The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol  $\rightarrow$  (meaning "CONTINUED"), or the symbol  $\nabla$  (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole  $\rightarrow$  signifie "A SUIVRE", le symbole  $\nabla$  signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

PORTLAND, MAINE.

INCORPORATED 1848.

THE above is a PURELY MUTUAL COMPANY, which restricts its efforts for New Busi-  
ness to the HEALTHY SECTIONS ALONE OF NORTH AMERICA. For SIM-  
PLICITY and LIBERALITY of POLICY CONTRACT and PROMPTITUDE IN PAYING  
CLAIMS it is unsurpassed by any other Company. Its Policies all contain the benefits of the  
Maine Non-Forfeiture Law, are of the most varied description, and therefore suited to circum-  
stances. The first half of 1891, compared with the corresponding period of the year preceding,  
shows :

Increased Number of New Policies Issued.	Increased Number of Policies in Force.
Increased Amount of New Insurance Written.	Increased Amount of Insurance at Risk.
Increased New Premiums Written.	Increased Premium Income.
Increased New Premiums Settled.	Increased Total Receipts.
	Decreased Notices of Death Claims.

within  $\frac{1}{4}$  of a mile of it or until the Beacon light bears about W by N, then run W  $\frac{1}{4}$  S until the Beacon light bears W N W, then run W by N leaving the Beacon light 100 yards on your starboard hand, then steer N W  $\frac{1}{4}$  W (keeping the middle of the channel) for the Narrows between Galloups and Lovell's Islands, then about N W  $\frac{3}{4}$  N for the bell buoy off Nix's Mate, which leave on port hand, then run W by N  $\frac{1}{4}$  N for Fort Independence, leaving the lower middle buoy, red can, No. 6, a good berth on your starboard, and State Ledge buoy, red Nun No. 8 close aboard on your starboard; then run about N W  $\frac{1}{4}$  N for the upper middle buoy, black Nun No. 9, which leave on your port, then the course to Long Wharf or to good anchorage is about N W  $\frac{1}{4}$  W. If making Boston ship channel from Cape Ann, get Thatcher's Island light to bear N N W from 2 to 3 miles, then steer S W  $\frac{1}{4}$  W until Boston light bears W by N  $\frac{1}{4}$  N. But if approaching Boston from Cape Ann, via Broad Sound, bring Long Island Light to bear S W by W, and run for it until Deer Island Point Beacon bears N W by N  $\frac{1}{2}$  N, three-eighths of a mile distant, then W by N  $\frac{1}{4}$  N up the harbor. Strangers should bear in mind that in the middle of Broad Sound there is but 8 feet of water at low tide; but by keeping on the southern side of the Sound, leaving the Graves Whistling Buoy  $\frac{1}{2}$  a mile on your port hand and the Devil's Limb Buoy (black can No. 1)  $\frac{1}{4}$  mile on port hand, and running straight to Ram's Head buoy (black can buoy No. 5) about W S W, passing Aldrich's Ledge buoy (black can No. 3)  $\frac{1}{2}$  mile on port, then leaving Ram's head 50 yards distant on port, and run about W  $\frac{1}{4}$  S to clear Deer Island Point Beacon, you can carry 12 feet safely. From the Beacon you will steer W  $\frac{3}{4}$  N for lower middle buoy, then W by N  $\frac{3}{4}$  N for State Ledge Buoy, when proceed as before given.

**Explanatory.**

**Aphelion**—The point of a Planet's orbit farthest from the Sun.

**Apogee**—That part of the Moon's orbit farthest from the Earth.

**Astronomical Day** is reckoned from noon to noon through the 24 hours. Thus, July 21, 9h, is 9h A of July 21, and July 21, 15h, is 3h M of July 22.

**Conjunction**—A Planet directly between the Earth and the Sun is said to be in Inferior Conjunction with the Sun. A Planet with the Sun directly between it and the Earth is said to be in Superior Conjunction with the Sun. Planets are said to be in conjunction with each other, or with the Moon, when they are in the same sign and degree.

**Declination**—The distance of a heavenly body from the Equinoctial, measured north or south, in degrees or minutes, on a Meridian.

**Ecliptic**—The plane of the Earth's orbit, so called because Eclipses can take place only when the Moon is on or near it.

**Elongation**—The distance of a Planet from the Sun as seen from the Earth.

**Equinoctial**—The circle in the heavens traced by the Earth's Equator.

**Node**—That part of the orbit of a heavenly body which intersects the Ecliptic.

If the body is passing from south to north, it is called the Ascending Node; if from north to south, Descending.

**Opposition**—A Planet with the Earth directly between it and the Sun is said to be in opposition to the Sun.

**Penumbra**—That portion of space around the shadow of the Earth, in passing through which the Moon diminishes in brightness in consequence of a part only of the Sun's rays reaching her surface.

**Perigee**—That part of the Moon's Orbit nearest to the Earth.

**Perihelion**—That part of the Planet's Orbit nearest to the Sun.

**Quadrature**—Two heavenly bodies are said to be in Quadrature when they are distant from each other by one-fourth of the Zodiac, or three signs apart.

The Sun's Declination and fast or slow of clock are given for apparent noon or time of passing the Meridian of St. John.

The Moon's Southing is given in Astronomical time for the Meridian passage at St. John; and her Declination, when on the Meridian.

The Rising of the Moon is given from Full Moon to New Moon; and the Setting from New Moon to Full Moon.

TIDES.

The Tides in the Calendar are the Morning and Afternoon Tides at St. John and Charlottetown. In the Tide Table (page 40) will be found Constants for finding the time of High Water at each of the places given in the Table.

In editions of this Almanac prior to 1885 the Tides were only given approximately, but ever since they have been corrected for the varying distance of the Moon from the Earth, and also her angular distance from the Sun. They can now be depended on as accurate to at least the same degree as the Admiralty Tide Tables.

It will sometimes be found that when a Constant is added to the time of High Water at the Port of reference the sum exceeds 12 hours; in this case subtract 12 hours from the sum and the remainder will be the time of High Water at the required Port on the succeeding afternoon or morning, according as the Tide at Port of reference was a Morning or Afternoon Tide.

EXAMPLE.

High Water at St. John, January 14th.....	11h. 52m. A.
Moncton, add.....	54
	12h. 46m.
Subtract.....	12
High Water at Moncton, January 15th.....	0h 46m. M.

It will sometimes be found that a Constant to be subtracted is greater than the time of High Water at the Port of Reference; in this case add 12 hours to the Time at the Port, subtract the Constant, and the remainder will be time of High Water at the required place for the previous Morning or Afternoon, according as the Tide at the Port of reference was an Afternoon or Morning Tide.

EXAMPLE.

High Water at Charlottetown, January 3rd.....	0h. 33m. M.
Add.....	12
	12 33
Newcastle, Beaubère Island, subtract.....	4 15
High Water at Newcastle, January 2nd.....	8h. 18m. A.

**FORECASTING THE WEATHER.**

Men have, from a very early period, studied the weather, on account of its great influence on their pursuits, in order if possible to predict its nature, and prevent those losses to the Farmer and the Sailor which result from violent storms.

The earlier students based their predictions on the phases of the moon, but an examination of the Greenwich observations for more than half a century has shown that this theory is entirely unfounded. Weather prophets like Moore, Zadkiel and Vennor claim in their Almanacs to be able to forecast the weather day by day for a whole year; but meteorological science in the British Isles, and the Signal Service of the United States, with the Weather Bureau of the Dominion, does not claim to forecast, with any certainty, the weather for more than three or four days at the most.

If an observer could obtain, at regular and repeated intervals, readings of the Barometer at stations distributed over a large area, he would be enabled to trace the march of the storm, for it has been found that the wind always blows towards the place of the lowest barometer reading; and so, by means of the telegraph, he may warn those places the storm is approaching. Still, mistakes are often made, and the forecasts are not always infallible, so that much remains to be done before meteorology can be ranked among the exact sciences.

MAY has Thirty-one Days.

**SUCCESS IN LIFE**

Day of Month.

IN what every one looks forward to or longs for; in order to reach it quickly you must have good health. Sometimes what seems a very small cause, such as a neglected Cough or Cold, will undermine and destroy it, blighting probably a bright future. A 25 or 50c. bottle of the new discovery Haskinore will avert this. For Coughs and Colds it has no equal.

**Court of Divorce and Matrimonial Causes.**

**County Courts.**

The Courts were established by 30th Victoria, cap. 10, passed June 17, 1867, and are now regulated by the Consolidated Statutes, cap. 51, as amended by Act 45 Vic., c. 9. The Act authorizes the appointment of one Judge for the Counties of Charlotte, Carleton, Victoria and Madawaska; one Judge for the Counties of York, Sunbury and Queens; one Judge for the Counties of Westmorland and Kent; one Judge for the Counties of Northumberland,

**J. SIME'S (LATE SIME & HAWES), CITY ROAD.**

Gloucester and Restigouche; one Judge for the Counties of Kings and Albert; and one Judge for the County of the City and County of St. John; provided that Court for the City and County of St. John shall not have or exercise any jurisdiction in any cause in which the City Court of St. John has jurisdiction.

The act also authorizes the appointment of a Clerk for each Court, who shall be an Attorney. The sittings of the respective Courts shall be held at or near the County Court House in the shire town.

The County Courts have not cognizances of any action—

1st. When the title to land is brought in question; or,

2nd. In which the validity of any devise, bequest, or limitation is disputed.

Subject to the above exceptions, the County Courts have, by Act 45 Vict., c. 9, jurisdiction, and may hold pleas in all personal actions of debt, covenant and assumpsit, when the debt or damages do not exceed the sum of \$400; and in all actions of tort, when the damages claimed do not exceed \$200; and in actions on bonds given to a Sheriff or otherwise in any case in a County Court, whatever may be the penalty or amount sought to be recovered.

The Act 45 Vict., c. 9, would seem to give the County Courts jurisdiction in those classes of cases which were excepted from its jurisdiction by the Consolidated Statutes, c. 51, sec. 7.

**Sittings of the County Courts.**

The Courts hold Terms every year in each County, which Terms commence as follows:

Albert County—On the third Tuesday in June, and on the second Tuesday in November.

### Mutilated Stamps.

Letters having mutilated stamps, or stamps so soiled and defaced as to make it impossible for the sorting clerks to decide whether they have been used before or not, will be sent to the Postmaster General for his adjudication.

### Post Bands and Stamped Envelopes.

One cent post bands for newspaper or book packet wrappers, and one and three cent stamped envelopes are issued by the Department, and may be had at the stamp vendors at a trifle above their face value.

### Merchants' Boxes.

Though every effort will be made in sorting letters to place them in the boxes, when the party addressed is known to have a box, the Postmaster does not hold himself responsible for this always being done; the primary rule being that all letters bearing the number of the house and name of street go there by letter carrier.

An order to place in a box letters belonging to another person than the owner of the box cannot be recognized, unless such letters are addressed to the care of the box or its owner.

Letters for the member of a firm should be addressed to the care of the firm or the number of the box.

Box holders would facilitate the work of sorting by requesting correspondents to add the box number to the address of their letters.

**Time Ball on Northern Tower of Custom House.**

The Ball will be hoisted half its elevation each day (Sunday excepted) at fifteen minutes before one o'clock. At one minute before one o'clock it will be hoisted its full height; and at one o'clock, mean time, the Ball will be dropped. A Chronometer keeping correct Greenwich time should then show 5h 24m 15s, and the difference between this and the time shown by a Chronometer, is its true error on Greenwich time at the moment. As the above hour of one o'clock when the Ball drops, represents 5h 24m 15s at Greenwich, the error of a Chronometer may be ascertained, no matter where the ship is lying. Masters of vessels arriving at Saint John should compare their Chronometers by the Time Ball, as it will enable them to get the sea rate, which frequently varies from harbour rates. Latitude 45° 16' 42" North. Longitude in time 4h 24m 15s West of Greenwich. D. LOVETT HUTCHINSON, *Director*.

P. S.—Any shipmasters entering this Port, keeping a Meteorological Register, who may be desirous of having the accuracy of their Barometers verified, can do so by comparison with the standard at the Observatory at the Custom House. D. L. H.

### Synopsis of the Fishery Laws of the Dominion of Canada as regards Salmon and Trout.

Net fishing of any kind is prohibited in public waters, except under leases or license from the Department of Fisheries.

**GENT'S CLOTHING DYED WITHOUT BEING TAKEN APART,**

**ALE AND BEEF, THE FOOD FOR CONVALESCENTS.**

The size of nets is regulated so as to prevent the killing of young fish. Nets cannot be set or seines used so as to bar channels or bays.

The netting of trout is prohibited. A general weekly close-time is provided in addition to special close-seasons. Salmon nets must be raised from 6 p. m. on Saturday to 6 a. m. on Monday, and angling for salmon is prohibited from 9 p. m. on Saturday to 6 a. m. on Monday. Close time for "flyfishing" for salmon begins 15th August.

The use of explosive or poisonous substances for catching or killing fish is illegal.

(Notice has been given that a standard regulation salmon net will be established and adopted by the Department of Fisheries, to come into use in the year 1891, and therefore no other net will be sanctioned for the capture of salmon in any of the waters of the Bay Chaleur or elsewhere.)
