Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- Coloured covers /
Couverture de couleur
 - Covers damaged /
Couverture endommagée
 - Covers restored and/or laminated /
Couverture restaurée et/ou pelliculée
 - Cover title missing / Le titre de couverture manque
 - Coloured maps / Cartes géographiques en couleur
 - Coloured ink (i.e. other than blue or black) /
Encre de couleur (i.e. autre que bleue ou noire)
 - Coloured plates and/or illustrations /
Planches et/ou illustrations en couleur
 - Bound with other material /
Relié avec d'autres documents
 - Only edition available /
Seule édition disponible
 - Tight binding may cause shadows or distortion along
interior margin / La reliure serrée peut causer de
l'ombre ou de la distorsion le long de la marge
intérieure.
 - Blank leaves added during restorations may appear
within the text. Whenever possible, these have been
omitted from filming / Il se peut que certaines pages
blanches ajoutées lors d'une restauration
apparaissent dans le texte, mais, lorsque cela était
possible, ces pages n'ont pas été filmées.
 - Additional comments /
Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages / Pages de couleur
 - Pages damaged / Pages endommagées
 - Pages restored and/or laminated /
Pages restaurées et/ou pelliculées
 - Pages discoloured, stained or foxed /
Pages décolorées, tachetées ou piquées
 - Pages detached / Pages détachées
 - Showthrough / Transparence
 - Quality of print varies /
Qualité inégale de l'impression
 - Includes supplementary material /
Comprend du matériel supplémentaire
 - Pages wholly or partially obscured by errata slips,
tissues, etc., have been refilmed to ensure the best
possible image / Les pages totalement ou
partiellement obscurcies par un feuillett d'errata, une
pelure, etc., ont été filmées à nouveau de façon à
obtenir la meilleure image possible.
 - Opposing pages with varying colouration or
discolourations are filmed twice to ensure the best
possible image / Les pages s'opposant ayant des
colorations variables ou des décolorations sont
filmées deux fois afin d'obtenir la meilleure image
possible.

This item is filmed at the reduction ratio checked below /
Ce document est filmé au taux de réduction indiqué ci-dessous.

10x 14x 18x 22x 26x 30x

12x 16x 20x 24x 28x 32x

The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

LABORATORY

OF THE

INLAND REVENUE DEPARTMENT
OTTAWA, CANADA

BULLETIN No. 289

STRAINED HONEY

CORRECTION.

Bulletin 245—p. 10—Sample 49135. In last column, the statement should read
‘Vanilla high. Contains Coumarin. Mixture.’

LABORATORY
OF THE
INLAND REVENUE DEPARTMENT
OTTAWA, CANADA

BULLETIN No. 289

STRAINED HONEY

OTTAWA, AUGUST 25th, 1914.

J. U. VINCENT, Esq.,
Deputy Minister, Inland Revenue,

SIR—I have the honour to submit to you a report upon one hundred and ninety-four (194) samples, purchased throughout Canada in December and January last as Honey, chiefly as Strained Honey.

Honey is defined by an Order in Council dated 17th October 1912, and published by this Department as Circular G 1047, as follows:—

HONEY.

Honey is entirely the product of the work of bees operating upon the Nectar of Flowers, and other saccharine exudations of plants; and contains not more than twenty-five (25) per cent of water; not more than eight (8) per cent of Sucrose (Cane Sugar); not more than twenty-five hundredths (0.25) of one per cent of ash; and not less than sixty (60) per cent of Invert Sugar.

The standard above defined became effective on the 25th November, 1912.

The invert sugar referred to in this definition is of course that naturally present in the nectar of flowers, or produced by the operation of the organism of the bee; and not invert sugar artificially produced by the action of acids, or otherwise upon sucrose. This interpretation follows necessarily from the first statement of the definition.

Honey enjoys the peculiar distinction of being specially mentioned in the Adulteration Act, and is the only article of food in whose special regard this protection is granted.

Section 30 of the Act as it appears in the Revised Statutes of 1906, is as follows:

30. Honey. Except for the exclusive purpose of consumption as food, no person shall feed with or expose with intent that bees shall feed on the same, any sugar, glucose or any other sweet substance other than such as bees gather from natural sources; and no honey made by bees in whole or in part from any of such substances, and no imitation of honey or sugar honey so called, or other substitute for honey shall be manufactured or produced for sale or sold or offered for sale in Canada. 59 V., c. 12, s. 1.

This section was repealed in May of this year, and the following substituted, under date 6th May 1914.

Honey. "The word honey shall not be used either alone or in combination with any other word or words on the label or other mark, illustration or device on any package containing any article of food which is or which resembles honey made by bees and no package containing any article of food which is not pure honey shall be labelled or marked in such manner as is likely to make persons believe it is pure honey and any article of food labelled or marked in violation of this section shall be deemed to be adulterated within the meaning of this Act."

Medicinal syrups. "The provisions of this section shall not apply to any syrup or compound manufactured and sold for medical purposes only."

It will be noted that substitutes for honey as an article of food were strictly prohibited manufacture or sale in Canada, and are still forbidden the use of any name in which the word "Honey" occurs; and in order to give publicity to this peculiar condition in regard to honey, the Department caused the following circular to be distributed in 1909.

20

Adulteration of Food.

G. 862.
10,000.

DEPARTMENT OF INLAND REVENUE.

TO ALL DEALERS IN ARTICLES OF FOOD.

OTTAWA, January 20th, 1909.

SIR.—Under Section 30 of "The Adulteration Act" the manufacture, sale or offering for sale in Canada of any imitation of honey or sugar honey or other substitute for honey is strictly forbidden. The provisions of Sections 24 of the said Act respecting the use of the word "mixture" does not apply to honey and any production or sale of this article as a compound is absolutely prohibited.

The punishment for any offence against the provisions of Section 30, above referred to, is determined by Section 164 of the Criminal Code and consists in the liability to a term of imprisonment of one year.

I remain, Sir

Your obedient servant,

W. J. GERALD,
Deputy Minister.

In the case of butter, a similar prohibition of manufacture and sale of substitutes or imitations exists; but under special legislation (The Butter Act, 1903, and The Dairy Industry Act, 1914.)

Of the samples now reported 159 meet the requirements of existing standards for Honey, and 22 other samples are legally genuine except in one particular, namely excess of mineral matters the non-volatile portions of which appear as "ash."

Ash is legally limited to 0·25 per cent, or one part in 400. The excess found above this maximum is trifling in most cases; but it is to be noted that ash existing in honey is chiefly due to dust or dirt and inspection of the results of analysis will show that most of the samples found to be genuine have a very low ash percentage, generally less than one part in 1000 (one tenth of one per cent).

In the strictest reading of the law, all samples containing more than 0·25 per cent ash are adulterated.

One sample (No. 2433) contains slightly more cane sugar than the law allows. The excess above 0·25 per cent, is so small that I have judged it as "doubtful" rather than "adulterated".

Two samples (Nos. 58522 and 58679) are not sold as honey, but as Honeymoon Syrup. The remaining ten samples call for special comment.

No. 56185 Is not honey. Alleged furnishers deny having supplied the article; The vendor has been notified, but has given no explanations.

No. 39092 Is not honey. No explanations have been received from vendor, manufacturer or furnisher.

No. 39093 Is not honey.

No. 2337 Both vendor and manufacturer claim to have sold this as Honeymoon Syrup which is at variance with the invoice of the inspector.

No. 39097 Is not honey. No explanations having been received in the case.

No. 58676 Is not honey. Was invoiced to the vendor as Balaklava Honey.

No. 58681 Is not honey. No explanation from vendor.

No. 59219 (The vendors assert they bought the article as honey.

No. 59221) But they suspected its genuineness in consequence of its low price. The furnisher states that the article was made by T. Schaehter, Montreal, and sold as compound honey.

No. 50040 Is not honey. The manufacturers state that the sample was made in 1911, and that they have since discontinued the manufacture of imitation honey.

If adulteration of a kind to justify prosecution exists, in the case of the present inspection, it does so in the ten samples just referred to. I may be permitted to point out that these samples contain nothing injurious to the health of the consumer, and that a presumption of honest intent on the part of the vendor and perhaps even of the manufacturer may be allowed, inasmuch as substitutes for or imitations of foods are distinctly recognized as legitimate and are provided for in the Act, as long as they are labelled correctly, in such a way as to prevent deception of the purchaser; honey being the sole exception in this regard.

That its exceptional position justified special warning seems to have been recognized by this Department in 1909, when circular G-862 was published. The experience of our inspectors is that the larger and better informed retailers refuse to handle all imitations of honey, and that it is only in the smaller shops that the article is found.

It is certain that no illegal manufacture of artificial honey, upon any considerable scale, exists in Canada, and I am convinced that the requirements of the Act only need to be better known, in order to their receiving universal recognition.

This article has been made the subject of inspection on seven different occasions since 1897, the last being in June 1910 (See Bulletin No. 217). Our last report concluded with the sentence "It is satisfactory to know that honey, as offered for sale in Canada, is for the most part a genuine product." And this statement is correct to-day as in 1910.

I beg to recommend publication of this report as Bulletin No. 289.

I have the honour to be, Sir,
Your obedient servant

A. MCGILL
Chief Analyst
