MAGNETIC FLUID,

GENERAL DEBILITY.

The great peculiarity and excellence of Dr. Christie's Galvanic Curatives

sessiats in the fact that they arrest and co y outward application, in place of the usu-rigging, and physicking the patient, till ature sinks hopelessly under the infliction

They strengthen the whole system, equalize the lation of the blood, promote the secretions, and as the sightest injury under any circumstence their introduction in the United States, only coars since more than

REDUCED RATES OF PREMIUM—HALF CREDIT RATES OF PREMIUM.

THE grat and decided success which has attended this Institution, has induced the Directors to REDUCE the RATES originally required in British North America, to the ordinary European Rates. The result of such Reduction is the enable parties to avail themselves of the important benefits to Life Assurance at much lower Rates of Premium than those of only other Assurance Company, 4 onsuccing business in Canada.

The Directors have also resolved to extend to by the HALF CREDIT RATES of PRE MIUM which have been so highly approved, and are so generally adopted by Policy Holders in the United Kingdom. The most liberal conditions are likewise offered to the Assured in the limits to which they may proceed by sea or land, to other parts of North America without affecting their laterest in their respective Policies.

eir respective Policies.
ERASMUS R. FOSTER,
Resident Directo London, January 1, 1847. Detailed Prospectuses, and every necessary in formation as to the mode of effecting Assurance may be obtained upon application to J. H. MAITLAND.

March 28.

IXX,
Amniyain of the Water of the Georgian adjusting of the Water of the Georgian of the Spring.

I have made a careful quantitative analysis of a quantity of this Water sent me by the Proprietor of the Spring. Captain Kains. It is a Saline Water, containing earthy Chiorids, with portions of Bromids and Iodids, thus reseembling the Planting of Bromids and Iodids, thus reseembling the Planting enter Water, from which it differs chiefly in the presence of a portion of Sulphates, which are not often met with in Waters of this cleas in the Province. It has a specific gravity of 1008.78, and contains in one pound avoirdupons, the affixed quantities of the following substances:

Chlorid of Sodium.

Chlorid of Potassium.

Chlorid of Potassium.

PREPARED GUANO.

The Subscriber is now receiving a supply for Fall Seed nowing.

To THE LAPIES.

The Prepared Guano is put into boxes, expressly for Gardeus. Its fertilities generate a supply for Fall Seed nowing.

To THE Subscriber is now receiving a supply for Gardeus. Its fertilities of gardeus. Its fertility of Gardeus. Its fertility of Gardeus and pottor plants. Its fertility of Gardeus and the Authority of Gardeus and the following substances in the Subscriber is now receiving a supply for Gardeus. Its fertility of Gardeus. Its fertility of Gardeus. Its fertility of Gardeus and the subscriber is now receiving and supply for Fall Seed nowing.

The Prepared Guano is put into boxes, expressly for Gardeus. Its fertility of Gardeus and serving and subscribers, in all Flowers, Visios, & c., is very great?

The Prepared Guano is put into boxes, expressly for Gardeus. Its fertilities of cardeus and seven of the manuser is so combined, that the Ammonia is and other fertilizing garea are absorbed, fixed, and other fertilizing garea are absorbed, fixed, and other fertilizing garea are absorbed, fixed, and other fertilizing parea are absorbed, fixed, and other

Ducco, in the west total similar, and relevanting, or enterioring and fertilizing such lands as have been worn and adhadoned.

One advantage Prepared Guano possesses over ordinary Manure, is, that in sowing all kinds of grain, &c., it should be used broadcast after the ground is ploughed, and then harrowed in with the seed. Or it may be used to any time, as a top-dressing. One men can the senanter and seed dozen six acres a day, which is an actual s-wing, in labor, of the whole cost of the manure. Grounds intended for manuring, therefore, need not be seeded before the 10th or 20th of October, which affords the farmer the advantage of pasturing his fields five or six weeks longer than usu-it. It gives him time to gather in his crops, which are often neglected for the sake of preparing the glound tenited to seed down for grain, grasses, &c., so as to get them in by the 10th of September.

It is recommended to start Corn first, and when it is up from four to six inches, the Parrawen it is up from four to six inches, the Parrawen it is not should be spread over the surface, dad covered in at once. For Potatoes, a large table appointul stould be used, mixed up with the earth, and when hill or drill.

For Greenhouse Plants, Flowers, Vines, Well in each hill or drill.

For Greenhouse Plants, Flowers, Vines, Well in Fluit, and the like, it is only requisite to spread a handled or two good her surface round the eine will be all that can be desired.

MILLE PLISERELL.

indition of Suiphate of Lame, differing however in some respects as to quantify.
