New Rotary Power Job Press. We have added to the Standard Office an Alden New rotary power job press.

Visitors to St. Andrews and travellers generally will be pleased to know that Mr. Asst. Kennedy has opened the building formerly called the "International" on Water Street.

ST. ANDREWS HERALD CONSERVATIVE ASSOCIATION.

For all Female Complaints nothing equals Dr. Pierce's Favorite Prescription.

TEACHER'S SALARIES.—Will New Brunswick people make a note of the following, and do its teachers justice:

"They pay good salaries in Albany.—The principal of the High School receives \$3,000; the teacher of Latin and Greek, \$2,100; and the teacher of Mathematics, \$2,100."

The people of Albany know and appreciate good teachers, and pay them accordingly.

One secret of M. Gambetta's power in France to-day is illustrated by the passage between him and Duc de Feltra, who was called to order for charging that the power of the country was juggled away.

A Dr. Tanner, of Minnesota, entered upon a self imposed fast of forty days in New York. He partook of nothing but water during the time, and subsisted upon strength of will.

ARRESTED FOR FORGERY.—John Melick, a well known shipbroker and man about town, was arrested on Thursday afternoon, at the instance of the Bank of New Brunswick, for forging the name of his uncle, Henry Melick, to a note for some \$3,000.

A steamer ran too rapidly into the lock of the Lachine Canal basin at Montreal last week, and burst through the opposite gate, which was the barrier between her

and a wall of thirteen feet of water, extending a mile in length and several hundred feet in width. The water rushed out, sweeping everything before it, flooding land and houses, and doing \$1,500,000 damage to the canal and outside property.

Notice to Subscribers. A change about being made in the STANDARD Office, it is necessary that all accounts due for subscriptions, advertising, &c., should be paid without delay.

The St. Andrews Standard.

SAINT ANDREWS, JULY 14, 1880.

ST. ANDREWS TO BE AN OCEAN TERMINUS For Canadian Railways.

It has ever been our desire to give information on Railway matters obtained from reliable sources, without coloring or raising false expectations; and it happens that our facilities for collecting such intelligence are such, that they are relied upon by our townsmen, whom we never designedly misled; it is now too late to adopt so unworthy a course, when contemplating a relief from the onerous duties of the mechanical department of a journal so which we have been engaged, and of which we have been proprietor very nearly half a century; to change our line of procedure, and publish unreliable reports.

It is not without pardonable pride we refer to the fact that the STANDARD in 1834 was the pioneer, and for some time the sole newspaper, which advocated the introduction of Railways in British North America; and it had to contend against the opposition of its provincial contemporaries, who viewed such undertakings as "premature, impracticable and too costly." The articles however were copied in leading Nova Scotia, Canadian and United States journals, with favorable comments. It also succeeded in arousing public attention to the subject, and enlisted the influence of leading men in the promotion of such necessary modes of transit.

The history of the old "St. Andrews and Quebec Railroad" is an illustration. It affords us much pleasure to record for the benefit of St. Andrews, whose interests we have so long labored to promote—unrewarded—that its Port is to be adopted as at least one of the Ocean Terminus for the great net work of Canadian Railways, and possibly the first, its being the nearest.

The commercial success of the country demands an outlet at the most available and suitable locality, with an open deep sea harbor at all seasons, and in as direct a line as possible. Within a few days some urgent and important changes have taken place in the proprietary of some railways, it is currently reported and credited that the Grand-Trunk has gobbled up the New Brunswick Railway, (and perhaps other lines). That the N.B. railway is to be run up to connect with the Grand Trunk near Quebec, and last but not least, that St. Andrews is to be the ocean terminus.

This movement may be a stroke of policy on the part of the G.T.R. company to supplant the Maritime Railway company, whom it is averred have the same object in view—both companies have their Engineer's report on its adaptability. We have on several occasions and at some length, shown the advantages of St. Andrews harbor as an ocean terminus for railways, and perhaps may some day we may receive an acknowledgment of our services to promote the interests of the place, in the shape of a "leather medal."

We have the satisfaction however of knowing that we have performed our duty as a journalist, and claim the right to express it. A short time will solve the question of this Port being made a terminus.

TEACHERS INSTITUTES.—These institutions held their annual meetings in several counties last week, and the proceedings are published in the St. John dailies. It is to be hoped that some permanent benefit may follow from such meetings—they are at all events feeders to the Education Office, and contribute in increasing the volume of the Chief Superintendents annual report. The Charlotte County Institute at its meeting in St. Stephen, elected the following officers for the ensuing year:

I. B. Oakes, President. Jas. Vroom, Vice " J. D. Lawson, Sec.-Treasurer. J. B. Bogart, Assistant "

Calais is to have another Republican journal.

THE BRIGADE CAMP held during the past week at Woodstock, was broken up on Friday evening. The men were complimented by the Staff Officers, Col. Maunsell, D. A. G., and Col. Lewes, Inspector of Artillery. Brigadier Maunsell said that "Capt. Leggie's company, 71st York, had proved themselves the best shooting company," and awarded his prize of \$5 to Color Sergt. E. A. Smith, who having made the highest individual score. The company also made the highest average, 31 pts., securing the medals presented by the D. A. General.

Col. Lewes, then presented the Artillery 1st prize to Lieut. Garden, Canadian Association badge, silver medal and \$5. A militia ball was held in Cole's hall on Thursday night, at which was many of the leading ladies of the place, and it is reported was a "splendid affair."

We omitted to mention, that the Review and Sham Fight passed off admirably. The fact is that Brigadier Maunsell, besides being a thorough disciplinarian and energetic officer has also an intimate knowledge of brigade camps and military affairs generally, which combined with urbane and winning manners, make him very popular, and place him in the first rank of Canadian Military Officers, and we believe he was so esteemed by Lieut. Gen. Smyth, who adopted several of his suggestions.

Good.—We are happy to notice that the "Courier's" able advocacy for the establishing of a cotton mill at St. Stephen, is about being realized. The Company has issued a call for the first instalment on the subscribed stock.

Sir S. L. Tilley, Minister of Finance, arrived at his residence here, on Friday last, will remain for a short time. He will enjoy a rest from the cares of public business, as it is not probable he will be pestered by the horseleech tribe of office seekers, all offices here being already filled.

FIRES IN THE WOODS—RAILWAY BURNED—TRAIN OFF.

On Saturday last fires were burning in the woods below McAdam Junction, and destroyed some parts of the track of the N.B. & C. Railway, after up trains had passed. While the St. Stephen train was returning down, the smoke was so dense, that the driver could not see where the track was burnt, and ran his train through the flames, and the engine got off the track; the St. Andrews train which followed, when nearing the St. Stephen train, stopped, but did not back, lest it should run off. Both trains were surrounded by the flames; the windows of the cars were closed and many of the passengers remained inside, while others aided the trainmen in building a temporary track around the burnt part, and getting the engine on the rails, which was accomplished after several hours hard labor. The trains then proceeded about 10 o'clock at night on their trip. The mails were not received until Sunday forenoon. The train hands are entitled to much credit for their successful efforts in extricating the trains from their perilous position, and bringing them to their destinations, with comparatively slight damage.

The Right Rev. Dr. Neely, Bishop of Maine, is visiting Calais this week. The Bishop is much esteemed in New Brunswick.

The new Mail Stages make good time, arrive punctually, and appear to be well patronized by passengers.

The dwelling house of Mr. Robt. Custance, Woodstock Road Station, Richmond, Carleton Co., was burned down on Friday morning, 2nd instant. A portion of the household goods was also destroyed. Loss estimated at \$1500; insured, \$800 on building, \$200 on furniture. Mr. Custance is one of the old railroad men, and formerly resided in St. Andrews, where he has still many friends.

WEIGHTS AND MEASURES.—The new Act is being enforced, and it would be advisable for dealers to purchase the prescribed balances and measures, which are to be examined and stamped by the Inspector, who is on a tour of inspection. We observe that the law is being enforced in this Province, a man having been fined \$20 for selling illegal weights and measures. No debts can be collected for articles measured or weighed with unauthorized measures or weights.

Th Orange Celebration at Fredericton on the 12th passed off without disturbance. In addition to representations from St. John and St. Stephen, a large number of

visitors were in the city. The usual addresses were delivered. No party tunes were played by the bands. We are sorry to notice that one fatal accident occurred. While the Orange Excursion train was nearing Blissville station, an old man, P. McGillian, attempted to cross the track, and was struck by the cow catcher; one of the train hands caught him, and he was brought the station, but before medical aid arrived the man had died. No blame attaches to the men in charge of the train.

IMPROVEMENTS.—Several improvements are being made this season; many buildings have had a coat of paint which was sadly needed, outbuildings and fences repaired, and some new and tasty ones erected, and other necessary work done which gives the place a more cheerful appearance. The very dull times, lack of business and employment, have left so much time on peoples' hands, that they occupy it in making their properties look better.

Strat Commissioner Hipwell, has men at work making necessary repairs on Prince of Wales street, which is yearly assuming the character of a pleasant promenade.

Prince Leopold and suite, will be passengers on the City of Portland from St. John to Boston, on Friday next for Boston, thence to New York, where they take the steamer for England.

Eligible House For sale or to Let.

THAT eligible two story Dwelling House, situated in the town of St. Andrews, formerly occupied by the late James W. Street. The house contains beside the basement, four sitting rooms on the first floor, four bedrooms and a bath room on the second floor, and four attic rooms, and is the neatly finished throughout. It will be let either furnished or unfurnished, and either for the summer months or for a whole year.

Apply to the subscribers: GEO. D. STREET, or S. D. BERTON, St. John, N.B.

PROBATE COURT. County of Chatelet.

To the Sheriff of the County of Charlotte, or any Constable in the said County, Greeting: WHEREAS application by Petition has been made, to me by Thomas O. Reilly, one of the next of kin of John Clayburn, late of the Parish of St. George in the County of Charlotte, Tennessee, deceased; alleging that the said John Clayburn departed this life on the 5th day of June, in the year of our Lord One thousand eight hundred and eighty, without having to the best of the knowledge and belief of the said Petitioner made any Will, and praying that Administration of the Estate and effects of the said John Clayburn may be granted to him.

You are therefore requested to cite the heirs and next of kin, creditors and all others interested in the said estate, to appear before me at a Court of Probate, to be held at my office in St. Andrews, in the said County of Charlotte, on THURSDAY, the fifteenth day of JULY next, at Eleven o'clock in the forenoon to show cause, (if any they have) why Letters of administration of the estate and effects of the said John Clayburn, deceased, should not be granted to the said Thomas O. Reilly as prayed for.

Give under my hand and the Seal of the said Probate Court, this 14th day of June, A. D. 1880. GEO. D. STREET, Surrogate and Judge of Probates for Charlotte County.

Any one can do the work. You can make from 50c to 2.00 an hour by devoting your evenings and spare time to the business. It costs nothing to try the business. Nothing like it for money making ever offered before. Business pleasant and strictly honorable. Reader, if you want to know all about the best paying business before the public, send us your address and we will send you full particulars a d private terms free; samples worth \$3.00 free; you can make up your mind for yourself. Address GEORGE STINS N & CO., Portland, Maine.

MANHOOD.

We have recently published a new edition of DR. CULVERWELL'S CELEBRATED ESSAY of the radical and permanent cure (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

Price, in a sealed envelope, only 6 cents or two postage stamps. The celebrated author in this admirable Essay clearly demonstrates, from thirty years successful practice, that alarming consequences may be radically cured, without the dangerous use of internal medicine, or the application of the knife pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically. This Lecture should be in the hands of every youth and man in the land.

Address THE CULVERWELL MEDICAL CO. 41 Ann St., New York. P.O. Box, 4586.

First Class

The Proprietors offer for sale Pianos 7 1/3 octave, black wood roof, furnished with all modern moderate prices for cash or payment. Pianos shipped at cost, and warranted.

E. WILLARD Factory, 390 Tremont St. Orders left at the Standard news, will be promptly attended to.

HOLLOWAYS

This Great Household Medicines the leading necessities. These famous Pills purify the blood, and act most powerfully, yet soothingly.

Liver, Stomach, and BOWELS, giving tone, and to these great MAIN SPRING. They are confidently recommended in all cases where the system is deranged, and from whatever cause, has been weakened. They are wonderful in all ailments incidental to Females and a GENUINE FAMILY UNsurpassed.

Holloways

For a cure of BAD LEGS, Old Wounds, Sores, it is an infallible remedy. It cures the neck and chest, as well as the SORE THROAT, Diphtheria, Sore Glands, and even ASTHMA, Swellings, Abscesses, Piles, Etc.

Gout, Rheum, and every kind of SKIN DISEASE, or been known to fail. The Pills and Ointment are made at 533 OXFORD STREET, London, and are sold by all Vendors of the civilized World; with a almost every language.

The Trade Marks of these Gisters in Ottawa, Hence, a British Possession, who may Counterfeit its sale, will not Potis and Boxes. It is not 533, Oxford Street, London.

HENDERS SEEDS

AGENTS WANTED to sell the new Book, 5,000 CUBIC CHEAPEST BIBLES. For more particulars, apply to HENDERS & CO., 38 Cortlandt Street, New York.

THE DEAF

In the whole history of preparation his ever published, as AYER'S CHERRY recognized as the world's licenses of the throat and lincised series of wonderful cures made it universally known. It is an invaluable remedy to hand in every home. No one should be without it, and those who it never will. From their composition and effects, I CHERRY PECTORAL ex practically certain in its results, and always cures where other

This is to inform of St. Andrews and J. S. MAGEE is not a "Singer Sewing Machine" that those he is selling, are worthless imitations. The Singer C. L. FREESON, A 66 King St., St. J. W. BUTLER, A Calais, Me.

FARM AND GARDEN NOTES.

Good vs. Bad Tools. The necessary outfit for tools and implements on an ordinary-sized farm is very considerable, and it is necessary to use them as long as they are applicable to the work for which they are made before they are laid aside.

There is danger, however, of going too far in this direction, and thus being "penny wise and pound foolish." All farmers are familiar with the difference between using a saw that is in good order and one that is not. The same difference exists in using all farm tools, though perhaps in not so striking a degree.

The use of a good rusty tool requires an unnecessary outlay of strength and time, which, to the farmer in a busy season, amounts to so much money. We have seen farmers use old rusty tools when the extra amount of work that would have been accomplished if the tools had been sharp and well polished would have bought a new hoe in a few days' time. The same holds true with plows, harrows, cultivators and, indeed, all farm implements.

Sometimes an old implement can be put in good order with an outlay of but a trifle. New sheaves and cultivator will often make it as good as new. A hand side to a plow, a new point, will sometimes greatly improve its capacity and ease for work.

In working ground that is not too stony, it will pay to keep cultivator teeth and hoes sharp. We have often carried a file when hoeing corn to sharpen the hoe whenever it became blunt at the edge, and have found abundant recompense for our trouble in the greater ease with which the work was performed.

Provide for the Chickens.

Wonder if there is not a good deal of truth embodied in this somewhat elongated sentence: The farmer builds expensive houses for his horses, hoes, cattle and sheep, and feeds them upon the richest produce of his broad acres without stint; but his wife, son or daughter has the enterprise to keep a few fowls, they are grudgingly given some old shed or the boughs of some tree, and they go without food or drink except that which their hunger drives them to the garden in search of food they are met with a tangle of sticks, stones and clods; and yet these same fowls are expected to supply the farmer's table with eggs, and if they fail to do it, it is claimed that fowls are not profitable, and no matter when the hen dies she owes her owner a quarter.

Fertilizer for the Garden.

The question of manuring the garden is one that might be profitably considered. Experiment has shown that it pays to rotate different kinds of manure from year to year. Among the artificial manures used for gardening purposes are Peruvian guano, bone flour, blood and bone fertilizer, and refuse from various manufacturers, such as sugar-house refuse, fish scraps, refuse hogs, glue waste, etc. Glue waste, either raw or composted, makes an excellent fertilizer for corn, and when well composted with manure, arth, or rotted manure, may be used for some other crops. This substance heats violently, and frequent turning and free use of water may be necessary to keep it from "burning."

Cucumbers for Pickles.

Those who plant cucumbers for pickles only do not wish to plant the seeds early, and often when the proper time comes the soil is very dry. A correspondent of the American Rural Home says that in such cases he succeeds by soaking the seed for twenty-four hours, and then planting them in the hills with one inch of rotten manure, and then moistening the ground if the same is very dry. I have, in this manner, planted cucumber seeds for pickles in dry and hot weather, and had them up in three or four days, and in splendid condition, between rows of onion sets, and never touched them until the onions had been removed, and thereby received a double crop from a piece of land which otherwise would have been one crop.

Health Hints.

For poisoning from phosphorus, when children suck matches, give a tablespoonful of magnesia and then, freely, gum-arabic water; less magnesia if only a little phosphorus is taken.

If troubled with wakefulness on retiring to bed eat three or four small onions; they will act as a gentle and soothing narcotic. Onions are also excellent to eat when one is much exposed to cold.

A teaspoonful or more of powdered borax thrown into the bath-tub while bathing will communicate a velvety softness to the water and at the same time invigorate and rest the bather. Persons troubled with nervousness or wakeful nights will find this kind of a bath a great benefit.

A noted cure for neuralgia is hot vinegar vaporized. Heat a flat-iron sufficiently hot to vaporize the vinegar, cover this with some woolen material, which is moistened with vinegar, and the apparatus is then applied at once to the painful spot. The application may be repeated until the pain disappears.

Life-Grayer News.

Miss Longfellow, the poet's eldest unmarried daughter, is described as a clever young lady, with a strong, clearly marked face, much resembling her father's. She sat in the state dining room at Mount Vernon the other day wearing a gendarme blue dress with broad ribbons, a curiously beaten gold pin, confining the lace at her throat and a broad, black hat.

FOR THE FAIR SEX.

Fashion Notes.

Still another lace has come. It is simple footing with tiny dots. Hats worn with pongee traveling suits are trimmed with pongee.

Muslin dresses in solid colors are much worn at the watering places. Bolts to wear with thin dresses have loops hanging both in front and at the back.

It is because silk underwear is healthy, not because it is fashionable, that ladies wear it.

No outside wrap is required with a figured basque where it is worn with a skirt of another material.

Elbow capes of silk, having hoods lined with bright silk, are prettier than either broad or lace capes.

The lightest of ferns and full blown flowers are worn in the hair in preference to any other decoration.

Bleuse waists of Surah, with sailor collars and turned up cuffs, are worn with sashes finished with tassels.

Triangles of Indian mul with dots of black, blue or pink, are worn as kerchiefs with street dress.

Jet-embroidered Surah dresses brightened by folds of bright silk set under the edges of the basque are new.

Cheap white silks are made in Languedoc patterns, and are used both for trimmings and neckwear.

Alpaca undershirts for out of town wear have three platings, two of alpaca and one of bright colored satin.

Linen ticking is used by ladies who like a cool costume, and tallo cloth by those who want something new.

The proper way to remodel an old cashmere dress nowadays is to brighten it by bands of light Surah set between its plaits.

Muslin dresses are made with something like the old-fashioned surplised waists, but are gathered instead of puffed on the shoulder.

The prettiest morning socks are made with fitted backs and loose fronts, with satin belts. They are made of Surah lined with silk.

Riding habits are made with a basque at the back and a point in front. High, stiff hats are worn in the city, but melon-shaped hats and veils in the country.

Black satin very thickly strewn with polka dots is used to trim black Surah gowns. It composes the collar, pockets and cuffs, and makes panels on the skirts.

Dark cashmere walking dresses are bordered by plaits of red cashmere or muslin delaine. These plaits are set in so that only about half an inch shows below the hem of the dress.

The old, old fashion of slipping a ribbon in and out between the strands of a straw bonnet is revived this year, and some of the very prettiest Tuscan gowns are tied down by a ribbon arranged in this way, and have no other trimming except a wreath of flowers.

Canada by no means sets an example of simplicity at Queen Victoria's drawing rooms. A Canadian bride, who was recently presented on her marriage, wore a train of cloth of gold, and an undergarment of white illusion, fastened with gold cords and tassels; a petticoat of pearl duchess satin, garnished with yellow pearls, and a stomacher of mother-of-pearl and seed pearls, fastened with handsome coral and pearl clasps, and a headress of coral and diamond sprays.

The smaller the husband, the bigger the bundles his wife makes him carry.

A Georgia lady, not yet forty (so she told the census man,) has buried four husbands, and on the thirteenth instance, married her fifth.

A woman artistically blacked a man's eye at a circus in Owatonna, Minn., for slandering her, and an unfavorable court fined her \$10.

A New York correspondent tells an interesting story about four women who go to dinners and receptions to talk and to help the hostess entertain her guests. The price for their services is \$25 an hour.

Mrs. Elizabeth Bowman, who died at Corydon, Ind., a few days ago, was 104 years of age. When she was a girl her father moved into the country of the Shawnee Indians and she witnessed many encounters between the pioneers and the Redskins.

In no court, says London Truth, are more beautiful women to be seen than in England; but it is to be regretted that more pains are not taken to teach graceful walking. Even in a ballroom, what with high heels and tied back-skirts, the art of progression is far too much neglected by Englishwomen.

The length of time that that Snifkins girl will spend over a five-cent plate of ice cream, when in company with her Charles Augustus, while at home she'll go through two complete editions of pork and beans in half that period, is a subject worthy scientific investigation.

Life-Grayer News.

School girls must have some way of working off their surplus spirits. Some chew gum, others form themselves into military companies in which none of the privates bear a lower title than captain, but the latest and most idiotic performance of the gushing "rosebuds" is to tattoo the initials of a favored young man upon the palm of their right hand.

Jay Gould's New Home.

Speaking of splendid dwellings, says the New York correspondent of the Rochester Democrat, I am reminded that Jay Gould has recently purchased the estate of the late George Merritt, of Tarrytown. It consists of two hundred acres of land and a magnificent white marble palace, which cost him all \$500,000. Gould obtained this grand property for \$225,000, a fact which illustrates the decline in property in that locality. Merritt called the place Lyndhurst, but probably Gould will want a new name, and hence I respectfully suggest Stock-Jobbing Hall as an appropriate title.

Gould has ordered a large library of modern literature, which certainly indicates good taste. How much they will read is another question. The books will, however, be valuable as furniture, and many a library is fitted up for the same reason. The new proprietor will occupy this place as his summer residence, and will, no doubt, expend a large sum in general improvements. It is the finest establishment ever occupied by any Wallstreet man. The next in point of grandeur was Le Gruff Lockwood's magnificent country seat at Norwalk. He was a native of that place, whence he came to this city and became a Wallstreet clerk. When he reached what proved to be his highest point of success, he determined to show the people of his native town the extent of his wealth, and therefore built the finest dwelling in Connecticut. He laid out a fine park and invested a quarter million in the establishment. Just as it reached completion, the panic of 1873 set in, and Lockwood was soon numbered among the principal victims. He failed in a hopeless manner, and was a defaulter to the Lake Shore road to the extent of a half million. The company levied on the Norwalk property, which contained one of the finest private galleries in the country. The pictures were sent to auction with the exception of one masterpiece, which was sold at private sale—Thomas Bierstadt's " Yosemite Valley" which cost \$10,000, and was really too valuable to be placed under the hammer. Lockwood died a broken-hearted man, affording a startling lesson of disappointment.

An Artificial Henney.

W. C. Baker, of Cresskill, N. J., is the largest artificial poultry-raiser in the world and after spending \$80,000 in experiments and getting established, now has a gross income of \$80,000 a year, and will raise 250,000 young chickens during 1880. He is enlarging his accommodations to keep 3,500 laying hens of the best varieties, but still has to buy eggs. Both hens and chicks are housed each in a luxurious systematic style, and fed in luxurious systematic style, the hatching being done in two incubating chambers capable of holding 8,000 eggs each, in tiers of shallow drawers where they are warmed by gas made on the place, and turned daily by women in attendance. The young chick is taken to the brooding-house, some hours after it is hatched, where it is kept till three weeks old and creeps under a hen-mother of hollow zinc, filled with hot water and lined on the under side with blanketing. After three weeks the busy young fowl is put among the laying hens or in the crammering-house, where each hen is confined in a small box and stuffed for two or three weeks till ready for market. Mr. Baker can now fatten 50,000 a year.

Ulcerative weaknesses and debilitating humors of females cured by Malt Bitters.

Lockjaw is one of the most terrible diseases to which mortals are exposed. A California exchange asserts that no one need be in danger of such an attack from wounds caused by rusty iron. The worst case of inflamed wounds may be cured by smoking the injured part with burning wool or woolen cloth.

A good and a medicine are combined in the most perfect manner in Malt Bitters.

It is now said that the remains of A. T. Stewart have never yet been found, though a belief to the contrary has prevailed for some time.

We often wondered what induced Dr. Bull to invent his celebrated Baby Syrup, but we understand now that he was a married man.

A beautiful young girl is confined in the Vermont State prison for horse stealing.

Are You Not in Good Health?

20 Stenoid Chrono Visions. Address H. B. BROWN, 100 Broadway, New York.

672 Cents Free. Address H. B. BROWN, 100 Broadway, New York.

A Novel Life-Saving Craft.

A novel craft has been invented by a clergyman for the preservation of life at sea. It is a floating vessel in the shape of an inverted balloon, which is entirely covered, the entrance being by a man-hole in the upper part, reached from a platform wholly surrounding the vessel, and from which small iron ladders drop down to the water. Inside, arranged around the widest part, are seats and berths, and under the covered bottom is space for provisions. Ventilation is provided for by an ingenious device. The boat is adapted for shoal or deep water by a ballast weight which is raised or lowered from within. It is furnished with a keel and rudder. Its peculiar feature is its method of motion. This is automatic. It is obtained by wave or air wheels attached to shafts which are connected with a small propeller. The principle of the wheels is that whatever way the wind blows or the waves move, the motion is always in the same direction and under control of the rudder. The boat can be made of metal, and the size can be regulated by the needs of the vessel to which it belongs. It is proof against fire, always rides vertical, is easily dropped from the ship, and can be handled by any one who knows how to turn a crank.

In thirteen of the principal dairy counties in Wisconsin, there are 307,063 such cows.

Worthless Staff!

Not so fast, my friend; if you could see the strong, healthy, blooming men, women and children that have been raised from beds of sickness, suffering and almost death, by the use of Hop Bitters, you would say: "Glorious and invaluable remedy."—Press.

Guard Against Disease.

If you find yourself getting bilious, head heavy, mouth foul, eyes yellow, kidneys disordered, symptoms of piles tormenting you, take at once a few doses of Kidney-Wort. It is nature's great assistant. Use it as an advance guard—don't wait to get down sick.

GUARD AGAINST DISEASE.

Vegetine

Purifies the Blood, Renovates and Invigorates the Whole System.

ITS MEDICINAL PROPERTIES ARE ALTERNATIVE, TONIC, SOLVENT AND DIURETIC.

VEGETINE is made exclusively from the juices of carefully selected herbs, roots and barks, and is strongly concentrated so that it will effectually eradicate from the system every taint of Malaria, Proliferous Humors, Typhoid, Cancer, Cancerous Humors, Erysipelas, Salt Rheum, Syphilis, Rheumatism, Gout, Gravel, Dropsy, Catarrh, Neuritis, and all diseases that arise from impure blood. Selection, Inflammation and Chronic Rheumatism, Neuritis, Gout and Spinal Complaints, can only be effectually cured through the blood.

For Eczema and Eruptive Diseases of the Skin, Psoriasis, Pimples, Blotches, Hives, Tetter, Scaldhead and Ringworm, VEGETINE has never failed to effect a permanent cure.

For Pains in the Back, Kidney Complaints, Dropsy, Female Weakness, Leucorrhoea, arising from internal ulceration, and other diseases and General Debility, VEGETINE acts directly upon the cause of the disease. It invigorates and strengthens the whole system, acts upon the secretory organs, always inflammation, cures ulceration and restores the blood.

For Catarrh, Dyspepsia, Habitual Constipation, Palpitation of the Heart, Headache, Piles, Nervousness, and General Prostration of the Nervous System, no medicine has ever given such perfect satisfaction as the VEGETINE. It purifies the blood, cleanses all of the organs and possesses a controlling power over the nervous system.

The remarkable cures effected by VEGETINE have induced many physicians and apothecaries whom we know to prescribe and use it in their own families.

In fact, VEGETINE is the best remedy yet discovered for the above diseases, and is the only reliable BLOOD PURIFIER yet placed before the public.

Vegetine is Sold by all Druggists.
