## THE WHEAT SURPLUS

York County farmers and others who are perplexed to know what will become of Canada's surplus wheat if a reciprocity agreement is not made with the United States, should ask themselves what has become of the surplus wheat of the United States in the past. It has been shown, and The Globe accepts the figures, that Great Britain needs 212,000,000 bushels of wheat this year, while Canada will only have 140,000,000 to export. The United States will have 90,000,000 for export. The United States' surplus is falling rapidly year by year, and that is why the United States wants reciprocity. The Americans are looking ahead and want Canadians to pay to get into a market which Americans cannot afford to keep Canada out of. Uncle Samuel is losing none of his shrewdness.

But what has Uncle Samuel been doing with his surplus wheat? Exactly what Canada will do with hers. When there was a surplus he exported it, as he will his 90,000,000 bushels this year, at whatever price Liverpool decided to pay. Uncle Samuel, with all his shrewdness, has never been able to make the price of wheat, although he would have the Canadian farmer believe he does. As the years passed on, and the population of the United States increased, more and more of his wheat was consumed at home, until gradually the wheat lands became exhausted, and American farmers, like other farmers, had to resort to mixed farming.

What has happened to Uncle Samuel will happen in due course to Canada. The wheat lands will not last forever, although they are at present apparently inexhaustible, and new tracts are being opened every year. At the same time the population of Canada will grow as the population of the United States has grown, and the home market every year will make greater inroads on the surplus, while the increase of mixed farming will tend to diminish the wheat yield. As the prairie provinces approximate to Ontario farming conditions, the wheat surplus will be less and less of a problem.

But the biggest wheat market of all has not yet been tapped, or scarcely tapped. That market is the 40,000,000 of Japan and the 40,000,000 of China, besides which Uncle Samuel's market of 90,000,000 is insignificant. The transpacific traffic of the C.P.R., the C.N.R., and eventually the G.T.P. Railway, will transcend anything that has been suggested of the American market. The civilization of China and Japan means the increasing consumption of wheat, and a market for any surplus that Canada is likely to have in this century.

The folly of making ourselves an appendage of the United States, when we have an independent national career of our own before us, is enough to disgust Canadians who understand the situation, with the very suggestion of reciprocity. The pact is the result of a political exigency in the United States, which Sir Wilfrid Laurier misjudged as likely to suit his own political exigency at home. Canadians will treasure their own independence, and provide for their own national destiny by repudiating the pact.

Canadians who have the Canadian spirit, who appreciate the great gift of their birthright, and the wonderful possibilities of their national destiny, ought to be aware of what Americans as a nation think of the importance of Canada's future, and the desirability of incorporating Canada's wealth and resources in the possessions of the United States. For party purposes, the Liberals of the machine have agreed to pooh-pooh the idea of annexation, and for the purposes of party politics it may be very well to pooh-pooh it. But the Americans of the United States have never swerved from their ideal of an all-American republic, and they conceive the union of British America and the United States to be brought appreciably nearer with the ratification of the reciprocity pact. Any American will admit this, if he is not to be quoted in public. And most of the American newspapers make no bones of it.

Here is an example, which is taken from the Auburn (N.Y.) Cayuga County News, of the opinion of the masses of the United States people: "If, as the president believes, reciprocity with Canada results in a benefit to all classes of our citizens, everybody will be happy. But, on the contrary, if it results in injury to some of our citizens, and especially the farmers, it may be set down as a certainty that in that event the next Republican national convention will adopt a plank on this question that will be satisfactory to the farmers of the country, because, as we have already stated, a majority of the Republican representatives in congress have expressed their doubt of the policy by voting against it. "The result of reciprocity with Canada will be watched with interest and anxiety by the American people, and now that it is a practical certainty we will turn our attention to the next step in this program, and insist that the other part of this national and international scheme be carried out at the earliest possible moment. "Canada is now commercially annexed to us by this agreement, and there is no reason why she should not be politically annexed, and we think that it is inevitable that this will and must come within the next decade. "We favor annexation, for our farmers would have nothing more to lose and have something to gain thru bringing Canadians in to bear their share of our national burdens for the support of our government and the development of American institutions. Now that we are commercially one nation, hundreds of thousands of Americans will move into the Canadian Northwest. It will be an 'American invasion,' and this will so inculcate the American spirit into western Canada that it will be more American than Canadian."—Auburn (N.Y.) Cayuga County News.

## MCKENZIE KING CALLS PICKERS 'HUMAN HOGS'

"What Has King Done to Curb Combines He Talks Of?" Asks Richard Blain—King Says He "Wouldn't Stand For" Reciprocity in Manufactures.

BERLIN, Sept. 3.—(Special.)—Over four thousand people attended to-night the stormiest political meeting held here in years. It took place in the big boozery rink known as the auditorium, and proceedings had no more than started before the fighting instinct demonstrated itself in the audience, one side vying with the other in cheering and jeering, both Mr. King and Mr. Blain being subjected to the unprecedented amount of interrupting and heckling. Continued interruptions of these gentlemen with demands for something about the strike revealed the temper of the meeting; it was the Grand Trunk strike they wanted to hear about, the reciprocity discussion could wait until another time; but King and Blain stuck to the issue of the day pretty well, with Jas. Murdoch, one of the leaders of the famous strike following with a history of the settlement of the conflict, giving credit to the minister of militia and the minister of labor for getting terms far beyond what the strike leaders would have been able to obtain.

Mackenzie King proposed that Mr. Blain should speak first, but the latter declined to accept this arrangement, so Mr. King opened.

He dealt with reciprocity in its relationship to consumer. It was a constructive measure and its opponents were meeting it not by argument, but by misrepresentation. He laid special stress on the assertion that the agreement affected only natural products, not manufactured articles. Liberals from the outset had refused to consider the United States market, and he certainly would not stand for it. Statistics were quoted to demonstrate that hogs and cattle were raised in the United States than in Canada, while ham, bacon, beef, etc., were sold cheaper to the consumer in the United States. Owners of packing houses in Canada were referred to as "human hogs," fattening on both farmer and consumer, and his opponents were made aware of the fact that reciprocity would overcome the evil by providing competition. He did not believe in restricting the market as to the people's food. Last year Canadians had paid \$3,500,000 duty on foodstuffs coming from the United States. The removal of this duty could not do other than lessen the cost of living.

U. S. Farmers Selling Holdings. Mr. Blain, late M. P. for Peel, said he was present in the interests of Mr. Nelson.

## The Campaign.

The outstanding features of the reciprocity campaign—rather the anti-reciprocity campaign—in Canada are this morning three: 1. The growing conviction among Canadian cities that a manufacturing and business disturbance hangs over the United States, and that a reduction in employment of men and a cutting of prices and liquidation threaten to become still more acute, involving slaughter prices and dumping of goods in outside markets.

2. The wonderfully accelerated growth of the feeling in Canada that reciprocity, especially at such a time, were it to come into operation, would strike a serious blow to our surprising run of business and prosperity—in other words that it would mean that Canada must drop to the level of things in the States. FREE TRADE MEANS FREE TRADE IN CONDITIONS.

3. The wonderful daily growth of the feeling among Canadians against reciprocity. Ministers in this province are threatened with defeat in North Brant, Waterloo, North York, Brantford and Toronto, and in South Ontario. The factories and workmen of Oshawa that voted for and elected him in the last election, are ranged almost to a man against him.

The French-Canadians of Quebec are becoming more and more distrustful of reciprocity, because it means in the end a shattering of their laws, their language and their institutions.

## AN ALTERNATIVE POLICY, YES!

Is there no way of meeting the grievances of the farmer? Is there no way of meeting the grievances of the manufacturer, which is at present uncertain and an unational one? Relief of a most substantial kind can be effected by a better regulation of railway and express and telegraph tolls, by the encouragement of the dead meat industry, by state encouragement of better farming by a reconsideration of the tariff after a thorough investigation by a board of tariff experts. There has been no such scientific investigation of reciprocity. The only reason given for it so far has been the insufficient reasons that the government when they signed it thought the great majority of Canadians of both parties favored it. We can well afford to take time to consider it in detail and to see if there is not a better way out of the situation than the sudden decision of calling on Washington to regulate our own internal grievances such as they are.

## BIG SMELTER BURNED WORK OF INCENDIARY

Firebug Has Started Dozen Flames Within a Week, Three of Which Entailed Large Loss—Hall Mines Smelter One of Largest in Canada—Valued at \$750,000.

NELSON, B. C., Sept. 2.—At midnight the huge plant of the Hall Mines Smelter, covering 13 acres of ground, and one of the largest plants of its kind in Canada, is a mass of blazing, crackling ruins. Nothing is saved except the seven miles of cable running from the smelter to the Lode Mountain mine on Lode Mountain, the tall, blackened chimney, one of which is 200 feet in height, and the one-story building used as an office. Everything else, the huge smelters, the tramway terminal and dump, the assay office, the bridge house and numerous smaller buildings, are a tangle of blazing timber and twisted iron. The furniture in the past two weeks has started a dozen fires, three of which have entailed enormous loss. Last night the Nelson Colliery house, situated out on the hillside, was destroyed, with a loss of \$600.

The plant destroyed to-night is conservatively estimated to have cost \$750,000. The incendiary has shown the utmost persistency. At noon today the watchman discovered the fire in the smelter and he promptly quenched it and arranged for extra guards. To-night at 11 o'clock after he had made the rounds of the buildings, fire broke out and within a few minutes the plant was a blazing furnace. By midnight the entire plant was practically consumed. Nothing could be done to save the buildings.

No water supply available. The smelter, built of magnificent timber, is situated on the hill above the railway just outside the city limits and no water supply was available. The fire brigade could only watch the blaze from the town, ready to grapple with any fire that might break out in the city. From the assay office, a few chemicals were saved as valuable. The furniture in the smelter was consumed even if dangerous bush fires were avoided.

The complete absence of wind prevented a far worse calamity. The Hall Mines Smelter was formerly used to treat ore of Silver King and other famous properties of Lode Mountain, Morning Mountain and adjacent territory, and employed hundreds of men.

## NEARLY 26,000 NEW VOTERS (South York Takes in Almost 3000) ADDED TO CITY RIDINGS

Significant Defections. HALIFAX, Sept. 3.—(Special.)—An indication of how the campaign is going in Finance Minister Fielding's riding of Queens-Shelburne, it may be stated that W. P. Furney, a well known barrister of Queen's and a Liberal candidate in the local elections in June last, is out strongly against reciprocity, and is working for F. B. McCurdy, Fielding's opponent. In his last issue, The Goldhunter, a Liberal paper published in Caledonia, Queen's, announced its policy as against reciprocity, and is supporting the Conservative candidate. These defections in Fielding's riding are considered serious for the Liberals, and the chances of McCurdy growing brighter daily. In fact, the sporting fraternity are now betting even money on the result.

## CASTING SHADOW ON PROSPERITY OF CANADA

That is What Reciprocity is Already Doing in Oshawa, Declares W. F. Cowan—"Canada or Not Canada" the Question, Says W. F. Maclean.

OSHAWA, Sept. 3.—(Special.)—W. F. Cowan, president of the Standard Bank, and for 50 years the town's most notable citizen, to-night introduced W. F. Maclean, Conservative candidate in South York, to 500 citizens gathered in about a spacious tent pitched on Dr. Kelsey's lawn. It was a highly successful political meeting in the history of Oshawa, and it was the first of those opposed to reciprocity. Mr. Cowan's remark that reciprocity was casting a shadow over the prosperity of Canada was the most telling utterance of the evening.

Mr. Cowan, sprightly at 80, with the clear enunciation of a man of 40, said he had not intended to be present, but when he knew his friend, Mr. Maclean, was to speak, he gladly availed himself of the opportunity to say a few words in introducing him. He was an old friend of Mr. Maclean's father the late John Maclean, who was the first apostle of protection in Canada. He was the father of the national policy. It had been his privilege to sit at the feet of John Maclean and hear the first explanation of a policy that had made Canada what it was to-day. (Applause.)

A Prosperous Town. Apologizing for personal references, Mr. Cowan said he had come to Oshawa 50 years ago, believing in protection and interested in manufacturing. He had done what he could to help build up the town. He had seen it grow until it was an industrial centre, exceptional in Canada, and if given a chance for a few more years it would be a thriving city. Nearly 1,000,000 was paid annually in wages, \$1000 to every family in the community. Seeing what the national policy had done for Oshawa, he could not imagine anyone supporting reciprocity.

What was needed in Oshawa was more factories, not fewer. If we were burnt down the desire would be unanimous to rebuild. He had seen the malleable iron works, with which he was identified, burnt down. He and his brother had been inclined to retire from business, but when he saw strong men weeping and offering their services, he had changed his mind. He would rebuild, he considered it his best duty to rebuild, although he had lost 100,000 by the fire. Before rebuilding began he was glad to remember he had contributed \$1000 to those made needy by being thrown out of work. But now, apparently, in view of

## Arthur Hawkes Calls the Bluff

Arthur Hawkes, champion of the British-born and foe of reciprocity as weakening the imperial tie, is not of the bluffable order of mankind, as the two telegrams given below sufficiently indicate. Mr. Hawkes received a wire from Hon. George Graham's organ, The Brookville Recorder, yesterday morning. It was manifestly an attempt to bluff him, by calling upon him to preach imperialism in Quebec, in the belief that he would refuse the jump. But Mr. Hawkes didn't. Read the tale of the two telegrams: Brookville Recorder Printing Co., Limited. Your telegram received five minutes ago. Have absolutely no connection with the Imperial Mission. Accept your offer with following conditions: No payment whatever to be made to me, you to arrange meetings and obtain Sir Wilfrid Laurier's recommendation to the people to come and hear me. Cannot break all my engagements to speak before election, but will give Sunday, Sept. 17, an extra following meeting, spending your thousand dollars in advertising meetings and distributing verbatim translations of my speech through Quebec. Answer. A. Hawkes.

## RESCUED GIRL CANOEIST

Miss Browning Saved in Nick of Time by Two Bathers. A girl canoeist had a narrow escape from being drowned in the lake opposite Munro Park, at noon yesterday. The girl, Miss Browning of Balmy Beach, upset when about 500 yards from shore. Two bathers, one of whom was Harry Cooper of 745 Shaw-street, swam out to the rescue. He caught her just in time, for shortly afterward she became unconscious. She was taken ashore in another canoe, which arrived sometime after the two young men had got there. It was some time before the girl was able to get home.

## GIRL WASHED OVERBOARD

Third Officer of Pretorian Lost His Life in Effort to Save Her. ST. JOHN'S, Nfld., Sept. 3.—Reports of the drowning of Mary Morgan, a fourteen-year-old girl passenger, and Arthur Ballantine, third officer of the vessel, who went to her assistance when she was washed overboard, were brought in by the steamer Pretorian, which arrived here from Liverpool late yesterday. The Pretorian ran into a hurricane Wednesday and during the blow the girl was washed overboard. Although the accident was not witnessed by anyone of the remaining members of the crew, it is thought that Ballantine saved her after the girl in the hope of saving her. Miss Morgan was on her way to this city with her mother to meet her father.

CASTING SHADOW ON PROSPERITY OF CANADA

Continued From Page 1.

The reciprocity plans, a generation had grown up that did not know Joseph A. Banfill Shadow.

Mr. Cowan briefly sketched Canada's huge prosperity. Why endanger it? Home-owners should not be hoodwinked by partisan policies that suggested destruction to the prosperity the national policy has built up.

Reciprocity cast a shadow over the prosperity of Canada. Already in Ontario that shadow had been banished. One industry employing from 40 to 50 men would have been started in Ontario if reciprocity had not been put forward.

He recalled a conversation he had had with a blustering Yankee on his way to the U. S. This Yankee had been saying that the U. S. was the greatest country in the world, with which no other one could compare.

Mr. Maclean was warmly received. He had been in the house of commons for twenty years and in public life longer than that and found it pretty much made up of hard knocks.

It is Canada or not Canada that is the issue in this election, declared Mr. Maclean. He traced the history of Canada's attainment of her own fiscal independence, resulting in Canada's being masters of their own tariff.

Ordinarily the making of a tariff was in the hands of the members of the house of commons and not in the hands of the president of the U. S.

Never Too Late for Justice. The market gardeners of South York to whom the new tariff meant ruin, had protested, but they were told "You have come too late."

The injury to Mrs. Frank Arnold's hand is not so serious as was at first reported, and she will be in her place at the Ladies' Depository luncheon and tea room in the woman's building at the exhibition to-day.

Mr. and Mrs. G. T. Davis, Oaklands, Kingston road, have returned from England. Mr. and Mrs. Douglas Warren have taken Mrs. C. D. Warren's house in Walmer-road, for the winter.

Mr. Maclean charged Messrs. Fielding and Patterson with lacking information in negotiating the pact. The U. S. experts had studied the question. When information finally was brought down to him he was in the form of a book printed in Washington.

NEW WORSHIP IN COMFORT.

For the first time in several weeks, the congregation of the Parkdale Methodist Church occupied the church proper yesterday. While workmen were installing a handsome pipe organ they have been holding services in the Sunday School room on Dunn-street. The organ, when completed, will, it is said, be the second finest instrument in existence.

CANADIANS WIN AGAIN.

LONDON, Sept. 3.—(C. A. P. Cable).—The adjudicators in the artillery competition have decided that while the Canadians are easy winners of the Londonderry Cup, their percentage of 129 points did not reach the standard to warrant the official award to that effect. The officers, who are pardonably elated at their dual success, are guests of the Earl and Countess of Strathbrooke at Henham Hall, Suffolk, and sail for Canada on Wednesday.

## MASSACHUSETTS STAKE A ROMP FOR B. T. C.

Lee Wilson Wins Blue Hill Trot in Four Heats—Heavy Track at Readville.

READVILLE, Mass., Sept. 2.—Never before in the history of the Massachusetts Stake, inaugurated in 1896, has it been won so decisively as was the case today. Lee Wilson, driven by Tommy Murphy, won the Blue Hill Trot in four heats, with a high wind against the horses down the home stretch, yet to win 2:14 1/2, a time which is a record for the Blue Hill Trot. The race was a romp for B. T. C. as the favorite, Lee Wilson, won in four heats, with a high wind against the horses down the home stretch, yet to win 2:14 1/2, a time which is a record for the Blue Hill Trot.

By far the best race of the meeting was the 2:14 1/2 class, trotting, purse \$200, amateur drivers. Lee Wilson, driven by Tommy Murphy, won in four heats, with a high wind against the horses down the home stretch, yet to win 2:14 1/2, a time which is a record for the Blue Hill Trot.

Dequity Michigan Tennis Champion. The Detroit Country Club, this afternoon won the Michigan State Tennis Championship by defeating the champion of Cleveland, the title-holder, in three straight sets, 7-5, 7-5, 6-3.

Merritt Wins Niagara League. The Niagara District baseball season with six games of 21 games played, had the result reversed. Merritt would have been the champion, but by the defeat there by a score of 10 to 4. The teams finished the league as follows:

Merritt 14, W. 8, Throld 8, Welland 12, St. Catharines 10, Niagara Falls 10, Port Colborne 5.

The league executive will now arrange a series of games between the victorious team and a team picked from the other five aggregations.

## LAST DAY AT WINDSOR OPENING AT PIMLICO

Little Father Defeats Guy Fisher in a Drive—Two Steeplechases at Baltimore.

WINDSOR, Sept. 2.—(Special to The Sunday World.)—W. W. Danden furnished the winner of Windsor's feature race today, the St. Clair Handicap, in Little Father, who beat Guy Fisher on a neck in a driving finish. Little Father was an outsider in the betting and made practically all of his own pace. The day was an ideal one for outdoor sport and a record-breaking crowd was in attendance. Thirty-seven drivers were in the race and speculation was brisk. The Sobor stable won the mile and a sixteenth handicap with Eddie, while Tom Gargis, who has gathered in all of the steeplechase runs at the meeting, furnished the winner of today's race in St. Abe who galloped home with a 20-length lead. ## Play Extra Ends Preliminary Round Beach Tournament

The fourth annual tournament of the Balmy Beach Bowling Club began Saturday afternoon at two o'clock on their lawn, and also that of the Kew Beach B.C. The popularity of the Balmy Beach Club is shown by the large entry list. No less than 86 crick entered for the handsomely equipped club, has hung up for the two competitions. Unfortunately, their hoodoo, the weather man, again insisted upon making his appearance. The morning rain left the lawn very wet. The first draw of the preliminary began promptly two and had hardly started when the rain man again appeared. Light showers continued all afternoon, the thousands of the competitors being all the while in the rain. The greens, nevertheless, played well, and fine plays were made. The usual surprises occurred. Longhead caught a tartar in Hastings of Mimico. There were several extra ends.

## Baracas Win 3 to 2 First at Hamilton From Westinghouse

On Saturday afternoon the Baracas, senior champions of Toronto, journeyed to Hamilton, where they won the first of the home-and-home games for the championship of the O.E.A. from the Westinghouse team, champions of Hamilton, by a 3 to 2 line-up.

Baracas (R. Goal, Hardly, right back, Notcutt, left back, Alwood, halves, Foley, Bingham, Reave, forward, Gillispie, McLaughlin, Dalsell, goal). Westinghouse (D. Goal, Newton, right back, H. Thomas, left back, Hunter, McLaughlin, forward, Newton, Gillispie, forward, Thomas, Wands, Wilton, Hewson, Thomas). Referee, McNettie of Hamilton. Westinghouse won the toss and elected to kick in the south goal, which gave them the advantage of a very strong wind. This, together with the fact that Baracas team did not arrive until twenty-five minutes of the game had been played, handicapped the visitors considerably. However, they managed to hold their own and do a little bit better, for 15 minutes of the game had been played, when they were leading 2 to 0. Grant secured it and passed it out to Scott, who tricked three men, then played a superior class of ball and sent it into the net. Half-time score, Baracas 2, Westinghouse 1.

In the second half the wind had gone down considerably, but was still blowing and the Baracas came right down to the ball and sent it into the net. Grant and McLaughlin shot and missed by inches. Gillispie also put in some fine cross shots and Newton held an anxious time of it. Foley accidentally fouled the ball in the penalty area. Hewson took the kick and made no mistake, combining the score, 3-2. The Baracas came down the field with a nice piece of combination. Gillispie shot, Grant to Scott, who shot, the ball striking Hunter. Dalsell secured and set for a shot, but the referee again blew off-side.

With only one minute to go, Tiny Thomas secured the ball and sent it into the net, which scored the winning goal, 3-2. It was a great game and the spectators sure got their money's worth, many of whom expressed their intention of coming to the return game, which will be played at Rosedale Saturday, Sept. 10.

LABOR AND THE NATIONAL POLICY

This Labor Day finds the Canadian industrial world free from disturbance of moment, presenting in this an instructive contrast to recent events in the United Kingdom and to existing circumstances in the United States.

The workers have shared in the abounding prosperity of the Dominion and they may well ask themselves whether it is a wise and prudent proposal to alter the national policy that has resulted so favorably to all classes.

Reciprocity by removing the protective barrier that has made and maintains the fiscal and commercial independence of the Dominion cannot but introduce a factor over which no efficient control can be exercised.

Many of the most acute and informed observers and critics of United States conditions agree that the republic is on the verge of a grave social upheaval. No one can read the comments of the press organs of the capitalist combines without perceiving that they are inspired by deep-rooted antagonism to the labor unions.

Attention having been directed to the comparatively decent and reasonable campaign conducted by The Star up till Thursday last, that newspaper promptly took steps to repair any omissions that might have distinguished it from the ordinary Grit campaign.

brother that I wish to ask to defeat the Laurier tribe, who have nothing for us for had it been any other union for which the working man has voted it would have received the same duty deal that we received from the hands of Mackenzie King and the Grit government.

A lot has been said in this campaign in regard to the wickedness of the pork packers, especially those who make from 25 per cent. to 100 per cent. in this connection.

RAILWAY CONTRACTOR DEAD. CORNWALL, Sept. 3.—(Special.)—J. Frank Cameron of the south branch, a member of the firm of Trickey & Cameron, who have a contract on the Canadian Northern, near Sydney, N.S., died here to-day. He was about 56 years of age, and was a son of the late John Cameron of Hooac Tunnel fame, who in his day was a well-known contractor on public works. His grandfather was the late Col. John Cameron. The deceased spent most of his life on railroad construction, and was in charge of the spur being built by the Ontario Government from the T. & N. O. to Fort Porcupine. His wife and several children survive him.

DEMOGOGIC APPEAL. From The Sentinel: The United States has already asked for the removal of all customs barriers between the two countries. Free traders in every locality in Canada are coming out of their burrows and insisting that the manufacturers and bankers have had their way too long, and they talk rubbish about Canada being a darling young aeronaut of Michigan, who fell with his parachute into an artificial lake and was drowned before assistance could be given to him. A large crowd of people who gathered to witness the display saw the aeronaut down, but were helpless to save him.

A doctor was summoned and the stomach pumped, but the only hope of saving the man's life was by rushing him to the hospital. A hurry call was sent and McCracken was removed to St. Michael's Hospital, where he died shortly afterwards...

Funeral Directors. LIKE A RED WESTERN DRAMA. Ernest Beady, 215 Waverley-road, was feeling in excellent spirits on Saturday evening and, being under the influence of spirits, cared little for what he did. He suddenly got the notion that he was a truck that and went into the street with his double-barrel gun and brandished it about in great style, much to the amusement of those who had a good fort in which to hide. The rest of the onlookers were somewhat scared and nearly went into spasms when a few shots rescued him from the air. Beady's stillness. Beady is now resting in the police station, and the charge of discharging a weapon is laid against him.

BLACK HAND MURDER CONSPIRACIOUSLY PLANNED

Get Victim Drunk and Laid Handkerchiefs to Mark Spot to Aim At From Opposite Window.

NEW YORK, Sept. 2.—The shotgun came into play again to-day as the deadly weapon of supposed "Black Hand" in one of their most frequent haunts on the east side. The murder was attended by decidedly unusual circumstances. The victim, Frank Busso, a Sicilian, was shot dead while he was lying on his face on a table under a small shed in a yard in the rear of an East Sixty-third-street tenement. Two white handkerchiefs lay on his body, one above and one below the wound, and an electric arc light was directly overhead. Busso had been playing an Italian game similar to the old English bowls, and had been drinking to some extent. The police believed that the murder was planned; that the man was plied with drink until he became drowsy and was placed on the table, and that the handkerchiefs were laid on him to mark the spot at which the assassins would aim from a nearby window. A shotgun loaded with slugs and buckshot was the weapon used. Whether it was the murderer has not been determined. The row of houses in the rear of which Busso was slain is known by the police as the Black Hand Belt. Fifteen bombs have been exploded there within a year, and there have been many shootings. Last December two kidnaped and held for ransom, were found. For this reason, the police are now serving a thirty-year prison sentence, and her male accomplice is doing forty years.

THE POLICE MADE A COUPLE OF ARRESTS ON SUSPICION.

Gradually the mystery surrounding the murder of a woman at Lewiston, just a few yards from where the Niagara River boats dock, is, the police believe, being unraveled and now they think that they have sign of the end. They believe that not only is the motive known, but also the name of the one who took the victim's life. Chief of Police Beggs of Lewiston stated to The World yesterday that it is only a matter of a few days, he claimed, before the young woman had been wronged by a Toronto man, who is known to have conspired with the girl to the American side and shoot her. Chief Beggs also stated that he can show that the young woman was taken to the American shore under the belief that the Toronto man had there meet her at Lewiston, and that there were to be united in wedlock.

A WIRE RECEIVED LATE LAST EVENING FROM THE WORLD'S CORRESPONDENT, says that the period in which the sentence is gradually winding itself around a man in that locality who is believed was the man who probably made the deed.

It is not impossible, but rather improbable that the body of the murdered woman may be that of the wife of a West Queen-street resident, who disappeared on May 23 last. The disappearance of the woman is in accordance with the clothes found on the body found at Niagara.

She left with her little boy because of a disagreement with her husband over the Ne Temere decree, she being a Roman Catholic and her husband a Protestant. The police believe that she was the victim of the murder.

HALF MILLION HOMELESS. Thousands of square miles submerged by floods in China.

PEKIN, Sept. 3.—Summer floods along the Yangtze-Kiang and its tributaries, and also other great rivers, are repeating in various provinces the conditions in which the Chinese people have not yet been relieved. In the Province of Anhwei, early in August hundreds of thousands of acres of rice were destroyed by high water. A million persons were rendered homeless.

Many thousands of square miles are now submerged and the bodies of hundreds of people lie unburied. The Chinese Government, as well as the present being suggested relief funds, which is a new departure for the administration and shows the advancement towards modern ways, but the project of attacking the root of the evil, control of the waterways and the reclaiming of lands, has not yet been discussed. Hence a repetition of these horrors may be expected each year, according to C. D. Jameson, the engineer sent by the American Red Cross to China to study this situation.

OPERA SINGER TO EVANGELIST. Leading Italian opera and leading a church congregation in singing is, many people would think, an extreme step, but J. R. D. McArthur, a well-known tenor, has taken a large congregation in the Athlete's Church last night that such was not the case, both many very strong and many very weak. The speaker exemplified the substance of his topic by instructing the congregation how to sing, and the result was a vast improvement. He sang in a voice which were very much enjoyed.

Mr. McArthur will speak in several of the city churches and later will give an address in Massey Hall.

REV. DR. HINCKS STILL HAMMERING NE TEMERE

Asks United Action in Urging Upon Federal and Provincial Governments Injustice of Decree.

At Broadway Tabernacle at both the morning and evening services yesterday Rev. Dr. W. H. Hincks continued his protests against the Ne Temere decree. His morning sermon was of a historical nature, in which he dwelt on the purpose and the results of the council of Trent, which met in 1542, and passed the Ne Temere decree. He showed that this famous gathering was a sacred synod of Italian and Teutonic nations which had demanded reform had only five members present. After showing numerous abuses of the council, he pictured other impending dangers which it involves. Dr. Hincks ended his sermon in a powerful exhortation to bring the united and aroused sentiment of Protestantism in Canada to a focus to be directed by the Imperial Alliance. Let us join the Imperial movement against the decree so that when action is taken it will be taken for the whole empire. The initial movement will be from London in October. Let both parties in Dominion and provincial legislatures know that this question must be faced in the coming year. A question of a question above party, a question that is a patriotic and not a party issue. Let us keep to the one issue, namely, the repeal of the marriage decree of Romanism to the civil rights of non-Catholics.

WOMANHOOD NOT CONSIDERED.

Continued his arguments against the Ne Temere decree, illustrating them by pertinent examples of the decree and its effects. He said that the decree wrought in Canada. To-day the Dominion's greatest duty was unification, but unification depended upon a unified people. The history of Catholicism showed that the importance of womanhood had always been minimized, and during the period in which the church had temporal power in Italy there was not a single school for girls in Rome. Protestantism, he believed, had failed to see, much less to confront, the danger.

McArthur for the construction of the line from the Pas Mission to Thicket Port was moved by James McArthur, the superior section of the Transcontinental Railway, which he built, and which is being taken over for operation this fall.

PRISONERS STILL AT LARGE.

There is still no clue to the two men who escaped from the Central Prison on Saturday morning and have not yet been seen since. The detective department has not yet been able to trace them. The two men were seen near the Central Prison, but they did not have known anything about it.

Caps Defeated Cornwall Colts In Final Game

CORNWALL, Sept. 2.—The lacrosse season wound up disastrously for the Cornwall team here to-day. The Capitals of Cornwall, hoping to win the championship, were defeated by the Cornwall Colts in a 5-to-3 victory. It was the real surprise of the season for everyone had considered the Colts to be a strong team on the field, and, although the Capitals were a quarter of the way to the end of the season, they had already outplayed the local and provincial champions. CHILD KILLED BY AUTO WHILE PLAYING ON ROAD

Richard had been playing about the sidewalk and, not noticing the motor car approaching, stepped onto the road. The car was not traveling at a high rate of speed, but the occupants, according to eye witnesses, were talking and laughing with the result that little attention was paid to the car.

TWO ATTEMPTED SUICIDE

Both Took Carbolic Acid at Same Hour and Both Will Recover. SEAMILLON, Sept. 3.—(Special.) A weary of their sojourn in this vale of tears, two young men of this city last night made unsuccessful attempts to end their lives. Their actions were not premeditated, by a peculiar co-incidence they both adopted the same means in their suicidal effort, and both attempts were made at approximately the same hour...

BOTH WHEELMEN SUCCUMB

Harry Slingsby's Death Follows That of Other College-Street Victim. Harry Slingsby, 770 Crawford-st., was struck by a street car at the corner of Shaw and College-sts., on Wednesday evening, died in the Western Hospital yesterday. Slingsby was going north on Shaw-st. on the night of the accident, and as he approached College-st., slacked up to allow the street car to cross. The motorman at the same instant slackened the speed of the car, Slingsby then started ahead and the motorman turned on the power, sending his car ahead with a start, before he was able to stop. Slingsby was struck on the head and dragged him under the fender for some distance. He was then removed to the Western Hospital with a fractured skull...

VICTIM OF WOOD ALCOHOL

Samuel McCracken Was Found Dying in Room by Landlady. Samuel McCracken, who boarded at 237 West Queen-street, drank a quantity of wood alcohol last evening while his landlady was at church. On her return she heard groanings upstairs, and rushing to McCracken's room found him lying on the floor and apparently in the last stages of poisoning. A doctor was summoned and the stomach pumped, but the only hope of saving the man's life was by rushing him to the hospital. A hurry call was sent and McCracken was removed to St. Michael's Hospital, where he died shortly afterwards...

LIKE A RED WESTERN DRAMA

Ernest Beady, 215 Waverley-road, was feeling in excellent spirits on Saturday evening and, being under the influence of spirits, cared little for what he did. He suddenly got the notion that he was a truck that and went into the street with his double-barrel gun and brandished it about in great style, much to the amusement of those who had a good fort in which to hide. The rest of the onlookers were somewhat scared and nearly went into spasms when a few shots rescued him from the air. Beady's stillness. Beady is now resting in the police station, and the charge of discharging a weapon is laid against him.

### Sharp Advance In All Grains On General News Development

#### Budget of Bullish News Creates Apprehension Among Bear Interests at Chicago—Frost Predicted in the West.

CHICAGO, Sept. 2.—Fidelity growth of the chance of a war scare growing out of the troubles over proposed shorts in the wheat market impeded the day for cover. In consequence the close was strong, 1-1/2 to 1-1/4. Corn 1-1/2 to 1-1/4 higher than last night to 13-1/2 and oats 1-1/2.

The end of the session left hog products varying from 2-1/2 to 1/2 to 1 1/2 up.

With two holidays immediately at hand and with a surprising upward trend in the market for wheat, dealers here who had sold wheat short could not restrain their anxiety. American securities were also somewhat extended scale. The outcome here could hardly have been otherwise under the circumstances and at rising market from the start and in time any important setback. Between the opening and the close December ranged from 94 3/4 to 1-1/2 cent as compared with 24 hours before.

Corn scored a substantial gain. December fluctuated from 53 1/2 to 54 3/4. Cash grades were firm.

Heavy deliveries of wheat to the east, but long who unloaded at the outset were in a scramble afterwards to renege. The bulge in wheat and high and low points touched by December were 46 3/4 and 45 5/8 with the last sales 46 3/4, a net gain of 7-8.

Provisions were in general advanced on the ground that the monthly statistics were bullish and because of the strength in the markets for grain and hogs. At the final close pork was selling from 2 1/2 to 1/2 higher; lard more or less by 1/2 to 1/4; and ribs and an increased expense of 5 to 10 cents.

Broomhall's Cables.  
India—General rains have fallen, and the market is easier, with freer offerings.  
Australia—General rains have fallen, which will relieve the apprehension of drought.  
Roumania—Weather is reasonable and arrivals are larger. The market is disappointing, threatening continues to be received, and arrivals at the port are few.

Continued—Heavy buying is noticeable from this country on an absolute basis of Russian offerings.

Northwest Receipts.  
Receipts of wheat in cars at primary centres were as follows: Week Sept. 28-30 To-day, Aug. ago. Chicago ..... 280 280 435  
Minneapolis ..... 240 240 385  
Duluth ..... 240 240 385  
Winnipeg ..... 240 240 385

The Liverpool market closed today 1/4 higher than yesterday, on wheat, and 1/4 to 1/2 higher on wheat. Dues Post wheat closed 1/2 higher.

## IN THE STOCK MARKETS

### The Following Summary of Financial Conditions Is Cabled by the Special Representative of The New York Evening Post.

LONDON, Sept. 2.—Our own market end of the week at a somewhat critical stage for a further severe break, but indications of the moment strongly suggest an early settlement of the Moroccan imbroglio and at least a temporary lull in our labor difficulties. This would mean immediate, though probably not long-continued recovery, because the bear position is largely artificial.

Moreover, there are further indications of collision between your government and the corporations, the tendency will probably be to make moderate purchases of American securities. No great revival in your trade activities is immediately expected, partly because of the prospect of business depression in commercial markets, which buy from you. Yet it is considered here that your trade conditions are still sufficiently good to warrant buying the best American stocks. At the moment, rumors of fresh governmental action and the sign of social unrest in America are the deterrent influences.

As for your credit balances on our markets, they are believed to be about normal.

Neither Liverpool nor Manchester was prepared for your government's low cotton auction of yesterday, but are, however, better reports from India and Egypt.

Guardian's Liverpool correspondent says that the principal interest now centres in the September speculative position. Many new contracts have been entered into as a result of the small stocks held here.

The European money market situation is interesting, chiefly because of the withdrawal of French money from Germany. This is partly connected with the political situation, but mainly arises from financial conditions, French and Belgian syndicates having made enormous payments to Argentina in connection with the flotation, but not subscribed by the public.

Since the German demands for money, which were bound in any case to be taken in anticipation of September requirements, have become somewhat urgent, it is easy for our market to understand why Germany should this week be borrowing in New York. Your terms, as a matter of fact, are better than are obtainable here, where a 1-1/2 per cent. is charged for advances until October.

The English money situation has interesting aspects of its own. Recent expectations of easy money in the autumn have been modified by the sudden withdrawal of gold for Brazil. It is believed that more will go this week.

The Bank of England's current returns are worth studying. "Other securities" the item which shows the loan account, are 13,400,000 under last year, and greatly below the normal. The heavy fall in this item during recent weeks is explained by repayment by the Birkbeck Bank, of money temporarily advanced by the Bank of England, but this does not explain why securities held against loans should be so low as compared with this week in other years. The most reasonable theory is, that the bank is keeping its resources in an unusually liquid form.

A four per cent. bank rate is expected in October, as against the present 3 per cent. The rise will come earlier if Brazil takes much more gold.

Hydro Wires Across the Gap.  
OTTAWA, Sept. 1.—(Special).—The Canada Gazette contains the notice of the application of the City of Toronto for approval of plans for the erection of steel towers to carry a 13,200-volt line across the western gap.

### Continental Selling Puts Prices Down Below Previous New York Close.

LONDON, Sept. 2.—Money was in increased demand, and discount rates were firmer to-day.

The stock market opened with a cheerful tone and hardening prices, but continental selling caused a reaction, especially in our labor difficulties. Consols closed a fraction higher, but the rest of the market was easy.

American securities opened slightly higher, but immediately sold off under continuing the closing. The closing prices with prices ranging from 1/4 above to 1/4 below yesterday's New York closing. Consols closed 1-1/2 higher, at 71 1/2 on money and 71 1/2 on account.

The equivalents at closing were: Anaconda 34, Atchafalpa 10 1/2, C.P.R. 23 1/2, St. Paul 114 1/2, Erie 104, first preferred 10 1/2, Illinois Central 112, N. Y. C. 104 1/2, Pennsylvania 102 1/2, Reading 104, U. S. Steel 102 1/2, U. S. Steel preferred 114 1/2.

A PROMISING INDUSTRY  
Aemilius Jarvis & Co. Point Out Attractiveness of Locomotive Industry.

Messrs. Aemilius Jarvis & Co., members Toronto Stock Exchange, have issued a circular letter on the Canadian Locomotive Company, Ltd., in which they point out that the outlook for this industry is most promising on account of the tremendous railroad activity in Canada, and these locomotives are said to be equal to any in America.

The company is most capably managed. Mr. A. W. Wheatley, a most experienced man on locomotive work, has been secured from the American Locomotive Company, has been appointed general manager.

The company has orders on hand to tax its capacity well into next year, and new orders have been declined owing to the company's inability to make the deliveries required. The plant will be enlarged immediately to take care of the additional business offering. The company has ample cash in the treasury to provide for the extension.

## Railroad Earnings Holding Steady

### United States Roads Show Small Increase in First Three Weeks of August.

Railroad gross earnings continue to make a fairly satisfactory comparison with a year ago, the total of all United States roads reporting to date for the three weeks of August aggregating \$4,640,000,000, a gain of 10 per cent. as compared with the earnings of the same roads for the corresponding period last year.

The best exhibit continues to be made by the roads through the south, most of which, however, are reporting more or less gain. In the west and southwest the number of roads reporting losses exceeded those making gains, but the decreases as a rule are very small and are almost completely offset by the large gains of the few leading systems.

Almost similar conditions prevail in their part of the world, some roads losing territory report gains, none of which, however, are of any importance.

In the following table are given the gross earnings of all United States roads reporting to date:

Aug. 3 weeks	\$2,584,000	Gain, 144,514
July, 3 weeks	\$2,439,486	Gain, 29,663
Aug. 3 weeks	\$1,643,023	Gain, 697,709
July, 3 weeks	\$1,575,314	Gain, 67,709

HUNDRED MILLION LOSS SHOWN IN COPPERS  
Tremendous Shrinkage in Values of American Copper Stocks in Recent Decline.

Copper stocks had their share in the late decline in prices of listed securities in New York, but not disproportionately as was the case in the long downward swing which began in April, 1910, and culminated in July of the same year.

In that period copper stocks led the downward movement, as the statistical position of the metal market was the cause of much apprehension among producers. World's visible metal stocks were close to 400,000,000 pounds and a prospect of rising production and a growing lack of harmony among the producers threatened to swamp the already low-priced copper market, so that it was only natural that the copper stocks should have reached its lowest point during the beginning of August, 1910.

By the beginning of August, 1910, the metal situation had cleared to a considerable degree. World's visible supply of copper had reached its lowest point and was already on the upswing, while in the best understanding which resulted from the series of meetings held between the leading interests here and abroad seemed to promise a greater stability to the metal market and obviate the danger of forced output.

In the latest decline, however, copper stocks had their share as shown by the following table of 1910 representative values of the metal, which were largely attained in 1910. Fractions of less than half a point have been disregarded in the high and low prices:

Amalgamated	Now	High	Depressed
Anaconda	10 1/2	11 1/2	10 1/2
Battle Mountain	10 1/2	11 1/2	10 1/2
Butte	10 1/2	11 1/2	10 1/2
Cal & Hecla	10 1/2	11 1/2	10 1/2
Calumet & Hecla	10 1/2	11 1/2	10 1/2
Granby	10 1/2	11 1/2	10 1/2
Idaho	10 1/2	11 1/2	10 1/2
Nor. Butte	10 1/2	11 1/2	10 1/2
Phoenix	10 1/2	11 1/2	10 1/2
Superior	10 1/2	11 1/2	10 1/2
Wolverine	10 1/2	11 1/2	10 1/2

Total ..... \$12,177,899

World's copper stocks at present are something more than a million pounds, or about as at twelve months ago, but the better is not reflected in the price for the metal.

The foregoing list might be greatly extended and the total market value depreciation greatly enlarged by including stocks for the non-dividend payers and non-producers.

A BILLION IN DIVIDENDS.  
Down to September first disbursements the United States for 1911 foot up \$1,183,000,000, as follows: Sept. 384,000,000; August, \$85,000,000; July, \$251,000,000; June, \$80,000,000; May, \$165,000,000; April, \$150,000,000; March, \$115,000,000; February, \$85,000,000; January, \$211,000,000.

OVER FIVE HUNDRED MILLIONS.  
Bankers' Magazine says: As a result of labor troubles and political crisis in London, English securities have suffered a sharp decline in value in past months. Aggregate value of 87 representative securities shows a loss since July 21, of more than \$85,000,000. American stocks and bonds have declined about \$160,000,000 in about that time.

RUSSIA'S FINANCES.  
Russian Minister of Finance Kokovtsov denies that Russia contemplates a course of loan either in 1912 or in 1913. He states that at beginning of 1911 Russia had \$70,000,000 free and unencumbered cash; that revenues for first six months of this year exceeded estimates by \$85,000,000, and that in 1912 Russia will pay off \$100,000,000 treasury notes.

The foregoing list might be greatly extended and the total market value depreciation greatly enlarged by including stocks for the non-dividend payers and non-producers.

A BILLION IN DIVIDENDS.  
Down to September first disbursements the United States for 1911 foot up \$1,183,000,000, as follows: Sept. 384,000,000; August, \$85,000,000; July, \$251,000,000; June, \$80,000,000; May, \$165,000,000; April, \$150,000,000; March, \$115,000,000; February, \$85,000,000; January, \$211,000,000.

OVER FIVE HUNDRED MILLIONS.  
Bankers' Magazine says: As a result of labor troubles and political crisis in London, English securities have suffered a sharp decline in value in past months. Aggregate value of 87 representative securities shows a loss since July 21, of more than \$85,000,000. American stocks and bonds have declined about \$160,000,000 in about that time.

RUSSIA'S FINANCES.  
Russian Minister of Finance Kokovtsov denies that Russia contemplates a course of loan either in 1912 or in 1913. He states that at beginning of 1911 Russia had \$70,000,000 free and unencumbered cash; that revenues for first six months of this year exceeded estimates by \$85,000,000, and that in 1912 Russia will pay off \$100,000,000 treasury notes.

## THE WALL STREET LIE FACTORY.

Judge Lovett. Is an incisive talker and a terse writer. His remark last week that the Wall-street lie factory had been busy was to the point. It is unquestionably a fact that more lying reports have been afloat in the financial district this month than at any time since the panicky days of four years ago.

Hydro Wires Across the Gap.  
OTTAWA, Sept. 1.—(Special).—The Canada Gazette contains the notice of the application of the City of Toronto for approval of plans for the erection of steel towers to carry a 13,200-volt line across the western gap.

## Commercial Reports

### Sharp Advance In All Grains On General News Development

#### Budget of Bullish News Creates Apprehension Among Bear Interests at Chicago—Frost Predicted in the West.

CHICAGO, Sept. 2.—Fidelity growth of the chance of a war scare growing out of the troubles over proposed shorts in the wheat market impeded the day for cover. In consequence the close was strong, 1-1/2 to 1-1/4. Corn 1-1/2 to 1-1/4 higher than last night to 13-1/2 and oats 1-1/2.

The end of the session left hog products varying from 2-1/2 to 1/2 to 1 1/2 up.

With two holidays immediately at hand and with a surprising upward trend in the market for wheat, dealers here who had sold wheat short could not restrain their anxiety. American securities were also somewhat extended scale. The outcome here could hardly have been otherwise under the circumstances and at rising market from the start and in time any important setback. Between the opening and the close December ranged from 94 3/4 to 1-1/2 cent as compared with 24 hours before.

Corn scored a substantial gain. December fluctuated from 53 1/2 to 54 3/4. Cash grades were firm.

Heavy deliveries of wheat to the east, but long who unloaded at the outset were in a scramble afterwards to renege. The bulge in wheat and high and low points touched by December were 46 3/4 and 45 5/8 with the last sales 46 3/4, a net gain of 7-8.

Provisions were in general advanced on the ground that the monthly statistics were bullish and because of the strength in the markets for grain and hogs. At the final close pork was selling from 2 1/2 to 1/2 higher; lard more or less by 1/2 to 1/4; and ribs and an increased expense of 5 to 10 cents.

Broomhall's Cables.  
India—General rains have fallen, and the market is easier, with freer offerings.  
Australia—General rains have fallen, which will relieve the apprehension of drought.  
Roumania—Weather is reasonable and arrivals are larger. The market is disappointing, threatening continues to be received, and arrivals at the port are few.

Continued—Heavy buying is noticeable from this country on an absolute basis of Russian offerings.

Northwest Receipts.  
Receipts of wheat in cars at primary centres were as follows: Week Sept. 28-30 To-day, Aug. ago. Chicago ..... 280 280 435  
Minneapolis ..... 240 240 385  
Duluth ..... 240 240 385  
Winnipeg ..... 240 240 385

The Liverpool market closed today 1/4 higher than yesterday, on wheat, and 1/4 to 1/2 higher on wheat. Dues Post wheat closed 1/2 higher.

European Grain Exchange.  
Winnipeg Sept. 2.—The statement of clearing house, Sept. 2, shows a decrease of \$2,378,000 in the proportionate reserve as compared with last week. The statement follows: Loans, decrease, \$1,828,688; specie, decrease, \$4,171,000; legal tenders, decrease, \$475,000; net deposits, increase, \$2,378,000; excess lawful reserve, decrease, \$1,786,000.

Actual condition: Loans, decrease, \$1,828,688; specie, decrease, \$4,171,000; legal tenders, decrease, \$475,000; net deposits, increase, \$2,378,000; excess lawful reserve, decrease, \$1,786,000.

## Railroad Earnings Holding Steady

### United States Roads Show Small Increase in First Three Weeks of August.

Railroad gross earnings continue to make a fairly satisfactory comparison with a year ago, the total of all United States roads reporting to date for the three weeks of August aggregating \$4,640,000,000, a gain of 10 per cent. as compared with the earnings of the same roads for the corresponding period last year.

The best exhibit continues to be made by the roads through the south, most of which, however, are reporting more or less gain. In the west and southwest the number of roads reporting losses exceeded those making gains, but the decreases as a rule are very small and are almost completely offset by the large gains of the few leading systems.

Almost similar conditions prevail in their part of the world, some roads losing territory report gains, none of which, however, are of any importance.

In the following table are given the gross earnings of all United States roads reporting to date:

Aug. 3 weeks	\$2,584,000	Gain, 144,514

## The Advantages of Buying Millinery at the Simpson Store

The advantages of city buying in the matter of Millinery can hardly be exaggerated. Millinery of the right kind, the newest and the most artistic examples of the work of the best milliners in Paris, London, and New York, only reaches Canada after the expiration of a large amount of time and money irrespective of the actual cost of the hat itself.

The Simpson Company, buying in immense quantities, is willing and able to stand for this expense in order to get the best. Few small milliners are able to make a personal tour of inspection and have naturally to buy more or less in the dark. All the advantages reaped by the buyer with a large cheque, who not only chooses for himself but is in the position to demand the best attention, careful packing and quick delivery, are lost to the small milliner.

On Tuesday our Millinery Salon has demonstrated this fact most conclusively. The hats on view at \$10, \$15 and \$5 apply to any more or less in the dark. All the advantages reaped by the customer the advantages of price and style offered by the Simpson Company.
