commencing Saturday, July 15, and on each Saturday and Sunday thereafter until the end of October, special reduced fare week-end tickets will be sold from London to beautiful summer resorts and country districts, in which Glencoe is included.
Thomas Brand attended the funeral at Sarnia on Saturday of his nephew, Herbert Best, of Hamilton, who was drowned in the St. Clair river while in bathing with his cousin, Thos. Laurie, of Sarnia. An heroic rescue of young Laurie was made by members of the Boy Scouts of Hamilton, who are camping at Sarnia.
Arthur Palmer, member of the provincial police force, with supervision of the county of Middlesex, has been transferred to the Whitby district. Palmer has been quite active in discharging his official duties, particularly in securing prosecutions of motorists for exceeding the speed limit on the provincial highway and other roads in this district. Major-General Williams, representative of the Ontario police force, says this is only one of several transfers of officers which are being made and declares that the change was made because of complaints that Palmer was using too great a zeal in his work.
Chain letters are making their appearance again, particularly in Chatham and vicinity. Young girls and others are in receipt of copies of a letter, which it is stated was originated by a former U. S. officer, wishing the receiver good luck, and advising that the letter be sent out to nine friends, with a similar wish. On the ninth day, it is claimed, good luck will come to all who do not break the chain. This silly thing has so often been shown up in the newspapers that it seems incredible that there are still people credulous enough to take any stock in it. The place for such letters is the waste basket.

PERSONAL AND SOCIAL

—Miss Ford, of Clinton, is visiting her brother, W. J. Ford.
—Jack Blackwell is visiting his mother, Mrs. E. A. Blackwell.
—Miss Blanche Coulthard is holidaying at Baysville, Muskoka.
—W. Reith, of Tillsonburg, visited his brother, R. Reith, one day last week.
—Alex. and Angus McCallum, of Michigan, were visiting at George F. Munro's.
—Mrs. J. J. McHugh, of Detroit, was the guest of Mrs. Chas. Gould last week.
—Mr. and Mrs. R. M. McPherson are holidaying at Port Stanley, Toronto and Kincardine.
—Mrs. McGraw, of Detroit, has returned home after a visit with her brothers, Donald and Malcolm McMillan.
—Mrs. Andy Thompson, from Estuary, Sask., visited her cousin, Mrs. Geo. F. Munro, for a couple of days this week.
—Mr. and Mrs. Emerson Nicholls and Miss Alice Martin, of London, were guests of Mr. and Mrs. M. J. McAlpine last week.
—Misses Madeline Johnston, Ethelyn Boon and Marjorie Willits, of Bothwell, and Don Willits, of Detroit, spent Sunday at Arch. Burke's.
—Mr. and Mrs. Thos. Stinson, Miss Brown and Miss Pearl Parish motor- ed to Windsor and spent a few days last week with Mr. and Mrs. John Hodge.
—Mr. and Mrs. Croft and children, of Detroit, were guests of Mr. and Mrs. Mitchell Innes, of Mosca, over the holidays. Mr. Croft returned home on the 5th but Mrs. Croft is making an indefinite stay.
—Mr. and Mrs. R. F. Howard, of Sarnia; Mr. and Mrs. John E. Howard and Miss Eliza Howard, of Port Huron, and Mrs. F. B. Cody, of Windsor, paid a visit to Mr. and Mrs. John Hayter and other friends in Glencoe on Sunday.
—Giles Russell Targart, U. S. Consul at London, was in Glencoe on Thursday making a few calls. He assures us that anyone desiring information about his country or matters pertaining to travel across the border will always find a welcome at his office, sign of "The Eagle," Royal Bank premises, London.

SHERIFF'S SALE

By virtue of a Writ of Execution issued out of His Majesty's County Court, County of Middlesex, to me directed and delivered against the goods and chattels of The Detroit-Glencoe Oil Company, at the suit of Robert L. McAlpine, I have seized and taken in execution the following property, viz: Posts, derricks, tanks, piping, jacks, power houses, store-houses and contents, pumping outfit, oil engines, etc., on lot 9, con. 4; lot 7, con. 7, and lot 8, con. 7, in the Township of Mosca, which I will offer for sale Thursday, the 20th day of July, 1922, commencing at the hour of one o'clock, on the plaintiff's farm, lot 8, con. 7.
D. A. GRAHAM, Sheriff.
Sheriff's Office, London, Ont.

CRIPPLED WITH RHEUMATISM

Then She Took "FRUIT-A-TIVES" And Has Been Well Ever Since

MADAM SLOAT

PERIN JUNCTION, N.B., Jan. 22nd, 1920
"For many years, I was a great sufferer from Indigestion, Constipation and Rheumatism. My Stomach was weak and gave me constant distress, while Rheumatism in my joints made me almost a cripple; was treated by two different doctors but their medicine did me no good.
Then I tried "Fruit-a-tives" and at once that fruit medicine helped me. Soon the Constipation and Indigestion were relieved and the Rheumatism began to go away, and in a few months entirely disappeared. For twelve years now, my health has been first class, and I attribute it to the use of "Fruit-a-tives" which I take regularly."
Mrs. CLARA SLOAT,
50c a box, 6 for \$2.50, trial size 25c. At dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

SPECIAL NOTICES

27c trade and 25c cash for eggs, at Mayhew's.
Raspberries for sale.—David Squire, phone 14 r 11.
Residence on Main street for sale. Apply to Mrs. Mary McAlpine.
Don't forget the old-fashioned social at Tai's Corners, July 19.
Lamont's mid-summer sale is still going on. Big bargains this week.
For sale—young pigs, also sow and pigs.—W. A. McCutcheon, Glencoe.

MOsa COUNCIL

A meeting of the Mosca council was held at Newbury on June 17. Members all present. The minutes of the last meeting were read and approved.
Moved by E. Hurdle, seconded by D. A. Mitchell, that Geo. Logan be paid \$75 for work done on the Lorenzo Kelly drain and that Miller & Babcock be paid \$30 for work done on the Deacon-Winslip drain. Carried.
Moved by E. Hurdle, seconded by F. J. James, that the clerk be hereby instructed to notify the roadmaster of the meeting to meet the reserve and Commissioner Hurdle in regard to drainage on rear of lot 13, con. 2, Mosca. Carried.
Moved by J. A. Leitch, seconded by F. J. James, that Hilton Leeson be paid \$5 for sheep killed by dogs. Carried.
Moved by F. J. James, seconded by E. Hurdle, that Hilton Leeson be paid \$45.29 for material and work on the Leithbridge drain. Carried.
Moved by D. A. Mitchell, seconded by J. A. Leitch, that by-law No. 699, to provide for the construction of the Duncaan Graham drain be finally passed, and that E. Hurdle be hereby appointed a commissioner to let and superintend the work. Carried.
Moved by J. A. Leitch, seconded by F. J. James, that Hilton Leeson be paid \$25 for work done on the Leithbridge drain extension. Carried.
Moved by E. F. Roycraft, seconded by F. J. James, that James Abbott be given a grant of \$60 to assist him in the cost of the construction of a culvert over the Stinson drain opposite his dwelling. Carried.
The engineer's report on his inspection of the area described in a petition signed by Arch. McCallum and others was read by the clerk. Any person who had signed the petition was given an opportunity to withdraw from it, and those interested parties who had not signed the petition were given an opportunity to do so. The petition at the close of the meeting was not sufficiently signed, so that all proceedings by the council to provide for the construction of this drainage work was dropped.
Moved by J. A. Leitch, seconded by E. F. Roycraft, that Commissioner James be hereby instructed to construct a concrete covering over the lower end of the Leithbridge tile drain extension to prevent the tile from washing out, and that the extra improvements to the Leithbridge drain be left in the hands of the commissioner, F. J. James. Carried.
Moved by J. A. Leitch, seconded by E. Hurdle, that Arch. Burke be paid \$4 for statute labor performed since the pathmaster returned his list. Carried.
The council adjourned to meet at Glencoe on July 15th at 10 p.m.
C. C. McNaughton, clerk.

APPIN

We are pleased to hear that Mrs. (Rev.) Parr is recovering from her illness.
Miss Annie Eddie returned from St. Joseph's Hospital on Saturday, much improved in health after an operation.
J. S. Macrault attended the Gaelic sermon at Kilmartin on Sunday last. Plans are under way for the big doings on August 2nd here.
Mrs. Bannatyne, of London, will address the Fraser Mission Band on Friday of this week in the Presbyterian church. Ladies are cordially invited.
Hester Acres, of Delaware, is holidaying with her aunt, Mrs. Chester Thornicroft.
The monthly meeting of the Women's Institute will be held at the home of Mrs. Ellen Webster, on Thursday, July 27. All ladies are welcome.

MOsa—EUPHEMIA

Mr. and Mrs. Gee spent Sunday with their daughter, Mrs. Dan Munroe.
Miss Augusta Burford, of Alvin, is visiting Miss Marguerita McCullum.
Miss Winnifred McVicar is home from Wheatley where she has been teaching school for the past year.
Miss Violet Plaine will leave for London tomorrow, and she and Miss Jennie McVicar will leave on Saturday to spend a week in camp at Port Maitland. Miss Plaine is going as a delegate from the London Y.W.C.A.
Ward Leitch is spending his vacation at his home here.
Quite a number from here attended the Kilmartin social on Monday evening.

NOTICE

We have added some new equipment for the handling of the wagon and buggy tire trade. Also have added a stock of auto spring steel for the repair of springs. We have a new special line of steel horse shoes, rubber and leather pads. Let us supply your wants.

STRAETHBURN

While Will Coulthard, Campbell McRae and Dave McIntyre were motoring to Nat Currie's trout pond last Wednesday night, the car, owned and driven by Dave McIntyre, through some misadventure "turned turtle." Coulthard and McRae were pinned under the car and the latter was quite seriously injured, but is slowly recovering. The other two were only slightly hurt.
A large number of people left on Wednesday morning for the circus in London. Quite a number of cars passed through.

WOODGREEN

Miss Florence Simpson is visiting in Windsor and Detroit.
Jack James and George Harvey motored to London on Monday.
Miss Margaret Whitfield spent a few days with Mr. and Mrs. George Woods, Glencoe.
Mr. and Mrs. George Harvey and daughter Florence spent Sunday at Neil L. Leitch's, Knapsdale.
Mr. and Mrs. Tom Robinson and family have taken up their residence on the farm recently purchased from Robert A. Eddie.
Garnet Long, of Melbourne, is visiting at Lorenzo Watterworth's.
Miss Margaret Smith, of Glencoe, is visiting at Alfred Nethercott's.

AUCTION SALES

Auction sale of household effects and miscellaneous articles, at Walkers, Friday, July 14th, at 2 o'clock. Terms cash. Mrs. Victor Wagner, proprietor. Dan McIntyre, auctioneer.
Sale of farm and garden tools and other articles, at Wardsville, Saturday, July 15, at one o'clock. Elijah Lumley, executor Humphreys estate; J. D. McNaughton, auctioneer.

HOW FIRES START

One of the most frequent forms of involuntary incendiarism known is the way thoughtless individuals—generally smokers—throw away matches without taking the simple precaution of blowing them out and assuring themselves that they are extinguished—a matter of a second or two, although they were perfectly willing to spend fifteen seconds' time in lighting the match and lighting the tobacco. This careless practice is universally prevalent throughout the country.—Deputy Fire Marshal Lewis, Ontario.

Address communications to Agronomist, 73 Adelaide St. West, Toronto.

The Growing Pullet, Their Care and Management.

Upon the care and management of the growing pullets, from the time that they leave the brooder house until they are put into laying quarters for the winter, will depend very largely their capacity for early winter egg production, and the consequent profit which can be realized from them. Each autumn, altogether too many underdeveloped pullets are put into winter quarters, with the result that they never develop thoroughly, and in consequence never make good winter layers.

The three essentials to proper care of the pullets at this stage are good range and shade, a well balanced ration, and comfortable housing.

It is impossible to place too much emphasis upon the necessity of free range for growing pullets, for without this the probability of their maturing before weather conditions make it necessary to put them into winter quarters, is very small. Ideal range is to be found in an orchard, or more especially when it has been seeded down with alfalfa, clover, or buckwheat. Fencing this, however, almost any dry, well drained land may be utilized for this purpose, but the more growing green feed and shade that are available, the better. In the event of there being no shade whatever, artificial shade must be provided, either by means of canvas or sacks, or by putting up shelters of branches. If the quantity of growing green feed is limited, cut green feed must be supplied in large quantities, as this is a most economical feed for growing pullets. On farms where corn or sunflowers are grown for ensilage, it is an excellent plan to turn the pullets into it as soon as it is grown sufficiently to provide shelter. The backyard poultryman who raises only a limited number of pullets can profitably plant a small patch of Jerusalem artichokes, or sow either corn or sunflowers in the yard, and by so doing will provide not only shade for his young stock, but also a valuable source of green feed.

Like all growing stock, pullets consume large quantities of food, and in feeding them, nutritive value, palatability, and economy must be considered. From the age of two months, until they go into winter quarters, dry mash, self-feeding hoppers should be kept before them constantly. This mash should consist of equal parts by weight of cornmeal, bran, shorts, ground oats, and beef scrap. Better results will be obtained if in addition to this dry mash, a semi-wet mash consisting largely of chopped green feed be given twice a day, even when plenty of growing green feed is available. The chopped green feed for this mash may consist of mangel tops, alfalfa, clover, cabbage leaves, corn tops, sunflower tops, etc. Two parts by weight of this green feed should be mixed with one part of dry mash (composed of cornmeal, buckwheat meal, and barley meal in equal quantities), and the whole well mixed with half a part of milk, and fed in troughs. If any one of the three ingredients of this dry mash is not available, it may be replaced by the dry mash used in the hoppers.

In addition to the above mentioned feed, a hopper of good mixed grain and a plentiful supply of milk, if possible, should be kept constantly before

them. The regular Bordeaux mixture spray has been found to be beneficial in the control of this disease. Those believing in extreme heat and sunshine as the principal causal agency, associate this control with the layer of Bordeaux mixture on the leaf acting as a protection from severe evaporation. Others claim that it destroys the hoppers and again the spray is also supposed to act as a deterrent for hoppers.

In any case the Bordeaux mixture has been demonstrated as capable of arresting the development of the burn, and this is but further proof of the importance of careful and systematic spraying of potato leaves.

Draw upon the crib corn for the remainder of the winter and spring.

The Prevention of Swarming.

In an experiment looking for the prevention of swarming, conducted by the Bee division of the Dominion Experimental Farms, no entirely successful method of manipulation was found when the old queen was left in the hive. Previous investigations had indicated that the method of dequeening and requeening at the commencement of the main honey flow was the most promising. In addition to the prevention of swarming, the greater productivity of the young queen supplies one of the essential factors for successful wintering, namely, a strong colony consisting mainly of young bees. It also makes the colony more valuable the following year. In the experiment spoken of, the Dominion Apiarist reports that the colonies were examined every eight, nine or ten days after the commencement of the honey flow from clover and those found to contain larvae in queen cells (a practically sure sign that the colony will swarm) were treated by removing the queen and destroying all occupied queen cells. At the next examination, nine days later, the occupied queen cells were again destroyed, and a young queen of select parentage introduced to each treated colony. It was revealed that a nine or ten-day period between the removal of the queen and the second destruction of the queen cells was better than an eight-day period, as the bees occasionally built cells over drone larvae after the eight days, while if left for eleven days a swarm might issue. This method required but two manipulations to prevent swarming and at the same time requeens the apiary.

The teacher, the preacher, and the editor are mighty important people in a country community, and a little recognition of this will do no harm.

While there are but three months of the year, November, December and January when the heavy 300-pound and heavier hog enjoys any prestige over his lighter rival of 180 to 225 pounds in regard to price. During those months they sell around ten to twenty cents per hundred above the lighter variety. The remaining nine months the heavy hog suffers a serious jolt, dropping from five to sixty-five cents below. It would appear, therefore, he was losing favor, too, as feeders are learning that it requires more corn to produce the third hundred than either of the first two.

While this method consumes a little extra time, it fills the cribs with sound, uniform ears, free from silk or husks, to be ground into feed during the winter months. Before the low grade corn had been consumed and when the husky porkers had reached a weight of approximately 200 pounds, they were loaded into the wagons, taken to the station and shipped. Of all farming operations, that resembled the finding of buried treasure more than anything else.

Poultry

The late-hatched cockerels will not bring high enough prices to make them very profitable, but as capons they will make a very desirable size for the season when capons are in demand from New Year on until broilers come again. You can get a good price for your late cockerels thus and at the same time have a much greater total product. While I think it pays to sell the very early cockerels as broilers when the price is high, it is a lot of trouble to rear them while small only to have two pounds each to sell. With the late cockerels they may be kept until, for the same care as the little chicks, we get from eight to twelve pounds to sell.

The new implements for caponing are much better than the old sets and the work can be done easier and with more certainty. Directions come with the sets and the operation is not difficult nor very cruel.

July Garden Planting.

There are some varieties of garden truck which must have the entire season in which to mature. These will not be ready for use until autumn, but the early planted, early maturing garden truck, or those which are fit for use before their maturity are now ready for use and will soon be gone. It is now time to plant more of these for fall and winter use.

Winter cabbage plants should be set out during the first part of July. If you have not grown your own plants, be sure and purchase plants of the winter variety, as the keeping qualities of earlier strains are not good.

String beans, peas, beets and sweet corn are all fit for table use before they reach their maturity. A planting of these now will insure a good supply for table use in the fall. Probably there is more Golden Bantam sweet corn seed used for July plantings than any other kind. There are several varieties of string beans which may be planted as late as July, as nearly all kinds are fit for use in six or seven weeks from date of planting. Beets, too, will be fit for use in about the same length of time as the string beans, therefore there are many varieties of them which may be sown in July, but many gardeners believe the long and half-long kinds to be the best to sow for fall and winter use. These varieties may be sown even as late as the very last of July or first of August.

Don't forget a patch of turnips. They are good as fertilizers, good for the stock and nice for the table. With the exception of one or two of the very early sorts, almost any variety will do when sown in July.

In July, too, should be sown the winter radish. This, as its name implies, is the radish which keeps for winter use. There are a number of varieties of these and they may be had in three colors—rose color, white and black.

Swiss chard, kale, kohlrabi, corn salad, endive and parsley are some of the other things we may plant in July in our garden. These are perhaps not as commonly grown as some of the other things in our garden, but you will want them again, once you become acquainted with them. Swiss chard and kale are used as greens while young and tender. Later the midribs of the Swiss chard are cooked like asparagus or made into pickles. Corn salad, endive and parsley are used in salads and in garnishing dishes. Parsley is also often used in soups. Kohlrabi must be used while young and tender. Later the bulbs become tough and woody. These bulbs, while young and tender, are sliced and cooked like turnips and are very appetizing.

Brookville, Ont.—A new Canadian record for mature cows was made by Queen Beulah, a Holstein cow, owned by Dr. H. G. Clark of Brookville, which in 305 days gave 957 1/2 pounds of butter from 21,284 pounds of milk.

Parents as Educators

Brotherhood in-School and Home—By Elinor Briery

Very important to the future welfare of the world is it that the children of to-day be taught the principles of justice, love and brotherhood in their widest and broadest sense. Where then shall the foundation for these be laid if not in the school, where children of all nations come, many from homes where such principles are unknown? Teach the child then that everything that has life in it is his brother, to be treated with kindness, love and justice.

The little girl who learns that her kitty needs her loving care, needs sleep, good food and careful handling, is learning lessons in Motherhood, which she will never forget. The boy who learns that his rabbits, and other pets, share many of his own needs, and that he stands in place of a father to them, is being trained in parenthood, and when the child has learned that his animal pets have the same right to life and happiness that he himself has, it is not likely that he will treat his human companions unjustly in after life.

In the home should begin this teaching of which Brotherhood is the keynote. The wise mother will not teach her child cruelty however unintentionally, by giving him toy guns, sword and whips. Rather she will

Preparing Land for Root Crops.

The land on which roots are to be grown should be free from excessive moisture and should be in a good state of fertility. For this reason it is best to follow a clover crop. Two methods of preparing land for root crops have been followed at the Experimental Farm, Nappan, N.S. The one that has given the best results is to top-dress with barn-yard manure on the clover aftermath at the rate of 15 tons-per acre on a three-year rotation. Plow the clover-math under with the manure to a depth of from four to five inches. Top work with double cut-away disc-harrow the remainder of the season. In the spring, as soon as the land is fit to work, give it one cut with the cut-away harrow to loosen the soil, then cross-plow and follow again with the cut-away two or three times or until satisfied that the manure is thoroughly mixed with the soil and that a good seed bed is prepared. Put the smoothing harrow over once to level the land and make it easier for drilling.

The second method is similar to the first except in the time of applying the manure and is used when manure is not available in early autumn. Proceed with the preparation of the soil as directed in the first method and apply the manure either during the winter or the early spring if the fields are level. If the fields are sloping or the soil is of a gravelly, open or porous nature do not apply the manure in the early fall or winter, but just before cross-plowing in the spring, otherwise part of its value may leach away.

In the first method the big advantage is that the manure is applied previous to the rush of work in the spring. Furthermore, it is incorporated with the soil more thoroughly than in the second method and is worked up toward the surface in the spring instead of being worked down, as is the case in the second method. As root crops, such as turnips, swedes and potatoes, are shallow feeders, this is an advantage, as the plant food is more available for the crop. In the case of mangels it is not so essential that the manure be near the surface, as they are deep feeders.

In preparing land for root crops it is necessary to keep in mind the requirements of the crop being sown as well as the requirements of the soil on which the crop is being sown. Root crops, such as turnips, swedes and potatoes, are able to supply themselves with potash when grown on fertile soil, but they cannot appropriate the combined phosphoric acid of the soil. Therefore, on exhausted soils the use of phosphoric manure is essential in order to get a full crop; superphosphate or basic slag is recommended and should be applied at the rate of three hundred to four hundred pounds of superphosphate or five hundred to six hundred pounds of basic slag per acre, the amount depending upon the fertility of the soil. Mangels, on the other hand, have a greater capacity for drawing food from the soil, including nitrogen, potash and phosphoric acid, consequently, an application of nitrate of soda, say two hundred pounds to the acre, in addition to the barn-yard manure, will, generally speaking, give a full crop.

To insure a maximum root crop follow clover; till the soil thoroughly to incorporate the manure well with the soil; give a light application of nitrate of soda, superphosphate or basic slag; cultivate well during the season to conserve the moisture and to prevent growth of weeds.—W. W. Baird, Supt. Dominion Experimental Farm, Nappan, N.S.

A dog is a poor garden fence. It is cheaper to build the regular kind.

It is poor practice to send the dog after the cows, because cows become angry and excited, and heavy milkers may become injured. It is seldom that cows chased by dogs give freely of their milk.

The Gentle Art of Vacationing

By Katherine Brey

There are many times a year when every normal human creature (and now and then a creature not so human) longs for a change; when routine becomes insufferably just because it is routine, and in spite of the apostle we are distinctly weary in well-doing and ill-doing, too. It is not merely the "skidding" instinct, nor yet the "sweet-do-nothing" languors. For probably if the chance could be snatched, the vacation taken, many a bill of doctor or psycho-analyst might be forestalled. If one is very wise, or very wealthy, one may get the habit of the winter or early spring holiday. But there is at least one time in the twelve months when every one feels like claiming a vacation, and like planning it out with a clear and cheerful conscience—and that time is here.

Few things are funnier or more suggestive than the reactions of various people to their summer outings. There are those who never fail to make a mistake. Perhaps they miss the essential train or boat at the outset—or else they find that their chosen hotel has changed management—or that their traveling companion has suddenly developed into impossibility. Sometimes they spend all their money the first week and return home in humiliating haste. Sometimes they are afraid to spend their money, and never really break loose at all. The result is the same—comedy or tragedy, their vacation is a failure. And humorously or pathetically, they bewail it all the autumn.

Quite as trying are the people whose vacations are invariably a success. Having mapped out the holiday themselves, they feel honor-bound (or isn't it pride-bound?) never to admit disappointment. These are they who smile glumly as they describe a small mountain resort where they have passed two entire weeks of rain—or a fishing trip where (as we learn from others in the party) not a single minnow was sighted, and even the trout had disappeared along the banks. Alas and alack! these are also they upon whose advice we ourselves were once deluded into trying some marvellously economical seaside hotel, where we soon discovered the mosquitoes had found a hippy hunting ground, and the butter and eggs (unlike Caesar's wife) were not quite above suspicion. We recognize these professional optimists after a few seasons, and when we see them sauntering along Main Street in September we surreptitiously zip around the nearest corner. For, after all, there is nothing more irritating than habitual discontent!

Freedom from the Familiar. Most of us look back upon a few radiant vacations, with many dull ones in between. Most of us are frankly eager to find some recipe for crowding as much cheer and as little disenchantment as possible into the space at our disposal. And obviously, there must be a different recipe for each type of person. For the first requisite of a vacation is that it shall vacate—that it shall free us (does not the word mean just that?) from the too familiar scenes and routine of life. If it does not do this it is not quite a vacation, although it may have all the

minor virtues of climate and comfort and bodily health. For it is not only the Man of Assisi used to call it—which needs to recuperate. It is the mind, the heart, the imagination—all the frayed nerves and tired ideas and wavering will which drive poor Brother Ass on to the breaking point. What most people need is change—a glimpse at the other side which will supplement their own daily life, stretch it and bring back its zest. Those who work too much need quiet and a chance to dream; those who rest too much need some stimulating sort of work. Those who live in turmoil need the quiet spaces of sea or woods. Those who are close-tied cry out for the variety of travel. Simplicity is the happiest foil for the sophisticated—and the hardest to find. But for the farmer and the farmer's wife, probably the best possible vacation would be a week in a large city (no matter how high the temperature might be), with shops' every morning and theatres every night.

Whom to go with is another problem, for the contiguity of travel is a prime touchstone. It will bind or lose friendship; and for this reason people have learned to ease the monotony of their journey by traveling four abreast. For two at a time will generally be found to agree upon a day's program, and the friction of too unbroken contact is avoided. It almost seems a pity that convention and convenience send families off all together for their vacations, for the family atmosphere is bound to go with them even into China or the Rockies. And often what we need most is just a little distance from the people we love and live with. For it is the hardest thing in the world to see anything—or any one—clearly when day by day and year by year we travel along too close for perspective, and too certain of one another for any sense of illuminating loneliness. Most of us get such a hunger for solitude at moments (it seldom lasts into hours) that we want to escape from every one we know, and would love best of all to escape from our exasperating selves. . . . Of course, this is our own fault. If we were more like Robert Louis the Bolovet, for instance, we might risk traveling with a donkey (sister, perhaps to Brother Ass!) and write about it afterward to the great enchantment of the stay-at-home. If?

Marketing Dairy Products.

The time has arrived when the products of the dairy farm must be merchandised. While the conclusions of our scientists have clearly demonstrated the absolute need of an abundance of milk, of milk products, in the human diet, the fact still remains that milk substitutes are still being distributed where the products of the dairy should be sold. There is at least one reason for this. These substitute products are brought to the attention of the public in an attractive manner. The sanitary conditions under which they are manufactured are emphasized. The neat package in which they are sold is visualized on billboards and the printed page. The best artists are employed to bring together every device of form and color in order to make the public believe that here is a class of products that should be in every respectable home.

While the dairyman has the advantage of the scientist's testimony, he has failed to use this testimony in making his appeal to those who buy the product. Consequently our dairy markets are suffering. The present dairy-market situation is the result, not of an over-supply so much as it is an under-demand. The Canadian dairyman can help his cause much through the most insistent preaching of the virtues of his product.

Washing Day in Iceland.

Washing is hard and trying work except, perhaps, to the Icelanders, who clean their clothes in what is really a natural laundry. About a mile and a half from Reykjavik, the capital, is a stream. First it is hot and then very hot water. It is always ready for use. A portion of this boiling stream has been enclosed by iron rails in such a way as to form separate receptacles, through which the hot water flows. In these the women wash their clothes, where they are boiled and cleaned. Next by are sinks where the garments are dried and ironed.

Why Not Teachers of the Player-Piano?

Now that the player-piano has come to be regarded as one of the foremost instruments in the spreading of the gospel of music, and now that it can count amongst its devotees in Canada thousands and thousands of music lovers, is it not time that something was done in the way of instructing students in the proper playing of the player? Of course it is realized that to play the player-piano acceptably, not the same amount of tuition and effort on the pupil's part is necessary as in the case of an ordinary piano. Yet, to get the most out of the player, a student requires instruction. And to give the proper instruction, qualified teachers are necessary.

The old idea that all one had to do to play a player was to sit down, insert the roll and pump has largely disappeared, and it is seen now that to give a reasonably good interpretation of a number, one must not only understand the various devices with which the player piano is equipped, but also know something of musical terms, musical appreciation and the art of music generally.

Ernest Newman, the well-known writer on musical topics, thinks that teachers of the player-piano are necessary to that instrument's welfare. "It may be a little exaggeration to say," he says, "as I sometimes say in self-excuse, when I have given a particularly bad performance on the instrument, that it takes as long to acquire a first-rate piano player technique as it does to acquire a first-rate hand technique; but it is not so very much of an exaggeration. You need only a very slight acquaintance with the piano-player to realize that it is anything but a mechanical instrument in the sense that you have only to set it going and it will do all the work for you. If it were a machine in that sense it would be the same under everyone's hands, and under the same performer's hands to-day, to-morrow, and the day after. But we all know that it behaves differently with different people and with the same person from day to day or from hour to hour. Each particular instrument has a personality of its own—a personality as explicit as that of the ordinary human being. That is at once its attraction and its charm. It is annoying to have it behave so capriciously; but it behaves capriciously only because it can do what is ostensibly the same thing in a hundred different ways; and the possibility of it being made to do it in the one way that is right. A machine it undoubtedly is, to a large extent; but it is a most sensitive machine, and its sensitiveness can be controlled to beautiful uses."

The Guinea Fowls.

The Guinea hen is a good layer, but on account of the wild, gamey flavor, the eggs do not have an extensive sale for table use. However, by turning the eggs into broilers or roasters, a considerable profit will be derived. The flesh is the nearest substitute we have for wild game.

The laying season starts in early April and continues until October. One hen will lay as many as 120 eggs in a season. In the early part of the season it is not advisable to let the Guinea hen hatch a brood, as she is of too restless a nature and will not give her young the proper attention; but after the first of July, on account of the warm weather, she will be more quiet and can be safely trusted with a brood.

It requires four weeks for the eggs to hatch. The hen always hides her nest in some very obscure place. As she comes off the nest she gives a shrill cry, and by that the hiding place can be discovered. All the hens of a flock are likely to lay in the same nest. In taking away the eggs they should not be touched with the hands, for if the hen discovers that the eggs have been touched she will desert the nest and hunt another place. If the eggs are removed with a stick she will not leave the nest, even though the eggs are taken out nearly every day.

It is claimed that a cross of the Pearl and White Guineas will produce a carcass closely resembling that of the English grouse. If rightly cooked, the meat of even an old bird will be tender and delicious, the young bird is unsurpassed as a broiler or frier. The dressed Guinea has around, plump body, good-sized breast and small bones.

Guineas will pair if the sexes are equal. They generally lay between ten o'clock in the morning and two o'clock in the afternoon. Until well feathered, young Guineas are delicate and tender. It is not advisable to hatch before June. The Guinea cock-bird cares as much for the young as does the hen, and guards them during the day and hovers them at night.

The male bird is larger than the female, has larger wattles and helmet, is more aggressive, and has a different call. The hen makes a noise sounding like "Cone back, come back," while the male cries "Tik, tik." The cry of the Guinea is a warning to the rest of the poultry, and they at once hide until the alarm ceases.

Guineas do not scratch like other fowls, and therefore are safe to have in the garden. They should be given their freedom, as they do not thrive in confinement. The Guinea is of a roving disposition, and one of the best known destroyers of insects.

THE CHILDREN'S HOUR

Choosing Your Life Work.

Our life work should produce the maximum of two things: first, of personal enjoyment and second, of service to the community. Every boy before he makes a choice of vocation should clearly realize this. The wise selection of business, profession, trade or occupation to which his life is to be devoted, and the development of full efficiency in the chosen field, are matters of deepest moment to him and to the public.

The unfortunate thing in the past has been that so many boys have not made a definite choice of a vocation, but have taken the first "job" that offered and just drifted. Then in after years have found themselves burdened with a yoke. The yoke of uncongenial work, of distasteful environment, of inefficiency, of the knowledge that they are only half the man they should be either in personal development or public service. How many the boy would be burdened with a yoke in later years?

In the wise choice of a vocation there are three broad factors: (1) a clear understanding of himself, his aptitudes, abilities, ambitions, interests, resources, limitations and their causes; (2) a knowledge of the requirements and conditions of success, advantages and disadvantages, compensations, opportunities and prospects in the different lines of work; (3) true reasoning on the relations of these two groups of facts.

Exercise care when leading a horse through a low doorway. A blow on the top of his head will frequently cause poll evil. This ailment is very difficult to cure, and usually requires veterinary attention.

Work that is not finished is not work at all; it is merely a blotch, an abortion.

Challenge Sale

High Quality Suits for Men and Young Men

We feel safe in saying that never in your life have you seen or heard of such remarkable suit values as these, all strictly guaranteed garments. Every fabric, every color, will be represented in this immense showing of our entire stock.

Group No. 1

All Wool Tweeds and Worsteds in Men's and Young Men's Models. Strictly reliable suits. Real values, \$29.50. Challenge Sale Price, \$19.50.

Group No. 2

In an almost endless variety of patterns and colors to choose from. All fresh Spring 1922 fabrics, selling regularly up to \$35.00. Challenge Sale Price, \$22.95.

Extra Special!

Men's Blue Serge Suits, \$25.00, styles include the new-est as well as the most conservative.

Summertime Merchandise at Remarkable Reductions

Regular \$2.50, White Wash Satin, 36 in. wide, on sale, \$1.95 yard.

Regular \$1, Natural Pongee, wide width, on sale 69c yd. Green and White Swiss Dot Organdie, on sale this week, \$1.38 per yard.

Wash Dresses of Voiles and Ratines for \$6.69, this a remarkable reduction.

Silk Dresses, regular \$25.00 for \$15.50.

Women's White Oxfords and Slippers, all sizes, specially priced for this week at \$2.39 per pair.

Wonderfully good news for everybody. Immediate shoe stock clearance.

High-class Shoes at very special bargains.

A few of the real special bargains; buy as many as you want, no limit—Men's Extra Strong Wearing Work Shirts, all colors, for 98c each; Men's Union Made good quality Overall, this week \$1.48 pair; Men's Work Sox, reg. 40c value, this week 4 pair for \$1.00; Men's Balbriggan Underwear, reg. \$1.00 value, on sale 69c a garment.

All Summer Goods to be cleared at nearly half price.

QUESTIONS and Bible Answers

12 Parents will encourage children to look up and memorize the Bible Answers, if they give prizes to them in after years.

What did the wise men of the East do when they beheld the young child?—Matt. 2:11.

NEWBURY

R. H. Moore, wife and baby Betty spent the week-end at E. J. Grant's, Belmont.

Miss Hazel Fennell arrived home from Mortlach, Sask., last week.

Mrs. Webster, of Kitscoty, Sask., is visiting her sister, Mrs. J. G. Bayne.

Misses Minnie and Nellie Sinclair and Marion and Violet Hubert, of Toronto; Dora Sinclair, of Detroit, and Mrs. Lorne Heatherington, of Windsor, have arrived and opened up their home for the summer.

Mrs. Fred Biddle and three children, of Windsor, are visiting her mother, Mrs. N. D. Campbell.

David Gage has gone to spend some time with his daughter, Mrs. Payne, at Merila.

Miss Nessie Archer has returned from Pelee Island.

Miss Winnifred Archer, of Detroit, is spending a week here on her return from a trip to Niagara Falls and St. Catharines.

Mr. and Mrs. Telford Smith and daughter Katherine, of Aberdeen, South Dakota, are visiting at the home of his sister, Mrs. R. B. Smith, Mosa.

Mrs. Hicks, of Michigan, is visiting her aunt, Mrs. Mary Robinson, and other relatives here.

Mrs. Willard, of Lloydminster, Sask., arrived last week and will spend some time with her brother, James Brown, who is seriously ill.

Miss Olive Regis left on Friday for Oshawa, where she will visit her brother.

A Prime Dressing for Wounds.—In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

WARDVILLE

Miss Marion Reid visited with friends in Bothwell last week.

Arthur Jackson, of St. Thomas, is visiting his grandmother, Mrs. Atkinson.

Mr. and Mrs. Jim McIntyre spent

the week-end at E. J. Grant's, Belmont.

Miss Hazel Fennell arrived home from Mortlach, Sask., last week.

Mrs. Webster, of Kitscoty, Sask., is visiting her sister, Mrs. J. G. Bayne.

Misses Minnie and Nellie Sinclair and Marion and Violet Hubert, of Toronto; Dora Sinclair, of Detroit, and Mrs. Lorne Heatherington, of Windsor, have arrived and opened up their home for the summer.

Mrs. Fred Biddle and three children, of Windsor, are visiting her mother, Mrs. N. D. Campbell.

David Gage has gone to spend some time with his daughter, Mrs. Payne, at Merila.

Miss Nessie Archer has returned from Pelee Island.

Miss Winnifred Archer, of Detroit, is spending a week here on her return from a trip to Niagara Falls and St. Catharines.

Mr. and Mrs. Telford Smith and daughter Katherine, of Aberdeen, South Dakota, are visiting at the home of his sister, Mrs. R. B. Smith, Mosa.

Mrs. Hicks, of Michigan, is visiting her aunt, Mrs. Mary Robinson, and other relatives here.

Mrs. Willard, of Lloydminster, Sask., arrived last week and will spend some time with her brother, James Brown, who is seriously ill.

Miss Olive Regis left on Friday for Oshawa, where she will visit her brother.

SHOE REPAIRS WHILE YOU WAIT

Old Shoes made like new. Quality, Durability, and Neatness in every job guaranteed.

Let me fix your broken Harness. Charges reasonable.

J. PARKE
Shoemaker, Newbury, Ont.

At your service from 7.30 a. m. 9.30 p. m. each week day.

MELBOURNE

Misses Agnes and Elinor McNabb and Marjorie McLean have left for Toronto, where they will take the summer course in physical culture.

Mrs. Arthur Staples is spending a few days at Kimbol with her mother, who is ill.

Emerson Johnston and wife, of Brantford, are spending a few days here. They can see many changes during their absence of 20 years.

M. Long, of Cleveland, spent a few days at his old home here, returning on Saturday accompanied by his son and daughter, Clarence and Florence. They will spend their vacation in that city.

Rev. Dr. Brown spent the week-end in Port Haron, where he attended the Old Boys' reunion. William Lewis preached here in the morning and at the Sutherland appointment in the afternoon on "The Man of Sorrows."

The South London Salvation Army band motored to our village Saturday evening and gave a band concert which was much enjoyed and appreciated, although many were disappointed because there was no speaking.

Others came prepared to take part in singing some good old hymns, but there was no song service held. An appeal was made for the work, and \$5 was raised in a few minutes by the citizens.

Muscular Rheumatism Subdued.—When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Electric Oil. Lot the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully estimated.

DAVISVILLE

Joseph Armstrong has purchased a new Chevrolet car.

Mr. and Mrs. James Gibson and daughters, Florence and Alice, of Detroit, are spending a couple of days at the home of Mrs. Gibson's parents, Mr. and Mrs. Thomas Durley.

Mr. and Mrs. Thomas Durley have returned to their home after spending six weeks with friends in Detroit.

Mrs. Jane Armstrong, of Newbury, is spending a couple of days with her daughter, Mrs. Dan McNaughton.

Miss Mabel Hillman has arrived home for her summer vacation.

CAIRO

Mrs. Annie Smith, of Windsor, attended the funeral of her aunt, Mrs. Ann McLean.

Mrs. Leila Smith and daughters, Rose and Bessie, and Frank Storie

and son Lloyd motored here Sunday afternoon and spent the evening at D. M. Smith's.

Mr. and Mrs. Newkirk visited his mother on Sunday.

There was no service on Sunday school in Cairo Presbyterian church last Sunday on account of the funeral of the late Mrs. Ann McLean.

Mrs. J. H. Burgess, of Chatham, is visiting her daughter, Mrs. H. A. Newkirk.

Mr. and Mrs. Will Ball, of Stratford, visited his parents over Sunday.

Died, at her home at Cairo, July 7th, Mrs. Ann McLean, widow of the late Duncan McLean. She was born in Mosa township, the daughter of Joseph and Clara Watterworth, and leaves to mourn her loss two sons, George W. and Roy, and one daughter, Lilla, and grandson, Blake W. all at home; three brothers, James, of Glencoe, Frank, of Wardsville, and William, of the Longwoods Road; three sisters, Mrs. Chas. Gage, of Battleford, Sask., and Mrs. Hiram Lumley and Miss Margaret Watterworth, of Glencoe. The funeral services were conducted at the home on Sunday by Rev. Mr. Bell, Presbyterian minister, assisted by the Cairo church choir.

If one be troubled with corns, he will find in Holloway's Corn Remover an application that will entirely relieve suffering.

KNAPDALE

Nearly all the farmers around Knappdale have finished haying and some of them are getting ready for the wheat-cutting.

Mr. and Mrs. James Thomas and son Earle, of Aldborough, spent Sunday at the home of Mr. and Mrs. Alexander Stewart.

A number from here attended the bazaar at Knox church, Newbury, on Saturday.

Miss Mabel Hillman is home for her holidays.

Mr. and Mrs. Thomas Weer and son Samuel, of Wardsville, and Mr. and Mrs. Will Telfer and son Stewart, of Parkdale, spent Sunday at the home of Mr. and Mrs. Alexander Stewart.

Miss Carrie Fletcher is home for the week-end.

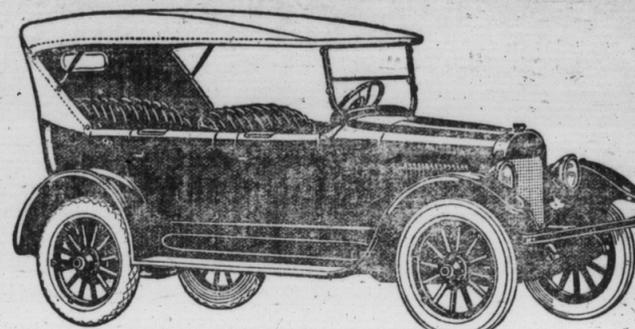

Miss Edith Duckworth has returned to her home in Cashmere.

EKFRID STATION

Mrs. D. A. Campbell left last week to visit friends in the West.

Miss Stella McDonald was the winner of the autograph quilt at the ice cream social held here recently.

Bateman Young, of New York, is spending his holidays with Mr. and Mrs. W. P. Cornell.

The Standard of Comparison

For years McLaughlin - Buick Model 45 five passenger touring car has been the standard by which open cars have been judged.

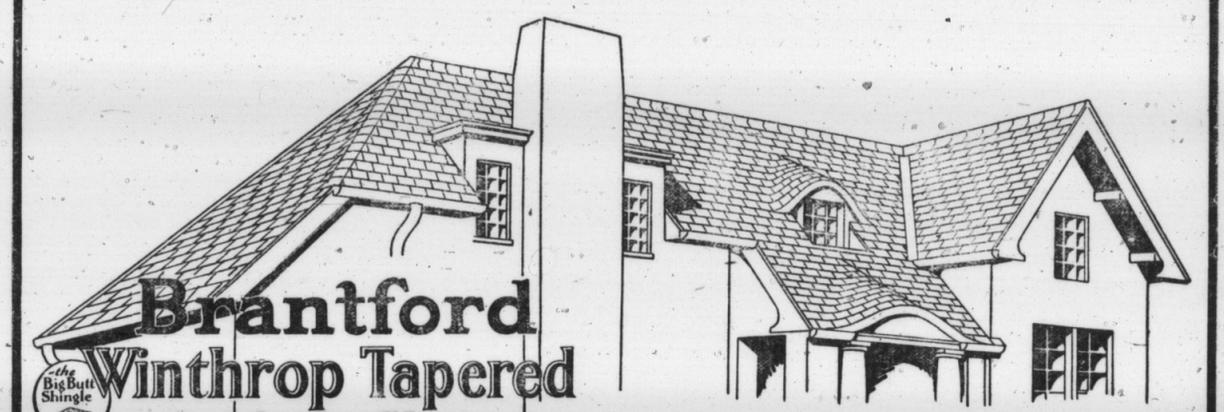

It possesses in the highest degree those qualities of graceful strength and refinement that suggest at once dependability, comfort and power.

To-day, McLaughlin-Buick Model 22-45 is repeating in fullest measure the success of other years.

Why So Much Emphasis On The Taper?

Brantford Winthrop Tapered Asphalt Slates

- Here are Three reasons—Three absolutely sound reasons why Tapered Slates—Brantford Winthrop Tapered Asphalt Slates—mean perfection in roofing material.
- 1 They are the big butt slates—the only asphalt slates that give a shadow line, which so improves the appearance of a roof—something architects have long wanted in Asphalt Slates.
 - 2 They are scientifically constructed. They are tapered. Being thicker at one end than the other, the butt of the
 - 3 overlapping slate lies flat on the upper part of the slate in the row below. No rain or snow can accumulate underneath—wind cannot get under them and blow them off.

These slates are manufactured by us under a Special License. Their base is a heavy-weight, long-fibred, rag felt; every fibre of which is permeated—saturated—with a hard grade of asphalt—then coated with a still harder grade of asphalt.

While this asphalt is still hot, crushed slate is incrustated and embedded into the coating—the asphalt is pliable and yet so hard that it resists the blistering rays of the sun. The crushed slate is nature's own colors, red, green or blue-black.

Write for our Booklet "Permanent Roofing Satisfaction." It will be mailed free to responsible parties.

Brantford Roofing Co., Limited
Head Office and Factory, - Brantford, Canada
