NEW UP-TO-DATE PLANING MILL AND
saw and door factory—75 horse power
engine, railroad siding to mill, A stand; plant
suitable for manufacturing other lines if wanted.
For further particulars apply to T. B. E., care of
CANADA LUMBERMAN.

**Valuable Lumber
Business and Limits
For Sale by Tender**

In order to wind up the lumber business car-
ried on by the late John MacLaren at East Tem-
pleton, Ont., the Executors of his Estate invite
tenders for the purchase of the said business
as a going concern, including the timber limits
and houses, plant, supplies, logs that have been
left over on their way to the mills after the
season's cutting, real estate, saw mills, lumber
yard, wharves, etc.

Tenders to be in writing, and to be in the
hands of the Executors at their head office at
Brockville not later than the 15th of September
next and to be addressed "The Executors of
the Estate of the late John MacLaren, Brockville,
Ontario." Full particulars will be furnished in-
tending purchasers on application to the Brock-
ville office.

The highest or any tender will not necessarily
be accepted.

Dated at Brockville the Fourth Day of August
1904.

**EMMA MACLAREN
WM. C. MACLAREN
J. E. VALLILIE**

Executors of the Estate of
the late John MacLaren.

Log driving on the St. Mary's and
Kootenay rivers, in British Columbia,
came to an end last week. The Crow's
Nest Pass Lumber Company have
5,000,000 feet in their booms at Wardner,
and the Moyie Lumber Company have
landed nearly 8,000,000 feet of logs in
Moyie Lake.

CURRENT TRADE CONDITIONS.

ONTARIO.

Opinions as to the condition of the lum-
ber market are not universally favorable.
The stock of unsold lumber at the mills is
no doubt larger than at the same time one
year ago, and the movement at the present
time does not indicate that the full con-
sumption will be unusually large. A good
trade is promised in most of the cities,
where building is active, but the purchas-
ing power of the farming community may
be curtailed by a depreciation in the grain
yield. There is still a tendency on the part
of manufacturers to shade some grades of
lumber. Common white pine is holding its
own, but all above that grade can usually
be purchased at concessions from the prices
ruling a month ago. Marked weakness
is not anticipated, for the reason that,
even if demand should be disappointing,
the market will be held steady by the
prevailing disposition to curtail the log
production next winter. A meeting of
lumbermen was recently held at Sudbury
to consider the extent of the output and
wages to be paid. Several operators
stated that they purposed curtailing their
output, one of them to the extent of
15,000,000 feet.

In hemlock the tone is stronger than in
pine. Some manufacturers have advanc-
ed the price of inch stock fifty cents.
Hardwoods are moving only moderately,
but as the stock is not large there should
be no difficulty in marketing it.

QUEBEC AND NEW BRUNSWICK.

Nothing has transpired during the past
week to cause increased activity in spruce
lumber, orders continuing of a hand-to-
mouth character. However, the probabili-
ty that the corporation drive of logs on
the St. John river may be hung up has
created a better feeling among holders of
lumber. The contractor is meeting with
much difficulty and is said to be desirous
of abandoning the logs. At the annual sale
of unmarked and mixed logs of the Fred-
erickton Boom Company held last week,
the prices realized were high when com-
pared with the price of deals. Spruce
brought \$11.10 per thousand feet, pine
\$7, cedar \$6.90, and hemlock \$3.75. The
outlook for New Brunswick cedar shingles
is still discouraging, as there seems to be

a considerable quantity offering at the
prevailing low prices.

UNITED STATES.

Yellow pine lumber shows a pronounced
improvement, the curtailment of production
having caused a revival of demand and an ad-
vance in prices. Dealers realize that the mar-
ket is hardening and that the likelihood is that
there will be a further advance as soon as the
fall movement commences. This improve-
ment has been reflected in white pine, which
is showing a little more activity. It is claimed
that the stock of white pine lumber at the mill
is exceptionally light, and with the guarantee
that there will be no accumulation, the natural
tendency of price is to harden. This is par-
ticularly true in respect to the lower grades,
any sluggishness which prevails being con-
fined to the better qualities. There is still a
liberal demand for box lumber and prices
promise to be strong throughout the fall
months. Hemlock prices at Buffalo are re-
ported stronger than they were, influenced by
the prospect of a light cut for next season.
Random cargoes of spruce are easier, while
ordered cargoes are practically at the same
level. There is no increase in the consump-
tion of hardwoods, trade generally being back-
ward. House finish is responsible for a con-
siderable demand for such lumber as is suitable
for that purpose. Birch and ash are among
the leaders in the general demand, but in all
departments there is room for improvement.
Lath and shingle prices have been sustained

GREAT BRITAIN.

Although some confidence is expressed in a
stronger market, the transactions which are
taking place bear little evidence of an early
improvement. The stocks are still too heavy
for the good of the trade and many holders
are showing increased anxiety to close con-
tracts. Even pine deals have been imported
in excess of the consumption, with the result
that the supply at the leading ports is larger
than one month ago. The Liverpool stock is
12,080 standards as compared with 9,430
standards at corresponding time last year and
11,170 standards in 1902. New Brunswick
and Nova Scotia spruce deals are held in
stock to the extent of 11,240 standards,
which is not an excessive quantity when
compared with 10,890 standards in 1903 and
15,640 standards in 1902. Best first quality
pine deals are worth about \$160 per standard;
11 inch, \$145; second quality pine deals, 11
inches and up \$85 per standard; third quality

pine deals, 11 inches and up, \$60. Red pine
deals bring about \$50 per standard for 9 and
11 inch and \$40 for narrows. Wancy and
square pine and elm are considered good pro-
perty, as it is expected that the supply will be
inadequate to meet the demand. Oak is
quiet and is giving holders some concern.

STOCKS AND PRICES.

The steamer Stentor has loaded 175,000
feet of lumber at Sayward's mill,
Victoria, B.C., for Hong Kong.

The St. Catharines Wood & Lumber
Company are operating in the vicinity of
North Bay, Ont., getting out pulp wood.

The official report shows that 37,000,000
feet of lumber was used in the vicin-
ity of Calgary, N.W.T., during the year
ending June 30th, 1904. 20,000,000 feet
was brought in from British Columbia and
the balance was manufactured locally.

The annual sale of unmarked and
mixed logs of the Frederickton Boom Com-
pany was held at the office of A. F. Ran-
dolph & Sons, Frederickton, N. B., on
August 11, and was characterized by
lively bidding and good prices. The pur-
chasers were as follows: Hemlock, \$3.75;
Hilyard Bros.; cedar, \$6.90, Hilyard
Bros.; pine, \$7.00, T. E. Habbit & Sons,
spruce, \$11.10, (battens, 2-3 price), Chas.
Miller.

Following is a comparative statement
of timber, etc., measured and culled at
Quebec up to August 3rd, as furnished
by the Supervisor of Cullers:

	1902	1903	1904
	Cu Ft	Cu Ft	Cu Ft
Wancy White Pine	1,519,699	1,083,440	1,484,270
White Pine	297,570	198,420	148,160
Red Pine	59,947	34,000	2,900
Oak	505,743	494,040	157,840
Elm	537,884	374,280	200,680
Ash	68,438	50,760	14,160
Butternut			40
Birch and Maple	90,410	189,560	114,660

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN)

OTTAWA, AUG. 10th, 1904. - At no time during the past year was the lumber business so slack as it is at present. Shipments by rail and water alike have fallen off. The British market is receiving little or nothing, and the movement of stuff to the States is no better.

In the face of this depression, however, prices hold firm, manufacturers evidently having confidence in the future. Of course, the firmness of the Ottawa market is in a large measure due to the fact that most of the stuff being turned out at the mills changed hands some time back at the advanced prices. Thus the manufacturers need no concern, while the dealers are determined to get their own out of their lumber.

In a month's time most of the present season's cut will be on the market, and the increase in purchasable stock may have a depressing effect on prices, unless business picks up.

Discussing market conditions in the Ottawa district a local lumberman said: "Prices are firm and ready stocks light. The market may be expected to right itself. If a man had lumber which he desired to realize on immediately, he would probably have to shave prices

some to find a purchaser, otherwise there would be no decline. The stock is needed and no one is going to sacrifice it."

In some circles it is believed that lumber will not shake off the present lethargy until the steel and iron commodities in the States brighten up. The textile strikes in the New England States and the latest builders' strike in New York City are viewed with considerable apprehension in Ottawa lumber circles, as interfering elements in business.

The writer while in Pembroke a few days ago, made enquiries in lumber circles. The outlook up the line is not considered any too rosy and it is even thought that there will be a drop of stuff on the market this fall.

The movement of the logs on the Ottawa river is causing all kinds of discussion these days. Reference was made lately to the breaking of the Des Joachim boom above Pembroke, whereby over 300,000 logs and pieces of pulpwood were liberated. To prevent a recurrence of the break, a temporary boom was placed the entire width of the river about twenty miles farther up at a point known as Rock Captaiae. The logs, pulpwood, etc., jammed up behind it for a distance of four miles. The temporary boom went smash and the logs and pulpwood, var-

iously estimated at from 700,000 to 1,000,000, were liberated. The river for twenty miles is full of the stuff and fears are entertained for the safety of the Des Joachim boom. Officers of the Upper Ottawa Improvement Company in charge of the handling of the logs state that the work is being done as well as can be expected considering the unprecedented high water and record rush of logs.

The sudden death of Mr. Alex. Lumsden, ex M.L.A., was a serious loss to the lumbering and other interests of the Temiskaming district, and in fact the whole Ottawa country, including the city itself. Mr. Lumsden's mills and limits in the Temiskaming country were estimated to be worth over a million dollars. Until a couple of years ago he had charge of all the log driving on the Temiskaming.

A curtailment in the log cut may be looked for in the Ottawa as in other districts, this coming fall and winter. The depression in the British market and the seeming uncertainty of the American market have prompted a curtailment on the part of some operators. The free movement of logs this summer also makes it unnecessary to cut so extensively. The production of square timber, on account of the slackness of the English market, will also show a marked decrease.
