Their Own Evidence

Their own Evidence.

From The Rochester Heraid.

That there are many fine mansions in New England half-tenanted is well known; but it seems surprising, as shown by Charles Burr Todd in the American Magazine for April, that farm houses by the score are empty and desolate, and large areas of once-cultivated field and meadow are now waste and wilderness.

This is but one more evidence of a suggest.

tive fact which The World has repeatedly trated, upon the evidence of our Reablican neighbors themselves, not that we ish them any harm, or that we rejoice in their failures or misfortunes, but the persist-ence and dishonesty of Mr. Wiman's agents in Canada constrain Canadians to act in detence in these matters. They are so disusly positive that if we could annex them competitors against us in the markets of the earth, that it becomes our duty to show that these sixty millions cannot make ends meet in their own markets.

Occident Hall was crammed to overflowing Occident Hall was crammed to overflowing on Wednesday evening by men and women eager to hear Mrs. Barry, the female champion of the cause of labor, and hundreds were unable to gain admission. Mr. Sam. MacNab occupied the chair, and was supported by a number of leading Knights of Labor and Trade Unionists.

Mrs. Barry pointed out the benefits to be derived from co-operative works undertaken by intelligent men and women. She urged organization as a necessity to secure the more equal distribution of weaith, to prevent employers getting female labor at haif the price of male labor, and to prevent the employment of children until they were at least 16 years of age—this being absolutely necessary to secure the proper physical, mental and moral education of the men and women who in the near future would be the rulers of the nations. She earnestly appealed to workers to sink all religious and political differences, join the K. of L. and work unitedly in the best of all causes—the uplifting of the masses.

This was the most crowded and enthusiastic of the meetings held yet. Scattered throughout the hall were several children in arms who raised their infantile voices at intervals as if to remind the audience that the lecturer was a woman and a mother.

MALL STREET GOSSIP.

Robt. Cochran received this despatch from his New York agonts to-day: The talk last night continued to be of a bullish character, and the most conservative bulls thought that between this and May 15th there would be such an appreciable rise in the general market that the long absent outside public could not fall to become interested in Wall-street, and the result will be a repetition of the times of 1879-80-81. It's confidently believed that Secretary Fairchild, now that he is empowered to hity bonds, will go ahead, and that the next few months will witness the greatest plethora of money known for many years previously.

BUTTER MAKING IN CANADA

DAIRYMEN GET ABOUT HALF PRICE FOR THEIR PRODUCE.

Technical Education.

The first thing for the butter makers to do is The first thing for the butter makers to do is to abandon the present system. It is utterly impossible to produce even a good article, much less a uniform one, as the business is done now. Les them go to work and reform at once. Creameries should start up all over the land, and in a short time not only the Canadian trade should be supplied but there should be a handsome quantity to send to the British market. It will pay to send good butter there. The freight amounts to less than a cent a pound and good Canadian, in sufficient quantity, ought to bring between 25 and 30 cents a pound there. The technical education is the first thing necessary. It was not improvement in the cows so nuch as knowledge of how to make and handle the product of the cheese factories that has brought the cheese industry forward so rapidly. Prof. Robertson of Guelph and those already reaping the benefits of creamery patronage, will no doubt be ready to give all information at their disposal as to the methods to be adopted to produce good creamery butter. In the meantime The World to establishing creameries.
