TOKIO IS QUIET AGAIN

Terms of Peace Are to Be Published At Once By Government.

Government Has Suspended Five Newspapers From Publishing—Statue of Marquis Ito Dragged Through the Streets at Kobe—Keen Regret Expressed Over Attacks Upon Christian Churches—The Damage Done.

Tokio, Sept. 9.—In response to the popular desire and urgent requests of political leaders the Government has decided to publish the terms of peace at once.

Complete reports from Metropolitan and outlying districts indicate that there was no disorder throughout the night or early morning. The quietness of the night is ascribed to a heavy rain, which scattered the crowds.

The Government has suspended five newspapers. The Government has not indicated its intention regarding the summoning of a special session of the Diet, but it is believed that such a call soon would be issued.

Government officers and the better class of Japanese citizens are expressing keen regret over the attacks on Christian churches. They explain that the affair does not indicate a serious anti-foreign or anti-Christian feeling. Foreigners in Tokio generally are unconcerned over the situation. Preparations are progressing to present claims to the Government for the foreign church property, which has been destroyed.

Disorders have occurred at Kobe. Last night (Thursday) the statue of Marquis Ito was dragged from its pedestal and pulled through the streets.

Church Property Damaged. Church property was destroyed and damaged Wednesday and Thursday. The Catholic Church, school and priest's residence in Honjo were destroyed. Four small houses at Honjo were also burned and the Protestant Church at Honjo, under the pastorate of Aubrey Armstrong, an American, and the latter's residence, were burned.

Three mission churches in the Asakusa district were partly wrecked. At Hyogo the church people, anticipating an attack, removed their own fences and raised a white flag. The result that the mob contented itself with destroying a few chairs and tables. A mob attacked the Methodist Church on Okachimachi street, wrecked the walls and fences and carried part of the furniture into the street and burned it. The Yonokura and Emacho Churches in Nihon Bashi were burned.

To Be Inquired Into. Montreal, Sept. 9.—Hon. Raymond Prefontaine arrived in town yesterday morning to make arrangements for a thorough investigation into the wrecking of the Government steamer Hosanna by the Empire. He immediately issued orders that Col. Courdeau, his Deputy Minister, with B. Fraser, chief engineer of the Department, proceed to-day to investigate the sunken boat, preparatory to a formal investigation by the wrecking inspector.

Italian Arrested For Murder. Toronto, Sept. 9.—Suspected of the murder of John J. Hoban, who was stabbed up in the ward on Monday night, Charles De Marco was arrested yesterday by Acting Detective Umbach. De Marco is identified as being one of the two Italians present at the stabbing affray who could have committed the murder. He denies it himself, acknowledging only the fact of his being present. He blames the other Italian for the crime.

The Cholera Situation. Berlin, Sept. 9.—A sort of sanitary state of siege exists in the district that now extends from the river Oder, northwestward to the Russian border, about 250 miles, and from Danzig to Gdansk, south of Posen, about 150 miles. The new cases of cholera yesterday are as follows: Marienburg, 6; Thorn, 1; Bromberg, 2; Wirsitz, 5; Genssen, 3; Czarnikau, 1 and Koenigsberg, 1.

Salvationist Mobbers Arrested. Montreal, Sept. 9.—Nine arrests were made last night for further attacks on the Salvation Army at Mile End. The arrival of the Salvationists was witnessed by several hundred people, who remained quiet enough until the meeting was over. Several brushes then took place, and stones were hurled, but nobody was seriously injured.

Former Premier Harrison Dead. Vancouver, Sept. 9.—Dr. D. H. Harrison, former Premier of Manitoba, is dead. He was born at London, Ont., and was educated at Toronto. He took office as Secretary of Agriculture in 1886 and became Premier in December, 1887. His ministry resigned January, 1888, and was succeeded by the Government of Hon. Thomas Greenway.

China Congratulates. Oyster Bay, Sept. 9.—The Emperor of China has extended to President Roosevelt his congratulations upon the success of the President's efforts to establish peace between Russia and Japan, and "to promote the welfare of mankind." In his congratulations the Emperor is joined by the Empress Dowager.

Law Student In Trouble. Windsor, Sept. 9.—Thomas W. Moorehead, who was arrested here by the Provincial detectives on a charge of seduction, preferred by a young girl at Niagara Falls, denies any knowledge of the charge. He claims that he was a law student in Toronto.

The more friends a man has, the more money he lends.

LEAGUE MEETING

Semi-Annual Meeting of the Peninsular League to be Held in Windsor to Arrange for Fall Term

Percy G. Piggott, secretary of the Chatham Football Club, has received the following letter from W. G. Wells, secretary of the Peninsular Football League, which speaks for itself. A representative will be sent from Chatham, as directed by the letter:—
Mr. P. G. Piggott:—
Dear Sir,—The semi-annual meeting of the Peninsular League will be held at the Crawford House, Windsor, on Thursday evening, Sept. 14th, for the purpose of electing officers for the fall term and to decide whether or not League funds shall be used to entertain visiting Old Country players. You are requested to have a representative present.

Yours respectfully,
G. W. WELLS, Sec.
Sandwich, Sept. 7, 1905.

MARKET WAS A MONSTER

Record-Breaking Attendance at Maple City Square with Fine Weather

Opinions of Farmers on the Regulating of the Stalls in New Building—Offerings and Prices.

This morning's market was the largest of the season, perhaps larger than has been seen in years. It is a long time since the farmers' wagons overflowed onto the easterly side of the square, usually reserved for drays and field-stuffs. Moreover, some of the rigs were on the northerly side of King street, opposite the market, something very unusual. The produce, fresh and inviting looking, lined the tables.

The marketers turned out early and from nine o'clock until twelve the square was thronged with householders intent on bargain seeking and the last of replenishing the family larder—the parasols and light dresses of the ladies adding the color touch necessary to complete the scene. To an outsider the scene must have been an impressive one, and such an one must have been in the mind of the writer of Kent is the Garden of the West.

A Planet representative went the rounds of those displaying their produce in an effort to get their opinion as to the best method of regulating the stalls in the new market building. It seems that the opinion among those who attend regularly would be better to rent a regular stand which the person could use each market day. Of course those who are irregular in attendance do not care for this, but, apparently, the regulars outnumber those who attend spasmodically.

Mrs. Benoit, of Dover Township, a regular attendant, was strongly in favor of having regular stalls. "I should not care to have a different stand each day," she said. "With a regular stall my customers would know where to find me and this would be better for me."

Mrs. McArthur, of Dover, and Mrs. John David, both regular attendants, expressed themselves in like manner. Several would not talk for publication before seeing "the old man."

DAIRY PRODUCE. Butter, per pound, 22c to 25c. Cheese, new, 10c to 25c a cake. Ducks, each, 38c to 40c. Eggs, per dozen, 17c. Honey, rack, 10c to 12 1-2c. Spring chickens, each, 25c to 30c.

VEGETABLES. Beans, lima, 15c quart. Beets, 2 bunches for 5c. Cabbage, each, 3c to 5c. Carrots, per bunch, 2 for 5c. Celery, per bunch, 10c. Cauliflowers, each, 5c to 10c. Cucumbers, small, per 100, 15c to 20c. Cucumbers, large, per doz., 5 to 6c. Cytion, each, 5c. Egg plants, 5 to 15c each. Green corn, per dozen, 7c to 10c. Marjoram, per bunch, 5c. Musk-melons, each, 7c to 20c. Onions, large, 3 bunches for 10c. Onions, pickling, per quart, 9 to 10c. Onions, pk. 25c. Parsnips, 3 bunches for 10c. Potatoes, 15c peck; 75c bag. Peppers, green, per dozen, 5c. Peppers, red, per dozen, 5c. Pumpkins, each, 5c to 10c. Squash, yellow, 2 for 5c. Squash, Hubbard, 10c to 20c. Squash, Turpin, 5 to 10c. Sage, per bunch, 5c. Savory, per bunch, 5c. Turnips, per peck, 10c. Tomatoes, yellow, per quart, 5c. Thyme, per bunch, 5c.

Continued on Page Four.

RIOTERS CAPTURE GUNS

Maddened Crowd Deluged Gunners With Burning Oil.

Balakhan Was Completely Burned Out After the Tartars Had Plundered It of Everything Valuable—A Fierce Fighting and Great Slaughter Occurred at the Hospital—Socialists Take Credit for Securing Reforms.

Baku, Caucasus, Sept. 9.—No serious new fires have occurred in this city, but fires are still burning in the oil fields.

Street fighting continued until late Thursday night. The consulates, banks and Government buildings are guarded by troops.

Balakhan was completely burned out after the Tartars had plundered it of everything valuable. Although shot down in masses by the artillery, the Tartars were not deterred from their work of wreckage and looting. Fierce fighting and great slaughter occurred at the Balakhan Hospital, where a thousand Armenians and workmen gathered. General Shinkin sent a detachment of artillery with three guns to the scene, and the commander of the detachment summoned the crowd to surrender. The latter replied with volleys of stones and some shots, which killed one of the gunners.

The first discharge of the three guns miscarried, but the second sent the shells crashing into the hospital, where they exploded, killing an immense number of men and wrecking the building. The maddened crowd charged the guns and captured them, after deluging the gunners with burning oil.

Socialists Take Credit. Riga, Russia, Sept. 9.—The end of the general strike here was announced yesterday by a manifesto issued by the social democratic committee.

The manifesto recited that the socialist movement in Russia brought about the end of the war and effected great improvements in the conditions of the workmen throughout the land. The new national assembly, it is also claimed, is due to the social democrats.

The committee commands the workmen to return to work, and has been accomplished for the present.

MUTINEERS FOR SIBERIA. To Be Drafted to Garrison's Troops—Though Officers Protest.

Odessa, Sept. 9.—Seven warships of the Black Sea fleet, which arrived here yesterday, brought 2,000 mutineers, sailors from the battleship Georgi Pobedonostseff, the transports Prout and Vecha, and the entire crew of the ironclad Ekaterina II.

The mutineers for the present will be distributed in small groups among the troops in the Odessa district.

Early in 1906, they will be drafted to the Siberian garrisons.

The local military authorities are protesting against the arrangements, fearing that the sailors will infect the troops with the revolutionary spirit.

Disappears, Aged 80 Years. Niagara Falls, N. Y., Sept. 9.—A mystery surrounds the disappearance of Johnson Stewart of Niagara Falls, Ont., which the police admit they are powerless to solve. Stewart, who is about 80 years of age, disappeared from his home at Niagara Falls, Ont., on Wednesday night, and has not been seen since. His wife and family were greatly worried.

AN INJUNCTION. It is understood that W. F. Smith is considering the advisability of issuing an injunction to keep the Pere Marquette freight cars off Kent street. According to the railway's agreement, it is claimed, they are allowed to run one train a day down this street. Mr. Smith claims that they are making a shunting place of this street and leave cars standing on the tracks. Mr. Smith was successful yesterday in having the steam roller removed from in front of his property.

OBITUARY. At the residence of Mrs. Antoine Drago, River Road, Raleigh, there occurred the death of one of the veterans of the Peninsular War of 1866 in the person of James Drago. Many people in Chatham and the surrounding country will recall these exciting days on the frontier, when our beloved country was threatened by the invader, and doubtless some will remember "Jim" Drago in connection with this call to arms, as one ready to defend his country.

The war spirit was in him, and, times being quiet in Canada, and the Indians in the west giving trouble to Uncle Sam, "Jim" Drago went to Detroit in 1870 and enlisted in the United States army to do service in California and other points where the natives were giving trouble. In those days railroad travel in the west was limited, and in order to get to California he went to New York, where he sailed to California via the West India Islands and the Isthmus of Panama. Mr. Drago had a varied experience during his lifetime and many were the thrilling stories he told of his adventures, especially while fighting the Indians.

He returned to Canada in 1875 and had resided with Mrs. Drago up to the time of his death. The funeral took place on Thursday, September 7th, at St. Peter's church and cemetery, followed by a large concourse of relatives and friends.

L. Smith, of Bothwell, spent yesterday in the city.

GENERAL SYNOD

Opening Season Held in Quebec—Matthew Wilson of This City in Attendance

Special to The Planet. Quebec, Sept. 6.—Bishop Tuttle, who is the President of the House of Bishops in the U. S., preached a most eloquent sermon to the Synod at its opening to-day. The Rev. Canon Farthing, of Huron Diocese, was elected Prolocutor of the General Synod, and L. H. Davidson, K. C., of Montreal Diocese, and M. Wilson, K. C., of Huron Diocese, were elected Assessors, that is, advisers of the Prolocutor and Synod. These—L. C. Prolocutor and Assessors—are the highest officers, and Huron may justly be proud. In addition to this the report of the Missionary Society for Canada yesterday especially commended the missionary spirit evidenced in Huron Diocese.

The Bishops have just sent down a request for the Lower House to take up the question of "Marriage and Divorce."

FOUL PLAY IN DUPRIS' DEATH

Suspicious Circumstances Surrounding Sudden Demise of Dover Man.

Was He Murdered for His Money?—Crown Attorney May Order Full Investigation.

Suspicious circumstances surround the death of Anthony Dupris, an aged and lonely miser, living in a shanty on Lake St. Clair near St. Luke's Club. Dupris had the reputation of having a hoard of gold secured in or around his shanty and was found some time yesterday lying on his shanty floor, dead, and it is said, with a blackened face and finger marks on his throat. He was known to have had a hoard of money on him but none of this was found on him nor was any trace found of money in his shanty.

Dupris, who was 82 years of age, lived quite alone in his rough shack on the lake shore, having as his only companions some farmyard stock which shared his shanty with him. With these he lived, slept and had his being. He was a veteran of the United States civil war and drew a pension of twelve dollars a month. He spent practically nothing and was supposed to have hoarded this income for years and to have secreted it around his shanty.

Thursday the aged miser was in Chatham on his way back from Detroit, where he had been drawing his quarterly pension. He essayed to walk back to hiserie on the lake but, being overtaken by Richard Lozon, of the 8th concession, who was driving in the direction the old man was taking, he was given a ride. When the time came for the old man to continue his way on foot it was found he was unable to do so and so was taken to Mr. Lozon's home, where he stayed that night.

Next morning he was still in a state of torpor and was carried from the house and placed under a tree along the roadside. From this time he disappeared. The next heard of him he was found dead in his rude shanty, his death being surrounded by the suspicious circumstances already alluded to.

Eli Charron, of St. Luke's Club, was the one who discovered the dead man. He procured help, returned and searched the old man. The tell-tale finger marks were noticed and the face had the appearance of that of a strangled man. It would have been quite possible for anyone who knew of the miser's helpless condition to have entered the shanty, disposed of the old man, rifled his pockets and looted the hiding place of his hoard.

The dead man was known to have had the pension money, or the greater part of it, in his pockets, but the search revealed not a cent of it. The funeral having been held at the expense of the township. Added to this is the suspiciously quick manner in which the interment took place. The man was found Friday. The same afternoon a easket was procured from a local undertaker and was hurried out, interment taking place this morning.

Crown Attorney Smith, when spoken to concerning the matter, stated that he had heard disquieting rumors concerning it, and, if on a preliminary investigation any trustworthy evidence of foul play were revealed, a full investigation would be immediately ordered.

SPECIAL SERVICES. To-morrow, Anniversary Sunday, at Christ Church, special services will be held both in the morning and evening. Rev. Dr. Arnold, of Detroit, will officiate at both services and the full vested choir, under the direction of J. W. Wilson, will render special music. In addition to this, Miss Gertrude Foster will rendering a solo at the morning service and Miss May Peate will do the same at the evening service.

The male quartette, Messrs. Wilson, Angus, J. Smith and W. Smith will sing at both services.

Thomas Blake, of Ridgetown, was a visitor in the city yesterday.

BUILT ROAD

TO BEAT W

Exciting Race of Rail Farmers with Injunction Proceedings—Work done when Sheriff Arrives

\$400 Worth of Work Done on Highway—Matter Will Be Vent in the Courts

Along the 5th concession, Rail to-day stands a completed road—one of the best, 'tis said, in the county—a monument to the industry of indignant farmers and their trusty teams.

But the end is not yet. Yesterday an injunction order from his or Judge Bell, secured by W. Pike & Gundy, solicitors for township, Sheriff Gemmill served injunction and writ for damages on the workers. Smilingly they defied the injunction order to the law, work was done, and the Sheriff frankly it is one of the best works he has seen. They must declare, "have not about worth of work upon it."

The trouble is of long standing arises out of differences between holders of the high and low land. Raleigh. The lowlanders claim they have repeatedly asked the G. C. under petition to restore the per grade and keep out the water that naturally wouldn't over north of the Chinnick drain. T. requests, they allege, were neglected and consequently took matter in their own hands and did work with 60 teams to do the grading and ditching themselves. They advised, they declare, a letter to Matthew Wilson, K. C., threaten writ and injunction, but continued and completed the work over their rival yesterday.

The injunction is set down hearing on the 14th inst., and excitement runs high as to the outcome.

GOLSPIE IS SAFE

Hamilton, Sept. 8.—The steamer Golspie, which is on the light house supply service on the Canadian shores of the upper lakes, and which was reported as being lost in the recent storm, arrived safely this evening at Michipicoten.

How Big Is Two Cents?

The average consumption of flour, per year, by each person in Canada, is about one barrel (196 lbs.).

Suppose you use an inferior flour at a saving of say 75 cents over the cost of a barrel of Royal Household Flour, that is just 6½ cents a month—less than two cents per week.

But an inferior flour can yield only a portion of the nutriment you get out of "Royal Household" because cheap flours are poorly milled, contain a greater proportion of bran and shorts—the granules are not uniform—the bread is heavy—the texture is coarse—the flavor is tasteless or poor—the nutriment is not in it.

ROYAL HOUSEHOLD FLOUR, being perfectly milled, is uniform in texture—makes bread that is light and waferlike—white as snow—finely flavored—highest in nutriment.

"Royal Household" is electrically purified and sterilized—backed up and guaranteed by its makers' reputation.

Ogilvie's Royal Household Flour.

DAILY LOVE STORY.

Wanted, a wife who will wear:
None but that sort need apply;
Eben or golden her hair;
Hazel or azure her eyes;
Dark be the woman or fair;
Wanted, a wife who will wear.

Wanted, a wife who will wear:
Handsome or plain be her face.
Willing my burden to share,
Bearing the burden with grace,
Loving through years of care;
Wanted, a wife who will wear.

Wanted, a wife who will wear:
Down through the stretch of the years
Through the dark vale of despair,
Steadfast through smiles and
Through tears,
Dark be the woman or fair;
Wanted, a wife who will wear.

LADY SAILORS.

Millionaire's Vessel On Which They
Receive Excellent Pay.

A great sensation has been caused at Marjopol by the arrival of a 300-ton schooner, painted white throughout, and entirely manned by lady sailors.

On board was the body of the owner, a young South Russian millionaire (Stanislav Sukhotin by name), known through the Czar's dominions as one of the most reckless spendthrifts Russia has ever seen. Sukhotin died of consumption a week ago while cruising in the romantic waters of the Levant.

The schooner left Odessa early in December on a six months' pleasure trip. Sukhotin knew that he had not long to live, and before sailing he bade farewell to his many friends. With the exception of a mistress and a maid, the persons friends of the young millionaire—the whole crew was composed of ladies.

In order to gratify his passion for eccentricity Sukhotin spent nearly three months last autumn sailing short cruises in the Black Sea in order that his lady sailors might study navigation and become proficient seamen.

Shortly before the vessel sailed M. Mohrenheim, a well-known Russian journalist, visited the schooner and, in the "Viedomosti," described his experiences as follows:

"The decks are kept spick and span by pretty lady sailors, attired in tasteful and suitable costumes of dark blue serge. They are as neat as a pin, and though the yacht was pitching heavily in the rough sea. One was polishing the brass-work of a binnacle with delf hands."

Below deck the yacht is a miracle of comfort. I expected to see a formal and dirty fore-cabin, but instead I found a splendidly lighted room, fitted with luxurious bunks, spotlessly clean and dainty.

I interviewed one of the lady sailors, whom I found smoking a cigarette in the captain's stateroom. She received, she informed me, excellent pay, and did not see why women should not become sailors. "The duties are no more exacting than house work," she explained.

She hinted that such attractive ladies and skilful seamen would be likely to find husbands before the cruise was over, but she replied with a pout, "Not on this yacht! What are three men among so many?"

A Perfume That Smells.
The perfume took from his desk a small flask of copper.

"In flasks like this attar of roses comes to us," he said. "Attar of roses is the most costly perfume in the world, and the most difficult to come by. It is empty now, but in it a little odor still lingers."

The visitor smiled delightedly. He had never smelt perfume so good as this. He had never smelt perfume so good as this. He had never smelt perfume so good as this.

But only for an instant. Then he threw back his head and twisting his features into a grimace of disgust, he explained:

"Garbage! Bone yards! Glue factories! All essential oils smell like that," he said. "Yet so good perfume can be made without them."

He took from a shelf a cut glass jar filled with a thick, yellowish oil that looked like petroleum partly refined.

"Win this," he said, "there are forty ounces of pure attar of roses worth over \$500. You know how the attar smells alone. Now watch me make a rich perfume by adding things to it."

He put a few drops of the attar into a phial. He filled the phial with spirits of wine. He added a drop of the extract of musk, another of orris, then one of neroli, one of vanilla, and finally a bit of cloves and bergamot.

"There," he said, "Smell that. Isn't it exquisite?"

"Exquisite!" said the visitor. "Well, without its foundation upon the malodorous small attar of roses it wouldn't smell any better than a plate of soup."

Water and Varnish.
Varnished surfaces exposed to wet turn white because the moisture is forced into the composition of the coating, and through its fine division reflects the light, precisely as does foam.

The varnish is broken up into layers and regains its transparency only when the water has been driven out through the application of oil.

This action of the water upon the varnish is almost precisely similar to the result gained in color photography when a sensitive emulsion is broken into layers of different densities and so reflects various colors. In the case of the varnish the action is almost uniform, and the result is a bluish white reflection.

Natural Soap.
Nicaragua boasts a lake so strongly impregnated with bicarbonate of potash and soda that when rubbed into a natural soap is formed. Not only is the water used as a wash-pot, but the addition of some grease to the hands enables one to dispense with soap entirely.

The diluted water is said to possess medicinal properties, but no effort has been made to build up a trade, the exports last year being four demijohns sent to Guatemala.

Pandora Savings

Because the Pandora range utilizes all the heat in the fuel it does the work quicker and better. If a range sends half its heat up the chimney it must burn more fuel to do a given work. It takes longer to burn a large piece of wood or chunk of coal than a small one, also it takes a longer purse to pay for the large stick of wood or big chunk of coal.

The quicker you can get the necessary units of heat to boil the kettle or cook the roast, the quicker your work is done and the less it costs to do it.

Because of the scientific construction of the Pandora range it gets more units of heat from a given quantity of fuel than any other range. It keeps all the heat in the range where the work is to be done.

For these reasons the Pandora range lightens the labor of cooking, eases the drudgery of kitchen work; it helps to make life easier; it gives more leisure because it saves time; it saves worry because it is absolutely reliable, and thus it saves the nerves; it saves the muscles because it is so easy to handle; it requires less attention than any other range; it does its work uniformly; it is an A-1 range in every particular; it is an economical and a handsome range.

It makes kitchen work easy.

H. MACAULAY, SOLE AGENT, CHATHAM.

District Doings

LOVER CENTRE.

Ed. Benson spent the day in the City of the Straits.

Mr. and Mrs. Turill are spending the week with friends in Aylmer.

Matthew Pinkin and daughter, Mrs. Gray Hodges, are spending this week in Toronto.

Wm. Moore, Park St., is spending the week at the lighthouse.

GUIDES.

James Vickery is spending a few days in Toronto.

H. Rankin left for Toronto and other eastern points in the interests of the Wm. Gray & Sons Co., Ltd.

Mr. and Mrs. Norman Cumming were the guests of her mother, Mr. Highgate, for a few days last week.

Miss Mildred Adams, who has been attending college at Chicago and spent her holidays here, returned to her home in Toledo last Tuesday.

The neighborhood picnic was held Friday at the park, all enjoying the outing immensely.

Mr. and Mrs. George Cumming and their daughter, of Ridgeway, spent Sunday in the village.

Will Boyd, of Charing Cross, was the guest of his uncle, Mr. Andrew Dodd, on Sunday.

Miss Beulah Lammman returned on Sunday, after spending a week with her cousin, Mrs. Geo. Cumming, of Ridgeway.

Mr. and Mrs. Robt. Mitton have returned from Toronto Fair.

ZONE CENTRE.

Timney Bros. have almost completed the threshing here.

Richard Smith, of Wallacetown, visited friends here last week.

Wm. Craik, of Chatham, and wife, of Ridgeway, spent Sunday with Mrs. John Timney.

A very sad accident occurred here last week. While David Bebenese and Charles Gansmy were unloading corn on which they were letting them down on broke and the pipe fell on David, breaking one leg and dislocating the hip of the other.

Under the care of Dr. A. D. Graham, Bothwell, and is doing nicely. We all wish him a speedy recovery.

Miss Abbie May Greene, of Bothwell, spent last week at Chas. Eberle's.

Geo. H. Lidster and Master Roy spent Sunday at Chatham.

Rev. Mr. Ashton and wife, of Bothwell, made some pastoral calls here last week.

Married on Wednesday, Aug. 31st, Mr. Walter Rush, of Zone, to Miss Mingle Randall, Bothwell.

Kensil Trotter, of Bothwell, visited friends here recently.

Messrs. L. and Stanley and Miss F. Richardson visited friends here last week.

DOYLES.

Thomas Brown had a very successful barn raising last week.

A number of young people from here spent Tuesday evening at the home of J. Carley. An enjoyable time was spent by all.

F. King, of Niagara Falls, was the guest of Jos. Doyle on Sunday.

Miss Mary Waddick gave a small musical evening on Thursday for Miss Marie Clowery, of St. Thomas, who is visiting here.

Miss Mary E. Doyle is spending a short vacation at her home here.

His many friends will regret to learn that Michael Carley intends taking up his permanent residence in Brampton, Ont.

James Dufon, of Corda, returned, as visiting with friends and relatives at Charing Cross.

A number from here attended the Arnold picnic.

John Carley, formerly of Leamington, visited Albert Gregory Thursday last.

Henry Masterson, of Harwich, was the guest of James M. Doyle last Sunday.

Fall Styles

Our Fall Woolens are winners for us, and they'll be winners for you.

Let Us Measure You

Now Before the

Rush.

and after taking ample time to make your clothes in the best possible manner, every garment is made in the building by masters of the trade; who take pride in turning out good clothes.

Ives' Metal Beds
Are Strong and Rigid.

A good brass bed should be handsome in design, rigid, strong, and Ives' brass beds are made in the best equipped metal works in Canada. The joints in their Brass and Iron Beds are made by the very best methods. They are strong, the bed is rigid. It will last a lifetime and the longer you have an Ives' Bed the better you will like it.

Ask your furniture dealer to show you an Ives Metal Bed.

THE H. R. IVES CO., LIMITED, MONTREAL.

C. P. R. Abandons One Claim.
Port Arthur, Sept. 8.—The Railway Commission has today abandoned one of the claims of the C. P. R. against the Government. The claim was for the right to use the land between the C. P. R. tracks and the shore of the harbor. The claim was abandoned because the Government had decided to build a new harbor and the land was to be used for other purposes.

Beauty and Attraction.
Attraction and beauty are two very different things. Who has not seen the ugliest looking woman come off a very poor second best to the plain, fascinating one? Of course, the plain woman has the advantage of being able to do with the least of fuss and make-up, but it has also many other minor ingredients, powerful among them being femininity, which is in itself a complexity, a subtle perfume, a delicate color, and a hundred and one other things going to make up its alluring charm and refinement.

Will Cure You First THEN YOU PAY ME
The physician who has not sufficient confidence in his ability to cure his patients first, and receive his fee afterwards, is not the man to cure you. My adopted plan of a cure for treatment is to cure you first, and then you pay me. I have cured many cases of skin diseases, and I am confident that I can cure you. I have cured many cases of skin diseases, and I am confident that I can cure you.

PHYSICAL DEBILITY
The latest method of treatment is a heaven-sent boon to nervous sufferers. There are scores and hundreds of persons suffering from severe nervous disease, and it is a relief to know that there is a cure. The latest method of treatment is a heaven-sent boon to nervous sufferers. There are scores and hundreds of persons suffering from severe nervous disease, and it is a relief to know that there is a cure.

I Cure Nervous Debility, Varicose, Stricture, Early Decay and Waste of Power, All Nervous, Chronic, Blood and Skin Diseases.
X RAY EXAMINATION, ADVICE AND CONSULTATION FREE

HOME TREATMENT
If you are in or near the city you should apply for treatment. If you live far away, write me a full history of your case. You will receive a careful and conscientious and painstaking attention. As men in different parts of Canada and Mexico, as well as in the United States, are being cured by my system of home treatment. All physicians in claiming that it is the most perfect and successful system ever devised. All physicians in claiming that it is the most perfect and successful system ever devised.

DR. GOLDBERG, 208 Woodward Ave., Suite 411, Detroit, Mich.

Imperial Oxford Range
This is only one of the exclusive points of the Imperial Oxford Range, which make it last long and reduce the necessity and expense of repairs. Though the baking and roasting qualities of the oven are the most vitally important features of the Imperial Oxford Range, we have forgotten nothing that will make it last long and add to the ease of its operation.

Imperial Oxford Range
The life of the fresh box is so prolonged, as they do not require to be moved to repair the grate.

Imperial Oxford Range
The life of the fresh box is so prolonged, as they do not require to be moved to repair the grate.

ICED BEVERAGES.

Liquid Refreshment For Suffering
When the thermometer registers 90 degrees in the shade, the thoughts naturally turn to iced beverages, frozen foods and all of the nice unwholesome concoctions for which culinary skill is responsible, and, in spite of having been so often forewarned of the evil intentions of the virulent bacteria lying in wait in common ice for their victims, we still allow self-indulgence to win the day as we revel in these same injurious dishes with a reckless disregard of the aftermath. "Moderation in all things" bears an especial significance when applied to iced compounds, remarks a Table Talk writer in prefaces to the following recipes:

Fruit Effervescent Drinks.
To make the fruit effervescent drink, take one pint of the extracted juice of any kind of fruit, filter until clear, add to this two pounds of loaf sugar, one and one-half ounces of powdered tartaric acid. Boil six or eight minutes, bottle and cork. To a glass three parts full of water allow two tablespoonfuls of the sirup and twenty grains of bicarbonate of soda.

Egg Lemonade.
Make a thin sirup by boiling one and one-half pounds of water with two cups of sugar. Add the grated rind of one lemon and juice of two. Just before serving whip lightly in two eggs beaten separately and a small amount of bicarbonate of soda. Serve while foaming.

Spiced Beer.
Dissolve five pounds of loaf sugar in five gallons of water; to this add the juice of three lemons, three ounces of the essence of spruce and one cupful of yeast. Allow this to ferment in a warm place. Strain and bottle.

Tender.
Take one quart of strong tea, freshly made, add the grated rind of one orange, the juice of two lemons and one small cupful of sugar. Strain and add slices of oranges and pineapple or a few whole berries. Just before serving, turn in a bottle of soda water.

Red Coffee With Fruit Flavor.
Dissolve two cupfuls of sugar in one quart of strong hot coffee. When cold, add one tablespoonful each of whipped cream and fruit flavor to a small cupful of coffee, or serve in glasses on cracked ice.

Canning Beans.
When it is possible, it is desirable to can the late crop of string beans, as it is more difficult to keep canned vegetables through dog days than through all the rest of the season. The string beans that are canned from the late crop of October are almost sure to keep, but those put up earlier may be a failure. Select the tender "runner" beans. Remove the strings, wash them well, throw them into boiling water and let them boil up once; fill glass cans with the scalded beans. Cover them with boiling water to which a cup of salt has been added for every gallon. Seal the cans up, leaving a vent open for air. Where ordinary jars are used, leave off the rubbers and simply screw on the covers. Place the jars containing the beans in a large boiler or a rack and let the water boil around them for one hour; then close the vent or, in case of the common jar, put on the rubbers. Fill up all of the jars with boiling salted water, and close them or screw on the tops as tight as possible. Some housekeepers as an extra precaution tie a square of cotton batting over the top of each jar.

How to Use Sour Cream.
Sour cream may be used in any recipe for cake or breakfast breads in which sweet milk, baking powder and shortening are required. The same quantity of cream is taken as when milk is called for, but the quantity of shortening is reduced and the baking powder is replaced by baking soda. The amount necessary of the last ingredient is in direct proportion to the quantity and acidity of the cream, the usual rule being one teaspoonful (level) of soda to one pint of thick sour cream. Soda is usually dissolved in a small teaspoonful of boiling water, added to the cream, stirred until the latter is foamy, then turned at once into the dry mixture. If the cream is well soured, the ingredients rapidly mixed and the oven properly heated the result will be very satisfactory, concluding a cooking expert.

In Days of Heat.
To cool a room, wet a cloth, suspend it, ventilate freely, and there will be an appreciable sensation of refreshment. Use a sheet in a large room.

How to Make a Jelly Bag.
My very own jelly bag saves burned fingers and wasted fruit juice. It hangs satisfactorily and drips from the middle lower point; it lasts longer, and the seams will not burst at the crucial moment if directions are followed. Cut four pieces of one-third wool flannel like the accompanying Fig. 1. Stitch these four pieces to-

First Wheat in Winnipeg.
Winnipeg, Sept. 8.—The first wheat harvested yesterday and graded for export was grown on George Lamb's farm north of town. The yield in the district is between 25 and 30 bushels per acre.

Soop Protest Drops.
Toronto, Sept. 8.—The time has expired for the filing of particulars of the soop election. The soop is believed to be further action has been taken.

DADY SCREAMED DAY AND NIGHT

From Pain of Itching Eczema—Unless Hands Were Tied Would Scratch Till Face Was Raw—Mother Could Get No Rest.

FACE NOW CLEAR. CURED BY CUTICURA.

"For over two years my little baby girl suffered with a raw, itching, and painful eczema, the pain causing her to scream day and night, and my wife could get no rest. We tried several doctors, but without success. Unless we kept her hands tied she would scratch until her face was like raw beef. One cake of Cuticura Soap and a box of Cuticura Ointment completely cured her, healing her face without mark or blemish." (signed) W. J. Morgan, Orchard Town, New Lambton, N. S. W., Australia.

AWFUL SUFFERING
Baby's Face Soiled—Cured by Cuticura.

"My baby's face was a mass of sores. The doctor treated it for eczema, but the child was getting worse, the disease eating the flesh away from his nose, and spreading to his body. Neighbors said it was the worst case they had ever seen. His suffering was terrible, and he would scratch and tear away the flesh. One set of Cuticura Remedies cured him, completely healing his face without scar or blemish."—Wm. Criddle, 35 Winchester St., Pentonville Rd., N. London, Eng."

SLEEP FOR BABIES
Rest for Mothers.

Instant relief and refreshing sleep for skin-tormented babies, and rest for tired mothers, in warm baths with Cuticura Soap. The Cuticura Ointment, the great skin cure.

Cuticura Soap, Ointment, and Pills are sold throughout the world. Write to J. C. Cuticura, P.O. Box 1024, St. Paul, Minn., U.S.A., for a free trial of "How to Cure Itchy Humors." Mailed Free.

FINES IN LOTTERY CASE.
Manager Hunt Assessed \$1,000 and Others in Proportion.

Niagara Falls, Ont., Sept. 8.—The lottery raid case came to a summary judgment yesterday morning when the defendants appeared before Police Magistrate Col. Crickshank at 10 o'clock, when the charge was read, that they were all charged with running and abetting a lottery concern contrary to the laws of Canada.

W. M. Gorman, who represented all the defendants, pleaded guilty for each one.

Col. Crickshank inflicted the following fines: William Hunt, manager, \$1,000; Joseph M. Gorman, assistant, \$500; Charles E. M. Gorman, assistant, \$500; assistants, \$100 each; Henry H. Gorman, assistant, \$50; and Henry H. Gorman, assistant, \$50.

The two boys, Lightfoot and Harris, who were employed in turning the wheel, were discharged on suspended sentence.

THEY MADE THIS COUPLE HAPPY

TELEGRAPH ARRANGEMENTS.

Elaborate Though Simple System By Which Peace Moves At Portsmouth, N.H., Keep in Touch With Home.

—correspondent at Portsmouth, N.H., writes:

Complete are the telegraph and cable arrangements which have been made for the distinguished foreigners who are to meet here to try to make peace that, whether they be in the conference room at the Portsmouth Navy Yard or in their quarters in the Wentworth Hotel, they will be in touch on a minute's notice with St. Petersburg and Tokyo and with Oyster Bay and all the capitals of Europe.

The Postal Telegraph Cable Company will transmit Japanese messages to San Francisco by way of New York and then over its own Commercial cable to Manila. At Manila the Eastern extension sends them to Tokyo.

The Postal, too, has wires direct to the hotel and into the rooms of the envoys, a heavy ten wire cable having been stretched from Portsmouth. Cable messages from St. Petersburg sent by this company will be telegraphed to Canada, Nova Scotia, and the cable to Watford, Ireland, thence, by cables and telegraph, they will be forwarded across the Continent.

Western Union messages for St. Petersburg will be sent overland to Heart's Content, N. F., and thence by cable to Valentia, Ireland. By telegraph and cable they will be forwarded to London, where the Eastern Telegraph Company will transmit them across the Continent to the Russian capital.

Messages intended for Tokyo will be sent from Portsmouth to San Francisco, where they will be turned over to the Commercial Pacific Cable Company, which will carry them as far as Manila, via Honolulu, the Midway Islands and Guam. At Manila the Eastern extension takes them and sends them to Nagasaki, whence they are forwarded by telegraph to Tokyo.

Diplomatic Messages.
The exchanging, receiving, recording and transcribing of diplomatic cable messages is a slow process, although the transmission of the messages is done very swiftly. Each country has its special code. The messages, as written out, represent a series of groups of figures. Thus the figure 0257, following a code word, might represent "Nothing doing," or phrase of even greater length. The secretary would first have to make up the desired message into these combinations of five figure groups.

After they have been transmitted to the other side and received by the home Governments another secretary would have to take these groups of figures, and following the key word in the code book, write out the full message.

This, as may be imagined, is a tedious task, and if there is a great deal of communication between the envoys and their Governments the time consumed in sending and receiving messages will materially lengthen the time of the conference.

In addition to the official messages to be sent, elaborate preparations have been made for the sending of press matter to all quarters of the earth. Press correspondents are arriving from Japan and all European countries, not to speak of the small number to represent American newspapers.

Bubbles.
Land rents—earthquake fissures. The ruling passion—a king's anger. The workman who knows his plan generally keeps it.

There are but empty honors for the pitcher who cannot hold his own. Said the salt cellar to the pepper box, "The seasons come and go."

Plain people are never improved by having their heads stuffed. The range of a singer's voice rises with warmth to the registers.

The carpenter's wife may say some fruits, but she can't put 'em in a door. What you know some people like a book you sign for a revised edition.

The circus tumbler may hold quite as much as the base ball pitcher. A girl is likely to be hopping mad if no may-dances attendance upon her.

The photographer needn't be a Mormon to take more than one wife at a time. A clock that is in a heliograph seems to run in the family.

Your eyes may be called "the wind, eyes of the soul," because they're your own lookout. When a toper is a sponge, he isn't satisfied to be soaked in water.

No doubt the organ-grinder is glad when it rains cool. When the greenhorn proposes, he's a sort of a bird—that is a popping. Even the lean man may succumb to a girl with molting eyes.

An owner goes into a picture when she gets into an exquisite new gown. Ships that pass in the night look alike, at least, there's a speaking likeness.

The ownership of a Bible in Tibet.
Is a matter for a universal peace, since the sacred volume consists of 105 volumes of 1,000 pages each, 225 volumes of commentaries absolutely necessary to the understanding of the text, and several hundred volumes of revelations supplementing the Bible proper.

The Bible is printed from wooden blocks engraved by hand, and for the purpose of the printing, a special set of type has been made. Each volume having a house to itself. One tribe of Mongols paid 7,000 oxen for a copy and furnished an escort and a dozen yaks for its safe transportation.

There are smaller volumes, containing the more important passages, which have a more general distribution, and there are few living who have read the entire Bible, even the lesser orders of the priesthood being familiar only with parts.

Pens and Swords.
"For every pound of steel that goes into swords eleven pounds go into pens," said a statistician. "For every sword that is made 100,000 pens are made."

He smiled. "I'm not a statistician," he said. "I'm a swordsman. I know the difference between a sword and a pen."

How Red Rose Tea is Grown

TEA is a native plant of Northern India. Transplanted to Ceylon it lost much of its strength and richness, but gained in fragrance and delicacy. That is why Ceylon tea is not a strong tea.

That is why I blend Indian and Ceylon teas together—that is how the strength and richness, fragrance and delicacy of Red Rose Tea are secured—that is why Red Rose Tea has that "rich, fruity flavor."

Minard's Liniment Relieves Neuralgia.

Now \$5.00 Soon \$5.50 Canadian Marconi

Shares of the Marconi Wireless Telegraph Co., of Canada, can be had for a few days longer at \$5.00 each. The \$5.00 shares are nearly all sold. They will be gone on or before Sept. 27, and after that date none will be sold at less than \$5.50.

If you want to buy now is the time to do so. To delay means to pay 50 cents per share more, perhaps \$1.00, as the number to be sold at \$5.50 is very small. The next block will be put on sale at \$6.00. We expect the price to reach \$7.00 before January 1st. Stockholders will be given the preference in the purchase of shares at \$5.00. Send checks made payable to—

25 Broad Street, New York
50 Congress St., Boston

Fresh Pure Air is Consumption's Deadliest Foe—
Advantage of Prompt Action—Sanitarium
Treatment Desirable

After all that has been spoken and written during the past few years on the prevention and cure of consumption, an amazing amount of ignorance still exists among otherwise intelligent people in regard to the nature of the "great white plague" and the simple means which may be employed to check, if not wholly stop, its devastating course. The writers of these lines have had three years' experience in struggling with the disease, with exceptional opportunities for learning and knowing in a practical way the various lines of treatment now devised for its prevention and cure, including finally a sojourn of some months in one of the best known sanitariums devoted to this purpose. He is now restored to health, and though a layman, feels impelled to give a bit of advice, based on his personal experience, to others who may fall under the shadow of this dread malady.

The first and most important step in the general treatment of tuberculosis is an early recognition of its presence followed by prompt application of the right methods of cure. The popular and widespread idea of a consumptive patient applies in fact to a person who is in the advanced stage of the disease. Unless the victim has become emaciated to a pitiful degree, with such symptoms as a persistent and distressing cough, hectic cheeks, night sweats, and high temperature, he is not thought to be a consumptive in the popular conception of the word, one whose condition calls for, and justifies, radical measures.

More frequent as applied to this disease, may have a strong grip upon a person long before it has manifested itself in such symptoms as those just mentioned, and it is in this earlier period, easily and unmistakably discoverable by any regular physician, that remedial measures should be applied. Thus taken, the disease is undoubtedly curable in the great majority of cases.

ADVANTAGE OF PROMPT ACTION.

The thing to do, therefore, is not to wait until emaciation, night sweats and high fever have set in, but to go as soon as a reasonable suspicion exists (aroused, perhaps, by a persistent cough) that the malady has begun its work to a physician competent to examine and discover from antemortem examination of the sputum, and in other ways whether the suspicion is founded in fact. Too much stress cannot be laid upon securing this early recognition of the disease which may appear while the afflicted person has yet many of the outward appearances of robust health. Delay of a few weeks or even a few days in some cases may mean all the difference between early and complete recovery or a long hopeless fight against the enemy. Be wise in time. The methods of examination to determine the presence of tubercle bacilli are now so common and within the reach of all physicians, that no difficulty need be experienced in arriving at a positive and unmistakable conclusion in regard to the matter.

The presence of the disease being established, the next thing is to take prompt advantage of the curative methods which modern medical science, investigation and practice have proved to be efficacious. While not encroaching here with advice into a field which properly belongs to the

advantages of such treatment as the sanitarium, and the system of the curative agencies of fresh air, good food, etc., under conditions most likely to effect the desired results. Pure air, nutritious food and freedom from overwork may often be found at home, but human nature is such that these things are rarely sought and applied with as much vigor, system and perseverance as they should be, and as they are applied under the rule and regulations of a good sanitarium.

Many people have a prejudice against sanitariums, these institutions being associated in their minds with almshouses and insane asylums. Such prejudices are utterly unfounded; nothing could be further from the truth. Sanitariums for the treatment of tuberculosis are not unlike high-class country hotels in many respects, with the difference that they are run under the direction of medical experts with all the facilities and appliances essential for the treatment of disease. Beyond the observance of certain rules and regulations, obviously essential to the ends in view, life in these institutions is quite as free and open as it would be at home. The mental attitude of the patient, being regarded as a matter of prime importance, everything possible is provided that is conducive to a spirit of hopefulness, contentment and good cheer to the uplift of mind and soul. It is to this end that the most beautiful and inspiring natural surroundings and provided with facilities for amusement, light recreation in many forms, abundance of good reading and opportunities for social and intellectual intercourse. So far from being abodes of gloom and depression, as many people imagine, these institutions are, in fact, as full of light, cheeriness and pleasant companionship as the best regulated homes. The person who can avail himself of the privileges of one of these sanitariums has reason for thankfulness and gratitude.

Wherever the circumstances are such as to render sanitarium treatment or any other oversight impossible, the patient may do much for himself if he will apply the remedial agents we have mentioned, living outdoors as much as possible day and night, in the city or country; sleeping on a fire-escape if necessary, he should eat the most digestible food obtainable and saving every possible ounce of energy to repair the waste of the body. There is hope for him if he does this and nothing more.

The great advantage of these curative agencies of which we have spoken is that they are simple, cheap and easily accessible to most people. There is no mystery about them, and they are not patented. To apply them and receive their benefits, it is necessary only for the sufferer to act with promptness, persistence, a resolute will and according to a systematic plan. Where these elements are lacking in the treatment, the most expert physician can do but little; the patient must necessarily act largely for himself if he would be cured. As a leading authority on this disease once remarked to us, "Unless a patient has brains and uses them, there is little hope for him. Force of character and strength of will, combined with the exercise of common sense are essential factors in every case." The treatment should be followed, of course, under the guidance of a physician, and preferably of one who has made a specialty of tubercular diseases.

SANITARIUM TREATMENT DESIRABLE.

The probabilities for an early and permanent recovery from tuberculosis will be greatly enhanced if the patient will put himself as soon as possible under the treatment of one of the regular sanitariums maintained for this purpose. Among the chief

advantages of such treatment as the sanitarium, and the system of the curative agencies of fresh air, good food, etc., under conditions most likely to effect the desired results. Pure air, nutritious food and freedom from overwork may often be found at home, but human nature is such that these things are rarely sought and applied with as much vigor, system and perseverance as they should be, and as they are applied under the rule and regulations of a good sanitarium.

Many people have a prejudice against sanitariums, these institutions being associated in their minds with almshouses and insane asylums. There is hope for him if he does this and nothing more.

NATURAL REMEDIES:

Some Gifts of Nature.

Strange how often Nature provides an appropriate remedy for a local ailment. The taste buds of the willow tree, which grow in damp and rheumatic places, gives Salicine, the great cure for acute rheumatism. Quinine, which is the cure for Ague, is made from Peruvian Bark, which tree thrives in swampy, malarial districts. Again, fruit flourishes in hot climates where liver, kidney and skin diseases abound—and he who lives in a hot climate and abstains from eating fruit will die—generally from liver disease. Why? Because fruit acts on the bowels and makes them move, acts on the liver and causes more bile to flow—which is the natural purgative acts on the kidneys, and makes them excrete more urine, acts on the skin and increases the action of the skin in throwing off impurities. Fruit purifies the blood by increasing the action of the bowels, skin and kidneys. One has to eat a lot of fruit to get the full benefit. A physician in Ottawa has discovered a method of combining the juices of apples, oranges, pines and figs and then forcing an additional atom of bitter from the orange peels into the united juices—and this makes a stronger fruit material—many times stronger than ordinary fruit. The fruit laxative exactly made into tablets, and under the name of "Fruit-Lives" or "Fruit Liver Tablets." These tablets are a natural remedy for Constipation, Biliousness, Sick Headache, Kidney, Liver and Skin diseases and all blood impurities. 50c a box, 3 boxes \$2.50 or sent on order of price by Fruit-Lives Limited, Ottawa.

Sunday with Miss Luella St. Amour. A. Currier and son Harold were guests at Merry Times over Sunday. Mr. and Mrs. W. Crow, Miss B. St. Amour and Mr. Myers, of Chatham, spent Sunday with Currier.

Dr. Johnson, of Detroit, spent a few days last week with his brother, W. A. Johnson.

A RALEIGH RAMBLE

Reader, do you know what St. Joseph's bells say to us every morning at six a. m.? Strokes, one, two, three, in the name of the Father; one, two, three, and of the Son; one, two, three, and of the Holy Ghost; then they peal Amen, Hallelujah. To me it never speaks so plain as these fine bright summer Sunday mornings, and I want its chimes to rouse me in time for knee drill, but last Sunday I did not hear them but awoke with a start, raised the blind, it was 6.30, no time to lose, dressed quickly and started for the barracks; on my way had the pleasure of a happy greeting with a dear old Raleigh neighbor and friend of 56 years ago, Mrs. James O. N. of the 9th concession—then called in on the Holy 9th—who was on her way to her church. I arrived at the barracks as the adjutant was entering; he presided and we enjoyed an hour together, often the best hour in a whole week. Our breakfast was just over when the clanging of the fire bells and the gongs told us a fire was on, a corner grocery store on West street going up in smoke; what a crowd at the call of the fire bells at this early hour. I heard bells were only as successful to rouse us to act so that the fires of sin might be quenched by the water of life.

Having been invited to assist the Rev. Isaac Smith, born in slavery 64 years ago in Virginia, now the pastor of the North Buxton Baptist church, who for several Sabbaths has conducted good meetings on the corner of the 8th concession and the Drake road, I mounted the wheel at 10 and reached the station at 11 in time to unite with the Salvationists in their open air service on Queen street. Wheeling through the dust I soon reached the hospitable home of Mr. Thomas Brown on the 8th, sat down beside my friend Mrs. Charles Black in her 91st year, and pretty bright and cheery, to that over old times back in the forties, and the bright new times to come are long in the Palace of the King. Mr. Brown has had a busy season, he visited Mr. and Mrs. Robert Bennett, who not long ago moved into the Aldis homestead, and are well pleased with their new surroundings. What memories as standing in the very room where the late Archbishop died nearly 60 years ago—these student from Old Trinity College, Dublin—conducted an edifying service on Sunday afternoon to a house filled with genuine bushwhackers the Aldis home was open to everything that was good. Next visit to Mr. Edwin Hea on the beautiful farm lately purchased from Mr. Camerop, he retiring to enjoy his remaining years in our city; finding his aged mother, Mrs. James Hea, had returned to the General Hospital in helplessness for further treatment, my visit was a short one, as I wished to attend the opening services of Wesley church Sunday school. I found about 50 gathered in the basement; everything was bright and up-to-date. Mr. George Tow, superintendent, and a staff of excellent assistants are to be congratulated. Rev. Mr. Salton, who has this church in his charge, would meet the congregation at 2.30. From all I could learn God has given him the hearts of this people as well as the cause of Charing Cross. Called next for a short visit on Mr. and Mrs. James Rhodes, he has been suffering with a paralyzed arm but is recovering. A dear little grand-daughter entered was climbing all over him and both were full of life, while the good wife looked on with pleasure, in which I joined her. After kneeling together in prayer I pushed on. The road had been newly graded and a strong head wind made it hard wheeling; reached the grove and had ten minutes to catch my breath ere Mr. Smith announced the opening hymn, which we sang with the usual slow statelyness,

very opposite of Army energy. As all birds have their various and peculiar melodies, and no doubt each feathered tribe thinks their notes the sweetest and best, so with our congregational songsters. Outward expression may vary widely, but heart-felt praise glorifies God and is always accepted of Him through Jesus Christ our Lord. These open air services have been largely attended, and the best of order and attention has prevailed. Mr. Smith is doing a good work for the Master. We wish him God speed. I left the grove as its friendly faced crowd ere the service was quite concluded and could hear as I wheeled away the fine voices of their choir making the woods ring and growing fainter and softer in the distance. Closed the day as usual listening to an excellent sermon from our pastor on "The double minded man," James 1:8 and 4:8.

Little things console us, because little things afflict us.

Personal.—Men should know that the only perfect and safe Vacuum Appliance is manufactured and controlled by the Erie Medical Co., 94 Mohawk St., Buffalo, N. Y. who administer in connection with its interior and exterior remedies, having a world-wide reputation for weak men. Write to-day for sealed circulars and proofs.

The two offices of memory are collection and distribution.

When a horse picks up a nail in his foot what does the driver do? Does he whip the limping, lagging animal and force him along? Not unless he wants to ruin the horse. At the first sign of lameness he jumps down, examines the foot and carefully removes the cause of the lameness. What is called "weak stomach" is like the lameness of the horse, only to be cured by removing the cause of the trouble. If you examine the stomach with "whiskey medicines" you keep it going, but every day the condition is growing worse. A few doses sometimes of Dr. Pierce's Golden Medical Discovery will put the disordered stomach and its allied organs of digestion and nutrition in perfect condition. Ninety-eight times in every hundred "Golden Medical Discovery" will cure the worst ailments originating in diseases of the stomach. It always helps. It almost always cures. To cure constipation use Dr. Pierce's Pleasant Pellets. They're sure.

A small door may lead to a large room.

LOST, STRAYED OR STOLEN.

HORSE ASTRAY.—Strayed or stolen from 3rd Con., Dover, on Monday night, a small brown mare with a light-colored nose and small star in forehead. A reward will be given for any information that will lead to her recovery. To cure constipation use Dr. Pierce's Pleasant Pellets. They're sure.

WANTED.—Washing or work by the day. Apply to Princess street, second door the B. M. E. church.

GIRL WANTED.—Must be a good plain cook. Apply Mrs. W. G. Richards, Wellington St. W.

TEACHER WANTED.—For S. S. No. 12, Dover, until Jan. 1st, 1906. Desires no remuneration. State salary and experience. Address Geo. Davidson, C. Sec., Chatham.

A CHRISTIAN MAN wanted in unoccupied territory to sell full line of articles for daily consumption to "consumers" at wholesale prices. Cooper, Drawer 531, London.

FARM FOR SALE.—75 acres of best land in Hawke's Bay, with 1000 buildings and all kinds of fruit, 3 1/2 miles from Chatham; also several small farms from ten acres and upwards, all on easy terms. Apply to N. McGavin, Chatham, or to McGavin's Stables.

"Hecla" Furnaces

Burn Hard and Soft Coal,
Coke and Wood.

It's the unexpected that always happens. If there is another "coal famine," you will be alright with a HECLA FURNACE. Every HECLA FURNACE has a special WOOD GRATE. It is put in place through the fire door—rests on top of the bar grate—makes the most effective wood and soft coal grate ever designed.

With this grate, a special appliance may be supplied which burns soft coal with a minimum amount of smoke and soot, making the HECLA a soft coal burner of the highest efficiency.

HECLA FIRE DOORS are big enough to admit large chunks of wood. And the smoke outlet is above the highest part of the door. Even when you open the door to add fuel, no smoke comes out. It all goes up the chimney.

HECLA FURNACES have dozens of just such conveniences—such helps—such improvements—over the ordinary furnaces.

Stalling a HECLA FURNACE in your home. Anyway, write for the HECLA Catalogue.

18 VILLAGES WRECKED

370 People Killed by Earthquake
in Calabria, Italy.

A Great Number Injured and Property Losses May Not Yet Be Estimated—All Italy Depressed Over the Visitation—Scenes of Terror Indescribable When the Shock, Which Lasted 18 Seconds, Came.

Rome, Sept. 9.—All Italy is suffering from terrible depression because of the news from the south, where one of the worst earthquakes ever experienced occurred yesterday. Although the earthquake was felt all over Calabria, and to a certain extent in Sicily, the worst news was from Pizzo and Monteleone, and from eighteen villages which are said to have been completely destroyed. According to the latest news received, 370 persons broke without a repetition of the earthquake the crowd gradually melted away until by 8 o'clock the streets had almost assumed their normal appearance, except in the ruined villages where the inhabitants were homeless. The general confusion was added to by dreadful cries from the jails, where the prisoners were beside themselves with fright, and in some cases mutilated, but fortunately all were kept within bounds.

Troops to the Rescue.

Troops, engineers and doctors have been hurried to the scenes of disaster to assist in the work of rescue and salvage. The Ministry of the Interior sent \$4,000 for the relief of the destitute, and Minister of Public Works Farinetti left for Calabria yesterday evening.

Some Harrowing Details.

Cantanzaro, Calabria, Italy, Sept. 9.—A violent earthquake at 2:55 o'clock yesterday morning caused serious loss of life and widespread destruction in Calabria.

The towns of Pizzo, Monteleone di Calabria and Maritimo were almost entirely destroyed. At Monteleone di Calabria the walls of the town were killed outright, and many were injured by the collapse of the prison there. The Pizzo district is said to be almost entirely destroyed.

Locally the shocks lasted eighteen seconds. The walls of the hospital here collapsed, and some of the patients were injured. The inhabitants of this city fled panic-stricken from their houses.

It was hoped that the district of Nicastro had escaped, but that also has been seriously affected.

At Martirano all the buildings have collapsed, including the barracks of the gendarmes. Six wounded men have thus far been taken from the ruins. There are other victims.

One Hundred Killed.

At Stemaconi all the houses have fallen, and it is estimated that a hundred people were killed.

The villages of Joppo and Triparsi are also destroyed.

Troops are helping in the work of salvage.

At Piscopia all the houses were destroyed, and fifty people lost their lives.

At San Gregorio, according to the estimates, 65 people lost their lives.

The village of Zammaro is destroyed entirely.

At Mileto 11 are dead and 200 are injured.

At Cessaniti almost all the houses are destroyed. The number of dead and wounded is not known.

The village of Bratice, Sanfo, Sanfo and Sanfo are completely destroyed. The number of victims in these places exceeds fifty.

At Spilanga one person was killed.

At Sanio Nobilio there are numerous victims.

Almost all the houses in these places, which have not already collapsed, threaten to fall in ruins.

The earthquake caused serious damage to houses in San Floro, where one person was killed.

At Sanio Nobilio there are numerous victims.

At Joppo ten persons were killed and a hundred wounded.

At Daffina buildings were damaged and many persons were killed or wounded.

At Borgia two persons were killed and twelve were wounded. Many houses collapsed.

At Olivada five persons were killed and many wounded.

At Nicastro and Cortali there was much damage to property and many persons were wounded.

At Filadelfia two persons were killed and there were heavy property losses.

At Nalida one person was killed and thirty wounded, and property suffered severely.

2,200 Homeless.

At Martirano there were many victims. Out of a population of 3,000, 2,200 are without shelter.

At Sarrastratta the houses suffered considerably.

Fled to the Fields.

Reggio, Calabria, Italy, Sept. 9.—A violent earthquake shock was felt here at 2:44 a. m. yesterday. The population fled to the fields.

Felt in Sicily.

Messina, Sicily, Sept. 9.—An earthquake shock at 2:43 yesterday morning caused great excitement. The population fled from their houses. The amount of damage done has not been determined. There was no loss of life.

Cardinal Dies.

Rome, Sept. 9.—Cardinal Raphael Pierotti is dead. He was born in Italy in 1836.

ARM BLOWN AWAY.

Wm. Kirby and Four Others Seriously Hurt in Premature Cannon Explosion at the Exhibition.

Toronto, Sept. 9.—With the sight of twenty thousand people in the grand stand and on the lawn at the exhibition grounds last night, there was a premature explosion of a cannon during the mimic attack of the Japanese upon the Russians in Port Arthur, which, though it has so far cost no life, has shattered the arms of one man, perhaps blinded another, and has caused permanent disfigurement to three or four others. The accident was plainly witnessed by the audience occupying the grand stand, and an impatient panic was subdued by the coolness of one or two who saw the seriousness of it; said it was only part of the show and they then sought surgeons, finding Drs. J. O. Orr, McCleary, and A. J. Lloyd, who were soon in the vicinity of the accident, and did everything possible in the way of first aid. The men were then taken to the Emergency Hospital on Bay street.

The Injured.

William Kirby, 737 Dufferin street, arm blown away, face cut, filled with powder, eyes injured; will save sight.

Herbert Boyce, 35 Nassau street, one finger blown off, hand smashed, face and eyes injured; sight will be saved.

Fred. Olson, 85 Hamilton street, hands, face and eyes injured.

Victor Boyce, 35 Nassau street, hands, face and eyes injured.

Frank Loughhead, 10 Peel avenue, hands, face and eyes injured.

One man attended at Emergency Hospital on grounds for injuries similar to last three. All are young men employed in the theatrical production of the Fall of Port Arthur.

BODY STREWN FOR A MILE.

Farmer Walking on Grand Trunk Track Cut to Pieces.

Goldstone, Sept. 9.—A fatality occurred here on Wednesday night, which was not discovered until Thursday, when the remains of James Cannon, a well-to-do farmer, residing two miles from here, were found strewn along the track of the Grand Trunk Railway.

The body was found in a pile of wreckage, with the mutilated trunk was found only one arm; the other limbs and the head were a half mile or more away, in opposite directions. The man's watch and coat were found not far from the trunk, and afforded a good means of identification. Cannon left the Goldstone Hotel at 10 o'clock on Wednesday night, and proceeded homeward, as usual, along the track. He was struck by a special train which passed northward shortly after midnight.

JAMES LOVELL INJURED.

Thrown From Street Car, Receives a Fractured Skull.

Toronto, Sept. 9.—While homeward bound on a Bathurst street car on Thursday evening, James Lovell of the legal firm of Blake, Lash & Cassella was thrown to the pavement by the sudden jerk of the car. His injuries were a fractured skull, causing a slight concussion of the brain, a broken collar-bone and possible internal injuries. He was picked up and carried to the Western Hospital. The doctor attending the injured man says that he is progressing favorably, and unless complications set in he has a fair chance of recovery.

Trying to Save, Is Electrocuted.

Detroit, Sept. 9.—Alexander H. Howie, treasurer and manager of the Howie Roofing Co. of this city, was instantly killed at Algonquin. He was superintending the roofing of the Rapid Railway "electric" freight house. Frank LeBow, one of his employees, accidentally came in contact with a live wire running over the building and attempted to pull LeBow away, but himself received the full current and was killed. Howie was a Canadian, and with a brother in Bradford and two sisters in Paris, Ont.

Crushed Under Thresher.

Lucknow, Sept. 9.—A fatal accident occurred Thursday night about three miles from Lucknow, where Nell McKenzie of the 4th King's Own Rifles, lost his life. He was driving a threshing engine, and from some cause unknown fell, and the front wheel passed over his breast. He was so badly crushed that he died in a few minutes.

Railways to Combine.

London, Sept. 9.—(C.A.P.)—Rumors are current in London that the C. P. R. and G. T. R. are discussing a scheme for the purchase of a big combination with a view to land development and immigration. Coming on top of the reported meeting of the C. P. R. directors in Winnipeg, the rumor is gaining considerable credence.

Two Men Cremated.

Lancaster, Pa., Sept. 9.—Jas. Lynch and Joseph Torosa were burned to death early yesterday at Safe Harbor, Pa., and four others were injured by jumping from upper windows of a boarding house. Twenty-three men were sleeping in the building, a three-story frame structure.

His Life For His Children.

New York, Sept. 9.—While trying to save his two children, a son and a daughter, both under 10 years of age, from a fire in a crowded tenement building, in east 71st street early yesterday, Antonio Coletto and both children were suffocated by smoke.

Boat Hand Injured.

Belleville, Sept. 9.—Louis Lemieux, fireman on the R. & O. steamer Hamilton, was fatally injured by being struck on the head by a crank. He was brought to the hospital. His injuries are not fatal.

Engineer Killed; Brakeman Hurt.

Grand Rapids, Mich., Sept. 9.—Engineer Neudsen was killed and brakeman Herman Hans and Trout were fatally injured in a wreck on the Pere Marquette, near Zealand, early yesterday.

Choked by Apple.

Kingston, Sept. 9.—A child of C. Hill of Stratheona, Ont., aged two years, choked to death while eating an apple. A physician did all in his power to save the lad.

PROVINCIAL APPOINTMENTS.

Dr. D. Clarke's Resignation Accepted and Appointment Made of Successor to the Toronto Asylum.

Toronto, Sept. 9.—The following Provincial appointments are officially announced:—

Dr. C. K. Clarke of Rockwood Asylum, Kingston, to be Superintendent of the Toronto Asylum, vice Dr. D. Clarke, resigned.

Dr. Ed. Ryan of Rockwood Asylum, to be Medical Superintendent of the same.

Dr. Charles E. Hickey of Morrisburg, to be Medical Superintendent of Cobourg Asylum, vice Dr. E. McNicholl, removed in the interest of the public service.

Dr. John Williams of Lisle, to be Medical Superintendent of the Asylum for Epileptics at Woodstock.

Mr. M. J. Doyle, to be Bursar of Cobourg Asylum.

Mr. S. A. Armstrong, barrister, of Sarnia, to be an Inspector of Prisons and Public Charities, vice Mr. Robert Christie. The latter, who has occupied the position for twenty-three years, is resigning at his own request.

Mr. E. R. Rogers of Toronto Junction, a merchant and chairman of the Board of License Commissioners of West York, to be an Inspector of Prisons and Public Charities, vice Mr. Jas. Noxon, who is resigning at his own request. Mr. Noxon has been thirteen years in the service.

R. E. LE SUEUR NOMINATED.

Will Contest West Riding of Lambton Against F. F. Pardee.

Sarnia, Sept. 9.—By a vote of 84 to 20 the Conservatives of the west riding of Lambton yesterday decided to place R. E. Le Sueur in the field in opposition to the Liberal candidate, F. F. Pardee, for the House of Commons.

Two went to the convention, J. R. Logan and R. E. Le Sueur and Mr. Logan accepted defeat, gracefully by moving that the nomination be made unanimous. Eighty-eight delegates voted for a contest and 27 against. The choice between a fight and no fight being decided, the rest was easy. Mr. Le Sueur carrying the convention by a large majority.

Hon. Mr. Hanna declared, amid ringing cheers, that he would do everything in his power to secure the election of the candidate of the convention.

In accepting the honor, Mr. Le Sueur said if elected he would place no resolution on the order paper to reduce the sessional indemnity to at least \$15,000.

A resolution was adopted expressing sympathy with the widow and family of the late representative, Dr. Johnstone. These resolutions were also passed.

Mr. Borden Endorsed.

Moved by D. N. Sinclair, seconded by A. J. Johnston, that this convention of the Liberal Conservative party of West Lambton desires to announce its warm appreciation of the policy of the leader of the party in the Dominion, R. L. Borden, and also desires to express its gratification with the splendid record made by the Government of Hon. Mr. Whitney since its formation, and to congratulate Mr. Whitney and his colleagues upon the success which has attended their efforts to introduce honest and business-like methods in the Government of the Province.

Moved by W. H. Price, seconded by D. N. Sinclair, that this convention desires to express its strong disapproval of the extravagance, recklessness in expenditure, non-fulfillment of election promises, together with the unjustifiable increase of salary and pensioning of ex-Ministers for which the Liberal Government of Canada is responsible.

West Lambton has been Liberal in federal politics since confederation.

ALBERTA'S FIRST CABINET.

Hon. A. C. Rutherford Announces the Names of His Colleagues.

Edmonton, Sept. 9.—Hon. A. C. Rutherford, Premier of Alberta, has announced his first Cabinet, composed as follows:

Hon. A. C. Rutherford, Provincial Treasurer and Minister of Education.

Hon. A. H. Cushing of Calgary, Minister of Public Works.

Hon. C. W. Cross of Edmonton, Attorney-General.

Hon. W. P. Findlay of Medicine Hat, Minister of Education and Provincial Secretary.

Hon. Dr. George Deneb of Lethbridge.

Mr. Cross was sworn in yesterday morning. Mr. Cushing was expected last evening, and the other members will be here by the last of the week.

It is rumored that the election will be held, at the latest, at the end of October, but many think it cannot be brought on before December.

Lieutenant-Governor Bulyea at present has offices in Alberta Hotel. It is reported that the Parliament chamber and Provincial offices will be in the new Empire block, now nearing completion.

Haultain's Program.

Winnipeg, Sept. 9.—Mr. Haultain started out yesterday for the constituencies of Souris and Cunningham on organization work. He intends to do a speaking tour of the Province. The calling of a convention in Regina to nominate a candidate in support of Haultain's policy is now being arranged.

The Tariff Commission.

Winnipeg, Sept. 9.—Before the tariff commission evidence was given by W. M. Howell; by D. R. Dowdell of the Great West Saddlery Company, who asked for removal of 20 per cent duty on rye straw used in making horse collars; by D. K. Elliott, representing R. V. Whittle Company, who wished to see no change in tariff, and by E. L. Drewry, who wished to see a tax put on American beer, making it equal to the American duty. Imports of American beer were rapidly increasing. The enquiry then adjourned until some time in November.

Woman May Die.

Amherstburg, Sept. 9.—The condition of Mrs. Alfred Horcon, one of the victims of her husband's shooting a month ago, is very unfavorable. Serious complications have set in, and it is feared that she cannot recover.

WE MAKE

Swell Clothes, but we are always careful to keep the "swell" out of the price.

This Fall we intend doing better than ever. Styles will be up to the minute, and materials have been most carefully selected.

We anticipate a showing of Fine Clothing such as has never been made in one store in this district.

Our Young Men's Suits and Overcoats....

will be works of art. We will be ready to show them when you will be ready to look.

Yerba Mate, Paraguay Tea, a Harmless Substitute for Alcoholic Drinks, to Be Tried in This Country.

How Yerba Mate is cured by South American Indians

SO REMARKABLE in many ways is yerba mate tea, made from the leaves and twigs of a South American tree, that its introduction into this country as a substitute for alcoholic stimulants is being considered.

For some time past United States Consuls in Paraguay, the Argentine Republic and Brazil, where this tree flourishes, have, at the request of the government, been gathering and forwarding information regarding yerba mate. These reports have just been made public by the Department of Commerce and Labor.

Exhilarating and strengthening is yerba mate (pronounced mai-tay) tea. It possesses medicinal qualities that arrest the rapid consumption of tissue and do away with the feeling of weariness that follows excessive labor of mind or body.

South Americans prize yerba mate be-

cause it prevents hunger and sustains strength. Laborers frequently take no other breakfast, but toil nearly all day sustained by this beverage alone.

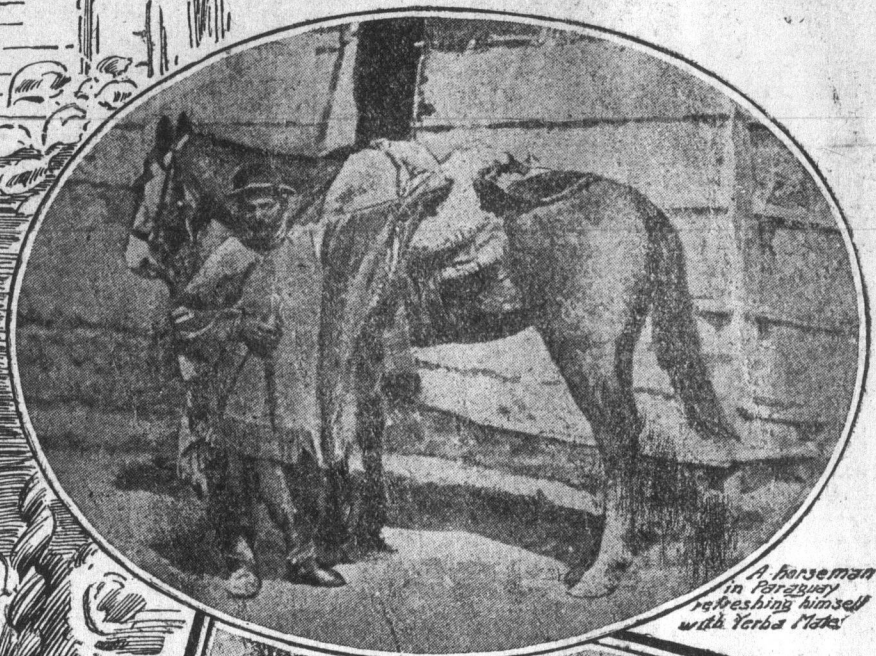

So thoroughly does it meet the demand for stimulating drink that its use is said to have saved South America in a large measure from the curse of drunkenness.

It gives exhilaration of mind and body, with none of the deleterious effects of alcohol. It is said to cure headaches, prevent gout, banish insomnia and the unpleasant effects of a debauch.

With no apparent anxiety to create a world market for this wonderful "Paraguay tea," owners of yerba mate plantations droned along with the primitive methods of years ago and even guard with suspicious jealousy what they regard as the secrets of the business.

Yerba Mate gourd and the bombilla through which the tea is sipped

A horseman in Brazil refreshing himself with Yerba Mate

The Yerba Mate tree

It is fearful to contemplate what the crime and violence would be in a country like Paraguay, where strong rum can be bought for six cents a quart, if the people were deprived of yerba mate," is a statement made by Dr. Eben M. Flagg, an American who has resided for a number of years in South America.

Seemingly, yerba mate is able to provide all the stimulation required by the people of those countries, and apparently it does not do them any harm.

Perhaps it is an acquired taste that longs for this peculiar tea. Perhaps it is the fact that it soothes the nerves while it keeps the body up to the demands made upon it by mental or physical labor that makes it popular.

The native of Paraguay eats his heartiest meal at night and soon retires to rest. The next morning he takes only yerba mate for breakfast, and on that alone labors until nearly noon, doing the most wearying work of the day.

In parts of South America yerba mate constitutes nearly the entire sustenance of field laborers. Women often drink ten or twelve cups in a day, and all authorities agree that it is able to sustain the system during long intervals of labor. It is much cheaper than coffee, selling at 8 or 10 cents a pound.

VALUED BY NATIVES

Paraguay, the Argentine Republic and Brazil produce nearly all the yerba mate consumed, and the excellence of the three varieties ranks with connoisseurs in the order named.

James M. Ayers, United States Consul at Rosario, Argentina, in a report to the government, states that yerba mate is now used by 18,000,000 of persons in that country, Brazil, Chile, Peru, Bolivia and Paraguay, the annual consumption never falling below 55,000 tons.

Not only is it popular in South America as a beverage, a mild stimulant and a sustaining food, all in one; but it is highly valued by the natives as a remedy for certain forms of headache.

They assert that it promotes digestion and banishes dyspepsia; that it is a safeguard against insomnia, prevents gout and is especially beneficial to persons of sedentary habits. It gives activity to the brain—although the peon does not drink it for that reason—and, as indicating perhaps that it was intended by nature for the use of man upon higher planes of modern social life, it pleasantly counteracts the depression following an alcoholic debauch.

Although commonly called a tea, yerba mate is really an herb, or species of holly. The leaf resembles that of the laurel. Sometimes the tree grows to a height of twenty feet, although it is seldom cultivated, and in the wild state averages fifteen or eighteen feet in height.

The management of the yerba mate plantations is primitive. Scarcely any of the yerba mate plantations pay the least bit of attention to improvements of any kind. Traditional methods of gathering and curing the leaves, handed down from past and gone generations, are still followed by the natives.

For many years the harvesting and marketing of these leaves was almost entirely in the hands of Jesuit pioneers. One of the legends of Paraguay and Argentina is to the effect that a curse was invoked on the yerba plant by the Jesuits when they were forced to abandon their rich lands and populous Indian villages in the Misiones country, the principal seat of the industry.

CARING FOR THE TREES

Such a ban did the Jesuits put upon the yerba tree, according to the legend, that any effort to cultivate it since their departure invariably results in failure, the trees being sure to die when any effort is made to do anything with them except to take the crop from them as they grow wild.

Whether due to fear of this legend or not, few attempts have been made to cultivate the yerba tree, and harvesters of its leaves are compelled to make long journeys into the wild country before reaching the yerba forests.

In a report upon the subject, W. F. Walker, United States Vice Consul at Buenos Ayres, states that only the leaves and small twigs are gathered for market. "When the trees are four or five years old the first crop, a small one, may be gathered," he writes. "Care is exercised not to remove more than one-fifth or one-fourth of the leaves on each tree."

At six or seven years of age the crop secured from each plant may be from sixty to eighty pounds of uncurd leaves and branches together. A little more, per-

the tree further matures. Only the leaves and twigs on the sides of the trees are clipped, those at the top being undisturbed.

"It is supposed, although not definitely known, that the plants attain their prime at eighteen or twenty years, and that after another ten or fifteen years they are deteriorated to such an extent that it is well to abandon them."

"A crop is taken from each tree every four years, the harvesting period lasting from about the first of March to the last of July. Picking is done by women and children as well as by the common laborer. Many of them are Indians."

"The cost of labor is very low, generally about 15 to 30 cents a day; the curing process is cheap, methods of grinding the leaves are primitive, so that, except for the cost of transportation from the interior, the cost of the tea to the consumer would be even cheaper than it is."

After having been gathered, the leaves and twigs are taken to a roasting shed, which consists of a thatched peaked roof supported by poles at the corners. Under the roof is a scaffolding or platform, on which the yerba is spread. Beneath the scaffold a fire is built, and it dries or toasts the foliage until it is brittle and partly broken up.

Now ready for milling, the product is packed in bags in Argentina and Paraguay, and in barrels in Brazil, and sent to the mills, which may be hundreds of miles distant.

According to the process described by Dr. Eben M. Flagg, who spent a considerable time in the vicinity of yerba plantations, the crudely prepared product is screened in order to separate leaves from seeds and twigs. The leaves are then ground finer, but not quite to a powder.

The twigs are chopped separately into about half-

inch lengths and are afterward stirred in with the leaves. According to the taste of the country, yerba mate tea is not palatable when brewed from the leaves or the twigs alone, but one is said to impart a flavor to the other.

There are four principal ways of preparing the beverage, says Dr. Flagg. These are "mate amargo," which is bitter; "mate dulce," served with sugar; "mate con leche," with milk; and "mate cocao," with cocconut.

A little egg-shaped gourd, holding a small teaspoonful, is used for brewing, but the principal equipment is a small tube, or "bombilla."

This "bombilla" is of metal, about eight inches long, and resembles a thermometer tube and bulb. The tube is about the thickness of a lead pencil, while the bulb is approximately the size of a hazelnut, flattened on one side.

The tube is perforated with holes so small that the ground yerba does not enter them, and so distant from one another that the liquid cannot be sucked too rapidly. This flattened bulb is set against the bottom of the gourd, and ground yerba—about two teaspoonfuls—is placed around it in the little cup. Boiling water is poured into the gourd and almost immediately the first drink may be taken. It is sucked through the "bombilla."

A second pouring of hot water produces a draught much stronger and of even richer flavor. The gourd may be filled and emptied six or eight times, according to the strength of the yerba and the taste of the drinker.

Ordinary "mate amargo" is produced as described. One may add sugar, or pour milk on the yerba instead of water. Oil of the cocconut added makes a beverage that is smooth to the palate and of peculiar delicacy.

Brazilians do not, as a rule, employ such a process, but make the beverage much as ordinary tea is steeped. Usually they put an ounce of ground mate into a quart of boiling water, the tea being strained and ready for use, after being steeped for ten or fifteen minutes. It is sweetened to taste.

Very little yerba mate is exported from South America. In Argentina the wholesale price of the prepared product ranges from four to eight cents a pound, according to quality. Some specially prepared and flavored brands, put up in ornamental packages, retail for twenty cents a pound.

In Paraguay the yerba plantations—they are generally uncultivated forests—are said to cover about 3,000,000 acres, or 400 square miles. In the Argentine country the forests are usually far in the interior and are scarcely ever vis-

ited by any except owners and native workmen.

It is largely for this reason probably that even regular consumers of yerba mate know little about its grow Owners of plantations, too, are extremely reticent with asked for information upon the subject.

The crop can be made ready for market much easier than coffee, for the reason that while the preparation of the coffee bean requires a long and complex process yerba mate may be properly cured in thirty-six hours.

Ten men, in a couple of days, can prepare from the to four tons for market.

Of recent years the Argentine Government has indicated its intention to improve the quality of the plant and to learn more of its habits under cultivation. What object in view, experiments are now in progress the botanical gardens at Buenos Ayres.

Owing to the excessively hard shell of the yerba, a belief is current in most South American countries that it must be swallowed and acted upon by the digestive apparatus of a bird before it will sprout.

Recent growers have found that soaking the seed in strong solution of lye for twenty-four hours softens seed sufficiently.

Even at best, the cultivation of yerba mate tree is not as yet far beyond the experimental stage.

Prisoners on Probation for Life

SENTENCE is suspended, and you are held on probation for the rest of your natural life. "If you behave yourself from now on, you will not be molested; otherwise you will be liable at any time to be hauled up for punishment."

A curious test of humanity is being made by Judge Samuel P. Hadley, of the municipal court of Lowell, Mass. He believes that a prisoner arrested for intoxication will remain sober longer if put on probation than if sentenced to imprisonment, and he proposes to find out whether or not he is correct.

For more than fifty years Judge Hadley has been associated with the police court of his town, first as clerk and then as Magistrate.

He has long been endeavoring to make the work of his bench corrective rather than punitive, and frequently has taken cases out of the hands of the police to give a penitent "one more chance."

His most recent effort in this direction, that of placing a drunkard on probation for the remainder of his life, has brought to him letters of inquiry from all parts of the country. Some of the writers believe that probation is less corrective than punishment, and remonstrate with him.

In spite of protests and arguments to the contrary, however, the Judge holds that his solution of the problem is the proper one.

"In the case at hand," he explains, "the prisoner had an excellent record as a probationer, but a poor one otherwise. That is to say, he kept sober for six months when placed on probation, and then got drunk celebrating his redemption. I have put him on probation for the rest of his life, and I believe that it will keep him sober permanently."

"I wish to say one thing more. I feel sure the drunkard can be saved. One of the letters that I have received this week suggests that it is idle for me to attempt to reform men by probation. The writer believes that they are lost anyway. Now, that isn't my experience at all."

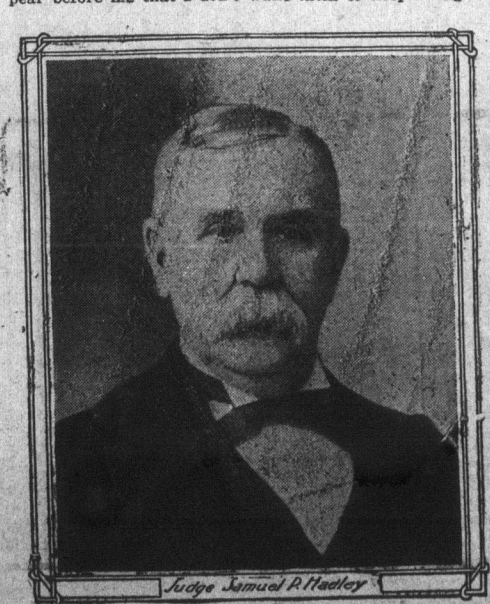

"We have made a close and careful study of the effect of the probation laws, and the results that we obtain are from observation, and not from supposition."

"About 25 per cent. of the drunkards placed on probation go to the devil in spite of everything. About 30 per cent. show an improved condition and 15 per cent. are reformed."

"Now, that is worth striving for. What we want is to make reform permanent in as large a number of cases as possible. The statute says that a court may suspend sentence for such time as it may see fit. The only question is

my mind before suspending sentence indefinitely was to decide whether there was any implied limit upon time.

"We are not going to discard old methods entirely, but the man who reforms ought to do it for life. In certain cases I have my doubts as to the value of suspended sentences; and I often tell the men and women who appear before me that I don't want them to keep straight

Judge Samuel P. Hadley

through fear, but because they ought to do right. I don't believe in virtue practiced under compulsion.

"We are going to try the probation for life ideas upon men who fail to maintain their families especially. Why shouldn't a man support his wife and children for the rest of his life? I have often advocated the revival of the

Experts' New Field: Commercial Economic

A NEW type of expert is the commercial economist, employed by large manufacturing concerns to suggest methods by which expenses may be curtailed and revenue increased.

He carefully inspects every department of a factory, overhauling books, peering into machines, examining and testing material and asking all sorts of questions of workmen and foremen.

Explaining his peculiar avocation, one of these men, who has been investigating large machinery plants in the West, said recently:

"Backed by authority from headquarters, the commercial economist enters a factory and roams where he pleases. If there is a leak, he should find it; if incompetent management results in inadequate revenue, he must point out the remedy."

"Too much reticence in certain quarters arouses suspicion and causes a closer investigation. Sometimes I find foremen protecting incompetent workmen, either through sympathy or for a monetary consideration."

"I was employed recently by the manager of a New England factory to detect the leak in expenses so that it might be plugged."

"Reports, I soon found, were passing from men to bosses, from bosses to department foremen, then to superintendents and finally to the manager himself, unverified other than by general statements."

"For instance, the foreman's excuse for not turning out the standard amount of given articles in a given time was always 'without any attempt by his superior to find out whether the excuse was valid.'"

"The men were not bringing the plant up to its full measure of efficiency because of the incompetence of the general manager—the man who had hired me—and I bluntly told him so in my report."

"In a certain farm machine factory in Illinois I discovered that one of the heaviest expenses was the purchase of material for a particular paint, exclusively in use there. This bill alone amounted to \$100,000 a year. The firm thought no other material would give the same results."

"Being a chemist, I experimented, and succeeded in producing as satisfactory a paint at just half the cost."

"When turned loose in an establishment, the commercial economist begins on the books. He finds out how much is charged against each particular article of manufacture for cost of material, construction, insurance, storage and so on."

and tests it for some suggestion of economy.

"It is often asked why men, engaged in every day of their lives, cannot as readily detect violations of the law of economics as an outside expert. They do quite frequently. Nearly every fast, some bright man who devises and puts into operation plans for improvement. But as a rule such men are not economists. Their innovations relate to their own department."

The whole factory is the expert's field. He is the purchasing, the character of goods, how they are worked, investigates to see whether cheaper or less material may not accomplish the result, and concentrates his mind on every detail of manufacture, from the raw state of the material to its ready for shipment."

SQUIRRELS FOREST DESTROYER

MR. JOSEF BRUNNER, a Western naturalist, has not much good, but a great deal that is good, to say of the squirrel.

"He is a thief and a murderer," is the Mr. Brunner attacks the busy little fellow's character. "He devotes his life to eating the eggs and killing young of harmless and useful little birds which, if left to live and increase, would protect the forest from harmful insects. By killing these birds, the squirrel takes rank as a forest destroyer."

"The red squirrel is not the only sinner. In my opinion, the gray is almost, if not quite, as bad. I have killed many squirrels caught in the act of eating eggs or young birds. Any bird that selects nesting-places which is also adapted to the use of a squirrel is almost certain to be ejected."

"When a forest has been destroyed by fire, lumbermen or insects, it is almost impossible for natural foresting to take place if squirrels are abundant in adjoining tract, because they eat the seeds. Fifty per head each day would be a low estimate. Yet this would make 15,000 in a year."

"And seeds are not the only thing. In winter, ground is often strewn with twigs which have been stripped of buds by squirrels. The trees attacked generally situated at the border of a dense forest, would, if left alone, yield the best seed crop. A squirrel thus destroys in one
