LIES—"MADE IN GERMANY."

German diplomacy has been proved by the official records of the Kaiser's own government to be absolutely unreliable and unworthy of credence.

September is nearly gone, and the Kaiser's dinner party in Paris is farther off than ever.

A REAL MENACE.

The daring exploit of the German submarine which sank three large cruisers and caused the losses of nearly 1,200 men, is taken as one of the hazards of war in the Old Country.

it upon, not only the intelligence but the common sense of the men responsible for their output. The Official Press Bureau in London recently found it necessary to call attention to the lying story published in Berlin, purporting to be a report of a pro-German speech delivered by Mr. John Burns, who recently resigned from the British Cabinet.

What if the news of England's defeat and England's weakness leaks out to the Colonies, which have really nothing in common with the Mother Country, and perhaps are waiting for some opportunity to fall away from her?

A people so powerful and so conscious of its strength as the German people can be bound in no fetters that can be forged.

One wonders at the imbecility of a government which would attempt to perpetrate such a colossal hoax upon its own people, but not only was this "made-in-Germany" fake made to do duty throughout the German Empire, but it was passed on to Constantinople, where it received much enthusiastic attention.

The present situation compels the Turks to range themselves at the side of Germany. Any influence that we may have possessed in the Orient is now destroyed, and with it our rule over many, many millions of Mahometans, who will rise like a devastating hurricane when the Sultan unfurls the flag of the Caliphate and summons all Moslems to the holy war.

The flag of Mahomet will be raised in triumph when the flames of revolt shoothigh in India. They will take the sacred carpet from the Kaaba and carry it on before them when a second Mahdi arises and over the corpses of the British troops in Egypt inspires the Egyptians with hopes of a reawakening of the people of Mahomet.

When a nation resorts to such bare-faced lying to bolster up its case with its own people, it is little wonder that, quite apart from the shocking brutalities and atrocities of which it is guilty, it has earned the supreme contempt of the civilized world.

AMERICAN NEUTRALITY.

The administration at Washington is acting promptly in its determination to prevent the neutrality of the United States from being threatened by the incendiary comments of foreign diplomats representing their nations in that country.

In the view of an American contemporary, one of the main sources of the idea of impending trouble between the two nations mentioned has been the continual newspaper and magazine comment upon the likelihood of such a contingency, and the incendiary remarks of men with whom the thought of war with Japan seems to be an obsession.

If Canada is called upon to organize a second Expeditionary Force—and that should speedily be known—it is to be hoped that the experience gained in equipping the first contingent will not be lost upon the Minister of Militia, and that there will be no delay in providing clothing and equipment for the soldiers.
