FRANCE.

We extract the following from the Glasgow Herald of the 20th ult.—The news from France is very little changed since our last. If there be any difference it is, that the tone of all the accounts we have seen point more and definitely towards a war. We do not pretend to knew where hostilities will first commence, but from the attitude assumed by the French Government towards Belgiam and Switzerland it would seem as though one or other of these countries would be necessitated to bear the first brunt of battle. Both these countries, but more especially the latter, already feel themselves in the presence of a great and urgent necessity; but the Swiss, with their traditionary hadred to foreign interference have dared to speak out against the arbritary demands of the Prince President of France. M. de Salignac, the new French Minister in Switzerland, has demanded that the Helyetic Republic shall expel all foreign refugees, control or suppress the liberty of the press, besides other matters which the Swiss-wilt, we believe, be very little inclined to grant. In reference to these demands of the French FRANCE.

inclined to grant. In reference to these demands of the French usurper, M. Furrer, the President of the Republic, in reply, is reported to have delivered himself to the following effect:—

'It is evident that the free institutions of the country give unbrage to the French Government; perhaps it entertains in secret the idea of imposing some modification upon our constitution; but let it not be deceived; we are neither so weak nor so divided among ourselves as we may appear: and should France ever attempt to touch our liberties, conservators and

Ma. Editor;

Sir.—If you will allow the writer, through your valuable periodical, to address a few lines to the friends and advocates of education, it will be esteemed as a peculiar favor.

On learning at the commencement of the present Session, that the Honorable Members of the House of Assembly, had it in contemplation to adopt measures for carrying forward a mere efficient system of education throughout this Island, a cheering hope was indulged on the part of the teachers, that their condition would be greatly ameliorated; but are surprised to know by reports given, that their anticipations are likely to prove abortive. Especially, that the decision of the Honorable Members of the House should have a serious effect in paralyzing the energies of young women of taste and talent, who are preparing by mental culture to snoot the have a serious effect in paralyzing the energies of young women of taste and talent, who are preparing by mental culture to meet the exigencies of the rising generation, and precluding those already in the field, from the lezury of laboring for the elevation-of their sax; and from hoding that position in society which this enlightened ago demands, by limiting them to salaries not to be compared with their present annuity. We ask not to be sustained without devoting our time and talents to the public benefit; but modestly solicit, that the visiters of schools may be consulted, and teachers dealt with according to their merits. We thought, in this day of refinement, that the cultivation of the female mind was deemed equally important with that of the other class; and not withstanding science and literature may be obtained under the tuition of gentlemen, it is obvious to every reflecting mind, that there are departments in female educaevery reflecting mind, that there are departments in female educa tion which can only be attended to by those of their own sex; and is a wer sufficient activities to country further strates awanced than this, female instruction stands upon a par with that of the other class. And, we cannot help recoiling at a retrogading course in this age of refinement. As it comports with our position to submit to the gentlemen, we yet hope, that such an amendment may be made as will enable us to do so with pleasure.

FOR HASZARD'S GAZETTE.

Ms. Editor:—

A question contained in a few lines, was asked by me in your paper, published on the 9th March, as also in two object of the Royal Gazette within the last month.

I had imagined, Sir, that a simple question civilly asked, should, and would have elicited an answer from the parties enquired of. As such has not been the case, I beg you publish the following answers given me some two months since, by tro of the Committee referred to in "few lines" above mentioned, on my enquiring of them what steps they had taken, or were going to take, to fulfil the task entrusted to them, viz: that of collecting subscriptions in sid of Nova Scotia Episcopal Endowment Fund.

The answer, if such it may be called, which I received from the one, was as follows:—"I do not think that the Home Government, or Lord John Russell, (I forget the very words or term seed,) dan reasonably expect the Colonies to provide for the maintenance of

one, was as follows:—"I do not think that the Home Government, or Lord John Russell, (I forget the very words or nem used,) can reasonably expect the Colones to provide for the maintenance of their several Bishops. From the other, "When I have nothing better, or nothing else to do, (I don't call to mind the exact time,) I will look to it."

And meanwhile

Romain,

Yours truly,

A CHURCHMAN.
