BRITANNIA LIFE ASSURANCE COMPANY. CAPITAL-ONE MILLION STERLING. wered by Special Act of Parliament 4 Vict., Chap. 9.

REDUCED RATES OF PREMIUM—RALF CREDIT RATES OF PREMIUM.

THE great and decided success which has attended this Institution, has induced the Directors to REDUCE the RATES originally required in British North America, to the ordinary Nigopean Rates. The result of each Reduction is to enable parties to avail themselves of the important benefits to Life Assurance at much lower Rates of Premium than those of any other Assurance Company t assurance has no of any other Assurance Company t assurance has necessary to the linearing the second to British North America the advantages afforded by the HALF CREDIT RATES of PREMIUM which have been se highly approved, and are so generally adopted by Policy Hebders in the United Kingdom. The most liberal conditions are likewise offered to the Assured in the limits to which they may proceed by sea or land, to other parts of North America without affecting their Interest in their respective Policies.

THE Advantages offered to the Public by this Institution are MANY and IMPORTANT, and the states of Premium quite as LOW as security to the Assured, and safety to the Office, will admit Society:

The peculiar Benefits secured to the Assured by the principle of the LOAN E-partment.

One half of the Premium for the first five years may be paid by the Assured own Note. These Notes need not be paid, but may remain on Interest, to be deducted from the Policy on the death of the Assured.

Insurers can at all times demand; as a right, a Loan to the extent of two-thirds the amount of Premium they have paid—upon deposit of their Policy, and guaranteeing it will be kept in force. This important advantage removes the fear so many cutertain of being obliged, through pecuniary emberrassment, so let their Policies lapse, and at a time such a provision is absolutely needed for their families.

THE COURIER.

TUESCAY, SEPTEMBER 24, 1850.

The Press of Quebec are congratulating country upon the prospect of our wonder strides towards prosperity, because Mr. Merr thinks he will visit Temiscounts and Bay Verte and drops apropos hints about a Railway or Canal from Trois Pistoles, which is to connect Quebec from Trois Pistoles, when he with the Bay of Fundy. There are some men who have a happy knack of sketching off pictures, of peace, prosperity, ac.—adapting them to particular markets—as Lord Elgin, while recks ing with the aroms of compounds gathered in pur-lieu of the market—and breathless after his flight penned a despatch, from which distant readers might have inferred, that Canada was a terrestrial paradise, we were so happy, so pleased with His Lordship—so profitably employed, and the trade of the country axhibiting such evidences of progress. The facility with which deception is practised, may be accounted for, by the gross we of education, of which the Colony is a conspicuo example; and it often occurs that journalists, who in private life, are amiable and excellent men, feel no hesitation in plunging, as political parti-gans, into the thick of the fight, battling for a paradox, or defending a delusion. We are asked to make merry and rejoice, because Mr. Merritt has reached Quebec, and because Mr. Merritt, being the genius of Canadian Ganals, some such project is to be an emanation of his sojourn there. In the abstract there can be no doubt, that a Canal stretching across a district of country like the Erie; connecting the regions of production with the shipping ports on the Atlantic; confers subthe shipping ports on the Atlantic; conters sub-stantial advantages upon a population, and infuses firesh energy into every department of material industry. The Americans have hit off the best mode of rendering Canals a source of wealth our rulers have, on the contrary, aunk us in quagmire of debt, in their schemes to construc what are equivocally styled our unrivalled system of internal navigation—wheever coined the phrase, must have been something of a wag; we may search far and wide for a parallel. We clog ourselves with a debt of millions, carve out the out-lines of gigantic Canals—and when our labors are closed, and we wait anxiously to catch the golden flood, lo! the statistics creep into view, and tell us that we are blundering fools. The traffic on the St. Lawrence Canals, for the year 1850, is sadly lessened, when contrasted with the year 1849. The shipping employed is fewer-passenge have dropped off-freights have diminished yet the tolls augment. And this is a sample of Canadian prosperity. The Canals are verily unrivalled - yet they are but a sample of the policy which pervades every department of the Government. Selfishness and ignorance are in the as cendancy-vulgar trickery is substituted for edu-cated frankness, and the highest merit of the cleverest of the Ministry consists in manufactu ing some quack remedy for one disease—ticketed Reciprocity or Retrenchment. We are not bound to produce a plan whereby the evils, of which the Colony complain, can be abated. The dozen men, who ape the airs of Statesmen, are raid their thousands out of the public chest as a Ministry-and upon them devolves the odium of failure They have propounced a dozen different schemes perfection—they have predicted the advent of Reciprocity, as if they could mould the minds of the American Senate to their will—they have told they have been converted; but their conversion restricted itself to the non-political subordinates already at the starvation point. Mr. Merritt enjoy the honor of having carried successfully the Welland Canal project; but he must be aware that he now occupies a position, of all others, most damaging to a politician. He is obliged to assent, as a member of the Cabinet, to opinions which are foreign to his own convictions. He cannot, and does not, pretend that we can be prosperous, while the statistics point to a declining commerce—and he most feel, whether he have courage enough to express himself or not, that some remedy must be promptly applied. We are not reluctant to advocate internal improvements where the wants of the people ask such ameliorations; but we must be just before we are generous, and we protest against any further borrowing of money upon the credit of the Province, and any further expenditure of money upon pubwhere the wants of the people ask such ame-liorations; but we must be just before we are generous, and we protest against any further bor-rowing of money upon the credit of the Province,

They armed themselves, and said they would protect the land they had seized, even if blood was apilled. A riot ensued, and the Mayor and several others, among whom was the City Assessor, were mortally wounded.

Besides the wounded there were nearly a dozen reported killed. Martial law has been proclaimed. A steamer was despatched from Sacramento Benichs to get the assistance of the U. S. forces, as the squatters threatened to burn the city, which the passengers by the Philadelphia asy they did. When the Philadelphia left Chagres, there were some few cases of the prevailing disease, which, nowever, were confined almost entirely to the native population. No fear need be felt by those wishing to cross the Islamus, as with proper care and attentior to health, there is little, if any, danger. No reliance can be placed upon the reports of persons passing through the place, as they are generally exaggerated.

The Parisians are a whimsical generation magination with them runs to seed. Among he many odd traits of individual character, the following, as furnished by the Paris correspon of the N. Y. Post, are not the least curious :-

A WOMAN'S PASSION FOR CATS. The inhabitants of the house No. 11 Rue St La-tare, have as co-lodger an elderly widow, one Ma-lame Deschamps, who has a great passion for cats. The inhabitants of the house were so much incommoded by the disagreeable and unhealthy odor which arose from that domestic menagerie, tha the nuisance. This officer in vain begget Mad.

and any further expenditure of money upon public works, until those which have already been completed are emancipated from the disastrous influences which paralyze their usofalness. There are members of the Cabinet, like Mr. Leslie, who would scorn deceit in private life—why is it that the Cabinet, collectively, perpetuate deception about Reciprocity 1. They must, or ought to know, that they cannot command it, and it is their duty to meet the evils of our position manfully. Honeaty and plain dealing should prompt them to cut down every salary to \$2,000, and reduce the duties upon urticles, imported six the St. Lawrence, which Cannot does not produce.

It was held at Niagara, the old Capital of Upper Canada, on a heautiful site of ground, and in every respect may be pronounced a most successful exhibition. Upwards of \$5,000, as I was informed, were taken at the gates; and as the tickels of admission were 71d. each, this would show that \$24,000 people had visited the grounds. The Show is universally admitted to have been the best the Society has had. The show of wheat, the great staple product of Upper Canada, was the best I ever saw. Mr. Allen, an ex-President of the N. Y. State Society, stated at the Dinner, that the wheat was much superior to that shown at the Exhibitions of their State. The sample which took the first prize, was raised by Mr. Christie, of Dumfries, and weighed 66 lbs. to the bushel. This, I understand, will be sent home to the great Industrial Fair. In eattle, the show was really splendid. The Durhams, Devons, Ayreshires, and Herefords, were there in all their shires, and Herefords, were there in all their shires, and the best that was ever exhibited in Canada. This is a gratifying evidence of a general improvement in the stock of the country. The first prize in the Durham class was carried off by Mr. Howitt, of Guelph, a relative of the distinguished writer; Wm. Howitt. The animal was a ball, of a beautiful white color, three years old, and in all the essential "points," touching the provention of the Chaplains of the Can Bishop.

and powerful plants, the virtues of which, though long known to several luding tribes, and recently to some eminent pharmaceutical chemists, are altegether unknown to the ignorant pretenders to medical science; and were never before administered in so happily efficacious a combination.

The first operation is to loosen from the coats of the stomach and bowels the various impurities and crudities constantly settling round them; and to semove the hardened faces which collect in the coavolutions of the small intestines. Other medicines only partially cleanse thees, and leaves such collected masses behind to produce habitual Coativeness, with all its train of cylls, or sadden Diarrheas with its imminent dangers. This fact is well known to all regular unatomists who examine the annual newels after death; and hence the prejudice of these well-informed men against the quack medicines of the age. The second effect of the VEGETABLE LIFE MEDICINES is to cleanse the kidneys and the bladder; and, by this means, the liver and lungs, the healthful action of which satirely depends upon the regularity of the urinary argums. The blood, which takes its red seeler from the agency of the liver and lungs, before it passes into the heart, being thus purified by those, and neutrified by food coming from a clean stomach, courses freely through the veins, renews every part of the system, and trumphantly mounts the banner of health in the blooming cheek.

The following are among the distressing variety of human diseases in which the VEGETABLE LIFE MEDICINES are well known to be infallible:

Contiveness, by cleaning the whole length of the intestince with a solvent process, and without violence: all violent purges leave the bowels control within two days.

Blar, some and Cholera, by removing the charp acrid fluids by which these complaints are exceptioned, and by promoting the lubricative secretion of the nuccus membrane.

Fovers of all kinds: by restoring the blood to a regular circulation, through the process of pengingles of the start cases, and the thorough solution of

egular circulation, through the process of per drops it seem cases, and the thorough solution il intest ad obstruction in others.

The Law Manicosus have been known to use EHEUMATISM permanently in three reckes, and GOUT in half-that time, by removing best imfarmation from the muscles and ligaments of the joints.

MINERAL WATERS

THESE truly valuable WATERS are distinguished for this large quantity of Bromine and Iodine they contain, and are acknowledged superior to all other Medicinal Waters. They are the most agreeable refreshment of the description that have yet appeared. They can be used cold to the greatest degree in the most oppressive heat of Summer, and that without altering or affecting injuriously the health of the person using them; upon the contrary, they are found to improve and attenuables. The large number of cares effected by the use of the above Waters, enable us to recommend them to the public us an excellent remedy in a very great number of cases. The names of a few only of the persons of celebraty, who have given their written recommendation of the Waters, are here given. These, however, show the happy results arising from their application:—
