SEIZURES.

Statement shewing proportion of seizures distributed to each inland revenue officer respectively 143, 144

(SUNDRY STATEMENTS (Appendix C.)

HYDRAULIC RENTS.

STATEMENT shewing amount of rent due from each leasee on 30th June, 1870.....

Amounts accrued during the current year.....

Amounts paid by each in reduction thereof, and

Amounts remaining due 30th June, 1871..... } 144—153

ERRATA.

The following Typographical Errors, although altered in the copy, appear to have been overlooked in revision of proof :—

Statement No. 2, page 3—Seizures Distributed should read \$15,695.50, *instead of* \$15,685. (See details on page 141.

Statement 4, pages 6 and 7—The addition of “total” column on the debit side should be \$126,873.61, *instead of* \$127,873.61.

In the column headed “Sundries”—

		\$	cts.	<i>instead of</i>	\$	cts.
Against London	<i>read</i>	289	61		310	69
Paris	“	305	01	“	344	24
Toronto	“	328	46	“	422	02
Cape Breton	“	36	43	“	68	38

The balance of 99 cents appearing against Prescott should be opposite St. Catherines.

The alterations will not, however, affect either the additions or lateral extensions, which are correct as they stand.

Appendix A, Statement I.—Total gallons *should be* \$5,303,171.29, *instead of* \$3,303,171.29.

*To His Excellency the Right Honorable Lord Lisgar,
Governor General of the Dominion of Canada,
&c., &c., &c.,*

MAY IT PLEASE YOUR EXCELLENCY :—

I have the honor to submit herewith, statements of the Revenues collected by this department during the fiscal year ended on the 30th June, 1871, together with the statistics of its operations during the same period.

The report submitted with the statistical returns for 1869-70, explained at length the various services placed under the control of this department ; since then, the keeping of the accounts of the revenues collected, and of the cost of collecting them has been entrusted to my department. Previously to July, 1870, these accounts had been kept by the department of Finance. The statistics of the traffic through the canals, have also been transferred from the out offices to the department, thereby relieving the collectors of a large amount of book-keeping, and enabling them to attend more efficiently to their other duties.

Heretofore the financial accounts of this department have been presented to Parliament only in the Public Accounts ; and as this, therefore, is the first occasion on which the Financial and Statistical statements have been submitted in direct connection with each other, and as some changes have been made in the form in which they appear, it is necessary to accompany them with some remarks in explanation of the form adopted.

The accounts on pages two to twenty-six, exhibit a summary of the revenue and expenditure of the year, together with some comparative statements. The appendices exhibit the statistical details out of which the financial results have grown.

Heretofore there has usually been an apparent discrepancy between the revenue account as shown by the returns of this department, and the amount collected as shown in the Public Accounts. Out of this apparent discrepancy, misconceptions have sometimes arisen, not because there has been any real error in either, but because being prepared in separate departments, the connecting links necessary for harmonizing the two statements have been wanting. In the returns now submitted, this department has endeavoured to supply this defect, shewing separately with reference to revenue :—

The revenue accrued during the year.

The amount paid into the treasury, and

The state of the balances at the commencement and at the end of the year to which the return relate.

And with reference to expenditure :—

The expenses incurred for the service of the year.

The amount expended on account of such service.

The amount expended on account of the previous year, and

The amounts remaining unpaid at the end of the year.

The returns commence with a summary statement of revenue and expenditure, which will be found on pages two and three. From these statements it will be seen that after deducting refunds, the revenue of the year from all sources has been \$5,120,647, and that exclusive of the cost of the Supervisor of cutlers office at Quebec and Montreal, the outside service has cost \$174,504 69, being less than $3\frac{1}{2}\%$ on the collections. The supervisor's office cost \$61,921 68 ; and the fees collected amounted to \$63,228 57.

In the report for 1869-70, above referred to, the receipts from all the sources from which the Inland Revenue is now derived, was compared for several years. Including the present year the comparison will stand as follows, for 1850, 1860, 1867-8 (the first year Confederation), 1869-70 and 1870-71 :—

	1850	1860	1867-8	1869-70	1870-71
Excise	\$90,388	\$314,630	\$3,078,212	\$3,664,465	\$4,301,389
Public Works	388,972	261,576	486,811	543,596	579,132
Culling Timber	39,724	62,191	70,886	66,475	63,228
Bill Stamps	Nil	Nil	119,712	136,276	184,255
	\$519,084	\$636,397	\$3,755,621	\$4,410,816	\$5,128,004

The increase in 1870-71 over the preceding year has therefore been \$717,188, or $16\frac{1}{4}\%$.

Of this increase \$636,920 is due to excise, being an increase of 17% on that branch of revenue, \$35,536 to public works, being an increase of $6\frac{1}{2}\%$, and \$47,979 to bill stamps, being an increase of 35%. There has been a falling off in the receipts for culling timber, of \$3,247 or 5%, but with reference to this it is satisfactory to be able to state that the revenue from this source has been, for the first time in many years, somewhat in excess of the expenses.

Referring to statement No. 13, pages eighteen and nineteen, which exhibits the quantities of goods subject to excise taken for consumption in each of the three years, ended on the 30th June, 1869, 1870, and 1871, with the revenue derived therefrom, it will be seen that every article subject to excise has yielded an increased revenue, and that, with the exception of tobacco, this has been the result of increased consumption.

SPIRITS.

The increase in the consumption of spirits as compared with 1870, has been 408,217 proof gallons ; as compared with 1869, the increase is 1,409,477 proof gallons. The increased revenue being \$257,388 and \$888,119 respectively. At the commencement of 1870-71, the quantity of spirits in warehouse was 860,281 proof gallons, at the close of the year, the quantity was 1,486,546 proof gallons, showing, that notwithstanding the increased demand, the quantity made was in excess of the wants of the consumers.

The quantity exported in 1870-71, was 271,332 gallons. The exports in 1869-70 were 316,137 gallons, and in 1868-9, the exports were 286,838. As compared with both years, therefore there has been a falling off in exports.

MALT AND MALT LIQUORS,

In the consumption of these articles there is a large increase over the consumption in 1869-70; but as the consumption of that year was exceptionally small the comparison will be more fairly made with 1868-9. The increase in the revenue over the revenue of that year is \$17,966, and the increase in the quantity of malt entered for consumption is 3,940,145 lbs. The increase in the quantity of malt liquor produced is 853,548 gallons.

The quantity of malt in warehouse on the 1st July, 1870, was 10,864,430 lbs. On the 30th June, 1871, there were in warehouse 9,782,518 lbs. The demand, therefore, was in excess of the production.

The quantity exported in 1870-71, was 6,524,859 lbs., against 5,573,119 lbs. exported in the previous year—an increase of nearly 20 %.

TOBACCO.

The accrued revenue from this important source is largely in excess of the revenue obtained from the same source in any previous year, exceeding that of 1869-70 by \$254,506, and that of 1868-9 by \$488,569. I have included the license fees in this comparison. This increase is mainly due to the increase in the duty on Cavendish tobacco, which in April 1870, was raised from ten cents. to fifteen cents. per lb.; an increase in the duty on cigars and other descriptions of tobacco having been imposed at the same time.

Comparing the quantity taken for consumption, we find that in 1870-71, it was less by 228,109 lbs. than in 1869-70, but it was 572,122 lbs. in excess of the quantity taken in 1868-9. It might be assumed, from the decreased consumption in 1870-71, that the rise in price, consequent upon the increased duty, had checked the demand; but it is more reasonable to suppose that the quantity entered for consumption in 1869-70, was exceptionally large, for on examining the comparative Monthly Statement (No. 15, page 22), it will be seen that the revenue from tobacco in April of that year, was nearly double the revenue of any previous month—an indication that the parties who held tobacco in stock, anticipated an increase in the duties and hastened to clear out their warehouses before the House passed the tariff resolutions.

The total quantity of all grades of manufactured tobacco in warehouse on the 1st July, 1870, was 2,069,066 lbs. On the 30th June, 1871, the quantity had increased to 3,048,594 lbs. The rate of production has therefore been in excess of the demands for consumption.

The quantity of manufactured tobacco exported in 1870-71 was 689,532 lbs. In 1869-70 it was 107,001 lbs.; while in 1868-9 the exports only reached 170,722 lbs.: there has, therefore, been a satisfactory increase in this branch of trade.

PETROLEUM.

The returns of the quantity of refined petroleum entered for consumption, show an increase of 819,864 gallons over the quantity in 1869-70, and of 2,751,796 gallons over the quantity in 1868-9. The revenue shows an increase of \$46,658, as compared with that of 1869-70, and of \$141,183 as compared with that of 1868-9.

The quantity entered for export in 1870-71 was 5,531,780 ; in 1869-70 it was 5,274,098 gallons; and in 1868-69 it was only 758,060 gallons. There has, therefore, been an important increase both in the demand for home consumption and for export ; but these demands have not in the past year made so great a stride in advance as was made in 1869-70, and it will be observed that while the demand for home consumption increased by about 22½ % , the demand for exportation has increased less than 5 % .

The Act passed last Session (34 Vic. cap. 15) exempts from duty certain products of Petroleum, namely, paraffin wax, grease for lubricating purposes, lubricating oil made from crude petroleum, tar, and all other refuse, and all articles made therefrom without further process of distillation. Section 3 of the same Act authorizes the exemption from duty, by Order in Council, of all such products distilled from petroleum as can not be used for illuminating purposes, and also a reduction of the inspection fees.

Under authority of this Act, an Order in Council has been passed by which the inspection fees have been reduced one half, and the distillates obtained from coal tar which can not be used for the adulteration of refined petroleum, are exempted from duty.

MANUFACTURES IN BOND.

The revenue from articles manufactured in bond shows an increase of \$7,365 over the revenue of 1869-70, and of \$12,088 over that of 1868-69.

The principal articles now produced in bonded manufactories are vinegar and methylated spirits. The tariff of 1870 places a specific instead of an *ad-valorem* duty on these articles. The collection of the duty is thereby much simplified, and made more certain and equitable in its operation.

The same tariff places a specific duty on alcoholic preparations, and defines what shall be deemed "*spirits or strong waters.*" Under the former tariff many preparations were imported and also manufactured in bond which were composed almost entirely of alcohol, but were subject only to a duty of from 15 to 20 % . These preparations were placed in the market and sold as stimulants under various names, such as essences, extracts, proprietary medicines, etc. At present, whether manufactured in bond or imported, they are subject to a uniform duty of \$1 20 per gallon. The change will have the effect of protecting the revenue, by preventing spirits disguised under various names and flavors from being placed in the market under a lower rate of duty than they would pay if entered as that which they really are—alcoholic stimulants.

BILL STAMPS.

The revenue from bill stamps shows an increase of \$47,979 00 over that of 1869-70 and of \$54,591 00 over that of 1868-69.

During the year the issue of bill stamps to the principal distributors has been transferred to this department, and all collectors of Inland Revenue have been made distributors of bill stamps. For the convenience of the public in remote places and villages where there are no collectors of Inland Revenue, and where the demand is not sufficient to induce private individuals to keep a supply on hand, stamps are still sold by the local post

masters. They are issued to them through the General Post Office, but the amount so sold is comparatively small, and the main issue is made directly from this department to the distributors.

As it usually happens, in places where there is a collector of Inland Revenue, that the demand for bill stamps is sufficient to induce private individuals to take out licences as distributors, and as these parties take some trouble to increase their sales it follows that the business is principally done by them, and that the collectors of Inland Revenue sell but a small number of stamps. The whole amount sold by them since the transfer took place in 1st January, 1871, up to the close of the year, is less than \$1,200, exclusive of the collectors at Halifax and St. John, who act as general distributors for those Provinces.

Although it is necessary that the collectors should keep a supply of stamps on hand for the accommodation of the public, in case private distributors should fail to have a sufficient stock, it is desirable that their time should not be diverted from more important duties, as it might be if they had a direct pecuniary interest in the value sold. Collectors of Inland Revenue are not therefore allowed any commission on the sale of stamps.

PUBLIC WORKS.

Canals.

The statements numbered from twenty-two to twenty-seven in appendix A, and commencing at page sixty-four are the usual Statistical Returns relating to the trade of the Canals. Previous to the opening of the present season of navigation these statistics were compiled from Quarterly Returns made by the several Collectors, whose time was so much occupied in keeping the books necessary to enable them to make such returns, that the more important duty of examining the vessels and cargoes, and checking the ship's reports, by a careful inspection of the manifests and bills of landing was almost entirely neglected and during a press of business the reports presented by the ship-masters were necessarily accepted without question.

In January of the present year, arrangements were made for transferring all these statistical accounts to the Department, where the ship's reports and other vouchers are now received daily, and from them all the information required for the annual return is compiled and entered in the books in the proper form.

The change has added somewhat to the work of the inside service ; but it has permitted a very nearly equivalent reduction in the staff at the principal offices, and the cost of collection has not therefore been increased, as it must otherwise have been, to meet the exigencies of the large increase in the business transacted.

At the opening of the navigation, the regulations respecting the issue of Let Passes, were somewhat modified with the view to giving facilities to trade. Theretofore, the ship master had been required to report and take out a fresh "let pass" on entering each canal. At present so long as he does not break bulk, he is only required to make out one "let pass" for his entire voyage. Under the old arrangement, a barge from Ottawa bound for

Lake Champlain, was required to report and pay tolls at four places, at each of which a 'let pass' was issued. Now it has only to report and pay tolls once. This saves the ship master a great deal of trouble and avoids delay, while it correspondingly diminishes the work of the collector.

It follows, however, that the returns of the Canal at which the ship's report is made will include the tolls and tonnage, earned by and due to other canals. If it be deemed advisable, the earnings of each canal can be duly apportioned in the books of the Department. But as this has never been done, as regards the Welland and St. Lawrence canals, it has not been considered necessary with reference to the others. The apparent earnings of the Welland Canal have always included a considerable portion of what is strictly speaking, earned by the St. Lawrence Canals, and during the present season the apparent earnings of the Grenville Canal include a portion of the earnings of the St. Anne Lock, and of the Lachine and Chambly Canals.

The transshipment of grain at Kingston during the present season, assumed very large proportions. Of the grain there transhipped a large quantity has paid Welland Canal tolls, and is therefore entitled to free transit to Montreal. Since the construction of the Welland Railway, many vessels have discharged a part of their cargoes at Port Colborne, which they receive again from the railway wharf at Port Dalhousie; others have discharged their entire cargoes at Port Colborne and these cargoes have been re-shipped into other vessels at Port Dalhousie, after passing over the Railway. Of the grain thus brought to Lake Ontario, the greater part has gone to Kingston. These transactions have caused some difficulty in discriminating between the grain that is entitled to free transit through the lower canals and that which is liable to toll, and there has in consequence arisen a necessity for determining at Kingston, where the final transshipment takes place, and where the necessary information can alone be had in a reliable shape, what grain is liable to toll and what is entitled to free transit.

Until the present year this has not been definitely determined until after the grain had passed down to Montreal, and there are reasons for believing, that in some cases, grain which had never paid Welland Canal tolls also escaped the payment of St. Lawrence tolls.

To prevent these possible evasions of toll, it was determined to make use of the Inland Revenue Officers at Kingston for the purpose of adjusting claims to free transit. They were therefore authorized to issue St. Lawrence Canal let-passes,—free to such freight as was ascertained to be entitled to free transit, and for such freight as is liable to tolls the tolls have been made payable at Kingston or Montreal, at the option of the forwarder.

The transshipment of grain at Port Colborne has now become an important feature of the trade. During the three months ended on the 30th June, 1871, 133 vessels carrying 78,425 tons of grain, transhipped the whole or a part of their cargo. Of these forty transhipped their entire cargoes amounting to 24,037 tons. The remaining ninety-three transhipped so much as would enable them to pass the canal with the remainder. These partial transhipments amounted in the aggregate to 11,975 tons. The whole of the grain thus transhipped, passed over the Welland Railway, and was again placed on board lake vessels at Port Dalhousie, so that of the 78,425 tons of which those cargoes consisted 42,413

tons passed through the Canal and paid tolls, the remaining 36,012 tons being carried by the Railway.

The vessels above referred to, usually arrived at Port Colborne, drawing from eleven feet six inches to twelve feet of water. The Canal only admits the passage of vessels drawing ten feet or less. When loaded to twelve feet, their cargoes would vary from 19,000 to 24,000, and when drawing only ten feet from 14,000 to 18,500 bushels of wheat. To enable such as could otherwise pass the canal to do so, they have transhipped from 300 to as much as 7,500 bushels. The vessels that transhipped their entire cargoes were too large for the locks, irrespective of the draft of water.

There is but one elevator at Port Colborne, and as the capacity of the railway appliances for the removal of grain is limited, vessels requiring to discharge have sometimes been detained for a considerable time. This detention frequently occasions more loss to the owners than the railway charges for carrying the quantity lighted will amount to. I may mention that the quantity of grain requiring transshipment at Kingston during the present season has been at times largely in excess of the means which exist for doing the business.

I have referred to the circumstances that affect the transshipment of grain because I am induced, by information obtained from various sources, to believe that they materially influence shippers in their decisions as to the route which their shipments shall take, and I am persuaded, that to a large extent, they account for the fluctuations that occur in the volume of trade passing the canals, and especially of the trade passing the Welland canal.

The business of the year, covered by the accompanying returns, has been the largest that ever passed through the canals. Statement No. 34, Appendix A, exhibits it in comparison with that of the preceeding year, which largely exceeded the trade of any former year. It will be observed, that in 1869-70, the tonnage of freight amounted to 4,015,421 tons, and that of the vessels to 4,752,522 tons; but it must be borne in mind, that this tonnage was largely enhanced by including a considerable proportion of the tonnage which entered the Grenville canal in the statistics of the St. Ann's Lock of the Lachine canal, and again in those relating to the Chambly canal. So that this tonnage was actually counted four times. So also of the tonnage entering the Chambly canal at St. John, which was again counted at Lachine, St. Ann's Lock, and at Grenville. A similar observation will, to a limited extent, apply to the trade of the St. Lawrence and Welland canals. So that although the tonnage of freight and vessels in 1870-71 were respectively only 3,955,621 and 4,658,227 tons, there was in reality a much larger trade than in the previous year, as is manifest from the tolls collected. In 1869-70 they amounted to \$444,932 25; while in 1870-71 they amounted to \$490,270 96. An increase of \$45,347.

The enumeration of vessels passing the canals will be similarly affected by the causes which apparently reduce the of tonnage.

The number of vessels in 1869-70 was stated as.....	45,525
The number stated in 1870-71 in Statement No. 31 is ..	42,782
	2,643
An apparent reduction of	2,643
But while in 1869-70 the tolls on vessels only amounted to	\$55,752 74
In 1870-71 they amounted to	\$61,487 94
	\$5,735 20

The decrease in the number of vessels returned is therefore only apparent. It is accounted for, to a large extent, by the causes that have apparently decreased the tonnage of freight, and it has also been affected by the operation of the Order in Council of the 4th April, 1871, which permit steamers employed exclusively in towing in the canals to take out a season Let Pass, which entitle them to pass through the canal during the entire season as often as they may require. Under the former arrangement, it frequently happened that the same "Tug" would take out several Let Passes during the same day, paying in some cases as little as five cents tolls, and rarely more than twenty-cents. Every time a Let Pass was issued it counted as a vessel passing the canal, and this went to swell the total without giving any real increase of business. Under the Order in Council above referred to, no Let Pass is issued for less than twenty-five cents; but the tugs are allowed to take out a Season Pass on payment of \$30. Quite as much revenue is collected under this as under the former system, and the delay and trouble, not always unaccompanied by annoyance, attending the issue of so many Let Passes is saved both for the collector and the person in charge of the "Tug."

HYDRAULIC RENTS.

In August, 1870, the collection of hydraulic rents and other minor revenues from public works, was transferred to this department, but the books in relation thereto have only been very recently handed over. On examining the accounts which cover a period of twenty-five years, a great many entries have been found, of which the equity is disputed by the parties concerned. The dispute is generally based upon an alleged insufficient supply of water. There are also accounts against bankrupt estates and against parties who have abandoned the privileges leased to them. All these arrears have been regularly debited, and as some of them extend over many years, they amount, with the arrears which are not disputed, to the sum of \$153,824, the details of which are shown in Appendix C, page 144.

The adjustment of these accounts and a careful consideration of the claims for abatement in each case will be a work of time, and even such claims as are obviously untenable cannot be written off without the authority of an Order in Council. The gross amounts of outstanding balances which may be hereafter equitably dealt with in detail, are therefore, brought forward subject to the result of the investigation which is proceeding under the Inspector of Canals, who has been instructed to examine and report upon the facts of each case. He has made considerable progress in this work, and has already reported upon a large number of cases. I, therefore, confidently anticipate being able to

submit for consideration an adjustment of the whole of the balances within the present year.

SLIDES AND BOOMS.

The revenue accrued on these works, as shown by statement No. 7, page 11, has been \$81,657 51, of which \$2,074 41 is for interest on outstanding balances, accrued in former years. But the amount actually collected during the year is \$95,541 81 being \$3,775 in excess of the amount collected in 1869-70.

The apparent cost of collecting these dues, as shown in the statement above referred to has been \$11,346 90, The collections are made by officers who are also the servants of the Province of Quebec and Ontario, as collectors of Crown timber dues, and as the whole of their salaries and contingencies are paid by this department, a fair proportion of the above amount is chargeable against the governments of the Provinces. The sum so chargeable, has not as yet been definitely settled, but is in process of adjustment.

HARBORS, BRIDGES, &c.

The decrease in the revenue derived from harbor dues, as compared with the receipts of 1869-70, is accounted for by the exemption from the harbor dues, formerly imposed, of cargo arriving and departing at Port Dalhousie and Port Colborne in vessels using the Welland Canal, when lightered over the Welland Railway. The change only affects the last half of the year, but the revenue has decreased to \$4,022 57, in 1870-71, from \$4,854 56, the amount collected in 1869-70. During that half-year the exemption affected 36,012 tons of grain discharged at Port Colborne, and the same quantity re-shipped at Port Dalhousie. The harbor dues on these quantities would have amounted to \$1,440.

PIERS.

During the year the piers in the Lower St. Lawrence have been leased by public competition. It was not anticipated that any considerable revenue would be obtained from these works at the outset. For the half year only \$181 67 has been collected. It however believed that when the value of the tolls is more fully understood a larger revenue will be obtained. The leases have been granted for one year only.

SUPERVISOR OF CULLER'S OFFICE.

As the tariff of fees collected for Culling timber had been for several years insufficient to cover the expenses of the supervisor's office, a slight increase was made at the commencement of the season, in that part of the fees appropriated to defraying the office expenses. The total fees collected during the year owing to a decrease in the quantity of timber culled, has fallen short of the amount collected during the preceding year by \$3,247 but some reductions made in the expenses of the office, with the increase in the office fees due to the above mentioned change in the tariff, has resulted in placing a balance of \$1,719 68, at the credit of the account ended on the 30th June, 1871.

All which is respectfully submitted.

Signed,

ALEXANDER MORRIS,

Minister of Inland Revenue.

OTTAWA, 12th September, 1871.

MEMORANDUM

Explanatory of Apparent Discrepancy between Figures exhibited by the Public Accounts and those of Departmental Report.

EXCISE REVENUE.

Public Accounts.	Inland Revenue Report.	Difference.	How accounted for.	
\$ cts.	\$ cts.	\$ cts.		\$ cts.
4,301,129 70	4,323,892 07	27,762 37	This difference is accounted for by the fact of Seizures Revenue having been treated separately in Public Accounts. The revenue from which amounts to... The Inland Revenue Department have moreover taken over three amounts as balances from 1869-70, which were treated by the Finance Department as Port Deposits. (A)	16.69	27.08	*25.74	*3.92	*4.18	14.23				

(A) This table of percentage applies to the first line of Totals showing the Movement of Property.
 * This Diminution is only apparent; it arises in consequence of the change in the manner of issuing Let Passes, which are now granted for the whole voyage of the Vessel, instead of being granted for each Canal as formerly.

INLAND REVENUE DEPARTMENT,
 OTTAWA, 12th September, 1871.

NOTE.—Coal to pass up all the Canals, except the Welland Canal, free of Toll, as per Order in Council, June 7th, 1869.

„ Iron Ore, Kyrolite, or Chemical Ore, through one section or all the Canals, per ton, 5 cents.

„ Iron and Salt having paid full Toll through the whole line of the St. Lawrence Canals, or through the Lachine Canal, St. Anne's Lock, Ottawa and Rideau Canals, shall be allowed to pass free through the Welland Canal; and if Tolls shall have been paid at the Chamby Canal, such Toll shall be refunded at Montreal, or Kingston Mills, upon the Iron or Salt leaving the Canal.

„ Wheat, Floor, Corn, Barley, Peas, Oats, and Petroleum, having paid full Tolls through the Welland Canal, shall be allowed to pass free through the St. Lawrence Canals, or through the Ottawa and Rideau Canal, the St. Anne's Lock, the Lachine Canals and the Chamby Canal, provided always that the articles to be entitled to the exemption shall go downward through the whole length of the Canal to Montreal, or pass upward from Montreal through the whole length of the Ottawa and Rideau Canals to Lake Ontario.

„ All articles, goods or merchandise not enumerated above to be charged to Class No. 6.

„ No Let Passes to be issued to steam tugs or other small vessels for less than 25 cents as a minimum charge, when their tonnage as per Class 1 would not produce that amount; but such vessels not carrying freight or passengers can obtain a Season "LET Pass," which will pass them up and down the Canal as often as desired, on payment of \$30.

No. 37.—Continued.

Standards for estimating Weights.		NOTICE.	
		The following Way rates to be levied on Vessels and Property passing the several Subdivisions of the Canals.	
		WELLAND CANAL.	
<p>2,000 lbs. avoirdupois 1 Per M. is per thousand feet. Per Mille is per thousand pieces. Green Fruit, 9 barrels is 1 Ashes, 3 " " 1 Bark, 4 cords " " 1 Barley, 42 bushels 1 Beans, 33 " " 1 Beef, 7 barrels 1 Biscuits and Crackers, 9 barrels 1 Bricks (common), 1,000 2 Butter, 22 kegs or 7 barrels 1 Cattle, 3 " " 1 Cement and Water Lime, 21 bushels or 7 brls. 1 Charcoal, 42 bushels 1 Corn, 36 " " 1 Fire Bricks, 1,000 3 Fish, 7 barrels 1 Flour, 9 " " 1 Gypsum and Manganese, 6 barrels 1 Horses, 2 " " 1 Lard and Tallow, 7 barrels or 22 kegs 1 Liquors and Spirits, 215 gallons 1 Liquors, all others, 215 " " 1 Nuts, 9 barrels 1 Oats, 56 bushels 1 Oysters, 6 barrels 1 Peas, 33 bushels 1 Pork, 7 barrels 1 Potatoes, 33 bushels 1 Rye, 36 " " 1 Salt, 7 barrels or 36 bushels 1 Seeds 9 barrels or 40 bushels 1 Sheep, 20 " " 1 Stone, 12 cubic feet 1 Whiskey, 4 barrels or 215 gallons 1 Wheat, 33 bushels 1 Empty barrels, 10 " " 1 Barrel Hoops, 10 Mille 1 Board and other sawed Lumber, 600 feet board measure is 1 Boat knees, 4 pieces 1 Firewood, 1 cord 3 Hop Poles, 60 or 40 cubic feet 1 Shingles, 12 M. or bundles 1 Split Posts and Fence Rails, 1 Mille 1 Staves and Heading (pipe), 1 Mille is 8 " " (W. India) 1 Mille 4 " " (barrel) 1 Mille 2 Saw Logs (standard), No. 1 2 Square Timber, 50 cubic feet 1 Telegraph Poles, 10 or 40 cubic feet 1 Masts and Spars, 40 cubic feet 1 Railroad Ties, 16 or 50 cubic feet 1 All other wooden ware, or partly manufactured wood, 40 cubic feet as per Tariff 1</p>	<p>Tons.</p>	<p>1. APPENDIX C.—Continued.

MEMORANDUM,

Explaining apparent discrepancies between Excise Revenue Statement No. 3, and the Excise Statistical Statements, (in Appendix A.)

It has sometimes happened that through erroneous computations made or overlooked by the Collectors, an over collection has been made; all such errors are rectified here, and the true result is recorded in the books of the Department. In the meantime, the over collections have been included in the deposits, and brought into the revenue accounts, which, therefore, show an excess as compared with the Statistical Revenues.

These differences (if of sufficient importance), are subsequently adjusted, by way of refund, and are included (together with amounts of duties refunded on other considerations) in the deduction which appears at the foot of Statement No. 3, the same being shown in detail in Statement No. 16.

The following Statement shows the corrections under each division :—

		\$	cts.	\$	cts.	
SPIRITS	Per financial statement, page 4, duty accrued ..	\$2,664,039	07

ANNUAL REPORT

ON THE

STATE OF THE MILITIA

FOR

1871.

SIR,—In submitting the Annual Report on the state of the Militia, I have the honour to inform you, that many measures have been introduced during the past year, calculated to increase the efficiency of the Active Militia, and the Military Organisation of the Dominion;—much remains yet to be done, but the progress already attained, has been as satisfactory, as could reasonably be expected, under the circumstances of the country, the limited period of time allowed for drill, and the means at command.

Among the most prominent of the measures adopted, may be mentioned:—

1st. The inauguration of a uniform and systematic mode of carrying out the Annual Drill of the Active Militia in “Camps of Exercise,” more in accordance with the requirements of modern warfare; the great majority of the troops assembled at these camps being concentrated with rapidity, paid and supplied as if on actual service, and placed in every district under the command of those officers appointed for the purpose.

2nd. Many Batteries of Garrison Artillery, (hitherto practised mostly in Infantry exercises) have, at the time of the Annual Training last year, gone through a short course of instruction in “Gun Drill” at various Forts and Batteries, firing creditably at Target Practice the annual allowance of shot and shell, the better inspection, and instruction moreover of both Field and Garrison Batteries, being effected by, or under the orders of the Inspector of Artillery and Warlike Stores.

3rd. The establishment of two Schools of Artillery, one at Kingston, the other at Quebec, under the command of specially trained officers of the Royal Artillery; these Schools acting also as Batteries, serve to Garrison and guard certain Forts, Barracks, Magazines and Military Stores in the Provinces of Ontario and

To the Honorable

The Minister of Militia and Defence, &c., &c.

Quebec, in addition to affording means for the complete training in Artillery Exercises, of such officers and men of Artillery corps, as are attached thereto.

4th. The performance, by nearly the whole of the Infantry, at the Annual training, of a prescribed course of target practice, with the Snider Rifle, under revised regulations, 584 Government money prizes, with appropriate badges, being awarded to the successful competitors.

During the past year the second periodical enrolment of the Reserve Militia has been taken, shewing a large increase in the number of men available for the defence of the country; two other Military Districts consequent upon the Provinces of "Manitoba" and "British Columbia," having been admitted into the Dominion were added to the Militia system, which now extends through British Territory from the Atlantic to the Pacific Ocean.

A Military Expedition to Manitoba, to assist Her Majesty's subjects resident in that Province, in repelling Fenian Invasion, was carried out, in a manner reflecting great credit not only on the Commander, Brevet Lieut.-Colonel T. Scott, a Major in the 42nd Battalion, (at present serving as Captain in the Manitoba Provisional Battalion,) and the officers and men composing the force, but on the character of the Canadian Militia generally.

This expedition, suddenly required—undertaken at an advanced and most trying season of the year, was organized, equipped and dispatched, with marked promptitude, and the force, without the loss of a man, arrived at its destination in a very short period of time, in face of unusual hardships and difficulties, incidental to the early setting in of a North American winter.

Proof has thus been conclusively afforded of the practicability of the "Dawson Route" for the passage of troops from Thunder Bay to Fort Garry, at almost any season of the year, contrary to the somewhat hasty predictions of inexperienced men.

1871 has witnessed the departure of the Regular Troops, from Quebec, that famous Fortress, having been garrisoned for more than a century by a portion of Her Majesty's Regular Army, is now (like the Forts at Kingston,) handed over to the Dominion Government.

The British flag that floats over those strongholds, is as vigilantly guarded, and the morning gun, as regularly fired, by the Dominion Militia Artillery Corps, who have replaced the Regular Troops at those stations for Garrison duty.

With the exception of two Infantry Battalions, and some Artillery and Engineers stationed at Halifax, Nova Scotia, there are no Regular Troops at present in the Dominion, the Military charge, therefore of nearly the whole country, devolves on the Militia.

ACTIVE MILITIA.

The accompanying return (marked No. 1) shews in a condensed form the strength and organization of the Active Militia on 31st December last, giving a total

including all ranks, of 43,174 officers and men. Out of this number 34,414 (officers and men) have performed the Annual Drill for the Military year 1871-72, of which 22,544 (officers and men,) with 1,996 horses, were assembled at Divisional or Brigade Camps of exercise, for sixteen days continuous drill, paid, supplied, and maintained as if on actual service. 5,210 (officers and men) with 319 horses, were assembled in camps which were only in operation for eight days, under the ordinary regulations relative to pay and supply; the remainder of the Active Militia, numbering 8,760 (officers and men), performed their Annual Drill either at the Head Quarters of Corps, or, as in the case of many Batteries of Garrison Artillery, at certain Forts where instruction in gunnery could be more advantageously afforded, and shot and shell practice properly carried out,

Three Batteries of Garrison Artillery in the Province of Ontario embarked in succession on board the Gun-boat "Prince Alfred" for eight days, and were practised at "Gun Drill," firing shot and shell, the vessel during the period cruising on Lakes "Erie" and "Huron."

1,189 Cavalry and the whole of the Field Artillery, (ten Batteries with 42 Field Guns,) have performed their drill for 1871-72 in the different Camps of Exercise.

RETURN No. 1.—NOMINAL STRENGTH and Organization of the Active Militia of the Dominion of Canada, on 31st December, 1871.

RESERVE MILITIA.

The following return, (No. 2) shews the result of the Enrolment of 1871, of the Reserve Militia, in the Nine Military Districts, comprising the four Provinces of Ontario, Quebec, New Brunswick, and Nova Scotia,—from which it will be seen; that in these, four Provinces alone, there are nearly 700,000 men, within the fighting ages, liable by law to military service in defence of the Dominion; thus proving that there is in the country itself at least an ample supply of the most important element of defence viz: *men*. By this Return, it will be seen that there is a total increase of 37,942 men in the Reserve Militia since the first enrolment under the present law, a period of only two years.

ANNUAL INSPECTION OF ACTIVE MILITIA.

MILITARY DISTRICT No. 1.

The present authorized strength of the Active Militia, in this district, (which is under the command of Lieut.-Colonel Taylor, D. A. G.), is limited, to 318 officers, 4,770 non-commissioned officers and men. The actual number who have performed the annual drill of 1871—72, amounts to 311 officers, 3,952 non-commissioned officers and men, leaving a deficiency of 825 wanting to complete the ranks of the respective corps. The force in the district comprises :

	Nominal Strength.	
	Officers.	N. C. O. and Men.
3 Troops of Cavalry.....	14	135
2 Batteries of Field Artillery.... (one of which, however, is only complete, the other being in course of formation, and as yet only provided with 2 field guns.)	10	140
2 Batteries Garrison Artillery....	6	110
11 Battalions of Infantry, and two independent companies, forming altogether 74 companies..	288	4,385
	318	4,770

and consists of the following corps, who turned out for the Annual Drill in strength, as follows :

	Officers.	N. C. O. and Men.
St. Thomas and London Cavalry ..	7	74
Mooretown Troop of Cavalry	3	39
London Field Battery (4 guns)	3	78
7th Battalion	28	341
22nd do	31	457
24th do (with the two independent companies attached)....	25	272
25th Battalion	22	251
26th do	25	324
27th do	23	280
28th do	25	279
29th do	18	238
30th do	31	468
32nd do	27	320
33rd do	35	429
Sarnia Garrison Artillery Company	3	37

The whole of the corps in this district, with the exception of the Sarnia Artillery Company, (which embarked for eight days gun drill on board the gunboat "Prince Alfred,") performed their annual drill at two Brigade Camps of Exercise.

The London Field Battery, 7th, 28th, 29th, 30th, 32nd, and 33rd Battalions, of infantry, assembled in a Brigade Camp at Goderich for sixteen days continuous drill.

The St. Thomas and London Cavalry, Mooretown Troop, Wellington Field Battery (attached for purpose of instruction to a portion of the London Field Battery,) 22nd, 24th, 25th, 26th, and 27th Battalions, in a Brigade Camp at Sarnia, for eight days drill; both camps being under the command of Lieut.-Colonel Taylor.

The Brigade Camp at Goderich was formed on the 16th June, 1871, and the drill of the corps assembled carried out in accordance with the detailed instructions contained in the General Orders of 5th May, 1871, expressly drawn up for the guidance of commanding officers and all assembled for drill and practice at "Camps of Exercise."

On the 22nd of June last, I proceeded to inspect the corps assembled, at Goderich; on arrival there, I found the position of the camp well selected, situated on a plateau overlooking the Maitland River, which covered the front of the position, the right flank was protected by Lake Huron, and the rear by thick woods, whilst the side most open to attack, (viz., the left flank,) could have been readily protected by entrenchments.

London Field Battery:—
3 officers, 78 men; (4
guns), 57 horses.

7th Battalion, 28 officers,
341 men.

28th Battalion, 25 officers,
279 men.

29th Battalion, 18 officers,
238 men.

30th Battalion, 31 officers,
462 men.

32nd Battalion, 27 officers,
320 men.

33rd Battalion, 35 officers,
429 men.

Total of all ranks, 2,314.

The Brigade here assembled (strength as per margin,) was mainly composed of the yeomanry, and agricultural population of the district, a fine body of men, in the prime of life—they appeared to enjoy, and, like most Canadians, seemed quite at home in "Camp Life." The tents were pitched with regularity, and surrounded as frequently seen in Canadian Camps, with branches of trees and evergreens, in such a manner as to produce a picturesque effect, whilst affording convenient shelter from the heat.

Remaining for several days in this camp, I inspected and personally mustered the whole of the officers, men, and horses, assembled, as well as witnessed and took part in several Brigade field days. The London Field Battery was inspected by the Inspector of Artillery, as to its regimental efficiency, and favorably reported on, the *materiel* was in good order, the horses of a superior and serviceable description, the men belonging to it were well trained to their duty, the supply of service ammunition was complete, and the general state of the battery reflected great credit on the commanding officer Lieut.-Colonel Shanly, his officers, and men.

The infantry battalions, as far as concerns the *physique* of the men, was satisfactory, their Snider Rifles were in reasonably good order, the majority of the companies were badly uniformed the chief defect in equipment (a serious one,) being the want of a proper description of boot for marching.

The routine of drill consisted of, company drill before, and battalion drill after

breakfast, carried out regimentally, with brigade drill in the afternoon ; there being as a rule three parades daily. Every battalion in succession went to the rifle range, performing the prescribed course of target practice. At the brigade parades, the combined force was usually practised in the mode of forming troops for attack and defence, (the different arms affording mutual support,) according to the nature of the ground, and the imaginary presence of an enemy. Both officers and men displayed much intelligence and aptitude in acquiring instruction, and evinced great desire to learn their military duties.

This camp was visited by Lieut.-General Sir Hastings Doyle, K.C.M.G., commanding Her Majesty's Regular Troops in British North America, who, having inspected the brigade, was pleased to express a high opinion of the force assembled and particularly complimented Lieut.-Colonel Shanly, on the soldierlike appearance, and efficient state of the field battery under his command.

On the occasion of one of the field days, in which the gunboat "Prince Alfred" took part, it was computed that from 12,000 to 15,000 persons, chiefly belonging to the agricultural population, assembled to witness the review, many of whom had come long distances ; the weather was favorable, and the military display appeared to gratify all present.

Lieut.-Colonel Attwood, 26th Battalion, acted as the supply officer at this camp, and Major Smyth as camp quartermaster, the musketry instruction and "target practice" was superintended by Lieut.-Colonel Moffat, Lieut.-Colonel Service performed the duties of brigade major, and the district paymaster, Captain F. B. Leys, attended to the issue of and regulations concerning pay. Lieut.-Colonel Taylor testifies to the satisfactory manner in which these officers performed their duties, and to the hearty support and co-operation he received from officers of all ranks.

Goderich is an exceptionally favorable place for a camp of exercise, there being plenty of open ground suitable for the manœuvring of all arms, and one of the best rifle ranges in the Dominion ; ample supplies of all kinds are easily procurable, and there is communication both by rail and steamboat ; moreover it is an important strategic position.

St. Thomas and London
Cavalry, 7 officers, 74
men.

Mooretown Cavalry, 3
officers, 39 men.

Wellington Field Battery
(formed on London
Battery, in course of
formation, and to be
attached to 2nd Brig-
ade,) 5 officers, 71 men.

22nd Battalion, 31 officers,
451 men.

24th Battalion, 25 officers,
272 men.

The Active Militia assembled at Goderich, consisted of the 2nd Brigade, Military District No. 1. with one Field Battery, and one Battalion, from the 1st Brigade, the remainder of the 1st Brigade, formed the Brigade Camp at Sarnia, on the 15th September, the following corps being assembled : (strength as per margin.)

St. Thomas and London Cavalry.

Mooretown Cavalry.

Wellington Field Battery, (formed on London Battery)
in course of formation, and to be attached to 2nd
Brigade.

22nd Battalion.

25th Battalion, 22 officers, 251 men.	24th	do	
26th Battalion, 26 officers, 324 men.	25th	do	
27th Battalion, 23 officers, 280 men.	26th	do	
	27th	do	This camp being only in operation for

eight days, and under the ordinary system of pay and supply, was by no means so popular, with officers, or men, as the sixteen days camp at Goderich; the time being very limited, it was with great difficulty that the infantry corp, could be put through, even the short course of musketry and target practice prescribed. I inspected the whole of the corps in this camp on 19th and 20th September.

The situation of the camp itself, (although as well selected as circumstances would admit,) was far inferior to the one at Goderich, and too close to the town of Sarnia.

Lieutenant-Colonel Taylor, was assisted by his Brigade Majors, Lieutenant-Colonels Moffat and Service, in superintending the drill and duties performed.

It will thus be seen, that the available corps, in Military District No. 1, have been drilled for 1871-72, in the proportion of rather more than one half for sixteen days, the rest for eight days, the whole of the corps in the District, having performed the prescribed course of target practice in camp, during the Annual Drill.

The best shooting battalion, in the district, was the 27th Lambton Battalion, its shoot ing figure of merit being 19-92, the best shooting company in the district was the "Widder Company," or No. 3 Company, 27th Battalion, figure of merit 26-57,—the best individual shot, in the district, among the non-commissioned officers and men, for the military year 1871-72, and winner of the District Prize; being Sergeant J. R. Burwell, No. 5 Company (Iona) 25th Battalion, who made 45 points, out of a possible score of 60.

Lieutenant-Colonel Taylor reports, that the whole of the men, who performed the Annual Drill, were *bona fide* enrolled members of the different corps, a great portion of them, having joined since the re-enrolment, which was ordered to be made within three months from the 1st October, 1868; he states that he cannot ascertain what number of men, are likely to claim their discharge, on the completion of their three years service, but from the enquiries he has made, he does not think that more than one-fourth, will leave the force, *provided the system now introduced of the sixteen days brigade camps, be continued and extended to all corps.*

On this point Lieut.-Col. Taylor says, that from the additional experience acquired, he is confirmed in the opinion, in which he is supported by the commanding officers of Corps, "that the sixteen days camps are, the only means of giving the force, proper instruction in their duties, and that they are the most popular "——," also that the month of June, is the best and most convenient month in the year, for the Active Militia, in Military District No. 1, to go into camp for the performance of the Annual Drill. 825 men are required to complete existing corps in this District, and Lieut.-Col. Taylor is of opinion, that, in order to maintain existing corps up to their strength continuously, recourse to the ballot is necessary, and that it is desirable upon "military grounds."

The average strength per company of the force in this district in 1871, was three

officers, and fifty-three N.C. officers and men; the average strength in 1870, being three officers, and forty-nine N.C. officers and men; and in 1869, three officers, and forty-seven N.C. officers and men, which, considering the difficulties of recruiting the force by volunteering, is as high an average as could reasonably be expected

Lieut.-Col. Taylor calls attention, to the necessity for, and suggests an increase of, three more troops of Cavalry in the district, and the amalgamation of all the troops into, a regiment of Cavalry—the formation of two companies of Engineers, one company in each Brigade Division—the addition of a sufficient number of Infantry to complete the 24th, 25th, 27th, and 29th Battalions—the posting of the two independent companies, to the nearest located battalion, and, with a view to overcome the great difficulty, that has always been experienced in horsing the Field Batteries, the granting of a yearly bonus of about \$10 per horse, to those owners who duly enrol and register their horses, for service in the batteries.

I concur in those suggestions,—and also recommend, that the Cavalry troops, when there are a sufficient number, be formed into one District Regiment to be numbered the “1st Regiment of Cavalry,” and that two additional companies of Infantry, be raised in the County of “Bruce” and posted to the County Battalion (the 32nd.)

If the ranks of corps in this district, cannot be filled up and maintained at their proper strength by voluntary enrolment, the number of men required to complete such corps, can be obtained out of the district regimental divisions, in the manner provided for in the law, by means of the Ballot.

Lieut.-Col. Taylor's report, together with the detailed state of the respective corps submitted in the Tabular Annual Inspection Returns, will be found in the Appendix.

MILITARY DISTRICT NO. 2.

The authorized strength of the Active Militia in this District, all arms and ranks, is 7,412; the actual number, all arms and ranks, who have performed the Annual Drill for 1871-72, 6,011; to complete corps to their proper strength 1,401 officers and men are required, there being a deficiency of sixty eight officers, and 1,333 N. C. officers and men. In this district there are seven troops of Cavalry, three Field Batteries of Artillery, three Batteries of Garrison Artillery, fourteen Battalions and one Independent Company of Infantry, forming the following corps:—

Cavalry.

Governor General's Body Guard Troop

Oak Ridges Troop,

Markham do

St. Catharines do

 12th do
 13th do
 19th do
 20th do
 31st do
 34th do
 35th do
 36th do
 37th do
 38th do
 39th do
 44th do

Sault Ste. Marie Independent Company.

Staff :—7 Officers, 4 men,
 6 horses.

Cavalry :—Provisional
 Regiment (7 troops), 22
 officers, 273 men, 283
 horses.

Field Artillery :—3 bat-
 teries with 12 guns, 14
 officers, 209 men, 170
 horses.

Infantry :—11 battalions,
 296 officers, 3,970 men,
 53 horses.

Total of all ranks, 4,795
 men, 511 horses.

The 20th, 31st and 35th Battalions, the Toronto Garrison Battery, and Barrie Mounted Infantry, performed the Annual Drill at their own head-quarters—the Collingwood and St. Catharine Batteries on board the gunboat “Prince Alfred”—the remainder of the corps were assembled in camp at Niagara on the 6th June, and formed into a division (strength as per margin) for sixteen days' continuous drill. The division was under the command of Lieut.-Còl. Durie, commanding the Militia in Military District No. 2, and the Force was concentrated in camp at Niagara, on the immediate frontier, *in one day* (6th June), with the exception of one corps, the 39th Battalion County Norfolk), which, having to come upwards of 120 miles from its regimental head-quarters, could not join the division till the following day. Most of the corps were brought

to Niagara by waggon, rail or steamboat, several of the Cavalry Troops, and a portion of the Field Artillery, and Infantry, however, marching to camp. The Welland Field Battery marched a distance of twenty-five miles from Port Robinson to Niagara during the night of the 5th June, reaching camp early in the morning. The arrangements for this rapid concentration were well planned, and carried out in a manner reflecting much credit on Lieut.-Col. Durie, his staff, and commanding officers of corps, especially upon those officers of the Field Artillery who moved their guns, waggons, and horses by steamboat and rail without any accident whatever. The average distance travelled by the different corps to reach Niagara was upwards of ninety miles, and not only was this rapid concentration of the men effected easily and without confusion, but also the necessary large supplies of food and camp equipage, together with a very considerable supply of ammunition required for target practice. The Field Batteries came with their proper supply of service ammunition, and it may be said that this force of nearly 5,000 men, was concentrated in one day, at a strategic point of importance on the immediate frontier, almost in a condition to enter upon a campaign. A small portable medicine box was provided for every corps, and had the division been called on to undertake operations in the field, it would have been easy to attach a few waggons to every battalion and corps for the transport of provisions, ammunition, hospital equipment, camp equipage, &c., and to issue to the Infantry a proper description of boot, for marching. On arriving at Niagara on the 7th June, I found this camp well formed and laid out according to the annexed plan.

The position of the camp, in a military point of view, was well chosen; the front being protected by the Niagara River, the left flank by the town of Niagara and Lake Ontario, the right and rear by thick woods; the camp was laid out with regularity in the manner directed in the Militia Orders and Regulations, which is an approved *Military method*; it formed three sides of a large square, the front of the position being commanded by the field guns when parked; 600 bell tents were pitched, there being in addition many large marquees used as regimental canteens, or for officers' messes. Lt.-Col. Durie reported that he received great assistance in laying out this camp from Major and Brevet Lieut.-Col. T. C. Scoble, 37th Battalion, who is a zealous Militia officer. Circumstances permitted my remaining at Niagara during nearly the whole time the troops were there, and I was thus enabled not only to inspect every corps, and muster personally every officer, man and horse present, but also to watch closely the working of the system. Lieut. Mason, 13th Battalion, acted as supply officer, and no man could have performed his important duties with greater zeal and ability; from daylight till dark this officer was at his work, receiving and distributing the ration supplies; Lieut.-Col. Mackenzie, 35th Battalion (his own corps not being in the camp), acted as camp quarter-master with equal zeal and activity, whilst Brevet Major G. H. Dartnell, 34th Battalion, Musketry Instructor to the division, performed his laborious duties with marked success; it was mainly owing to this officer's energy that the whole of the corps were put through the prescribed course of target practice within the time allowed; Lieut. Geddes, of the Hamilton Field Battery performed the

duties of orderly officer, and was most useful, the two permanent Brigade-Majors of the District, Lieut.-Cols. Denison and Villiers, attending with customary efficiency to their own legitimate duties, ably supported Lieut.-Col. Durie in his command. It certainly was most creditable to the staff of this division, that a force of the strength and description assembled, could be concentrated so rapidly, supplied, drilled and maintained from day to day for a period of sixteen days, and then dispersed to their respective corps' headquarters as quickly, as they had been assembled, not only without any fuss or confusion, as frequently happens on such occasions, but without accident or injury of any kind occurring.

The routine of drill carried on by the corps in this, as in all the other camps, was similar to that observed at the Goderich camp, and as prescribed in the General Orders of 5th May, 1871. The Cavalry Corps assembled (7 troops), were formed in a provisional regiment for drill and administrative purposes, under the command of the senior Cavalry officer, Lieut.-Col. McLeod—both officers and men presented a good appearance, were mounted on serviceable horses, and considering that they had never been previously brought together acquitted themselves creditably on parade. The three Field Batteries (12 guns), were placed under the command of the senior Artillery officer present (Captain Smith, of the Hamilton Battery), and the Inspector of Artillery (who inspected these batteries regimentally) reports upon them as follows:—"Gun drill good, driving fair, but some officers and non-commissioned officers not well up in field manoeuvres; shot and shell practice good; the batteries generally well horsed; the Welland Battery not as good at manoeuvring as the other two, but it has not the same advantages; this Battery marched twenty-five miles to camp in one day, and also marched back to its local Headquarters in the same time; the Hamilton Battery marched twelve miles to St. Catharine's, from thence by rail. Capt. Grey who commands the Toronto Field Battery, is a very efficient officer." Of the Infantry Battalions (11 in number), four Battalions were in rifle, the rest in scarlet uniform clothing; the arms, generally speaking, were in good order, and the accoutrements, although of various kinds and some of obsolete pattern, were yet serviceable; many articles, however, were wanting, which I was informed had been originally issued by the Department, but subsequently lost.

As with the brigade at Goderich the most glaring and serious defect in the equipment of the infantry was the want of a suitable description of boot for marching. The majority of the men wearing high heeled, narrow soled boots, somewhat similar to those used by the citizens of the United States, and which are quite unsuitable for marching in; many of the men too appeared in white summer boots, such as are used by women. In this respect the infantry corps were lamentably deficient.

The appearance of the whole division, however, when assembled on parade under arms was creditable, most of the corps drilled fairly, among which I may mention, in particular, the 2nd "Queen's Own," under command of Lieut.-Col. Gillmor.

The Division parades were witnessed by numerous spectators, and the field days by several professional officers belonging to the regular army of the neighboring republic. who

expressed their surprise and approbation at the general appearance, and degree of efficiency attained by this portion of the "Active Militia." As you were enabled personally to visit the Niagara Camp, an opportunity was presented to you under favorable circumstances of seeing the corps there assembled, and it affords me pleasure to state that the remarks you thought proper to make, and the thanks you then, on behalf of the Government and the country, conveyed to the officers and men present, appeared to have an excellent effect, and seemed fully appreciated.

I have to convey my best thanks to Lieut.-Colonel Macpherson now employed in the Financial Branch of the department, Lieut.-Colonel Brunel, late of the 10th "Royals," and Major T. Ross of the Ottawa Brigade of Garrison Artillery for the services these officers rendered me in connection with my inspection of this camp; Major Alger, the district paymaster was also present during the whole time the camp was in operation and attended most carefully to the discharge of his important duties.

Lieut. Colonel Durie reports that out of the 14 battalions in the district, the average muster of nine was fifty men per company, the remaining five battalions, however, averaging only thirty-eight men per company. The 38th Battalion mustered strongest in the district, wanting only five men to complete to its full establishment, but there are no less than sixty-eight officers and 1,333 men wanting to complete corps in this district to the proper strength.

The majority of the officers commanding corps in Military District No. 2, appear to consider it necessary and desirable to fill up the ranks of corps by means of the Ballot. With reference to this important matter, I would beg to recall to your memory that the first occasion on which the necessity for applying the Ballot system was brought prominently and officially to your notice, occurred at the Niagara Camp, at the levee held on the 16th June, 1871, which was attended by nearly the whole of the officers of the militia in camp, and many other gentlemen. On that occasion several of the commanding officers of corps, men of local experience and influence, stated that, in their opinion, the time had arrived when, for "military reasons," in order to maintain the different corps at their authorized proper strength, and socially to equalize the pressure of military service on the community at large, it was necessary and desirable to apply the Ballot, as provided for by law; subsequently, on the occasion of the levee held at the Laprairie Camp, which was also attended by a great number of officers, similar representations as to the propriety of applying the ballot were made to you by Lieut.-Colonel Lord Aylmer, commanding the 53rd Battalion, speaking on behalf of the whole body of the officers and men of the Active Militia in that district.

Lieut.-Colonel Durie considers that a reliance on the system of voluntary enlistment alone, will fail to maintain existing Corps of Active Militia continuously at their proper strength.

The camp at Niagara for sixteen days continuous drill, with the system of target practice introduced, and prizes awarded, proved of much benefit to the force in this District and gave much satisfaction; Lieut.-Colonel Durie recommends that the whole of the Active Militia in his district be assembled next June at Niagara in camp for a

similar period of drill ; he suggests the amalgamation of the different Cavalry troops into a district regiment, and the addition of two or four companies in the County of Wentworth, so that every county in the district would then have its own battalion.

The annual inspection returns of all corps in this district will be found in the Appendix ; As already stated, "the 20th, 31st and 35th battalions were not present at the Niagara Camp, and I regretted much their absence. The Toronto Garrison Battery at Toronto, and the St. Catherines and Collingwood Batteries embarked for eight days' gun drill on board the gunboat "Prince Alfred."

The 31st Battalion (County Grey), made the highest average shooting figure of merit in the district at the annual drill, scoring 16·78 points. No. 6 company, 31st Battalion was the best shooting company in the district, figure of merit 23·81 points, and private John Parks, No. 6 Company 31st Battalion, the best shot in the district.

Private John Parks was also reported the best shot in the Active Militia of the Dominion for the year 1871-72, scoring at the 600 yards range 18 points, at the 400 yards range 18 points, and at the 200 yards range 15 points, total 51 points out of a possible figure of 60 ; thus winning in addition to the company prize of \$5, with badge, the battalion prize of \$10, with badge, and the district prize of \$15, the Adjutant-General's prize of \$50, with a silver medal.

The great majority of the men who performed the annual drill in Military District No. 2, were *bonâ fide* enrolled men ; it is difficult to obtain any reliable information as to the numbers of men likely to claim their discharge prior to the next annual drill, but as a rule, all battalions lose numbers, about one fourth or fifth may be taken as an average.

With a view to increasing the efficiency of the force in this district, I beg to recommend that the Queenston and Barrie Mounted Corps be changed to Cavalry, that another troop of Cavalry be raised in the County of Welland, and that all the cavalry troops, be then formed into a district regiment, to be numbered the "2nd Regiment of Cavalry," (the Governor-General's Body Guard Troop, however, which does not wish to join a district corps, but desires to retain its distinctive appellation, to be excepted); that three companies of engineers be formed, one in each of the brigade divisions ; also to point out that if it be found impossible to fill and maintain the ranks of existing corps in this district at their proper strength by voluntary enrolment alone, the number of men required to complete them can be obtained by means of the Ballot as provided for in the law.

MILITARY DISTRICT No. 3.

The authorized strength of the Active Militia in this district is 4,326 (officers and men,)—3,849 (officers and men,) were actually present at the muster and performed the Annual Drill for 1871-72—leaving a deficiency of 477 (officers and men) wanting to complete corps to their proper strength. The Force in the District consists of two Squadrons and one troop of Cavalry, Field Artillery one Battery, Garrison Artillery four Batteries, Infantry ten Battalions, forming the following corps :—

Corps.	Actual Strength.			Wanting to complete Establishment.	Performed Annual Drill in Camp at Kingston, for sixteen days.

Two Camps of exercise were formed in this district under the command of the late Lieut.-Col. Alex. Patterson (who, in the absence of Lieut.-Col. Jarvis, was in command, of the Militia in this District) at which the whole of the Cavalry, Field Artillery and Infantry corps were assembled, for the performance of the Annual Drill. Four Batteries of Garrison Artillery, being brought to Kingston for Gun Drill, under the Inspector of Artillery. The above return shews the corps assembled at each of the camps, their strength, and numbers wanting to complete. The Brigade assembled at Kingston numbered 2,755 officers and men with 319 Horses; and the camp was in operation for sixteen days on the same principle as those at Goderich and Niagara. The camp at Cobourg consisted of two Infantry Battalions, with one troop of Cavalry, numbering 701 officers and men with 60 Horses, and was only in operation for eight days, being also like the one at Sarnia under the ordinary regulations relative to time,

pay and supply it was by no means so popular with either officers or men as the larger one at Kingston. I inspected the whole of the corps assembled at these camps and found their general condition to be on the average very similar in degree of efficiency to those in the Goderich and Niagara Camps. The Northumberland and Durham squadron of Cavalry under command of Lieut.-Col. Boulton, joined the camp at Kingston with a mounted band and together with the Frontenac Squadron, under Major Duff, was formed into a Provisional Regiment under the command of Lieut.-Col. Boulton. The Cavalry assembled at this camp presented a very creditable appearance, the majority of the officers and men being better mounted than those at Niagara, and they rode well; the arms and accoutrements of the Cavalry were in good order, but the uniform clothing much worn. I found the arms, accoutrements and clothing of the Infantry in a serviceable condition with few exceptions, and was much pleased with the manner in which they drilled at several field days. The Kingston Field Battery, under the command of Major Drummond, was inspected regimentally by the Inspector of Artillery, and reported as being in good serviceable order, making excellent practice when firing shot and shell at the target; the conduct of the men at the Kingston Camp was very good, no complaints being made by commanding officers, nor by the Civil authorities of Kingston.

The four Garrison Batteries of Artillery in this district went into Fort Henry at Kingston on the 4th September for eight days, under the command of the Inspector of Artillery, and the remaining corps, viz., the Napanee Cavalry troop, 45th and 48th Battalions of Infantry formed the Brigade assembled at Cobourg.

The best shooting battalion in the district was the 48th, figure of merit 14.53; the best shooting company was No. 1 Company, 48th Battalion, figure of merit 24.04; and the best shot in the district was Corporal Frederick Hobbs, No. 1 Company, 45th Battalion, who made 51 points.

The whole of the Infantry corps in the two camps went through the prescribed course of target practice. The district paymaster was present at both camps, and paid all corps before they left for home.

Lieut.-Col. Patterson reported that the progress made by the troops in the sixteen days camp was very satisfactory, but that the eight days camp afforded too little time for instruction in drill and rifle practice to be of much value; that the whole of the men were reported as *bonâ fide* enrolled members of corps, but that he did not think the strength of existing Corps could be maintained continuously by the system of voluntary enrolment alone. He was unable to ascertain from commanding officers the probable number of men who will claim discharge from their respective Corps before the next Annual Drill, but from what he could learn, thought the number would be large, and considered that the time had arrived when the ballot should be applied to fill up the ranks when volunteering was exhausted.

With a view to placing the Active Militia in this district on a better footing, and in order to regulate the proportion of arms, I beg to recommend that two additional troops of Cavalry be formed (one in each of the brigade divisions)—that all the Cavalry troops be then formed into one district regiment, to be numbered "the 3rd Regiment of

Cavalry," that a battery of field artillery be formed in the sixth brigade division, and that two companies of engineers be raised, one for each brigade division in the district. Since the performance of the Annual Drill, the staff of the Militia in this district has sustained great loss by the death of Lieut.-Col. Patterson, a veteran soldier, trained in the regular army, long resident, and universally respected in the district.

MILITARY DISTRICT, No. 4.

The authorized strength of the Active Militia in this district is 3,228 (officers and men), exclusive of the Civil Service Rifle Company, which does not receive pay, and although a corps that would be of value as a home guard in an emergency, it could not easily be made available for active service. The actual number who have drilled for 1871-72 is 2,644, shewing a deficiency of 594.

The force consists of

- 1 Field Battery of Artillery.
- 1 Brigade, and
- 2 Batteries of Garrison Artillery.
- 6 Battalions and
- 3 Independent Companies of Infantry.

and is composed of the following corps:—

	Wanting to complete.
Ottawa Field Battery	6
Ottawa Brigade of Garrison Artillery	38
Gananoque Battery	12
Iroquois do	16
18th Battalion	39
41st do	70
42nd do	19
43rd do	160
56th do	58
59th do	176
Total	594

In addition to the above there is the Brockville and Ottawa Railway Battery of Garrison Artillery numbering 77, the Ottawa Rifle Company numbering 3 officers and 36 men, and the Pembroke Infantry Company, 2 officers, 38 non-commissioned officers and men.

9 Batteries of Garrison Artillery (28 officers, 434 men), were drilled for sixteen days as artillery in Forts Henry and Frederick at Kingston, under the instruction of Lieut.-Colonel French, Inspector of Artillery, with marked advantage,—164 officers, 1,941 men, with 90 horses were assembled in a brigade camp of exercise at Prescott for sixteen days,

and the Brockville and Ottawa Railway Garrison Artillery corps also performed sixteen days drill.

164 officers.
1,941 men.
2,105 with 90 horses.

The Brigade Camp at Prescott was formed on the 12th September, the force assembled (strength as per margin,) being moved into camp chiefly by railway, steamboat, and waggon. The Ottawa Field Battery, with four guns and 55 horses however, marched from Ottawa, with the Ottawa Rifle Company as an escort, a distance of 59 miles, carrying their supplies, camp equipage, ammunition, and properly equipped for field service. On the 25th September I inspected this camp, which was formed on the Government ground at Prescott, close to Fort Wellington, the Brigade being under the command of Lieut.-Colonel Jackson, (who, in the absence of Lieut.-Colonel Atcherley commanded the militia of this district,) Major Scott, 42nd Battalion acting as supply officer, Captain McDonald, 59th Battalion, as Brigade Major, Lieut.-Weatherley, Civil Service Rifles, as Musketry Instructor, and Captains Butterfield and Wells as Orderly Officers.

The condition and appearance of the Brigade was satisfactory, the majority of the men being able-bodied and in the prime of life; their arms and accoutrements were in serviceable order, and they had acquired considerable efficiency in drill. The Ottawa Field Battery was practised in gun drill, driving drill, field manœuvres, firing with shot, shell and case. The inspection of this battery was made by the Inspector of Artillery, who reports that "the gun drill was good, driving and manœuvring good, and that the officer commanding was well up in field drill, but that the battery took five days (including one Sunday) to march to camp, and that the distance might have been done in two, or at most three days." A battery of Horse Artillery of the Regular Army in England, on the conclusion of the autumn manœuvres last September, marched to Woolwich in one day, a distance of forty-four miles.

This camp was visited by His Excellency the Governor General, accompanied by several members of the Government, who expressed approbation at the appearance of the brigade. The whole of the Infantry were practised in company, battalion and brigade drill, and performed the prescribed course of target practice. The supply and transport arrangements were well carried out.

The best shooting battalion in this district was the 41st, figure of merit, 11.64; the best shooting company was No. 4 Company, 41st Battalion; and the best shot in the district was Serjeant William McNaughton, No. 3 Company, 41st Battalion.

The inspection of the Brockville and Ottawa Railway Battery was made by Lieut.-Colonel Jackson on 21st November, whose report on the corps will be found in the Appendix.

Referring to the subject of recruiting corps in this district without the assistance of the Ballot, Lieut.-Colonel Jackson is of opinion that it cannot be done satisfactorily.

With a view to regulating the proportion of arms in Military District No. 4, I beg to recommend the gradual formation of Cavalry corps, the formation of another field battery of artillery in the district, and two companies of engineers.

MILITARY DISTRICT NO. 5.

The authorized strength of the Active Militia in this district is 5,284 (officers and men), the actual number who performed the Annual Drill is 3,865 (officers and men), leaving 1,419 (officers and men) wanting, to complete; the deficiency in the different arms being as follows:—

Present authorized strength,

	Officers.	N. C. Officers and Men.
Cavalry.....	12	220
Field Artillery.....	5	74
Garrison Artillery and Infantry.....	371	4,913
Actual strength inspected,		
Cavalry.....	11	172
Field Artillery.....	4	64
Garrison Artillery and Infantry.....	284	3,581
Thus leaving a deficiency in		
Cavalry.....	1	48
Field Artillery.....	1	10
Garrison Artillery and Infantry.....	81	1,336

The force consists of

2 Squadrons of Cavalry.

1 Field Battery.

1 Brigade, and 2 Batteries of Garrison Artillery.

2 Companies of Engineers.

10 Battalions, and

5 Companies of Infantry, and is composed of the following corps:—

Cavalry.

Montreal Troop.

St. Andrew's Troop.

Cookshire „

Sherbrooke „

Field Artillery.

Montreal Field Battery.

Garrison Artillery.

Montreal Brigade of Garrison Artillery.

St. John's Battery „

Sherbrooke „ „

Engineers.

1st Company of Montreal Engineers.

2nd „ „

Infantry.

1st Battalion (Rifles).

3rd " "

11th " "

50th " "

51st " "

52nd " "

53rd " "

54th " "

58th " "

60th " "

and the Aylmer, Eardley, Drummondville, Thurso, and Wakefield, independent companies of Infantry.

Lieut.-Col. Osborne Smith, C. M. G., commands the militia in this district (although at present employed on special service in Manitoba), with regard to the prospect of maintaining the force in this district by trusting to voluntary enrolment alone, that officer states :—" As a large number of the men in the district will complete their service before the conclusion of the present financial year, I have endeavoured to ascertain by communications with officers commanding corps, whether they consider it probable that recruits or re-enlisted men are likely to fill the ranks of their respective battalions. With very few exceptions the answers are in the negative, and a strong desire is expressed that the ballot may be enforced." Lieut.-Colonel Osborne Smith, in his report, which will be found in the Appendix, states :—

"My personal observation induces me to endorse these opinions. Indeed, I feel satisfied that unless an emergency should arise, the actual strength of the district will, at the ensuing drill season, be found at least one-third less than it is at present, unless that it is perfectly and distinctly understood that drafting will be placed in operation in regimental districts which may not furnish the authorized quota *as established by the corps at present gazetted.*"

With the exception of the Montreal Garrison Artillery, which encamped on St. Helen's Island for the performance of their Annual Drill, and the St. John's Battery of Garrison Artillery, which drilled at its own local head-quarters, the whole of the corps in this district were assembled at Laprairie for sixteen days drill, together with nearly the whole of the available corps belonging to Military District No. 6, in a Divisional Camp. The force here assembled (strength as per margin),
Officers and Men 5,310. was formed into three brigades, the whole division being under the command of the senior officer, Lieut.-Col. Osborne Smith; the details of the strength of corps, &c., &c., is shown in the tabular inspection returns attached to Lieut.-Col. Smith's report in the appendix. The troops in this camp (which was more numerous attended than any of the others formed in the Dominion during the past summer), were under the same regulations relative to pay and supply as those at Goderich, Niagara, Kingston, and Prescott. The Divisional staff was formed by the undermentioned officers:

Lieut.-Col. Gillmor (2nd Queen's Own Rifles) acting as Assistant Adjutant General ; Lieut.-Col. McKay (Montreal Garrison Artillery), as Assistant Quartermaster General ; Lieut.-Col. Moore (unattached), as Camp Quartermaster ; Lieut.-Col. Bacon, Brigade Major, as Musketry Instructor ; Major Dowker, Montreal Garrison Artillery, as Supply Officer ; Captain McKay, Montreal Garrison Artillery, as Aide-de-Camp ; Lt.-Colonel Osborne Smith reports that his " warmest acknowledgements are due to these officers for the indefatigable zeal and ability with which they performed their various duties." Having personally witnessed the manner in which these officers acted, it affords me great pleasure to bear similar testimony, and to convey to them my own hearty thanks. A much larger number of men than was at first expected, having joined this camp suddenly, a severe strain was, for two or three days, put upon the limited supply and camp equipment resources of the Militia Department, but the staff were equal to the occasion, and Major Dowker proved himself an energetic and capable supply officer. The routine of drill and duties, as prescribed in the General Orders of 5th May, 1871, was carried out, as far as circumstances and time would admit. I was present for several days in this camp, and not only inspected but personally mustered every officer, man, and horse, for pay and rations.

The Montreal Field Battery, unfortunately, (owing to the difficulty experienced in obtaining horses), was only able to join the camp for four days, and then with horses of all sorts and sizes, not accustomed to double harness—it was practised in gun drill and field manœuvres, the Inspector of Artillery reported their gun drill as *very good*, the driving indifferent. With regard to this battery, which is commanded by a zealous and energetic officer, and composed of an intelligent and fine body of men, the ever recurring difficulty it experiences in procuring horses whenever required, either for actual service in defence of the country, or for the performance of the Annual Drill, practically seems to render it non-effective. In alluding to this battery in his report, the Inspector of Artillery says, " In 1870 when the Montreal Field Battery was ordered out to repel a Fenian raid, this battery, it will be remembered, kept a regiment waiting for several hours, and was *eventually a day too late* for the affair at Trout River ;" this was greatly to be regretted, but for the absence of horses it might have been with the troops on that occasion, when wanted, and had an opportunity of throwing a few shot or shells among the miscreants then invading the Dominion, but who seemingly would not approach near enough the troops to be reached by any other description of fire. The Inspector of Artillery in his report further remarks that " the same battery could only turn out for four days at Laprairie this year (1871), the officer commanding having to promise the people who supplied him with horses, that they were to be returned within that time ; such a state of affairs is highly objectionable, and I would again urgently recommend the enrolment of *draught* horses for *Field Batteries*."

The cavalry, consisting of two squadrons, was formed into a provisional regiment during the period the camp was in operation, under the command of the senior cavalry officer, Major Burwash, of the St. Andrew's troop. One of the squadrons, from the ~~Eastern townships~~ marched by road to join the camp from their homes a distance of 110

miles, in three days, returning in the same manner. The men in these two squadrons, were mounted on good serviceable horses, their arms and accoutrements were in good order but their uniform clothing much worn, these men were very handy at camp life, and although encamped with the rest of the troops on an open plain, in a very short time, with such material as the ground afforded, or they could find at hand, they erected camp stables for their horses of a suitable description, where the animals were comfortably secured, and "*stampeding*" rendered impossible. In this important part of the duty of Cavalry they showed superiority to the corps of that arm assembled at the camps in the Province of Ontario. The infantry consisted of no less than nineteen battalions, most of whom, however, were numerically very weak indeed, some corps on parade were virtually little more than two companies strong in point of appearance—the whole force, however, when on divisional parade, and deployed in one line, with the regulated intervals between corps, presented an imposing appearance, covering an extent of about one mile and-a-half of ground. On mustering the force, I found nearly the whole of the 3rd Brigade to be composed of French speaking Canadians, and in the two other brigades, although the great majority of the men were English speaking, being struck with the number of French Canadian names while calling the rolls of the different companies, I obtained an accurate return of the number of French speaking Canadians in the camp, and they exceeded 2,000 in number.

The appearance and condition of the majority of the infantry corps in this camp, in respect to drill, condition of arms, accoutrements, and soldierlike bearing, was inferior on the whole to the majority of the infantry corps assembled in the Province of Ontario, although there were exceptions; but the men, although generally speaking not so tall, looked at least quite as hardy and robust, indeed some of the rural companies, of both French and British descent, looked fit to undergo great hardship, and the adaptability of all to camp life was most striking, indeed in this very important part of military instruction, not only have both French and English speaking Canadians little to learn from any army, but they could teach a lesson to many.

Lieut.-Colonel Osborne Smith reports that "the general conduct of the troops was excellent," that he believes "so large a number of men was never assembled for the time with such an entire absence of crime, and so little irregularity," and there was no serious case of sickness; two fatal accidents have, however, to be regretted, one arising from drowning while bathing, the other from the careless handling of a rifle. The target practice was carried out as far as possible. This camp was visited also by Lieut.-General Sir Hastings Doyle, Commanding Her Majesty's Regular Troops in British North America. The Honorable the Minister of Militia and Defence witnessed a parade of the division, and afterwards inspected the camp, a levée on the occasion being held which was attended by the whole of the officers in camp.

In order to afford practice in moving troops, it was arranged to bring the whole force to Montreal on the 8th July, and after effecting a junction with certain corps there resident, to hold a review. Having left 400 men in camp as a guard, the Division moved from Lacaprairie during the night of the 7th or early on the morning of the 8th July,

upon Montreal, the men carrying one days provisions, the Cavalry and Artillery marching to St. Lambert's there crossed the river St. Lawrence, the Infantry proceeding by road, rail and steamboat. On arrival at Montreal, a junction was effected with the Montreal Garrison Artillery Corps, and two batteries of the Grand Trunk Railway Brigade, by 11 A.M., a Force of 6,170 men was massed in Logan's Farm. The weather was very fine, and a large number of spectators witnessed with pride the concentration of this portion of the "Canadian Army." The field day proved very successful, and the appearance of the troops on parade as well as when marching, subsequently (as a division) through the principal streets of Montreal, was very creditable. The Troops from Laprairie returned to camp the same day without accident to man or horse, after marching an average distance of sixteen miles, and twice effecting the passage of the river St. Lawrence; the whole of the arrangements connected with this march were planned by and carried out under the orders of Lieut.-Colonel Osborne Smith, C. M. G., that officer having shewn much ability on the occasion.

With regard to the Active Militia in this district, not only are all the corps more or less incomplete in men, but the proportion of Cavalry and Field Artillery, very insufficient; the district (comprising three brigade divisions) is an exposed one, a large portion of it being to the south of the River St. Lawrence, covering the wealthiest, most populous, and important city in the Dominion, (Montreal,) and it is moreover very open to attack in case of invasion on the southern frontier.

In order to complete the ranks of corps to their proper strength, Lieut.-Col. Osborne Smith advocates the Ballot, but there are some commanding officers who still think that they may be able to maintain their corps by voluntary enrolment: the commanders of the Cavalry, Field Battery, one battalion and two independent companies of infantry are of this opinion. But Lieut.-Col. McKay, commanding the Garrison Artillery who expects to lose about 100 men on completing their period of service; Major Kennedy, commanding the Engineers 50 men; Lieut.-Colonel Bond, commanding 1st Battalion, 160 men; Major Martin, commanding 6th Battalion, 65 men; Lieut. Eathorne commanding Thurso Infantry Company, 25 men; Captain Cates, Wakefield Infantry Company 15 men, all consider that the Ballot should now be applied, and Lieut.-Colonel Bethune, commanding the 3rd Battalion (Victoria Rifles), who expects that nearly the whole of his men will claim their discharge on the termination of their period of service, applies for authority to fill the ranks of his Battalion by means of the Ballot.

It seems that, although very many men in the City Corps of Montreal are desirous of joining or re-enrolling in the respective Corps, they are practically prevented from doing so in many instances by the action of the employers of labor, who from selfish motives require those they employ to claim their discharge from the Active Militia, before engaging them for civil service.

I beg to recommend that the Cavalry in this district be increased by six troops, to be formed out of the agricultural population in the frontier counties of Huntingdon, Missisquoi, Shefford, Brome, Stanstead and Compton, and all the troops of Cavalry then formed into one district regiment to be numbered the "5th Regiment of Cavalry," that

two additional batteries of Field Artillery be formed in that portion of the district south of the River St. Lawrence, the head quarters of one to be at Granby, of the other at Sherbrooke, that two additional companies of Engineers be formed, and if the respective corps of all arms cannot be completed by voluntary enrolment, as provided for in the laws, that the Ballot be put into operation, in order to obtain the required number of men.

MILITARY DISTRICT No. 6.

The authorized strength of the Active Militia in this District (which is under the command of Lieut.-Colonel Harwood,) is 3,228, but the actual number available, and who performed the annual drill of 1871-72, is 1,512, leaving 1,716 wanting to complete. The Force in this district consists of the 4th Battalion, under the command of Major T. O. Labranche, which at the time of the Annual Drill, only mustered four officers and forty six men, (being actually below the strength of one company). The 64th Battalion under Lieut.-Colonel Rodier, 23 officers, 184 men; the 65th Battalion, Lieut.-Colonel Baudry, 17 officers, 158 men; the Three Rivers Provisional Battalion, 12 officers, 100 men; the Joliette Provisional Battalion, 17 officers, 154 men; the St. Hyacinthe Provisional Battalion, 11 officers, 145 men; and 17 independent companies of Infantry, viz:—

The Como Rifle Company,.....	3 officers, 30 men;

Camp,) informs me that he considers the application of the Ballot necessary to maintain Corps in this District numerically efficient, he states, after having consulted with the officers commanding corps in my District, I have come to the conclusion that the Ballot must be resorted to.

“Several well-to-do persons have told me that they would willingly shoulder the musket were they obliged so to do, but that their occupations would not allow them to voluntarily neglect their business and impair their fortunes, forgetting, undoubtedly, at that moment, that to contribute to the defence of his country is a sacred debt due to every man, therefore, according to my humble opinion, the only just and legal way to have every one share equally is the Ballot, so by that means every one will acquire, in rotation, the military knowledge necessary now-a-days to every good citizen.

“I will also add, that, from what I hear from Commanding Officers of Corps, it is my firm belief that two-thirds of the men who have served their time, will ask to be discharged.”

MILITARY DISTRICT No. 7.

The authorized strength of the Active Militia in this District is 5,012 (officers and men). The number who have performed the Annual Drill for 1871-72, is 3,784 (officers and men), leaving 1,228 (officers and men) wanting to complete. This District is under the command of Lieutenant-Colonel Casault, C.M.G., but at the time of the Annual Drill, that officer being absent on special service in the Province of Manitoba, the command devolved on Lieutenant-Colonel Duchesnay, Brigade Major. The Force in the District consists of :—

- 1 Squadron of Cavalry.
- 1 Battery of Field Artillery.
- 1 Brigade of Garrison Artillery.
- 7 Battalions, and
- 4 Independent Companies of Infantry, with
- 3 Marine Companies, and is composed of the following corps :

Cavalry.

Quebec Squadron—Two Troops.

Field Artillery.

Quebec Battery.

 232 Men.
 70th Battalion, 25 Officers,
 216 Men.

The 8th Battalion (Stadacona Rifles) commanded by Lieutenant-Colonel Reeve, and the detachment of the Quebec Garrison Artillery at "Grosse Isle," performed the Annual Drill at their own head-quarters, completing their course of instruction in sixteen days.

The 8th Battalion was inspected by Lieutenant-Colonel Casault, C.M.G., at Quebec, who reports that for proficiency in drill and smart appearance on parade, it is, and has been for some time, the first Corps in the District.

	Officers.	Men.

 Temiscouata Battalion, 12 Officers, 158 Men.
 Rimouski Battalion, 19 Officers, 166 Men.

formed Battalion Camps for eight days drill, and the whole of the remaining available Corps performed their Annual Drill in a "Brigade Camp," formed at Point Levis, opposite Quebec which was in operation for sixteen days.

This Brigade (strength and corps as per margin) numbered 2,886 (officers and men) of all arms, of whom Lieutenant Colonel Duchesnay reports 2,658 were French speaking Canadians. I inspected the whole of the corps composing this Brigade. The Squadron of Cavalry ("Quebec Hussars") was under the command of Lieutenant-Colonel Forsyth. The men of this squadron presented a soldier-like appearance, their arms and accoutrements were in very good order, more so than any other of the Cavalry corps in the Dominion. They were also fairly mounted, and I was glad to remark that amongst both officers and men there was a considerable degree of "esprit de corps."

The Quebec Battery of Artillery, composed entirely of French speaking Canadians, consists of a good body of men, very soldierlike in their bearing, and respectful in their manner towards their officers. I was much pleased with the general condition and efficiency of this Battery, but it was indifferently horsed. The Regimental Inspection of this Battery was made by the Inspector of Artillery, who reports upon it that "It was practised in Gun Drill, Driving Drill, and Field Manœuvres." That the "Gun Drill" and "Manœuvring" were *very good*, also that "The Subaltern Officers are better acquainted with their duties than those of any of the others," but that "The horses are the worst of any Battery in the Dominion—several of them mere ponies."

This Battery. in accordance with the instructions issued for the training of Field Artillery, performed a march of twenty miles (with waggons properly packed, entrenching tools, camp equipage, small arms, &c., strapped in their places,) between the hours of six a.m. and five p.m.

The Infantry Corps in this Camp were like those in the Laprairie Camp as a general rule, composed of good material, but they lacked practice in drill, and in regard to the state of arms and clothing, they were not as smart and clean as the majority of corps inspected by me in other districts, I found in this camp, however, the only Battalion in the whole Dominion that turned out complete in numbers for the Annual Drill of 1871-72, viz.:—the 23rd (County Beauce) Battalion, a "French speaking Canadian Corps." This Battalion is composed of hardy looking young men, belonging to the agricultural population of County Beauce. It is commanded by Lieutenant-Colonel Duchesnay, and every officer, non-commissioned officer, and private allowed on the strength of the corps was present at his post. In regard to appearance on parade and general efficiency the 55th "Megantic" Battalion was the best in this camp. I regretted to observe numerous irregularities however, in some of the corps, among which I may mention that a few of the officers were actually unprovided with swords, giving as excuse that they could not obtain them in Canada. If it is the case that officers swords cannot be purchased in Canada, I would recommend that a certain number be purchased in England by the Militia Department, for issue on repayment to such officers as may require them.

The routine of drill and duties observed in this camp was similar to that observed in the other sixteen days camps, and I have every reason to be satisfied with the manner in which Lieutenant-Colonel Duchesnay exercised his command.

The position of the camp was well chosen, and the scenery surrounding at that season of the year beautiful. I consider Point Levis as a most suitable and appropriate place for the performance of the Annual Drill by the Active Militia of this District. In order to place the force in this District on a proper footing, I beg to recommend that the Cavalry be increased by four troops, and all the Cavalry Troops then formed into a District Regiment, to be numbered the "7th Regiment of Cavalry," that another battery of Field Artillery be organised in some part of the District south of the River St. Lawrence, that two companies of Engineers be formed, and to point out that if the ranks of the respective corps cannot be completed by voluntary enrolment, the Ballot, can be applied. On this point Lieut.-Colonel Duchesnay in his report makes the following observations :—

"The three years having expired for the service of companies in the District, I may state with certainty that the two thirds of the volunteers enrolled in 1868 will claim their discharges; I find by the opinions of the several officers commanding battalions in the District, that they all concur in stating that it will be impossible to fill up the rolls anew by the volunteer system only."

MILITARY DISTRICT No. 8.

The Force in this District consists of 1 Regiment of Cavalry (7 troops); 1 Field Battery of Artillery; 1 Brigade of Garrison Artillery; 1 Company of Engineers; 4 Battalions and 9 Independent Companies of Infantry, composed of the following corps :—

The New Brunswick Regiment of Cavalry.
 Newcastle Field Battery.
 New Brunswick Brigade of Garrison Artillery.
 St. John Company of Engineers.

The militia of the District is under the command of Lieut.-Colonel Maunsell, who in his report states that:

“1. The strength authorized for the district is 2,864 of all ranks.

“The number of officers and men who have performed their Annual Drill for 1871-72 as follows:—

Officers	173
Non-commissioned Officers and Men	2,229
Total.....	2,402

Leaving 462 officers and men wanting to complete.

“The average attendance at the inspection of the 48 corps authorized was over 50; the difference being accounted for chiefly by men temporarily absent from their homes or sick.

Lieut.-Col. Maunsell is of opinion that captains of companies should have at least 60 men on their rolls, supplied with 60 uniforms, to ensure an average attendance of 55 men per company and he further states:

“The corps above referred to have mostly served their time of engagement, and although there are some praiseworthy instances in which not a man is desirous of leaving, and many others in which the vacancies created by men taking their discharge, will speedily be filled by good and true men by the volunteering system, I am of opinion that in some few instances, chiefly in cities and towns, the necessity and desirability, on military grounds, for completing the deficiencies in the ranks by means of the Ballot, as prescribed and authorized by the existing militia law, is now apparent.

“Having placed myself in communication with officers commanding corps, the majority of these gentlemen bear me out, and endorse the above opinion; and, when properly understood, I am convinced that it will produce good results if the system be generally adopted throughout the Dominion, in cases where *no more volunteers can be obtained*, to call upon that class of the community ‘comprising those of the age of eighteen years and upwards, but under thirty years, who are unmarried or widowers without children,’ to serve in the Active Militia.

“In the first place a *trained* reserve force will thus be formed, composed of men available to reinforce the Active Militia in the hour of need, or again to form part of its quota in time of peace.

“(2.) Those will be drawn into the ranks who, perhaps, for not sufficient reasons, have hitherto taken no part or interest in the service, leaving the “*Enthusiasts*,” so called, to do all the work.

“(3.) By bringing *fresh material* into the force continued interest in the service will be sustained, and the organization more evenly distributed than heretofore.

“It is to be hoped, too, ‘that the people as a body will thus more willingly submit to those sacrifices of their time and personal liberties by which alone the force of the

country can be maintained in efficiency, as, failing that, all our efforts will be rendered nugatory.'

"In conclusion, I may here quote part of a letter from one of the officers commanding corps, above referred to, in which I entirely concur.

"The fact that the captain of the company has personally solicited the most of the men in the ranks to join, places him in a not sufficiently independent position in regard to them, which certainly tends to undermine the discipline of the force.'

"He adds that 'he thinks it desirable that all reasonable ordinary efforts should be exhausted to procure volunteers, before resort be had to a draft or Ballot; but on military grounds he thinks that it is desirable that the Ballot should be brought into requisition to complete the strength of corps after reasonable efforts have been made to obtain volunteers.

"5. I am of opinion that the whole of the men who performed their Annual Drill were *bona fide* enrolled members of the corps according to the Militia Act.

Two "Camps of Exercise" were formed in this District for the performance of the "Annual Drill," one at "Fredericton" the other at "Chatham," both camps being in operation for sixteen days, the following returns shew the corps and strength, drilled at those camps.

The details connected with the performance of their Annual Drill will be found in Lieut.-Colonel Maunsell's report in the Appendix, whose recommendation for increasing the efficiency of the force under his command, I beg to support.

I was enabled to inspect the whole of the Brigade assembled at Fredericton, but inspection duties in Western Canada later in the season did not admit of my visiting the smaller Camp at Chatham. Of the Brigade at Fredericton, the general condition of the corps was "very creditable." The New Brunswick Regiment of Cavalry (301 strong) under command of Lieut.-Colonel Saunders, is composed of excellent material—the majority of the men are farmers in easy circumstances, they are strong hardy fine-looking men, in the prime of life, and were mounted on good useful horses. This regiment, it will be seen on reference to Lieut.-Colonel Maunsell's report, "marched to camp, an average distance of eighty miles, crossed three long and tedious ferries, bivou-

acked at the 'Jémseg' on the night of the 29th, and arrived at Fredericton on the 30th June." On the break up of the camp they marched home in the same manner. The infantry corps in this camp were largely composed of a similar class of men; their arms were all in serviceable order, they were better drilled than any of the rural corps I inspected in the Provinces of Ontario and Quebec; and in point of physical appearance fully equal to the best of the corps in the above named provinces.

The Fredericton Camp was well situated and laid out, the rifle range was convenient and all the corps performed their prescribed course of target practice. Lieut.-Colonel Maunsell exercised his command with great judgment, showing much ability in handling troops, and on two or three occasions, having divided the troops into attacking and defending forces, carried out very successfully "sham battles" on the same principles observed by the regular army at the last "autumn manoeuvres," the practice thus afforded proving most interesting and instructive to all engaged.

The corps not assembled at Fredericton and Chatham in camp, performed the Annual Drill at their local head-quarters. The force of Garrison Artillery in this District is considerable, and composed generally of a very superior body of men. Accompanied by the Inspector of Artillery, I inspected four Batteries of the St. John Garrison Artillery on the 18th of July, and was much pleased at their general condition and appearance; with regard to these batteries I have no hesitation in saying that were they embodied for any length of time, and opportunity afforded for the more scientific instruction of the officers, they would soon equal in point of efficiency the best batteries in the regular army.

Lieut.-Colonel Jago, of the New Brunswick Artillery (who formerly served in the Royal Artillery), has been of great service in imparting instruction to this arm of the service, and as it is of great importance in connection with the defence of St. John and the coast of New Brunswick generally, to have the militia resident in the maritime portion of the province trained to artillery exercises, I would beg to recommend that a "School of Gunnery" be established at St. John, on the same principle as those provided for the Provinces of Ontario and Quebec, at Kingston and Quebec; in addition to affording means of instruction, this school of gunnery would act as a guard to certain forts, magazines, batteries, and armament recently handed over by the Imperial to the Dominion Government. As well as inspecting the Corps assembled in camp at Fredericton and at St. John, I visited St. Andrews and St. Stephen on the Southern Frontier of the Province, inspecting the Artillery Corps resident at those places.

MILITARY DISTRICT No. 9.

(*Nova Scotia.*)

The present strength of the Active Militia in this District is 4,471 (officers and men), of whom 3,823 have performed the Annual Drill of 1871-72, leaving 648 (officers and men) wanting to complete.

The Force consists of—

1 Battery of Light Artillery (having six pounder Armstrong Rifled Guns, but not armed or equipped properly as a Field Battery, although available to act as such.)

2 Brigades and

3 Batteries of Garrison Artillery.

9 Battalions and

3 Independent Companies of Infantry, and is composed of the following corps :
Halifax Light Battery.

1st and 2nd Brigade Garrison Artillery.

Chester Battery of do do.

Lunenburg do do do.

63rd Battalion (Infantry.)

66th do do.

68th do do.

69th do do.

72nd do do.

75th do do.

78th do do.

Cumberland Provisional Battalion.

Victoria do do.

Two camps were formed in this District for the performance of the Annual Drill, one at Aylesford Plains, of three battalions for sixteen days, (the three corps mustering 1,035 men), the other at Lunenburg, a single battalion camp, in operation only for eight days, the majority of the Force in this district performing the Annual Drill at their own local head-quarters.

The following return shews the nominal and actual strength of corps at the time of the Annual Drill, with the numbers wanting in each instance to complete.

SPECIAL Brigade Camp, Aylesford Plains (sixteen days drill.)

Corps.	Nominal Strength.	Numbers of all ranks who performed the Annual Drill.	Deficiency	Place of Muster.
68th Battalion.....	471	333	138	} Aylesford Plains.
69th do	528	430	98	
72nd do	356	272	84	
	1,355	1,035	320	

Camp at Lunenburg, Eight Days Drill.

75th Battalion.....	353	283	70	Lunenburg.
---------------------	-----	-----	----	------------

a march of 20 miles, with waggons properly packed, all entrenching tools, camp equipage, small arms, &c., strapped in their places. The men having breakfasted early, the tents were struck and packed, and the battery, numbering five officers and 71 men, started at 6 o'clock, a.m., returning at 5 o'clock, p.m. Although the weather was very warm the journey was accomplished without accident. The horses on arrival looked fresh, and seemed ready for more work. This Battery is very effective and could be made more so by a little increase in the allowances for horses. I would suggest that the best way to horse field batteries would be, 1st, to enlist in each battery a sufficient number of men proprietors of horses; 2nd, to give, besides a daily drill pay of \$1.25 per horse, a bonus of 75c. for every approved horse on parade.

PAY.

The number of officers and men who have received at the special camp of Levis, as far as I can ascertain, was 247 officers, and 2,639 rank and file. Out of this number 2,658 officers and men were French Canadians.

Captain Forrest was present at camp two days before the breaking up, and managed to settle the greatest part of the claims. I did not hear any complaints as to the pay of the men, the sole instance being the very small allowance to cavalry and battery horses. I can assert that the officers had to go to a good deal of personal expense to be able to secure the horses necessary, and could not get them for less than a dollar a day.

EIGHT DAY'S CAMPS.

The camps of eight days drill were carried out according to orders by the several battalions who had not joined the special camp. The Quebec Garrison Artillery, the 61st and Charlevoix Battalions assembled at their different camping grounds. The number of officers and men present at these camps was 790.

OFFICERS. MEN.

Quebec Garrison Artillery	12	188
61st Battalion	16	229
Charlevoix Battalion	13	232

The 8th Battalion Rifles and Grosse Isle Detachment performed their annual drill at head-quarters, taking 16 days of three hours each to complete their course of instruction. The Gaspé, Bonaventure, and New Carlisle Infantry Companies having completed their term of service and drill, not having informed the Deputy Adjutant General of their intention of putting in extra drill for 1871-72, I have decided to complete my report without them.

In concluding my report I beg to submit the following recommendations, viz; 1st, The amalgamation of independent companies to the nearest battalion; 2nd, That in the reorganization or redistribution of the force one Engineer company, and one field battery should be formed in each Brigade Division resident therein; 3rd, In order to insure a correct muster at the annual drills to prevent any falsifications of accounts or false musters, the muster should be carefully made by the Battalion Paymaster, under the superintendence of the District Paymaster, the Deputy Adjutant General, and the Brigade Major of the Brigade Division.

I beg, in completing my report, to return my heartfelt thanks for the aid I have received from the Brigade Major under my control and the Staff who assisted me at the Brigade Camp at Levis, as well as from officers in command of corps in my District.

I have the honor to be, Sir,

Your obedient servant,

H. T. DUCHESNAY, Lieut.-Col.,
Acting Deputy Adjutant General Militia,
Military District No. 7.

The Adjutant General of Militia,
Head Quarters, Ottawa, P.O.

MILITARY DISTRICT No. 8.

DEPUTY ADJUTANT GENERAL'S OFFICE,

FREDERICTON, N. B., 21st October, 1871.

SIR,—In compliance with your instructions, I have the honor to submit this my Annual General Report on the state of the force, in Military District No. 8, (New Brunswick), under my command.

(1.) The nominal quota and strength authorized for my district is 2,864 of all ranks. The number of officers and men who have performed their annual drill for 1871-72 is,

Officers	173
N. C. Officers and Men	2,229
	2,402
Total	2,402

leaving 462 officers and men wanting to complete.

The average attendance at the inspections of the 48 corps was over 50; the difference being accounted for chiefly by men temporarily absent from their homes or sick. There should have been present for 55 men per company.

I am of opinion that captains of companies should have at least 60 men on their rolls, supplied with 60 uniforms, this would ensure an average attendance of 55 men per company.

The corps above referred to have mostly served their time of engagement, and, although there are some praiseworthy instances in which not a man is desirous of leaving, and many others in which the vacancies created by men taking their discharge, will speedily be filled by good and true men by the volunteering system. I am of opinion that in some few instances, chiefly in cities and towns, the necessity and desirability, "on military grounds," for completing the deficiencies in the ranks by the means of the ballot, as prescribed and authorized in the existing militia law, is now apparent.

Having, in compliance with your instructions, placed myself in communication with officers commanding corps, you will observe that the majority of these gentlemen bear me out, and endorse the above opinion; and, when properly understood, I am convinced that it will produce good results if the system be generally adopted throughout the Dominion, in cases in which *no more volunteers can be obtained*, to call upon that class of the community "comprising those of the age of eighteen years and upwards, but under thirty years, who are unmarried or widowers without children," to serve in the Active Militia for a period of three years.

In the first place a *trained* Reserve Force will thus be formed, composed of men ready and willing to re-inforce the Active Militia in the hour of need, or again to form part of its quota in time of peace.

STATEMENT shewing strength of Companies, &c., which enrolled in accordance with Proclamation issued by Lieut.-Governor, 3rd October, 1871.

* Gazetted Companies Active Militia.

A. G. IRVINE, Major,
Commanding Dominion Troops, Manitoba.

FORT GARRY, 21st October, 1871.

The details connected with this Fenian outrage, as well as an account of the military measures adopted, will be found in the appendix in Major Irvine's report, as well as in the report of Capt. J. Royal, commanding the St. Boniface troop of cavalry, who, with a mounted force of French-speaking Metis, acting as scouts, proceeded to the actual frontier line.

Simultaneously with the adoption of this action by the local authorities, it was determined by the Government at Ottawa to despatch a military expedition, via the "Dawson Route," to Fort Garry, as a reinforcement to the small garrison there retained on duty; and, as an illustration of the working of the Canadian Militia System on a sudden emergency, it may be interesting to detail the measures adopted and the course pursued. On the evening of the 12th October, I received instructions by an Order in

2 Captains, 2 Lieutenants,
2 Ensigns, 1 Surgeon,
200 Riflemen — 207. 1
Quarter-master, 1 Supply
Officer, 1 Paymaster,
60 Voyageurs, and
5 additional Riflemen,
were subsequently added,
making the total strength
of the expedition, in Officers
and Men, 275.

Council to organize a military expedition, (strength as per margin), and despatch the same without delay to Fort Garry.

At the same time, I received instructions to direct Lieut.-Colonel Osborne Smith, C.M.G., Dep. Adj.-Gen. Militia, Commanding Military District No. 5, to proceed to Manitoba, via Pembina, U.S., in advance of the expedition, there to report himself to the Lieut.-Governor of Manitoba, and take command of the militia in that Province.

Lieut.-Colonel Osborne Smith was also to be instructed to arrange for the despatch of transport to the north-west angle of the Lake of the Woods, to meet the expedition (which proceeded (via the "Dawson Route") on arrival at that point.

Immediately on receipt of these instructions, orders were sent by telegraph to the Deputy Adjutants-General of Militia, Commanding Military Districts in the Provinces of Ontario and Quebec, directing them to furnish proportionally contingents of men from the active militia corps of their respective districts, each Province supplying one hundred (100),—the men to be selected from those who volunteered for the special service required; and, after passing a medical examination to ensure physical fitness, to be attested before a magistrate for six months' duty, with a liability for six months' further service, if required. The officers commanding the militia in the districts of Ontario and Quebec were further instructed, after completing their quotas of men, to send them, under charge of a staff officer, to Collingwood, the port of embarkation, there to report to me personally for inspection previous to departure.

Arrangements were made to concentrate at Collingwood the necessary military stores, provisions, supplies, camp equipage, personal equipment, and land transport, required for the expedition. Steam transport also from Collingwood to Thunder Bay was provided; sixty (60) "voyageurs" were engaged to facilitate, if required, the passage of the force on the inland waters of the "Dawson Route." Information was also sent to Mr. Dawson, who was then engaged in completing the line of communication through British Territory by the route known as the "Dawson Route," of the intended expedition; a request was made to him to co-operate in the service, and expedite the passage of the troops.

On the 14th October, Lieut.-Colonel Osborne Smith, C.M.G., reported himself at head-quarters, was duly instructed, and he proceeded without delay via Pembina, U.S., accompanied by Major P. Geraghty, (as his Orderly Officer) to Fort Garry, to take command of the militia in Manitoba.

On the 16th October, the officers of the expedition were appointed in general orders. The expedition, when *en route*, to be under the command of the senior captain, Captain Thomas Scott, (now a Bt. Lieut.-Colonel in the militia); the whole of the officers, with the exception of one, being selected from among those who had served with the expedition of the previous year, who had already been for twelve months on military duty in Manitoba, and who had gained experience thereby. On this date also, Dr. Alfred Codd, the surgeon appointed to the expedition, took over the field hospital panniers and equip-

ment, completing the medicines, &c., required; and he proceeded to Collingwood to await the arrival of the men there, and make a second and final examination of all previous to embarkation. The advanced season of the year rendering it desirable that only very robust men should be allowed to proceed.

On the 17th October, the officers commanding military districts in Ontario and Quebec, reported that their respective contingents were ready, and the men duly examined and attested, (no difficulty whatever was experienced in obtaining volunteers for the service, many more than were called for having offered in each of the military districts;) also that, in accordance with instructions, they would be sent, under charge of a staff-officer, to Collingwood, so as to arrive there on the 19th. Five men, in addition to each of the quotas, being sent as waiting men from every military district with the contingents, to take the place of any who might be rejected by the surgeon of the expedition on the second and final medical examination.

On the 19th October, I proceeded to Collingwood, and, on arrival there the following day, found the whole of the officers and men, with the necessary military stores, equipment, and supplies required for the expedition duly concentrated. Steam transport to convey the force to Thunder Bay also awaiting. Early on the following morning the inspection and embarkation commenced. Eight men were rejected by the medical officer on the final examination, their places being filled by some of those "in waiting;" and, on inspection, I found the detachment to consist of a fine body of men, apparently in all respects well fitted for the service, some of whom had served with the expedition of the previous year. The military stores, baggage, camp equipage, &c., and a large quantity of provision supplies were placed on board, mainly by the "voyageurs," who worked most cheerfully and willingly throughout the day. The whole of the force, and most of the supplies having been embarked in the steamship "Chicora," the expedition sailed at 4 p.m., on the 21st October, for Thunder Bay, having been organized, completely equipped, supplied, and despatched *in little more than one week from the date of the issue of orders.*

The conduct of the men *en route* to Collingwood and whilst in billets there, was exemplary, and I never witnessed a more orderly embarkation; previous to their departure, I told off the force into companies and half companies appointing the officers and non-commissioned officers thereto, giving, also instructions both verbally and in writing on matters of detail to the officer in command. I also saw proper accommodation provided for both officers and men on board the vessel for the voyage, and after the departure of the "Chicora," the remainder of the supplies with thirty horses, fifteen waggons and sleighs, were embarked on board the steamship "Manitoba," (there being no room for the same on board the "Chicora,") and that vessel sailed also for Thunder Bay at 10-30 p.m., on the 21st October.

The personal equipment issued to each man after embarkation was very full and complete, and they were amply supplied with winter clothing; thirty days provision, supplies of the best and most suitable description were taken with the expedition, (but no spirituous liquors of any kind) and six months supply of provisions followed in view of any possible contingency.

The camp equipage, although limited to what was only absolutely necessary, was considered by experienced men well suited for the service, and the Field Hospital equipment (which I also inspected,) consisting of two panniers, one field companion, one box of medical comforts, and some stretchers, was very complete, and deemed so, by the surgeon in medical charge of the force, who was one of the surgeons that accompanied the expedition of the previous year.

Every man of the military force proceeding was well armed with a short Snider rifle and sword bayonet, having sixty rounds of ball ammunition in his pouch, and, in addition to this, I handed over to the officer in command a supply of reserve ammunition at the rate of 100 rounds per man; there being already a considerable supply of Snider ammunition at Fort Garry, and it being desirable to encumber the expedition as little as possible with stores, I did not deem it necessary to send a larger supply of ammunition.

The provision supplies, consisting chiefly of biscuit, flour and pork, were embarked at Collingwood in half barrels, but four hundred (400) canvas bags were furnished in which the supplies could be carried more conveniently by the men across the various "portages" which intersect the inland waters on the "Dawson Route."

Care also was taken to send a quantity of sheet iron to protect, if necessary, the bows of the small steamers and boats, should any ice have formed on the inland waters. And as the men were supplied with every requisite, even to mocassins and snow shoes, the force left Collingwood, prepared to meet any difficulty likely to arise.

In the performance of my duties in connection with this service, I received every assistance from Lieut. Col. T. Wily, the director of stores, who furnished the military stores, camp equipage and personal equipment, and Mr. Ralph Jones, (a gentleman employed in the department of Public Works, who had made the supply arrangements for the Pacific Railway Surveying parties,) obtained the provision supplies. From the prompt manner in which the call to arms was responded to on this occasion, I have no doubt but that ten times the number of men required, could have been assembled, equipped, supplied, and despatched within the same period, accompanied also, if required, by Field Artillery.

Reference to the report of Brevet Lieut.-Col. Scott, (who commanded the expedition "en route") and to that of Lieut.-Colonel Osborne Smith, who met the force on the Lake of the woods with assistance, shews how admirably the service was carried out by the officers and men in face of great hardships and difficulties. The expedition, with stores, waggons, horses &c., left Collingwood in two steamers, on 21st October, arriving on the 24th (the third day) at Thunder Bay (a distance of 532 miles). The troops and stores at once disembarked, and in the following two days marched 45 miles to Lake Shebandowan, encountering severe weather and heavy snow storms. Twenty teams of horses and waggons were employed in transporting the stores from Thunder Bay to Shebandowan. The men marched the distance in less than thirty four (34) hours, camping the first night at the Matawan. From Shebandowan to the north-west angle of the Lake of the woods, a distance of 310 miles, the force proceeded in boats, and although occasionally

assisted by some small Tug Steamers (wherever these were in working order) the same description of hardship and labour which was experienced in the expedition of 1870, again devolved upon the men. The large quantity of stores and provisions, having to be carried, and the boats dragged across the numerous Portages; the toil and hardships on this occasion, however, were greatly increased by the inclemency of the weather and the unusually early setting in of a North American Winter.

On the 29th October, the expedition crossed the height of land which divides the waters flowing into the Artic Ocean from those which run into the valley of the St. Lawrence; at this time there was about eight inches of snow on the ground, heavy snow-storms prevailing; on Kashabowie Lake, and Lac des Mille lacs, the Tug steamers were useless, pipes being frozen. On the 30th October, at Baril Portage, a way for the boats had to be cut for half a mile through ice three quarters of an inch thick, the moving of the boats and stores across Baril Portage not being completed until after midnight. On the 31st October, by midnight French Portage was crossed. On the 1st November, "Deux Rivieres" was reached, the boats and stores having been taken across "Pine Portage" during a tremendous snow-storm.

On the 2nd November, the men were compelled to jump into the half-frozen water, to haul their boats along, owing to the shallowness of the stream. On the 4th November, a way through ice had again to be cut, and at Loon Creek the water was so shallow that it took thirty (30) hours to get some of the boats through, during the greater portion of which time the men were obliged to be in the water; the stores had to be taken out and carried along the shore, while it required not less than twenty men to pull the empty boats through the mud, thus the expedition was pushed on day and night, its commander exhibiting personally to the officers and men an example of activity, energy and endurance, most honorable and praiseworthy; the same spirit with which he was animated being thus communicated to those under his command, all vied with one another in the display of similar qualities.

On the 11th November, Colonel Osborne Smith, fell in with the expedition on the Lake of the Woods (having come from Fort Garry, bringing with him twenty experienced voyageurs of the Hudson's Bay Company, and a seasonable supply of provisions); a point was reached within fifteen miles of the North west angle, when further advance was stopped by ice, the camp having to be formed for the night on an island; next day an attempt was made to force a passage which succeeded for a certain distance, but finally the troops were landed on the ice and marched to the North west angle, every man carrying his rifle, accoutrements, knapsack, and blankets. From the North west angle of the Lake of the Woods, to Fort Garry (about 110 miles) the distance was marched in four and a half days, (the cold being intense) and on the 18th November, the whole of the expedition arrived safely at its destination without accident or the loss of a man, in three weeks from the time of leaving "Thunder Bay," in four from Collingwood, and in five weeks from the time I received orders to despatch it, the force required *was in Fort Garry, completely equipped and ready for service*, the distance from the point of departure in Ontario being about one thousand (1000) miles, all of the men however

having previously travelled great distances to the rendezvous. These facts speak for themselves, proving the efficiency both of the men and of the system.

From the time the troops left Thunder Bay, till their arrival at Fort Garry, the weather was unusually cold, stormy, and unfavorable, causing considerable delay. Every night the men had to camp out, and the privations to which these hardy Canadian soldiers were exposed, may be imagined from the fact, that on their arrival at their destination, they marched across the Red River and the Assiniboine, on the ice into Fort Garry, and the day afterwards the thermometer had sunk to many degrees below zero.

Mr. Dawson, of the Department of Public Works, accompanied the expedition, throughout this trying march from Thunder Bay to Fort Garry, and afforded it the greatest possible assistance, he speaks in the highest terms of the conduct of the officers and men, of their cheerfulness under privation, of their hardihood and energy; and he declares in conjunction with those officers who had been with both expeditions, that the hardships endured, and difficulties overcome in the Expedition of 1871, were incomparably greater than those encountered in 1870.

In point of time there can be no comparison, the expedition of 1870 having occupied about three months in making the same journey which that of 1871 accomplished in less than one.

It is true that upon neither occasion was there any enemy to meet or "Military Laurels" to be gained by the officers and men of these two Expeditions—the soldiers, nevertheless, who bore so well the hardships inseparable from both, are justly entitled to honorable consideration; the Expedition of 1871, composed entirely of Canadian Militia, commanded by a Canadian officer, and so promptly carried out, will long be remembered with feelings of pride by every Canadian as one of the most successful and remarkable marches of the kind.

By the *Gazette* of 16th October, 1871, Manitoba was constituted Military District No. 10 and already the Militia System of the Dominion has taken root therein.

The active force consists of a Provisional Battalion of Riflemen, at present on duty, of 312 officers and men, of whom 200 are stationed at Upper Fort Garry, 2 officers and 50 men at the Stone Fort twenty miles lower down the Red River, and 2 officers with 50 men at the Hudson Bay Company's Post, at Pembina, on the frontier of the United States, where there is a post and detachment of United States Troops.

In addition to this Battalion, two Cavalry Troops, one Demi-Battery of Artillery, and nine Companies of Infantry have been authorized to be formed, and their organization is progressing.

Lieut.-Colonel Osborne Smith, C.M.G., at present commanding the Militia in this District, reports that the "Demi-Battery" of Artillery is now organized, armed with two bronze rifled Mountain Guns (7-pounders), and that it will prove a useful and efficient corps; that four out of the nine Infantry Companies, gazetted are also formed, the organization of the remainder progressing, and that the Cavalry Troops will succeed in their organization as "Mounted Rifles."

Colonel Osborne Smith, in his Report on this District, which will be

found in the Appendix, states, "that the description of force best adapted to the country is Mounted Rifles;" that an excellent military spirit appear to actuate all classes, and their *physique* is admirable—perhaps no better material for Mounted Riflemen could be found anywhere than among the buffalo hunters of the great Western Prairies. The population from which the force has been drawn, exclusive of Indians and scattered settlers, may be estimated at ten thousand.

"The settled country is well situated, geographically, in a strategical point of view, for the formation of Companies.

"From the parallel of 49° (the boundary line of the United States), the chief settlements extend due north, along the Red River, for about ninety miles; this line of settlement is crossed by another running nearly east and west from Point de Chêne on the River Seine, to the eastward, to Prairie Portage to the westward, on the Assiniboine River. Both these rivers converge at Winnipeg (Fort Garry), falling into the Red River.

"The settled country thus forms a cross, of which Fort Garry may be considered the centre, sixty miles north of the boundary line at Pembina, with Point de Chêne and Prairie Portage, distant thirty and seventy miles respectively, to the east and west."

The Companies of the Provisional Battalion that are at present stationed in Upper Fort Garry are very insufficiently provided with barrack accommodation, the buildings occupied by them, in the Hudson's Bay Company's Post being mere shells, affording inadequate shelter to the men; the fact of so large a number of soldiers, moreover, occupying these storehouses of the Hudson's Bay Company puts that commercial company to considerable inconvenience. If it be intended, therefore, to maintain a portion of the Active Militia on duty for any length of time in the Province, I would recommend that a fort, or defensible Barracks of log huts be constructed in a suitable military position for the proper shelter and accommodation of the troops.

MILITARY DISTRICT No. 11.

British Columbia.

The *Gazette* of 16th October, 1871, constituted this Province, the most distant of the Dominion, into a Military District (No. 11), but as yet no steps have been taken towards appointing any Staff, or enrolling the militia.

The time, however, has now arrived when it is desirable to do so, and I would therefore recommend the formation of certain corps of Active Militia, composed partly of Infantry, and partly of Artillery, for this District; that suitable arms, clothing and equipment for such be ordered and despatched from England, direct to the Province by sea; that the usual assistance in aid of Drill Sheds and Armories, be allowed, a Military School established, Officers of the Reserve Militia nominated, to take the enrolment of all men liable by the Dominion Militia Act to Military Service, and that a competent Staff Officer, be appointed to command the whole of the Militia, in the

District, assisted by two Brigade Majors, one of whom should be with his Commandant at Victoria, the other at some place on the mainland.

GRAND TRUNK BRIGADE.

The Grand Trunk Railway Brigade, under the command of Lieutenant-Colonel Brydges numbers 2,261 officers and men. The following return shews the present strength and distribution of corps in this Brigade.

Battalions.	Commanding Officers.	Field and Staff Officers.	Companies.	Lieutenants.	Ensigns.	Non-Commissioned Officers and men.
1st Brigade Artillery	Lieut.-Col. Hickson	7	6	6	6	448
2nd do	do Spicer	8	6	6	6	391
1st Battalion Rifles	do Bailey	7	6	7	7	422
2nd do	do Shedden	7	9	9	9	502
3rd do	do Stevenson	7	7	7	7	358
		36	34	35	35	2,121

DISTRIBUTION.

The Brigade is distributed as follows:—

Montreal,	{ 1st Brigade Artillery, 1st Battalion Rifles 2nd do }	Headquarters	14	Companies.

Stratford,	do Detachment	1	do	
St. Mary's,	do do	1	do	
Sarnia,	do do	2	do	
			36	do

On the 1st July I inspected a portion of this Brigade on the "Champ-de-Mars," in Montreal, when a Review was held, and a *fou-de-joie* fired, it being the Anniversary of

Dominion Day, and again on the 8th of July I inspected about 800 men of the Brigade, who took part in the field day held at Logan's Farm. On both occasions the soldierlike bearing and efficiency of the corps present was conspicuous.

Lieutenant-Colonel Brydges Commanding, has brought his special Brigade to a high state of efficiency, thus rendering great public service to the country. He is well supported by his officers and men, among whom there is much *esprit-de-corps*. There are many men in the ranks who have served in the Regular Army, and in point of general efficiency, this Brigade is superior to any in the Active Militia of the Dominion. The officers and men are employés of the Grand Trunk Railway Company, from all of whom military service is required. Having recently inspected the Armoury of the Corps belonging to this Brigade, who are stationed in Montreal, I found everything in excellent order, admirably arranged, and the Armoury itself, in point of cleanliness, simplicity and convenience, a perfect model.

With a view to increasing the efficiency of this Brigade, I would recommend that the Artillery Corps belonging to it be trained as far as possible to Artillery Exercises, under the instruction and supervision of the Inspector of Artillery, and provided so soon as the Department is in a condition to do so with suitable armament.

Major T. W. Worsley is the Brigade Major of this Brigade, and this Officer's Report will be found in the Appendix.

CAVALRY.

The present strength of the Cavalry in every District is too weak in proportion to that of other arms, there being but one regiment, five squadrons, and nine independent troops for the whole Dominion. The gradual increase of the Cavalry, and its organization into District Regiments is recommended, also that an additional period for drill should be allowed, so that all Cavalry Corps might be drilled and paid for 32 days in the year, 16 of those days with the respective Brigades, during the summer season, in "Camps of Exercise," the other 16 days during the winter, "Regimentally," at the Head-Quarters of Corps, where, if possible, a Drill Shed should be made available as a Riding School. It is further desirable to adopt the following measures

(1st) that as far as possible, all Cavalry Corps be largely composed of farmers and their sons, who possess horses, are in easy circumstances, and reside in the frontier counties.

(2nd) that the horses should in future, in all cases, be enrolled as well as the men in the respective troops, (a retaining fee of \$10 per horse, per annum, being paid to each man, on condition of his providing a proper description of animal at the time of the annual drill, or for service when required.)

(3rd) that the present horse allowance of 75 cents daily for each effective horse, at the time of annual drill, or when on duty, be increased to \$1.

(4th) the forage allowance of hay, to be increased from 14 to 18 lbs. per horse, on the same occasions.

(5th) that in future issues of uniform clothing to the Cavalry, pantaloons, buttoning at the ankle, be substituted in lieu of trousers, (which are better adapted for riding purposes, and can be conveniently worn along with the ordinary long boot used in Canada.)

(6th) that hunting spurs be adopted. A number of Cavalry Snider Carbines are being received from the Imperial Arsenals in England, and the Department will shortly be in a position to re-arm the whole of the Cavalry, with the same carbine used by the Regular Army, which is a far superior weapon to the Spencer Carbine.

During the past summer the Canadian Cavalry Corps made some very creditable marches to and from the District "Camps of Exercise" at the time of Annual Drill; and I would particularly call attention to the long march of the New Brunswick Regiment of Cavalry to and from the Camp at Fredericton, and to the march of a Squadron of Cavalry from Sherbrooke, in the Eastern Townships, to the Camp at La Prairie, proving the efficiency of these Corps; as this arm of the Service fulfills most important purposes by its power of mobility, the desirability of maintaining efficiency in this respect, by practice, is apparent, and I would recommend whenever circumstances admit that as a general rule, cavalry Corps in every district should march to and from the respective Camps of Exercise, at the time of Annual Drill, instead of moving by rail or steamboat on such occasions.

With care and good management, Cavalry are capable of astonishing marches, and not the least extraordinary march of recent occurrence was effected by the Cavalry of the Guard, in England (probably the heaviest Cavalry in the world), who, on the conclusion of the autumn manœuvres last September, marched back to London in seven and a quarter hours, a distance of thirty-four miles, having previously practised field operations for ten days.

ARTILLERY.

It is with great pleasure I have to state that during the past year, not only has the inspection of the Artillery been better attended to, but means have been adopted by the establishment of "Schools of Gunnery" at Kingston and Quebec, under the command of professional officers of the Royal Artillery, (who are lent by the Imperial to the Dominion Government) to carry out the practical and scientific instruction required, much more thoroughly.

On the departure of the Regular Troops, the Fortifications and armament at Quebec were handed over to the Dominion Government. The new Forts at "Point Levis," opposite Quebec, (which are of a most formidable description) are not yet armed, but the Imperial Government have notified that guns of a powerful description, suited to the requirements of modern warfare, will be mounted on these works.

At Quebec itself, 187 guns are mounted, at Kingston 85, at Toronto 9, and there are guns of position mounted at other places. Although some of these guns are of obsolete pattern, yet many of them are powerful and of considerable calibre, and all would be useful for purposes of war.

The amount of Artillery ammunition at present in store, although adequate for ordinary purposes and sufficient to provide the necessary annual practice allowance for all Artillery Corps for several years, or to meet the probable demand, resulting from possible Fenian invasion, is however, altogether quite insufficient in the event of war.

The organization of the two Schools of Artillery (A and B Batteries), formed at Kingston and Quebec, as authorized in General Orders of 20th October last, has been effected, great eagerness having been displayed by both officers and men of the militia to join them. These Schools not only provide for the scientific and practical instruction in Artillery exercises of such officers and men as are attached to them, but they furnish guards for the forts, magazines, stores and armament at those places.

The School of Gunnery at Kingston, consists of 1 Captain, 3 Lieutenants, 1 Assistant Surgeon, 7 Sergeants, 4 Corporals, 4 Bombardiers, 3 Trumpeters, and 110 Gunners, and is quartered in the "Tete du Pont" Barracks.

The School of Gunnery at Quebec, consists of 1 Captain, 4 Lieutenants, 1 Assistant Surgeon, 7 Sergeants, 6 Corporals, 4 Bombardiers, 3 Trumpeters, 130 Gunners, (among whom there are 89 English-speaking, and 54 French-speaking Canadians) and is quartered in the Citadel.

Both these Batteries are complete in numbers, except as regards skilled Artificers and specially trained Sergeant Instructors, but application has been made to the Imperial Government to obtain the services of the latter, consisting of 1 Master Gunner, 2 Laboratory Foremen, 2 Ordnance Armourers (called in the Regular Army "Armstrong Armourers,") 2 Sergeant Instructors in Garrison Artillery, and 2 Sergeant Instructors in Field Artillery; the latter, in addition to Gunnery, to be able to instruct in Riding, Driving, Field manoeuvres, &c., &c., and as soon as the services of these are obtained both Batteries will be complete.

The Battery at Kingston is under the command of Lieutenant Colonel French, Inspector of Artillery and Warlike Stores. The Battery at Quebec under Lieutenant-Colonel T. B. Strange, Inspector of Artillery for the Province of Quebec, and the scientific and practical instruction of officers and men of Artillery militia corps will be carried out by these officers, who both belong to Her Majesty's Regular Army, are carefully trained and skilled Artillerists, well versed in all the duties appertaining to their special arm.

Eight horses have also been authorized for each of these Batteries in order to give instruction in riding and driving drill, and I would beg to recommend that the number of horses be increased from 8 to 16 in each Battery, and thus afford the means of carrying out far more completely Field Artillery Instruction.

The Militia officers attached to these Schools of Gunnery all belong to various Artillery Corps of the Active Militia, and when duly recommended are authorized to join the Schools for the short course of instruction, which lasts three months, receiving during this period pay at the rate of \$1 per diem, with barrack accommodation and the usual ration allowances, fuel, light &c., authorized in the Imperial army, on the termination of which period, should they have shewn any peculiar aptitude for

military science, they may be retained for the "long course" of instruction of nine months, provided they are so desirous, and that there are vacancies for them in the School.

So soon as officers have passed through the probationary three months short course of instruction to the satisfaction of the Commandant of the school, they receive the pay of their rank, in addition to being provided with barrack accommodation, free rations, and the same allowances of fuel, light &c.

On the termination of the long course of instruction, those officers who pass the best examination, and are otherwise most efficient, may be retained from time to time indefinitely, (if approved of at Head Quarters), on the recommendation of the Commandants, according to their merits, desires, and the requirements of the Public Service, such officers being then available to act in their turn as instructors to others, and thus in a few years there will be no inconsiderable number of scientifically trained Canadian Artillery Officers in the Dominion.

The non-commissioned officers and men at the Schools of Gunnery in like manner all belong to various Artillery Corps of the Active Militia, or are enrolled in such previous to admission. Nearly the whole of the number of men at present authorized, will remain at the respective schools for twelve months training and duty, at the termination of which period they may either leave the schools, returning (in a military point of view) to their respective corps; or should they so desire, and it is in the interests of the public service, they may on the recommendations of the Commandants be retained indefinitely from time to time for further duty.

By this system, whilst maintaining the necessary military guard over the forts and magazines at Kingston and Quebec, provision is made for a steady flow of both officers and men through these practical Artillery Schools, which cannot fail in time greatly to increase the efficiency of many Militia Artillery Corps, and to spread very generally throughout the country a knowledge of that especial science.

During the period officers and men are attached to the Gunnery Schools, for duty and instruction they are for purposes of discipline and military duty, under the Queen's Regulations and Articles of War as defined in the Militia Act, the same as if on active service with their respective corps, and are in the event of misconduct, or other causes of an objectionable nature, liable to be summarily dismissed therefrom.

"A" Battery has 37 men, and "B" Battery 30, who formerly served in the Imperial Army, but are now enrolled in the Active Militia of Canada, the uniform worn by officers and men being similar to that of the Royal Artillery, in point of appearance there is little difference; there is every reason to hope also, that in due time there will be no inferiority in point of efficiency.

Of the officers and men now undergoing instruction at the Kingston School of Gunnery, one officer and 63 men belong to the Kingston Field Battery, 19 men to the Toronto Field Battery, 9 men to the Wellington Field Battery, 4 men to the London Field Battery, 1 officer and 2 men to the Ottawa Garrison Artillery, 1 officer and 1 man to the St. Catharines Garrison Battery, 1 man to the Hamilton Field Battery, 4 men to the Toronto Garrison Battery, and 1 officer to the Cobourg Garrison Battery.

The average height of the men at present attending this school is 5 feet 8 $\frac{3}{4}$ inches, their average chest measurement 37 $\frac{1}{2}$ inches. Of those now attached to the Quebec School of Gunnery, 52 belong to the Quebec Garrison Artillery, 23 to the Quebec Field Battery, 38 to the Montreal Garrison Artillery. The average height of the men is 5 feet 8 inches, average chest measurement 37 $\frac{1}{4}$ inches.

The Report of the Dominion Inspector of Artillery, details the course of instruction and duties carried on at the Schools of Gunnery, as well as the object and nature of these institutions, and which, as that officer correctly observes, "marks a new era in the steps taken to train and instruct the Dominion Artillery."

I would again respectfully urge (as recommended in last year's Report,) that, if possible, pay for 32 days drill, instead of 16, be allowed for this special arm; that out of the above period of 32 days, every Battery of Garrison Artillery be brought in succession to some Fort or Battery and drilled in Artillery Exercises for 16 days consecutively, during the summer, the drill for the remaining period of 16 days to be carried out in the winter season, in Drill Sheds at the Head Quarters of Corps, when in addition to gun drill, lectures on Artillery Science may be given; that in the case of Field Batteries, the summer drill of 16 days consecutively, be carried out in some Brigade or Divisional Camp of Exercise, the remaining period, as in the case of Garrison Batteries, during the winter at the Head Quarters of Corps; that as far as possible, the drivers of Field Batteries should be taken from among the agricultural population, possessing horses; that these horses be regularly enrolled in the respective Batteries, their proprietors receiving a retaining fee of \$10 per horse, per annum, on condition of undertaking to provide suitable animals when required, either for annual drill or actual service; that at the time of the annual drill or when called out for duty, the horse allowance be increased from 75 cents to \$1 per horse per diem; and the forage allowance of hay from 14 to 18 lbs.; that the annual Parliamentary vote for improved Artillery be expended in the acquisition of the new M. L. R. 9 pounder field guns (similar to those now being issued to the Horse Artillery in England), these guns, (believed to be the most formidable of the kind yet invented), whilst being lighter than those at present used, have far greater power, accuracy and extent of range.

The proportion of Artillery to Infantry in the Dominion is far too small. I recommend a gradual and steady increase of the Field Artillery, until to every Brigade throughout the Dominion there is attached at least, one Field Battery. At present the proportion of guns to men is little more than one gun to every 1,000 men available, which is quite inadequate, three guns being considered the least, and four a much better proportion for every 1,000 men.

The Report of the Inspector of Artillery, (which will be found attached,) contains many valuable suggestions for increasing the efficiency of this powerful arm, and I concur in the recommendations therein submitted.

 ENGINEERS.

At present there are actually only three Companies of Engineers in the Dominion, viz : The Montreal Engineer Company, the St. John (N. B.) Company, and the Grand Trunk Company ; the condition of these Companies is stated in the Report of the Inspector of Artillery who is also charged with the instruction, inspection and training of Engineer Corps.

The Engineer force is altogether too small, and up to the present time no proper steps have been taken to teach the officers and men of the existing Companies their special duties ; no difficulty, however, need any longer be experienced on this point, for the Artillery officers in command of the Schools of Gunnery at Kingston and Quebec would be able, if assisted by two Sergeant Instructors of Engineers, to impart the necessary instruction to such Engineer officers and men as could attend these schools.

A knowledge of fortification, construction of siege batteries, field works, attack and defence of posts and fortresses is absolutely essential to the Artillery officer, as also a rough practical knowledge of military topography and surveying, construction of military bridges, &c. the above with the addition of Artillery, Mines, and Torpedoes, includes the entire training of the Military Engineer—their education is identical at the Royal Military Academy, Woolwich, and it would be very advantageous to combine the practical training of all Canadian Staff, Engineer, and Artillery Officers at the Gunnery Schools—the subjects of instruction being common to all.

The increase of Engineer Corps generally throughout the Dominion, is recommended until there is at least, one Company of Engineers in each District ; also the formation of a Telegraph Company in each Province, provided with Telegraph equipment, and the organization of Pontoon Trains.

On reference to the report of the officer commanding the militia in Military District No. 5, it will be seen that the Montreal Company of Engineers, under command of Capt. Kennedy, rendered good service at the Laprairie Camp last summer, by preparing the rifle ranges, ten in number, and erecting camp huts and other work, thereby saving considerable expense to the public ; this company also constructed a two-gun battery (earthwork) for practice.

 INFANTRY.

Nearly 30,000 (Officers and men) of the Infantry have performed the Annual Drill during the past summer, the greater portion being present at the various Camps of Exercise.

The suggestions contained in the Annual Report of 1870, for the extension of the period of drill, and the introduction of a general and systematic mode of carrying out "Target Practice" at the time of the Annual Drill having been approved of and authorized, the result has been that as compared with the two former years, a marked improvement has taken place. Indeed no measure could have been better calculated to increase the

efficiency of the Infantry, than the adoption of some system to instruct the whole of the men practically in the use of the rifle, and the granting of numerous prizes for good shooting.

In the course of my Inspections within the last three years, I have seen few of the Infantry Corps who were not, whenever commanded by officers who had learned their drill, after a few days practice fairly acquainted with the few simple Company and Battalion movements necessary in actual warfare; I have seen some Battalions who had the advantage of Drill Sheds at their local head-quarters, very creditably drilled. But when it is remembered that the rifle and the spade are the tools used most in modern warfare, that individual skill in the use of the rifle is more than ever the first consideration in the military training of infantry, and that target practice cannot be carried on in Drill Sheds, the desirability of affording facilities for this, the most necessary kind of training in preference to mere drill shed *drill*, as illustrated at the various Camps last summer, is obvious.

There was a decided improvement, in the condition of the Snider Rifles last year, as compared with the two previous years of 1869 and 1870, the general condition of the uniform clothing, accoutrements and equipments being much the same.

The frequent losses and deficiencies of clothing, equipment &c., which occur in some corps, (the expense of which falls upon the public,) I attribute mainly to the fact, that in all cases the men are not required on the conclusion of the annual drill, when they return their arms and accoutrements into the various armouries, to return at the same time their uniform clothing. With a view therefore, to prevent such loss, I think this should be generally insisted on, the Captains of Companies being responsible for the clothing and equipment, as well as the arms of their men.

TARGET PRACTICE FOR 1871.

During the past season the whole of the Infantry assembled in the various "Camps of Exercise," performed the prescribed course of Target Practice with the Snider Rifle, and Government money prizes with badges were distributed amongst the officers and men, to the successful competitors; to the best shot in each Company \$5, with a badge; to the best shot in each Battalion \$10, with a badge; to the best shot in each District \$15; and to the best shot amongst the non-commissioned officers and men of the Active Militia in the Dominion who performed the prescribed course of target practice, at the time of the Annual Drill the Adjutant General's prize of \$50 with a silver medal was awarded. 584 Government prizes were given, and great interest was taken in the competition.

A return shewing the average shooting figure of merit of every Company, Battalion and Corps exercised, together with the names and scores of the best shots in the same was published in General Orders of 30th November last, (a copy of which will be found in the Appendix,) and although many of the men are as yet very insufficiently skilled in the use of the rifle, the foundation has been laid for a systematic course of practical

instruction and target practice at the time of the annual drill, which cannot fail eventually if persevered in, to increase general efficiency.

On reference to the General Order above alluded to, it will be seen that:

The 27th Battalion, figure of merit 19.92, was the best shooting Battalion. No. 2 Company, (Widder) 27th Battalion, figure of merit 26.57, was the best shooting Company, and Sergeant J. R. Burwell, No. 5 Company, (Iona) 25th Battalion, with a score of 45, was the best shot in Military District No. 1.

The 31st Battalion, figure of merit 17.08, was the best shooting Battalion. No. 6 Company, (Flesherton) 31st Battalion, figure of merit 23.81, was the best shooting Company, and Private John Parks, No. 6 Company, (Flesherton) 31st Battalion, with a score of 51, was the best shot in Military District No. 2.

The 48th Battalion, figure of merit, 14.53, was the best shooting Battalion. No. 1 Company (Tamworth) 48th Battalion, figure of merit 24.05, was the best shooting Company, and Corporal Fredk. Hobbs, No. 1 Company (Bowmanville) 45th Battalion, with a score of 51, was the best shot in Military District No. 3.

The 41st Battalion, figure of merit 15.26, was the best shooting Battalion. No. 4 Company (Merrickville) 41st Battalion, figure of merit 19.24, was the best shooting Company, and Sergeant McIntyre of that Company, with a score of 51, was the best shot in Military District No. 4.

The 60th Battalion, figure of merit 14.13, was the best shooting Battalion. No. 3 Company (Franklin) 51st Battalion, figure of merit 23.06, was the best shooting Company, and Sergeant W. McNaughton, No. 4 Company (Hemmingford) 51st Battalion, with a score of 47, was the best shot in Military District No. 5.

No. 2 Company, Rawdon, figure of merit 12.31, was the best shooting Company, and Thos. Copping of same Company, with a score of 47 was the best shot in Military District No. 6.

The 8th Battalion, figure of merit 17.07, was the best shooting Battalion. No. 2 Company, 8th Battalion, figure of merit 21.60, was the best shooting Company, and Sergeant George Baxter, of the same Company, with a score of 47, was the best shot in Military District No. 7.

The 73rd Battalion, figure of merit 17.75, was the best shooting Battalion. No. 4 Company (Black River) 73rd Battalion, figure of merit 20.52, was the best shooting Company, and Sergeant Major Burbridge, No. 7, Battery (Chatham) N. B., Brigade Garrison Artillery, with a score of 50, was the best shot in Military District No. 8.

The Cumberland Provisional Battalion, figure of merit 24.11, was the best shooting Battalion. No. 7 Company (Halifax) 66th Battalion, figure of merit 30.16, was the best shooting Company, and Private W. Colburn, No. 3 Port Philip Company, Cumberland Provisional Battalion, with a score of 49, was in the first return sent to headquarters, reported the best shot in Military District No. 9; but since the publication in General Orders of the names of prize-winners, an amended return has been received from the Acting Deputy Adjutant General, Military District No. 9, intimating that Sergeant

Connors, No. 4 Company, 63rd "Halifax" Battalion of Rifles, stands highest, with a score of 51.

The 1st Battalion Rifles, figure of merit 20.08, was the best shooting Battalion. No. 4 Company (Richmond) 1st Battalion Rifles, figure of merit 27.13, was the best shooting Company, and Private J. Ferguson, with a score of 49 was the best shot in the Grand Trunk Brigade.

The Province of New Brunswick, figure of merit 14.57, was the best shooting Province, Military District No. 8, figure of merit 14.57, the best shooting District. The Cumberland Provisional Battalion, Military District No. 9, figure of merit 24.11, the best shooting Battalion. No. 7 Company, 66th Battalion, in Military District No. 9, figure of merit 30.16, the best shooting Company, and Private John Parks, No. 6 Company, 31st Battalion, in Military District No. 2, who made 51 marks out of a possible figure of 60, scoring at the 600 yards range 18 marks out of a possible figure of 20, at the 400 yards range 18 marks out of a possible figure of 20, and at the 200 yards range 15 marks, the best shot in the Active Militia of the Dominion at the Annual Drill of 1871-2. Private John Parks, 31st Battalion, thus winning in addition to the Company, Battalion, and District prizes, the Adjutant General's prize of a silver medal with \$50.

MILITARY SCHOOLS.

The following Return shows the number of Military School Cadets who have obtained certificates of qualification in 1871, at the various Military Schools which were in operation during the winter months only, in the Provinces of Ontario, Quebec, New Brunswick and Nova Scotia :

INFANTRY SCHOOLS, AND GUNNERY SCHOOLS.

PROVINCES.	INFANTRY.		GUNNERY.	
	First Class Certificates.	Second Class Certificates.	First Class Certificates.	Second Class Certificate.
Ontario.....	7	85	22	14
Quebec.....	30	144	1	8
New Brunswick.....	3	20	} No Schools of Gunnery as yet established for these two Provinces.	
Nova Scotia.....	2	24		
Totals.....	42	273	23	22

From this it will be seen that 360 Certificates have been granted last year, of which 65 were first class, and 295 second class certificates.

Since the first formation of Military Schools in 1864, 6,285 certificates of qualification in drill have been obtained by the large number of Cadets who have passed through these schools.

At present there are eight schools of Military Instruction authorized, six for Infantry drill, and two Schools of Gunnery, the organization of the latter has been detailed in the report on the artillery; there are also two Riding Schools for the instruction of the Cavalry, one at Kingston, the other at Quebec, as branches of the Military Schools at those places.

On the 1st of February, the following number of cadets were attending the Infantry schools, at Toronto, thirty five; at Kingston, twenty six; at Quebec, forty three; at Montreal, twenty six; at Fredericton, forty four; at Halifax, fifteen; being a total of 189. The Gunnery schools as already stated are nearly full there being at present about 280 of all ranks, acquiring a knowledge of Artillery Exercises in A. and B. Batteries. The Infantry Schools are in operation for six months, and the two Cavalry Riding Schools for three during the Winter season, the Artillery Schools for the whole year.

The experience of the past summer has clearly demonstrated the desirability of encouraging all officers and non-commissioned officers to attend the military schools to learn their military duties, and qualify for their respective posts. Unless officers have a knowledge of their duties, it is impossible they can know how to lead or train their men.

There are many excellent officers in the Canadian Militia, indeed I do not believe that the Transport and Commissariat duties required, could have been better performed than they were at the various Camps of Exercise last summer, by officers of the Canadian Militia; the last expedition to Manitoba has given additional proof of their capacity in this respect also, but generally speaking, (as might be expected) *from lack of opportunity to acquire the same*, in a proper knowledge of Regimental Drill, of Camp duties, and Interior Economy, they are very deficient.

If however, Regimental officers and non-commissioned officers would attend the Military Schools in winter, to qualify in *Drill &c.*, they would come to the "Camp of Exercise" in summer, better prepared to train and discipline their men, and thus the Militia of the Dominion would yearly improve, and increase greatly in efficiency.

The system of allowing officers to come up for drill examination (without passing which satisfactorily they cannot receive commissions, or be confirmed in their commands) at the time of the Annual Camps, is very objectionable, such examinations being then from force of circumstances generally of a very superficial character, moreover these examinations at the time of the Annual Drill interfere greatly with the routine of duties; it would be much more satisfactory therefore, if in future all officers should pass such examinations at a Military School where they could be properly instructed and examined, the usual gratuity of \$50 being granted them on obtaining their 2nd class certificates.

 ARMS, CLOTHING AND STORES.

The present condition of the Militia Department with regard to arms, clothing and stores, will be seen on reference to the Reports of Lieut.-Colonel W. Powell, Deputy Adjutant General of Militia, and Lieut.-Colonel T. Wily, Director of Stores, &c., both of which will be found in the Appendix.

40,670 Snider Rifles have been issued and are now in possession of the respective corps. There are 6,000 new Snider Rifles in the Reserve Stores, and steps are being taken to procure a supply of the most approved description of Rifles.

A large number of Snider Carbines are being received from the Imperial Arsenals in England for the use of the Cavalry, to replace the present inferior weapon (viz: the Spencer Carbine) in possession. There is a sufficient quantity of Snider Ball Ammunition in the various Magazines to meet the ordinary expenditure of the whole of the Active Militia for at least three or four years.

The Department has now obtained a supply of Tents that will suffice for the wants of the Active Militia in this respect at the time of the Annual Camps of Exercise, but the supply of other articles of Camp Equipage, also Blankets, Knapsacks, Haversacks, Accoutrements, &c., &c., is far short of what is required; I therefore recommend that steps be taken to acquire the necessary supply, so that every Military District may in respect of stores and equipment, be complete in itself, and thus the Active Militia in every Province would be enabled whenever required for Actual Service, to turn out at a moments notice properly equipped.

Lieut.-Colonel Wily's Report shews the amount of clothing in store on the 31st December last, and Lieut.-Colonel Powell's Report shews the number of articles purchased this year, all of which will be available as circumstances may require. Owing to the organization of certain corps in the Province of Manitoba, and in view of a similar provision for British Columbia, it will be necessary to increase somewhat the amount of the estimate for clothing for the next financial year, so that the new corps may be clothed, and the necessary reserve formed to replace the annual wear of clothing in possession of existing corps, and in connection with this subject, I have to point out that for "military reasons" it is desirable that the colour and description of the uniform worn by the Militia of Canada, should at all times correspond (according to the respective arms) closely to that used in Her Majesty's Regular Army.

A heavy drain upon the limited stores of the Militia Department has been caused by the two expeditions to Manitoba, and the extension of the Militia system to that Province, this together with the maintenance now of several embodied corps in the Dominion necessarily requires an increased supply of Military Stores.

 MEDICAL REGULATIONS.

With the view of establishing uniformity of system in the Medical arrangements at the time of the annual drill last summer, and checking many irregularities on this point

which have occurred in previous years, a number of small portable Medicine Boxes or Field Companions were obtained, sufficient to admit of the issue of one to every Battalion performing annual drill in a Camp of Exercise.

These boxes merely contained such simple and ordinary remedies as might be required for a few days, it being the duty of the Medical officers, immediately on the assembly of each corps, to make a strict examination of the men, sending at once back to their homes any who might be in delicate health, or who might appear likely to become so.

Some complaints having been made as to the deficiency, or inappropriate nature of the medicines supplied, I annex a list of the contents contained in the Field Companions supplied to the Militia Battalions last summer, together with a list shewing the contents of the Field Companions used in the Regular Army.

List of contents of the Medicine Boxes furnished the Canadian Militia in 1871 :

Calomel ; Chloroform ; Diarrhœa mixture ; Ether Sulph ; Fuller's earth ; Morph. Acet ; Pil Cathartic Co. ; Pil Coloc Co. ; Pil Opii—1 gr. ; Pil Opii— $\frac{1}{2}$ gr. ; Plumbi Acet ; Potass Chlor. ; Potass Nit. ; Pulv. Acacia ; Pulv. Cretæ Co. C. Opio ; Pulv. Ipecac Co. ; Pulv. Jalap Co. ; Spts. Ammon. Aromat. ; Tinct. Opii ; Tinct. Zingib ; Zinci Sulph. ; Calico Bandages ; Flannel Bandages ; Suspensory Bandages ; Linen Sheeting ; Calico ; Lint ; Gutta-Percha tissue ; Oiled Silk ; Cotton Wool ; Adhesive Plaster ; Sponges ; Needles ; Thread ; Tourniquet ; Tape ; Scissors ; Minim Measure ; Scales and Weights ; Spatula ; Enema Syringe ; Surgeon's Tow ; Pins.

Contents of the Medical Field Companion used by the Regular Army :

MEDICINES.—Mixture for Diarrhœa and Cholera, 2 oz. ; Chloroform, 2 oz. ; Tinct. Opii ; 2 oz. ; Spirit Ammoniaë Aromat, 2 oz. PILLS.—(Tins) No. 7. Calomel gr. i. Pulv. Opii gr. i. in each. No. 8. Plumbi Acet. gr. iii. Pulv. Opii gr. i. in each. No. 9. Calomel gr. ii. Pil. Rhei Co. et. Pil. Coloc Co. aa gr. ii. in each. No. 10. Camphor gr. iii. Pulv. Opii gr. ii. et Pulv. Cayenne gr. $\frac{1}{2}$ in each. Four dozen of each kind. POWDERS.—No. 1. Morph. Acet. gr. $\frac{1}{2}$. Plumbi Acet. gr. iv. et Pulv. Acacia gr. ii. in each.—24. No. 2. Antim. Tart. gr. i. Pulv. Acacia gr. iii. in each. No. 3. Calomel gr. iii. Pulv. Jacobi gr. v. et Pulv. Ipecac. Co. gr. xv. in each. 12 of each kind. No. 4. Pulv. Kino Co. i. scruple in each.—24. No. 5. Pulv. Cretæ Co. c. Opio ii. scruples in each.—12. No. 6. Pulv. Jalape Co. ii. scruples in each.—12. APPLIANCES.—Calico rollers—2. Suspensory bandages—2. Clavical bandages—2. Strong calico— $\frac{1}{2}$ yard. Linen sheeting— $\frac{1}{2}$ yard. Lint— $\frac{1}{4}$ lb. Gutta Percha tissue— $\frac{1}{4}$ yard. Cotton wool— $\frac{1}{4}$ lb. Isinglass plaster—1 yard. Adhesive plaster $\frac{1}{2}$ yard. Sponges, surgeons—2. Needles, surgeons—25. Whited brown thread— $\frac{1}{2}$ oz. Razor in case. Shaving soap—1 roll. Screw field tourniquet. Candle and wax matches. Pins— $\frac{1}{2}$ paper. Tape—1 piece. Scissors—1 pair. Minim measure—1. Graduated horn cup—1.

From this it will be seen that the Canadian box is the more complete of the two.

An experienced Medical officer, resident for many years in Canada, and who had served for years in the Imperial Army, was consulted as to the nature of the medicines required, and his selection adopted ; a very limited amount of money was available, and only the most necessary and least expensive medicines could be furnished. Inasmuch,

however, as the climate and nature of the usual complaints differ considerably in the various districts of the Dominion, ague prevailing much more in Western than in Eastern Canada, it would seem advisable to include Quinine in the list of medicines, and steps are being taken to have the Field Companions more suitably and completely supplied for the coming season.

The Medical arrangements last year were carried out Regimentally, and in view of possible accident, all Surgeons and Assistant Surgeons were expected to take with them to the various Camps an ordinary pocket case of instruments.

The position at present of the Medical officers in the Militia is unsatisfactory to these gentlemen, and the organization of so important a branch as the Medical Department of an army is as yet very incomplete.

Medical officers on first appointment to Militia Corps, rank *relatively* with Lieutenants, after five year's service with Captains, Surgeons with Majors, but beyond this no higher relative rank is granted, nor does the present organization extend beyond a mere Regimental system. In order therefore to establish the Medical Department on a proper basis more in harmony with the Military system of the country, and Army Medical necessities, I have to submit that it is desirable on these grounds :

1st. That a Medical Staff Officer of Militia should be nominated, if possible one who has served at least ten years in the Imperial Army.

2nd. That in each Military District the senior Medical officer should be nominated principal Medical officer of the District.

3rd. That each Battalion should have one Surgeon and an Assistant Surgeon, each Squadron of Cavalry one Surgeon or Assistant Surgeon, and each Battery of Artillery one Surgeon or Assistant Surgeon.

4th. In each Military District there should be four Surgeons, and eight Assistant Surgeons on the Staff, who could be called upon in cases of emergency to go on detachment, or take temporary charge as may be directed.

5th. All Surgeons and Assistant Surgeons should, on their first appointment, produce diplomas of legal qualification to practice, and should be licentiates of one of the recognized Colleges or Universities of the Dominion or of Great Britain as recognized by the Medical Board of Great Britain or Canada.

6th. That on appointment an Assistant Surgeon should rank relatively with a Lieutenant, after five (5) years service with a Captain, Surgeons to rank with Majors, and after ten years service to be nominated Surgeon Majors, ranking relatively with Lieutenant Colonels but junior of that rank. Staff Surgeons and Assistant Surgeons to hold the same relative positions as Regimental Medical officers.

7th. The Senior Medical officer of each District to be the District Principal Medical officer, and to rank relatively as Lt.-Colonel, according to date of Commission, but it is distinctly to be understood, that *relative rank* confers no military status or command, it being only established for civil officers attached departmentally to an army, to regulate precedence as to choice of quarters, rates of pay, allowances, &c.

8th. That the rank of Surgeon Major should carry with it \$1 per diem additional

pay to that of Surgeon, whenever Corps are embodied for Annual Drill or Actual Service, and that the Principal Medical Officer of the District should receive \$1 per diem more pay than a Surgeon Major on similar occasions.

9th. That at other times than those of Annual Drill or Actual Service, whenever the services of a District Principal Medical Officer is required for Boards of Examination &c., a fee of \$5 be allowed, but that all returns or reports on Militia service be transmitted by him without extra pay.

10th. That in additions to the Field Companion supplied for every corps, a pair of Hospital Panniers complete with medicines, &c., similar to those supplied to Military District No. 10, be obtained for every District.

The Department not being in a position to supply medicine boxes to several corps attending camps of exercise for annual drill on the day of assembly, medical claims and charges have been forwarded in connection with such camps, many of which are considered excessive.

In selecting ground for the formation of Annual Camps of Exercise, it would be desirable that the District Principal Medical officer should accompany the officer charged with this duty, with a view to securing the best sanitary site, and in the Western Peninsula of the Province of Ontario, care should be taken to encamp on high ground, so as to avoid as far as possible risk of ague in that aguish district.

The adoption of the above recommendations for the Medical branch of the service, would I feel sure result in a much more satisfactory organization.

MILITIA GUNBOATS.

The Report of Mr. G. W. Wyatt, Gunboat Agent (which will be found in the Appendix) details the duties carried out, and services performed during the past year by the two Militia gunboats "The Prince Alfred" and the "Rescue." Three Batteries of Artillery performed their annual drill on board the "Prince Alfred," namely, the St. Catharine's Battery (two officers and forty-eight men), the Collingwood Battery, two officers and twenty-five men, and the Sarnia Battery (three officers and thirty-eight men).

The "Prince Alfred" took part in the operations carried on at Goderich, whilst the "Camp of Exercise" was formed there. This vessel is now armed with two "Armstrong," and four brass "howitzer" guns, and has been much improved by recent alterations. As part of the system of defence from Fenian invasion on the western frontier of Ontario, the "Prince Alfred" would be found very valuable, and she is well adapted for a training ship.

The "Prince Alfred" is too large to admit of her passage through the Welland Canal, and is therefore only available for the defence of the frontier of Lakes Erie and Huron.

The Gunboat "Rescue" is not at present so well suited for the service; but when the alterations proposed by Mr. Wyatt are carried out, this vessel will also form a valuable addition to the defensive resources of the country against Fenian attack.

CONCLUDING REMARKS.

Of the 84,414 men who performed the Annual Drill last year, I personally inspected more than 30,000, travelling on this and other duties during the summer and autumn months upwards of 10,000 miles, visiting also every Brigade Camp (with the exception of one,) and nine out of the eleven Military Districts there are in the Dominion.

Among the various corps assembled at the camps of exercise there were many fine looking men. In some of the rural Battalions whole companies equal in height and physical appearance to the men of the Guards in England. Many farmers possessing ample means are to be found in the ranks serving purely from a patriotic feeling, and no finer physical material for soldiers, can be found in any country, than amongst the backwoodsmen of Canada.

Perhaps the largest men are to be found in the New Brunswick and Nova Scotia Corps, but in the Battalions of Ontario and Quebec there are also very many large men. As an instance of extraordinary height, I may mention that in the Camp at Point Lewis, opposite Quebec, I found a man in the ranks of one of the rural Battalions, by name "Richard Mauger" (of French Canadian and Indian blood) nearly 8 feet in height, being also a well proportioned and powerful looking man.

On reference to the Reports of the Officers Commanding Districts, as well as to the tabular Annual Inspection Returns of Corps (all of which will be found in the Appendix), the numerical deficiency which exists in the ranks will be seen. The only Battalion I found actually complete in strength was the 23rd Battalion (a French speaking Canadian Corps) at the Lewis Camp. It will be seen also that officers commanding Districts entertain little hope that the full numerical strength of existing corps can be maintained by voluntary enrolment alone.

A very general desire appears to exist on the part of the majority of officers to complete every corps to its full strength, when volunteering is exhausted, by means of the Ballot, as provided for in the Law, and thus not only render the respective corps effective in numbers, but also equalize the pressure of Military service in the different localities, and on the community at large; A feeling appears to prevail in the Force in favour of a Regular instead of a Volunteer Militia. Experience proves that the strongest national Military organization is that one which is founded upon the principle of obligatory service; the people of Canada wisely recognized this fact in the Dominion Militia Act; doubtless the same wisdom and feelings of patriotism with which they were actuated in framing the law will induce them to carry out its provisions, whenever they find that the necessity has arisen. There are upwards of 222,000 men in the 1st Class of the Militia in the four Provinces of Ontario, Quebec, New Brunswick and Nova Scotia alone, young unmarried men between the ages of 18 and 30, the withdrawal of a portion of whom, for a very few days in the year only, from their civil pursuits to train for the defence of the country, would hardly be felt as a tax either by themselves, or the community at large; whilst every encouragement should be continued to maintain corps

of the Active Militia by voluntary enrolment, the numbers required to complete the strength of corps which cannot be maintained at the proper strength by voluntary enrolment, might be taken from this class in the different Regimental Divisions by means of the Ballot. Thus not only would existing corps be kept numerically efficient, but the operation of the ballot in time of peace, confined to the 1st class of Militiamen, who would be trained in rotation to some extent to the use of arms at a time of life when military service entails least sacrifice. Moreover, by carrying out the provisions of the law in this respect when necessary, employers of labour, and others, would probably be deterred from throwing insuperable difficulties in the way of voluntary enrolment, as is often, from selfish motives, the case, and the pressure of military service, which has always fallen and still falls upon the willing few (in many instances upon the heads of families, and upon certain communities only) by being spread more equally over the whole country would as a personal tax be much more lightly felt.

The fact that out of a nominal strength upon paper of 43,000 so large a number as 34,414 men actually mustered and performed the Annual Drill last year, in a time of profound peace with no excitement to stir them, speaks volumes for the military spirit of Canadians generally, and for their determination to train themselves for the defence of the country. Those who know the high price of wages in the Dominion, the great demand for labour of all kinds in a new country, and the sacrifices such men often make in attending to their military duties, can best appreciate their patriotism; but it is too much to expect that such voluntary sacrifices can be long continued, or that the same men will cheerfully agree to leave their shops and fields year after year, for a certain number of days, to drill, whilst their fellow citizens, *who should equally contribute personal service*, remain at home to make money, or reap a harvest.

Although it is found difficult to maintain *existing Corps* of the Active Militia up to their proper strength by voluntary enrolment alone continuously, judging from past experience and present facts, however, there appears no deficiency in the number of men ready to enrol in *newly formed Corps*.

Since the commencement of the present year the following new Corps have offered their services, been accepted, and gazetted, viz :

- 4 Troops of Cavalry ;
- 1 Company of Engineers ;
- 2 Battalions of Infantry ;

and three Independent Companies. Offers to raise Companies or Corps of Active Militia are constantly being received from every district.

There is therefore every probability that the present actual strength of the Active Militia in the Dominion may be maintained by voluntary enrolment, and the District Camps of Exercise as numerous as in the past, *although certain districts and existing corps may from time to time fail to maintain their full quota*.

In creating any system of Military Organization the conditions and necessities of modern warfare should be mainly considered in former days when nations went to

war, a certain limited number of trained soldiers (who might be regarded in the light of national champions,) were ranged against each other, (as it were for a great duel,) and the defeat of one side decided the war; the great mass of the people themselves were never engaged in war or withdrawn from civil pursuits. This system, however (with territorial powers at least), seems no longer observed; when fighting has to be done, and a country defended, judging from recent European events, it is evident it must be done by the whole nation, in one great harmoniously organized and disciplined mass, the services of every man and horse, as well as the whole material resources of the country being rendered for the time required, available for military purposes, turned as it were for the moment from the avocations of civil life into those of war, to return again to the pursuits of industry when the safety of the country is secured. Wars, moreover, in these days occur suddenly, it is a word and a blow, concentration is rapidly effected, and the nation that fails to organize and train for defence in time of peace, so as to be ready to take the field if called on at short notice, lies at the mercy of any strong and unscrupulous neighbour who may be better prepared, and contemplate conquest. Experience has also shewn that nations do not go to war without counting the cost, and that to prevent attack upon any portion of Her Majesty's Dominions nothing has been found so deterrent or efficacious as the power, and the will to resist it; it is an oft-repeated truism, that for a nation to be really free, the strength to maintain such freedom, must exist. Union, organization, drill and discipline create strength.

At a time when Military Organisation forms one of the most important and difficult questions of the day, it is satisfactory to observe that the Militia System of the Dominion is evidently appreciated. Already there are indications that in the reorganization about to take place in the Reserves Forces of the Mother Country, a system in some respects very similar (although details may differ) will be adopted.

It would appear that the task of reorganising the Military Forces of Great Britain, has been confided to a committee of which Major-General Macdougall, formerly Adjutant-General of Militia in the Dominion was chairman—that accomplished officer's ability has therefore been fully acknowledged.

The Division or Brigade Camps of exercise established in the various military districts of Canada last year, which were in operation for sixteen days, provides much more effectually for the training of both officers and men of the Active Militia at the time of Annual Drill than the system previously in vogue; many other advantages result also therefrom. It was demonstrated last summer that the local force in each Military District could be concentrated in a few hours, mostly in tactical Brigades of the three arms of from 2,000 to 5,000 men; everywhere in sufficient strength to crush any such attempts at Fenian invasion as have of late years occurred. The assembly of these Brigades with such ease and rapidity in many instances on the immediate frontier, has not only given confidence to the force itself but to the community at large. The very same arrangements which were adopted to concentrate, supply, and maintain the various Brigades for sixteen days, at the time of Annual Drill would suffice to concentrate them to repel invasion, as rapidly and supply them as well. While it has been shewn conclusive

ly that this can be effected readily in every District, it is not too much to say that during the period of the year, field operations are practicable in Canada, should circumstances require it, by bringing Brigades together, a force of about 30,000 men with 32 Field Guns, could be concentrated almost anywhere on the Southern Frontier of Ontario or Quebec in a very few days, without withdrawing a single man or gun from the Provinces of New Brunswick or Nova Scotia. Among the many other advantages that result from the performance of the Annual Drill in Camps of Exercise, I may mention, (1st) Staff Officers are practised in, and regimental officers obtain some knowledge of the mode of moving troops (so as to ensure rapid concentration), transport, and supply duties, (2nd.) false musters (an evil, judging from History, common to all armies on first formation) can be entirely prevented, no pay being issued except to those officers and men who actually come to camp and are present at the muster parade (the public interests, in this respect, being thus protected), (3rd.) whilst every opportunity is afforded in the morning and forenoon for Regimental Drill, at the afternoon Parades the different Corps may be trained to co-operate in tactical Brigades of the three arms, (4th) a prescribed course of target practice for the Artillery and Infantry can be carried out by corps in rotation under proper supervision, (5th) the officers and men by being brought away from home, and entirely removed from the influences of civil life at the time of Annual Drill, acquire a better knowledge of discipline and a more soldierlike tone, and the various Corps are accustomed to work together under the Commanding Officer of the District, (6th) friendly emulation in Drill, discipline, and appearance, between Corps, is created by their being brought together, (7th) officers, non-commissioned officers and men, being paid according to rank, and rationed as if on active service, all just grounds for complaint on this point are removed, and lastly by making the annual drill for both officers and men of the militia in time of peace, as far as circumstances will admit, a rehearsal of the duties that would devolve upon them in the event of war, it is obvious that the Active Militia thus trained would be better prepared when called on to defend the country.

Whilst very general satisfaction was expressed with regard to the special Camps of Exercise which were in operation for sixteen days, such was not the case with those for only 8 days, the rates of pay and allowances being different, and the time allowed altogether insufficient. Seeing therefore, the advantages, and that much more drill can be carried out and more practice afforded in sixteen days as compared with eight, I beg to recommend that the system of eight day camps be entirely abolished, and that for the performance of the annual drill for 1872-73, the whole of the Cavalry, Infantry and Field Artillery Corps, be assembled in Divisional or Brigade Camps of Exercise for 16 days continuous drill, under the command of the officers appointed to command the Militia, in the respective Military Districts; that the various batteries of Garrison Artillery should perform sixteen days Artillery drill consecutively either at their own local Head Quarters, or at such Forts and Batteries as may be convenient, under the instruction and orders of the Inspectors of Artillery. It is further recommended that the same daily rates of pay, rations and allowances authorized for

actual service be allowed to the officers, non-commissioned officers, and men, of the Active Militia present at "Camps of Exercise" for the performance of the Annual Drill.

The additional expense of the Brigade Camps which were in operation for sixteen days was trifling, when the increased amount of efficiency attainable is considered. In the eight-day camps of last year, the cost to Government for pay, which included subsistence, was \$2 per officer, and \$1 per non-commissioned officer and man per day,—the commanding officer making his own local arrangements for rations for his corps; or, taking the average sized battalion, say seven companies, having a strength of fifty-six non-commissioned officers and men per company, as an illustration the total cost for pay and subsistence would be as under for the battalion, viz.:

29 Battalion officers, at \$2 per day for 8 days	\$464 00
392 Non-com. officers and men, at \$1 per day for 8 days	3,136 00
Total.....	\$3,600 00

Under the system carried out in the sixteen days' Brigade Camp, where the officers, non-commissioned officers, and men received the pay of their respective ranks, as if on actual service, with free rations, issued under government control, the cost of the rations, consisting of 1½ lb. of bread, 1 lb. of meat, 1 lb. of potatoes, ½ oz. of coffee, ¼ oz. of tea, 2 oz. of sugar, ½ oz. of salt, and ⅓ oz. of pepper per officer and man per day, and forage for horses, including hay, oats, and straw, was in—

	Rations for Men.	Forage for Horses.
	cts.	cts.
Military District No. 1, Camp at Goderich.....	20	36
do No. 2, do Niagara.....	17½	38
do No. 3, do Kingston.....	15	32½
do No. 4, do Prescott.....	14½	35
do No. 5 & 6, do Laprairie.....	15½	24
do No. 7, do Levis.....	13½	34
do No. 8, do Fredericton.....	17½	48
do No. 9, do Aylesford Plains.....	21½	30

Or say an average for all the Districts of 17 cents per officer and man per day, and of 34½ cents per horse per day. The average cost for pay and subsistence of the same sized Battalion, consisting of seven companies of 56 non commissioned officers and men, each may be therefore stated as follows:—

		Per Day.	Total.
1	Lieutenant-Colonel	\$4 87	\$4 87
2	Majors.....	3 90	7 80
7	Captains.....	2 82	19 74
7	Lieutenants.....	1 58	11 06
7	Ensigns.....	1 28	8 96
1	Adjutant.....	2 44	2 44
1	Paymaster.....	3 05	3 05
1	Surgeon.....	3 65	3 65
1	Assistant-Surgeon.....	2 43	2 43
1	Quarter-Master.....	1 94	1 94
29	Total for Officers.....		65 94*

		Per Day.	Sixteen Days.
29	Officers	\$2 27½	\$1,055 04
5	Staff-Sergeants	0 90	72 00
7	Pay-Sergeants	0 80	89 60
14	Sergeants	0 70	156 80
21	Corporals	0 60	201 60
345	Rank and file	0 50	2,760 00
421	Rations	0 17	1,145 12
	Total, Pay and Subsistence		5,480 16

* Average pay, \$2.27½.

In the one case, the cost of pay and subsistence for the Battalion for eight days would be \$3,600; and under the other, for 16 days, \$5,480.16. It will thus be seen that while double the number, or 16 days' drill, is secured by the latter system, the cost is only increased by one-half the sum required to drill the same Battalion for eight days.

I have the honor to be, Sir,

Your most obedient servant,

P. ROBERTSON-ROSS,

Colonel Commanding,

and Adjutant General of Militia.

Head Quarters,

Ottawa, 15th March, 1872.

REPORT OF LIEUT.-COL. POWELL, DEPUTY-ADJUTANT-GENERAL, ON
HIS SELECTION AND PURCHASE OF EQUIPMENT.

ADJUTANT-GENERAL'S OFFICE,

OTTAWA, November , 1871.

SIR,—

In accordance with your instructions, I proceeded to England, leaving Quebec on the 12th August last, for the purpose of making selection and purchase of articles of equipment for use by the Militia of the Dominion of Canada, as enumerated hereunder, viz. :—

1. Uniform clothing to extent of appropriation available from current year's estimate.
2. 500 circular linen tents.
3. 50 mess marquees.
4. 10,000 havresacks.
5. 1,000 nose bags.
6. 1,000 pairs hunting spurs.
7. 500 sets of saddlery.
8. 500 cavalry swords, with belts and knots.
9. 2,500 carbines.
10. 150,000 rounds of ball, and 75,000 rounds of blank ammunition for same.
11. 1 battery consisting of 4 9-pounder muzzle-loading field guns, with carriages and waggons complete.
12. 10 9-pounder muzzle-loading rifled guns, same as above, but without carriages and waggons.
13. A supply of ammunition for the above.
14. To make enquiry respecting the Martini-Henry breech-loading rifle.

Prior to leaving Canada, I submitted the accompanying memorandum marked A, and was made the bearer of a despatch from His Excellency the Governor General to the Right Honorable the Secretary of State for the Colonies, asking that the facilities required might be extended to me by the Imperial Government, which despatch I presented on arrival in London, made a formal statement of my wants, as shewn in copies marked B and C, and received in reply the letter marked D. With this reply in possession, I proceeded to the War Office, had personal interviews with Sir Henry Storks and General Abye, and obtained consent and their direction for the manufacture and delivery of the guns, saddlery, stores and ammunition required to be supplied by the War Department for shipment to Canada as detailed in my letters B and C.

As the Imperial Government works were for the present busily and fully engaged in providing the new description of guns for equipment of its own army, and as Sir William Armstrong's establishment had been closed for some time, in consequence of a strike amongst his men, I considered it a compliment to receive assurances that the Government would undertake, with the least possible delay, to supply the number of guns required for Canada. As, however, the season was then too far advanced to enable the shipment during the autumn *via* Quebec, and as there might be a difficulty in passing them through the United States, I decided to delay shipment until opening of St. Lawrence navigation in spring, and then, in order to save expense, to have shipment made direct to Quebec.

The Imperial authorities, wishing to take no responsibility regarding the several articles after delivery from their own stores, desired me to name an agent who would receive over the several articles at the Tower or Woolwich, and make necessary contracts for freight. I therefore named Messrs. Montgomerie and Greenhorn, of Gracechurch-street, as agents, to receive these articles from the Imperial Government, and desired them to make the most economical contracts for freight and insurance by sailing ship

from Woolwich to Quebec, about the first of May, 1872, at which time it was hoped the whole would be ready for delivery.

The 500 sets of saddlery are to be complete in all details except sheep skins, not issued to cavalry in Canada, but including carbine buckets suitable for the Snider carbine. The saddles are to be of the new pattern, having iron arches, and seem serviceable and well made.

Regarding the guns, I did not think it necessary to have them packed in cases, as a covering of matting seemed sufficient for all practical purposes, and considerable expense would be saved in the item of packages, I therefore directed that a covering of matting should be used.

There will be 300 rounds of ammunition for each gun, part of the cartridges to be filled, remainder in bulk. There will also be spare wheels and a few extra articles available as patterns or to be used when repairs become necessary.

Regarding the 2,500 cavalry carbines, it was understood before my leaving Canada, that the Imperial Government had adopted carbines of the Martini-Henri pattern for use by the cavalry and artillery, my instructions were therefore to procure 2,500 of that description of arm. On arrival in London, I found that no decision had been arrived at regarding such supply to Imperial troops, and also learned that carbines of the Snider pattern were the only ones issued out for such use. In this view, I did not like to take the responsibility of buying carbines not of Martini-Henri pattern until after communicating with the authorities in Canada. I therefore did not at that time ask the Imperial authorities to supply carbines, but waited until my return to Canada; and then having received orders to substitute Snider carbines for those of the Martini pattern, I made the application from Ottawa, and had 2,500 Snider cavalry carbines added to the list of articles to be supplied by the Imperial Government, 1,000 of which to be shipped as soon as ready, *via* Portland, and the remainder to wait over until spring.

MESS MARQUEES AND TENTS.

As soon as negotiations were initiated with the War Office regarding stores to be supplied by the Imperial Government, I made enquiries respecting manufacture of marquees and tents, and in order to facilitate my operations, had a pattern marquee made in London, similar in size to one imported and used by the officers of the 7th Battalion at the camp at Goderich last year. The size of this marquee, 17 by 35 feet, appeared abundantly large for all practical purposes, and quite as well suited for an officers' mess as the one known in the Imperial service as the hospital marquee, and in size 20 by 40 feet. The marquee thus adopted for use by the militia in Canada having only a space of 17 feet at the ridge, it was considered that two upright poles would be sufficient for the centre support, and thus give more room for moving about than those requiring three centre poles. The price of the pattern marquee with poles, pins, mallets, valise and pin bag complete was £22 12s.; but as it occurred to me that the wood work if purchased in England would form a heavy item in the charges for packing and freight, I arranged to procure the marquees complete without woodwork, but including valises and pin bags, and entered into contract with Messrs. Cary and Prior, of London, to supply 50 completed as above at £18 16s. 6d. each, part of which was to be forwarded direct to Halifax, and the remainder *via* Portland for distribution from Montreal to the several district stores. I also contracted with the same firm for the supply of 500 circular linen tents, same in all respects as those having two feet walls which were imported from England in 1869, with tent and pin bags complete for £3 16s. 3d. each, the woodwork for which can be supplied in Canada for about 98 cents each.

In order to provide a means for the repair of tents which from use at the annual drills may become unserviceable, I contracted with Messrs. Cary and Prior to supply the following material, same in quality as used in the original manufacture of the tents, *viz.* :—

8 pieces	27 inch tent duck,	at 10 $\frac{3}{4}$ d.	per yard.
2 do	40 do	Hessian for skirting,	at 7 $\frac{1}{2}$ d. per yard.
20 coils	(560 lbs) tent line,	20 yards to the pound,	at 11d. per lb.
5 gross	brown webbing,	at 1s. 2d. per dozen.	
18 do	large hooks and eyes,	at 18s. per gross.	
10 do	small do do	8s. do	
10 do	wood runners or slides	at 4s. do	
40 do	do tent buttons	at 2s. do	

These articles will form a small reserve which can be drawn from as occasion may require from time to time.

HAVRESACKS AND NOSE BAGS.

I purchased 10,000 havresacks of a superior quality at 1s. 4d. each, and 1,000 nose bags of an improved description, for cavalry and artillery horses, at 2s. 6d. each; the nose-bags are made of good sound material, and have leather straps for the head instead of the webbing heretofore in use. The webbing after being worn a short time becomes like a cord, and does not give satisfaction or reasonable service; by substituting leather straps for the head the cost is slightly increased, but the additional wear they will sustain will more than compensate for this outlay. These nose bags have also ventilators at the bottom, so that the horse may have plenty of air while feeding.

CLOTHING AND GREAT COATS.

On enquiry, I found the market for all articles required in the manufacture of clothing, shewed a considerable increase in prices over those current during last year, some of the causes of which may be described as under:—

1st. The war between France and Prussia, which called such a large force into the field in excess of the usual peace establishment in those countries, and necessitating such an increase in the supply of military outfits, had produced a temporary derangement, in the same manner as was experienced in America, after the close of the late war in the United States, viz., by reducing the reserve supply of raw material required in the production of manufactured articles; but 2nd, I found in addition, other causes exceptional in their nature—for instance, both France and Prussia as well as other European nations, England included, were hurriedly contracting for quantities of cloth to make up reserves of clothing to an extent considerably in excess of usual annual supplies, while the demand for all kinds of manufactured goods in England, as well as on both continents, to supply local trade, had been so stimulated as to increase the price of labour, and add very considerably to the value of raw material; and as regards France, so great was the desire to secure supplies of wool for import into that country before the new war duties were levied, that a considerable proportion of the wool sold in England prior to September was purchased for that market in order to create a reserve and enable manufactures there to compete with other countries in the supply of such articles as are required for local trade. I, therefore, found it impossible to contract for articles of clothing for Canada on the basis of last year's prices; but under all the adverse circumstances, I was of opinion that the arrangements made were quite as favorable as could be expected. For great coats I was obliged to pay 1s., for tunics, 9d., and for trowsers 5d., in addition to last year's prices, while the quality of the material and making up was agreed to be fully equal to last year's supplies. This will raise the cost of each suit of infantry clothing, including tunic, trowsers, and forage cap, to \$7.91, each rifle suit to \$8.09, and each artillery suit to \$8.21; but I hope the crop of wool for the coming year will so far meet the requirements of trade as to cause the supply to be in excess of the demand, in which case the price of all articles will be reduced to or below last year's quotations. The question of labor, however, is a difficult one to solve, and the feeling prevails to a large

extent, that a permanent increase to the current rates hitherto existing will require to be paid to those who are engaged in manufacturing establishments, or in producing articles necessary for the purposes of trade.

The contract for clothing to be supplied this year provides for the manufacture of—

- 13,000 tunics,
- 10,500 trowsers,
- 7,000 forage caps,
- 7,500 great coats,

the whole of which are to be completed for immediate shipment.

In order to save additional risk, the shipments are to be made from week to week, insured, but the whole will be received during the winter, and be available for issue as required next spring. About one-third in value of all the clothing contracted for has already been received, and is now in store at Ottawa.

The sealed patterns for all clothing, except as regards tunics for cavalry, remain same as last year. In respect of the cavalry, the pattern as worn by the 6th Dragoon Guards (Carabineers) has been adopted in place of that heretofore worn in imitation of the 13th Hussars; the difference consists in abandoning the yellow braiding up the front and back of the tunics, and in placing pocket slashes on the skirt at the back. The new pattern tunic locks well, and while the great objection in keeping the yellow cord on the old tunics clean will be done away with in the new, the cost of the extra braiding, which amounted to about 6s. 6d. on each tunic, will be saved, and the value of the new pattern cavalry tunic will thus be reduced to the same as paid for tunics for artillery. The same economical reasons which present themselves as regards clothing for the men, will, without doubt, commend them to the officers, as, in their cases, the expensive gold lace at the back and front of the tunic will not now be required, the cost of an outfit will be very much diminished; meantime, as in many instances the officers of existing troops have incurred a considerable outlay for uniforms of the hussar pattern, a choice might be allowed at the next periodical issue to their troops as to which pattern should be so issued, but on the distinct understanding that thereafter all troops would be brought under one head as regards uniform of the new pattern.

If the practice of drilling the militia in camp during the month of June in each year is continued, the issue of clothing to replace that which has been in use for the regulated period should be made early enough in the spring to enable the same to be properly fitted to the men, and taken into camp, of the year in which the new issues are required to be made. In order to do this economically and well, the various supplies should be procured a sufficient time in advance of actual requirements for issue, so that no disappointment may be felt by corps entitled to new clothing; and undue haste in completion and delivery of the articles be prevented.

In the ordinary course of trade time must be given to manufacture the several articles from raw material after contract for equipment is made; it follows, therefore, that if orders are given out in England in autumn for annual supplies, the several articles cannot reach Canada earlier than winter—a season during which the highest rates of ocean freights prevail, and a period of the year when the only available ships *via* Portland are under one control. In this view, it would appear desirable, to enter into contract for current annual supplies which may require to be purchased in England, as early in each year as the passing of the Estimates will admit, so as to enable the Department to avail itself of the best season for buying, of summer rates for freight, and a competition amongst shippers, *via* the St. Lawrence, for the most economical and safe mode of conveying the supplies to their several destinations.

As a matter of fact, if this course were pursued, the Government would lose the value of the interest for, say four months, on payments in advance of possible actual requirements for issue, but this would be counterbalanced by saving in cost of purchases insurance and transport, to say nothing of the very great advantage which would result from having a reserve store available, from which supplies could be drawn at any moment after the opening of spring.

TARGETS.

Although I had no orders to purchase targets, I thought it right, and in the way of my duty, to make inquiry regarding the manufacture and costs of targets in England, so that the information might be available for next year's purchases. It now appears that the best hematite iron regulation targets, weight 5 cwt., and size 6 feet by 2 feet (each slab), every target warranted, and made by experts in that branch, can be purchased at £3 each, including wrought iron staves, fastenings and painting, and, I believe, free transport to port of shipment would also be conceded; and if purchases were made in the summer, so that outward freight to Canada could be secured by sailing ship, the cost of such freight would be at the minimum.

For targets duly advertised for and made in Canada last year, the Department paid about \$25.50 each, and for those tendered for by a Montreal firm, but made in England, and supplied this year, \$22.50, delivered in Montreal. I therefore estimate as follows for cost at which the Department can import targets made by experienced workmen in that branch from best iron, as stated, viz., £3, say equal to \$14.62½ each, freight at 20s. per ton, and allowing 4 pieces to the ton 5s, or \$1.22 each, insurance and other charges 56½ cents, Customs' duty at 15 per cent \$2.19, or in all \$18.60 for each target delivered in Montreal. It thus appears that if the 250 targets which will be required for next year's issue, are imported direct by the Department, a saving of \$3.90 each, or a total of \$975, besides Customs' duties, on the lot would be effected over the lowest tender we have been able to get in Canada from an importer, and \$6.90 each less than the lowest tender from a Canadian manufacturer, for English iron and Canadian workmanship.

All articles procured from contractors in England are to be paid for only after arrival and inspection in Canada, and it affords me pleasure to remark that owing to the promptness with which all payments had been made for supplies procured for the Government of Canada in England, and the general knowledge as regards the country which prevails, that no further reference beyond my written instructions were required to secure me quotations of prices from the best commercial houses, and in placing Canada on the basis of a first-class buyer in the market.

MARTINI-HENRY RIFLES.

In accordance with the desire of the Minister of Militia and Defence, I made enquiry respecting the new Martini-Henry breech-loading rifle, which it was said had been decided on for use by the regular army, and found that a number of these rifles had been manufactured by hand, and issued out to corps for trial—this trial had been made, and resulted in suggestions for improvement in both rifle and the shape of ammunition. These suggestions having been adopted by the authorities at the War Office, a sealed pattern of the new arm was shewn to me by General Adye, Director of Artillery and Stores, and I thereupon made requisition, asking that two of the rifles be issued to me for shipment to Canada. My requisition having been approved, General Adye informed me that so soon as the necessary machinery was perfected for the manufacture of the Martini-Henry rifle, two stand complete, with 300 rounds of ammunition for each, would be issued out from store, and handed over for shipment as requested—say, probably, about the 1st January, 1872.

The pattern rifle which was shewn to me appeared well made in every respect, but a doubt existed as to the description of bayonet which would finally be adopted. I, however, append for your information particulars of the Martini-Henry rifle, sword-bayonet, and Boxer-Henry ammunition, which were shewn to me, and the same as compared with the long Snider rifle now in use by the militia in Canada.

	Martini-Henry Rifle, Sword-Bayonet, and Ammunition.	Snider Rifle, long, Pattern 1853, Bayonet and Ammunition.
Rifle*		
Length	without bayonet..... 4 feet 1 inch. with bayonet fixed..... 5 feet 8 inches. of barrel..... 2 feet 9' 22 inches.	4 feet 7 inches. 6 feet 0½ inch. 3 feet 3 inches.
Calibre	0' 451 inch.	0' 577 inch.
Rifling	grooves..... 7 twist, one turn in..... 22 inches.	3 78 inches.
Weight	without bayonet..... 8 lbs. 12 oz. with bayonet..... 10 lbs. 4 oz.	9 lbs 0½ oz. 9 lbs. 14½ oz.
Sighted to	1,400 yards.	950 yards.
Cost	Not more than that of Snider when made in large num- bers.	£2 10s. 10d.
Bayonet.		
Length	2 feet 1½ inch.	1 foot 8½ inches.
Weight, without scabbard	1 lb. 8 oz.	13½ ozs.
Cost, with scabbard	14s. 6d.	3s. 11½d.
Ammunition.—The cartridge for the Martini-Henry is bottle-shaped, metal foil, and central fire.		
Charge of powder	85 grains.	2½ drams or 68 to 72 grains.
Weight of		
bullet.....	480 ..	480 ..
one cartridge.....	765 ..	718 ..
a packet of 10 cartridges.....	1 lb. 2 oz.	1 lb. 0½
Length of cartridge.....	3' 1 inch.	2' 435 incher.

* The particulars given relate to the "long butt" rifles; the "short butts" are 1 inch shorter in the butt, and about 2 oz. lighter.

The breech-action of the Martini-Henry rifle is not unlike the Peabody, of which the Government of Canada has a small supply in store. This action is based on the block system. The block closing the breech is hinged at the rear, and descending in front by means of the trigger-guard action, to admit the insertion of the cartridge. The breech-block has the lock action and striker contained within it, and the hammer such as is used in the snider is dispensed with. The depression of the lever by the hand lowers the breech block, ejects the cartridge case, and compresses the main spring ready for firing. A new cartridge can then be put in, the lever brought up to its place, which raises the breech-block, and it only remains to pull the trigger to complete the fire.

The motions are exceedingly simple, and I observed that when the rifle was loaded, but immediate fire not intended, the discharge could be prevented by pushing back a small bolt at the side, which prevents the release of the mainspring or movement of the trigger.

You will see by the above description that although the bullet for the Martini-Henry rifle is of the same weight as that used for the Snider, it is less in diameter and considerably longer than the latter, and that if this rifle be adopted, the objectionable feature of having arms in possession of the militia requiring different descriptions of ammunition would exist. It was not known how soon Martini-Henry rifles would be furnished to the Imperial troops, but there seemed no reason to doubt that with present, or even considerably increased facilities, it would not be possible for the War Office authorities to produce a sufficient number of these arms to complete the equipment of the regular army, and provide a reserve for sale to Canada, at any time within the limits of the time over which the Parliamentary estimates of this or the next financial year would extend. It, therefore, seems evident that if the Government of the Dominion desire to procure immediately a reserve of such arms, it will be necessary to do so through the ordinary channels of trade, and in this event if rifles were procured in England, the Imperial authorities kindly proffered the services of experts for any test or inspection that might be required on the part of Canada.

I raised the question as to whether, in the event of Canada requiring the manufacture of Martini-Henry rifles for use by Dominion troops, any payment or royalty to inventors beyond such a bulk sum as the Imperial Government may have decided to pay for those manufactured for equipment of its own army, would be required,—and was told that it was thought not, but that a satisfactory answer could only be received after making direct application on that point to the Secretary of State for the Colonies. In this view it occurred to me that such communication, if thought necessary, should be made by the Dominion Government at such time as might suit its convenience hereafter. I have, therefore, no definite information to convey on this point.

As regards the particular objects of my mission, it has been my special desire to secure the best and most serviceable articles for use by the militia, to give the several corps all the advantages of having the latest improvement in pattern, and at the same time to obtain for the Dominion the most favorable quotations of prices, and terms of payment. In all of which, I hope to have merited your approval.

Having reference to my movements generally, I have to acquaint you that [I went to Aldershott in September, and saw the troops then engaged in the autumnal manœuvres, together with all the necessary equipment for the supply of food, shelter, and transport for that army in the field. And after I had taken all the necessary preliminary steps to procure information, and secure the manufacture and submission of patterns connected with the particular object of my mission, I availed myself of the kind permission conveyed by you to visit Paris and take a survey of some of the results of the late war. This, of course, was not in any way connected with my mission to England, and the expense of that trip does not form any part of the sum to be repaid me by Government; but I took advantage of my presence in Paris to visit several of the manufactories engaged in supplying equipment for the French Government, and thus was enabled to add to the fund of information so necessary to the satisfactory discharge of the several duties required of me by the Government of Canada.

My personal and travelling expenses to be repaid by the Government on account of my mission to England, amount to the sum of \$300, in addition to \$160 paid the Allan line for ocean passages out and home, or in all \$460.

I have the honor to be, sir,

Your most obedient servant,

W. POWELL, Lieut.-Colonel,

Deputy Adjutant General of Militia.

The Adjutant General of Militia, &c., &c., &c.,
Ottawa.

[A]

ADJUTANT GENERAL'S OFFICE,

OTTAWA, August 9th, 1871.

MEMORANDUM.

With reference to the direction of the Hon. the Minister of Militia for the undersigned to proceed to England to purchase uniform clothing, accoutrements, saddlery, field guns, carbines, ammunition, &c., it would afford very great advantages in carrying out instructions, if His Excellency the Governor General would kindly send a communication to the Secretary of State for the Colonies, asking that he, the undersigned, might be afforded facilities, patterns and information from the War Office and manufacturing establishments of the Imperial Government, relating to the several supplies required by the Dominion Government; and, if possible, for the Imperial Government to supply on payment such field guns, carbines, saddlery, &c., as the undersigned is authorized to purchase; that the Secretary of State for War may be informed that money has been provided by a vote of the Parliament of Canada for payment of the value of the same;

and that the undersigned may have the services of an expert placed at his disposal for the inspection of such guns and stores as he may be required to procure under contract, should it not be possible for the Imperial Government to supply from its own store any of the articles proposed to be purchased, the value of such services being made good by the Dominion Government.

Respectfully submitted.

W. POWELL, Lieut.-Colonel,
Deputy Adjutant General of Militia.

The Honorable the Minister of
Militia and Defence, &c., &c.,
Ottawa.

[B]

GROSVENOR HOTEL, VICTORIA STATION,
LONDON, S.W.,

August 30th 1871.

MEMORANDUM.

Having reference to the accompanying despatch from His Excellency the Governor General of Canada, the undersigned, acting under instructions from the Government of the Dominion of Canada, has the honor to request that the Right Honorable the Secretary of State for War may be so good as to permit the sale from existing stores of the saddlery, field guns, and ammunition, enumerated in the margin, for immediate shipment to Canada.

- 1.—500 sets of saddlery, universal pattern.
- 2.—1 battery consisting of 4 9-pounder muzzle-loading rifled guns, with carriages and waggons complete.
- 3.—10 9-pounder muzzle-loading rifled guns, same as above, but without carriages and waggons.
- 4.—A supply of ammunition for the above guns.

Payment will be made by the Government of Canada from moneys voted in the estimates for service of the current year.

W. POWELL, Lieut.-Col.
Deputy Adjutant General of Militia, Canada.

The Right Honorable
The Secretary of State for the Colonies,
Downing Street.

GROSVENOR HOTEL, VICTORIA STATION,
LONDON, S.W.

August 30th, 1871.

MEMORANDUM.

Having reference to the accompanying despatch from His Excellency the Governor General of Canada, the undersigned has the honor to request that he may be supplied with two Martini-Henry breech-loading rifles, with bayonets and scabbards complete, similar to those adopted for issue to the Imperial troops, and that he may be placed in communication with the superintendent of the Royal Arms Factory at Enfield, or wherever the factory may be, with a view to receiving information relating to the manufacture and value of these arms.

W. POWELL, Lieut.-Colonel,
Deputy Adjutant General of Militia, Canada.

The Right Honorable
The Secretary of State for the Colonies,
Downing Street.

[D]

DOWNING STREET,
31st August, 1871.

SIR,—I am directed by the Earl of Kimberley to acknowledge the receipt of your two letters of the 30th instant, respecting your mission to this country for the purpose of purchasing military stores required by the Government of Canada, His Lordship has communicated copies of your letters to the War Office, with a request that Mr. Secretary Cardwell will, if he is able to do so, afford you facilities in furtherance of the object of your mission.

I am, sir,
Your obedient servant,
ROBERT G. W. HERBERT,

[E]

OTTAWA, CANADA, November, 1871.

SIR,—I have the honor to acquaint you that, in accordance with the terms of your letter under date of 31st August, the authorities of the War Office have expressed their willingness to supply the carbines, saddlery, field guns, two Martini-Henry rifles and ammunition for same required by me for shipment to Canada; and I have now to request that you will kindly convey my thanks for the readiness evinced by the authorities to meet my wishes in regard to these stores, and for the good feeling manifested towards me in the negotiation as agent of the Government of Canada.

To Sir Henry Storks, General Adye, and Capt. Gordon, C.B., in whose departments the negotiations belonged, I am specially indebted for information conveyed, and for prompt attention to my several wants in the premises.

I have the honor to be, sir,
Your most obedient servant,
W. POWELL, Lieut.-Colonel,
Deputy Adjutant General of Militia, Canada.

ROBERT G. W. HERBERT, Esq.,
Colonial Office, Downing Street,
London.

MILITARY DISTRICT No. 10.

WINNIPEG, December 25th, 1871.

SIR,—I have the honor to report to you that, in accordance with your instructions furnished to me in October last, when detached on special service to this Province, I have among the other duties detailed, been engaged in forwarding the organization of the Active Militia of the District, constituted as Military District No. 10.

The force as at present authorized by *Gazette* consists as follows:—

Two troops of Cavalry.
One Half Battery of Field Artillery.
Nine Companies of Infantry.

Of these the Cavalry corps are not as yet organized; they will, however, probably succeed in their organization as Mounted Rifles, in accordance with your permission, and by an arrangement with the respective commanding officers.

The Half Battery of Artillery, the armament of which consists of two bronze mountain howitzers, is organized, and will prove a useful and efficient corps.

Of the nine companies of Infantry, four are fully organized, and about to commence

their preliminary drills. The organization of the remaining five companies is progressing. The men are at present ununiformed, but the clothing has just arrived, and will be at once distributed to the organized corps, and to the others when complete.

In addition to the force above enumerated, I have received your permission to organize two Mounted Rifle Corps; this duty will engage my active attention.

The population from which the force has to be drawn, exclusive of Indians and scattered settlers may be estimated at ten thousand (10,000).

The settled country is well situated, geographically, in a strategical point of view, for the formation of companies.

From the parallel of forty-nine, (the boundary line of the U.S.), the chief settlements extend due north, along the Red River for about ninety miles; this line of settlement is crossed by another running nearly east and west, from Point de Chêne on the River Seine to the eastward, to Prairie Portage to the westward, on the Assiniboine River; both these rivers converge at Winnipeg (Fort Garry) falling into the Red River. The settled country thus forms a cross, of which Fort Garry may be considered the centre, sixty miles north of the boundary line at Pembina, with Point de Chêne, and Prairie Portage distance thirty and seventy miles, respectively, to the east and west. The force best adapted to the physical geography of the country, and to the habits of the population, is that of Mounted Rifles.

At an early date I shall have the honor of submitting to you, in detail, for your consideration, suggestions concerning the equipment and clothing of a force of this nature, which, in addition to its great economy, compared with cavalry as ordinarily constituted, possesses advantages of mobility over infantry, which is of the highest importance in so large a territory as this, which is at the present so sparsely populated.

I would respectively request that, at as early a date as possible, a thoroughly competent non-commissioned officer should be attached to this District, as Artillery Instructor and caretaker of munitions.

The severity of the climate at this period of the year has, of course, precluded all Rifle practice; I have, however, ordered "preliminary drill" to be carried on at the company head-quarters, as a part of the annual course.

In some of the companies, there are officers competent to instruct; to others I will, as occasion requires, furnish drill instructors from the embodied militia at this station.

The military spirit which appears to actuate all classes of the population is excellent, and the physique is not easily surpassed.

My ordinary returns obviate the necessity of reporting on the Provisional Battalion of Rifles here on special service.

I have the honour to be, Sir,

Your obedient servant,

W. OSBORNE SMITH,

Lieut.-Col., D. A. G. Militia,

Commanding Dominion Troops in Manitoba.

The Adjutant General of Militia, &c., &c., &c.,

RE FRT OF MAJOR IRVINE.

FORT GARRY, 23rd October, 1871.

SIR,—I have the honor to report that for some time back there have been rumors of Fenians collecting on the Frontier, in the neighborhood of Pembina—which rumors, on reliable information obtained by the Lieutenant Governor, proved to be true. His Honor the Lieutenant Governor issued a Proclamation on the 3rd inst., calling on all loyal subjects to enrol.

At the request of the Lieutenant Governor, I called out the Winnipeg Volunteer Company (Captain Kennedy's) and quartered them in the Fort, and notified the remainder of the Volunteer Active Militia in the Province to hold themselves in readiness for active service.

As I understood the Fenians contemplated a raid on Fort Garry, I took every precaution by throwing up earthworks, increasing sentries, &c. On the 4th inst. I called out the remainder of the Active Militia, and ordered them to report at Fort Garry. The officials and employes of the Honorable H. B. Company at Fort Garry, enrolled themselves under the command of Donald A. Smith, Esq., and the citizens of the town of Winnipeg also enrolled themselves one company about 100 strong, under Capt. Stewart Mulvey, late of the 1st or Ontario Rifles, composed almost entirely of discharged men from the Ontario and Quebec Battalions, and a Home Guard under Captain the Honorable Thomas Howard, composed of the merchants and citizens of Winnipeg. Capt. Howard, however, resigned the command in favor of Capt. Bain. These companies, with the Mapleton Volunteer Company (Capt. Piton's), were inspected by the Lieutenant Governor at 4:30 p.m. on the 4th, in front of the Fort. Companies were being formed, and rolls sent in (copies of which I have forwarded) from all parts of the Province.

On the 6th inst., about 11:30 a.m., the Lieutenant Governor sent for me and informed me that the Fort at Pembina had been taken, and that the Fenians were some twelve or fifteen miles within the Province, and wished me at once to despatch a force to meet them. I immediately sent orders to Capt. Mulvey to parade his company at Fort Garry for active service. *In less than an hour*, Capt. Mulvey reported himself with seventy-one men. These men were served out with rifles and eighty rounds of ammunition per man. As we had no military great coats in store, I had blue capots from the H. B. stores issued to them.

The Honorable H. B. Company's Corps enrolled under the Lieutenant Governor's Proclamation, and the remainder of the companies of the Active Militia I formed into a Provisional Battalion, and left them to garrison Fort Garry, under the command of Capt. Allan McDonald. A company was enrolled, under the Proclamation, by Capt. Bedson, at the Stone Fort. This company was served out with rifles, and remained to garrison that Fort.

I left Fort Garry at 4:30 p.m. on the 6th, with the two service companies. The Winnipeg Volunteer Company (Capt. Kennedy's) with a 7-pounder mountain gun, and Capt. Stewart Mulvey's Company, enrolled under the Lieutenant Governor's Proclamation, (marching-out state annexed). I took with me ten days' provisions, and all necessary camp equipment, intrenching tools, &c.; I also took a reserve of 20,000 rounds of ammunition, the transport being supplied by the Control Officer, Major Peebles.

A drizzling rain fell all the afternoon, but soon after crossing the Assiniboine River night set in and a heavy rain fell, making the roads very heavy, the mud being almost knee deep, and the night intensely dark, we marched about four miles where we camped for the night. The following day I marched as far as St. Norbert, or about one and a half miles beyond Stinking River, where we camped for the night. The rain had stopped, and the weather was clear and cold, and the roads good. On the 8th I was joined by Capt. de Plainval with two officers and thirty men, twelve of whom were mounted. I marched as far as the house of Mr. Leroque's (twenty-two miles from Fort Garry).

Hearing that the American troops had turned the Fenians out of the Province, and that there was no chance of my being able to capture the leaders, and that if another raid were to be attempted it would be likely to be from the neighborhood of St. Joe, I returned to Fort Garry, leaving Leroque's at 2 p.m. on the 9th, and arriving at Fort Garry at 1:30 p.m. on the 10th.

When the force under my command arrived within the Fort they were addressed by the Lieutenant Governor, who thanked them for the manner in which they had turned out. I then relieved the Provincial Militia Corps from active service; and the rifles, accoutrements and capots were returned into store. I, however, retained the services of Capt. Kennedy's Company, which I thought advisable to keep on duty a short time longer to assist the Service Companies in garrisoning Fort Garry.

I cannot speak too highly of the behavior of the men throughout. The greatest credit is due to Capt. Mulvey and his officers, Lieut. Hyman and Ensign Cooper for the wonderfully short time in which they enrolled their men, and reported to me after receiving the order.

I enclose statement shewing strength of all companies enrolled under the Lieutenant Governor's Proclamation, as well as the companies of the Volunteer Active Militia. Scouting parties were formed under the Proclamation; the whole of these were under the command of Capt. Villiers, who kept all the roads well guarded; they were very useful in keeping us informed of what was going on. On the 8th some 200 French half breeds met at St. Boniface and tendered their services. The Lieutenant Governor accepted the services of about fifty of them, who acted as scouts. On the 17th I received a report (which I enclose) from Capt. Royal who accompanied these men.

I must mention that several of the H. B. officials, from their different posts in the North West, happened to be at Fort Garry at this time attending their Annual Council. These gentlemen were amongst the first who tendered their services as mounted scouts, and placed themselves under the command of Capt. Villiers. They went at once to the front at their own expense, and refused to accept any remuneration for their services.

The Lieutenant Governor was kind enough to place his A. D. C. and Private Secretary, Mr. Bouthillier, at my service. He accompanied me throughout, and was of great assistance to me.

I beg to record the prompt and efficient manner in which Major Peebles, the Control Officer, discharged the arduous and important duties of his department; and it is due to his energy and efficiency that I was enabled to proceed in so short a notice to the front.

I have the honor to be, Sir,

Your obedient servant,

A. G. IRVINE, Major,

Commander Dominion Troops,
Manitoba.

The Adjutant General of Militia,
Ottawa.

FORT GARRY,
23rd October, 1871.

A. G. IRVINE, Major,
Commanding Dominion Forces in Manitoba.

CAPTAIN ROYAL'S REPORT.

St. BONIFACE, 17th October, 1871.

Major Irvine, Commanding Dominion Troops
in Manitoba, &c.

SIR,—I beg to report that having succeeded to organize a troop of thirty mounted scouts among the natives, leaving to them their own mode of division by sections of ten men, under the command of a captain or chief, we were instructed, on Sunday, the 8th instant, to join another corps of twenty men under the command of Mr. P. Brelau and Mr. Birston respectively, and proceed with them, with as little delay as possible, in the direction of River aux Islet de Bois to scout the country west as far as the Pembina range, and south as far as St. Joe.

Mr. P. Brelau was the chief or guide of the expedition.

Two carts were allowed to transport the provisions of each section of ten men.

The number of the men mounted were fifty.

One man was allowed for each cart, so that the whole force amounted to sixty or thereabout, officers and men.

Having received the necessary rations for 8 days' service, together with a few articles of equipment, &c., we proceeded to White Horse Plains, and camped at the crossing of the Assiniboine on Tuesday evening, the 10th.

The next day we crossed the upper branches of Stinking River and camped about 5 miles further west.

On the 12th, we arrived in the evening at Rivière Aux Ilets de Bois, after a ride through a burnt prairie of about 35 miles.

There, according to the usage of war amongst the half-breeds when getting near the enemy, the men were administered the oath of allegiance, and duly warned to obey strictly the orders of their chief. On striking tents, an indian was seen arriving from Pembina, and from whom we tried to elicit some information. His news was several days prior to our departure from the fort.

In the morning scouts were sent towards the mountain, and instructed to go as far as the line; another party was detached towards the Pembina river, forty miles distant, and two others to see where the force could find water and pasture for the horses on our way back.

We remained encamped the whole day.

On the 14th, the main body proceeded to the Tobacco River, some 12 miles from the River aux Ilets de Bois, where we waited for the return of our scouts. They returned in the evening and reported everything quiet along the frontier, and in the different places where some danger could be apprehended.

Having so far discharged the object of the expedition, the force moved back on the 15th, and after a ride of more than 46 miles, came to camp on the Stinking River at a point some 20 miles below our former crossing of the same river.

Yesterday morning we made in a direct line for the Red River, which we struck about noon near the Hon. Hamelin's residence, and after a little rest the whole body returned to the fort early in the afternoon.

The men have behaved very well, and were rather eager to get a sight of the Fenians; but none were to be seen.

The different articles of equipment, &c., have been duly returned yesterday afternoon.

Believe me, Sir, with much respect,

Your obedient seryant,

JOSEPH ROYAL,

Captain.

LIEUT.-COLONEL W. O. SMITH'S REPORT ON THE MANITOBA EXPEDITION
OF 1871.

WINNIPEG, MANITOBA, November 23rd, 1871.

SIR,—I have the honor to report to you, that subsequent to my interview with you in Ottawa, relative to the Manitoba Expedition, and in accordance with your instructions, I left Montreal on the 16th of October, and *via* St. Pauls, Minnesota, proceeded across the plains to Fort Garry, where I arrived on the 27th of the same month.

Here I informed His Honor the Lieutenant Governor, that the Dominion Militia on service in this Province was to be reinforced by the troops of the Expedition then *en route via* Thunder Bay.

Following your orders, I made such arrangements as were requisite for the transport and provisioning of the Expeditionary Force from the North West Angle of the Lake of the Woods to Fort Garry, also such provision as seemed necessary for barrack accommodation for the increased force here, and at the Stone Fort on the Red River.

As the winter season appeared to be setting in at an unprecedentedly early period, and as great danger of delay to the Expedition from ice appeared probable, I determined on reinforcing the corps of voyageurs, that might be accompanying the Expedition, by twenty experienced men who were engaged for the purpose, through the kind offices of Mr. Donald Smith, of the Hon. Hudson Bay Company, this reinforcement was subsequently found of much service.

After consultation with His Honor the Lieut. Governor, and appreciating the necessity of using every effort to bring forward the troops at the earliest possible date, I considered it most expedient that I should proceed myself to meet the Expedition, and to superintend personally the arrangements for the preparation of camps, fuel, &c., for the troops on the way.

As the boats which I had been led to expect as available at the North West Angle, had been taken away by parties belonging to the Canadian Pacific Railway Survey, I had much difficulty in proceeding from that point.

I was, however, fortunate enough to find in the creek, a boat used in the Expedition of 1870 which, by temporary repairs, was made tolerably seaworthy. I also, at the North West Angle, met Mr. Graham, of the Public Works Department, who had been ordered by Mr. Dawson, on his receipt of information at Thunder Bay of the despatch of troops, to proceed to Fort Garry to make those arrangements for their transport from the North West Angle, which my earlier arrival *via* the U. S. had anticipated.

In proceeding to meet the Expedition, we met with much delay and difficulty from the ice which seriously damaged our boat and canoe, and from gales of wind which prevailed on the Lake of the Woods.

Early on the morning of the 11th instant, after having been wind-bound on an island for two days, we were enabled to cross the Grand Traverse, and at the mouth of Rainy River met the Expedition, which had been delayed there, sheltering from the storm.

Returning with the force, and favored by a fair wind, we arrived on the same evening, at a point on the Lake about eighteen miles from the North West Angle—here, the ice, which on our outward trip we had been enabled with some difficulty to cut through, had formed so fast, that we were compelled to land on an islet and camp.

A furious gale which arose during the night, occasioning some small damage to the flotilla and one of the tugs, did us service in partially breaking up the ice, through which, though with much difficulty, we proceeded six miles further with the boats on the 12th instant, as far as the narrows, about twelve miles from the North West Angle. Here, from the ice being fast taken and the severity of the weather increasing, it seemed evident to me, after consulting with Mr. Dawson, that our boat service must cease. The troops were landed on an island, and the flotilla of boats and tug steamers drawn on land for winter quarters.

On the following day, having constructed hand-sleds, and leaving a small rear-guard with some voyageurs in charge of the boats and heavier stores, we proceeded on the ice to the North West Angle. Here, the provisions and transport were waiting. This march, over newly formed ice, and in the teeth of a northern gale, with the thermometer low, was of a most trying character.

From the North West Angle, where we found the transport and provisions in readiness, the troops started on the 14th for Fort Garry, which place, after a march rendered severe from the cold, they reached at midday on the 18th instant.

I enclose to you, herewith, Captain Scott's report and diary, showing the daily progress of the Expedition.

Not only from the statements of that officer, but from my personal observation, during the few days I was with them on the march, I am enabled to report on the conduct of the troops as being worthy of the highest admiration. Officers and men seemed actuated by the same enthusiastic spirit of determination to push forward the Expedition to a speedy and successful issue.

From first to last the weather was of the most unfavourable nature; rain, snow, intense cold, and violent gales alternating in rapid succession, presented all obstacles that the commencement of a winter season in these high latitudes offers to the progress of troops.

It is a satisfaction to reflect that scarcely a month has elapsed between the issue of your orders for the organization of the force and its arrival at Fort Garry; especially when bearing in mind that a distinguished officer of H. M. Regular Forces, pronounced the route as being, in his opinion, impracticable to troops, after the middle of September, and that high encomiums have been passed on an expedition for accomplishing a march during the long and pleasant days of summer over the same ground which H. M. Dominion troops have now traversed during the brief daylight of an almost Arctic winter.

I feel I am conveying to you the sentiments of every officer and man in expressing the obligations due to Mr. Dawson—his great experience and the indefatigable exertions used by himself and his staff, among whom I take the liberty of mentioning Messrs. Graham, Towers, Sinclair, Burton, Arnoldi, and Whitcher, have contributed in the highest degree to the success of the Expedition.

I have the honor to be, Sir,

Your obedt. servt.,

W. OSBORNE SMITH, Lt.-Col.,

D. A. G. Militia,

Commanding Military District No. 10.

CAPTAIN SCOTT'S REPORT AND DIARY.

FORT GARRY, November 23rd, 1871.

SIR,—I have the honor to report that the Manitoban Expeditionary Force under my command, composed of nine officers and 203 non-commissioned officers and men, embarked on board the steamer Chicora at Collingwood, on the 21st of October, and arrived at Fort Garry on the 18th of November, thus making the whole march in twenty-eight days. According to instructions I herewith transmit a memorandum of each day's progress and proceedings.

October 22nd.—We arrived at Sault Ste. Marie at 11-30 p.m., after crossing Lake Huron, without meeting with any difficulties.

October 24th.—We safely performed the voyage on Lake Superior, and arrived at Prince Arthur's Landing at 1 o'clock p.m. to-day. On entering the bay one of the paddle-wheels of the boat was damaged, the repairing of which detained us an hour. At 2 o'clock p.m. the troops disembarked, but we experienced considerable difficulty in removing the stores, as there was a heavy storm, and the scow could not reach the shore in safety. The

steamer *Manitoba*, with fifteen span of horses, eight head of cattle and a large quantity of supplies for the use of the troops, arrived at Thunder Bay at 4 p.m. As there were a sufficient number of voyageurs in the employ of Mr. Dawson who were thoroughly acquainted with the route, it was deemed advisable to send back those who accompanied the expedition to Thunder Bay, thus saving a considerable addition to the expenses.

October 25th.—Sent off fifty men this morning under command of Captain Fletcher, and another fifty under Lieut. Simard this afternoon, with orders to make Shebendowan Lake in two days. Completed the disembarkation of stores from the steamer *Manitoba*, to-day, and caused the cattle to be driven to Shebendowan Lake, there to be slaughtered, and the meat put in bags for the use of the troops.

October 26th.—It has rained incessantly since landing. At six o'clock this morning consisting of six officers and 103 men, (less two men discharged—one medically unfit for duty and the other for bad conduct), marched off for Shebendowan Lake. There was a heavy hailstorm this morning, which turned to snow in the afternoon. This, coupled with the bad state of the roads after three day's rain, made it very difficult marching.

October 27th.—First Brigade arrived at the Shebendowan last night; the second at 11 a.m. to-day, and the 3rd at 4 p.m. One hundred men in four large boats in tow of the tug, left for Kashaboine Portage at 1-30 p.m., the remainder of the force camped at the Shebendowan overnight. Weather very cold last night and to-day. Twenty teams of horses and wagons were employed in transporting the stores from Thunder Bay to Shebendowan. The march of forty-five miles to Shebendowan was made in less than thirty-four hours from starting.

October 28th.—The tug, which was to have returned at 9 a.m., did not arrive till 4 p.m. owing to an accident to her engine. The remainder of the force embarked at 4-30 in tow of the tug, arriving at Kashaboine Portage at 10 p.m. All the stores were transferred over the portage to-night, a team of horses being used for the purpose.

October 29th.—We portaged six boats this morning, and started off for the Height of Land Portage at 11-30 a.m. The tug was unserviceable owing to the cold weather. While crossing Kashaboine Lake a heavy snow-storm came on, and two of the boats were lost for several hours. Arrived at Height of Land at 2 p.m., and completed portaging boats and stores across at 11 p.m. At this hour there were about eight inches of snow in the level, and the Bay was slightly frozen for a distance of 100 yards. The tug of *Lacs des Mille Lacs*, we ascertained, was useless, pipes being frozen.

October 30th.—Owing to a strong headwind and high sea, we could not make a start until 11 o'clock a.m.; arrived at Baril Portage at six p.m. The entrance to the portage was frozen and we were compelled to cut through a half mile of ice three quarters of an inch thick. Completed moving our boats and stores across at 12-30 this night.

October 31st.—Reached Bruile Portage at 9 o'clock a.m. and left for French Portage at noon, arriving at the latter at 4-10 p.m. Completed the transfer of boats and stores over French Portage at midnight.

November 1st.—Loaded boats at 5 o'clock this morning and placed three soldiers and one voyageur in each to take them down French Creek. The remainder of the force marched over the two mile Portage to French Lake. Boats arrived at noon, having taken six hours to run down the Creek. We reached Pine Portage at 5 o'clock p.m.; moved the boats and stores across during a tremendous snow-storm; rowed over the Little Lake to *Dieux Riviere* and camped there for the night.

November 2nd.—Left *Dieux Riviere* Portage this morning at 10 o'clock. Owing to the shallowness of the water in the creek leading out from the portage the men were compelled to jump into the water and haul the boats along, although the creek was partly frozen. When we reached Maline River we found the water so shallow that several new portages had to be made. Camped on west side of third portage for the night.

November 3rd.—Arrived at Island Portage this afternoon at 3 o'clock. Transferred boats and stores across, and started over Lac La Croix preceded by the tug at 5 p.m., arriving at Loon Portage at 11 p.m. The weather during the past few days has been

very cold and disagreeable, notwithstanding which the men are in good health and spirits.

November 4th.—The boats and stores being portaged at 11 a.m., we started for Loon Lake, before reaching which we had to cut through ice half an inch thick, for a distance of 200 yards. Loon Creek (length six miles) was so shallow that it took some of the boats thirty hours to get through, and the men were compelled to be in the water the greater portion of the time. In many places the water was only three inches deep and the boats, therefore, had to be unloaded and the stores carried along the shore, while it required not less than twenty men to pull the empty boats through the mud.

November 5th.—The whole of the 1st Brigade and three boats of the third arrived at Kettle falls to-day. The tug did not arrive from Fort Francis until this afternoon, but the wind being favorable the eight boats set sail across Rainy Lake for Fort Francis, with orders to remain there until the arrival of the whole force.

November 6th.—Four boats which had been brought across Kettle Falls Portage this afternoon were towed a distance of ten miles down Rainy Lake by the tug. The tug was ordered back to Kettle Falls to bring the remaining three boats which were expected to arrive there to-night, and the boats dropped by the tug proceeded on their way to Fort Francis, rowing against a head wind.

November 7th.—The tug left Kettle Falls this morning with the last boats in tow. At eight o'clock p.m. to-day the whole of the expeditionary force were under canvas at Fort Francis. The men had endured great hardships so far, but fortunately there was only one case of sickness, caused by an accident in carrying a load across the third Loon Portage.

November 8th.—The Rainy Lake tug was moved across the portage into Rainy River, where the Lake of the Woods and Rainy River tugs were in waiting, and in tow of the three tugs the whole of the expedition moved down Rainy River at 1 p.m. After running twenty-five miles we camped for the night.

November 9th.—Started at 7 a.m. Run the Maniton and Long Rapids, but at the latter, owing to low water, the men marched along the shore for a distance of two miles, leaving four in each of the boats to run them down. Reached Hungry Hall, near the mouth of Rainy River, at 7 p.m. this day.

November 10th.—Started at 2 o'clock a.m. but were compelled to camp at the mouth of the river, owing to a heavy storm on the lake. At 6 p.m. we attempted to cross the traverse but were unsuccessful, and had to run to an island to remain there over-night.

November 11th.—This morning the boats were ordered to set sail independent of the tugs, the wind being favorable. Shortly after starting we were glad to meet Lieut-Col. Smith, who was on his way to meet us. The majority of the boats sailed to within fifteen miles of the North West Angle, and the remainder were towed by the tugs. Camped there for the night on an island. From thence as far as the eye could reach in the direction of the Angle was one sheet of ice.

November 12th.—A storm last night fortunately broke up some four miles of ice, and we started in the morning passing through the broken ice, and then cut through solid ice for a distance of three-quarters of a mile, a Hudson Bay Co's boat leading. (We brought three of them from Fort Francis.) The ice gradually increased in thickness, and finding it impossible to take the boats farther, we landed on an island, some eight miles from the Angle. One of the tugs, which had been previously sheeted with iron, made an attempt to cut through the ice, but was unsuccessful, getting completely wedged in.

November 13th.—At 1 p.m. to-day the troops started to march on the ice towards the Angle. Having to keep close to shore round the bay, increased the march to ten miles. Capt. Armstrong with a rear-guard of twelve men was left on the island in charge of baggage, stores, etc., and the voyageurs also remained to erect huts over the tugs and boats. Each soldier on the march carried his rifle, accoutrements, knapsack and blankets. On arrival at the North West Angle, the men were very tired after the march over smooth ice. Several of the men were exhausted when within three miles of the Angle, but they were carried on hand sleighs; piercing cold weather all day.

November 14.—We were up at 5 o'clock this a.m. Loaded carts, one to each squad of thirteen men, and with thirteen waggons to carry half the men, started for Fort Garry at 7 o'clock a.m. The waggons relieved the marching men every hour. Arrived at Birch River (thirty miles) shortly after dark. Tents were already pitched for us by order of Lieut.-Col. O. Smith. One man attacked by inflammation of the bowels was left at the Angle in charge of Dr. Codd.

November 15th.—Reveille at 3-30 this morning. Started at five, and reached our camping ground for the night (23 miles from Birch River) at 3 p.m. The day was intensely cold, but the men, although weary and footsore were in good spirits. Tents were pitched here also awaiting our arrival.

November 16th.—Reveille at 3-30 a.m. Started at 5 and reached Prairie du Chene at 5 p.m. Snow fell steadily during the day. Doctor Codd arrived at this place this evening, bringing with him the sick men left at the Angle, and another (one of the rear-guard) who was taken ill with inflammation of the lungs.

November 17th.—Snow continued falling all last night, succeeded this morning by a piercing cold wind. We intended reaching Fort Garry this evening, but owing to extreme cold were compelled to camp in the woods when within thirteen miles of the Fort. A number of the men became exhausted from cold, we took them into a shanty, and under proper treatment speedily recovered.

November 18th.—The weather last night and during the whole of the day was intensely cold. We arrived within a mile of Fort Garry at twelve noon. Here the force was ordered to fall in with arms and accoutrements, and we marched across the Red River and Assinaboine on the ice to the Fort, Lieut.-Col. Smith, the officers and men of the garrison and a large number of the inhabitants of Winnipeg, were assembled at the Fort to welcome us. With the exception of the two already mentioned the men were in tolerably good health, considering the great hardships and fatigue which they had undergone.

The conduct of both officers and men during the whole route was highly commendable, all having worked diligently and cheerfully, and manifesting a desire to make the expedition a complete success, by endeavouring to reach Fort Garry in the shortest possible time, thus showing that Canadian soldiers are capable of enduring any amount of fatigue, and overcoming all obstacles.

I cannot close this report without speaking highly of the valuable aid rendered by Mr. Dawson in every possible way throughout the whole route. He worked most energetically in sending supplies ahead, and by his personal exertions in this respect contributed much to the success of the expedition.

I have the honor to be, Sir,

Your most obedient servant,

THOS. SCOTT, Captain,
Commanding Manitoba Expedition.

To COL.^r ROBERTSON-ROSS,
Adjutant Gen. Canada, Ottawa.

REPORT OF THE INSPECTOR OF ARTILLERY AND WARLIKE STORES.

KINGSTON, ONTARIO,

10th January, 1872.

SIR,—In submitting my annual report for your information, I have deemed it advisable to divide the matters treated of into the following general heads, viz. :—

Field Artillery.
Garrison Artillery.
Engineers.
Gunnery Schools.

FIELD ARTILLERY.

This force comprises ten batteries, each armed with three 9 pounder guns, and one 24 pounder howitzer (including the Wellington Battery, for which only two guns are as yet available), distributed as follows, viz. :—

Ontario, 7 batteries.
Quebec, 2 do
New Brunswick, 1 battery.

All these performed their annual drill in camp, and with the exception of the New Brunswick Battery, were inspected by me during their annual training. The Halifax Battery, equipped with six 6-pounder Armstrong guns, drawn by hand, is not included in the above. I believe it would make an efficient field battery if horsed and equipped like the other batteries. A demi-battery is also about being raised in Manitoba.

As remarks on the various batteries would occupy too much space in the body of the Report, I have drawn up in a condensed form my remarks on the state of the whole force of artillery which is submitted herewith.

Gunners.

Generally speaking, the gunners of the field batteries are well acquainted with their duties. The Toronto, Hamilton, Welland and Kingston Batteries carried on practice with shot and shell under my supervision. The guns were well laid and served, and, with the exception of slight delays in loading shells and fixing fuzes, the whole practice was highly satisfactory.

Drivers.

The drivers are tolerably well acquainted with their duties ; they are, for the most part farmers and farm labourers, accustomed to horses, and with a moderate amount of instruction, they would, I believe, be able to perform all ordinary duties required of them in a satisfactory manner. Their intelligence and skill in making rough repairs and overcoming difficulties, would probably, on actual service, more than compensate for any deficiencies in riding or driving.

In many batteries it is customary for the non-commissioned officers and gunners to meet once a week for gun drill, but the drivers receive no instruction between the periods of annual drill. The reason is obvious, the gunners give their own time gratuitously, but the drivers would have, in addition, to give the time of their horses. This cannot be expected of them, and unless pay for mounted drills (between the periods of annual drills) is provided by Parliament, I fear the country will have to rest content with mediocrity in this branch.

Prizes are given to all classes except drivers. I would strongly advise the issue of a prize and badge of cross whips to the best driver of each field battery.

Non-Commissioned Officers.

There are many good non-commissioned officers in the field artillery, but many others, I find, have very little idea of their duties. In field manoeuvres, each sergeant having to give the word of command to his sub-division, it is essential that these non-commissioned officers at least should be well acquainted with their drill. I would advise that some restriction be placed on the promotion of non-commissioned officers to this rank.

The issue of a General Order to the effect, that members of existing batteries would be permitted to join the schools of gunnery for any periods over two months, and at any time at which it may be most convenient for them, during which period they would be paid, clothed, lodged, &c., at the public expense, would afford every opportunity to men of all ranks wishing to improve themselves in the knowledge of their duties; and captains of batteries need not then promote non-commissioned officers who had neglected to qualify.

Officers.

Generally speaking, the officers commanding are well able to handle their batteries when performing ordinary manoeuvres. Some of them have passed through the Gunnery Schools, and can instruct in gun drill, mounting and dismounting guns, filling shells, boring and fixing fuzes, &c., &c.

The subalterns as a rule not being as well acquainted with their duties as one could wish, restrictions should I think be placed on their appointment and promotions.

In view of the facilities now afforded to all ranks of field and garrison artillery desirous of obtaining instruction, I would submit the following suggestions, which, if carried out, would, I believe, tend to greatly increased efficiency in those very important branches of the service :—

1st. That after the 1st January, 1873, no officer shall be promoted to the rank of captain, who does not possess a first or second class certificate from a School of Gunnery.

2nd. That after the 1st January, 1873, no non-commissioned officer shall be promoted to the rank of sergeant who does not possess a first or second-class certificate from a school of gunnery, or a certificate shewing that he is competent to fulfil the duties of that rank, signed by a commandant of a gunnery school, or by a Board nominated for the purpose by the commandant of a gunnery school.

3rd. That no person be appointed to a commission in the artillery till his educational qualifications are reported as satisfactory by the inspector of artillery.

Horses.

The difficulty of horsing the batteries appears unabated. Some district staff officers having pointed out that batteries in their districts would not be able to turn out for want of horses, an extra allowance of 25 cents per horse per day was authorized for the artillery. By this means a sufficient number of horses was secured, except for the Montreal Battery. I consider such an arrangement unsatisfactory, for the following reasons :—

1st. It is invidious to pay the artillery horses at a higher rate than the cavalry.

2nd. Some of the horses are inferior, unfit for work, and occasionally die of disease while on service, and have to be paid for by the public.

The drivers of such teams having no connection with the battery, but just clothed for the occasion (and frequently not even sworn in) are a drag on the battery during the whole training.

3rd. That in the event of a sudden turn-out of a battery no horses are available, as was the case last year when the Montreal Battery was ordered out to repel a Fenian raid. This battery, it will be remembered, kept a regiment waiting for several hours, and was eventually *a day too late* for the affair at Trout River.

The same battery could only turn out for four days at Laprairie this year, the officer commanding having to promise the people who supplied him with horses that they were to be returned within that time. Such a state of affairs is highly objectionable, and I would again urgently recommend the enrolment of *draught* horses, for *field batteries*.

Enrolling Horses.

I have studied this subject attentively during the past year, and having taken the opinions of a great number of persons in various parts of the Dominion on the matter, have come to the conclusion that the object can be attained without increasing the estimates by giving enrolment gratuities, viz., by the insertion of a clause in the Militia Act, exempting from all statute labor, tolls on roads, water-taxes, &c., teams of horses duly certified as having been enrolled in a local battery, and marked with the initial letter of the battery.

There are certain details connected with this proposal which need not be gone into in a Report of this nature. They are mainly intended to guard against imposition, and to induce owners of enrolled horses to drive them together in pairs (viz., by non-exemption from tolls on roads if driven singly, &c., &c.) I can see no difficulty in carrying out this measure, and if it is approved of I believe that the difficulty of horsing field batteries will be ended, that the batteries will have the pick of all the horses in their vicinity, and that the horses having been constantly driven in pairs will work kindly together in the gun and waggon teams.

Besides these advantages, the extra pay would be saved equal to 25 cents per day for 16 days—\$4 per horse, \$224 per battery, \$2,240 for ten batteries.

Should this idea not be approved of, I would respectfully advise the insertion in the next estimates of a sufficient sum to provide gratuities for the enrolment of the *draught* horses of the batteries.

Ten batteries, 22 pairs each, 220 pairs—say \$20 per pair for 220 pairs, \$4,400; against this there would be the saving of the *extra* pay for *all* horses of the batteries as issued at the last annual training, viz., \$2,240.

The riding horses of the batteries can be provided by those using them as in cavalry corps.

Before concluding the subject of field artillery, I would call attention to the fact that to learn the drill for a four gun battery from a book treating of drill for a six gun battery is rather confusing. As several batteries will be armed during this year with rifled guns having axletree seats, necessitating a revision of the drill, it would be advisable to have printed and issued at cost price, a manual of field artillery exercises more suitable for Canadian batteries, and which would abolish the manœuvring with waggons, and guns together—a system of drill intricate and complicated, and which it is now admitted would be impossible to carry out in the presence of an enemy.

GARRISON ARTILLERY.

This force consists of 70 batteries, including A and B Batteries (forming the Schools of Gunnery at Kingston and Quebec respectively.)

Ontario,	20	batteries.
Quebec,	13	do
New Brunswick,	10	do
Nova Scotia,	15	do
G. T. Brigade, Montreal,	6	do
do Toronto,	6	do

With the exception of the New Brunswick Artillery, I believe few batteries in the Dominion have made gunnery their main object. Some batteries never performed any gun drill, a large number never practised with shot or shell and very few batteries have been in the habit of carrying on practice annually. Rifle shooting and infantry

manœuvres appear to have absorbed their attention, and the principle of attaching batteries to infantry regiments for administrative purposes has not fostered an artillery spirit. The practical working of such a system was evidenced at the Goderich Camp, where I had the mortification of seeing two garrison batteries skirmishing with the 30th and 33rd Battalions, notwithstanding the paragraph of General Order (12) of 5th May, 1871, which directed that under no circumstances were garrison batteries to go into camp with the regiments to which they were attached.

A great advance in the right direction has been made by allowing a fixed amount of ammunition annually for practice. Firing with shot and shell awakens the interest of all, and stimulates *esprit de corps*, which is much wanted in this branch of the service.

The experiment of bringing garrison batteries into the nearest forts for their annual drill was tried this year, and the results have been so satisfactory that I would strongly recommend the extension of this system to all parts of the Dominion.

At Kingston, 13 garrison batteries were quartered in Forts Henry and Frederick during the month of September, and kept almost entirely at drill and practice with guns and mortars. The advance made in their duties during such a short period could only be accounted for by the interest evinced by all ranks in learning their legitimate work.

His Excellency the Governor General being in Kingston, while some of the batteries were quartered in Fort Henry, the works there were manned and practice with shot and shell from guns and mortars carried on for his inspection. He was pleased to express his very great satisfaction at the rapidity with which the guns were served, and the general accuracy of the practice, and in a few kindly words addressed to nine batteries assembled in the square of the fort, he gave them to understand that as the representative of Her Most Gracious Majesty, he fully appreciated the sacrifices which most of them were making in voluntarily leaving lucrative employments to fulfil their duties as citizen soldiers.

The very great difficulty (prominently brought to notice this year) of filling the ranks of the infantry by volunteering does not apply generally to the artillery, with the exception of the Quebec Garrison Artillery. The state of affairs in this corps is lamentable; the officers are equal to any in the Dominion, but I am unable to say anything further in favor of this brigade.

The four batteries could only muster about one-half of their quota, and it would have been impossible to have selected 50 able-bodied gunners out of the whole brigade. Several of those in the ranks were over 60 years of age by their own admission, and consequently not belonging to any class of Militia; and the number of little boys in every battery was so considerable that I requested the surgeon to measure some of them, when many were found to be only 30 to 32 inches round the chest.

The smallest sized tunics hung on these lads like great coats, and their uselessness as "heavy artillery men" can readily be imagined, (I would recommend that the standard of height in force in A and B Batteries be adopted for all garrison batteries.)

On enquiring into the subject, I was informed that it was scarcely possible to keep up the brigade by volunteering, that employers threw difficulties in the way of those belonging to the batteries turning out, that men earned very high wages in the summer, and that volunteers were jeered at by many of the lower orders in Quebec. The officers also stated that in order to bring into camp the small force which I saw, it was necessary to promise many of the men two or three day's leave out of the eight day's drill, such a state of affairs speaks for itself. The Montreal Garrison Artillery performed their drill and practice on St. Helen's Island. This is a very fine corps, the men are of a respectable class, and turn out very clean and soldier-like. I was not able to inspect them at gun drill, owing to the press of other duties.

Isle-aux-Noix would be a more suitable place than St. Helen's Island, for the annual training of this corps.

I saw the Grand Trunk Brigade of Artillery on a divisional parade at Montreal they are, physically, a splendid lot of men. I have not been afforded any opportunity of inspecting either of the Grand Trunk Brigades at gun drill.

Establishment of Batteries.

By the regulations for the Active Militia, 4 bombardiers are on the strength of each field battery. I cannot find any regulation regarding the pay of this rank.

In the establishment of garrison batteries, bombardiers and battery sergeant-majors are omitted. I would suggest instead of 3 sergeants and 3 corporals, that 1 battery sergeant-major, 2 sergeants, 2 corporals and 2 bombardiers be posted to each garrison battery.

Captains commanding field batteries complain that they have not enough men to man their guns when the ordinary details for duty are deducted. In your Report last year, you recommended an increased establishment for field batteries :—

1 major.
1 captain.
3 lieutenants.
1 sergeant-major.
4 sergeants.
4 corporals.
4 bombardiers.
1 trumpeter.
1 farrier.
80 gunners and drivers.

Total 100

and from what I have seen during the past summer, I can fully endorse the above recommendation, and trust that it may be soon carried into effect.

ENGINEERS.

This force consists of—

1 company at Montreal.
1 do St. John, New Brunswick.
1 do Grand Trunk Railway Brigade.

I inspected the first-named company at Laprairie Camp, where the men did good service in making repairs of all sorts about the camp and barracks. During the three days I was there, I had them employed in making a two-gun battery—a work they took great interest in, and which I believe was the first real engineer duty they had ever attempted to carry out.

They also made a few gabions, but for want of a proper sergeant instructor, and the necessary tools, little else could be done.

There is I believe a 2nd Company of Engineers at Montreal, but it did not turn out for drill at Laprairie. I understand it is virtually disbanded.

The St. John Company I inspected at St. John. It consists of a very fine lot of young men, mostly mechanics; but they have always been treated as infantry, and are engineers only in name and clothing.

The Grand Trunk Railway Company I have not been called upon to inspect. From the wide field of selection, I should imagine that this company would be very valuable for special services in connection with the repair or destruction of Railways, &c., &c.

There is little cause for congratulation when viewing the engineer branch of the Canadian Militia. It has a merely nominal existence, and to make it a reality will require time and money.

* I think the following general principles ought to be kept in view in organizing an engineer force :—

- 1st. At least one company of engineers to be raised in each Military District.
- 2nd. The rank and file of this force to be composed mainly of skilled mechanics.

3rd. The officers to be selected from civil engineers, surveyors, or other competent persons, and to pass an examination previous to appointment.

4th. To raise at least one telegraph company in each Province, each of these companies to have a complete field telegraph equipment.

5th. To provide proper instructors and open one or more schools.

The equipment of the engineer companies will, of course, vary, but tools will be required for all. Some companies should be equipped with pontoons or bateaux, but these are details which can be gone into hereafter. While on this subject, I may state that if any force of the Canadian Militia had to cross a river (the bridges over which had been destroyed) they would have no means of doing so unless they could be found on the spot.

A small pontoon train in each Province appears to me to be necessary,

GUNNERY SCHOOLS:

At the commencement of the past year the gunnery schools were carried on in a manner somewhat similar to the infantry schools; the cadets living anywhere in the vicinity, drilling so many hours per diem, and receiving the gratuity of \$50 on their obtaining a first or second-class certificate.

This system is now, I am glad to say, at an end; the most that could be expected of it was to teach those who went there a *gunner's* duty, and not all that. Instruction for officers there could be but little, except mere gun drill, and no means of instructing members of field batteries have been available since the departure of the Royal Artillery.

The present gunnery schools, established at Kingston and Quebec, were organized in accordance with General Orders, (24,) 20th October, 1871, which directed the formation of "two batteries of garrison artillery, in order to provide for the care and "protection of the forts, magazines, armaments and warlike stores recently or about to be "handed over to the Dominion Government in the Provinces of Ontario and Quebec." It further directed that "these batteries in addition to performing garrison duties shall "serve as *practical schools of gunnery* for the training of *all* ranks of the militia "artillery, viz., by instructing gunners and drivers, and affording officers and non-commissioned officers opportunities of joining long or short courses of instruction as "may best suit them individually."

The details of this system can be seen on reference to the General Order above quoted, but the principles on which it is being carried are as follows, viz. :—

1st. The appointment of two officers of the Royal Artillery who had qualified as first-class gunnery instructors at Shoeburyness to be commandants of the schools.

2nd. The enrolment in the batteries of the sergeant instructors of the old schools, as well as other approved non-commissioned officers late of the Royal Artillery.

3rd. The purchase of 8 horses for each battery, by means of which a tolerable amount of instruction in riding and driving may be afforded to field artillerymen.

4th. Providing a few skilled artificers and laboratory men in each Province for the sighting and venting of guns, repair, manufacture and alteration of gun carriages, laboratory operations, &c., &c.

The first and second principles have been successfully carried out, and the Dominion has been fortunate enough to secure the services of Capt. (now Lieut.-Col.) T. B. Strange, of the Royal Artillery, for the school of gunnery, Quebec, the third and fourth are about to be carried out. As the knowledge required by the above mentioned artificers are only to be obtained by a lengthened course of instruction in an arsenal, I feel that the Imperial authorities appreciating this fact, will, on proper application being made, place suitable men at the disposal of the Dominion Government. I trust the earliest opportunity will be taken to obtain the services of these men, as a large amount of practice has been carried on, and a gun may possibly burst from not having been examined or vented in time.

The instruction is based on the general principle that individuals joining the schools

of gunnery shall do duty in the same rank that they hold in their own batteries. Thus, a lieutenant in addition to being taught all ordinary drills, is posted to a district, made to inspect all the stores therein weekly, takes his turn as orderly officer, learns *practically* the interior economy of a battery organized for service in *Canada*, his main attention being directed to those matters which more particularly affect his own branch of the service. A sergeant similarly has charge of a room, goes on guard, takes his turn as orderly sergeant, &c. ; in point of fact they are virtually for the time being component parts of A and B Batteries.

It was supposed when raising the two batteries which constitute the gunnery schools, that a few men would come from every militia battery, and that instruction would thus easily have been disseminated. This has not been the case, no men whatever coming from some batteries, but large numbers from others. Strange to say, the largest numbers come from some of the most efficient batteries. Thus, the Toronto Field Battery has sent 19 men, and 10 are coming from the Wellington Battery (on the 1st February) ; yet, from the whole of Military District, No. 4, containing ten batteries, only three men have been sent to the school of gunnery, its proportion being 52.

By the annexed Return, it will be seen that B Battery has nearly its full complement of men—138 out of 153 ; A Battery has only 98 out of 131. The men from Military District No. 1 do not join till the first week in February, and it will also nearly have its complement.

Considering that these two batteries are only *being* raised, it cannot be expected that much instruction could have been carried on ; but from what I have seen, I feel assured that their formation marks a distinct era in the history of the Canadian Artillery. It is now within the reach of every officer, non-commissioned officer, gunner or driver, or even of a trumpeter to learn his duties in a thorough manner, by joining for a long or short period, and at whatever time of year may be most convenient for him, being lodged and paid at the Government expense. True, the Dominion Government receives *personal* services in return (as guards on magazines and warlike stores, caretakers of the fortifications and their armaments, &c.), which it did not receive under the old system ; but the above services include some of the most important duties of artillerymen, and are apparently rendered gratuitously, if one merely compares the old system with the new ; or, to put the matter in plain figures. The vote for military schools for the year 1871-72 was reduced by \$15,000, as no separate gunnery schools would be required in Ontario and Quebec on the formation of A and B Batteries.

I am glad to be able to report that the conduct of the men of A Battery has been generally most exemplary, and I have no doubt the same can be said of B Battery, and in concluding this subject I beg to state that I look forward with confidence to the good results which I fully believe will be attained by the working of the present system, and after a few years time one will assuredly find in the Provinces of Ontario and Quebec a large number of officers, non-commissioned officers and gunners, who will, in addition to being able to perform their own duties as artillerymen effectively, be also able to assist and instruct their less efficient comrades (provided always that these schools are reserved for the *Militia Artillery*, and that infantry officers are not posted thereto, to the exclusion of artillery officers.)

Hoping that the numerous matters I have had to make this my first report on, will be sufficient excuse for its length.

I have the honor to be, Sir,

G. A. FRENCH, Lieut.-Colonel,
Inspector of Artillery and Warlike Stores.

The battery has been kept a few below strength, because I think it advisable to leave a few vacancies for exceptionally good men.

T. B. STRANGE, Lieut.-Col.,
Commanding School of Gunnery, Quebec.

REPORT OF GUNBOAT AGENT.

TORONTO, 1st March, 1871.

SIR,—I have the honor to enclose a report of the movements and duty performed by the Gunboats "Prince Alfred" and "Rescue" during the season of 1871.

The following batteries of artillery performed their annual drill on board the Gunboat "Prince Alfred":—The St. Catherine's Battery, two officers and forty-eight men; the Collingwood Battery, two officers and twenty-five men; and the Sarnia Battery three officers and thirty-eight men.

The "Prince Alfred" took part in the water defence of the camps stationed at Goderich, Owen Sound, Sarnia, and was also attached to the camp at Niagara, being stationed at Fort Erie during the time the Niagara Camp was held.

The Honorable the Minister of Militia and Defence visited the "Prince Alfred" at Fort Erie, on the 16th June, and Lieut.-General Sir Hastings Doyle, with the Adjutant-General of Militia went out into Lake Huron on the 22nd June, to inspect the Gunboat "Prince Alfred," and the Sarnia Battery (doing duty on board) at their gun drill and target practice.

During the months of October and November the Gunboat "Prince Alfred" rendered valuable service to several ship-wrecked vessels on Lake Huron and Georgian Bay. Among those assisted were the Schooners "M. Thompson," "Ontario," "Phoebe Catherine," and "Gold Hunter." In coming down Georgian Bay in a gale of wind and heavy snow-storm the latter vessel became water-logged while in tow of the "Prince Alfred," and unmanageable, and, to save the gunboat and lives on board, was cut adrift, and afterwards went ashore at Wingfield Point, Cabots Head, where the hull now lies.

Owing to her powerful engine, and weight of hull, this gunboat is considered the best wrecking steamer on the lakes, and I would strongly recommend some necessary appliances to be kept on board, such as hawsers, blocks, chains, and spare pumps, which would cheerfully be paid for when used by those assisted.

I may mention that during the time the "Prince Alfred" was employed wrecking, no expense was incurred by the Department, as all wages, fuel, &c., were paid by the Insurance Companies.

This gunboat is now hauled out at Goderich, to make good some repairs, necessary partly from age and partly from the severe gales she had to encounter while wrecking last November. The "Prince Alfred" carries two "Armstrong" and four brass "howitzer" guns, and has been much improved by the alterations made in Sarnia last winter.

On the 9th June I received orders to place the Gun-boat "Rescue," lying at Kingston, under the orders of S. Fleming, Esq., Chief Engineer of the Canadian Pacific R. R. Survey, and accordingly, the "Rescue" proceeded to Collingwood, and embarked men and stores for the different surveying points on Lake Superior, and remained in that employment until the 6th of September, when the "Rescue" returned to Kingston, arriving there on the 17th September. A report of the service rendered is enclosed.

This gunboat having been examined by four competent ship-builders and vessel owners, was found to be perfectly sound below light-water mark; and their report, which I had the honor to forward to you, recommended certain repairs and alterations, to make her strong and a more suitable gunboat; and a contract will be forwarded shortly for your approval from parties willing to undertake the alterations which will render her a sound boat for seven or eight years. The engine and boiler are in good order.

Accommodation for officers and crew will be made below deck, the space being not now used, and a strong bulwark raised from the deck, giving security to those on board, —the present upper deck removed, which is now useless against rifle shot.

Number of miles run during the season of 1871 by the log is 8,871, and the places visited were twenty-one.

I have the honor to be, Sir,

Your obedient servant,

G. H. WYATT,

Gunboat Agent.

The Honorable
The Minister of Militia and Defence,
Ottawa.

The Gunboat "Prince Alfred"—

- May 4.—Left Sarnia for Windsor on trial trip.
 „ 5.—Returned from Windsor to Sarnia.
 June 7.—Left Sarnia for Port Colborne, to embark artillery.
 „ 10.—Received St. Catherine's Battery, forty-eight men and two officers (Captain Oswald and Lieut. Holmes) on board; remained at Port Colborne for drill until 30th June.
 „ 13.—Left Port Colborne for Fort Erie, and inspected on 17th instant.
 „ 17.—Disembarked St. Catherine's Battery, and proceeded to Sarnia.
 „ 20.—Embarked Sarnia Battery, thirty-eight men and three officers (Capt. Wood and Lieuts. Vidal and Kenny), and left Sarnia for Goderich.
 „ 22.—Steamed out to Lake Huron for target practice, with General Sir Hastings Doyle and the Adjutant-General.
 „ 24.—Target practice.
 „ 27.—Left Goderich; into Lake Huron for night quarters; returned to Sarnia, and disembarked Sarnia Battery.
 „ 28.—Proceed to Goderich.
 Aug. 10.—Left Goderich for Windsor.
 „ 12.—Left Windsor for Goderich.
 Sept. 12.—Left Goderich for Collingwood, to take on artillery company.
 „ 15.—Embarked Collingwood Battery, twenty-five men and two officers (Captain Hogg and Lieut. Donaldson), and left Collingwood for Goderich.
 „ 17.—Left Goderich for Sarnia, with the Adjutant-General, to join the camp there.
 „ 18.—Went into Lake Huron, for practice.
 „ 19.—Left Sarnia for Mooretown, to drill.
 „ 20.—In River St. Clair, to take part in the naval engagement.
 „ 21.—Left Sarnia for Owen Sound, with Brigade-Major Denison and artillery on board.
 „ 22.—Arrived at Owen Sound, and joined camp.
 „ 23.—Went from Presquelle to Collingwood, and landed artillery.
 „ 25.—Left Collingwood for Goderich.
 „ 26.—Arrived in Goderich.
 Remained in Goderich until 20th October.
 Oct. 20.—Left to assist American Schooner "M. Thompson," ashore at Port Albert, Lake Huron. Vessel not lightened; returned to Goderich.
 „ 21.—Went out again to Schooner "M. Thompson."—Heavy sea; could render no assistance; returned to Goderich.
 „ 22.—Left to assist Canadian Schooner "Ontario."
 „ 23.—Worked all day at Schooner "Ontario."—Parted Hawser several times; broke cable chain; returned to port.
 „ 24.—At Goderich, looking for lost chain.
 „ 25.—Towed Schooner "M. Thompson," disabled, to Sarnia.
 „ 27.—Returned to Goderich; assisted crew of Schooner "Ontario" getting her off.

- Nov. 2.—Left for Cove Island, to assist Canadian Steamer "Phœbe Catherine," ashore at Horse-shoe Reef, Lake Huron.
- " 3.—Arrived and worked at Schooner.
- " 4, 5 & 6.—Working at Schooner.
- " 7.—Towed schooner off, and arrived at Owen Sound with her, at 10 a.m.
- " 8.—Went to Presquille for wood.
- " 9.—Left Owen Sound at 6:30 a.m., for Smyth's Bay, to assist Schooner "Gold Hunter," ashore there.
- " 10 to 13.—Taking off schooner, and towing her from reef.
- " 14.—Got schooner off, leaking badly. Proceeded at 3 p.m. down Georgian Bay; when passing Lonely Island heavy sea, with snow-storm, came on; boat making water, from the heavy seas breaking over her.
- " 15.—At 1 a.m. blowing gale of wind from north-east; gunboat laboring hard, from the schooner, water-logged, not steering. At 2 a.m. could see no schooner; masts cut away; found water gaining on fires. The officers on board gunboat supposed schooner had parted tow-line, and cut the line on board, to prevent it getting into the propeller wheel. Sea still breaking clean over; hull covered with ice, and three feet of water in the hold, with two feet on deck. Ran for Owen Sound, to save steamer; snow cleared up at 4 a.m.; saw shore, made harbor at 9:30 a.m.
- " 16.—Clearing up decks, and pumping boat; repaired joints in engine pipes.
- " 17.—Went to Presquille for wood, and put off schooner's deck-load of lumber.
- " 18.—Went in search of Schooner "Gold Hunter;" found hull in Wingfield Bay; crew of vessel had gone to Owen Sound by land.
- " 19.—At Owen Sound anchored.
- " 20.—Went to Big Bay for wood; took fifty cords off shore in small boats; freezing hard.
- " 21.—Left for Colpoy's Bay; anchored under White-Cloud Island; heavy snow-storms.
- " 22.—Dragged anchors; went further up bay; blowing hard, with snow.
- " 23.—Weighed anchor at 8:30 a.m.; went to Wingfield Harbor; sent boat ashore to examine "Gold Hunter" wreck; proceeded to "Tober Murray" Bay at 1:30 p.m.; anchored; blowing half gale wind.
- " 24.—At anchor; blowing hard, and snowing all day.
- " 25.—Left at 9:30 a.m. proceeded past Cove Island into Lake Huron; returned under the island at 12:30. Heavy sea running on lake, and snow-storm.
- " 26.—Blowing hard; went under Tober Murray for shelter from heavy sea.
- " 27.—Weighed anchor; proceeded down Lake Huron for Goderich.
- " 28.—Arrived at Goderich at 2 a.m.; ice in harbor.
- " 30.—Ice too heavy to proceed to Windsor; laid boat up in winter quarters.
- Miles run, 4,280.

"RESCUE."

The Gunboat "Rescue" sailed from Kingston, Sunday, 11th June, to Collingwood, passed through Welland Canal on 14th; coaled ship at Windsor on 16th; arrived at Collingwood 18th; 19th and 20th employed taking on men and stores belonging to the Canada Pacific Survey, and bound to different points on Lake Superior.

20th June, 11 p.m.—Sailed from Collingwood. 21st.—At Little Current. 22nd.—Bruce Mines, and at Ste. Marie, Canadian and American sides of river; coaled ship on American side. 23rd, a.m.—Called at Michicopoten River; landed some stores and party of men. 24th.—Called at Pie River; landed more men and stores; landed

men and stores at Neepigon River. 25th.—Called at Silver Island; arrived at Prince Arthur's Landing at midnight. 26th.—Landed remainder of men and stores. 27th to 2nd July.—At anchor Prince Arthur's Landing, waiting orders.

July 2nd.—Sailed from Prince Arthur's Landing, bound to Collingwood; called at Silver Island; coaled ship. 3rd.—Called at Pie River and Michipocoten River. 4th.—Coaled ship at Sault Ste. Marie, American side; called at Canadian side, also at Bruce Mines. 5th.—Called at Little Current. 6th.—Arrived at Collingwood.

Remained until 3rd of August waiting for stores and men for Lake Superior. 3rd, 6 p.m.—Sailed from Collingwood, calling at Little Current. On the 4th, at Sault Ste. Marie, Canada side; took on a party of men for Canada Pacific Railway Survey; crossed to American side, took on board coal. 6th.—Called at Point aux Pins for coaling. 7th.—Landed party of men and stores at Michipocoten River. 8th.—Anchor, Gros Cap, for shelter; blowing hard. 9th.—Proceeded to Pie River; landed men and stores. 10th.—At anchor in Herring Bay for shelter. 11th.—Arrived at Neepigon River; landed men and stores. 12th.—Called at Jack-fish River; landed men and stores. 13th.—Called at Silver Island; 2:30 p.m., arrived at Prince Arthur's Landing; landed remainder of men and stores. On the 14th and 15th at anchor Prince Arthur's Landing.

16th.—Sailed from Prince Arthur's Landing, bound to Collingwood, calling at Silver Island for coal. 17th.—At Neepigon River. 18th.—At Jack-fish River. 19th.—At Jack-fish River, waiting Mr. Rowan's return from visiting surveying party. 20th.—Pie River. 21st.—At anchor in Herring Bay until 31st, waiting Mr. Rowan's return from visiting surveying party on Pie River. 1st Sept.—At anchor at Gros Cap, waiting for weather to moderate, so as to allow Mr. Rowan at Michipocoten River. 2nd.—At Gros Cap. 3rd.—Landed Mr. Rowan, and proceeded to Point aux Pins, and coaled ship. 4th.—Passed through Sault Canal; called at Canada side to mail letters. 5th.—Arrived at Collingwood.

6th.—At Collingwood. 7th.—Received orders to return to Kingston. 8th.—In Tober Murray for shelter. 9th and 10th.—Arriving at Sarnia at 11:30 p.m. 11th.—At Windsor, coaling. 13th.—Arrived in Welland Canal. 17th.—Arrived at Kingston, having been employed for Canada Pacific Railway Survey from 9th June until 18th September. "Rescue" moored in Navy Bay from 17th Sept. until 27th Nov., when proceeded to St. Catherine's, to go into winter quarters, by order from Gunboat Inspector.

Total distance run by "Rescue" during season of 1871, four thousand five hundred and ninety-one miles.....	4,591
Total distance run by "Prince Alfred".....	4,280
Total.....	<u>8,871 miles.</u>

Places visited by the Gunboats.

Fort Erie, Port Colborne, Amherstburg, Windsor, Sarnia, Mooretown, Goderich, Kincardine, Collingwood, Owen Sound, Little Current, Bruce Mines, Michipocoten, Pie River, Neepigon River, Silver Islet, Sault Ste. Marie, Fort William, Prince Arthur's Landing, and Jack-fish River.

Respectfully submitted,
G. H. WYATT,
Gunboat Agent.

APPENDICES.

APPENDIX No. I.

MILITARY DISTRICT No. 1.

DEPUTY ADJUTANT-GENERAL'S OFFICE,
LONDON, ONT., 30th October, 1871.

SIR.—In submitting my annual report of the district under my command, I have the honor to state that, although the authorized strength of the district up to the 1st October, 1868, was 5,517 men of Volunteer Militia, the present authorized strength is 4,770, consisting of

3 Troops Cavalry	14 Officers	135 N. C. O and Men.
2 Batteries Field Artillery	10 „	140 „
2 „ Garrison Artillery	6 „	110 „
11 Battalions Infantry, with two Independent Companies, being 74 Companies.	288 „	4,385 „
Total	318	4,770

The corps are nominally full, but the number who turned out for their annual drill this year which is the real test of the actual strength in the district, are 311 officers and 3,952 non-commissioned officers and men, leaving a deficiency of 820 non-commissioned officers and men, wanting to complete.

With reference to the desirability or necessity of completing this deficiency by means of the ballot, I am of opinion that, presuming it is required that every corps shall assemble for annual drill in the full authorized strength—the aid of the ballot will be required to effect this, as I do not think that every corps can be kept up to its full strength otherwise; and, therefore, viewing the question solely on *military grounds*, I believe the ballot to be desirable; I must, however, state that the commanding officers of the three strongest battalions (and who are second to none in point of efficiency, in drill, and discipline in this district), all report that they can maintain their corps in an efficient state without the aid of the ballot.

The whole of the corps in this district performed the prescribed course of target practice in camp during their annual drill, and all, with the exception of 10 companies, were not less than 40 non-commissioned officers and men. The best shooting battalion in the district is the 27th Lambton Battalion, figure of merit being 19.72, and the best shooting company in the district is the “Widder” or No. 3 company, 27th Battalion, figure of merit 26.57. And I have the honor to annex a return of all the winners of prizes in the district, together with the figure of merit for shooting of every company.

The target practice and instruction in musketry was carried on at both camps under the very efficient supervision of Lieut.-Colonel Moffat, Brigade Major, to whose exertions are due the accomplishment of that portion of the annual training so satisfactorily.

The whole of the men who performed annual drill were *bona fide* enrolled members of the corps, but a great portion of them have joined since the re-enrollment which was ordered to be made within three months from the 1st October, 1868.

I find it impossible to state, with any attempt at accuracy, what numbers of men are likely to take their discharge on completion of their three years, but from the enquiries I have made, I do not think that more than one fourth will leave the force, if the present system of the sixteen days brigade camps is continued for all corps.

There were two brigade camps of exercise this year in the district, at which all the corps performed their annual drill. The first was for sixteen days, commencing on the 16th June, at Goderich, and was formed of the following corps, viz.:-

London Field Battery	3 Officers	78 Men and 4 Guns.
7th Battalion	28 Officers	341 N. C. O. and Men.
28th Battalion	25 "	279 "
29th Battalion	18 "	238 "
30th Battalion	31 "	462 "
32nd Battalion	27 "	320 "
33rd Battalion	35 "	429 "
Sarnia Gar. Art. (on Gunboat)	3 "	37 "
Being Total of	170 "	2,184 "

The other brigade camp was for eight days only, commencing on the 15th September, at Sarnia, and was formed of the

St. Thomas and London Cavalry	7 Officers	74 Men.
Mooretown Cavalry	3 "	39 "
London Field Battery, with detach- ment from Wellington Field Battery.	5 "	71 "
22nd Battalion	31 "	457 "
24th Battalion, with Windsor and Leamington Companies.	25 "	272 "
25th Battalion	22 "	251 "
26th Battalion	25 "	324 "
27th Battalion	23 "	280 "
Being a total of	141 "	1,768 "

These camps were the first opportunities the force had of learning the new drill, and I feel great pride in being able to report the marked improvement which was evident in their drill at the close of the camp, the great interest which all ranks appeared to take in their drill and duties, and their general very good conduct in camp.

Both at Goderich and also at Sarnia, the brigades had several field days under your command, at one of which Lieut.-General Sir Hastings Doyle was present, and, having inspected the brigade, expressed himself very much pleased with the appearance of the force and the creditable manner in which they drilled, and particularly complimented Lieut.-Colonel Shanly on the soldierlike appearance and efficient state of the Field Battery under his command.

From the additional experience this year of brigade camps, I am confirmed in my opinion, which is supported by that of the commanding officers of corps, that the sixteen days brigade camps are the only means of giving the force proper instruction in their duties, and that they are the most popular among the force, and also that June is the best and most convenient month in the year for the corps to go into brigade camps in this district.

I would respectfully beg to recommend that the two independent companies in the County of Essex may be amalgamated with the nearest battalion, viz.: the 24th Kent Battalion.

The method of mustering the men in camp, which has always been performed in this district by the district paymaster, accompanied by the Deputy Adjutant General and Brigade Major, appears to work satisfactorily, and I would recommend its being continued.

The manner of procuring horses for the field batteries of artillery has become an important subject for action before the next annual drill, and I believe that the most simple

and effectual manner will be to grant a yearly bonus of about twenty dollars a team to those owners who duly enrol and register their horses for service in the batteries.

I would beg to draw attention to the necessity that would exist for an Engineer company in each brigade division in event of war, as at present there is no arm of that force in this district.

The cavalry force in the district is also under strength, there being only three troops; and I would, therefore, suggest the formation of three more troops so as to make a regiment of cavalry.

I also beg to call to your notice the many applications which I have forwarded from gentlemen offering to raise new companies in this district, which is so much below its original quota for the population. There are now no less than four battalions viz., the 24th, 25th, 27th, and 29th, which, being five companies strong, are quite inefficient as regards numbers, and I most respectfully urge the department to authorize that the strength of these battalions may be increased to their proper quota.

I am happy to state that the average of officers and men per company, who performed their annual drill this year in camp is in excess of any previous year, viz. :—

Average strength per company in 1871 is 3 officers, 53 N. C. O. and Men.

Average strength in 1870 was 3 officers, 49 N. C. O. and Men.

Average strength in 1869 was 3 officers, 47 N. C. O. and Men.

In conclusion, I beg to bring to your notice, the hearty co-operation and assistance which I have received from officers of all ranks, and particularly from the staff officers of the district under my command.

I have the honor to be, Sir,

Your most obedient servant,

JOHN B. TAYLOR, Lieut.-Col.,

Deputy Adjutant-General, Commanding Military District, No. 1.

The Adjutant General of Militia.

MILITARY DISTRICT No. 2.

OLD FORT, TORONTO,

13th November, 1871.

SIR.—Having already forwarded for your information, agreeable to the instructions contained in your communication of the 7th August last, the Tabular Inspection and Target Practice Reports, Return of Prize Winners, of the Volunteer Militia in Military District No 2, which have performed their annual drill for the year 1871-72, I now beg leave to give the information required, in accordance with the queries contained in the above communication.

1st.—The required quota, or establishment of corps of Volunteer Militia, in Military District No. 2 is as follows :—

	Officers.	N.C. O. and men.	Horses.
Cavalry	21	325	346
Artillery.—Field Batteries	15	225	171
„ Garrison do	9	165
Infantry.—14 Battalions, 5 independent companies.....	442	6,210	70
Total...	487	6,927	587
All arms and ranks,	7,412.	587	Horses

2nd.—Actual strength of corps which have performed annual drill, 1871-72 :—

	Officers.	N.C.O. and men.	Horses.
Cavalry	22	273	282
Artillery.—Field Batteries	14	209	170
„ Garrison do	5	128
Infantry	378	4,982	68
Total...	419	5,592	520
All arms and ranks	6,011	520	Horses.
Establishment.—All arms and ranks.....	7,412	587	„
Officers, non-com. officers and men, all arms and ranks, performed drill 1871-72.....	6,011	520	„
Wanting to complete establishment	1,401	67	„
Deficiency,—Officers.....	68	„
„ N.C. Officers & men	1,333	67	„

The cavalry and field batteries mustered well—the two batteries, Toronto and Hamilton were full. The infantry requires, according to the above, 1,333 non-commissioned officers and men to complete their establishment. Although the above number appears large, still, when distributed among 14 battalions, from 6 to 10 companies strong, it will not appear so heavy; the average muster of 9 battalions out of 14, being nearly 50 per company; the remaining 5 battalions averaging 38 per company,—decidedly too weak.

The honor and credit of the strongest muster in camp this year, is due to the 38th battalion, county of Brant, Lieut-colonel Patton commanding, 5 men only being required to complete its full establishment,—very creditable to the above corps.

3rd.—Can the above deficiency be made up in the future by volunteering? If not, by ballot, in accordance with the militia law.

The opinions of the officers commanding corps vary as to the mode, as will be seen by the enclosed correspondence, of filling up vacancies in their respective corps; although a majority of them desire to fill up deficiencies in numbers by means of the ballot.

The existing militia law does not authorize the ballot in filling up companies belonging to volunteer militia corps, deficient in strength, in the manner desired by some of the commanding officers; still, even if it did, I much question the propriety or usefulness of such a proceeding.

I am strongly of opinion that a volunteer militia regiment, composed of part volunteer men and part balloted men, would not work well or efficiently. There would be a constant jarring or ill-will between the two classes. Better to have either a volunteer militia regiment, or the regular militia, according to militia law.

It is for me to decide as to the merits of which force the country requires; but having now been connected with the force many years, I may be pardoned in saying a few words upon the subject.

I much question whether a regular militia, or balloted force, would turn out as promptly, and muster as well as the present force has done, when called upon in the service of the country. I think that it will be admitted on all hands, that the willing are always more available than the unwilling.

The record of the past shows that the existing force has cheerfully met all the active service duties required of it and that, too, with no ordinary sacrifice to a large proportion of the members composing the force. The past, then, is no bad guarantee for the future.

I am inclined, then, to the opinion, under existing circumstances, that the establishment of a volunteer militia force, would be more in accordance with the wants and wishes of the Dominion at large, than a balloted force.

It cannot be denied for a moment that the musters of regiments, (or rather the companies composing them), are not as strong or as reliable as they ought to be, when required to assemble for annual drill or otherwise.

That the burden of such musters fall too heavily upon the captains of companies, the officers commanding the regiment and its staff, and depends too much upon the personal influence exercised by these officers, more especially the captains.

To encourage the ranks and file, and relieve the officers mentioned, I would respectfully suggest the following :—

1st. Regular issue of clothing under the existing prescribed forms.

2nd. Further assistance in the formation of rifle ranges at Company head-quarters. Targets, &c., in order that the rank and file might be better enabled to practice at home, as a means of preparation for the target practice required, and competition for prizes, when performing annual drill in Camp.

3rd. An allowance of 25 cents per man, per company, for 12 additional drills of 2½ hours (each) at such time as the captains of companies (in rural districts) may deem best. Officers pay in proportion.

A parade for target practice, included as a drill parade.

Above parades to take place between 15th September and 15th May.

To constitute a drill parade, three-fourths of the establishment of the company must muster under an officer,—duly certified.

4th. When deemed necessary and approved of, the transfer of a company head-quarters from one part of a county to another.

In addition to the above, there is one step further, which if carried out, would have a most beneficial effect, in upholding the present force.

It has been very generally reported to me, by officers connected with the force, that the men on returning to their respective homes (especially in rural districts), after the performance of the annual drill are frequently told, that *they are fools for their pains*, in going to drill, better to remain at home, and work on their farms, as others do, and it will pay them better.

Again, some townships in counties neither contribute money for drill sheds nor for volunteer companies ; other townships in the same county *do both*.

Now, I do think it would be only just to make the man who will not serve (unless compelled), to contribute in money, for the recompense of those who give their time in attending drill, and who are willing to turn out, in order to defend the very homes and farms of those who are thereby enabled to remain at home and enjoy their farms in *peace and security*. The above suggestions are respectfully offered and if entertained would have a very good effect upon the existing force.

The regular militia, on the other hand, would give far less trouble to all concerned, orders would issue, men would be warned according to law, would assemble on a named day ; would be armed, clothed and drilled ; when paid would return home, arms and clothing returned into store, and the force would be seen no more until the following year for the annual drill, unless especially ordered out for regimental drills, at headquarters of corps, or for local duty.

The musters of the men would be sure, companies full strength, and the community at large would be drilled in detail, year after year. There is no doubt but what this system is the most just and fair to all. Whether it would work as well as the present system remains to be proven.

4th. Target practice report, average figures of merit of corps, &c.

Having already forwarded a tabular return of the target practice, prize winners, &c., of the corps which have performed their annual drill, except the 31st battalion volunteers, which has just been received, and which I now beg leave to forward.

It remains for me to bring before your notice briefly some of the results of this year's practice.

The regiment which made the highest average figure of merit is the 31st Battalion (County of Grey), scoring 16.78 points.

The Company which made the highest average figure of merit is No. 6 Company, 31st Battalion, scoring 23.81 points.

The best shot in the district, Private John Parks, No. 6 Company, 31st Battalion, scoring 51 points.

Private John Howarth, No. 5 Company, 38th Battalion, made a similar number of points, viz: 51. I may mention, at 600 yards both the above men made 18 points, at 400 yards Private Parks made 18 points, Private Howarth, made 16 points, the former thus winning the prize. The 31st "Grey" Battalion, Volunteer Militia, thus making the highest average battalion figure of merit, the highest average company figure of merit, and the best shot in the district. Average battalion figure of merit, 16.64 points. Average figure of merit of the best shots of regiments, 42 points. Highest average figure of merit of companies 13 points.

5th. Whether the men who performed annual drill were *bona fide* enrolled members. With a few exceptions, which have lately come to my knowledge, through the reports of officers commanding corps, the large mass of the men were all duly enrolled members of their respective corps.

6th. Number of men likely to take their discharge prior to next years annual drill.

It would be a very difficult matter to obtain reliable data, by which the numbers of men likely to take their discharge prior to next years' drill, could be ascertained. As a rule all regiments lose numbers, one-fourth or fifth may be taken as a fair average.

7th. Brigade camps of exercise.

The formation of the brigade camp of exercise at Niagara, on the 6th June last, for 16 days drill, has had, and I am satisfied, the formation of the camps will have a very marked and beneficial effect, not only on the increased strength of the corps but also on the efficiency of the force, officers and men.

The following force mustered at Niagara camp :—

	Officers.	N. C. O. and Men.	Horses.
7 Troops of Cavalry,	22 ...	273 ...	283
3 Field Batteries,	14 ...	209 ..	170
Infantry (11 Batts.)	296 ..	3,970 ...	53
Brigade Staff,	7 ...	4 ..	6
Total,	339	4,456	511

All arms and ranks, 4,795 ; horses, 511.

The above force was concentrated and moved into camp, on the 6th June, with the exception of one corps, the 39th Battalion (County Norfolk,) which joined on the day following. Having had upwards of 120 miles to move from its regimental head-quarters. The only casualty was a horse belonging to the Welland Field Battery, which took sick on the march from the head-quarters of the Battery, Port Robinson, to Niagara, 20 miles, and subsequently died. This battery marched into camp. When it is considered this force was moved by waggon, steamboat and rail the same day, no little credit is due to the officers in command of corps, more especially to the officers commanding the field batteries in moving their guns, waggons and untrained horses, by steamboat and rail, without any accident whatever. The average distance of the corps moving into the camp was upwards of 90 miles.

The troops of cavalry were formed into a regiment for drill purposes, under the command of Lieut.-Col. McLeod.

The 3 field batteries were placed under the command of Capt. Smith, Hamilton Field Battery.

The Infantry were divided into brigades for drill purposes, and officers appointed to command for that purpose.

Company and battalion drill under commanding officers of corps.

Brigade drill under the personal command of the Adjutant General of Militia.

The force was inspected on two occasions by the Hon. Sir George E. Cartier, Minister of Militia and Defence, who expressed his approbation of the arrangements of the camp, the

appearance and steadiness of the force, the zeal for the service, and their general good conduct.

The Adjutant General conveyed his thanks to the officers and men in camp, for their obedience to orders their soldier-like behavior on parade, and good conduct.

Considering that this was the first brigade camp of exercise, which has been formed in this district, much credit is due to the officers, non commissioned officers and men of of the force while in camp : movements on parade without confusion, moving into camp and returning to their respective homes. Much credit is also due to Lieut. Mason, 13th Battalion, as supply officer; Lieut.-Col. McKenzie, 35th Battalion, as camp quarter-master; Major Dartnell, unattached, as musketry instructor, for the manner in which they performed their arduous duties.

The medicine boxes issued last summer to the volunteer militia corps, with a few additional medicines, will, as far as I am able to judge, answer very well the purpose for which they were intended.

Relative thereto, I would beg respectfully to bring before your notice the position of surgeons of regiments, now holding that rank for some years past, and beg to suggest the propriety of granting them promotion to the rank of "Surgeon Major," after a certain term of service, a step which would be received with much satisfaction. These officers have frequently made great pecuniary sacrifices in leaving their homes and their practices in order to attend to their military duties.

The formation of the brigade camp of exercise for 16 days' drill, with its target practice, prizes, &c., having given great satisfaction, and proved of much benefit to the force, I would beg respectfully to suggest that the whole of the volunteer militia force of this district be assembled next June at Niagara, for a similar period of drill, the local advantages and central position of which place give it a preference to any other place in the district. Although Drummondville holds a good central position, a large extent of available ground for camping purposes, water easily obtained—yet not so advantageous in all respects (especially with respect to the target practice) as the former place.

The necessity being obvious of forming the troops of cavalry into a regiment, when in camp last time, I now beg to recommend for your favorable consideration the propriety of forming the following corps of cavalry into a regiment:—

- No. 1.—The Governor General's Body Guard.
- „ 2.—The Oak Ridges Troop.
- „ 3.—The Markham Troop.
- „ 4.—The St. Catherines Troop.
- „ 5.—The Grimsby Troop.
- „ 6.—The Burford Troop.
- „ 7.—Queenston Mounted Infantry Company.
- „ 8.—The Barrie Mounted Infantry.

(The two latter corps require to be changed into troops of cavalry for the above purpose.) To be denominated "1st Regiment of Cavalry (Hussars.)"

As there are now existing 4 companies militia in the county of Wentworth, I would beg to recommend for favorable consideration, the propriety of permission being granted to organize 2 or 4 more companies in this county, which can be carried out without any difficulty. By this means every county in Military District No. 2, will have its county battalion of militia.

The establishment of the school of military instruction, in Toronto, in January last, resulted in the admission of 77 candidates, all, generally speaking, intelligent, respectable young men, who passed through the school as undermentioned:—

No. of candidates who obtained 1st class certificates.....	13
do do 2nd do do	36
Withdrawn by permission.....	6
Struck off the strength of the school by order of the Adjutant	
General.....	2
	77
Total.....	77

I beg leave to forward the enclosed report, from Major Dartnell, late Brigade Musketry Instructor at Niagara camp, and to recommend for favorable consideration the valuable suggestions therein contained.

In view of the ensuing annual drill in brigade camp, next summer, I beg to suggest and to recommend the propriety of forming a staff of officers, for service when required, in order to attend to the important duties belonging to the "supply," the "quarter-master's," "transport" and "musketry instruction" departments; it being very obvious, last summer, how important it is that the duties appertaining to these departments, should be efficiently attended to and carried out.

It gives me much pleasure in being able to bring before your notice, the efficient manner in which the district staff officers have performed their respective duties.

I have the honor to be, Sir

Your most obedient servant,

WM. S. DURIE, Lieut-Col.

Deputy Adjutant General, Military District No. 2.

The Adjutant General of Militia.

REPORT OF BRIGADE MUSKETRY INSTRUCTOR, NIAGARA CAMP.

WHITBY, September 20th, 1871.

I have the honor to submit herewith the nominal list and scores of the various corps forming the camp of Volunteer Militia, lately assembled at Niagara, and also the returns showing, (1) the designation of the various corps, (2) the figure of merit of each company, (3) the name of each company and battalion prize winner, (4) the figure of merit of each battalion, (5) the number of men in each battalion who fired the prescribed course and (6) the number of men in each battalion who did not fire at all.

In the latter return the various battalions are placed in their order of merit, the 37th or Haldimand Rifles standing first, their figure of merit being 14.40; the 11th or lowest being the 19th (Lincoln), with a figure of merit of 8.69. The exceptionally tempestuous weather which prevailed during the practice of this corps will (in part at all events) account for their low position.

The companies of each battalion are placed by battalions, in the order of their figure of merit. The company which obtained the highest figure of merit in the camp is No. 5 Company, 37th (Haldimand), which obtained 22.99; No. 5 Company of 38th (Brant), and No. 8 Company of the 13th (Hamilton), standing second and third of 20.79 and 18.56 respectively.

The total number of men who fulfilled the prescribed course was 3,527 divided into 3,295 using the Snider-Enfield, 232 cavalry using the Spencer Carbine. This involved the expenditure of 49,425 rounds of Boxer cartridge and 2,320 of Spencer ammunition.

There was much complaint of the quality of the ammunition, but in only a few instances did these complaints appear to be well founded. The powder in some packets of cartridge was found to be so completely "mealed" from damp, as to prove entirely useless. I would suggest the inspection of the ammunition in store with a view to the condemnation of such portion, as, on active service, would prove useless. Out of the large number of 49,425 rounds of Boxer cartridge expended, there were only about 30 miss fires, the greater part of which were occasioned by weakness of the main spring of the rifle used. One rifle burst, the probable cause being dirt or mud in the muzzle. The man had no muzzle-stopper. Indeed these should never be used with breech-loading arms. An armourer in camp would be of great service. There are many rifles perfectly unserviceable, which could be repaired while the various corps are in camp for their annual drill, at a much less expense than by any other plan.

The quality of the Spencer ammunition was very bad. In one troop there were 32 miss fires ; a portion, however, of these were caused by defects in the weapon. Many of the boxes, also, which should contain 42 rounds were deficient to the extent of from 2 to 5 or 6 in each package. I regard the Spencer carbine a most dangerous weapon in the hands of any troops but those most thoroughly trained in its use, and even then liable to accident, and the source of danger to its user and his comrades. The best score made with it (27 out of a possible 40), does not speak much for its accuracy.

The range at camp, Niagara, was most admirably situate, about a mile from the camp, upon the ordnance lands lying north of the town and west of Fort Missasaugua. It affords the advantages of safety, level ground, sufficient room, and a position which enables the men to fire towards the north, thus placing the sun in rear of the firing squad during the most of the day. Its disadvantages are exposure to the prevailing westerly winds quartering from the right (a direction the most unfavorable for accurate shooting), and a water back ground, which, on a sunny afternoon, renders the targets almost invisible from glare, and distorts their form and apparent distance. The latter defect could be remedied by the erection behind the targets of wooden screens painted black.

The targets were erected in sets of three to each of the prescribed ranges, or nine in all. It would have been better if each set had been placed in *echelon*, thus bringing the firing parties at each range in closer proximity and more under the sight and control of the superintending officer. The shorter ranges should have been placed on the *left* and the *right*, instead of the reverse as they were arranged here. This is for greater safety, as *ricochet* balls, on account of the "spin" of the bullet being to the right invariably deflect in that direction, and thus are dangerous to any party of men stationed to the right front.

The butts used were those known as "Blands," and with a few precautions and alterations proved commodious and safe. If drawings and specifications of this butt were appended to the Militia report, it would prove very acceptable to those interested in rifle ranges.

Several slight accidents to the markers occurred, chiefly from carelessness at the firing point while the disc was up and the trap in the butt roof open, or from "cross-firing" on the wrong target. The system of marking was that known as "Hills," by means of discs. I regard it by all odds the most accurate and satisfactory. In no case was I able to detect any error in the marking. The case of the brush in rear of the disc pointing out each shot, while as the same time its exact position and value is indicated, almost entirely obviates error, and conduces much to the accuracy of the shooting.

By your permission I introduced a new system of firing, by which each man fired his five shots consecutively at each range. A large saving of time, particularly at the long ranges, was thus effected, and some confusion obviated. In addition, instruction was more effectively imparted as the recruit fired his five shots in succession, errors of position or sighting were more readily corrected, and the marksman had the advantage of firing his five shots as much as possible under equal conditions of wind, weather, &c.

I also adopted the plan of forming the squads well in rear of their respective firing points, making the men "ground arms," and retire a few paces behind their weapons, which they had no occasion to handle until called out in succession to the firing point, at which place the access of any but the marksman and the scorer was strictly forbidden. These precautions prevent the possibility of any such lamentable accident as occurred at La Prairie.

The duties devolving upon the Brigade Instructor of musketry, in addition to those laid down in the camp regulations were as follows. (1) To superintend the collection of materials required for the ranges, and the placing of the targets in position. (2) To select and organize a staff of efficient markers, and arrange the detail of their duties. (3) To arrange the general and daily detail. (4) To receive the various corps as they came upon the ground, form them into squads, furnish the officers in command with forms of returns, and instruct them in their use, and also in the system of marking. (5) To arrange the detail of each company and squad at the various ranges. (6) To collect and examine with care the returns as handed in. (7) To copy the same fairly. (8) To analyze the scores, and

ascertain the highest, and finally make up therefrom the camp abstract and report containing, amongst other things, the company and battalion figure of merit.

I found it necessary to remain continuously on the ground from 5.30 a.m., to 6.30 p.m., the firing continuing without any cessation each day during thirteen hours. The making up of the returns and abstract, have involved over a week's continuous labor since the breaking up of the camp.

The highest figure of merit obtained by the various battalions is low. The large number of recruits who fired a rifle for the first time in their lives on this occasion, and the prevalence of weather extremely unfavorable to accurate shooting, will, in part, account for this. Very few country ranges are to be found over 500 or even 400 yards in length, which will form an additional reason for the very low average at 600 yards.

I found that a very large proportion of the officers in charge of squads, were completely ignorant of even the first principles of musketry instruction, the formation of squads, scoring, marking and other details of target practice. Those companies in each battalion which have obtained the highest figure of merit, will almost invariably be found under the command of officers who take an interest in rifle practice and are able to instruct their men.

The whole end and aim of all military drill and discipline is to enable the soldier to use with skill and intelligence the weapon with which he fights, so as to render it as destructive as possible to the enemy. To place a rifle in the hands of a recruit who has no previous training, and send him out for ball practice, is beginning at the wrong end. There is no more important or necessary feature in the training of our Militia than the fact that each man, to a certain extent, should become familiar with the weapon upon which he has, in actual warfare, to depend. The recruit even has learned something, even if he scores all misses for his fifteen shots, he has to that extent become familiar with it. The expenditure of the annual allowance is insured, instead of the latter being fired away, as is often the case by a few crack shots in each corps. Something further, however, is necessary to be done in order more fully to carry out the object in view, and render this annual practice of more practical value, and the sequence of former instruction and preparation. To this end each battalion should have its own musketry instructor, who could put his regiment through some sort of training, and afford it some instruction before it puts in its appearance at the butts.

To supply a competent staff of such officers, the formation of a school of musketry is necessary, and could be easily effected through the machinery of the military school. If a small annual allowance were made to each battalion musketry instructor, officers would quickly be found who would graduate at such school; even as it is, much could be done by imparting some knowledge of position drill, &c., to the military school cadets, and taking them out for actual target practice. A greater amount of knowledge among the officers will quickly raise the figure of merit among the men. These battalion musketry instructors would form most valuable aid to the Brigade Musketry Instructor, and by relieving him from attention to many details, would enable him to give greater attention to the more important of his duties.

Until some such system be organized which would furnish the class of officers indicated, it would be a great advantage if the Brigade Musketry Instructor had assigned to him three or four intelligent non-commissioned officers to act as sergeant-instructors at each range, to watch the firing, and to be responsible that the orders of the commanding officer are carried out. I found it impossible, even with the closest attention, and in spite of my continual presence on the ground for thirteen hours of each day, to prevent instances of positive neglect or disobedience of my orders and instructions, and I much felt the want of some such assistance.

For the nine targets in use at camp Niagara, the lowest number of markers that should be furnished is fifteen, which would include a sergeant in charge and a cook. These men should be furnished with tent or barrack accommodation in the vicinity of the range, and rations issued to them separately. In Rifle Association matches the number deemed necessary is two to each butt, with a relief of two more; this would give 36 instead of

15, but in the later case but one marker would be furnished to each target. The actual work is laborious, and the constant strain on the man's attention is very wearying. A good marker must be quick, intelligent, sober, careful and honest, and to secure such men (who are also exposed to some danger to life or limb), some liberality should be shown.

Much delay at the firing point would be avoided if the issue of—ammunition, formation of squads, filling up of returns, &c., took place in camp. The various squads should come on the ground ready at once to march to the firing points and commence their practice. I would suggest that a few orders be compiled for the further regulation of these matters, and the instruction of the officers and distributed to each regiment, on the latter being placed in orders for target practice.

From the abstract return it will be sure that the large number of men omitted to attend ball practice. I have given the number which actually fired in each regiment as compared with those actually in camp, from which it will be seen that while some commanding officers sent to the butts almost every available man on their muster roll, others were extremely remiss in this respect.

Very great inconvenience was experienced from the want of efficient buglers. Many companies had no bugles. Others had no buglers, while there were not a few who having both were unable to blow the simplest calls. This deficiency much increased the chances of accident, and was also another cause of annoying delay.

I append herto a diary of the weather during the practice. There were but two or three days favorable for accurate shooting, and on those days there was a marked improvement in the scores. On one afternoon so fierce were the blasts that the targets were frequently blown over, and I had to direct the practice to cease at 3 p.m., owing to the impossibility of keeping them in position for more than a few minutes at a time.

I must here express my sense of the valuable assistance I received from Staff-Sergeant Danford, of 2nd G. O. R., in charge of the targets, markers, store ammunition, &c. Intelligent, ready, willing and obedient Sergeant Danford, is the type of a model non-commissioned officer. No better man could have been found for the performance of the duties allotted to him.

I have the honor to be, Sir,
Your obedient servant,
GEO. H. DARTNELL,
Major.

To Lieut.-Col. DURIE,
Deputy Adjutant General Militia,
Toronto.

WEATHER DIARY, during Target practice at Camp Niagara, June, 1871.

Detail.

June 7th. Wind a.m.—N.W.

MEMO.—The range is assumed to be North and South, the targets facing South, and
 the firing parties North.

GEO. H. DARTNELL,

Major, Brigade M.I.

MILITARY DISTRICT. No. 3.

KINGSTON, October 11th, 1871.

SIR,—In forwarding my Annual Inspection Returns for the year ending 30th June, 1872, I have the honor to report that the quota authorized to go into Camp in Military District No. 3, was 2,500 men, and in compliance with General Order 5th May, 1871, the following corps went into Brigade Camp at Kingston on the 21st June, and performed their sixteen days drill.

Corps.	Actual Strength.			Wanting to complete Establishment.	In Camp.		
	Officers.	Men.	Horses.		Officers.	Men.	Horses.
Northumberland and Durham Squadron	11	104	115	6	11	104	11
Frontenac Squadron	10	110	120	10	110	114
Kingston Field Battery	6	72	3	6	72	62
15th Battalion	26	260	70	25	260	5
16th "	35	375	65	30	375	4

57th "	26	276	54	24	276	5
					203	2552	319
The 14th Battalion joined the Brigade at drill on Tuesday and Wednesday, 27th and 28th June	19	174				
	18	162				

The duties in camp were carried on in accordance with the general order, 5th May, 1871, the morning and 10 o'clock drills of corps under command of their respective officers, and a brigade parade every afternoon at 3 o'clock, under the command of the officer commanding the camp, when the whole force marched to Barriefield Common and went through a brigade field day of about two hours duration.

On the 26th June, the camp was visited by the Adjutant General of Militia, who mustered the whole of the officers, men, and horses in camp, and on that afternoon and the two following, the brigade was inspected by him, when fifteen rounds of blank cartridge per man, and twenty rounds per field gun were fired.

On the completion of the inspection, he called the commanding officers to the front and expressed himself as much pleased with the appearance and efficiency of the several corps composing the brigade; he also issued a complimentary order to the brigade.

The two squadrons of cavalry were formed into a provisional regiment under the command of Lt. Col. Boulton, the senior officer, and worked very well together.

All the corps in camp (except the cavalry) went through their target practice, and at the last brigade parade I presented the money prizes to the best shot in each battalion and company, amounting to \$305, and a badge to the best shot in each battalion, company badges had not been received.

Each corps has a good band, I detailed two of them to play in camp every afternoon, from 4 to 6 o'clock, they were also practiced together as a brigade band, and played the brigade past at the inspection.

The arms, accoutrements, and clothing of all corps were in good order, except the clothing of the cavalry which was worn out.

The conduct of the men in camp was very good, no complaints were made to me by commanding officers, nor by the civil authorities of the city of Kingston.

The under-mentioned garrison batteries of artillery went into Fort Henry at Kingston, on the 4th September, and performed their annual drill of eight days under the command of Lieut. Col. French, Inspector of Artillery and Warlike Stores.

Corps.	Actual Strength.		Wanting to complete to Establishment.	In Fort.	
	Officers.	Men.		Officers.	Men.
Garrison Battery, Trenton	3	56	3	56

do Cobourg	3	47	8	3	45
do Port Hope	1	47	8	1	47
Total.....	10	186	35	10	184

They were mustered by me on the 6th ; strength as above stated.

There was also a camp at Cobourg on the 12th September, where the undermentioned corps performed eight days drill in accordance with the general order 4th August, 1871.

The camp was inspected by the Adjutant-General on the 21st September, when there was a brigade field day, the men being provided with ten rounds of blank ammunition per man. The infantry completed their target practice; and after the inspection, the Adjutant-General presented the prizes and badges to the best shots in each battalion and company,

The camp broke up on the evening of the inspection.

The best shooting corps in the district is the 48th battalion. F. of M. 14.53.

The best shooting company is No. 1 of the 48th battalion.

The best shot in the district is Corp. Fred. Hobbs, No. 1 Company, 45th battalion.

14th Battalion. *Figure of Merit.*

The progress made by the troops in the sixteen days camp was very satisfactory, and should, if possible, be continued yearly, but the eight days camp is objectional, as there is too little time to devote to instruction in drill and rifle practice, to be of real value to the volunteer.

I do not think that corps can be kept up to their establishment by the present system of volunteering. I believe the time has arrived when the ballot must be resorted to, to fill up.

The whole of the men were reported *bona fide* as members of corps. There were a good many lads from fifteen years old, who would be perfectly useless if ordered on active service, but as captains are anxious to have their companies as strong as possible at the annual drill, they take men that would not be accepted were the ballot in force.

I have not been able to ascertain from commanding officers, the probable number of men who will take their discharge before next annual drill, but from all I can learn, the number will be large, this is as it ought to be, there should be new *men* at each new enrolment.

The district paymaster attended in both camps, and paid all the corps before they left for home.

There will be no difficulty in horsing the Kingston Field Battery, it is composed of farmers in the neighbourhood, and they bring their own horses.

I have the honor to be, Sir,

Your most obedient servant,

ALEX. PATTERSON,

Lieut.-Colonel, Acting D. A. General of Militia,

Military District, No. 3.

The Adjutant General of Militia,
Ottawa.

MILITARY DISTRICT, No. 4.

DEPUTY ADJUTANT GENERAL'S OFFICE,

BROCKVILLE, 28th October, 1871.

SIR,—As directed by your circular of the 7th August last, I have the honor to submit this my annual report on the operations of the active militia in military district No. 4.

Previous to commencing that for the current year, permit me to narrate what transpired just previous to the close of the year ending 30th June 1871, and connected with corps which had not been inspected and included in last years report.

Pursuant to general orders dated Ottawa, 19th May, 1871.

I took over the district on the 23rd of that month. On the following day, I proceeded to Perth, where a number of companies of the 41st and 42nd battalions were assembled to celebrate the "Queen's Birthday." The force thus assembled went through an ordinary field day with blank ammunition. This being the first time the companies had paraded since the encampment the year previous, I cannot say much as to the precision and regularity of the movements. The Brockville and Ottawa Railway Battery of Garrison Artillery, Captain Lowe, being present, I made the annual inspection of that corps, which numbered two officers and 71 non-commissioned officers, gunners and musicians. The battery paraded very clean and soldierly, and were efficient in company and battalion drill. The band of twenty performers, composed principally of professionals from the army, is considered highly efficient. The arms and other stores are always kept in most excellent condition.

On this occasion, the manager of the Brockville and Ottawa Railway, H. Abbott,

Esq., conveyed (this being the second time), all volunteers to and from Perth free, and the corporation of that town in a like liberal manner, provided all with a substantial dinner. The men were well behaved, and all returned to their homes without accident.

Now that the annual drills are performed in camp, I question the propriety of having these periodical musters, which entails much labour on the company officers, harasses the men, and results in but little, if any, benefit.

On the 14th June, I inspected the Pembroke Infantry Company, Captain Dickson, which paraded two officers and 38 non-commissioned officers and men. The arms, accoutrements, clothing and other stores were clean and in good condition. Simple battalion movements and company drill were well executed. The skirmishing and firing could not well be excelled. The officers are efficient and zealous.

On the 20th June, I inspected the whole of the force at Ottawa. The Field Battery, Captain Forsyth, had just completed the annual drill, and paraded as usual most creditably, numbering 3 officers, 51 non-commissioned officers, gunners and drivers, and 49 horses, these horses are generally owned by the drivers, who are farmers in the vicinity of Ottawa, and are the ordinary work horses of the country.

The drill consisted of the usual field battery movements, with firing, walking and trotting past, all of which were smartly and well executed.

The Ottawa Brigade of Garrison Artillery, Lieut.-Col. Forrest, paraded 12 officers and 246 non-commissioned officers and gunners, this corps is composed of a good body of men, and, having acted up to this time principally as riflemen, performed battalion and light infantry drill very fairly.

The band of about 26 performers, was at that time young, but showed such progress as to warrant the speedy acquiring of that proficiency for which they are now noted.

Nos. 3 and 5 batteries of this brigade being country corps, had, in compliance with general orders, been encamped for eight days on Major's Hill, during which period, big gun drill had been carried on at the drill shed. The former numbered two officers and 34 non-commissioned officers and men, and the latter three officers, and 52 non-commissioned officers and men.

The Ottawa Rifle Company paraded 3 officers and 36 non-commissioned officers and men, and performed the usual rifle company movements creditably and efficiently.

The Civil Service Rifle Company, Captain White, composed exclusively of employes of the government, paraded 3 officers and 32 non-commissioned officers and men. Arms and clothing clean and good, no accoutrements in possession except waist belts, frogs and small pouches, which are of poor quality. Much improved in drill during the year, manual and firing exercises, company drill and skirmishing very fairly executed.

In the event of the ordinary force being all called away from the city on frontier service, as on several previous occasions, the value of this company would then be apparent. The protection of the public buildings and city property would solely devolve upon them, consequently I would suggest the issue of the complete equipment, and such encouragement as to ensure a full company of 55.

The arms, accoutrements, and other stores of the whole of the other city corps being kept in charge of a resident caretaker, are, as a rule, to be found clean and in good condition, which, owing to the leaky roof and open condition of the armories, entails much extra labor on the caretaker, and sometimes, notwithstanding his care and assiduity, it is with difficulty the arms are preserved from rust and deterioration.

The insufficiency of these armories, as well as the drill shed, are such as to warrant my calling your attention thereto.

In winding up the operations of the year ending 30th June, the whole of the drill pay, allowances for drill instruction, care of arms, &c., were promptly paid, consequently there are no complaints from any part of the district.

I now beg leave to commence my report for the present year, as required by your instructions.

1. The quota for this district, as shown on page 17, last years report, is 3,064 officers and men, actual quota or nominal strength as authorized by the number of corps organized,

3,238, exclusive of the Civil Service Rifle Company, which I have not included in any of these calculations.

2. The actual number which have performed drill this year is 2,567. The Brockville and Ottawa Railway Battery of Garrison Artillery, numbering 77 will have completed by the 31st inst., making a total of 2,644, showing a deficiency of 594.

3. This deficiency is made up as follows, viz. :—

Ottawa Field Battery	6
Ottawa Brigade Garrison Artillery	38
Gananoque Battery	12
Iroquois	16
18th Battalion	39
41st	70
42nd	19
43rd	160
56th	58
59th	176
Total	594

Under our present volunteer system, I fear this large deficiency cannot be made up in the localities where companies are now organized. There being but a small per centage of the population who will, through the love of the service or patriotism, voluntarily serve, many of whom are taking discharges on completion of their respective terms; and, although we have many in the ranks who have served from six to twelve years, there is no disguising the fact, that each succeeding year shows the force to be composed of a larger proportion of the floating population or indifferent citizen, who are seldom present at more than one annual period of drill; while the men who have a stake in the country refrain from volunteering themselves, and frequently discourage others from doing so.

In some counties, such as Prescott for instance, the volunteer element seems to have become exhausted, and captains find so much difficulty in recruiting, that, they think the labor too great to undertake to maintain their companies purely by the voluntary system.

Had the ballot not been advocated, I have no doubt the force could have been kept up to its present deficient numbers by the extra exertions of the captains; but the frequent resignations of the officers show the desire to escape so laborious a task, and many have concluded to let their companies go down, unless authorized to fill vacancies as they occur, by resorting to the ballot. And were this power given, I believe volunteering would be more brisk than at present, as the whole population would feel interested in encouraging the movement.

4. The shooting figure of merit of the corps in this district is as follows, viz. : District average 11.91. Best shot in district, Serjeant William McIntyre, No. 4, Company, 41st Battalion, Merrickville, score 51 points.

WINNERS OF ARTILLERY PRIZES.

Ottawa Field Battery.

Captain Forsyth.
Serjeant R. C. Millar.

No. 4	,,	7.30	Private J. McDougall.
No. 6	,,	10.75	Serjeant J. McPherson.
No. 7	,,		Register lost J. C. Douglas.

The whole of the above companies fired fifteen rounds per man while in camp. The following which were under two-thirds of their strength, were not entitled to prizes, viz.:

No. 4 Company, 41st Battalion. Nos. 4, 8 and 9 Companies, 43rd Battalion. No. 2 Company, 56th Battalion; and Nos. 4, 6 and 7 Companies 59th Battalion.

The best shooting battalion in the district is the 41st. The best shooting company is No. 4, 41st Merrickville.

5. So far as I could learn, the whole of the men were "*bona fide*" members of the several corps, but I rather suspect that many were present whose term of service had expired, and who came out merely to fill up the companies.

6. It is quite impossible to form any estimate as to the number of men who will claim their discharge on completion of their three years service, some of the captains say that none of their men will re-enlist, others and nearly all say, that a large proportion will claim their discharge after the completion of this year.

7. The nine batteries of garrison artillery from this district, went into Forts Henry and Edward at Kingston, and performed sixteen days drill as artillery under command of Lieut.-Colonel French, Inspector of Artillery and Warlike Stores.

Being engaged with the brigade camp at Prescott at the time, I was unable to visit the artillery while performing their drill.

On the 12th September, a brigade camp of exercise was formed at Prescott, composed of the following corps, which are more fully detailed in the tabular inspection report here with enclosed, viz. :—

Ottawa Field Battery, Captain Forsyth.			
18th Battalion, Major Shields.			
41st	,,	Lieut.-Colonel	Cole.
42nd	,,		Buell.
43rd	,,		Bearman.
56th	,,		Jessup.
59th	,,		Bergin.
Ottawa Rifle Company, Captain Mowat.			
Pembroke Infantry Company, Captain Dickson.			

The Ottawa Field Battery, four guns and 55 horses, with the Ottawa Rifle Company as an escort, marched from Ottawa to Prescott, a distance of 59 miles. These corps carried their supplies, camp equipage, and ammunition, and were properly equipped for field service, and with the exception of one horse being kicked while on the way, the march was performed without accident, all coming into camp in excellent condition, the march occupying three and a quarter days, exclusive of Sunday, which was a day of rest.

The other corps were all moved by waggon, rail and steamboat. Owing to a change of time in the running of the boats on the Upper Ottawa, the Pembroke Company was detained two days on the road each way. The other corps all reached the camp and were comfortably under canvas in good time on the day of leaving their head quarters. The number of hours required to assemble the brigade is shown in the accompanying tabular report.

The system of sixteen days drill in brigade camps of exercise, is much to be commended. The wonder now being that anything could have been accomplished in eight days.

This being the first year the men were rationed by the department, the want of proper scales, and utensils for carrying supplies was much felt. The using of blankets for the conveyance of bread from the supply officers' store is very objectionable, and the wear and tear thus caused, will in a few years, cost the government more than to provide suitable baskets or dishes for that purpose.

The system of annual money grants to captains of companies in lieu of cooking and other utensils, is I think unsatisfactory. If these grant were properly expended, a few years allowances would provide every article required, but the uncertainty of the system leads captains to trying anything for a make-shift for that particular occasion. The consequence is, that each succeeding year finds many of the companies no better equipped in this respect than at first. I think much money would be saved, and more general satisfaction given, were the department to provide or establish a pattern for all necessary utensils.

The 41st and 42nd battalions have managed to provide these articles in a very serviceable and compact form, the former corps having added picks and shovels all of which are stored with their respective quartermasters.

During the encampment the general orders of the 5th May last, were carried out with as much precision as possible.

The target and artillery practice were kept up regularly, and, with very few exceptions indeed, the whole of the men fired the allotted allowance.

The system of giving money prizes to the best shots, has resulted most beneficially, and could the number be increased, it would further stimulate the men to acquire a thorough knowledge of the rifle.

During the first three days in camp, owing to the large number of recruits, I confined the drill to squad, company, and battalion, after that I had one brigade drill daily, and the progress made was truly wonderful. Where the officers were intelligent or efficient, the battalions were got into brigade movements without difficulty, in fact the efficiency of the force, may be determined by that of the officers.

One day during the period, I divided the brigade, sending two guns and three battalions to occupy a strong position among some hills and bush about one and a half miles from the town. This force under the command of Lieut.-Colonel Jessup, moved off with proper advance and rear guards and took up the position. With a similar force I moved out to the attack, my advance guard felt the enemy's outlying picket, the leading battalion was at once extended in skirmishing order, and the troops were brought into action, manœuvring as in the presence of an actual enemy. The firing, changes of position, flanking and defence were creditably performed. After an engagement of about two hours (the first brigade was out about five hours), the cease fire and assembly were sounded, when the whole formed together and marched back to camp.

This days proceedings were witnessed by a large concourse of spectators, many of whom were from the neighbouring states. The last two days of the encampment being under your immediate command, it is perhaps unnecessary for me to more than allude to the attack and defence of Fort Wellington.

The visit of His Excellency the Governor-General and suite, the Honorable the Minister of Militia and Defence, the Honorable Messrs. Dunkin, Aikins, and a large party of officers, ladies and gentlemen from Ottawa and other parts of the Dominion, added much to the *clat* of the camp.

Although the early part of the day proved wet, and interfered very much with the movements of the troops, the presence of so many distinguished visitors, and the presentation of the prizes for shooting by Lord Lisgar, his subsequent address and *levee*, were highly appreciated by the brigade.

Throughout the encampment the conduct of the men was remarkably good, necessitating but very little punishment.

The general dissatisfaction of the surgeons relating to the insufficiency of the medicines, and the men regarding the quantity of the ration, are matters requiring attention. The reports of the several surgeons which were forwarded a few days since, will explain as to the former.

Although the orders stated distinctly that every man should provide himself with sufficient cooked rations to keep him until the morning of the second day, with few exceptions this order was disregarded, consequently after a very early breakfast at home, with perhaps the exception of an apple, a glass of beer, or some other such useless article pro-

cured on the road, they ate nothing until their first meal in camp on the second day, and in order that their hunger might be appeased, consumed the greater part of that day's ration for the first meal, this caused the same scarcity for two or three days. This, with the great cry for butter, caused much trouble, and in some instances almost mutiny. And as the press and citizens generally sympathised with the men, their imaginary grievances became much magnified.

If the service is to be made popular with the people of the country, a more liberal ration will require to be issued, and I beg leave to suggest the following, which would, I think, meet the difficulty :—

A half ration of bread, tea and sugar to be issued on day of arrival in camp, one and a half full rations on second day, pork to be issued, say two days in the week. The present ration to be left intact with the following change, coffee to be struck off and the tea largely increased, which would, perhaps, allow a slight deduction in the sugar, a ration of barley for soup to be added, and say three or four cents per diem to be paid in cash to each man, which would enable him to procure such other necessaries as might be required. If approved, it might be considered whether it would not be advisable to pay this money to the captains in advance, on reaching camp.

I also found the ration of fuel wood too small, and it had in many instances to be exceeded. An allowance of wood for the guards, particularly in cold weather, would be a great boon. In the forage ration, I think the straw might be struck off and its equivalent given in hay. The ration of straw for the men might be reduced considerably, and rye straw allowed, it being cheaper and cleaner than oaten.

The system of drill as authorized, is a great improvement on the old, both officers and men comprehend the movements more readily, and after a few days of brigade drill, can, with careful handling, perform creditably almost every movement required on actual service.

Owing to the prescribed nature of the ground occupied by the force during the two days you were present, enabled you to see them only to a great disadvantage, and which prevented you from seeing the real efficiency of the brigade.

While on this subject, permit me to say that, without an appropriation for the rental of a large field for brigade drill, it will be impossible to carry out, in this district, on a large scale, that system of field manœuvres so essential to the efficiency of the force, and which could be practised during these annual brigade camps of exercise.

I would also suggest the desirability of a more thorough system of musketry instruction, which is so essential to make the men even passable shots. If a short course of position and aiming drill, with a few very short lectures on the theoretical principles, together with some instructions in judging distance could be carried out, the greater efficiency in this, one of the most essential duties of the soldier, would become apparent.

8. The actual strength of the force which will have performed sixteen days drill in this district for the present year, will be as follows :—

At Forts Henry and Edward, Kingston.

Garrison Artillery.....	28 officers,	434 men.
Brigade Camp Prescott.....	164	„ 1,941 „
Brockville and Ottawa Railway Garrison Artillery,	2	„ 75 „
	194	2,450
Total officers and men.....		2,644
Horses at Prescott Camp.....		90

As the Civil Service Rifle Company receives no pay, I have not included that corps in this calculation.

With reference to the best system of filling up the corps to the maximum strength (the deficiency for the present year being 594 officers and men), I forwarded to you a short time since, letters from the whole of the officers commanding corps in this district, who are, without exception, of the opinion that the time has now arrived when officers should have the power to fill vacancies as they occur from time to time, by resorting to the ballot.

9. There being but two independent companies in the district, it is very desirable that they be attached to some battalion.

Could a re-organization of the force be carried out without interfering with the claims or rights of many worthy and efficient officers, so as to form county battalions, I believe the change would be beneficial ; but as the brigade is working most harmoniously and satisfactorily as at present organized, I cannot see my way clear at present to recommend any change. I would, therefore, suggest that the Ottawa Rifle Company be changed to a corps of Engineers, or attached to the 56th battalion. At present there is no Engineer Corps in the district, which makes the brigade quite deficient in that respect. Should authority be given, no doubt a corps of this description could be organized in some favorable locality.

If the Ottawa Rifle Company is attached to the 56th battalion, I think No. 5 Company of that corps, at Farran's Point, which is infantry, might with advantage to both corps be attached to the 59th battalion.

The Pembroke Infantry Company being the only corps in the county of Renfrew, I would recommend that it be attached to the 42nd battalion, which is the nearest infantry corps, and made up of companies principally from along the line of the Brockville and Ottawa Railway, which when completed to Pembroke, will enable that company to reach the battalion head-quarters in a few hours.

While on this subject, I beg leave to call your attention to the very great importance of having a few troops of cavalry organized in the district, which are not only required to make the brigade complete, but would, in case of trouble, be of incalculable benefit in patrolling the extended and exposed frontier of the district.

Three troops have been offered, two of which are enrolled, being composed of our best yeoman, all of whom own their own horses, and as a rule are owners of real estate in the country, by accepting their services, we secure the sympathy and influence of a class of men whose services no country can dispense with, during trouble or invasion.

10. Heretofore there has been no difficulty experienced in procuring horses for the field battery, they being owned by the drivers who are as a rule farmers. But should a retaining allowance be authorized, I have no doubt it would secure increased efficiency.

11. During the encampment, I mustered the several corps, and called and checked the nominal and numerical rolls, by which the pay lists were corrected.

12. In conclusion, permit me to express my thanks to the mayor and corporation of Prescott, for their liberal support during the encampment, their supplying of water to the troops, which was most efficiently performed, and their contribution towards the rent of the field for drill, saved the department between two and three hundred dollars.

To the Ottawa River Navigation, The Union Forwarding, and the Canada Navigation Companies, I am indebted for their promptness in carrying out my wishes for the conveyance of the force over their respective lines. The St. Lawrence and Ottawa Railway Company as on several former occasions performed the transport service most efficiently, and although taxed very severely, moved the large number of men passing over their line with such expedition as to secure certain connections, which enabled the men to reach their homes in the shortest possible time. Without the hearty co-operation of the officials of this road, much inconvenience would have been felt.

It is very gratifying that so large a body of men was moved to and from the camp without an accident being reported.

I also acknowledge the valuable services of the officers who served on my staff during the encampment, viz :—Major Scott, 42nd battalion, supply officer ; Captain McDonald, 59th Battalion, Acting Brigade Major ; Lieut. Weatherley, Civil Service Rifles, Musketry Instructor, and Captains Butterfield and Wells, 18th battalion, orderly officers.

The district paymaster, Lieut.-Col. McDougall, with his usual promptness, has performed his duties most efficiently, and in addition to the ordinary duties of the district, was present both at Prescott and Kingston, and paid all claims before the troops left for their homes.

I trust you will not think it out of place, if I acknowledge the services of Mr. J. Neil McLean, caretaker of Fort Wellington, who has during the past year, as well as on former occasions, received from the department and issued to the brigade major, the whole of the camp equipage, targets, ammunition, &c., and in many instances devoted much time in superintending the drying, packing, and shipping the same.

To the officers throughout the district, I am particularly indebted for their assistance and co-operation, without which, the several duties could not have been carried on. Their readiness to conform to orders and inculcate discipline in their respective commands, have assisted very materially in bringing the operations of the year to a successful termination, which has left the brigade in a much higher state of efficiency than on any former occasion.

Your order for the enlistment of a detachment of men for service in the North West, reached me on Friday 13th October. I at once telegraphed to the several officers commanding corps in the district, and on the following day received answers offering more men than were required. I allowed them Sunday and Monday to prepare, and on Tuesday they assembled at Brockville, where on that and the following day, they were medically examined, attested, enrolled, armed and accoutred. The detachment left for Collingwood on Thursday, where they arrived in one week from the receipt of your order.

Had the quota for this district been double the number, they would have been forthcoming in the same short period, which speaks volumes for the patriotism of our people. In making the enlistments for this service, I endeavoured to select men who would make good citizens, and settle in the North West, after their period of military service will have expired.

I have the honor to be, Sir,

Your most obedient servant,

W. H. JACKSON, Lieut.-Colonel,

Acting D. A. G. M., Military District, No. 4.

DEPUTY ADJUTANT GENERAL'S OFFICE,

BROCKVILLE, 22nd November, 1871.

SIR,—I have the honor to report that I made the annual inspection of the Brockville and Ottawa Railway Battery of Garrison Artillery, Captain Lowe, yesterday.

Present, on parade, 1 captain, 1 lieutenant, 1 trumpeter, 22 musicians, and 48 non-commissioned officers and gunners; total of all ranks, 73.

Drill consisted of manual and firing exercises, which were well performed, and company drill passably well executed.

The men are of a very superior class, both in physique and appearance. They paraded very clean and soldier-like, were very steady on parade, and reflect much credit on the captain, as also the manager of the railway, who takes a deep interest in the welfare of the corps.

The band of twenty-two performers is in a high state of efficiency.

The arms and accoutrements are very clean and in perfect order. The clothing has been in use five years, and although it has received the best of care, shows much wear, which is more particularly noticeable in the trowsers.

The armory is well regulated, and very cleanly kept.

On the whole, the corps is a great acquisition to the Active Militia, and particularly to the town.

I have the honor to be, Sir,

Your most obedient servant,

W. H. JACKSON, Lieut.-Col.,

Acting D.A.G.M., Military District No. 4.

To the Adjutant General of Militia,
Ottawa.

MILITARY DISTRICT No. 5.

HEAD QUARTERS, MONTREAL.

(WINNIPEG, MANITOBA,

December 10th, 1871.)

SIR,—I have the honor herewith to forward to you, my annual report of Military District No. 5, the tabular returns connected with which were transmitted in October last.

You will observe from these returns that the authorized quota, or establishment, is considerably larger than the strength actually inspected; the quota for the District being as follows:—

	Officers.	N.C. Officers, and Men.
Cavalry	12	220.
Field Artillery	5	74.
Infantry (including Garrison Artillery)	371	4,913.
The actual strength inspected, being:—		
Cavalry	11	172.
Field Artillery	4	64.
Infantry	284	3,331.
Thus leaving a deficiency in:—		
Cavalry	1	48.
Field Artillery	1	10.
Infantry	81	1,477.

The details shewing the quota and inspected strength of individual corps, will be found in the tabular statement already alluded to.

As a large number of the men in the district will complete their service before the conclusion of the present financial year, I have endeavoured to ascertain by communications with officers commanding corps, whether they consider it probable that recruits or re-enlisted men are likely to fill the ranks of their respective battalions. With very few exceptions the answers are in the negative; and a strong desire is expressed that the ballot may be enforced.

My personal observation induces me to endorse these opinions. Indeed, I feel satisfied that, unless an emergency should arise, the actual strength of the district will, at the ensuing drill season, be found at least one third less than it is at present, unless that it is perfectly and distinctly understood that drafting will be placed in operation in regimental districts which may not furnish the authorized quota *as established by the Corps at present Gazetted.*

The system of massing corps in camps of instruction, so far as the district under my command is concerned, has been successful. The tabular statement of the district shows, that with the exception of the Brigade of Garrison Artillery of Montreal, which was encamped for drill at St. Helen's Island, and the St. John's Battery of Garrison Artillery which drilled at its own head-quarters, the whole of the corps under my command assembled on the 27th of June, for sixteen days drill at Laprairie, where, together with those in Military District No. 6, they were formed into a Divisional camp under my command, consisting of three Brigades, numbering in full, 5,310 of all ranks. The details of the strength of corps is shewn in the tabular statements.

The drill at the camp was varied by several reviews and field-days, on one of which occasions, the camp was honored by a visit and inspection by His Excellency the Lieut. General commanding Her Majesty's forces in B. N. A., and the Honorable the Minister of Militia and Defence.

On the 8th July, leaving a force of four hundred men as a camp guard; the whole of the remaining force was crossed over to Montreal, and formed into division in conjunction with the Grand Trunk Railway Corps and the Montreal Garrison Artillery, on Logan's Farm, making a total of 6,170 of all ranks.

Your personal inspection of the force on the occasion, obviates the necessity of any remark from me on its appearance.

The distance from the encampment at Laprairie to Logan's Farm is about eleven miles. The St. Lawrence was crossed by the troops, partly by train over the Victoria Bridge, from an improvised station on the Grand Trunk Railway, and partly by the various ferry steamers. The corps moving earliest, started from camp at four a.m., and the whole, after the field day, were re-embarked by seven p.m. No casualty occurred either crossing or returning.

The subsistence of the troops was carried on as on service, and the system of supply and rationing was found to work well.

The general conduct of the troops was beyond reproach. I believe that rarely or ever has so large a body of men been assembled, with such an entire absence of crime, and so little irregularity.

Whilst two fatal accidents, one arising from drowning whilst bathing, and the other from the careless handling of a rifle, have to be deplored, it is satisfactory to report that the health of the men was excellent, and that there was no case of serious sickness.

The rifle practice was carried on in accordance with regulations, with the result shown by the target returns noted in the tabular statement in connection with this; and in furtherance of your orders to offer any suggestion I may desire, I respectfully beg to remark, that although, doubtless, the system of conducting the annual target practice at the camps has great advantages, still I do not consider that it leads to at all a fair conclusion as to the best shot of the force. It follows, of necessity, when endeavouring to perform a large amount of target practice in the limited space of time which, too, is required for the objects in the short period of training, that the parties must be too hurried, and, therefore, not accurate in results. The larger the body of men assembled, the more apparent the fact becomes.

I would respectfully suggest, therefore, for your consideration, that the target practice should be performed at company head-quarters, under the supervision of the *Brigade Major* of the respective divisions, on the days of their semi-annual inspections, or by some officer appointed as Rifle Instructor to the district; and that the day on which the company met for target practice should count as one of the drill days of the annual course. In addition to the juster results which would be arrived at, these numerous prize meetings, which they would really be, would greatly encourage rifle practice throughout the country.

The ranges, ten in number, were prepared under the supervision of the Montreal Volunteer Engineers, by whom also a two gun earthwork battery was constructed near the entrance to the barracks, during the period of encampment. The labour of erection of huts for the distribution of rations, &c., and other work, was also undertaken by this useful corps, thereby saving much expense to the Department.

The permanent Militia Staff being otherwise employed, the following officers volunteered for, and performed the Divisional Staff Duties:—Lieut.-Col. Gillmor, Commanding Queen's Own Rifles, (Toronto), Acting Assistant Adjutant General; Lieut.-Col. McKay, Commanding Montreal Garrison Artillery, Acting Quartermaster General, Lieut.-Col. Moore, unattached, Camp Quartermaster; Major Dowker, Montreal Garrison Artillery, Supply Officer; Captain McKay, Montreal Garrison Artillery Aide-de-Camp. My warmest acknowledgments are due to these officers for the indefatigable zeal, and ability with which they performed their various duties. The Brigades were commanded as follows:—

No. 1 Brigade by Lieut.-Colonel Fletcher, Brigade Major.

2 " " King, "

3 " " D'Orsonnens, "

The latter of these officers assumed command of the Brigade formed from Military District No. 6, in consequence of the serious indisposition of Lieut.-Colonel Harwood, D.A.G., who was thereby compelled to leave the camp.

From the facilities offered for concentration, its central position, the nature of the

country, and other various advantages, I consider Laprararie to be the most suitable place for a camp of instruction in my district. The chief difficulty is the question of water supply, and I would urge on your consideration the propriety of having a series of wells sunk previously to the next encampment being formed there; this can readily be done, and the cost of sinking will not, I think, be in excess of the expenditure of carting water for a single year's camp. A large cartage expenditure would also be saved by the construction of a landing stage at the old Barrack Wharf.

The difficulty of obtaining horses for the Montreal Field Battery still exists, and to a great extent impairs the efficiency of this fine corps. Many suggestions to obviate this have been made. I am of opinion that the simplest and least expensive method would be, the enrolment of the required number of horses annually, such enrolment being compensated for, by a fee, of say fifteen dollars, which in addition to the fact of the horses retained in this manner; escaping municipal taxation, would, with the drill pay, hold out sufficient inducements to proprietors to ensure the battery being properly and efficiently horsed.

The enrolment should, I think, be made by the officer commanding the battery, subject to approval by the Inspector of Artillery for the Province.

In the rural districts, I consider that the annual drill pay will suffice to obtain horses for batteries. I have already had the honor to submit to you, application for the formation of batteries in the second and third brigade divisions.

For details relative to the strength, drill, proficiency at target practice, &c., of individual corps, I beg to refer you to the tabular returns of the state of the District already furnished.

I have the honor to be, Sir,

Your obedient Servant,

W. OSBORNE SMITH,

Lieut.-Colonel, D. A. G.,

Commanding Military District No. 5.

MILITARY DISTRICT No. 6.

MONTREAL, 15th November, 1871.

Sir,—In conformity with your instructions I have the honor to report for your information, that all the Volunteer Corps of Military District No. 6, under my command, have performed their Annual Drill for 1871-'72 at Laprararie Camp in June last, with the exception of four companies. The companies of Arthabaskaville, Three Rivers, St. Valère de Balstrode and the Company of Wolton, have performed their Annual Drill at their own Head Quarters.

All the corps whose names are mentioned in the Inspection report have performed their Annual Drill of 1871-'72 at Laprararie Camp, under the command of Lieut. Col. d'Odet d'Orsonnens, Brigade Major, who took command in my stead, owing to my being obliged to leave camp, on sick leave. Notwithstanding the sudden and painful loss of his son, Lieut.-Col. d'Orsonnens remained at camp, attending to all his duties with the utmost credit to himself.

Two lamentable accidents happened during the Annual Drill of the Volunteer Corps of my District at Laprararie Camp.

A private of the 65th Battalion, Carabiniers, Mount Royal, was drowned whilst bathing, and a private of the Sorel Company was accidentally shot at target practice.

Fortunately these accidents, however lamentable they may be, cannot be laid to the fault of any of the officers, and are among those misfortunes almost inevitable, when large numbers of troops are to be found assembled. Thanks to the sanitary measures taken by our medical officers, no other death is to be recorded, and with the exception of a few slight indispositions, no serious sickness has come to hinder the men from performing their daily duties.

I feel happy to record here the efforts made by my Brigade Majors, Lieut.-Col d'Orsonnens, Lieut.-Col. Hanson, and Lieut.-Col. de Bellefeuille, and by the officers commanding the different Corps, in connection with the Laprairie Camp.

Notwithstanding the number and apparent success, I feel it my duty to inform you that the greatest part of the volunteer corps of to day can scarcely reckon on two thirds of their "Cadres" in a case of sudden emergency.

In more than one locality, on account of the floating population to be found there, it would not be prudent to rely on even half of the men regularly enrolled.

After having consulted with the officers commanding Corps in my District, I have come to the conclusion that the ballot must be resorted to.

Several well-to-do persons have told me that they would willingly shoulder the musket were they obliged so to do, but that their occupations would not allow them to "voluntarily" neglect their business and impair their fortunes, forgetting, undoubtedly, at that moment that to contribute to the defence of his country, is a sacred debt due by every man, therefore, according to my humble opinion, the only just and legal way to have every one share equally, is the "ballot," so by that means every one will acquire in rotation the military knowledge necessary now-a-days to every good citizen.

I will also add, that from what I hear from commanding officers of corps, it is my firm belief that two-thirds of the men who have served their time, will ask to be discharged.

TARGET PRACTICE.

The target practice at Laprairie Camp could not be completed for divers reasons,—the grand field days, and the march to Logan's farm are amongst the chief ones.

I have the honor to forward with this, the report of the target practice, which took place under the command of Lt.-Col. Hanson, Brigade Major.

Thomas Copping, of the second company, of Rawdon, is the one who got the most points (47). I have already had the honor, in a previous correspondence, of recommending him for the district prize.

RIFLE ASSOCIATIONS.

I regret that the allowance for the Rifle Associations in my district only amounted to \$100. That sum was handed to Lt.-Col. Hanson, President of the Rifle Association of Joliette.

With this report I forward you the report of the Rifle Association of Joliette, and I may add that I feel proud to draw your attention to the marked progress made by both officers and men of that division.

CAMPS.

I am happy to inform you that the new system you inaugurated has everywhere met with the approbation of the Volunteers, and the best proof of it is the number of men present at Laprairie Camp.

MILITARY STORES.

In order to equip, with as little delay as possible, every man with all he requires, I would suggest that military stores should be established in every district, with all that is necessary for the service.

I cannot conclude this report without drawing your attention to the fact that Infantry is the only "arm" I have in the district under my command.

I wish you would therefore authorize the formation of a company of Engineers, with

two troops of Cavalry, in each of the three divisions of my district. The engineers would act separately, but the six troops of cavalry could form a regiment.

Moreover, I would recommend the formation of two Field Batteries of Artillery. With regard to this last branch of the service, I would suggest that the men should be recruited from the country,—from among the young farmers. Among other reasons, for the following :

It is well known that of all “arms,” artillery is that which requires most care, study, and attention.

In towns the population is continually changing place, the men are too often shifted from one place to another, in order to find the means of living; whereas in the country, the well-to-do farmer, attached as he is to the soil, never leaves home, and would, in the course of time, become proficient in that “arm,” and with all that, he could always have his own horse at hand when wanted.

Perhaps the appearance—the mere “show”—would not be as brilliant, but in real efficiency, in power of endurance, there would certainly be a great gain.

I remain, dear Sir,

Your most obedient servant,

A. C. DELOTBINIERE-HARWOOD,
Lieut.-Col., D. A. G., Military District No. 6.

The Adjutant-General of Militia,
Ottawa.

MILITARY DISTRICT NO. 7.

QUEBEC, 6th November, 1871.

SIR,—I have the honor to forward herewith the Annual Return of Lieut.-Col. Duchesnay, Brigade Major, 7th Division, who, during my absence in Manitoba, performed the duties of Acting Deputy Adjutant General, Military District No. 7.

Two corps only were inspected by me, (*i. e.*) the 61st Montmagny Battalion, and the 8th Volunteer Rifles. The first of these was fairly efficient. Of the second I can only say that for proficiency in drill and smart appearance on parade it is, and has been for some time, the first corps in this District.

I have the honor to be, Sir,

Your obedient servant,

L. A. CASAULT, Lieut.-Col.,

Deputy Adjutant General Commanding Military District No. 7.

Colonel P. ROBERTSON-ROSS,
Adjutant General, &c.

QUEBEC, 6th November, 1871.

SIR,—I have the honor to forward you, herewith enclosed, my Annual Report for 1871-72, together with a tabular annual Inspection Return of all the corps in the District who have performed and completed their drill; also annexed is the District Target Practice Return, and the answers of officers commanding corps regarding the possibility of re-forming their different corps up to their full strength by the Volunteer System. Three of the commanding officers have not yet sent their answers, but on receipt of the same I will immediately transmit them to you to be forwarded to head quarters.

I have the honor to be, Sir,

Your obedient servant,

H. T. DUCHESNAY, Lieut.-Col.,

Brigade Major, 7th Division, P. Q.

Lieut.-Col. L. A. CASAULT,
Deputy Adjutant General Militia,
Military District No. 7, Quebec.

QUEBEC, 31st October, 1871.

SIR,—I have the honor to report that by General Order, dated 5th May, 1871, Brigade Camps of Instructions were ordered in the several Military Districts of the Dominion of Canada, and the number of volunteers to be brought at these camps limited to 20,000 ; being then distributed equally in the different Districts.

The allotted number to Military District No. 7, which I am in command of, was 2,320 men, exclusive of officers, and I was ordered to assemble my Division on the 3rd of July, 1871. After making arrangements with the different steamboat and railway companies for the transport of the troops, in accordance with my orders, I managed to concentrate the whole of my Division on the 3rd of July at Point Levis, the appointed place for camping.

The battalions ordered to assemble were as follows ; *vide* tabular form showing numerical strength of officers and men in each battalion :—

RETURN showing numerical strength of officers and men in each Battalion at Special Brigade Camp at Point Levis.

Corps.	Number of Companies.	Brigade Staff.	Officers.	Rank and File.	Horses.	Head Quarters.	Distance to point of Concentration.	Remarks.
Cavalry	2	8	11	110	126	Quebec	4	
Field Battery	1	5	71	56	do	4	
9th Battalion	7	26	248	do	4	
17th do	8	29	357	Levis	2	
23rd do	6	23	310	St. Marie	30	
55th do	5	22	232	Inverness	50	
70th do	6	25	215	St. Geniève	75	
Dorchester Battalion	4	16	180	St. Austine	15	
County of Quebec do	4	16	183	Charlesbourg	9	
Portneuf do	5	19	229	Pointe aux Trembles	30	
Kamouraska do	4	16	179	Kamouraska	90	
Temiscouata do	4	12	158	River du Loup	120	
Rimouski do	5	19	166	Rimouski	180	
13 Battalions.	61	8	239	2,639	182			

By this table you will see that the force brought out under canvas was 2,886, inclusive of officers. Fatigue parties had been detailed previous to the formation of the camp, so that on arrival at Levis the several battalions found their tents struck up, and immediately took heartily to work, building kitchens, draining round their tents, &c.

SUPPLIES.

The contracts for supplies, beginning only on the morning of the 4th of July, the men had accordingly provided themselves with cooked rations. On the 4th the supplies of meat, bread, groceries, forage, wood, and straw came into work, and from the first day gave general satisfaction. The supply officer, Captain Duchesnay, of the 2nd Battalion Quebec Rifles, whose services I had secured, he being at the time on leave from his regiment, was indefatigable in the performance of his arduous duties, and by his untiring energy carried the arrangements to my entire satisfaction, and to that of all the officers and men of my Division.

The Supplies for the troops in camp were approved at the following rates, viz. :—

	Bread, 3 cents per lb.
	Meat, \$5 95 per 100lbs.
Potatoes, and Groceries.	Potatoes, 1 cent per lb.
	Coffee, 25 " "
	Tea, 45 " "
	Sugar, 10 " "
	Salt, 1 " "
	Pepper, 15 " "
	Forage, 34 cents per ration.
	Straw for men, 50 cents per 100 bundles.
	Fuel wood, \$4 40 Hardwood, per cord.
	\$3 00 Tamarac, per cord.

The rations as laid out in paragraph 291, Regulations and Orders for the Active Militia, cost \$13 75.

CAMP.

There being no sufficient ground to pitch the camp according to regulation, I was obliged to put the tents in double column of companies, and so managed to put together the whole of my Division.

On the 6th of July the Adjutant General of Militia arrived at camp, and immediately began to muster the troops. After the completion of the muster the total force in camp was 2,886 officers and men,

On the afternoon of the 6th the whole Division turned out for inspection. The Adjutant General, accompanied by Lieut.-Col. Macpherson, D. A. A. G., and Lieut.-Col. French, Inspector of Artillery, galloped on the ground, and was received with a general salute at shouldered arms, the troops being in line of columns. He then proceeded through his inspection, the regimental bands playing as he passed their lines. After having expressed himself well satisfied with the appearance of the troops the Division was ordered to march past in columns and quarter columns. As each battalion passed the saluting point they were closely scrutinized by the Inspecting Officer, who was pleased with the steadiness of the marching of volunteers who had only been two days in camp. The force was then divided into two brigades and a sham fight began. The Adjutant-General took command of the 1st Brigade, and the 2nd, under the command of the Acting Deputy Adjutant General of Militia, was ordered to deploy and take cover in an adjoining copse of wood. One troop of cavalry was sent out to skirmish and to feel for an enemy, which was supposed on the march to attack our camp. Skirmishers from the 9th and Rimouski Battalions were sent out to support the cavalry vedettes, which very soon after, coming in contact with the enemys outposts, began to fall back and retire on the main body. In the meantime the skirmishers of the 9th and Rimouski Battalions having encountered those of the enemy a brisk fire began, during which the latter seemed to be beaten back, but steadily disputed every inch of ground. Having received reinforcements our skirmishers were repulsed in their turn. The field battery now did good work, pouring deadly volleys into the enemy's ranks. The Brigade having deployed in line began to advance, and when in a good position commenced to deliver a well fed file fire. The contest became very sharp, having closed on the enemy the line was ordered to charge, which it did with great entrain, pursuing him hotly to a great distance and seeming reluctant to abandon the pursuit. The cavalry who had been kept under cover was ordered to charge, which had the effect of completely routing the enemy. The weather was excessively warm, notwithstanding the men kept heartily to work, and none were found to fall out during the fight. After a little rest the troops marched home after having been three hours in the field.

DISCIPLINE.

The duties in camp were carried strictly according to orders, and under the direct supervision of the Staff. The hours for parade were as follows: 6 o'clock, a.m., Adjutant's parade; 10 o'clock a.m., Commanding Officer's parade; 3:30 o'clock, p.m., Brigade parade, under the command of the Deputy Adjutant General. On Sundays the troops paraded at 9 o'clock, a.m., for Divine Service. The Episcopalians and Wesleyans paraded with the regulars. The Roman Catholics attended Mass in the open air, at which officiated the Reverend Father Casgrain, Chaplain duly appointed to the 9th Battalion. On Sunday afternoon the men were permitted to see their friends in camp from 2 o'clock, p.m., to 6 o'clock, p.m., being the only time when strangers were allowed into camp without passes. Canteens were shut on Sunday afternoon, and it had the good effect of preventing drunkenness. I am happy to have occasion here to testify to the good behavior of the volunteers under my command.

The officers in general appear to ignore their duties, which can be accounted for by the little efforts on their part to make themselves acquainted with them, and the erroneous idea in considering the camp as a place of enjoyment, instead of being specially established for the instruction of officers and soldiers in their different duties. Many of them also, I regret to say, forget the line of demarcation which should exist between the officer and soldier, and without which no discipline can be properly carried out. Strict attention to that essential part of an officer's duty would obviate to many disagreeable consequences to themselves, and would help greatly the officer commanding the District in the discharge of his duties, and the responsibility of his command.

DRILL.

During the Brigade Camp the men were practised daily in the different manœuvres of Battalion and Brigade. I insisted particularly that the men should be taught Light Infantry Drill and outpost duties. Three days in the week were assigned to Brigade movements, and three days to field days, when every man was provided with five rounds of blank ammunition. I have at another part of my report given a detailed account of a field day, which took place under the immediate command of the Adjutant General of Militia.

The day before the breaking up of the camp Sir George Cartier, Minister of Militia and Defence, accompanied by Lieut.-Col. Osborne Smith, Lieut. Col. Bacon, and Lieut.-Col. D'Orsonnens, paid a visit to the camp. An escort of cavalry had been detailed to meet him at his hotel, and shortly after 9 o'clock, a.m., he drove on the parade ground and was received with a general salute. Sir George detailed Lieut.-Col. Smith to ride through the ranks and to report. The troops were then ordered to march past before Sir George Cartier, who was loud in his praise, in the manner in which the volunteers acquitted themselves. A field day afterwards took place under the command of the Acting Deputy Adjutant General, the men having been provided with ten rounds of blank ammunition. On the conclusion of the manœuvres, the Minister of Militia and Defence drove to the tent of the officer commanding the camp, and held a levée, at which the whole of the officers in camp were presented. Sir George Cartier expressed himself highly satisfied at the day's proceedings, and stated that these camps had been established to test the advantage in bringing together large bodies of volunteers to learn on a larger scale the manœuvres in Brigade. He was happy to say that it had proved a great success, and met with general satisfaction. In England they had partly copied our system, showing that although young Canada could teach the mother country some useful hints.

Although these camps have so far proved great a success, I am of opinion that the time for camping is too short to work with efficiency a large body of men. Volunteers who have been twelve months without drill cannot in that short space of 16 days learn well the preliminary exercises, and be put at once at the Brigade movements required of

them. Some of the most necessary branches have to be hurried through without them being taught the practical knowledge of the same. If the whole of the officers were well acquainted with their duties and exerted themselves to be proficient, perhaps some material difference might be experienced, but until then no beneficial results can be obtained.

MUSKETRY.

The target practice was carried out daily under the superintendence of Major J. B. Amyot, of the 2nd Battalion Quebec Rifles, a very efficient officer, and thoroughly cognizant of those duties. Time and accommodation would not allow me to fire the whole of Battalions at more than two distances, viz., 200 and 400 yards. Included in my tabular return will be found a correct statement of the figures of merit of each company and battalion in the District.

Also annexed is compiled a District Target Return showing company, battalion, and district prize winners.

STORES.

The arrangements under this head were very satisfactory, and I received from the Department all the aid in their power. I would beg to recommend that in future a sufficient quantity of stores necessary for 5,000 men should be supplied and stored permanently at the head-quarters of every District, thereby obviating unnecessary delay and break down in a sudden emergency. I must not forget to mention that the camp quartermaster, although a novice in that capacity, acquitted himself very satisfactorily, and was a great help to me. I consider in the new redistribution of the force, that the formation of pioneers in each battalion of strict necessity, and the want of which was greatly felt during the last camp. Provided with the necessary tools they would be of great advantage to the force for carrying out any work needed in camp, and save expenses to the Government. The tools, &c., issued to them would, at the completion of the camps, be returned into the private armories and kept in order, the allowance for the care of arms being sufficient for both.

THE POSSIBILITY OF RE-ENROLLING MEN BY THE VOLUNTEER SYSTEM AFTER THE THREE YEARS ENGAGEMENT.

The three years having expired for the service of companies in the District, I may state with certainty that the two-thirds of the volunteers enrolled in 1868 will claim their discharges. I find by the opinions of the several officers commanding battalions in the District that they all concur in stating that it will be impossible to fill up the rolls anew by the Volunteer System. It is very necessary for the well working of the Volunteer Militia, and to enable officers commanding to have more control over their men that the Government would try to bring in gradually the system of ballot. If a company was unable to complete its quota by volunteers the law might take its course and order that the balance wanted should be filled by ballot out of the men of the first class of the Reserve Militia. Keeping up the Volunteer System compels us to accept as officers men quite unfit for the appointment, either by their social position or their military training. The present schools of Military Instructions may give the rudiments for the making of a good instructor, but the short time they are in it cannot give them the tone and military qualifications so necessary for the formation of a good officer. A college where officers desirous of qualifying as such would receive a higher education would be very desirable, and all the money expended in the numerous Military Schools now existing might with advantage be expended in the establishment of such a college. The facility of communications are such that gentlemen really wishing to qualify would find no difficulty in attending.

FIELD BATTERY.

The Quebec Field Battery, under the command of Lieut.-Col. Lamontagne, in accordance with paragraph 3, Regulations for the training of Field Batteries in camp, performed

a march of 20 miles, with waggons properly packed, all entrenching tools, camp equipage, small arms, &c., strapped in their places. The men having breakfasted early, the tents were struck and packed, and the battery, numbering five officers and 71 men, started at 6 o'clock, a.m., returning at 5 o'clock, p.m. Although the weather was very warm the journey was accomplished without accident. The horses on arrival looked fresh, and seemed ready for more work. This Battery is very effective and could be made more so by a little increase in the allowances for horses. I would suggest that the best way to horse field batteries would be, 1st, to enlist in each battery a sufficient number of men proprietors of horses; 2nd, to give, besides a daily drill pay of \$1 25 per horse, a bonus of 75c. for every approved horse on parade.

PAY.

The number of officers and men who have received at the special camp of Levis, as far as I can ascertain, was 247 officers, and 2,639 rank and file. Out of this number 2,658 officers and men were French Canadians.

Captain Forrest was present at camp two days before the breaking up, and managed to settle the greatest part of the claims. I did not hear any complaints as to the pay of the men, the sole instance being the very small allowance to cavalry and battery horses. I can assert that the officers had to go to a good deal of personal expense to be able to secure the horses necessary, and could not get them for less than a dollar a day.

EIGHT DAY'S CAMPS.

The camps of eight days drill were carried out according to orders by the several battalions who had not joined the special camp. The Quebec Garrison Artillery, the 61st and Charlevoix Battalions assembled at their different camping grounds. The number of officers and men present at these camps was 790.

	OFFICERS.	MEN.
Quebec Garrison Artillery.....	12	188
61st Battalion.....	16	229
Charlevoix Battalion.....	13	232

The 8th Battallion Rifles and Grosse Isle Detachment performed their annual drill at head-quarters, taking 16 days of three hours each to complete their course of instruction. The Gaspé, Bonaventure, and New Carlisle Infantry Companies having completed their term of service and drill, not having informed the Deputy Adjutant General of their intention of putting in extra drill for 1871—72, I have decided to complete my report without them.

In concluding my report I beg to submit the following recommendations, viz.: 1st, The amalgamation of independent companies to the nearest battalion; 2nd, That in the reorganization or redistribution of the force one Engineer company, and one field battery should be formed in each Brigade Division resident therein; 3rd, In order to insure a correct muster at the annual drills to prevent any falsifications of accounts or false musters, the muster should be carefully made by the Battalion Paymaster, under the superintendence of the District Paymaster, the Deputy Adjutant General, and the Brigade Major of the Brigade Division.

I beg, in completing my report, to return my heartfelt thanks for the aid I have received from the Brigade Major under my control and the Staff who assisted me at the Brigade Camp at Levis, as well as from officers in command of corps in my District.

I have the honor to be, Sir,

Your obedient servant,

H. T. DUCHESNAY, Lieut.-Col.,

Acting Deputy Adjutant General Militia

Military District No. 7

The Adjutant General of Militia,
Head Quarters, Ottawa, P.O.

MILITARY DISTRICT No. 8.

DEPUTY ADJUTANT GENERAL'S OFFICE,

FREDERICTON, N. B., 21st October, 1871.

SIR,—In compliance with your instructions, I have the honor to submit this my Annual General Report on the state of the force, in Military District No. 8, (New Brunswick), under my command.

(1.) The nominal quota and strength authorized for my district is 3,264 of all ranks.

(2.) The actual strength of the corps is,

Officers	182
N. C. Officers and Men.....	2,554
Total	<u>2,736</u>

The number of officers and men who have performed their annual drill for 1871-72 is,

Officers	173
N. C. Officers and Men.....	2,229
Total.....	<u>2,402</u>

(3.) The actual strength and established strength are identical in almost every instance. The Troops of Cavalry whose services were accepted, and who received clothing at 40 non-commissioned officers and men per troop, and 3 Batteries of Garrison Artillery who were accepted and who received clothing for numbers above the established strength, being the exceptional cases.

Thus, while the actual strength is 2,736, the establishment, 48 existing corps, is 2,784, the discrepancy in the quota being caused by 8 infantry companies being disbanded, which at 58 per company is 464.

In proof of this statement, the average attendance at the inspections of the 48 corps is over 50 ; the difference being accounted for chiefly by men temporarily absent from their homes or sick, and there being uniform sufficient but for 55 men per company.

I am of opinion that captains of companies should have at least 60 men on their rolls, supplied with 60 uniforms, this would ensure an average attendance of 55 men per company.

The corps above referred to have mostly served their time of engagement, and, although there are some praiseworthy instances in which not a man is desirous of leaving, and many others in which the vacancies created by men taking their discharge, will speedily be filled by good and true men by the volunteering system. I am of opinion that in some few instances, chiefly in cities and towns, the necessity and desirability, "on military grounds," for completing the deficiencies in the ranks by the means of the ballot, as prescribed and authorized in the existing militia law, is now apparent.

Having, in compliance with your instructions, placed myself in communication with officers commanding corps, you will observe that the majority of these gentlemen bear me out, and endorse the above opinion; and, when properly understood, I am convinced that it will produce good results if the system be generally adopted throughout the Dominion, in cases in which *no more volunteers can be obtained*, to call upon that class of the community "comprising those of the age of eighteen years and upwards, but under thirty years, who are unmarried or widowers without children," to serve in the Active Militia for a period of three years.

In the first place a *trained Reserve Force* will thus be formed, composed of men ready and willing to re-inforce the Active Militia in the hour of need, or again to form part of its quota in time of peace.

(2.) Those will be drawn into the ranks who, perhaps for not sufficient reasons, have hitherto taken no part or interest in the service, leaving the "Enthusiasts," so called, to do all the work.

(3.) By bringing *fresh material* into the force, fresh interest in the service will be created; and, in short, the organization will be more evenly distributed than heretofore.

It is to be hoped, too, "That the people, as a body, will thus more willingly submit to those sacrifices of their time and personal liberties, by which alone the force of the country can be maintained in efficiency, as, failing that, all our own efforts will be rendered nugatory."

In conclusion, I may here quote part of a letter from one of the officers commanding corps, above referred to, in which I entirely concur.

"The fact that the captain of the company has personally solicited the most of the men in the ranks to join, places him in a not sufficiently independent position in regard to them, which certainly tends to undermine the discipline of the force."

He adds that "he thinks it desirable that all reasonable ordinary efforts should be exhausted to procure volunteers before resort be had to a draft or ballot; but on military grounds he thinks that it is desirable that the ballot should be brought into requisition to complete the strength of corps after reasonable efforts have been made to obtain volunteers."

(5.) I am of opinion that the whole of the men who performed their annual drill were *bona fide* enrolled members of the corps according to the Militia Act, except in two instances, in which it was expedient temporarily to attach members of other corps of Active Militia to corps performing drill.

In accordance with General Order of the 5th May, last, a Brigade Camp of Exercise, for 16 days continuous drill, was formed at Frederickton on the 29th June, and styled "Camp Ross," in honor of the Adjutant General.

Hereto appended is a statement shewing the actual strength of corps assembled in this camp. (See page 44.)

The New Brunswick Regiment of Cavalry marched to camp an average distance of 80 miles per troop, crossed three long and tedious ferries, bivouacked at the Jemseg on the night of the 29th, and arrived at Frederickton on the 30th. When returning the regiment left one day before the camp was broken up.

The practical utility of the regiment was thus tested, proceeding to and returning from camp, and much credit is due to Lieut. Colonel Saunders for his systematic arrangements, which ensured the success of so long a march, as well as for the discipline maintained in the corps.

The 71st Battalion was early on the ground on the 29th inst., and did good service in pitching the tents and preparing for the arrival of more distant corps, which came in from time to time during the day.

The 74th Battalion, having had a long distance to travel by rail and steamboat, did not arrive till half-past 8 o'clock p.m., when the men soon settled down for the night in the most orderly manner.

The following system was observed by corps on arrival on the ground:—

- 1.—Tents properly pitched.
- 2.—Cooking places marked out and kitchens constructed.
- 3.—Latrines dug.
- 4.—Wells made.

The usual routine of drill and field manœuvres, as detailed in General Orders, was commenced on the morning of the 30th instant. A Library was established for the use of the men; H. H. the Lieut. Governor kindly contributed periodicals, newspapers, &c., and contributions were also sent from other quarters.

On the 1st July, "Dominion Day," the Brigade was formed in line, and at 12 o'clock noon, the customary "*feu-de-joie*" was fired, in honor of the day. The brigade was on that day subsequently exercised in field movements, &c. H. H. the Lieut. Governor was present, and a number of spectators were on the ground.

On the 6th July the Admiral of this Station, with H. H. the Lieut. Governor, witnessed the field manœuvres of the brigade on the "Flats" below the town, where the troops were exercised on more than one occasion, and advance and rear guards of cavalry and infantry were invariably thrown out marching from and returning to camp.

On the 11th July the Adjutant General, accompanied by the Director of Stores and the Inspector of Artillery, arrived in camp; the Adjutant General occupying, for the rest of the period of training, a bell tent, next to that of the Deputy Adjutant General.

On the 10th and 13th July the brigade was divided into two forces, in accordance with the Adjutant General's instructions, under command of Lieut. Colonels Upton and Hewitson, respectively, the two senior infantry commanders, one side to act on the offensive, the other on the defensive.

These forces having been exercised on these occasions over ground with which neither officers nor men were for the most part familiar, the results proved most satisfactory. Individual intelligence of officers was practically tested; errors on one side, unless speedily corrected, were taken advantage of by the other; while a valuable lesson of the necessity for the observance of coolness and steadiness in action, was taught. A minute description of the movements on both days is scarcely necessary. I may, however, refer as briefly as possible to the Sham Battle of the 13th July, under the Adjutant General's supervision.

The following is the Brigade Order, intended to convey but a "general idea" of the positions to be taken up by the two divisions, leaving the rest to the knowledge, intelligence, and judgement of the commanders.

CAMP ROSS.

BRIGADE ORDERS BY LIEUT. COLONEL MAUNSELL, D.A.G., CAMP COMMANDANT.

12th July, 1871.

No. 7.—The whole of the corps composing the Brigade will parade their full strength to-morrow, for field manœuvres ("Sham Battle"), in presence of the Adjutant General, as follows:—

First Division.—One Squadron of Cavalry, the 71st Battalion, St. Stephen and Gage-town Infantry corps. Lieut. Colonel Hewitson, at such hour as that officer may direct.

Second Division.—Two Squadrons of Cavalry, 67th Battalion and 74th Battalion, Lieut. Colonel Upton, at 12-30 p.m.

The order of march will be as follows:—

The 1st Division to march by the St. Stephen Road, and take up a strong position on the heights, about two miles from camp, which will be defended from attack expected from an advancing force, either from St. Stephen or Woodstock.

Lieut. Colonel Hewitson will detail a party with spades, to strengthen the position by constructing shelter trenches, if practicable.

The camp Quartermaster will issue spades.

The 2nd Division will march by the upper Spring Hill Road, and on arriving at the residence of Major General Kilner will take the new road connecting with the St. Stephen Road, with the view to advance on Fredericton by the upper route. Both forces will take every advantage which the features of the ground may afford.

It is to be understood that the Sham Fight shall terminate on the opposing forces coming within one hundred yards of each other.

Lieut. Colonel Saunders will detail a patrol of one troop to proceed by the main Woodstock Road to obtain intelligence, and join the 2nd Division by the road below McLaughlin's, connecting with the St. Stephen Road at General Kilner's.

The Commandant will have general supervision of the movements of both forces; Lieut. Colonel Saunders will direct the general movements of the Cavalry; Lieut. Colonel Otty will act as Brigade Major of 1st Division; Lieut. Colonel Inches for 2nd Division.

Fifteen rounds of Blank Ammunition will be issued per man of both Divisions.

Plan.

I submit a sketch of the country, made by Captain and Adjutant Beckwith, 71st Battalion, copies of which were provided for many officers, for their better guidance. It may now serve to show the positions of the troops. Both forces, with their necessary advance and rear guards, moved off to take up their respective positions: the 1st Division marching by the St. Stephen Road, the 2nd Division by that from Woodstock. You will observe that the former was much smaller (numerically) than the latter, owing to its having to occupy a strong position, and to act upon the defensive.

The position selected by the Commander 1st Division, was an excellent one, admirably adapted for defence from a force advancing either from Woodstock or St. Stephen. His supports and reserve were posted on the heights, while an outpost (line of skirmishers) was thrown out 700 or 800 yards round the base of the hill, concealed from view. Shelter trenches were not considered necessary in such a position, the natural features of the ground, with fallen trees, afforded ample cover. The cavalry of this Division, wearing forage caps, to distinguish them from the cavalry of the other Division, in busbies, were posted at convenient distances on the flanks. The 2nd Division, on the other hand, owing to the nature of the country, with thick woods on both sides of the road, had to move with much caution, and the intelligence party, having joined this force at the place appointed, was sent to reinforce the advance guard; and subsequently, on approaching open country, over which it was resolved to move the main body rapidly, with a view to out-flank the enemy and gain the heights, a squadron of cavalry was directed to dash along the road and engage the attention of, if not actually to come into action with the opposing force, which was naturally supposed to occupy the strongest position in that direction.

This strategical movement ultimately produced good results. While the 2nd Division was advancing by fours from the right of companies, the enemy's skirmishers, hitherto concealed, unexpectedly opened fire, and it was at once seen that they (1st Division) were well prepared to give the advancing force a warm reception; but, numbers prevailed,—the former had to retire on their supports, well posted on the heights, disputing every inch of ground. While this was going on the cavalry were not idle. That of the 1st Division made a dash at the flanks of the opposing skirmishers, who lost no time in forming company squares; that of the 2nd Division, stronger in numbers, having gained the heights, galloped down the road, with a view to charge the flanks of the line now opening fire upon the advancing force, also in line, the Commander, 1st Division, whose force was now suffering from heavy fire in front, speedily met this cavalry attack by forming mass of quarter columns to the left, and directed his fire by successive companies at the cavalry now retiring to a place of safety. Meanwhile the Commander, 2nd Division, changed the front of his line to the right, and advanced steadily but rapidly in line until the heights were gained; fire was opened on the enemy's infantry, now in mass of quarter columns. The Adjutant General at this point rode up, and acting in the capacity of umpire, ordered the firing to cease, and the 1st Division to retire towards Fredericton, with the view to take up, and hold, if possible, a fresh position in the open country in that direction. This, however, proved impracticable, as, although a rear guard was speedily thrown out, and the retreat properly conducted, the advancing force lost no time in following up the retreat, and its advance guard, of skirmishers relieved and reinforced from time to time, doing good service, no new position was taken up by the 1st Division, and finally, both forces were halted at the meeting of the roads from St. Stephen and Woodstock, and the Adjutant General was pleased to express his approval of the general disposition of the troops, as well as to point out any errors in the manœuvres.

On the 13th the troops paraded for Presentation of Colors to the 67th Battalion, by the Honorable C. Connell, M.P., when the accompanying address was read by Miss Connell, and replied to by Major Raymond, of that corps. The consecration was performed by the Reverend Canon Lec.

The force then marched past, and subsequently was exercised, under the Adjutant General, in a variety of field manœuvres, at the close of which, the money prizes for Target Practice were presented by the Adjutant General, who afterwards addressed the

Brigade commenting on the good conduct and discipline maintained in camp, and on the satisfactory progress made by both officers and men.

On the morning of the 14th July, the camp was broken up and the different corps returned to their head quarters in the same orderly manner in which they came, and which characterised their stay in camp.

TRANSPORT.

The transport arrangements both by steamboat and by railway were most successful.

The force from the West, was under the command of Lieut-Col. Upton, that from the East, under Lieut.-Col. Beer; and the good order and discipline maintained on the line of march, reflects much credit on these officers, and on captains of companies.

The attention of Lieut-Col. Beer and his officers on board the Steamer "Fawn," deserves special mention. I must add that the managers of the E. & N. A. and Fredericton Railways, afforded me every assistance in making and carrying out the transport arrangements on reasonable terms.

RATIONS.

Having been present almost every morning at the issuing of the rations, at "Camp Ross," as well as having visited the messes of every corps, I am of opinion that in every particular that the contracts were satisfactorily carried out, and that any complaints (there were but few) as to quantity or quality of authorised rations, were ill-founded.

It is true that "camp fare" does not include the "luxuries," so called, that men are used to at their homes, and you are aware that the absence of milk and butter is felt.

However, while "luxuries" cannot reasonably be expected, I consider that if the present scale of rations were supplemented by ½ lb. of vegetables, and 1 oz. rice, daily, (not unfrequently issued to soldiers in the field, in addition to the usual rations,) it would afford general satisfaction, and conduce to the health and comfort of the men, and "luxuries," if required, can be purchased for a small sum at the canteen, a properly conducted canteen being a necessary adjunct to the camp.

The question as to the amount of the private's pay, is a question for our rulers to decide.

In connection with the subject of supply, I have much pleasure in stating that Captain McKenzie, discharged his duties as supply officer in a most zealous and efficient manner.

The cleanliness of the camp was preserved throughout, and the duty of camp quarter master, was performed to my entire satisfaction by Quarter-master Hogg, 71st Battalion.

OFFICER'S MESS.

It is, I consider, absolutely necessary, for the good of the service, to have a properly conducted officer's mess in camp, in every Battalion, and it being both inconvenient and expensive to erect wooden structures, I recommend that marquees be provided for this purpose.

MEDICAL REGULATIONS.

I have much pleasure in stating my conviction that the medical officers, both at Fredericton and Chatham camps, most zealously performed the duties assigned to them. Returns showing the number of sick and the quantity of medical stores expended, will shortly be transmitted. I may add that I consider it very essential to issue a Hospital Marquee or two, in each Brigade camp, and recommend that all slight cases of illness, such as diarrhoea, colds, &c., should be treated by assistant surgeons. All cases that require to receive more careful treatment and diet, than can be afforded to men in bell tents, should be sent to the General Hospital Marquee, to be treated by the surgeons of corps under the senior surgeon, as P.M.O.

I cannot conclude this report, concerning "Camp Ross," without bearing testimony to the valuable assistance afforded me, in the discharge of my duties as Commandant, by Lieut.-Col. Inches, on whom, on account of the illness of Lieut.-Col. Otty, more onerous duties than usual devolved, and were ably and cheerfully performed.

My orderly officer, Ensign F. Hazen, is an excellent young officer, and performed his duties with much energy.

The following is my Brigade order, at the breaking up of the Camp :—

In publishing the above order respecting transport of corps to their different local head-quarters from the Brigade Camp, at Fredericton, the Deputy Adjutant General commanding Military District, No. 8, takes the opportunity of returning his thanks to staff officers and officers commanding, for the uniform support he has received from them.

Thanks are also due to all officers and men, for their assiduous attention to those duties which have been so performed as to merit and receive the approbation of the Adjutant General of the Dominion, who has announced that it will be his agreeable duty to report to the Government, the soldier-like appearance of the fine body of men assembled in this camp, the zeal and aptitude for acquiring military instruction displayed, and the satisfactory progress made by them during the limited period the camp has been assembled.

The conduct of the men not only on the line of march by steamboat or rail, but during their sojourn in camp, has been most exemplary.

The march of the N. B. Regt. of Cavalry in two days from its head-quarters, in King's County, to camp, has been commended by the Adjutant General, and has already been referred to in camp orders.

Each Infantry corps might also be referred to in the same manner and with equal justice, from the good spirit manifested by the 71st Battalion, in pitching the tents and preparing for the arrival of more distant corps, to the order of disembarkation, and march into camp at a late hour at night of the 74th Battalion, some companies of which corps had been nineteen hours *en route*.

There are, of course, difficulties to be overcome in assembling a large force such as this, (the largest yet encamped in New Brunswick), representing many different branches of industry with a variety of interests, and in concentrating such men in camp, for the first time, under regulations as if in active service, with the same rules as to cooking, the same system, of field manœuvres, *not mere drill only*, but good will and harmony prevailed, and duties have been cheerfully and well performed.

The commandant hopes that the sojourn in camp of both officers and men, may prove of much practical utility.

CHATHAM CAMP.

On the 1st September, a Brigade Camp was formed at Chatham for eight days drill, I assumed command of the force, and was present during the whole period of training.

Hereto appended is a statement shewing the actual strength of corps assembled in this camp. (See page 47.)

I applied the orders regulating the annual drill of corps in Special Brigade Camps to this camp as far as possible with much advantage. Even the regulations as to the distribution of rations were applied, the expense of rations, of course, being borne by the militia out of their drill pay in the usual manner.

The daily scale of rations at this camp was somewhat larger than that authorized at special camps, and included milk, butter, rice, at a cost of 30 cents. *versus* 18 cents. at Fredericton Camp,

Quarter-master Gray, 73rd Battalion, acted in the capacity of supply officer with usual credit to himself.

The day of arrival in camp was occupied in pitching tents, constructing cooking places, latrines, &c. In the afternoon, however, some drill was performed.

The Adjutant-General's instructions as to drill and field manœuvres were carried out as fully as possible, considering the limited time in camp (8 days), and considering the time necessarily occupied at gun practice and rifle shooting.

Lieut.-Colonel Iago superintended the drill and practice of both the field and garrison artillery with the best results, as that officer's report clearly shows.

The prescribed course of target was performed under command of the different captains, and, although the shooting was good, I regret that a Musketry Instructor was not available at this camp.

On the 6th September, orders were issued for a field day, which it was intended should be of an interesting and instructive nature, viz. : to defend Chatham from a force supposed to have landed at Black River, and to be advancing by two routes, the Richibucto and Napan Roads. This, however, was prevented by a day of unceasing rain, and the country in that direction being covered with water.

On the 8th, the brigade was formed in line of quarter columns facing the south at two o'clock p.m., and having been marched through Chatham in route marching order, advanced against an imaginary force, part of which had taken up a strong position near the Shore Road from Black Brook, while part had boats in readiness in a place of concealment on the banks of the Miramichie River, either as a means of retreat, or the better to enable them to make a sudden attack upon Chatham. On approaching open country about a mile from town, no time was lost, on our side, in the advance guard being thrown out as a line of skirmishers. This was reinforced, supports sent out, and the infantry having deployed into line, the artillery, both field and garrison batteries, (the latter with 26 pounder guns with drag ropes), supported by infantry, held the left flank on the bank of the river. In this order the line advanced, the skirmishers soon opening fire, and being relieved and reinforced from time to time, the enemy had to fall back, with a view of taking up a position on a neighboring hill, failing which, retired towards the river bank, to take to their boats, upon discovering which the artillery opened fire. The front of our line was then changed, to correspond with the movement of the enemy, whose retreat had now become a complete rout, this was immediately followed up. The field artillery having limbered up, galloped down the Shore Road, and took up a position on the right of our line and opened fire on the enemy while getting into their boats, and on any who might have attempted to escape to an island near the opposite bank. The garrison battery, too, did good service now while posted on the left flank of the infantry line, which also opened fire on the boats by companies volleys.

The days field manœuvres ended the brigade returned in the same order in which it marched from camp. This was a long afternoons march, and the morning had been occupied by drill and target practice, but not a man fell out from the ranks.

The Honorable the Minister of Marine was present on this occasion ; there were also a large number of spectators assembled from all parts of the country.

On the 9th, the force was inspected on the camp grounds, and performed a variety of brigade movements. The prizes for artillery practice and rifle shooting were presented by the Minister of Marine, who expressed his satisfaction at witnessing the interesting field day, and gratified at the entire result of this Brigade Camp so creditable to the Northern Counties. The camp was then broken up in the most orderly manner. The following is my Brigade Order for the occasion. :—

CHATHAM CAMP.

BRIGADE ORDERS BY LIEUT.-COLONEL MAUNSELL, D.A.G. COMMANDING.

8th September, 1871.

(No. 5.)

The force assembled at the Brigade Camp at Chatham, will return to their different local head-quarters to-morrow. The Deputy Adjutant General Commanding, returns his thanks to the officers, non-commissioned officers and men for the manner in which the duties have been performed, which taking into consideration, the limited time in camp, has been all that could be desired. The men conducted themselves very well, except in one instance which was more the result of ignorance than intentional insubordination. The cheerful way in which all have obeyed the order for assembly, at a time when the ripening of the grain has succeeded the hay harvest with unusual rapidity, and when farm laborers are scarce, shows that an excellent spirit pervades the force, and that men are ready and willing to make some sacrifice for their country's good. It is to be hoped, however, that none have serious cause to regret their absence from home. In the artillery, the service and experience of Lieut.-Colonel Iago, as well as the exertions of Instructor Hughes, have been fully appreciated by both the field and garrison batteries. The former battery was reported to have made marvelous progress at the last annual training, still further improvement is now apparent. It is true that Captain Call has failed to secure the same horses as employed last year, the battery, however, on each occasion has been as well horsed as drilled. It is only necessary to say of Captain Gillespie's Garrison Battery that it is in as efficient state as usual, and as regards numerical strength in camp, this battery sets an example which might be followed with advantage by other corps in this district. Lieut.-Colonel Iago reports that the short practice has been carried on correctly, and is quite equal to that of any other artillery in New Brunswick. The rifle practice of infantry, as well as of No. 7 battery of artillery, has been carefully conducted by captains of companies with good results, as the high individual scores fully prove. The regimental system established in the 73rd Battalion by Lieut.-Colonel Ferguson works admirably, and the battalion continues to improve from year to year. The recently organized band of this battalion has already been of much value in fostering "esprit de corps," and materially assisting the marching of the regiment. Gloucester County has been well represented in this camp, the Bathurst Corps may with justice be commended alike for its good conduct and efficiency. It is only right to add that the arrangement made and carried out by Quarter master Gray, 73rd Battalion, for supplying and rationing the troops, have been most satisfactory and reflect much credit upon that officer. In bidding the officers and men a cordial farewell Lieut.-Colonel Maunsell hopes that discipline may be as strictly maintained on the line of march, returning to their homes, as it has been in camp; and he trusts that the instructions imparted at this camp may prove of advantage to the country and service to themselves.

With the new system inaugurated of Brigade Camps of exercise of 16 days duration, it cannot be denied that excellent results have been produced thereby; under the old system officers and men, whether in battalion or isolated companies, however carefully they may have been exercised, too often lost sight of the object for which drill and discipline is intended, they acquired a knowledge of *mere drill* not of field manœuvres, under the new system, however, the *mechanical* operations of the drill room, or parade ground, have been applied to tactics, and "practical field days, varied with sham battles," have been carried on most successfully.

Nor is this all, as I have already stated, "corps assembled for training are taught to vie with others in efficiency, while the advantage of emulation on the part of officers in command will be yearly more and more apparent, and men will look forward to their annual training and the meeting again of old friends with no small degree of pleasure," and, it may be added, the moral effect produced by the presence of an efficient and well disciplined force in the midst of a prosperous community, not burdened by taxation, is of much value in various ways, and shows that there is no intention, either on the part of the Government or the people of this country, of neglecting the "noble art of self-defence;" and as the force of the country is not an expensive standing army, but one the "material interests of which are identical with those of the people," it may naturally be expected to receive the cordial support of the people.

The cheerful manner in which rural corps in general, and those of the 1st Brigade Division of my District, in particular, obeyed the order to join the camps at some sacrifice to individual members, in many instances, is worthy of praise.

The fact, that of the possible 55 men per company, the average attendance of this District is over 50 men per company, speaks for itself.

I may here observe that the Brigade Major, 1st Division, was desirous that every corps in his Division should be ordered to join the Brigade Camp, for 16 days drill, this, however, was impracticable as the authorized quota was limited, and it was decided that Garrison Batteries of Artillery, should this year perform their drill and practice with guns of position at their local head quarters, chiefly seaward Batteries.

In proof of the good spirit pervading the force I may quote the following from a letter published in the "Carleton Sentinel," at the breaking up of "Camp Ross":—

"The inhabitants of Fredericton were surprised to find their streets full of men, in the uniform of soldiers, night after night, and not one case of drunkenness or one disrespect-word from any one,—forgetting that the volunteers are taken from the most respectable class of the community, as well as the most independent one, a very large majority of them being farmers or farmers sons. There were men in the 67th Battalion, getting 50 cents per day, with a soldiers rations, who are worth thousands of dollars; nothing but a sense of duty would make these men leave their comfortable homes and their families to attend camp for the paltry pay of 50 cents per day."

As a contrast to the above, I regret to state that it has been my duty to report respecting one City Battalion, 62nd, and two isolated companies. (Quaco Rifles and Dalhousie Company) having failed to join the Brigade Camps. The former Lieut.-Col., too, had originally applied to have his battalion included in the list of corps ordered to camp.

I regret the circumstances the more, as I had occasion but a short time back to submit a very favorable Report concerning the efficiency of the battalion. I sincerely hope, however, that many officers and men of this corps, may yet avail themselves of the opportunity afforded them by rejoining the force, and that the Battalion may be completely re-organised at an early day.

You are aware of the peculiar difficulty of dovetailing the two elements, city and rural corps, in the same Brigade Camp, in this District, as the time most convenient for the former may not suit the latter, whose seed time and harvest cannot be interfered with, except with individual loss.

When, therefore, arrangements cannot satisfactorily be made for both classes to attend camp at the same time for the whole period of 16 days, I have to suggest that the City Corps of my District be allowed to perform part of their annual drill at their local head quarters and receive pay therefor, and part at camp, and thus they will be prepared to take part in field manoeuvres without much personal sacrifice.

ARTILLERY.

In arranging for the annual training of the N. B. Brigade of Artillery, I submit for your consideration, and that of the Inspector of Artillery, that it is desirable to concentrate the several out-station batteries at St. John, say every alternate year, under the above rule, perhaps the first year. The entire Brigade to go under canvas, and reform its drill and practice at the Seaward Batteries under competent instructors.

The admirable report of Lieut.-Col. Iago, hereto appended, which I respectfully request may be published in the Annual Report, speaks as to "the sound and efficient condition" of the artillery at St. John and in the Northern Counties, so far as seen by that officer, words which may with justice be applied to the remaining batteries in my district: at St. George (two) St. Stephen, St. Andrews and Woodstock. This officer adds that, "though many of the men can claim their discharge this autumn, there is no lack of recruits to take their places, and we may count upon a good body of gunners, both officers and men." The reports of Lieut.-Col. Foster and those of the captains of batteries also point to that satisfactory conclusion. I hope that Lieut.-Col. Iago's suggestions may be favorably considered, especially that respecting the urgent necessity of a school of gunnery being opened in this District. I have already brought this subject to your notice when applying to have an infantry school opened here.

HORSING FIELD BATTERIES.

I fully endorse Lieut.-Col. Iago's opinion on this point, to the effect "that the drivers ought exclusively to be enlisted from the sons of farmers when we might rely on each driver bringing his own pair of horses into camp."

I trust that I may be authorized to form another field battery in my District, there is but one, as you are aware.

ENGINEER COMPANY.

I respectfully recommend that an Engineer company form an integral part of each Brigade Division, resident therein.

The Engineer company at St. John was inspected by the Inspector of Artillery on the 18th July, who expressed himself much pleased at the proficiency displayed by the corps in Infantry drill, but he pointed out the necessity of attending more in future to their important duties as Military Engineers, and being composed of practical men, civil engineers and mechanics, the corps would prove most useful on service.

It is well known that "although a difference exists between civil and military engineering it will be found that much of the science and skill which has been acquired in "the permanent works of peace" will be applicable in their military capacity.

MORE EXTENDED SCALE OF TACTICS.

When corps are undergoing training for a period of not less than 16 days continuous drill, and have made sufficient progress in the present system of field manœuvres, I am of opinion that such system may be applied with advantage to tactics on a more extended scale, by forming two divisions, one side to act on the offensive, the other on the defensive, and moving off from camp for a march of two or three days. Corps to bivouac.

The aptitude of the men for this particular work, as well as the intelligence of the officers, would be developed thereby; and the efficiency of the supply department would be tested in performing the duty of Q. M. G. Department in other armies.

The question, as to the manner of performing annual training, in corps composed mainly of recruits, is one deserving serious consideration; as, to reap full benefit from the period allotted for drill in camp, corps should previously be carefully drilled at their respective head quarters.

I respectfully request that I be authorized to have two Brigade Camps next year, one at Fredericton or Woodstock, the other at Shediac. These places are easy of access, by steamboat and rail, and thus every corps in my district could join a camp, which could not otherwise be accomplished.

In order to ensure a correct muster at the annual drill, to prevent any falsification of accounts or false musters (which I am happy to think have not occurred in this District), I recommend that the muster should be carefully made by the District Paymaster, accompanied by the Deputy Adjutant General and the Brigade Major of the Brigade.

AMALGAMATION OF INDEPENDENT COMPANIES.

Independent companies being practically useless unless drilled in Battalions, I recommend that those in my District be attached to Battalions as follows:

Grand Falls }
Petit Sault } to 67th Battalion.

Deer Island, }
St. Stephen, } to new battalion to be formed in 1st Brigade Division.
Gagetown, }

Bathurst Co. to 73rd Battalion.

I have the honor to be, Sir,

Your most obedient servant,

GEO. J. MAUNSELL, Lieut-Colonel,

Deputy Adjutant General Militia, Military District No. 8.

Colonel P. ROBERTSON ROSS,
Adjutant General.

SAINT JOHN, September 27th, 1871.

SIR,—I have the honor to forward to you my Annual Report of the New Brunswick Artillery, for the present year.

Commencing with the four batteries of Garrison Artillery belonging to the city of St. John and its suburbs, I have much pleasure in reporting that they are in a thoroughly sound and efficient condition. The officers and men are well acquainted with gun drill, and though the manner of it may be somewhat loose, I have no hesitation in affirming that in shot practice with the guns on which they have been accustomed to drill, they could compete and made good scores against any garrison battery in the Royal Artillery. I have also great pleasure in informing you that though many of the men can claim their discharge this autumn, there is no lack of recruits to take their places, and you may, in St. John, count upon a good body of gunners, both officers and men.

In compliance with your order, I joined the eight days' camp, formed at Chatham, and took charge of the drill and instruction of the two batteries of artillery which were present there, viz.: the "Newcastle Field Battery," under Captain Call, and No. 7 Battery of the N. B. Garrison Artillery, under Captain Gillespie. In this duty I was ably assisted by Serjeant Major and Instructor S. Hughes late R.A.

CAPTAIN CALL'S BATTERY.

While I still hold to my opinion that a battery of 9-pounder field guns cannot be of much actual use on service, and also that the drivers ought exclusively to be enlisted from the sons of farmers, when you might rely on each driver bringing his own pair of horses into camp, I cannot help giving great praise to this battery. Owing to the scarcity of horses about Newcastle, Captain Call relied principally on hiring them at Chatham; and though the drivers and horses were perfectly strange to each other, after the second day in camp, everything worked smoothly. The men rapidly improved in driving, and before the close of the camp, were fully able to take their guns into any position where they might be useful. I purposely avoided complex manœuvres, conceiving that the principal duty required from a field battery is the change, with a reasonable degree of rapidity, from one point to another. The horses were certainly not stinted in work, but they looked fully as well on the last day as on the first; and I was also pleased to find that there were no saddle or girthgalls that I could remark. The battery also made some capital shooting at 1,000 yards, at a floating target. Taking into consideration the large amount of Government stores pertaining to a field battery, in the shape of guns, harness, &c., I should recommend that instead of the annual grant to the captain of the battery, a paid resident caretaker should be appointed, who should be accountable for all stores, harness, &c., though at the same time I think that the captain should have a contingent allowance paid to him, in order to provide for small necessities of his battery, such as sponges, soft soap, &c.

CAPTAIN GILLESPIE'S BATTERY.

No. 7 Battery, Garrison Artillery, is numerically very strong, and is, I consider, a most valuable battery. It is armed with two 24-pounder guns, and also two 6-pounders. I beg to recommend to you that a platform be laid for the two former guns, at a point a short distance below Chatham, which we agreed would be the most useful for the defence of the place, the river there being so narrow that shot fired at a low elevation ricocheted invariably to the other bank; and, I should suggest that a small breastwork might be thrown up for the defence of the gunner. These guns ought also to be properly sighted. The shot practice from these guns at a floating target at 1,200 yards, was excellent, although the men had the disadvantage of getting their elevation from the quarter-sight. The two 6-pounders belonging to this battery, by putting strong detachments in the drag-ropes, were useful on the field day under your command, and along ordinary roads

could keep up with infantry, though it is a question if such a large waste of manpower is advisable. In this battery there are also some excellent rifle shots.

In conclusion, I should wish to submit to you the urgent necessity of a school of gunnery being opened in this District. From the time of my appointment, owing to the scarcity of instructors for artillery, I have hitherto striven more to teach the men the practical working of the guns, relying on the Royal Artillery for the filling of shell, fixing fuses, &c. This must now of course be changed, and I see no way in which it can be done without a school of gunnery, in which some officers and men from each battery might get certificates, and act most usefully as instructors in their own batteries. The drill, under these instructors, would tend much to relieve the sameness of the winter evening's drill, and would be of great advantage to the force. Lastly, I beg to bring to your notice the small amount of the artillery in your District on which I have been able to report, and to urge that in future I should accompany you in all inspections of batteries of artillery in the district.

I have the honor to be, Sir,

Your obedient servant,

DARELL K. IAGO, Lt.-Col.,

A. A. G. A.

Lieut.-Col. MAUNSELL,

Deputy Adjutant General, Militia.

MILITARY DISTRICT No. 9.

HEAD QUARTERS.

HALIFAX, NOVA SCOTIA, November, 1871.

SIR,—I have the honor to report as follows :—

The quota of Active Militia men, for Military District No. 9, is 4,284. The nominal strength of corps in the district, as per annexed return, of all ranks, is 4,471.

The number of all ranks, who have performed the annual drill, is 3,823, showing a deficiency of 648, who have not performed drill for 1871-72.

A Brigade Camp was formed at Aylesford, for 16 days drill. Duty details and training were satisfactorily carried out.

The conduct and discipline of the men were very good, as well here as at Lunenburg where an eight days' camp was formed—all mustering being fine strong men—whose behavior and attention to work were remarkably creditable. The particulars of training are in the tabular reports and diaries annexed to them.

Mustering and roll call were conducted according to received orders, and I certify that every man, numbered as in camp, was present.

The rest of the force performed their drill at their company headquarters, those in battalion mustering for review at battalion headquarters.

Companies not attached were inspected at company headquarters, except the Lunenburg artillery and Mahone Bay companies, which marched to Lunenburg for one day's inspection, and joined creditably in the camp review.

By orders received, the 68th, 69th, and 72nd Battalions of Militia, respectively commanded by Lieut.-Col's. Chipman, Starrat and Decie, were brigaded in camp at Aylesford Plains on the 12th September.

Lieut.-Col. Milson, Major of Brigade, had proceeded to the ground and laid out the order of camp—arrangements for supply and transport detained me at head quarters.

I, however, reached the plains before the tents were pitched and found the alignments perfect, being in columns of companies right in front.

Kitchens on the right of central companies ; company officers tents aligned on the

right, and facing their companies ; field and commanding officers tents in the same line, on the reverse flanks of front companies.

The staff tents aligned on the extreme right, facing the reverse flanks of the column, camped in mass.

The staff mustered as follows :—

Lieut.-Col. R. Bligh Sinclair, Deputy Adjutant General Commanding.

Lieut.-Col. T. Milsom, Major of Brigade.

Dr. H. Shaw, M. D., 68th Regiment, P. M. O.

Capt. George Guy, Paymaster.

Lieut. W. Marshall, 69th Regiment, Supply Officer.

Lieut. E. Schaffner, 72nd Regiment, Camp Quarter-master.

Lieut. E. Beckwith, 68th Regiment, Musketry Instructor.

Lieut. Webster, 68th Regiment, Orderly Officer.

As the men arrived, blankets, tents, and straw, were quickly issued. Tents were pitched and all in order with no delay.

Thanks to the promptness and effective management of Mr. Vernon Smith, manager of the Windsor and Annapolis Railway, and the prudent, considerate conduct of the conductors and railway staff under his orders ; the transport service, for both men and stores, was performed with great regularity at the opening of camp, and afterwards, considering the crowded state of the platform, consequent on the men being anxious to see friends, and get letters, great credit is due to the railway operatives that no accident occurred.

I addressed a letter of thanks to Mr. Vernon Smith and his subordinates.

A convenient building and platform was expressly provided at the expense of the R.R. Company.

After muster, which was carefully made by me and the Paymaster according to orders, the officers and men went into quarters, and all was as regular as could be in a first nights camping.

On the following morning the issue of rations commenced, occupying much time ; orders were given to correct this, but not being satisfactorily complied with, were repeated, with an intimation that at a given hour, the store would be closed.

Detail of fatigue rosters to be managed by captains of companies. This made all right, and afterwards issues were completed on an average of 45 minutes, from morning gun fire.

The rations issued by Mr. Barnaby, the contractor, were liberal in supply and superior in quality. The meat was equal to the best in the market. As the staff drew the same rations I can testify to quality. The other particulars of his contract were equally good.

Captain C. Richardson, Garrison Artillery, put his military experience at the disposal of the camp, ensuring a punctual, rapid and correct issue of rations ; he was ably seconded by the Quarter-masters and Mr. Dodge, Mr. Barnaby's attentive and energetic agent.

MEDICAL DEPARTMENT.

Owing to the non-arrival of the medicine chest (since come), I was obliged to authorize the P.M.O. to provide medicines for the sick.

There were few cases reported, among them two accidents. A case of measles broke out, but the judicious and prompt measures taken by Dr. Shaw and his department, prevented the disorder from spreading.

Morning sick reports were regularly sent in.

TRAINING AND DISCIPLINE.

The men rapidly improved in training, arriving at as good a state of efficiency as possible in the period.

Two reviews were held—one each week. At both the troops moved with celerity and precision. At the final review, on the last day, when thousands of spectators from the Bay of Fundy Counties were present, the brigade made an effective military display. Hills, flanking the ground, affording a perfect prospect of the manœuvres.

Much is due to Lieut.-Col. Milsom, having been for a long time Brigade Adjutant in the army, as well as having served as Battalion Adjutant. His professional acquirements in executive field work are very superior, and it was chiefly owing to his knowledge, energy, and precision, that the result of the training was so satisfactory.

The conduct of the men was good. The Reverend Dr. Avery, who kindly officiated for the camps, took occasion on the second Sunday to thank the men on behalf of the neighborhood for their exemplary behaviour. It is most creditable to the men that a few words from me ended any trifling irregularity.

The daily reports prescribed by Regulations were sent in regularly.

Orders were cheerfully and promptly obeyed.

I have the honor to bring Acting Ensign and Adjutant H. E. Reynolds, of the 69th Battalion, to favorable notice, aiding in disciplining guards and sentries; and in any extra brigade duties he was always ready, energetic, able, and to the front!

Mr. Reynolds, from some cause, had not been gazetted, so Captain Guy, the Paymaster, under strict orders received, could not issue his pay. Having well earned it, I recommend early settlement, if in accordance with regulations.

MUSKETRY AND DIARIES OF DRILL,

Of which I append tabular returns.

Comparative musketry returns cannot be made till all returns are in.

The prizes were distributed after the review.

Lieut.-Col. Milsom laid out the butts and firing posts. The ground is dry sand in which the butts were sunk, covered with boards and sand, ensuring perfect safety.

I have to thank the officers commanding battalions, their majors, adjutants, quarter-masters and staff. The Brigade Staff, including the principal medical officer and his department, the supply officer and camp quarter-master, the company officers and all ranks, for prompt obedience of orders, and the consequently highly satisfactory way in which the camp was carried on and concluded.

Supported as I was, duties were easy.

As you inspected the Halifax Militia, and they may not be ready for me, by completing drill in time for report, I venture to suggest that till I inspect the men for payment, your own inspection be taken for official report, to be in time for printing.

ENGINEER CORPS AND FIELD BATTERIES.

A corps of engineers may be raised in Halifax. Colonel Laurie applied for one to be admitted some months ago. I thought it best to file the application till recruiting.

Such a corps, if consisting of good artisans, selected and scientifically commanded, might gain considerable repute.

I recommend the formation of a field battery head-quarters in King County, with a troop of horse attached as guides, or mounted rifles. The guns can be well horsed, and the guides, besides acting as irregular cavalry, could replace casualties at the guns in action. For this service, harness and saddlery would be required, which is also urgently wanted for the Halifax Field Battery. The only suggestion I can make about horzing batteries is to give, a certain annual allowance on approved horses, not to be sold without the commanding officer's permission. Were such allowance sufficient, good riders would be secured as well as horses.

Our quota is 4,284 men, exclusive of officers. Till full returns are in, I cannot state accurately the number wanting to complete.

The proportion will be about the same as at Aylesford Camp, namely, one fourth, so that our present strength will approximate say, to 3,250, exclusive of officers.

About two-thirds of the brigade at Aylesford can claim their discharge, before next training; half the existing force was reported willing to re-engage.

All the captains but one, state they cannot keep up their strength except by ballot, which they recommenced; I will recur to this subject.

Lieut.-Col. Read can amalgamate several companies into battalion on the Bras D'Or; before next training he may be able to raise a battalion in Inverness. His recruiting was closed last time before he could complete—our contingent being raised. I am expecting his report in about a fortnight.

Lieut.-Col. Milsom says he can raise another battalion west of Lunenburg.

Lieut.-Col. Laurie, with Halifax in his district, will have a full quota.

I think before resorting to the ballot the majors of brigade should try to re-inforce the existing weak companies of battalions or brigades by sub-divisions or half companies, of not less than 20 men, under a serjeant and corporal.

In a former despatch I stated absentee casualties were sure to be considerable, which is the case.

If men can be got, companies 80 strong and not less than 70, would economize nearly half the officers pay.

THE BALLOT.

If adopted, a new order of arrangements must meet it. I suggest the best I can for my own District, as I am requested to do.

Say,* 12 muster posts be named for this Province, nominal strength 400 each, allowing a margin for casualties. Companies to be not less than 70 or 80 strong, these would form battalions to be brigaded if convenient; and the posts would be, on an average, about 50 miles apart, except on the line of railway where long distances are of little importance.

If the ballot is to be adopted, all the railway lines in Nova Scotia proper, should be put into one brigade district, not including the *garrison* force in Halifax; and only one or at most two places of muster should be chosen on the lines. In balloting, if deemed necessary, the whole reserve from 18 to any given age should be drawn and rostered for such a number of years as expedient. First drawn, first for service.

The few men living beyond 30 miles from any named muster post, not accessible by rail, to be passed over. Lads under say 5 feet 6 inches, to be rejected.

No substitutes to be allowed; but any man whose turn comes to be exempt from that period of service on paying \$? when the next man on the roster must serve unless he pays too.

The money to be appropriated to the military service of the land.

In my opinion the substitute system would not answer here; it would bring in men of the wrong sort, and demoralize the service, in the ranks of which there are many yeomen and men equal to their own officers in position. It is but just to these men and their comrades that gentlemen declining service on account of important private business, or other reasons, should pay into the military chest in lieu of personal service, not introducing into the ranks a large proportion of men without property or standing.

While the administrative jurisdiction of Brigade Districts may be left alone, I

* Note.—The number of such posts to be reduced afterwards to suit the best mode of centralizing, found to be the most convenient and economical, nine might do instead of twelve.

Halifax would have to be allotted say 2,000 men, chiefly garrison artillery, which would leave say 8 more posts of 285, real strength, but some of these would be in brigade on the railways. 3 posts for each district would be best, say,

1. Halifax, Lunenburg, Barrington, or Pubnico.
2. Aldershot, Aylesford, Shubenacadie, Pictou, R. R.
3. Sydney, Whycomagh, Baddock.
4. Company battalions, 250 real strength, to be exceptionally allowed if wanted.

recommend that the military executive work, such as training and inspection, be carried on with less regard to Brigade District bounds, meaning that I should be able to order any Brigade Major to do any executive work in any Brigade District. For instance: in the case of sickness, or absence on leave, or duty, of any Brigade Major, I may want power to employ another in his District; and besides the present exclusive division of Brigade Districts gives the service too sectional a character.

The camp at Lunenburg was formed on the 11th inst., and broke up on the 19th; tabular returns of particulars are enclosed. On the 12th a hurricane occurred, in a few minutes prostrating all the tents with some loss and damage, the items of which will be duly returned. The men were then quartered in the drill building.

I have little to add to my general report previously rendered.

The Captains all report that they can keep up their strength, the absentees reported were chiefly deep sea fishermen following their pursuit on the banks.

The conduct of the men was exemplary, and the physical appearance of the force is remarkably fine.

There was little sickness, and no reports of misconduct nor any complaints.

The conduct and discipline of all ranks, throughout District No. 2, deserves favorable mention.

I have the honor to be, Sir,
Your obedient servant,
R. B. SINCLAIR,
D.A.G.M., Military District No. 9.

To the Adjutant General of Militia,
Ottawa.

GRAND TRUNK RAILWAY BRIGADE.

MONTREAL, November 22nd, 1871.

Sir,—I have the honor to inform you that I took over the duties of Brigade Major, G. T. R. B., in the early part of December last, and I now send detailed statements of my half-yearly inspections.

The drill instruction for 1870-71, was carried on in the spring of this year, and was principally performed by the fourteen (14) companies in Montreal, in April, May, and June, after the work of the day was over. As you had an opportunity, on two occasions, of seeing this force, on the 1st and 8th July, when we had some 800 men on parade, it will be unnecessary for me to make any remark upon; but Lieut General Sir Hastings Doyle, K. C. B., stated on parade, to Lieut.-Col. Bailey, that the force was a credit to the country and those connected with it.

On the 22nd of May, I inspected the two companies at Brockville, under the command of Major McKenzie, 2nd Battalion G. T. R. B. of Rifles, and on the following days at Kingston, Belleville and Port Hope. The companies at Brockville were well handled by Major McKenzie, and did both company and battalion drill, steadily and creditably. The Kingston and Belleville detachments were not in the same order, but steps have been taken by the commandant that will, I think, insure these being fully up to the remainder.

At Toronto, the 2nd Brigade Artillery, Colonel Spicer, I inspected on the 26th of May, and did not find it in at all an efficient state, partly owing to a portion of the Brigade having been moved to Stratford, large shops having been erected there, and also to the loss of an excellent officer, Major Stephenson, who took great interest in its welfare.

I, however, again saw them on the 5th of October, when they were improving, and new officers have since been gazetted and promoted, we may hope for a better state of things, and the two batteries, Nos. 5 and 6. at Stratford, are now drilling and doing well under Major Patterson.

I inspected the 3rd Battalion of Rifles, under Colonel P. S. Stevenson, at Brantford, on the 28th of May, and also on the 3rd of October. They are in excellent order. The Company, Battalion and Light Infantry drill was well performed; they have a good Band, and the whole is worked up in a most useful force. The target practice of this battalion has been regularly done, and the shooting good. They have a capital range near the station at Brantford, Stratford and Sarnia.

I inspected the companies of the 1st Battalion of Rifles, Colonel Bailey, at Point Levis and Richmond. They are in good order particularly, the one at Point Levis, under Captain Harder.

TARGET PRACTICE AND RANGES.

Target practice has been carried on, with the exception of the artillery, regularly, and I may say all the men have been exercised, though in some companies not through the prescribed course. I trust this will not happen next year, as it is a most necessary part of the militiaman's duty. In most cases we have ranges close to the stations.

The arms and armories, are in most cases in excellent order, and we now have every thing connected with the Government in the armories, with the exception of the clothing.

The Brigade has now three very efficient bands, and two new ones forming at Stratford and Sarnia. These are a source of great pleasure, but the expense is very great, and the government allowance is insufficient; we trust a larger allowance will be granted next year.

The clothing, which has been in wear for over 3 years, is worn out and requires new, with the exception of the great coats which are good in most cases. I invariably asked the men if they had any complaints as regards pay, &c., and through the whole I had no

complaints of any kind. In order to give the officers of the G. T. R. B. a fair chance of passing their examinations, I should recommend Boards of Examination be held twice a year, at Montreal, Toronto and Stratford, on certain dates.

I enclose the present distribution and strength.

Present strength of the above Brigade.

Battalions.	Commanding Officers.	Field and Staff Officers.	Captains.	Lieutenants.	Ensigns.	Non-Commissioned Officers and men.	Total of all ranks.

 APPENDIX No. 3.

RATION RETURN ABSTRACT, CORPS IN BRIGADE CAMP,

Return shewing, 1st The regulations for purchase and issue of rations to corps in camp during the annual drills of 1871-72 ; 2nd, The total quantity of rations issued to each corps present in any camp ; 3rd, The names of the contractors who furnished the articles required for issue as such rations, and 4th.—The price or cost of each article.

SUPPLY REGULATIONS.

When the formation of a Brigade Camp is authorized at any place, the Deputy Adjuant General of the District within which such Brigade Camp may be formed, will call for tenders from tradesmen in the locality by advertisement in some local newspaper, and by causing handbills to be posted at least a month prior to date of assembly in camp, for supplies of food, fuel wood, forage, and straw required for issue during the continuance of the camp. Tenders for approval of the Minister of Militia and Defence, to be sent in on blank forms, with printed conditions thereon, as supplied by the Department—and some known person residing in the locality of the proposed camp should be named in the advertisement and handbills, from whom persons desirous of tendering for supplies may obtain the necessary blank forms to enable them to do so.

Previous to the assembly of the corps in camp a supply officer will be named, who will be under the immediate direction of the officer commanding the camp, and whose duty will be to receive supplies from the several contractors, see that they are strictly in accordance with contract, and, when approved, to issue the same on ration returns, or requisitions to the several corps in camp entitled to receive them. It will also be his duty, immediately after the breaking up of the camp, to make up his accounts of receipts and issues, and certify the accounts of contractors in accordance therewith,—also to send through Officer Commanding Camp for District Paymaster an abstract of receipts and issues, with the original Ration Returns and requisitions, as vouchers for the accounts to be paid.

Rations will be drawn for use by the several Corps upon daily Ration Returns. The necessary printed forms will be supplied by the Department. As cooked rations are to be provided by the several Corps before leaving their homes or Company headquarters for use while travelling to the Camp, the first issue of rations will be made on the morning following the day of arrival of each Corps in Camp.

The daily scale of ration for each Officer, Non-Commissioned Officer and man will be :—

1½	lb.	Bread
1	lb.	Meat
1	lb.	Potatoes
2	oz.	Sugar
½	oz.	Coffee
½	oz.	Tea
½	oz.	Salt
1.36	oz.	Pepper.

The commanding officer of any corps is only allowed to draw rations for the actual number of officers, non-commissioned officers and men of his corps present in camp for the day such rations are required.

The officer commanding the camp will make requisition upon the supply officer, for such rations as may be required for the Brigade Staff doing duty in camp..

The daily supply of rations for battalions to be asked for and received from issuing officer in bulk—the distribution to companies therein will be made by the battalion quarter master.

The same form to be used by troops, batteries and companies, and the Ration Returns, when received by the quarter master from the several companies in battalion, will form the basis for his demand upon the issuing officer for the rations in bulk required for the day for his battalion.

The description of supplies and conditions for their receipt in camp, inspection, issue, and payment will be as under :—

MEAT.

1. The beef shall be ox or heifer ; the mutton shall be wether or ewe. Both to be of the best quality, properly fed, and to be well slaughtered at least 12 hours before the time of issue. The beef to consist of equal proportions of fore and hind quarters; the heads, necks, offal, and the shank for four inches above the knee, and upper hock joint, to be excluded, and none of the suet to be withdrawn. The quarter of beef to weigh not less than 100 lbs. The mutton to be issued in whole carcasses, and the heads, offal, and shanks below the knee and hock-joints to be excluded, and none of the suet or kidneys to be removed. The carcasses of mutton to weigh not less than 32 lbs.

2. The contractor shall deliver the beef or mutton aforesaid at his own expense, into the camp issuing store for inspection, at hours to be appointed by, and on the orders of, the proper officer. The issues to be made in the proportion of five days beef and two days mutton in each week.

3. The contractor must, as directed, cut the meat in pieces of such size as may be required for issue ; and also provide, without charge, suitable weighing scales, for use in camp by the officer appointed to receive and issue rations.

4. As only the number of pounds of meat actually required for issue to the force in camp will be paid for, the charge of any surplus which may have been delivered by the contractor on any day in excess of the quantity actually required for issue that day, must be assumed by such contractor.

BREAD.

1. The bread shall be sweet and wholesome ; to be made of inspected strong superfine fall wheat flour of the best quality, with sound hop and malt yeast ; to be baked on tiles or bricks, without pans or shapes in loaves of 2 lbs weight each. To be 12 hours drawn from the oven before delivery, and to keep sweet and good for 24 hours afterwards.

2. The contractor shall deliver the bread aforesaid at his own expense, at the camp store at hours to be appointed by, and on the orders of the supply officer.

POTATOES.

The potatoes to be of good size, sound and free from decay, and to weigh 60 lbs per bushel.

COFFEE.

The Coffee to be pure, browned and ground, according to sample submitted by the contractor with his tender for the supply, and to be delivered at the camp issuing stores in packages of such weight as may be directed by the supply officer.

TEA.

The Tea to be good and similar in quality to sample submitted by the contractor with his tender for the supply, and to be delivered at the camp issuing stores in packages of such weight as may be directed by the supply officer.

SUGAR.

The sugar to be bright muscovado of good quality, according to sample submitted, and free from adulteration, to be delivered in packages under the same regulations as provided for Coffee and Tea.

SALT AND PEPPER.

The salt to be the ordinary coarse table salt. The pepper to be black, to be free from adulteration, and to be ground. Both salt and pepper to be delivered in packages as provided for coffee, tea, and sugar.

FUEL WOOD.

1. The Fuel wood shall be of good quality, sound, seasoned and sufficiently split, and shall be cut in the winter preceding the first delivery. Logs of a large size with projecting knots, or crooked, raft or drift wood, or wood which appears to have been in the water, shall not be accepted.

2. The Contractors shall deliver the wood at the Camp, at the time appointed, and stack it one cord high for examination and measurement.

3. The Ration of Fuel wood for issue will be one inch Running Measure. Officers Mess, consisting of 8 or more Officers, 12 Rations daily. Officers Mess, of not more than 7 officers, $1\frac{1}{2}$ rations each daily. Non-Commissioned officers and men. Cooking allowance each of $\frac{1}{7}$ of a ration, or 1 ration to 7 men.

FORAGE.

1. The forage shall be of the best quality, good, sweet, dry and clean. The Oats to weigh not less than 36lbs. per minot, or 36lbs. per bushel. The Hay and straw to be sweet and clean, and free from weeds and thistles; the latter to be oaten, wheaten, or rye.

2. The contractor shall deliver the forage at his own expense at the camp forage store at the time appointed by the supply Officer, and maintain therein a reserve equal to one week's supply for the horses in camp. He shall also keep an agent at the camp store to issue the forage as it is required, upon the cheques or orders of the supply officer.

3. The forage to be calculated and issued in rations, consisting of 10lbs. oats, 14lbs. hay, and 4lbs. straw, Extra Forage, which may be required in addition to the rations, shall be calculated at per 100lbs. Each ration of hay and ration of straw to be tied up in separate bundles when issued by contractor.

4. The contractor shall furnish, when required by the supply officer, bran in lieu of oats; in proportion of 14lbs. bran for a ration of oats; but not beyond one ration of bran to each horse per week except for sick horses, for which rations of bran shall be supplied daily by the contractor when required.

STRAW FOR MEN.

1. The straw shall be oaten, clean, dry and free from thistles and weeds. To be delivered in bundles of 15lbs. each at the camp store in such quantities and at such times as may be required.

2. The issue of straw to corps when under canvas will be contingent upon the officer commanding the camp certifying to the issue being necessary.

3. When straw is so required to be issued the scale will be as follows, and not to be exceeded:—15lbs. per man, which is considered sufficient for the whole period of the encampment, whether used in the shape of loose straw, or converted into mats.

4. No straw will be allowed for those tents for which tent flooring is supplied, and tent flooring will not be issued to corps under canvas except when they are encamped in the vicinity of a District store, and there is a supply available for issue.

5. Palliasses will not be supplied to corps under canvas.

CONDITIONS TO BE OBSERVED.

If any contractor shall fail to deliver at the time and place appointed any of the supplies contracted for and required in camp, the supply officer shall, under direction of the commanding officer, forthwith purchase the supplies which may be deficient, and the extra cost, if any, of the articles purchased, shall be deducted from any sums which may become due to such contractor.

The officer commanding may, whenever he deems fit, appoint a board to inspect any supply offered by any contractor for issue, and if the board be of opinion that the supply offered is not of the quality specified in the contract, it shall be rejected, and the supply officer, under direction of the commanding officer, shall, without further appeal, purchase the necessary supply in place of that rejected, to be paid for as provided in the preceding clause.

The value of the several supplies furnished under contract will be paid by the Department of Militia and Defence through the District Paymaster on final completion of contract. Accounts in duplicate must be prepared on the prescribed form, and the receipts of the receiving officer must be attached as vouchers.

Payment will only be made to contractors for the actual quantity issued as rations to corps in camp of such supplies as are contracted for.

W. L. MARSHALL,
Supply Officer Camp at Aylesford.

R. B. SINCLAIR, D. A. G.,
Commanding Camp at Aldershot, Aylesford Plains.

The system adopted for issue of rations to corps in camp is as follows:—The Commanding Officer of each corps makes daily requisition, on form No. 109, or *Daily Ration Return*, for rations for the officers and men of his corps present in camp on that day. This form when filled up is received by the Supply Officer, who thereupon issues the articles demanded, and afterwards compares with parade states received by officer commanding camp, to verify number entitled to rations. If more has been demanded than corps is entitled to receive, the value of the excess is considered an advance in money, and the same is stopped from any payment in money due the corps. The *Daily Ration Returns* received by the Supply Officer are his vouchers for the issues, and are attached as such to the *Battalion Returns*, required to close his accounts with the department.

The *Battalion Return Abstract*, when completed for each corps, shews at a glance the supplies issued each day during the encampments, and the totals being then entered in the *Brigade Returns*, shews in the same way the total supplies issued, the names of contractors, the prices paid, and the total cost.

(Copy of Form.)

N. C. Officers and Men,							
Horses.....							
Total Rations.....							

Commanding.

RECEIVED the above from _____ this _____ day of _____ 187

NOTE.—As cooked rations are to be provided by the several corps before leaving their homes or company head-quarters, for use while travelling to the camp, the first issue of rations will be made on the morning following the day of arrival of each corps in camp.

The Commanding Officer of any corps is only allowed to draw rations for the actual number of Officers, N. C. Officers and Men of his corps, present in camp for the day such rations are required—and the number of Officers, N. C. Officers and men of the corps returned as entitled to rations, must agree with the number as returned with daily state of the corps furnished to the Officer commanding the camp.

The Officer commanding the camp will make requisition upon the Supply Officer, for such rations as may be required for the Brigade Staff doing duty in camp.

The daily supply of rations for Battalions, to be asked for and received from issuing officer in bulk—the distribution to companies therein will be made by the Battalion Quarter Master.

The same forms to be used by Troops, Batteries and Companies, and the Ration Returns when received by the Quarter Master from the several corps in Battalion will form the basis for his demand upon the issuing officer for the rations in bulk, required for the day for his Battalion,

(No. 109.)

Grand Trunk Rail- way Brigade...	Brigade Figure of Merit.....	20.03	Private J. Ferguson.....	49	Company, Battalion and Brigade Prizes.... \$30

* These Companies drilled under two thirds of their strength.

The 1st Battalion Rifles, figure of merit 20.98, was the best shooting Battalion. No. 4 Company (Richmond) 1st Battalion Rifles, figure of merit 27.13 was the best shooting Company, and Private J. Ferguson with a score of 49 was the best shot in Grand Trunk Brigade, at the Annual Drill of 1871-72.

From the above Returns it will be seen that the Province of New Brunswick, figure of merit 14.57, was the best shooting Province. Military District No. 8, figure of merit 14.57, the best shooting District. The Cumberland Provisional Battalion, Military District No. 9, figure of merit 24.11, the best shooting Battalion. No. 7 Company, 66th Battalion, in Military District No. 9, figure of merit 39.16, the best shooting Company, and Private John Parks, No. 6 Company, 31st Battalion, in Military District No. 2, who made 51 marks out of a possible figure of 60, scoring at the 600 yards range 18 marks out of a possible figure of 20, the best shot in the Active Militia of the Dominion at the Annual Drill of 1871-72.

Private John Parks, 31st Battalion, thus winning in addition to the Company, Battalion, and District prizes, the Adjutant General's prize of a silver medal with \$50.

By Command of His Excellency the Governor General

P. ROBERTSON-ROSS, Colonel,

Adjutant-General of Militia,

Canada.

APPENDIX. No. 8.

REPORT OF THE DIRECTOR OF STORES.

DEPARTMENT OF M. & D.,

STORE BRANCH, January 20, 1872.

Sir,—I have the honor to submit, for your information, the following report of the operations of this branch of your department, under my direction, for the past year. The most important being those connected with the various encampments throughout the Dominion—the equipment of the Manitoba Expedition in October last—and the transfer of the Imperial property in New Brunswick, and that at Quebec and Levis, with the forts, armaments, and buildings at those places.

Clothing.

The following Return shows the quantity of clothing in store, at the close of the previous year; the receipts and issues of the past year, with the remains in store at the end of the present year. Large quantities of clothing are now in the course of arrival by each successive steamer from England, to enable me to meet the demands of the incoming year.

ANNUAL RETURN of Clothing in the Dominion Store, at Ottawa, on the 1st January, 1872.

	DISTRIBUTION.

Ammunition.

The ammunition in the different district magazines, as also that in reserve, at the close of the year, is shown in the accompanying return, which also gives the receipts and issues of each district during the year. The balance of the muzzle loading rifle ammunition, amounting to 660,500 rounds, remaining in store at Halifax, was sold in September last to the Government of Prince Edward Island for the sum of \$660. The percussion caps remaining, not being required by that Government, have been destroyed, and the old copper and zinc boxes sold for \$21.

During the year just elapsed, 201,370 rounds of ball ammunition have been sold, for an aggregate amount of \$3,999 05, a sum considerably less than was realized during the year preceding, by the sale of ammunition—the sales of 1870 reaching the gross amount of \$4,783.05. The return of the sales effected will be found in the Appendix. The artillery ammunition sold to the Post Office Department at Ottawa, was for the service of the noon time-gun.

AMMUNITION RETURN, 1871.

„ rifle	1,500	2,000
Haversack, infantry	4,800	
„ rifle	1,400	1,300
Great coat straps, infantry	4,216	
„ rifle	1,482	
Water bottles	644	

Soldiers Kits.

After supplying the Manitoba expedition and the “A.” and “B.” batteries, there now remains in store, of the above, about 3,000, excepting grey flannel shirts and socks, of which the supply is becoming short.

Camp Equipage.

Was issued during the season as usual. Owing to the inauguration of the brigade camp system, a great strain was thrown upon this branch of your department, from its inability to meet the pressing demand made upon it for camp equipage and blankets, that no one district store had the capacity to supply. Consequently, to meet these unexpected demands, the various articles required had to be borrowed from one district to supply the wants of another. To make matters worse, all the brigade camps took place almost simultaneously, or at very short intervals apart. One camp had hardly broken up before another was in course of formation, to which stores had to be forwarded hurriedly to meet its requirements. Delays were frequently unavoidable, and when these occurred, inconvenience was caused, and whenever this happened, dissatisfaction prevailed. Under such system loss was frequent, and the expense of transport great, forming no inconsiderable item of the general camp expenses. In many instances it was a matter of impossibility, properly to assess the camp damages, owing to the hurried manner in which the camp equipage had to be taken over, to enable its being forwarded to the next camp with the shortest possible delay.

Next year the same difficulties will not, I trust, exist to the same extent. An increased quantity of tents and blankets will be available. Part received from the Imperial stores, and another part, consisting of 500 tents and nearly 6,000 blankets, having been received from England since the commencement of the year. These latter are now being distributed to the district stores, in proportions suited to their different anticipated wants. Mess marquees are also being provided, so as to afford suitable mess accommodation for the officers of each battalion. The want of such accommodation last season was very much felt. Next year there will be a sufficiency with the fifty that are to arrive from England, and the twenty-three received from the Imperial stores, to supply each battalion encamped with its own mess tent.

No system, however, can be considered as complete that does not enable each district store to supply the wants of its own district within itself. When one district has to be depleted to supply the wants of another, perhaps hurriedly, and at short notice, loss is sure to ensue, and expense is incurred that would otherwise be avoidable. A glance at the return of camp equipage, which accompanies this, will show to what an extent loss has prevailed during the past year. In addition to the losses specified under their proper headings, I have to report also that no less than 4,204 binding ropes, for tents, valises and tent poles, have been lost or made away with. The reported assessment for camp damages is as follows—How much of it has been recovered I do not know :—

Military District No. 1.....	\$45 19

In store, January 1st, 1872.	23	2,653	2,407	2,775	2,578	118,638	3,313	15,259	495

In addition to the losses noted above, there were two tents and appurtenances lost by the Ottawa Fire Relief Committee, from the number loaned to it the previous year. No payment has been made for these.

Manitoba Expedition.

On the 12th October I received instructions to equip the Expedition that had been then ordered to proceed to Fort Garry, from Thunder Bay, by the Dawson route. No time was to be lost at so late a period of the year, and thanks to the zeal and activity of the Storekeepers concerned, I was enabled to have the whole of the stores required for their equipment, concentrated at Collingwood, on the 20th of the same month, in readiness for the Expedition, which embarked and started for its destination on the following day. This fact is the more remarkable, when it is known, that many articles of the equipment supplied had to be manufactured and forwarded from distant points. As for instance, fur caps and winter mitts at Quebec, undershirts and drawers at Toronto, and various other articles at Montreal. It may be safely asserted that no expedition ever started better supplied in every respect for the long and arduous journey it had before it. Any delay at so late a season of the year might have been productive of most disastrous consequences, and have probably jeopardised its ultimate success.

The provisions necessary to its subsistence, were procured by Mr. R. Jones, of the Pacific Railway Survey, and were provided on a liberal scale, being excellent in quality. Thirty days supply, to go with the Expedition, had been collected at Collingwood, and accompanied it. A further supply for six months, in case of delay, or any unforeseen interruption to the progress of the Expedition, was collected at Thunder Bay, in readiness for any eventuality that might occur.

Early in October, clothing for the artillery detachment and the six rifle companies, then organized in Manitoba, was forwarded, via St. Paul, from Ottawa. The necessary arms and accoutrements being in store at Fort Garry, where they had been returned on the reduction of the permanent force the previous May. A supply for the permanent force, on the demand of Major Irvine, was also forwarded at a later period, as was also the baggage of the officers of the Manitoba Expedition. I am still without information as to the reception of any of the above stores at Fort Garry.

Forts, Armaments and Lands.

On the 9th March, 1871, the storekeeper of New Brunswick, in accordance with instructions previously transmitted him, received over from the Royal Engineer Department, the undermentioned lands, situated at the places stated, viz. :—

	Acs.	Rds.	Ps.
Stone Barracks and Artillery Park, Fredericton	9	2	26
Oromocto	200
Beaver Harbor, east of L'Étang	8
Pomeroy Bridge, Magaguadevic River	6	2	..
St. Andrews and vicinity	34	3	9½
Presqu'isle Military Reserve	676
Grand Falls do	1,548	1	..
Little Falls do	20	3	23
Dalhousie do	18
Fort Cumberland, N. E. Shore, Bay of Fundy	72
Total	2,594	..	21½

The above lands were rented to fourteen tenants, paying an annual rental of \$405 72.

On the following 25th of September, a further surrender of the following properties, situated at St. John, was made : the area, being 38 acres and 2 roods :—

Dorchester Battery, Red Head Battery, Mortar Battery, Carleton Tower and Battery, Negro Point Battery, the Battery on Partridge Island, and Fort Howe.

The armament of these Batteries, with the usual Artillery stores, consists of :—

	{	8 inch	54 cwt.	-	-	-	4
		68 Pr.	98 "	-	-	-	2
Cast iron guns without sights.		32 "	{ 64 "	-	-	-	2
			{ 58 "	-	-	-	8
		24 "	50 "	-	-	-	8
		18 "	38 "	-	-	-	2
	12 "	34 "	-	-	-	1	
Mortar		8 inch	9 "	-	-	-	1
Total							26

On the St John property there were seven tenants, whose annual rental amounts to \$48 80.

On the 26th, 27th and 28th October last, I received over from the Imperial Control Department, the fortifications and armaments of Quebec, the latter consisting as follows, viz :—

Ordnance without sights	{	Carronades.	68 Pr.	36 cwt.	-	-	6	
			32 "	17 "	-	-	28	
			18 "	10 "	-	-	16	
			12 "	6 "	-	-	-	4
		Guns-	8 inch.	65 "	-	-	-	1
			32 Pr.	56 "	-	-	-	28
			24 "	{ 50 "	-	-	-	18
				{ 48 "	-	-	-	32
				{ 20 "	-	-	-	2
			18 "	42 "	-	-	-	9
			12 "	34 "	-	-	-	6
		Howitzer	8 inch.	22 "	-	-	-	6
			5½ "	16 "	-	-	-	4
			13 " L.S.	36 "	-	-	-	3
		Mortars	10inch.S.S.	{ 52 "	-	-	-	4
				{ 47 "	-	-	-	4
			" L.S.	18 "	-	-	-	6
			8 " S.S.	9 "	-	-	-	2
Wrought iron rifled B. L., complete, screw 7 inch, 82 cwt.							2	
Total							181	

With the above armament, was also transferred the ammunition, projectiles, side-arms, and other stores at the time in Royal Artillery charge, 100 rounds, per gun, of ammunition, 50 cartridges filled, and 50 loose powder, and empty flannel cartridges; 100 projectiles for each gun, with an additional 100 for every gun on the river fronts. The equipment for the 7 inch B. L. rifled guns, is just as it came from England, with the ammunition : 300 rounds per gun complete. These latter, and the armament, are a free gift to the Dominion Government.

It was not, however, until the 29th November following, that the complete transfer of the Quebec and Levis property was effected, excepting the Queen's and Dumlin's Wharves, which were retained pending the settlement of the Cataragui Bridge matter at Kingston.

The buildings and lands received at Quebec were, the Jesuit Barracks; the Military Store Offices; the Artillery Park; the Married Quarters, St. John's Glacis; the Military Prison; the Royal Engineer Offices; the Officers' Quarters and Hospital, St. Louis

Street ; and the Commissariat Buildings, Place d'Armes ; several buildings outside the walls ; the Fuel Yard, St. Rochs, and lands on the St. Louis and St. John's roads.

The land given over at Quebec, amounts to A340. 2r. 13p. ; A213. 2r. 29p. of this is freehold ; the balance of A126. 3r. 24p. is leasehold, on a 99 years' lease from the Ursuline Nuns, and those of the Hotel Dieu. The latter being the exercising ground, better known as the Plains of Abraham, and the Nos. 3 and 4 Tower Fields. A Military Reserve, at the Jacques Cartier River, consisting of A38. 0r. 2p., was also handed over.

On the above lands, there are now 33 tenants, paying an aggregate yearly rental of \$2,485.15. For the leasehold property, this Department is now liable to an annual charge of \$551.20.

At Levis, only two of the forts have been handed over : Nos. 2 and 3. No. 1 fort being in an unfinished state, the Royal Engineer Department have retained possession of it until it has been completed. The forts are at present unarmed, but suitable armament is, I understand, to be sent from England for them. The lands given over at this place have an area of A1,252. 2r. 37p., and are at present leased to twelve tenants, who pay an annual rental of \$529.10.

Recapitulation of Lands and Rental.

	A.	r.	p.	\$	cts.
New Brunswick	2,594	0	21½	453	52
Quebec	340	2	13	2,485	22
Jacques Cartier.....	38	0	3	24	65
Levis	1,252	2	37	529	10
Total	4,224	5	34½	3,492	49

Naval Reserves.

In addition to the above lands, I received over at the same time, for the Dominion Government, the following lands in Ontario, forming part of the reserves kept for naval purposes.

In Township of Sherbrooke, County of Haldimand, at or near mouth of Grand River,

	A.	r.	p.
Reserve at the Mouth of the Grand River.....	219	0	0
do at Bartlet Point, do	48	2	32
do at Mohawk Bay, do	20	0	0
S.-E. side of Penetanguishene Harbour.....	389	0	0
Reserve on E. branch of Holland River, County Simcoe :—			
Town plot of Gwilliambury, lots 49 and 50, 51 and 52, W. side of Meadow Street.....	4	0	0
Reserves at Point Peleé, Township of Mersea, County of Essex	3,000	0	0
Lot 13 in 11th Concession, Township of Vespra, County of Simcoe	200	0	0
Lot 1 in 1st Concession of Island St. Joseph, in Lake Huron, with broken point to south of same.....	500	0	0
South half of Lot 6 in 9th Concession of above Island in Milford Haven	106	0	0
Total.....	4,486	2	32

With respect to the above lands, the Royal Engineer Department in handing them over could give me no further information respecting them than is conveyed by the above statement, and a few plans accompanying it.

Reserve Stores.

I also received over at Quebec, from the Control Department, after the transfer of the forts, armament, and lands had been effected, the remaining portion of the free gift and reserve stores, under the previous arrangement entered into with the Imperial Government. These consist of a variety of articles, such as ordnance, ordnance stores, shot, shell, powder, harness, saddlery, &c., &c., too numerous to mention in detail in a report like this. I also received over, the last of the 18 Pr. Batteries complete with its equipment. With the Laboratory Buildings, situated in the Cove Fields, just outside the St. Louis Gate, I received over the whole of the Laboratory stores then in Royal Artillery charge. These were a free gift to the Dominion Government, are of considerable value, and have since then been given over to the charge of the Commandant of the Quebec School of Gunnery. He has also received one complete set of Artillery patterns, those recently in Royal Artillery charge. Another set, belonging to the Military Store Office, remains now in charge of the district storekeeper at Quebec, both sets being included in the free gift stores.

In conclusion, I must again express my acknowledgements to the Officers of the Royal Engineer and Control Departments, for great kindness and courtesy extended to me at all times in the discharge of my duties. Every facility that could be afforded me for their proper performance, was ever most cheerfully accorded, and much valuable information was given to me in matters connected with the lands and stores.

THOS. WILY, Lieut.-Col.,

Director of Stores and Keeper of Militia Properties.

The Honorable

The Minister of Militia and Defence,
Ottawa.
