THE WEST INDIES.

Messrs Edgar Tripp & Co. Port of Spain in their Semi-Monthly Market Report of June 6th, say:—"We have had no arrival of Lumber Stuffs during the fortnight. Nova Scotian White and Spruce Pine Boards continue wanted." Messrs. Gordon Grant & Co. in their Commercial Review of same date state:—"We have no arrivals of Pitch Pine to report but several cargoes are shortly expected which are likely to fill requirements for a time. Handy sized lots of Nova Scotian as well as Spruce command full prices."

CURRENT TRADE CONDITIONS.

ONTARIO.

The lumber situation at the present time is the most peculiar that has been known for many years past. There are a number of causes operating for and against a change in prices. Building operations, except at Ottawa, are proceeding at a much slower rate than was anticipated earlier in the year. The outlook early in the season was very promising, but investors appear to be holding off in consequence of the high price of materials and in the hope that prices may decline. Building operations in the principal cities of the United States, notably Chicago, have largely declined in volume as compared with last year, owing largely to labor disputes and strikes. This condition of affairs is having its effect upon the lumber market tending to weaken prices. The unfavorable outlook for this season's crops, due to the want of rain, is another influence adverse to the maintenance of prices. The demand from the farming community, under favorable conditions, is a large one. If the crops turn out badly projected improvements and repairs will not be undertaken, and there will be in consequence, a considerable falling off from this source. As against these adverse influences there is the fact, already mentioned, that many of the rivers and streams used to float the timber to the mills have, owing to the drought, lessened in volume to such an extent that it is not possible to get the timber out. The Spanish river, for example, is said to be 9 feet lower than in any previous year. The reduction in the cut of the mills this season due to the above circumstance must act as an important factor in maintaining prices, more particularly in view of the fact that stocks in hand at the opening of the season were unusually light. It may possibly be that prices may slightly decline for a time, but manufacturers are reported to be holding out for present figures. The manufacturers of packing boxes are said to be receiving very few orders, the reason for which is not yet apparent. A large amount of red pine boards and deals ranging from one inch and upwards in thickness, and from seven inches and upwards in width are said to have been sold at good prices to British buyers, and this is helping to steady the market.

QUEBEC AND NEW BRUNSWICK.

The export trade continues to be hampered by high freight charges, and shippers are somewhat at a loss to understand

from what direction relief may be expected. The South African war, no doubt created a demand for vessels, but these should now be available for other purposes. Shipments to the United States have fallen off greatly during the present season as compared with last year, and the customs returns for May show that lumber exports from the port of St. John amounted to only \$198,828 as compared with \$424,267 in May 1899. There has, however, been a good demand throughout the season from the United States for spruce boards, for box stuff, prices ranged from \$9 to \$9.50 per thousand feet on the wharf at St. John.

MANITOBA AND BRITISH COLUMBIA.

The outlook for the sale of lumber to the farming community is discouraging, in view of the unfavorable crop conditions at present prevailing throughout Manitoba, and to some extent in the North West Territories also. While reports vary considerably, there is little question that the yield of grain in the North West this season will fall very far below that of recent years. The blow will not fall so heavily upon the farmers as it would have done a few years ago, seeing that they are not entirely dependent, as formerly, upon wheat growing, nevertheless, the shortage will be such as to be severely felt, and will be the means of restricting the use of lumber for improvements. Fortunately, as stated last week, building operations at Winnipeg have been unusually brisk, affording an outlet for a large quantity of lumber. There is no material change in the situation in the province of British Columbia.

The statistics of the Pacific coast shingle industry show that during the first five months of 1900, 900 more cars of shingles were shipped than during the same period of 1899. During the month of May the Canadian Pacific railway is reported to have transported 75 cars of shingles from British Columbia.

UNITED STATES.

There appears to have come a sudden dullness of demand for lumber, the cause, apart from the great falling off in building operations due to labor troubles, is not readily apparent, as business generally seems to be in a satisfactory condition. It is not improbable that already the presidential election may be affecting the situation. It is a well known fact that business conditions are usually seriously disturbed for months previous to the time of the election. Many business men engage in politics at such times, often to the

neglect of their business. The decline in the price of steel is taken as an indication, by some, that lumber prices will decline also. In support of this expectation, wholesalers point to the fact that last year when prices of iron and steel were advancing lumber prices steadily advanced also in sympathy therewith. Against this theory it is contended that lumber is likely to benefit by the increased activity in building operations consequent upon a reduction in prices of iron and steel, which now enter so largely into building construction. The total stocks of lumber in hand throughout the country are said to be below the average. A circular, issued by the Mississippi Valley Lumbermen's Association, calls attention to the fact that about twenty-five of the large mills on the Mississippi river and its tributaries have already closed down on account of the shortage of logs, due to the lowering of the water in the rivers. The circular says: "The lumber cut of the season is already greatly reduced and cannot be made up, even though heavy rains may fall soon. The rivers are falling an inch and more every day. These conditions must be reckoned with sooner or later, and are sure to exert a decided influence on the market. The shortage of logs and lumber precludes the possibility of lower values in 1900."

Prices of hardwood have declined somewhat compared with last winter. The cut is said to be heavier than last year and the supply fully equals the demand. Red cedar shingles have also declined somewhat in the Boston market, while prices of New Brunswick shingles have gone up a little.

GREAT BRITAIN.

Trade has been temporarily at a standstill owing to the holidays and rejoicings consequent upon the success of the British arms in South Africa. The market shows no sign of weakening however, and no change in values is looked for before the termination of the war, when it is not improbable that prices of deals and battens may advance in response to the expected demand from the Cape for material for the building of barracks and many other purposes. There is no present disposition manifested by importers to anticipate such an advance.

Considerable shipments of red pine boards and deals have been made this year by some Canadian manufacturers and it is becoming more clearly evident that a large and profitable demand is springing up in this market for this class of timber. The demand was heretofore supplied with Swedish goods, but the supply from this quarter, particularly of the larger sizes, is constantly diminishing, while prices have advanced more than 25 per cent. in consequence, and even higher figures are likely to rule before the close of the season. There is therefore an opportunity for Canada to do a profitable trade in this class of timber. The difficulty of securing tonnage and the excessive freight charges is restricting importations to very moderate dimensions. A couple of cargoes of St. John spruce is reported to have been sold at Bristol the other day at £7 15s. c. i. f., which standard it is believed will be maintained under present conditions. According to the brokers' returns the import of spruce at Liverpool for the month of May, was only 1,520 standards, as against 11,588 standards for the same month last year.

STOCKS AND PRICES.

Mr. John Kilburn has brought down a drive of 10,000,000 feet of logs from Quebec to St. John.

The rafting of the logs to the St. John, N. B., mills is said to be progressing more satisfactory of late.

Messrs. Toner & Gregory, of Collingwood, are manufacturing 8,000,000 feet of red pine deals for export.

Common pine plank 4, 6 and 8 inches wide, recently sold at Huntsville at \$13, 10 inch at \$14, and 12 inch at \$15.

Some of the best selling hardwood are reported to have dropped \$2 per M. in price during the last three weeks.

Mr. T. G. McMullen, of Ryans Creek, Hants county, Nova Scotia, will finish in about a month a cut of 800,000 feet.

Owners of the mills on the line of the Kingston and Pembroke railroad are said to be obliged, such is the demand, to ship lumber green.

A correspondent writes that he has American orders for large quantities of birch, but the prices asked by the manufacturers on the Georgian Bay are too high to warrant purchasing. He would be willing to pay \$16 for selects and \$11 for lower grades, but \$20 and \$14 are demanded. He estimates that the stock of birch in the Georgian Bay district will reach 16,000,000 feet, and that it will not pass out of the owners' hands unless more moderate prices are accepted.

THE BOSTON MARKET.

We quote the following from the Boston Herald: The spruce lumber market has received a setback in that the combination has put down prices about \$2 per 1,000. This has really alarmed the trade, and resulted in no business. The verdict is that prices ought to have been put down early in April, and then building would have been encouraged.

Users of spruce lumber say that to put down prices not that building has been almost entirely stopped by high prices, simply amounts to killing what little trade there is. The new agreement prices are:

10 and 12 in. dimensions.....	\$17.00
9 in. and under	15.00
10 and 12 in. and under	16.50

Laths are easy: 1 1/2 inch, \$3; 1 1/4 inch, \$2.85.

BARBADOES MARKET.

Messrs. Musson, Son & Co. report: There has been one arrival of spruce, the cargo reported by us as sold at \$22 to arrive. In white pine there has been no arrivals, and nothing further reported since the cargo contracted for at \$24.50 shipping, \$20 seconds. In pitch pine no further transactions; there is a cargo on the way to our consignment. There is nothing new to report in shingles, shooks or woodhoops.

Messrs. Clairemont, Mann & Co. report: Both white pine and spruce are in great demand, as our yards are very bare of both kinds, particularly spruce, for which there is always a good demand during our reaping season. There has been one arrival with spruce, sold to arrive at \$22 round. We also note the sale to arrive, of a cargo of white pine, at \$24.50 round for first quality, and \$20 for second quality. No arrival with pitch pine for some time, and it is now very much wanted.

Shingles—Gaspe cedar, in supply, and market dull—there is a large lot in store unsold, principally small, for which \$3.75 per M is asked, but less would be accepted to make a sale. No late arrivals of laying shingles. June 5th: Schr. "P. A. Rice," from Church Point, N.S., with 145 M feet spruce—Sold to arrive at \$22 round.

SHIPPING MATTERS.

Shipments of lumber, lath, shingles and telegraph poles are heavy at present from Deseronto, Ont.

Barkentine Antilla, which sailed from Bantry the other day, goes to Yarmouth to take in lumber for Buenos Ayres at \$11, or if Rosario \$12.

The steamer Bridgewater is discharging a large quantity of pulp at Central wharf, Halifax, for shipment by the steamer Shelldrake, which will be due from Brennan next week.

The British barque Lakemba of Glasgow and the American barque Sonoma are loading a cargo of lumber at the Hastings mill, Vancouver. The former is receiving a general overhauling and is being repainted.
