We don't ask you to encourage home industry,—we ask you to see the quality of goods we manufacture and get our quotations. Goods manufactured by us are considered High-Grade in the leading cities of Canada. Foreign woods imported direct from the south.

MAIL ORDERS

We solicit mail orders, which receive our personal attention. The length of time taken to fill orders is governed very largely by how busy we are in the department of our factory in which the particular goods are made. While we have exceptional facilities for promptly turning out goods, it is important to place orders as far ahead as possible. Orders are filled by us in the rotation in which they are received, and customers can always depend on our doing everything in reason to give prompt despatch.

MEETING OF TOWN COUNCIL ON TUESDAY

Matter of Bridge across Restigouche Taken up and will be Pushed Forward.

SMALL ATTENDANCE

Meeting of the Town Council was held on Tuesday evening. His Worship Mayor Murray presiding. Present were councillors Alexander, Miller, Sanson, Lunan and White. Minutes of previous meeting were read and confirmed. Communications were received from W. H. Babcock and Jas. Boudreau making application for vacant position on Police force. Referred to Police and committee. Petition received from Celestine LeBlanc making application for licence to do business on Sugar Loaf Street. Referred to Police and License committee.

His Worship Mayor Murray introduced a copy of memorial regarding a bridge across the river, which was passed by Bonaventure County Council at its last sitting, and after discussion by the Councillors who were all in favor of the project it was decided that a memorial be prepared for the signatures of the Town Council, Board of Trade and citizens at large for submission to the Minister of Public Works.

The following reports recommending payment of accounts from the various committees were received and adopted. Councillor White from Fire protection committee \$1442.25, Councillor Sanson from Public Charities \$18.00, Miller from Finance committee \$49.65, Alexander, Water and Sewerage, \$328.26. Councillor White in a further report from the fire protection committee recommended that Wm. Noble's increase be not granted. Report was received and adopted. Councillor Lunan from Police and License committee submitted report recommending that Jas. Boudreau be appointed policeman on one month's trial. Above report was received and adopted.

Some discussion ensued on the cleaning up of premises around the town, and the clerk was instructed to write to the Board of School Trustees asking them to have the school grounds cleaned up and the shack removed from there as soon as possible. The matter of a new sewer on Sugar Loaf Street of the Pichette property was then brought up and the Water and Sewerage committee were instructed to call for tenders for the laying of this sewerage. Mr. Pichette to pay one-third of the costs. The Water and Sewerage committee were authorized to purchase ten hydrants.

Councillor Lunan from Police and License committee submitted report recommending that license be granted J. I. Boudreau four pool tables and A. J. Arsenau trucking license. In the absence of councillor Blomath Councillor Miller from Public Property and streets committee submitted report recommending that permission be granted to the Imperial Oil Company for a siding crossing Chapel St. on condition that the I. C. R., properly grade the street after their work is done to the satisfaction of the street committee.

The Special business of the meeting was to receive the appropriations for the ensuing year from the various committees, but as the school appropriation had not been received the matter was held over until next meeting. Council then adjourned.

DEATH OF MRS. DAMBOISE

There passed away on the first day of June, Elizabeth, the beloved wife of Joseph Damboise. Deceased had been in Hotel Dieu Hospital 10 weeks for treatment, and all during her illness showed a resigned spirit. Mrs. Damboise was the daughter of John Pella, Novelle, and she leaves to mourn her loss her husband and one son, June Ed., and was largely attended, all classes turning out to pay their tribute to her memory. The burial mass was read by Rev. Father Wallace. The Graphic joins in the sympathy of all which is extended to Mr. Damboise.

SATURDAY DISCOUNT

On Saturday June 15th I will give a special discount of ten per cent. off of all dry goods, ladies garments and boots and shoes.

S. M. MOORES

NOMINATION DAY AT DALHOUSIE ON THURSDAY DRAWS GOOD CROWD

C. H. Labllois, A. E. G. McKenzie in the Interests of the Liberal Party and D. A. Stewart and Arthur Culligan for the Conservatives are Nominated.

SPEAKERS GET GOOD HEARING

Nomination proceedings were held at Dalhousie yesterday before Sheriff Stewart in the court house. A large representation of voters attended and were greater with fine weather. At twelve noon the nominations were closed and the Sheriff as returning officer announced that the names of Chas. H. Labllois, and A. Ernest G. McKenzie had been nominated as candidates in the liberal interest, and David A. Stewart and Arthur J. Culligan as candidates in the conservative interest.

The names on the nomination papers of Chas. H. Labllois and A. Ernest G. McKenzie were as follows:—

Nominations

C. H. LABILLOIS.
Ed. Alexander, S. M. Moores, W. H. Miller, M. P. Moores, W. A. Trieman, L. Cantin, John Dickie, Wm. Storey, G. Vermette, E. A. LaGallais, J. B. Wagner, Aug. Martin, M. D. Neil Smith, N. Levesque, A. Dittie, Aurelle LaCasse, J. P. Dittie, L. G. Pinault, M. D. F. Levesque, J. Paradis, J. J. McIntyre, W. J. Smith, L. Blanchard, Aime LaCasse, J. P. LaCasse, R. Cullen, A. C. Bellefleur, R. Vermette, John Kerr, Jas. White.

The names of the nominators of

ARTHUR J. CULLIGAN

D. Ellsworth, R. B. McBeath, John LeTourneau, A. E. G. McKenzie, Isaac Boudreau, F. Sullivan, F. G. Kerr, T. J. McDevitt, J. R. Sharp, Ben Windsor, D. E. Richard, Jas. P. Jardine, M. M. Mowat, O. Smith, W. S. Richards, H. S. Alexander, P. Jamieson, D. Crowley, R. Dawson, J. A. O'Keefe, C. Lutz, Geo. St. Onge, A. J. Melanson, D. McAllister, C. W. Miller, W. S. Montgomery, Jas. Millan, D. McDonald, E. R. Gaudet, H. A. Guigard.

On resumption of the court Sheriff Stewart was called to take the chair and called on the first speaker Hon. C. H. Labllois who was received with cheering. He said that having been nominated at a convention in Campbellton he again appeared before the electors asking for their continued support. Having been the unanimous choice of the liberal electors, he was glad to go forward knowing that he had the support of many of his Conservative friends. He pointed out to the electors that he was the only representative of the old administration which had been slandered by the Conservative press, and would show that the present administration of the province was the most corrupt that had ever existed.

To make his points clear Mr. Labllois went over the records of the government's previous to 1888 when the old Conservative party gave away 1,647,772 acres of crown lands which today would be worth \$6,000,000. They sold 218,669 acres of crown lands at 50 and 80 cents per acre which today would be worth \$654,207.

Now what had the Flemming Government done? They promised an agricultural policy and to improve the roads, and had a increased revenue of \$130,000 after the 3rd March 1908 to work on. They refuted the Central Railway to the C. P. R. at half its value which last year was in debt \$600,000. They rented the Iron Mines of Gloucester Co., to the Drummond Co., at the ridiculous figure of 5c. per ton for a period 999 years when these mines are of untold wealth. That act alone should be sufficient to turn out the Flemming Government. Mr. Labllois scored the Hon. John Morrisey for his neglect of Public Works, especially the need of repairs to public bridges. Mr. Labllois read his questions which he put to the minister of Public Works and his answers there to, which showed that no bridges had been painted since March 1909, and no examination had ever been made on any of the bridges. No appropriation had ever been made for painting the bridges. Mr. Labllois called the Hon. John a hypocrite by saying he had no money to spend on public works but could spend his money in

paying for wharves and bridges in Kent Co., on the eve of the Dominion election, to the amount of nearly \$35,000. He scored the government for this agricultural policy quoting the report of the government which showed the cost of the department to be \$7,896.51. The report of the commission showed that the sum of \$1000 was paid in advance for printing of the report, and all that Dr. Landry was able to do was to appoint a barber to be a poultry inspector, which was all that could be should for the expenditure of over \$7000.

Mr. Labllois spoke on the lumber policy noting the small size of lumber now allowed to be cut. The lack of game and fish protection also was touched upon the speaker stating that this was the great attraction of New Brunswick, and at present was being ruined through the non-observance of the game law.

Mr. Labllois spoke of his record of thirty years service and read the charges which had been made against him, showing that these were absolutely false, and explaining his position clearly to the electors, and showed that although he had made mistakes, but had always tried to do his duty and his work was before them. Mr. Labllois said Mr. A. B. Copp is asking the support of the electors for a platform which would be issued through the press.

Farming and laboring men will be greatly benefited by the granting of farm loans and assistance in various ways, at low rates of interest. A rural telephone system will be installed by the Government. He, the speaker, prophesied that even the leader of the government himself would be defeated, as the people were beginning to see that the Hon. Mr. Flemming was tied hand and foot to the C. P. R. He spoke of the fishery combine with regard to the oysters and clams on the shores of N. B. and said that the people would not stand for their rights to be taken from them, for their exploitation by any one man. In conclusion, Mr. Labllois asked for a renewal of their confidence for the work he had already done, and for the love of the work for the benefit of the county, and asked for the votes of the electors for himself and Mr. A. E. G. McKenzie. He asked the electors to vote the straight ticket and no plumpers. He appealed to the French voters to remember that he was anxious for them to vote McKenzie and Labllois. Mr. Labllois was given a splendid hearing and at the close of his address which lasted over an hour was accorded an ovation.

Mr. Culligan was the next speaker who was given a good reception. He said that having been the unanimous choice of the conservative convention. He said that if returned he would pay special attention to the roads and bridges. He said a grave mistake would be made if the present government were not returned. Revenue of stampage had increased nearly double. School books were now cheaper. The government had built the Valley Road, and had now 2000 men employed on the road. With regard to the mines he said that the old government had never done anything towards developing the mines. Mr. Culligan said that although he was not a speaker he felt that he was quite able to look after the needs of the county. Contradicting Mr. Labllois he read a statement of the amount of money spent during the last government term. He concluded asking for their votes for Mr. Stewart and himself.

Mr. A. E. G. McKenzie was the next speaker who said that the relations of the candidates were always cordial, but that if they criticised the works of the old liberal government they must expect criticism.

He spoke first of the mines in Glos. Co., given by the Flemming government to the Drummond people. According to the agreement the charge payable to the province should have been \$7500 whereas according to the report only \$1650

TWO MEN AND HORSES DROWNED

Fording river at Flatlands When Caught in Current and Swept Under Logs

BODIES RECOVERED

A sad drowning accident at Flatlands last Saturday whereby two young unmarried men named Montgomery and Chambers lost their lives. The men who were in the employ of Robert Sinclair, Kempt Road were fording the river between the islands and a log striking the horses they were riding knocked them off their feet. The swift current carried them down under the logs which were jammed further down the stream, and both men and horses were drowned. The bodies were recovered this week one on Tuesday the other on Thursday.

was paid last year by these people. The speaker dwelt at length on the operation of the Highway Act quoting from the county reports showing that the sum expended on the roads were not tabulated but put all in a slumps and yet according to Mr. Culligan the roads were not in a good condition. He charged the government with extravagance showing that they promised in 1908 to keep the expenditure within the revenue whereas during the last four years they had an increased public debt of over \$1,000,000. He claimed the county of Restigouche had been neglected during the last four years in the fact that out of \$367,000 collected for stampage Restigouche paid \$15,000, out of \$81,000 mileage Restigouche had \$17,000 and from \$16,000 paid for Fisheries the county paid the enormous sum \$12,000. Mr. McKenzie went on to deal with the agricultural policy, the audit act and the Flemming government's railway policy and made a good impression. He concluded by asking the support of the electors for himself and Mr. Labllois.

Mr. D. A. Stewart was then called and although he claimed he was not a public speaker got a good hearing. Mr. Stewart said he had been selected as one of the candidates in the interests of the Flemming government and considered he knew the needs of the county as well as anyone. He said the county had had no representation during the last four years, and thought it was time for a change. He spoke of the grant given from the Federal and provincial governments, and explained the condition of affairs regarding the repairs of the dredge which has been talked of a good deal in Campbellton. He said the Liberals candidates seem much disturbed over the money which they claim was being disbursed at this election, perhaps owing to the fact that they had not the money to spend they used to have. Mr. Labllois appealed to the elector to renew their confidence in him but the young men were confident the Flemming government would be returned and Stewart and Culligan elected. He concluded by asking their support on June 20th, for himself and Mr. Culligan.

Mr. A. T. LeBlanc who was next speaker early caught the humour of his audience and kept their attention well while he pounded the acts of the Flemming government to pieces. Mr. Stewart had said that the speaker had not made much impression in the Tobique. "May be not" said Mr. LeBlanc "but it seems to have made a mighty big impression on Mr. Stewart." Great laughter.

Mr. LeBlanc told a little story of a very parsimonious widower who wished to erect a monument to the memory of his wife. He called on the sculptor who said that the cost of the monuments varied with their size and the parsimonious widower arranged to have a very small narrow stone made, which the sculptor did. And then came the inscription.

Yes just something short. The wording was to be "Lord she is Thine," at so much a letter, but when the letters were being cut on the stone, it was found that the stone was so narrow the final E in Thine could not be put on and the inscription read "Lord, she is Thin." Amid great laughter Mr. LeBlanc said this was the state of the agricultural policy of Dr. Landry "very thin," and the speaker was repeatedly cheered as he drove home.

J. BRUCE ISMAY HAS TO ANSWER

Incidents in the Titanic Investigation at London.

J. Bruce Ismay told the British court of inquiry that it had been planned to drive the Titanic at full speed, during a few favorable hours of her maiden trip, and that he considered Captain Smith fully justified in going at full speed through the ice region, so long as weather conditions made it possible to see ice ahead.

Lord Mersey, the head of the court, re-entitled the question whether the witness thought the captain justified in his action, adding "At either day or night."

He told the court that the chief engineer had arranged before the steamer left Queens-town for New York, that the weather being favorable on either Monday or Tuesday, the vessel would be driven at full speed for a few hours.

Attorney General Sir Rufus Isaacs, who was examining the president of the International Mercantile Marine Company, asked if that would necessitate additional boilers being lighted. Ismay said that it would. The Attorney General pointed out that Fireman Barrett, of the Titanic, had testified that additional boilers were lighted on Sunday morning.

Ismay also said that a wireless despatch which Captain Smith had handed him on Sunday indicated to him that the Titanic would reach the ice region on Sunday evening. The collision occurred shortly before midnight Sunday night.

The witness said that there was nothing in their mail contracts to compel the company's vessels to steam at the rate they usually did in crossing the Atlantic, and that there was no penalty for delay. Ismay insisted that he had nothing to do with the navigation of the ship, but Sir Rufus continued to press him regarding the speed of the Titanic, and the warnings of ice in her path which they had received.

The witness's answers were not always clear, which led Lord Mersey to remark sharply, "Answer the questions."

The Attorney General also complained that the witness was not frank. The Attorney for the White Star protested that Sir Rufus's remark to this effect was uncalled for.

Mr. Ismay said that he had not attached importance to the captain's action in handling the message from the steamer Baltic, regarding the ice, and that he had not had any conversation with any officer with respect to the message.

"Why did the captain hand it to you?" asked the Attorney General.

"For my information," was the reply.

Examined as to the speed of the vessel with a view to show that he had something to do with it, Mr. Ismay persisted that he had spoken to no one about the speed after his conversation with the chief engineer at Queens-town. He admitted that the vessel had not been slowed down after the warning of ice had been received, and that he had not had any conversation with the captain, so long as there was nothing to prevent the men seeing the ice.

Sir Rufus asked, "What was the use of going at full speed through the ice at night?"

Mr. Ismay, "I suppose they wanted to get out of the ice. They would not want to wait and take a chance of being coming down. They were on a collision course with the iceberg as quickly as possible, and even might have increased the chance of getting out of the ice fields."

THE SAFETY OF OCEAN VESSELS

All-Inclusive Bill Introduced in U. S. Senate

An all-inclusive bill to be denominated the Ocean Safety Act of 1912, designed to cover all the navigation lessons drawn from the Titanic disaster, was introduced yesterday by Senator Nelson, of Minnesota, chairman of the Commerce Committee, which through a sub-committee, investigated that disaster.

The bill includes stringent regulations for better wireless equipment, continuously operating, on ocean and great lakes vessels carrying fifty or more persons, just as provided in a bill which passed the House yesterday and almost identical with a bill already passed by the Senate. This wireless section vests control of the apparatus in the master of the vessel, and, to avoid the wireless communication being shut off by failure of the vessel's engines, requires a powerful auxiliary power supply than can communicate 150 miles at all times.

The Nelson bill would recognize foreign steamship laws whenever they are as effective as American laws and regulations; would equip every passenger craft leaving an American port with sufficient lifeboats to accommodate everybody aboard, together with other safety equipment; and would create a commission of five persons to investigate here and abroad maritime construction. It would require rigid port examination, boat drills, define qualification of seamen, penalize sailors to assist any person in distress at sea and make criminally liable any master, managing owner, steamship director or principal agent of a foreign steamship for sending away an American port in vessel so unseaworthy as to endanger life.

SUNSHINE FURNACE

Guaranteed by McClary's to save fuel—to cut out dust, fuss and bother and to heat your house evenly and comfortably in the coldest weather. We guarantee the "Sunshine" Furnace to save enough to pay for itself quicker than any other furnace you can buy.

SOLD BY H. MARQUIS.

MUCH ACTIVITY AT COURTNEY BAY

Preparing the Way for Operation of powerful Machinery

BLASTING BEGUN

Although only the preliminary work has been begun, the site of the future dry-dock and breakwater in Courtney Bay presents a scene of great activity these days. The stretch of shore between the two projecting points which mark the boundaries of the work is alive with workmen, foremen, engineers, horses and teams and already a marked impression has been made on the landscape.

There is a tremendous amount of work to be done before the rocky point to the south of the Municipal Home will be completely excavated for the site of the dry-dock and the long breakwater pushed out into the bay. The work which has been so far preliminary to the introduction of the machinery which will be employed on the job.

Blasting Work Begun

A deep cutting has been made in the bank at the higher part and a level road built up along the face of the slope to facilitate the entrance and the operation of the big steam shovel. The road will lead from the bank where the excavation is to be commenced to the point where the breakwater will put out into the bay and the material gathered up by the apparatus will be used as the foundation for the breakwater. While the top covering of earth will be easily removed it will not take long to get down to hard rock, which will offer much more difficulty. This will have to be removed by blasting and already a start has been made on this work along the shore. The holes are drilled and the blasts prepared during working hours and the blasts set off during the noon hours and in the evening after the workmen have left the scene of operations.

The steam shovel, which has been imported by Doherty & McDonald for the work, arrived in St. John yesterday and is now in the railway yard. It weighs 110 tons and is one of the largest pieces of machinery ever brought to the city, weighing considerably more than the average railway locomotive. It was brought here on its own wheels and will have to reach its destination in Courtney Bay by the same method. It will leave the railway at J. A. Likely's siding on the Marsh Road and the contractors have received permission to take it over the highway for the rest of the distance.

The Mulligraph letter is the best personal advertising medium known. Only to be had at Graphic office.

FUND TOO BIG BUT STILL GROWING

England True to Its Tradition To Over-Subscribe In Such Cases

WHAT BECOMES OF IT?

As generally happens in this old country—not too little, but too much money has been subscribed by the public for the relief of the sufferers by the Titanic disaster. The Lord Mayor's fund now amounts to more than \$1,300,000, which is a lot more than is needed, but still subscriptions keep pouring in, and it has just been announced that the big surplus that is likely to remain after all the victims of the recent disaster have been helped will be placed in the hands of the public trustee, and will be available in future emergencies of the same kind.

This will mean still another addition to the colossal sum of money which is lying owners' loss, in the old country. In the results of the Bank of England alone is more than \$500,000,000, whose owners are unknown and which is doing nobody any good. This represents unclaimed dividends on debtors' estates, trustees in bankruptcy having been compelled, some years ago to pay into the bank such sums as had been in their hands for six months. A wonderful stream of gold worthwhelp began to trickle into the coffers of the Old Lady of Threadneedle Street and ultimately amounted to the sum mentioned.

What the case in the hands of ordinary trustees in the country amounts to can only be guessed at, but it must be a staggering figure. Solicitors alone hold an enormous amount for which they cannot find owners. Coroners, magistrates and police-court missionaries also are in possession of money to which nobody lays claim.

A typical example is furnished by a recent pathetic case which was reported in the newspapers. Donations for the relief of his heroine—a woman—were sent from all parts of the country to the magistrate before whom her case had come, the total amount thus forwarded—much of it anonymously—being more than \$400. After \$115 had been paid to the woman, she died, leaving no known relatives and the balance is still held by the magistrate.

It is the almost inevitable rule for big public relief funds—like the Titanic one—in this country to be over-subscribed and as a result huge surpluses are still in the hands of trustees who do not know what to do with them. For the relief of sufferers through the disaster of Harby colliery, in 1902 for instance more than \$150,000 was subscribed. This was so much in excess of requirements that \$100,000 was at once set aside for the benefit of those who should be benefited by other accidents in coal mines. Since then all claims of the funds have been met, but when the last report was made, there still was a balance of \$120,000.

Another fund much over-subscribed was that in connection with the disaster at the Oak Pit near Bainsley, in 1866, the surplus in the hands of the trustees amounting to \$110,000. This was again more than enough money for the disaster by the Liverpool colliery explosion in 1894, and for the women and children of the men killed at Abercrombie. A few years ago, the trustees of the two funds had nearly \$125,000 more than they wanted.

Sometimes money remains in the hands of trustees long after all the people for whom it was subscribed are dead. A case of this kind was the Newbury explosion fund, the final balance of which is \$350. It seems surprising that such surpluses exist, and the reason of it, that is, a rule, the amount subscribed is explicated and interest only paid for relief of the widows and orphans. The subscribers generally have no idea of this, but it is so.

We are in a position now to fill or to let in printing of all kinds even to the largest forms. Prices quoted at the Graphic office.

THE MOON NOT ROUND.

That the moon is not round but oval is the conclusion reached by Prof. Exelmayer, of Columbia University, Portugal, the report of whose observations during the recent total eclipse of the sun was read this week before the Academy of Sciences. He took cinematograph pictures of the whole of the eclipse and was rewarded in finding from the films that at the time of the maximum obstruction the moon, while completely blotting out the sun at top and bottom, did not quite cover it on the right and left. From this he concludes that the satellite like the earth, is not a sphere. The difference between the greatest and least breadth is, however, estimated by him at less than three miles.

Another curious communication made this week to the academy shows that men of the stone age suffered from gout, dyspepsia, rheumatism, and many more modern diseases. While in charge of prehistoric excavations in Lix-sur-Duq in the Seine-et-Marne department, Archaeologist Baudouin, who is equipped with wide medical knowledge, has been examining over a hundred skeletons of the stone age, men and women, and he finds that a large proportion have deformation of the spinal column. These are stated to be certain evidence that the men of a thousand centuries ago suffered from many forms of chronic arthritis, such as common nowadays. The results have been confirmed by other scientists, and it is now believed possible to construct a complete pathology of the stone age.

Sore Feet.

Are your feet hot, sore and blistered? If so, try Zam-Buk. As soon as Zam-Buk is applied it cools and soothes injured, smarting skin and blisters. Its rich, refined, herbal essences penetrate the skin; its antiseptic properties prevent all danger of festering or inflammation from cuts or sores; and its healing essences build up new healthy tissue. For stings, sunburn, cuts, burns, bruises, etc.—just as effective. Mothers find it invaluable for baby's sores! All Druggists and Grocers—See Us.

ADVISE THAT HAY BE CUT EARLIER

Highest Classification in the U. S. Market Could Thus be Secured.

ENLARGE INCORRECT

Local exporters of hay to the United States market state the reports which have been current for some time of the effect that certain cuttings against the hay in the New England States and New York are entirely without foundation and that there is no demand for hay from the province. The rumor that there is a shortage upon Canadian hay is entirely unfounded. From the fact that the market in New York City is glutted with hay at the present time and as a consequence prices are low, it is evident that any more to this particular city.

NOT HIGHEST CLASSIFICATION

The United States market for hay is said to be very large and the highest quality of hay is received from the province and the highest price. At the present time New Brunswick hay does not receive the best classification, but it is not the province's fault that hay of almost equal quality is being brought.

ADVISE EARLIER CUTTING

Haymen in the United States and the province are advised to cut their hay earlier than they have been doing, so that they can receive the highest classification and the highest price for their hay.

LOG JAM ON MIRAMICHI

Over Sixty million feet of Logs Compressed above Millerton.

REMARKABLE SCENE

A sight that has not been witnessed on the Miramichi for the past twenty years, the jamming of nearly the whole of the gigantic lumber cut of the South West branch, at a point a couple of miles above Millerton, has attracted a large number of sightseers to this place during the past few days. Between 60,000,000 and 70,000,000 feet of logs are compressed within a distance of three quarters of a mile reaching from shore to shore and extending from the bottom of the river to a height in places twenty feet above the level of the water. It is a spectacle which will never be forgotten by those who have passed upon it. The value of the logs thus piled up in endless confusion approximates \$600,000 and may go above this figure.

During the three days of the recent prolonged downpour all the logs in the South West boom limits and those above it were swept down to the river by the proper tides. A jam occurred at a point in the lower end of the boom limits and as each successive batch of logs was driven on the jam, the earlier logs were forced lower and lower until they piled from the bed of the river to the top of the high water mark. When all the logs had run in the mass extended from shore to shore in solid formation fully three quarters of a mile in length. Now that the water has subsided several feet, the whole body of the logs makes a bridge across the river at three or four feet above the water's level. Dynamite will have to be used, it is said, to loosen the logs and enable the boom company to sort them out and make them into a lot for the lumbermen. At present only a few sticks can be hauled out at a time and the expense to the boom company to fulfill their part of the contract will be very heavy—Gazette.

Electric Restorer for Men

Phosphoral restores every nerve in the body to its proper tension restores vitality, strength and vigor. Phosphoral will make you a new man. Price \$1 a box, or two for \$2. Write to any address. The Seaboard Drug Co., 100, Colburn Street, N. B.

NEVER FIRED

"Cook, did you stay in my gun in your last place?"

"I never stays nowhere long enough to be discharged. I'm one of these here fireless ex-slaves."

Bacon—"That sounds like a master hand at the piano?"

Egbert—"It is. It's my wife?"

THREE DON'TS

Don't wait until you are sick to take out a Sickness Policy. Don't put off taking an Accident Policy until you are seriously hurt in an accident. Don't put off until some future day. Now is the time to prepare for a rainy day. In addition to Sickness and Accident Policies, I carry all kinds of Life Insurance.

Anchor SHINGLE STAINS

The Best Preservative of Undressed Wood

Anchor Shingle Stains indefinitely postpone, if not absolutely prevent rot or dry rot. They show up the grain of the wood, giving a delicate artistic finish, not only to the surface coated, but to the entire building.

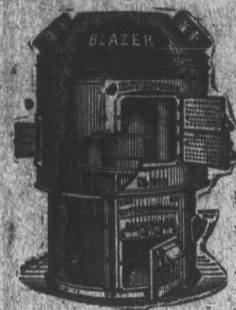

We have used infinite pains in the selection of pigments best suited to combine with our specially treated COAL TAR CREOSOTE, and our success has been proportionate with our care.

Anchor Shingle Stains are being very largely used on the roofs, and in many instances also on the bodies, of the most attractive houses in our midst; they are also employed with excellent results from an economic standpoint on sheds and other outbuildings.

If your dealer cannot at the moment supply Anchor Shingle Stains, please write us to arrange for you.

TRIED TO EAT A WILL

Desperate Attempt of a Disappointed Cousin to Destroy Testament

A curious scene occurred in a lawyer's office at Castanet, near Toulouse, France. The lawyer was reading the will of a M. Sambrès, a landowner who had died a few days before. M. Sambrès left nearly his whole estate to his widow, and this fact so infuriated a cousin named Vignard that he suddenly jumped up, snatched the will from the lawyer's hands, tore it into fragments, and cramming them into his mouth, tried to swallow them. He was seized by the throat and finally forced to disgorge the bits of paper, which were afterwards gummed together.

Vignard was taken to the prison at Toulouse as the attempted destruction of a will is a very serious offence in France.

MOST EXTRAORDINARY ISLAND

White Island, which lies 30 miles to the north-east of New Zealand, is said to be the most extraordinary island in the world. The island is an enormous mass of rock, nearly three miles in circumference, rising 800 feet above the sea, and is perpetually enveloped in dark clouds that are visible for nearly 100 miles. The island consists almost entirely of sulphur, with a small percentage of gypsum. In the interior is a lake fully 50 acres in extent, the water of which has a temperature of 110 degrees Fahrenheit, and is strongly impregnated with acids. On one side of this lake are craters, from which steam escapes with great force and noise. This steam and the vapor from the lake form the dark clouds that envelop the island.

WASN'T READY YET

Doctor (after thoroughly examining patient)—I'm sorry, Mr. Gay, but I'm afraid I'll have to operate on you.

Gay—Good heavens, doctor, is it absolutely necessary?

Doctor—Yes, unless you care to go to a warmer climate.

Gay—(misunderstanding him)—Oh, no, I think I prefer the operation—Judge.

"Oh How I Itched"

What long, nerve-racking days of constant torture—what sleepless nights of terrible agony—itch—itch—itch—constant itch, until it seemed that I must tear off my very skin—then

Instant relief—my skin cooled, soothed and healed!

The very first drop of D. D. D. Prescription for Eczema stopped that awful itching—standby yes, the very moment D. D. D. touched the burning skin the torture ceased.

D. D. D. has been known for years as the only absolutely reliable eczema remedy, for it washes away the disease germs and leaves the skin as clear and healthy as that of a child. If you will come to our store, we have had the agency for this remedy for so many years that we can tell you all about D. D. D. Prescription and how it cures eczema.

Or you can get a free trial bottle by writing D. D. D. Laboratories, 29 Colborne St., Toronto. A. McDonald, Druggist.

A SEPTUAGENARIAN HERO

Old Man Climbed Down Steep Cliffs, Swam Half Mile to Wreck and Swam Back

Frank Pearson, a septuagenarian seaman of Scarborough, England, has received from the Hon. T. H. W. Pelham, C.B., one of the assistant secretaries in the Marine Department of the Board of Trade, an intimation that the King has personally expressed a desire to see him at Buckingham Palace and to decorate him with the Albert Medal for gallantry at sea.

Pearson lives near the precipitous cliffs of Bampton. Early one morning he heard a signal gun or distress fired by vessel at sea. The old man got out of bed, dressed himself and made his way to the headland, where he saw a steamboat hard and fast on a rock half-a-mile from the shore. The spot is known to mariners as being particularly dangerous.

Pearson slid down the face of the cliffs in the dark, and then, notwithstanding the fact that it was very cold he undressed on a ledge of rock and jumped into the sea. Despite his age he swam the half-mile shouting meaning to the crew that help was coming. By this time he could see the crew watching him through their glasses.

It was nearly high water, and Pearson knew that with the turn of the tide all would be dashed off the rock. While still in the water he shouted his final instructions to the crew to lash themselves fast and prepare for the inevitable swirl. The wrecked sailors then pulled the old man on the wreck almost in a state of collapse.

In the meantime the coastguards had arrived after traveling miles with the rocket apparatus and everyone was saved. By this time Pearson had revived and, to the astonishment of the whole party, he dived overboard again and swam back to his clothes, where he dressed, telling a man he met that it was time that he (Pearson) was off to his work. Before he could do this, however, he had to climb 450 feet to the top of the cliff. The circumstances have been vouched for in a report submitted to the King. In addition to the Albert Medal, the courageous veteran received an appreciable cheque from the owners of the steamer and a cheque from the Board of Trade.

OPERA SINGER'S HAT BILL

The Result of Giving Orders Without Asking the Price

Miss Mary Garden, the famous opera singer, was sued by her Parisian milliner because she refused to pay a hat bill amounting to \$1,600. She has, it appears, been in the habit of ordering her hats without troubling to ask the prices, and was surprised when she received a bill containing among other items: One chinchilla toque, \$150; One hat in antique satin 150; One ornate toque, \$120; One toque with changing pearls, \$120.

NO UNDUE ANXIETY OVER DUCHESS

Doctors Find Condition Satisfactory After a Comfortable Night.

Her Royal Highness, the Duchess of Connaught, is in the Royal Victoria Hospital, suffering from an attack of peritonitis. The Royal party were in Quebec when her illness developed, and she was conveyed to Montreal by special train. The rest of the party are guests at the residence of Lord Strathcona. The following bulletin was issued to-day: "Her Royal Highness passed a comfortable night, having borne the journey well. Condition this morning satisfactory and does not give rise to undue anxiety."

A. E. GARROW, M. D.
W. W. CHAPMAN, M. D.
C. S. WASHINGTON, M. D.

His Highness the Duke of Connaught was at the hospital early and spent the greater part of the morning with the duchess. Although the doctors declared there is no apprehension regarding her safety, and her recovery is assured as only a matter of time, His Highness appeared greatly worried. The staff spent the morning quietly at Lord Strathcona's house.

FIVE KILLED IN AUTO ACCIDENT

A report from Boston states that an automobile containing six men went over an embankment into the Charles river early on Monday morning, and thus far the police have been unable to account for but one of the number. This man, Gerald Whalen, of Roxbury, told the officers that the others made their escape before the car took its plunge, and then disappeared; but the police are doubtful if all got away. The river will be dragged.

Beware of Ointments for Catarrh that Contain Mercury.

Mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is tenfold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free. Sold by Druggists. Price 75c per bottle. Take Hall's Family Pills for constipation.

MONTREAL WILL PURIFY THE WATER

People residing in the country or who have temporary homes at summer resorts, need no longer take chances in having an impure water supply. They may, at a cost of from \$5 to \$6, provide their homes with a complete and effective sterilization plant such as has proven of such inestimable benefit in the Montreal municipal water plant.

Thanks to the efforts of Provincial Chemist McCready, after two months of work in the provincial laboratory, there has been evolved a device calculated to remedy all evils in regard to impure water supply.

NEGOTIATION FOR IMPORTANT WORKS

Former Chatham Young Men Have Faith in Town—New Railway Opens up Opportunities.

The benefit that the building of the new line into Chatham will in time be to that community is already being seen by far-sighted action and what it will eventually mean in industrial development is hard to set a bound upon. Two young men who formerly belonged to Chatham and who could not see a bright enough future in that town to tempt them to remain, now look upon the matter in a new light since the building of the railway into town with the additional facilities that it will afford, and they are said to be negotiating for the large foundry plant of Mr. James Miller.

That matter has been taken up with Mr. Miller, who however, would say nothing for publication.

Other sources state, however, that Mr. Miller has received a definite offer for his plant and that a decision in the matter will be arrived at quite soon. The prospective buyers are said to be Messrs. Frank McNaughton and John McLennan who are now in Woodstock. Mr. McNaughton was in Chatham last week and it is understood that the main business of his trip to the town was in connection with this matter.

The Man Who Gave All His Money Away

Dr. Daniel Kimball Fearsom, of Chicago, the man who gave nearly \$50,000 to education, and died practically penniless, was one of the most remarkable philanthropists of the age. His gifts were small in comparison with those of some other millionaires, but they were large in proportion to his means. They were veritably the "widow's mite," inasmuch as he gave all he had. His last days were spent in a sanitarium where he had lived for some years, having divested himself of all his fortune, and receiving \$5,000 per annum by one of the colleges which he had benefited. Out of this income Dr. Fearsom was able to save enough to continue his benefactions, and probably gave away more than half of it in the course of a year. A few days before his death he celebrated his 92nd birthday, and to the newspaper men who interviewed him, he declared that he was perfectly happy, and that his only regret was that he hadn't been able to distribute \$10,000,000 instead of \$50,000,000. Dr. Fearsom's wife died in 1906. He had no children, and his immediate relatives are well-to-do. He felt that he could give away every dollar he owned without doing any wrong to those who had a better claim upon him, and in giving he found a delight that was not surpassed by the satisfaction of those to whom he gave.

FRIDAY, JUNE 14, 1912

Y. M. C. A.

Is there not sufficient enthusiasm among the young men of the town to carry this project through to a successful issue?

The idea of having a Y. M. C. A. was mooted some years ago, and after a few months of scurrying around the project was allowed to drop, for the simple reason that our ideas of a Y. M. C. A. were a bit larger than our wants, and we decided as per usual to start at the top instead of the bottom.

There was no necessity for any talk of having \$20,000 building and a \$2000 a year secretary, when much less would have done us. Why in Montreal in one of the best attended associations at Point St Charles the secretary gets \$90 to \$100 a month and has a much bigger membership and more organizing work to do than we would have here. There is at present in the hands of the Treasurer Mr. R. M. Hope nearly \$500 and promises of much more and the lease of ground from the I. C. R. has been received and rent being paid on it since Oct. 1909. Now what is to hinder a few careful going persons to get a hold of this thing and go at it easy. Begin small and as the necessity arises add to the original building.

Would it not be a good idea to include the erection of a Y. M. C. A. building in our Old Home Week program and solicit subscriptions for this from our friends and visitors on that day. A building which would satisfy our requirements could be erected for between four and five thousand dollars, and one of the assistant secretaries of larger towns could be engaged at a salary of \$80 per month and even less for having knowledge of this work the Graphic knows that assistant secretaries in Montreal and other large towns get only \$40 a month to start.

Let us get that "Big Idea" mic-robe out of our minds and approach the subject in a rational and business like way and surely something could be done with the project.

It does seem rather foolish to hold ground and pay rent for land

which is lying idle, for the want of some business head to lead a campaign. Now what do you think of it?

BETTER SERVICE NEEDED

The mail service between Campbellton and Matapedia is an important matter to Campbellton merchants and is a matter which should receive the attention of the Board of Trade. At the present time mail leaving Campbellton for Tide Head, Flatlands, etc., goes out on the local each morning. Instead of being dropped at these station going up it is carried west until the local is met coming east when it is transferred to this train and then dropped at the stations on the return journey to Campbellton. As this train reaches these stations at night, after the post offices close, no mail is delivered until the following day or at least twenty-four hours after it leaves Campbellton but is frequently late in reaching its destination.

We understand that a movement is on foot to have the mail delivered at these offices by both trains which would be a great improvement and the cost would be slight.

Wheelbarrow Free

The regular price of our wheelbarrow is \$3.25, freight paid to your nearest railway station, and in quantities of 3 or more \$3.00 each.

This BARROW is very strong and durable, has good size body, so fitted that the load is mostly over the wheel, 20 inches in diameter with 2 inch rim. It is good value at this price.

For the next two weeks, with all orders received for 6 of these barrows at the regular price of \$3.25 each we will include and extra one free, that is we will ship seven barrows for the price of six. Cash must accompany all orders, and this advertisement must be returned. Freight will be fully prepaid to your nearest railway station.

Write for full description and catalogue of farming implements.

REASONS WHY WEAR-EVER ALUMINUM COOKING UTENSILS ARE THE BEST.
1. They are light in weight, bright as silver, and absolutely pure and wholesome.
2. There is no enamel or plating to flake or wear off. The finish is the natural finish of the metal.
3. They will not burn or scorch food as easy as other utensils.
4. They retain heat longer than other utensils.
5. They do not contain or form any of the poisonous substances found in iron, tin, copper or enameled ware.
6. There are no joints, seams or solder to leak or give trouble.
7. They are finished in the best possible manner.
Persons needing anything in the line of Cooking Utensils will find it to their advantage to call and inspect our goods before buying elsewhere.

LOCAL ITEMS OF INTEREST

Newspaper Notes of Town and Country Happenings Gathered by Graphic Reporters.

FALSE ALARM

Last night the Fire brigade were called out to box 12 in the east end of the town but found on their arrival it was a false alarm the boxes being tested.

HAMMO COUCH

The ideal Hammo Couch sold by F. G. Kerr is the finest of its kind made. You should inspect the combination Couch and Hammo.

Choice fresh rhubarb, two and a half cents per pound at W. H. Miller Co.

CONVENTION

The Sabbath school convention held on Tuesday and Wednesday of this week in the Presbyterian Church was most successful. A large number of delegates attended and the sessions were always interesting.

Four ten-cent bottles of household ammonia for 35 cents at W. H. Miller Co.

DROWNING

Word has just reached here of the death by drowning of J. A. Sandison, a member of the secret service of the I. C. R. The accident took place in the Little Metis River last week. The body was recovered. Mr. Sandison, whose headquarters were at Flavel Station, was well known all over the I. C. R. system.

NEED CLEANING

A traveller on the railway from New Carlisle to Matapedia complains that on Monday he travelled second class on his route, and he never saw such filthy cars. The passengers are all in one coach and there is no smoking car attached with the result that the floors were swimming with men spitting. This is not a nice thing to hear. Is the report correct?

REFRIGERATORS

F. G. Kerr can furnish your home with a Refrigerator guaranteed perfect in circulation and refrigeration. \$275 up to \$500.

"P" CO. 73RD. REGT.

All old members of "P" Company 73rd. Regt. are requested to call at the office of the Captain and sign the service roll. All persons wishing to go to Camp Sussex are requested to sign the service roll at the first opportunity.

A. E. G. MCKENZIE
Captain.

From ten-cent packages 50000 store polish for 25 cents at W. H. Miller Co.

LOST

A roll of vittae packing between McLennan Foundry and Machine Works and W. H. Marquis & Co. store. Finder will be rewarded by notifying McLennan Foundry & Machine Works.

Wedding Stationery, Private Note paper and envelopes at The Graphic Office.

GET THEIR RIGHTS

Thurs June 20 will be election day, men vote at the Polls. Thursday, June 20th will be the big 20 per cent. sale day at Marquis & Co's. Women can vote for anything in the store at 20 per cent off and get it Marquis & Co.

IMMENSE EXCITEMENT

The excitement caused by Election will be a small matter compared with the excitement at Marquis & Co's store over the 20 per cent sale on Election day. June 20th be with the crowd at the Big Department Store.

A WHITE SUMMER

Fashions proclaim a white summer, which indicates a season for white lingerie dresses, and we have them now in stock. Prices ranging from \$2.00 up to \$10.00. F. E. Sheppard & Co., Ladies' Outfitters Subway.

DUPUIS-VERMETTE

A large number of friends gathered at the R. C. Church Wednesday morning at 8 o'clock to witness the marriage of Miss Laura Vermette to Mr. Philip Dupuis of the Shives Lumber Co.

The bride entered the church on the arm of her father to the strains of Mendelssohn's wedding march played by Miss Annette Theberge. The bride was dressed in a beautiful imported gown of white satin with wreath and veil and carried a bouquet of bridal roses.

After the celebration of High Mass by Rev. Father Langton, assisted by Rev. Fr. Cormier of Newcastle, Mr. and Mrs. Dupuis left on the Steamship Canada for Gaspe thence to Quebec and other Canadian cities followed by a host of good wishes.

The bride was the recipient of many beautiful and costly gifts showing the esteem in which the young couple were held.

SILVER WEDDING ANNIVERSARY

Last evening about forty of our citizens called at the home of Hon. C. H. LaBilloy to present him and Mrs. LaBilloy their congratulations on their 25th anniversary of marriage. An address was read to them by Mrs. W. A. R. Craig accompanied by some very handsome solid silver pieces donated by their Dalhousie social friends. Mr. LaBilloy responded in well chosen words to the address speaking for his wife and himself stating how their friends in Dalhousie and other parts had helped to make life cheerful and happy for them. After the ceremony of presentations took place the guests enjoyed dancing and a dainty lunch was served about midnight.

Among those present were Mr. and Mrs. W. A. R. Craig, Mr. and Mrs. Peter Sheehon, Rev. Mr. Coleman and Mrs. Coleman, Mr. and Mrs. Haddow, Mr. and Mrs. John Potts, Mrs. E. A. Hilyard, Mrs. John Barberie, Mrs. David Ritchie, Mrs. John Baldwin, Mr. and Mrs. Thos. G. Scott, the Misses Baldwin, the Misses Mercier, the Misses Harquail, Miss Haddow, Miss Stella McKenzie, the Misses Troy, Miss Potts, the Misses Sheehan, Miss Vera McInerney, Miss Eva Barberie, Miss Gertrude Barberie, the Misses Stewart, Miss Florine Doherty, Mr. A. H. Hilyard, Mr. James B. H. Storey, Mr. S. L. T. Clifford, Mr. E. Rene Richard, Mr. Walter Amy, Mr. Watt, Mr. McLennan, M. Mcroy, Mr. Walter Marquis, A. C. Morris.

ADVANCED PRICE

On and after the first day of July 1912, the price of lots in the Campbellton Rural Cemetery will be advanced fifty per cent. A whole lot after that date will cost \$18.00 a half lot \$12.00, a quarter lot \$7.50.

June 11-2pd.

CARD.

To the Electors of the County of Restigouche.

Gentlemen: We were chosen at a largely attended Convention of the Liberal party and of those opposed to the present local administration to contest the County in this election.

We feel that the County has not received a fair deal during the years that the Hazen-Fleming Government has conducted affairs of this province. Contributing as we do so largely to public revenues we have not received a fair share of that revenue for expenditure on our roads and bridges. Back settlements are neglected and party heeled have spent road money in many districts without getting adequate results. The ratepayer has no information as to what way road money is spent, no detailed statement being sent to the Municipal Council as required by the Highway Act. The public accounts do not give any information as to expenditure of money and investigation has shown that Superintendents have received for their services in inspecting public works more than workmen employed.

The Railway policy of this Government seems to have for its object the handing over of Railways to the Canadian Pacific Railway. The acquisition of the Central Railway is a serious set back to the Liberal policy of the taking over of Branch Railways as feeders of the Intercolonial. This is a matter in which all in this county are directly interested. The taking over of the Central and other Railways by the C. P. R. will tend to divert traffic from the I. C. R. and we will feel the result, both directly and indirectly. The present Government when in opposition would not guarantee bonds of the International Railway for \$8,000 per mile yet when in power have not hesitated to guarantee bonds of Railways promoted by their political followers to the amount of \$25,000 per mile.

Notwithstanding the large increase in income during the last four years the Hazen-Fleming Government has increased the public debt of the province over one million dollars and last year had a deficit of \$56,000.

Their delay in disclosing a lumber policy has seriously retarded progress of lumber industry in this County.

We feel that it is time for a change of Government and we are asking you for support, promising to use all our efforts to forward the interests of this County, and the province at large. We will not be able with the short time at our disposal to visit personally the electors in the different sections of the County but trust you will aid us by sending two supporters of Mr. Coop, the present leader of the opposition, from this county on JUNE 20th.

Yours truly,

C. H. LABILLOIS,
A. E. G. MCKENZIE.
Campbellton, N. B., June 14th, 1912.

St. George's church, Bathurst, was crowded to the doors on Wednesday evening, when at half past nine o'clock T. R. Hanington and Miss Edith R. Bishop were united in marriage by Rev. J. A. Cooper. Promptly at the hour the bride arrived with her uncle Henry Bishop, and proceeded to the altar to the strains of Mendelssohn's wedding march, played by the organist, Mrs. Turner. The bride was gowned in ivory duchess satin with trimmings of duchess lace and court train caught with orange blossoms. The bride veil was also trimmed with orange blossoms. She carried a shower bouquet of bridal roses and lily of the valley. The bridesmaids were Miss Jessie Bishop of Bathurst and Miss Margaret Hubbard of Newcastle. Miss Bishop's gown was of yellow satin, veiled in chiffon, black picture hat and flowers. Miss Hubbard was also gowned in yellow satin. The little flower girl, Miss Dorcas Bishop, was dressed in white with pale blue poke bonnet and carried a basket of forget-me-nots. The groomsmen were J. H. Hamm of St. John, and the ushers J. H. Kent of Bathurst and Walter Amy of Dalhousie.

After the ceremony the guests repaired to the residence of Henry Bishop, where a delicious supper was served and the health of the bride and bridesmaids was proposed and responded to. The bride who is a great favorite, received many beautiful and valuable gifts, including several substantial checks. The gift of the groom was a diamond ring.

The out of town guests were Mr. and Mrs. W. A. Park of Newcastle, Mr. and Mrs. J. H. B. Storey, of Dalhousie, Mr. and Mrs. F. R. Hanington of St. John, Miss Hubbard of Newcastle, J. H. Hamm of St. John and Walter Amy of Dalhousie.

WOMAN MAYOR BURNED TO DEATH

Mrs. Lowman's Clothing Catches Fire While She is Preparing a Meal

Mrs. Mary D. Lowman, first woman mayor in Kansas, is dead, the result of burns sustained when her clothing caught fire while she was preparing a meal. Mrs. Lowman was elected mayor of Oskaloosa in 1888, and her administration attracted wide attention.

Her first official act was to clean up the city and otherwise bring it up to date. She was seventy years old. Her husband G. W. Lowman, is at present city clerk.

WILL DRAW NEW RULES FOR VESSELS

Assistant Deputy Minister of Marine and Fisheries Stanton will sail for England on June 14th to represent Canada at a meeting of the British Board of Trade, to draw up new rules for British sea-going ships, so as to guarantee greater safety for the lives of passengers and crews.

This meeting is a direct result of an agitation which grew out of the Titanic disaster, and it is thought will result in sweeping changes in the present board of trade regulations.

Canadian marine laws on all such matters are largely similar to those of Great Britain, and whatever is agreed upon by the British Board of Trade as a result of this conference, will likely also be adopted by Canada.

A WOMAN'S WAY TO GET RELIEF

TAKE GIN PILLS FOR LAME BACK.

TYNSIDE, P. O., ONT.

"I received your sample of Gin Pills and after using them, I felt so much better that I got a box at my druggist's and now I am taking the third box. The pain across my back and kidneys has almost entirely gone and I am better than I have been for years. I strongly advise all women who suffer from Pain in the Back and Weak Kidneys, to try Gin Pills."

Mrs. T. HARRIS.

Gin Pills contain the well known medicinal properties of Gin as well as other curative agents—but do not contain alcohol. Gin Pills are guaranteed by the largest wholesale drug house in the British Empire to give complete satisfaction or money refunded. 50c. box, 6 for \$2.50—sample free if you write National Drug and Chemical Co. of Canada, Limited, Dept. N. B. Toronto.

If the bottles are constantly taken National Lazy Liver Pills, 25c. box. 98

BRITISH BATTLESHIP BREAKS ALL RECORDS

All speed records for dreadnoughts were smashed on Friday when H. M. S. Conqueror, on an eight hour trial, at full power made 33.25 knots instead of the twenty-five knots stipulated in the contract. The fastest battleship hitherto was the Vanguard which hit 22.1 knots on her trial two years ago.

The fastest German dreadnought is the battleship Oldeburg which had her trial this week, and attained a speed of 22.4 knots.

Each age of our lives has its joys. Old people should be happy, and they will be if Chamberlain's Tablets are taken to strengthen the digestion and keep the bowels regular. These tablets are mild and gentle in their action and especially suitable for people of middle age and older. For sale by all dealers.

DO FISHES REMEMBER?

The fact that fishes will return time after time to bite at the hook by which they have been caught is often cited as proof that fish have no memories. But Yves Delage, the great French biologist, has been making some experiments which seem to prove the contrary. He says that fish return to bite the hook because their greediness is greater than their intelligence. Is it true—and when it is recognized the danger signal it avoids it.

TORTURED FROM BABYHOOD

"Fruit-a-lives" Cures Constipation

EDMONTON, ALTA., Nov. 20th, 1911

"I have been a sufferer since babyhood from that terrible complaint, Constipation. I have been treated by physicians, and have taken every medicine I heard of, but without the slightest benefit. I finally concluded that there was no remedy in the world that could cure Constipation.

About this time, I heard about "Fruit-a-lives" and decided to try them. The effect was marvellous.

The first box gave me great relief, and after I had used a few boxes, I found that I was entirely well.

"Fruit-a-lives" is the only medicine that ever did me any good and I want to say to all who suffer as I did—"Try this fruit medicine and you will find—as I did—a perfect cure!"

(Miss) E. A. GOODALL.

"Fruit-a-lives" is the only medicine in the world made of fruit and the only one that will positively and completely cure you of Constipation.

50c. a box, 6 for \$2.50, trial size, 25c. At all dealers or sent on receipt of price by Fruit-a-lives Limited, Ottawa.

A REAL NIAGARA IN TASMANIA

Power to be Harnessed And Supply Energy to the Whole Colony

A big hydroelectric engineering scheme now being constructed in the middle of Tasmania, will revolutionize the industry of that island. The area of land to be developed is 25,000 square miles and its present population is 125,000. Tasmania has long been waiting for something to happen to it, and that something is about to happen now. Situated in the middle of the island, at an altitude of 3,400 feet, is the Great Lake, a storage reservoir provided by Nature herself. The area of this sheet of water is 41 square miles. The outlet of this lake is the river Shannon and at this point a new company is constructing a dam to regulate the flow. The water will then be diverted from the Shannon into a large, from which steel pipes will be led so as to create an effective fall of water for over 1,000 feet vertical. Nature's disposition in this region allows of the mechanical contrivance of engineers in this manner both simply and cheaply. It is calculated that in the power-house to be erected at the foot of this fall electricity of the value of \$2,500,000 per annum can be generated all the year round, sufficient to work the developing industries of the whole island. Hohn is the capital in the south, and Launceston in the north will be supplied from it, and there will be ample power to work the important mineral fields of the island as well as the copper mines of Mount Lyell, the tin mines of Bischoff, and the silver mines of Zeehan.

A 55 acre ankle may as a rule be cured in from three to four days by applying Chamberlain's Liniment and observing the directions on each bottle. For sale by all dealers.

KAISER LOSES SUIT

Lessee of Royal Estate Refuses to Have a House Built For Him

The Supreme Court at Leipzig, Germany, decided against the Emperor in a singular suit brought by His Majesty against Herr Sohst, who is the lessee of an estate forming part of the imperial property at Cadeln. The Emperor desired to build a suitable dwelling house for Herr Sohst on the estate.

Herr Sohst had originally demanded such a house for himself, and plans for the erection of the building costing \$7,000 were prepared. But no definite agreement was reached, and finally the Emperor brought an action against Herr Sohst, who changed his standpoint and asserted he had the right to claim the house, but was not obliged to permit the Emperor to build one against his will.

The Emperor contended that Herr Sohst must have a house and must render certain assistance towards the building of it. The first trial of the case was decided in favor of the Emperor, but the Court of Appeal pronounced in favor of Herr Sohst, who has now carried his point in the Supreme Court.

When your child has whooping cough, it is a task to keep the cough in check and to ease it as easy by giving Chamberlain's Cough Remedy as may be required. This remedy will also liquify the tough mucus and make it easier to expectorate. It has been used successfully in many epidemics and is safe and sure. For sale by all dealers.

TWO THOUSAND HOUSES BURNED

Fierce Conflagration Sweeps Over Stamboul.

Last week a great fire swept over Stamboul, the Mohammedan section of Constantinople. Two thousand houses, and several mosques were burned. A wide lane was cleared by the flames from the walls of the old Scutari Palace grounds as far as Little Aya Mosque, a distance of three-quarters of a mile. This mosque escaped destruction and the open space about it appears to have stayed the progress of the fire. The advance of the flames toward the wealthier quarters was barred by the Hippodrome and the Sultan Ahmed Mosque, both of which were saved.

From here the conflagration swept southward toward the Marmara shore, where the houses are smaller and the most part built of wood. Another outbreak, toward the Greek quarter of Talaria, opposite Pera. Great distress has resulted, to the poorer population and pathetic scenes were plentiful outside the line of the fire, where hundreds of poverty-stricken families wept over the ruins of their household furnishings.

Besides the residences, the fire burned four mosques, seven schools and three Moslem Theological Seminaries.

Several women and children are missing and fifteen thousand persons are without shelter.

The fire is believed to have been incendiary, a builder threatening himself upon the owner of a house in the course of conversation regarding which there had been a dispute.

Get a bottle of delightful, refreshing PARISIAN SAGE medicine, and have everybody in the house use it regularly. It's fine for children as well as grown-up and Thos. Wren guarantees PARISIAN SAGE to drive away dandruff, stop falling hair or itching scalp, or money back. Large 15c. bottles.

"I think PARISIAN SAGE is good as a hair grower. It is good to rub the hair of the scalp and stop the hair from falling out. It is a beautifier as well as a scalp cleanser. I intend to keep it in the house. I know what it did my head."—Hannah Harkness, Marshall town, Iowa.

Family Hair Dressing

THE NIMBLE CAT

Ingenious Apparatus Shows Why They Always Light on Their Feet

The ingenuity of a scientist has resulted in the construction of an apparatus to show why a cat in falling invariably alights on its feet.

This apparatus consists of a cardboard cylinder wherein are stuck four rods to serve for legs, together with a tail devised on similar principles. The object of the experiment is to show that a cat's peculiar faculty depends on the rotation of its tail with sufficient vigor.

It appears that this faculty is especially developed by climbing and leaping animals, such as members of the feline tribe, monkeys, squirrels, rats, and most lemuris. The tail plays a most important role in the turning process. According to the inventor of this apparatus all tree-inhabiting monkeys have long tails, and there is not the slightest doubt that these tails are of great aid to all climbers in enabling them to turn in the air. The tail also acts as a balancer, as evidenced by the cat's jumping. Chamberlain's Tablets will cause an agreeable movement of the bowels without any unpleasant effect. Give them a trial. For sale by all dealers.

MONTREAL CHINAMEN

There will be Chinamen dressed as John Bull, Uncle Sam and George Washington; others dressed to represent English, French and American men-of-war, and a score of Chinese boys in scout and row, who on Sunday next 10,000 Orientals, parading in honor of the formation of a Chinese Republic. Mayor Levesque issued the permit yesterday.

There will be bands, two English and two Chinese, and the parade will be headed by a Chinaman on horseback, followed by the Union Jack and the flags of all nations, conspicuous amongst which will be the new banner of the Chinese Republic, white a large picture of Dr. Sun, the first President of the Chinese Republic, will have a prominent part in the procession.

"What'll you do if I let you go?" asked Judge Levesque at Montreal of Duff Randall who was brought into court this morning by Special Constable Bonner on a charge of walking on the C. P. R. tracks. "I will," said the prisoner in reply, "get out of this town quick your honor that you won't be able to see me no more."

Mrs. H. VON RODEN of LYNDON, KY.

Recommends Lydia E. Pinkham's Vegetable Compound for Backache, Nervousness, Headaches.

Lyndon, Ky.—"I have been taking Lydia E. Pinkham's Vegetable Compound for headachess, neuralgia pains, backache, nervousness and a general run down condition of the system, and am entirely relieved of these troubles. I recommend your remedies to my friends and give you permission to publish what I write."

—Mrs. H. VON RODEN, Lyndon, Ky.

When a woman like Mrs. Von Roden is generous enough to write such a letter as the above for publication, she should at least be given credit for a sincere desire to help other suffering women, for we assure you there is no other reason why she should court such publicity.

Canadian Woman's Experience:

Windsor, Ont.—"The birth of my first child left me a wreck with terrible weak spells, but I am glad to tell you that I do not have those weak spells and I feel like a new woman since taking Lydia E. Pinkham's Vegetable Compound. I am now well and strong and can do my own housework. I do not take medicine of any kind. It was Lydia E. Pinkham's Vegetable Compound that restored me to health."

—Mrs. ROBERT FAIRBAIN, 72 Parent Avenue, Windsor, Ontario.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

THE CAMPBELLTON GRAPHIC, FRIDAY, JUNE 14, 1912

SOCIAL and PERSONAL

Our Readers are Asked to Contribute Items to this Column.

J. A. Sherar Esq. of New Carlisle was in town Wednesday and Thursday attending the Sunday School convention.

Miss Annie Anderson entertained at an enjoyable afternoon tea in honor of her guest Miss Miller.

Misses Sadie and Etta Mowat have returned after spending an enjoyable time in Montreal.

Miss Miller of St. Martins is the guest of Miss Anderson.

Mr. Arnold Shives who has been attending College in Toronto is home for his vacation.

Miss Hazel Lingley is in Chatham this week.

Miss Stella McDonald who has been in Wolfville attending Acadia Seminary is home.

Mr. W. H. Wallace left Tuesday morning on the Limited for Moncton, Springhill and Sussex.

Mr. Gabriel Forest was in town this week.

Mrs. H. G. Millican is visiting her former home Nappan, N. S.

Mr. Albert LaBillico is in town this week.

Miss Georgian Dixon is the guest of Miss Greta Adams.

Mrs. T. Malcolm and her daughter Ethel left Wednesday for Montreal.

Miss Bessie Montgomery of Dalhousie visited friends here this week.

Miss Bessie Redden is the guest of her sister, Mrs. Wm. Sharp.

Mrs. Alex. McLennan is visiting friends in Chatham.

Mr. H. A. Chandler has returned from St. John.

J. K. Flemming of Hartland was in town on Monday.

Miss Stella McNair of Jacquet River visited friends here last week.

Mr. Clifford Bastion of Quebec is visiting his sister, Mrs. McDonald.

Mr. I. W. Ferguson of Moncton was in town last week.

Mrs. Nevins of New York is visiting her former home here.

Mrs. H. P. Trueman is the guest of her son, Mr. Donald Trueman.

Mr. and Mrs. D. M. Lutes, of New Mills, are visiting at Bonnell's Corner, parish of Moncton, the guests of the former's brother, Mr. German Lutes. Mr. Lutes, who is station agent at New Mills, has been on the sick list all winter and his many friends are glad to see him looking so well.

Mr. and Mrs. S. C. Goggin, of Petitcodiac, and Mrs. (Dr.) Taylor, of Moncton, left for Chatham Wednesday afternoon to attend the wedding of Miss Goggin to Dr. Vaughan, last evening. Mrs. Taylor and Mrs. Goggin will visit Campbellton before returning home.

NOMINATION DAY

Continued from page one

point after point in a rattling campaign speech. Quoting from the published records he received an ovation when he read that some man named Lockhart had received the sum of \$150 "for the use of a jack screws." Mr. W. S. Montgomery was then called on who said that the members of the Flemming government were honest men and a credit to the province. He drew comparisons between LaBillico and Morrissey with regard to expenditures and travelling expenses and read copious extracts from the blue books, showing amounts paid out without vouchers in previous years. He spoke at length on the School Book act which was one of the planks in the Flemming government platform and said that this alone had been a great saving to the people of the province. He predicted the return of Stewart and Culligan on June 20th and said the only question was the size of their majority. Mr. Montgomery touch

CARD.

Much has been said and explained regarding that million dollar increase in the government liability and we as candidates desire to place the following figures before the electors.

This great deficit is made up as follows.

1st. \$13,338.00—Defalcation of W. P. Flewelling. Old Gov't.

2nd. 215,000.00—Floating debt found by Ottawa auditor when present gov't came into power.

3rd. 15,000.00—Charges in valuation of Central Railway, (merely in book-keeping.)

4th. 143,700.00—Subsidy paid to I. N. R. All voted by old gov't.

5th. 160,000.00—Had to be spent on this old Central railway, which the old government fostered, to put it in anything like decent shape. This railway was promoted by old gov't and bonded and we cannot get clear of it.

6th. 40,000.00—To meet interest on bonds and running expenses of Central R'y.

7th. 28,000.00—Ballast for Central R'y unpaid for at time this gov't came into power.

8th. 40,000.00—Second hand rails purchased for this beautiful Central R'y from I. C. R. six yrs. before we came into power.

9th. 10,000.00—Wharves and Elevators at St. John. Liabilities incurred by old gov't.

10th. 663,000.00—Expended on Permanent Bridges of what amount the Present Gov't is only responsible for one-third. Other two-thirds being contracted for by old Gov't and forced upon us when coming into power.

Now Gentlemen how much of this awful increase in Public Debt can you honestly place at the doors of the Flemming Gov't.

We ask your support on polling day the 20th of June so that Restigouche will be in line with the rest of the province with the conservative government again in power.

D. A. STEWART
ARTHUR CULLIGAN

ed collection of stumpage and called Copp a big bluffer, a man who could talk for nine hours and say nothing.

He said that during the Conservative government's regime seven bridges had been built and eight repaired in Restigouche. He spoke on the Railway policy of the government, and what they had done with regard to the iron mines of Bathurst claiming that the government had done a wise thing in not insisting on the full collection of the contract as the ore was too low grade to ship and the company were using concentrates and the mines would soon be working in full blast. This was an industry to be proud of, and the Drummonds would build up Bathurst.

He said that there were now 20000 men engaged on the valley Road which was to be a part of the I. C. R. notwithstanding the remarks of the opposition speakers. After touching on the oyster and clams fishery he concluded by asking the electors to judge the Flemming government on its record and return Stewart and Culligan to be their representatives on June 20th. The meeting was then closed.

weather a goodly number turned out and saw a very middling game. The various players are not yet into their game although the Mechanics new pitcher Shaddick showed up well. The final score was 6 to 5 in favour of the I. C. R.

On Wednesday the Firemen met the I. C. R., under cold and threatening conditions, the Firemen winning out by 8 to 4. The game was not by any means brilliant the scorers unable owing to the scarcity of paper to mark down all the errors, so for the benefit of the faithful fans and suffragettes the error column will be put into cold storage, for future use if any of our talented athletics become affected with "pomposian bumpatorian" i.e. swelled head.
