## **GOSSIP FROM PARLIAMENT HILL**

Some Points For and Against the Navy Contribution-Mr. Ames' Keenly Logical Mind-Flowerv Style of J. A. M. Aikens.

OTTAWA, Dec. 28.—The outstand-ing event of the last week in par-meed not insist in the future as they have done in the past upon autonomy: which not only cheered up the support-the slogan of the last century, has done its work and the last century, has done as the speech of Hon. Geo. E. Foster, Thus, he said: "Auton the not only cheered up the support its work, accomplished its purpose, and belongs to the last century. It does not belong to the words of today."

home jubliant. It was the greatest ef- ; He then proceeded to show that Can-nut to say that it was the greatest ef- ; He then proceeded to show that Can-fort of his life would be unjust to Mr. adlans had obtained representative fort of his life would be unjust to Mr. adlans had obtained representative government, and had no reason to fear fort of his life would be unjust to hr. Foster. It was a party speech design-ed to put life and vigor into the follow-ers of the government; intended ra-ther to keep Conservatives in line with their party than to convince Liberals or independent voters that the policy or independent voters that the policy or government would be in a parliament of the supreme government, and bot nited of fear that this boon would ever be taken from them. He more than intimated that Canada might become a state or province of the British Empire, with a legislature attending to local affairs, while the supreme government would be in a parliament of the government was, after all, the of the empire. To quote:

rest. Thus, slings and arrows were directed towards Sir Wilfrid Laurier mlated rather to stir up party bitess than to allay party strife. Mr. Foster had the best of the arguat as the government has the best the argument, in maintaining that

the most direct and efficient way to aid

the empire, at this moment, is by a mpt and direct contribution. Canada enjoyed the protection of the Imperial navy so long without contributing anything towards its maintenance

"The spirit of the Canadian con-stitution is full of this idea, the idea of a unit within a unit. We have the municipality making its own bylaws, collecting its own taxes, looking after its own local affairs, absolutely autonomous within its own sphere of action, al-tho it lies within the province. Again, we have the province com-pletely supreme in the matters which are relegated to its control, altho it lies within the Dominion. And I say the day is coming when the Dominion will hold the same relation to the empire that the province holds to the Dominion." The objection to this, which will be "The spirit of the Canadian con-

At first blush, the opposition seem to be in an untenable position when they declare that cash contributions the declars that cash contributions is to be the periment, while those authorized to be the declars that cash contributions is performent. If not the government, if not the government and the duple of the house read exceedingly wells of speaking. How no all sides that there is a long of the house for the house, find, the facilities for building the house read exceedingly wells of the government, if not the facilities if nor build do further was anot them with a whole do the thing is now hould not fitting the formating in any not house with a whole do the thing the government and the duple of the government was most atting the government anot was not them with a dide experience as a purilamentand was mos ish a with a wide experience as a public ught, speaker but his addresses so far have that his province would not furnish a sailor to any Canadian dreadnought,

themselves as directors. One good feature of course is the power given

of dreadnoughts on her shores than any other province in Canada. For this Mr. Stevens blames the Laurier gov-emment, which, he says, permitted Ja-panese to land in British Columbia and growd the white dishermen out of and crowd the white fishermen out of business. But in the Maritime Prothe east, there are seventy or eighty thousand fishermen, but these, we are told, will not enlist. They did not enlist, we are told, for service on the Niobe. Mr. Ames, however, suggests that sailors are not needed on dreadnoughts, but machinists, and these have to be trained, and they cannot be trained without ships. The argument thus presented seems to go around in a vicious circle. We are told in one breath that ships will do us no because we cannot get any men and we are told in the next breath that it is no use to enlist any men because we have no ships on which to place

It may be true that in 1909 we were uiterly unable to form a Canadian navy either by building ships or enlisting men; the same conditions may obtain today. Will not the same condition obtain five, ten or twenty years from now? If so, is there anything we can now? If so, is there anything we can do except to keep on contributing? Put in this fashion the Liberal charge against the government appears to have more foundation.

H. B. Ames, of Montreal, who has a keenly logical mind, says that the policy of the government and the cy of the opposition are very much alike; resembling two trains running on parallel tracks. He rather spoiled the simile, however, by suggesting that the trains are running in opposite directions; a good many people believe that they are running in the same direction: that the government train is running on the main track, and that the Liberal program is merely a cut of cars on the turnout, which will eventually make a running switch, and be the rear section of the government express. Mr. Ames foreshadow-d something of this kind when he said that the government program contem-plated the immediate establishment of hipyards in Canada, which would soon turn out cruisers and smaller vessels for the admiralty, and for the possible Canadian navy of the future, and that at the head of the Canadian navy of the future could be placed the three great dreadnoughts to be built with the \$35,000,000. This would contemplate that Canada was an "Indian She is giving three dread. noughts to Britain, but she is liable to take back the present hereafter.

To avoid this appearance of an "Indian giver," both Mr. Foster and Mr. argue that Canada is not making a gift to Great Britain at all, but that, as a part of the empire, she is contributing to the common defence of the

PILES CURED at HOME by New Absorption Method

If you suffer from bleeding, itching, blind or protruding Piles, empty soda water bottle could send me your address, and I will registered, but Mr. Hazen pointed out tell you how to cure yourself at home by the new absorption treat-cance, with which Dr. Clark of Red ment; and will also send some of Deer proposes to begin the Canadian navy, might more aptly fall this home treatment free for trial, this somewhat elastic legal definition with references from your own lo- of a ship.

cality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write today to Mrs. M. here with his wife and two children The Gatlin Institute

ho British Columbia has more need sounded somewhat strangely to his fellow-members, perhaps unaccus-tomed to showy rhetoric. His speech

"When these three splendid Can-adian dreadnoughts float in grim silence and power with the other dreadnoughts of the British fleet and a Canadian minister advises on its control whatever complaint has been made such as that men-tioned by the right hon, gentleman as to people in England, in ignor-ance giving away portions of land which otherwise might be part of Canadian territory-these complaints will absolutely disappear and every foot of farm land, every mineral vein, every waving tree-top, every one of the lowing kine and every fish that cuts in joy the and every fish that cuts in joy the Canadian waters, every towering church-spire, every bowed wor-shipper, every humble home, and every happy fireside, will be of as much interest and as carefully guarded as the very beatings of the heart of the British Empire, the hearthings of its own exist. the breathings of its own exist-ence. . . While these clouds and that darkness surround the Britthat darkness surround the Brit-ish Empire, they separate for a moment, and thru the rift comes a ray of light. It falls upon that tree of empire. It falls upon the tree of empire whose branches and leaves are for the strengthen-

and leaves are for the strengthen-ing and healing of the nations, and before that tree of empire stands Canada; the young shep-herd of the empire, ruddy, be-cause of his healthfulness, strong, because of his experience, full of Course because Canada heath courage, because Canada has been grappling with the wilds of prair-ie and of forest; in his sling and pouch are three smooth stones like unto battleships; and there stands before that tree of empire an appressor armed from the an aggressor armed from top to toe in steel. And in his hand he holds a sharpened battleaxe ready to cut down that tree. But he stands, for he hears that young shepherd of the empire, Canada,

"Aggressor, spare that tree Touch not a single bough; In youth it sheltered me, And I'll stand by it now."

saving:

Apropos of the naval debate there was an amusing coloquy in the house the other day between Hon. J. D. Hazen, Minister of Marine, and his ancient enemy, Hon. Wm. Pugsley. It appeared that the floating dry dock, the Duke of Connaught, recently placed in position in Montreal, escaped serve purposes.

payment of duty by registering itself as a "ship." To this Mr. Pugsley took exception, and Mr. Hazen, in de-fence of his department, read from English authorities to show that any-thing, fike a coal barge, for example, which was hollowed out for cargo and way capitalization and railway rates. would float upon water was in the eyes of the law a ship, Mr. Pugsley insisted that under this definition an

to the finance minister to direct the auditor of the bank to report to him when there is obscurity or uncertainty in the monthly bank statement sub-mitted to the finance department. But on the other hand the minister, under the present bill, has no power to act on such information and Mr. White may be control formed day with a situation promoted with tomed to showy Thetoric. His speech in the main was a good one but he ad-dressed the house much as tho he were speaking from a public platform, mov-ing about and gesticulating freely. His peroration was couched in the follow-ing rather bold collection of meta-

Practically No Control. Mr. Control. Mr. Control. Mr. Cochrane has intimated that he will propose a number of amendments to the railway act, and these may, in effect, codify or even redraft the legis-lation. For one th

the banks have largely written their own charters. This was almost neces-sarily so when, long before confed-eration, the Bank of Montreal, the Quebec Bank, and other banks were establ.shed. ine country was in des-perate need of currency, and when man of large means offered to supply this need by issuing bank notes, for whose redemption they would be per-sonally responsible to the extent of their fortunes, they were regarded as performing a real public service. Since then the various banks thruout the country have come under the provi-sions of a general banking act, but country have come under the provi-sions of a general banking act, but commission's work, such as telegraphy telephone, or express matters, so that every member would become somethe Dominion legislation in this regard has been mainly directed toward making secure the notes of a bank, even after suspension or failure. There has been practically no effort to protect or safeguard the depositors. what of an expert on some branch of the commission's work.

Demand for Currency. From the west particularly comes

a demand for more currency. The banks have not been inclined to increase their circulation and the gov ernment has emitted no currency ex-cept the one and two dollar bills, aggregating some twenty-two or three m lion dollars, and notes of large dem lion dollars, and notes of large de-nominations issued to the bank upon the same cumbersome manner as the a gold deposit. Such issues have been R ilway Commission. The cabinet a gold deposit. Such issues have been merely gold certificates, and the same merely gold certificates, and the same deposite the same depo

Into general circulation. Mr. White appeared to recognize the trouble, but the remedy he pro-poses will be subjected to sharp crit-ic sm. His proposal, in effect, is that the banks should withdraw the \$80,-000,000 of gold which they now have on d posit with the government and neve come before them at all, and on deposit with the government, and for which they hold Dominion notes of large denominations-"the bank le-" ga's"—and redeposit the gold with a board of four trustees, three of whom

are to be appointed by the banks. These trustees are to build an iron vault or some other receptacle, pre-sumably in Montreal, and lock up the gold. Each bank may then issue notes to the face value of the gold depos-

ited by it with the trustees. Evidently these notes will be mere gold certifi-cates, yielding no profit whatever to the banks, and will be held for re-

A knot of Los Angeles fight fans were discussing the outlook early in the White Hope campaign and one remarked: "I see that Palzer has a longer reach than McCarty." "Depends on how it's measured." chipped in Billy McCarney, Luther's friend, philosopher and chaperone. "You see, Palzer's chin sticks out so far that he stands nearer to McCarty than McCarty does to him." It was a bit of pleasantry and its suite within the bounds of possibility that McCarney would feel safer about the outcome of the New Year's clash if Palzer's chin were not quite so prominent. "Description of the New Year's clash if Palzer's chin were not quite so

shaking they received at the Villa grounds 'on Thursday, Oldham Athletic had their revenge out of Sheffield United, whilst the Villams were only able to tio with Bradford City. The point gained takes them to third place, however, with Oldham at fourth. Bolton brought off a very creditable victory at Chelsea, whilst Woolwich have every reason to congratu-late themselves over that draw at Liver-pool.

Burnley at Top. Having now secured the leading posi-tion on the second division. Burnley are determined not to turn back, and all the dangers at Glossop could not retard their progress on Saturday. Preston North End, however, are close at their heels and with a fine win over Clapton keep the race a neck-and-neck one. Surprising defeats in this section were those sustained by Wolverhampton and Barnsley, whilst the victory of Fulham at Leeds is the most notable one.

Leaders Go Down. Crystal Palace and Reading were the only two among the leading clubs in the Southern League to win on Satur-day. Swindon were beaten by Crystal Palace, who now top the 'ldst, whilst Queen's Park Rangers, altho losing at Norwich, retain their place at second. Reading are, however, dangerous rivals to both, and their decisive victory over Brentford shows that they must be ser-iously reckoned with. Basey also ran. FIFTH RACE-Six furiongs: 1. Visible, 4½ to 1, 8 to 5 and 4 to 5. 2. Flying, 8 to 1, 3 to 1 and 6 to 5. 3. Venetian, 10 to 1, 4 to 1 and 8 to 5. Time 1.14. Mary Emily, Hugh Gray, Acumen, Tim Judge and Chanticleer also ran.

ran. SIXTH RACE-1 i-16 miles: Bit of Fortune, 7 to 1, 2½ to 1, and to 5. to 5. 2. Falcade, 9 to 5. 4 to 5 and 2 to 5. 3. El Pato, 15 to 1, 6 to 1 and 3 to 1. Time 1.48. Florence Kripp, Lily Paxton, Zorcaster, Aragonesz, Hannis, The Peer, Rue, Force, Ben Uncas also ran.

JUAREZ, Dec. 28.—The races here to day resulted as follows: FIRST RACE—All ages, selling, purse \$300. 6 furlongs: 1. Angelus 107 (Cotton). 7 to 2, 7 to 5 and 8 to 5. 2. Hazel C, 103 (Gross), 6 to 1, 2 to 1 and even. 3. Loving Mose, 96 (Hill), 5 to 2, even and 1 to 2. The. 1.13 4-5. Tallow Dip. Quick Trip, Hidden Hand, Salvage. Booger Battle, Ah Moon. ### Burns Beat Farmer at Their Own Game-Gave Champion Battle in Proper Style.

OMAHA, Dec. 23 .- Farmer Burns, the "Sly Fox" of the wrestling game, yesterday "put one over" on a bunch of rural sports from Gresham, Neb. which left them hunting around to borrow money for railroad fare to their homes. The ruralists thought to initiate the farmer into a new game. But Burns taught the representatives of the Greshamites a few tricks, and defeated his opponent in just five sec-

defeated his opponent in just five sec-onds of actual work. In and near Gresham there are a lot of German farmers. Their favorite sport is "stick pulling," in which the two opponents sit oposite each other on the floor, brace their feet against a board, grasp a pick handle and see which can pull the other man over the board. The champion "stick pulled" up to the time he met Burns was Pete Ryestorf. Pete is 30 years ald and weighs 302 pounds. Half a dozen of these German farmers came to South Omaha last week. They got to bragging about the ability of Pete. Jack Haskell, the baseball umpire, heard the boast. It was a new game to Haskell, and he went over to ask about it. "Pete can outpull any man in the

for a dollar." "Bet you a thousand he can't," said the Greshamite, pulling out a big roll

of bills. An hour later Haskell was back with a "friend," and soon \$2000 was up on the result of the match. "Remember," warned a big German, "your man must be 50 years old and not weigh more than 190 pounds." Then they telegraphed for Pete Ryestorf and Haskell went off to find

St. Andrew's College-Junior-Irving Findlay, Dudley Ross, Russell Hatch, Frank Richardson, Donald Cantley, Aber-deen McGill. son, N. E. Young, A. C. Anson, Wester Fisler, Al Pratt and James White, all of whom made baseball history in the seventies. Here is Cummings' own story of the discovery of the curve ball : "It was in the sixtles that I discovered The Hamilton Spectator comes out in strong denial of the lack of calibre for their Alert team and feel certain that be-fore the season opens they will be able to show their rivals something in the puck-chasing line. Lack of condition and team play are the excuses put forward for their defeats, but with two more weeks' practice they are satisfied that they can remedy these weaknesses. the curve ball, and, strange to say, it was the idle throwing of half a clam she that gave birth to such an idea. As I atched the shells sail thru their irregucourse, the theory developed in my lar course, the theory developed in my mind that I might apply it in baseball. "After watching the shells follow their staky course, I decided that I would try to see if I could throw a ball in a similar to see if I could throw a ball in a similar manner. I was laughed at by scientific men and baseball experts, but I finally proved to them that the stunt could be done, and for a long time I was known as the boy wonder. "My first experience in a club of any note was with an organization called the Carrolls, after Carroll Park, in Brooklyn. In the following spring I joined the Star Juniors, which won 37 out of 39 games played. No regular suits were worn at that time. It was while I was with the Stars that Joseph Liggett of the Excelsior Club got me to join his team." "At this time there were no big leagues. The Excelsior was considered one of the strongest clubs in New York. I participated in these games during part of '66, and pitched in a few of them." "I remember the first time I pitched. Brainard, who heid a national reputation as a ooxman, failed to show up, and I was substituted. I only weighed ill poinds, and my opponents—the Eurekas of Newark, N.J., a strong time-expected an easy victory, but they was with the Excelsions that I went to Washington to play the annual game with the Nationals. We wen..." The following year I went to Boston nind that I might apply it in baseball. Preston intermediate champion year are going great guns this seas their victory over Stratford Friday place them in the front ranks as co ers for the senior series. The class were a good aggregation, too, he Preston boys had the edge and tri them 9 to 4.

New Year's Day is to be marked in the raliway development of Canada by the journey east of the first load of grain over the National Transcon-tinental. This grain train, which will embrace 20 vars, each carrying 35 tons, of fine Canadian wheat, will come in over the National Transcontinental to Cochrane. At that point it will travel via the Timiskaming and Northern Ontario Raliway to North Bay, and from there by Grand Trunk to the Port Colberne grain elevators.

British sporting papers are coming to recognize the value of the parimutuel system of betting. Country Life recently said: "We notice that last year's turnover at the pari-mutuels is officially estimated at the gigan-tic total of f12,000,000. It is generally accepted that there is far more bet-ting in England than in France, and, accepted that there is far more bet-ting in England than in France, and, it that be so, one cannot help wonder-ing what is the amount of money em-ployed in betting transactions in the course of a year's racing in England. The system is the only method of bet-ting permissible in France, and the reason for its adoption appears to be that by its means it is possible to levy a toll in favor of several praiseworthy objects, on all who bet, and that by a very logical process of reasoning the French authorities argue: We do not approve of betting, but you will bet-that we know; therefore you shall bet in such a fashion that we can tax your betting operations. This is done by means of the pari-muutel, and the by means of the pari mutuel, and the percentage levied on all transactions is divided in certain proportions be-tween works of charity, the improve-ment of racing and racecourses, and above all, the encouragement of horse-breeding in France. Thus, out of the impost levied on the huge total already mentioned. f120,000 was allotted to the Government Stud Commission for the ournose of stallions likely to be of FOR FAMILY USE

Every City During Coming Year.

Wants to Cut Off Fifty Games its phases. As a pleasure vehicle it is and Start the Post-Season Games Earlier—A Popular Idea.

By W. J. MacBeth.

By W. J. MacBeth. NEW YORK, Dec. 28.—August Herr-mann is going to devote all the in-fluence at his command to weld the two major leagues into even closer harmony. He purposes to have the National and American circuits pull together in deed, as well as in spirit. His plan is nothing short of a preten-tious interleague series, in which every National League club. Naturally this in-ter-league schedule would eliminate the newsont mode of world's series ter-league schedule would eliminate the present mode of world's series then at 1166. At the annual meetin June 30, 1908, the membership had in

the present mode of world's series procedure. For it would in itself be a world's scries of the most profoundly pre-tentious style. There would be no question then as to the ultimate win-mer being the very best collection in fast company. According to the lights of the chairman of the Nation-al Commission, all the present bene-fits of the present world's series would be maintained. Other benefits of broad reach would accrue, while most of the existing evils of the pres-

ting as mediators in the strike of the textile workers, hundreds of strikers, gathered in the streets, clashed with the police today. The first conflict came at the Phoenix Mills, where the police cleared the sidewalks of massed pickets: the second on Main st., where they dispersed the strikers' parade. During the second demonstration one of the strikers lying on the sidewalk refused to move. Women in the procession began to scream that he had been clubbed, but this the police denied.

The board continued taking the tesimony of strikers today. Annie Kokis a machine operator at the Phoenix Mills, testified that Chief of Police Long Mills, testined that Chief of Police Long threw her down the steps of the strik-ers' headquarters the day the strike was called. Then, she says, he threw three girls on top of her. This was while he was raiding the building to find the strike leaders. Yesterday, she added, a policeman attempted to with her while she was on picket of She told the blue coat, she decis she told the blue coat, she declared, that she was married, and took her husband's arm. Her husband, she said, was immediately clubbed. Mrs. Annie Malarik, who said she was 24 years old received \$4 a week for her work, testified that she and her husband lived in an eight-roomed house with \$2 other parser. house with 23 other persons. slept three and four in a bed, she slept three and four in a bed, she said. Higgolytam Kotarz, who said he made \$8.94 a week by working five nights, compared the police of Little Falls with the Russian Cossacks. "In Russia," he declared, "the Cossacks use their fists, but here the police use their subst" their clubs." The hearing was adjourned until Monday.

KINGSTON, Ont., Dec. 28 .- A small rred on the stean WRECKED VESSEL BROUGHT TO PIER Officers Denied That S.S. Tur-rialba Ran Aground Thru Faulty Compass—Twas

stantiate it thruout the succeeding in-ter-league contest. The inter-league competition, or new world's series, would begin im-mediately after the close of the short-ened major league comparison 45.

For the Past Year PLAY THAT FAILS NINE

mediately after the close of the short-ened major league campaigns. As each National League team would play home-and-home games with each Am-erican League team, this would add thirty extra series. Allowing for two games series, it would require no more than sixty games for each club after the regular season ended, or bringing the entire schedule of the year—play-ing the world's series championships included—up to 172 games. Sounds Like Terrible Task. Now, 172 games sounds like a ter-rible task for the poor, down-trodden athletes, but I am very much inclined to think that, under the advantages which Mr. Herrmann proposes, there

which Mr. Herrmann proposes, there

will be no objection from that score. seasons each year. Before interest had

the season closes, but it is reasonable to suppose that the major league player would be delighted to work right up to the end of his contract time, if he had a chance to earn much more than the pin money he now

time, if he had a chance to earn much more than the pin money he now draws down: And in the new order of things he would, for Mr. Herr-mann's scheme protects the interests of the second division clubs. as well as the first division clubs. His idea is to let all the major league players in on the world's se-ries spolls. Of course, there must be an incentive to victory, and accord-ingly the team to finish first in the inter-league world's series would draw down far, far more per man than the team that finished third or tenth or last. As is quite proper, the llors share should be some consolation for the also-rans. Mr. Herrmann would act of the raman field is to the second for the second for the taborrans.

vanced in favor of Mr. Herrinann's always got the worst of it from the pet idea. Certainly there is every rea-son to believe that it would be welcom-ed with enthusiasm in cities like Pitts-burg, Cincinnati, Detroit, and Washing-ton, where but one league is establish-d. It would give the fan of each big oritism toward home rival and so ton, where but one league is establish-ed. It would give the fan of each big oritism toward some rival. And so league town a chance to see big league the present system has developed ball, its stars, virtues and faults from countless scandals. No later than a every angle and thus arouse an enthus- few weeks ago we saw driven from the asm never before known, perhaps. In National League a club president who the towns which boast both leagues it never would have been prompted to would give the rabid partisans a clear talk himself into ostracism hal it not line on the respective abilities of the been for the lure of the world's series representatives.

But best of all it would provide two scheme one fair trial anyhow?

Yankee Champions The American champions for 1912 are as follows:

Cobb and Heinle Zimmerman.

Athletics—Jim Thorps, Carilisie. Athletics—Jim Thorps, Carilisie. Automobiling—Teddy Tetsiaff (Fiat), 8.7 miles an hour. Baseball—World's champions, Boston, American League, New York, Individual aliander, Triss Speaker and Larry Doyle, Champion batters, Ty Cobb and Heinle Zimmerma. Bowling—A. B. ELECTION CARDS. ELECTION CARDS.

DECEMBER 29 1913

## Vote this way on these bylaws on Wednesday : To the Electors of the Second Ward-

ELECTION CARDS.

Ladies and Gentlemen-In response to many and repeated requests from individual electors, I beg to intimate my candidature for election as alderman. Having been resident for many years in Davisville, now included in Ward Two, and having had experience in the conduct of both municipal and educational affairs in North Toronto, I venture to hope that it is in my power to render public service in the wider field offered by the city.

A convinced progressive in civic politics, I favor tax reform and a more equitable adjustment of the cost of local improvements. Holding that all public services should be owned and operated by the community for the exclusive benefit of the people, I shall support all proposals and measures calculated to further that valuable principle. In particular, I recommend the extension of the Hydro-Electric undertaking and of the civic car lines in the way that will meet the requirements of Greater Toronto and prepare for the unification of the whole systems at the expiration of the current franchises held by private companies.

As a member of the North Toronto Council I was instrumental in securing an advance of two cents an hour in the rate of wages paid the town's laborers. It is my conviction that public bodies should more readily recognize that wages have not increased in equal proportion to the higher cost of living and that the hardship thus entailed ought to be remedied. The development of cheap transportation and the opening of the northeastern residential section that must follow the construction of the Bloor-Danforth viaduct will, in my opinion, tend to relieve congestion and improve social conditions.

Regarding a city, on its administrative side, as strictly a business proposition, I approve of commission government and of the conference by the legislature of the wider powers necessary to protect the general interest. I hold also that tenants, or taxpayers, should be accorded the right to vote on money bylaws. The creation and maintenance of an active civic spirit can best be encouraged by requiring the electors to recognize their direct responsibility for every department of the city's affairs.

Should this platform meet with your approval, I trust to receive your support and vote on election day. If honored with your confidence it will become my conscientious endeavor to fulfil the duties devolving upon me to the utmost of my ability and judgment.

Yours respectfully,

Herbert St. Pall

co. and J. E. Munsey of Salt Lake City sustained the government's

charges that they aided in plotting the Los Angeles explosion, in which 21 persons were killed, and assisted in the escape of James B. McNamara in his flight from the scene of that

A DAY IN THE LIFE OF A BOY

### SATURDAY AFTERNOON

Saturday is Boy's Day, just as Sunday is the Lord's Day. Boy's Day is the one day in the week that Boys "keep wholly." The usual observance is to take a tramp out into the country in the afternoon, with a delicious grub-stake of Lawrence's Home-Made Bread. After chasing squirrels and chipmunks. throwing stones at strange birds, and scouting for imaginary Indians, it seems pretty fine to sit on a farmer's fence and get out the sandwiches. Grown-up people who remember how Lawrence's Bread tasted twenty years ago, can honestly say, "Oh, to be a boy again, just for one bite." 1113A-3

> The largest Bread Bakery in Canada, Every-thing neat and clean. Open for inspection any time. If you want to see the bakery going full speed, come in Friday evenings. Lawrence's Bread is full weight, 24 ounces in every small loaf-5 cents; three pounds for 10 cents. GEO. LAWRENCE, BAKER.

The Canadian Northern Ontario Special Train Tuesday. A comfortable railway journey is indeed a luxury at this season of the year, when overcrowding seems to be the rule. If you are going east for the New Year holiday you will appreciate the "plenty of room" policy of the Canadian Northern Ontario Railway and also the special train service. A solid vestibuled train with plenty of first-class coaches and parlor car Favors Life Ponteons.
Favors Life Ponteons.
Trenton Points. This points. This train gives a direct connection at Trenton Union Station with the Central Ontario Railway for Pleton. The first-class return fare is, of course, in effect, good going Tuesday and returning on Thursday; the fare and other train times.
Favors Life Ponteons.
The ponteon method of saving life in the event of the foundering of a ship finds an illustrious advocate in Cuniberti, the chief naval architect of the italian navy. He believes that the upper and after portion of a ship containing the cabins, etc., should be constructed of wood and form a structure independent of the rest of the ship. This should be bolted to the hull by fastenings which could be readily unlocked in the event of the loss of the fact in The Navy, suggests that the idea is not any more far-fetched than the idea of building Dreadnoughts when it was first suggested by Cuniberti.

D ance of the corset question? Do you consider the wonderful manner un-desirable flesh may be distributed—how defects in figure may be obliterated—how comfort may be secured without any sac-rifice of style? Woolnough Corsets will positively secure these features for all wearers

Sentiment Veers to Bear Side and Wheat Dropped Back Again—European Markets Show Easier Tone-Argen-

India Grop Report. INDIA: According to a preliminary official report, the acreage under wheat iff the united provinces amounts to 7,560,000 acres, as com-pared with 7,570,000 for the national official last year. tine Prospects Favorable. CHICAGO, Dec. 28 .-- Wheat showed downward trend again today, senti-

veering to the bear side on ac-LIVERPOOL GRAIN EXCHANGE. of the large primary receipts count of the large primary receipts and the extremely light outside trade. The close was unchanged to 1-4 off for the day. Corn and oats were dull throut the whole session, with the close 1-8c to 1-4c lower on corn, and unchanged to 1-8c lower on oats. Provisions continued on the toboggan, and wound up anywhere from 10c to 22c down, the latter for January pork. Disappointing cables from abroad were the first bearish factors with which our market had to contend. Li-verpool was a large fraction below last night at the close, the downturn being LIVERPOOL, Dec. 28 .- The opened easy, unchanged to 1-4 lower, and following the opening further de-plined 1-4 with moderate realizing. clined 1-4 with moderate realizing. The easter American cables yesterday, cheaper American, Canadian and Aus-tralian offerings and the favorable weather in Argentine caused the pres-sure. The market is dull in view of the holiday season, and with lower cargo offerings and expectations of an early movement from Argentine hold-ers are inclined to realize. At the close the market was easy, 1-4 to 1-2

verpool was a large fraction below last night at the close, the downturn being brought about by the favorable wea-ther in the Argentine crop belt. The European exchanges were a shade firmer than Liverpool, but this did not serve to wholly offset the influence of the weaker trend of the English mar-ket. Later reports of general rain in ers are inclined to realize. At the close the market was easy, 1-4 to 1-2 lower than yesterday. Corn opened unchanged. Later the plate grade advanced 1-2 on the con-tinued good demand from Spain and lighter Argentine offerings. The Am-erican grade was off 3-8 on the lower Later reports of general rain in Argentine did not affect sentiment American cables and cheaper Ameri-can offerings. Toward the close plate lost part of the advance on the weak-ness in the American grade.

the Argentine did not affect sentiment at all perceptibly. Anticipations of an early movement from Argentine holders aided the bears here. During the day Broomhall cabled that his Argentine agent had verified the exportable surplus figures given about a week ago, and tho it had been ex-pected that the earlier estimates would be home out the percented could J. Crease in industries is phenomenal.
Wholesale houses have had a quieter of trade continues and houses are pretty well cleaned out. Interest is being directed on spring goods and require mants for next fail, by both wholesale men and manufacturers. Groceries have been continued active to fill Christmas needs. Oranges went cheaper, but nuts and cranberries advenced in price.
Packers and consumers have been well supplied with good holiday cattle, and this week the markets have been practically dead. Small meats continue to be wanted and hogs went duce markets were active. Butter,
THE BANK STATEMENT

**COBALT STOCKS HAVE SCORED** 

In the stock market movements of the year 1912, the present moderate "boom" in the Cobalt mining issues looms up as one of the most import-ant. It possesses a significance which probably has not yet been grasped by the general run of speculators, for it represents the revival of public inter-est in the silver mining securities, and in all likelihood is the forerunner of a continuous and active public par-Constant Drain of Gold For Bri-tain's Eastern Empire Alarms Modern Economists. Specialists in the precious metals still regard India as the enigmatical field on the map of gold distributions. From week to week those familiar with the market have watched the practice of setting aside from the Lonby assuming ownership of any of the Cobalt stocks.

eral n

practice of setting aside from the Lon-don arrivals a more or less constant amount designated as "reserved for India." During the period of 12 weeks end-ing with December 20, withdrawals on India's account from London offer-ings have been practically  $\pounds 1,390,000$ out of a total of  $\pounds 8,542,000$  of arrivals in the open market. Meanwhile there has been an offset in the remittances of India in the form of sovereigns ex-ceeding the total value of reserves for India during these ten weeks. This remittance, which arrived on Novem-ber 15 at the Bank of England, was  $\pounds 1,816,000$ . Below are the only wekly records in-buding withdrawais for Egypt, from ered a stamp mill i sion early in March £ 1,8/6,000. Below are the only wekly records in-cluding withdrawais for Egypt, from which there is a more or less constant abumment to India, of which no public

no matter if the applicant laid United States bonds down on his counter.

The growth of Mr. Morgan's power, which has made him the greatest Annancial figure in the world's history, reflects not only the growth of the country but shows the trend toward centralization-toward the elimination of competition. Mr. Morgan testified that he believed in combination and cooperation-not in competition, altho "a little competition" was sometimes good. \*

Twenty years ago Mr. Morgan was a financial pygmy compared to his present invulnerable power. The figures given above show the tremendous strides he has taken. They speak eloquently of the overwhelming confidence reposed in the man by investors.

now laid down their maximum aspira-tions and neither of them expects to see those maximum demands realized. From that maximum must, it is said, in diplomatic circles, come a compro-mise leading the negotiators toward the respective minimum which their countries can accept.

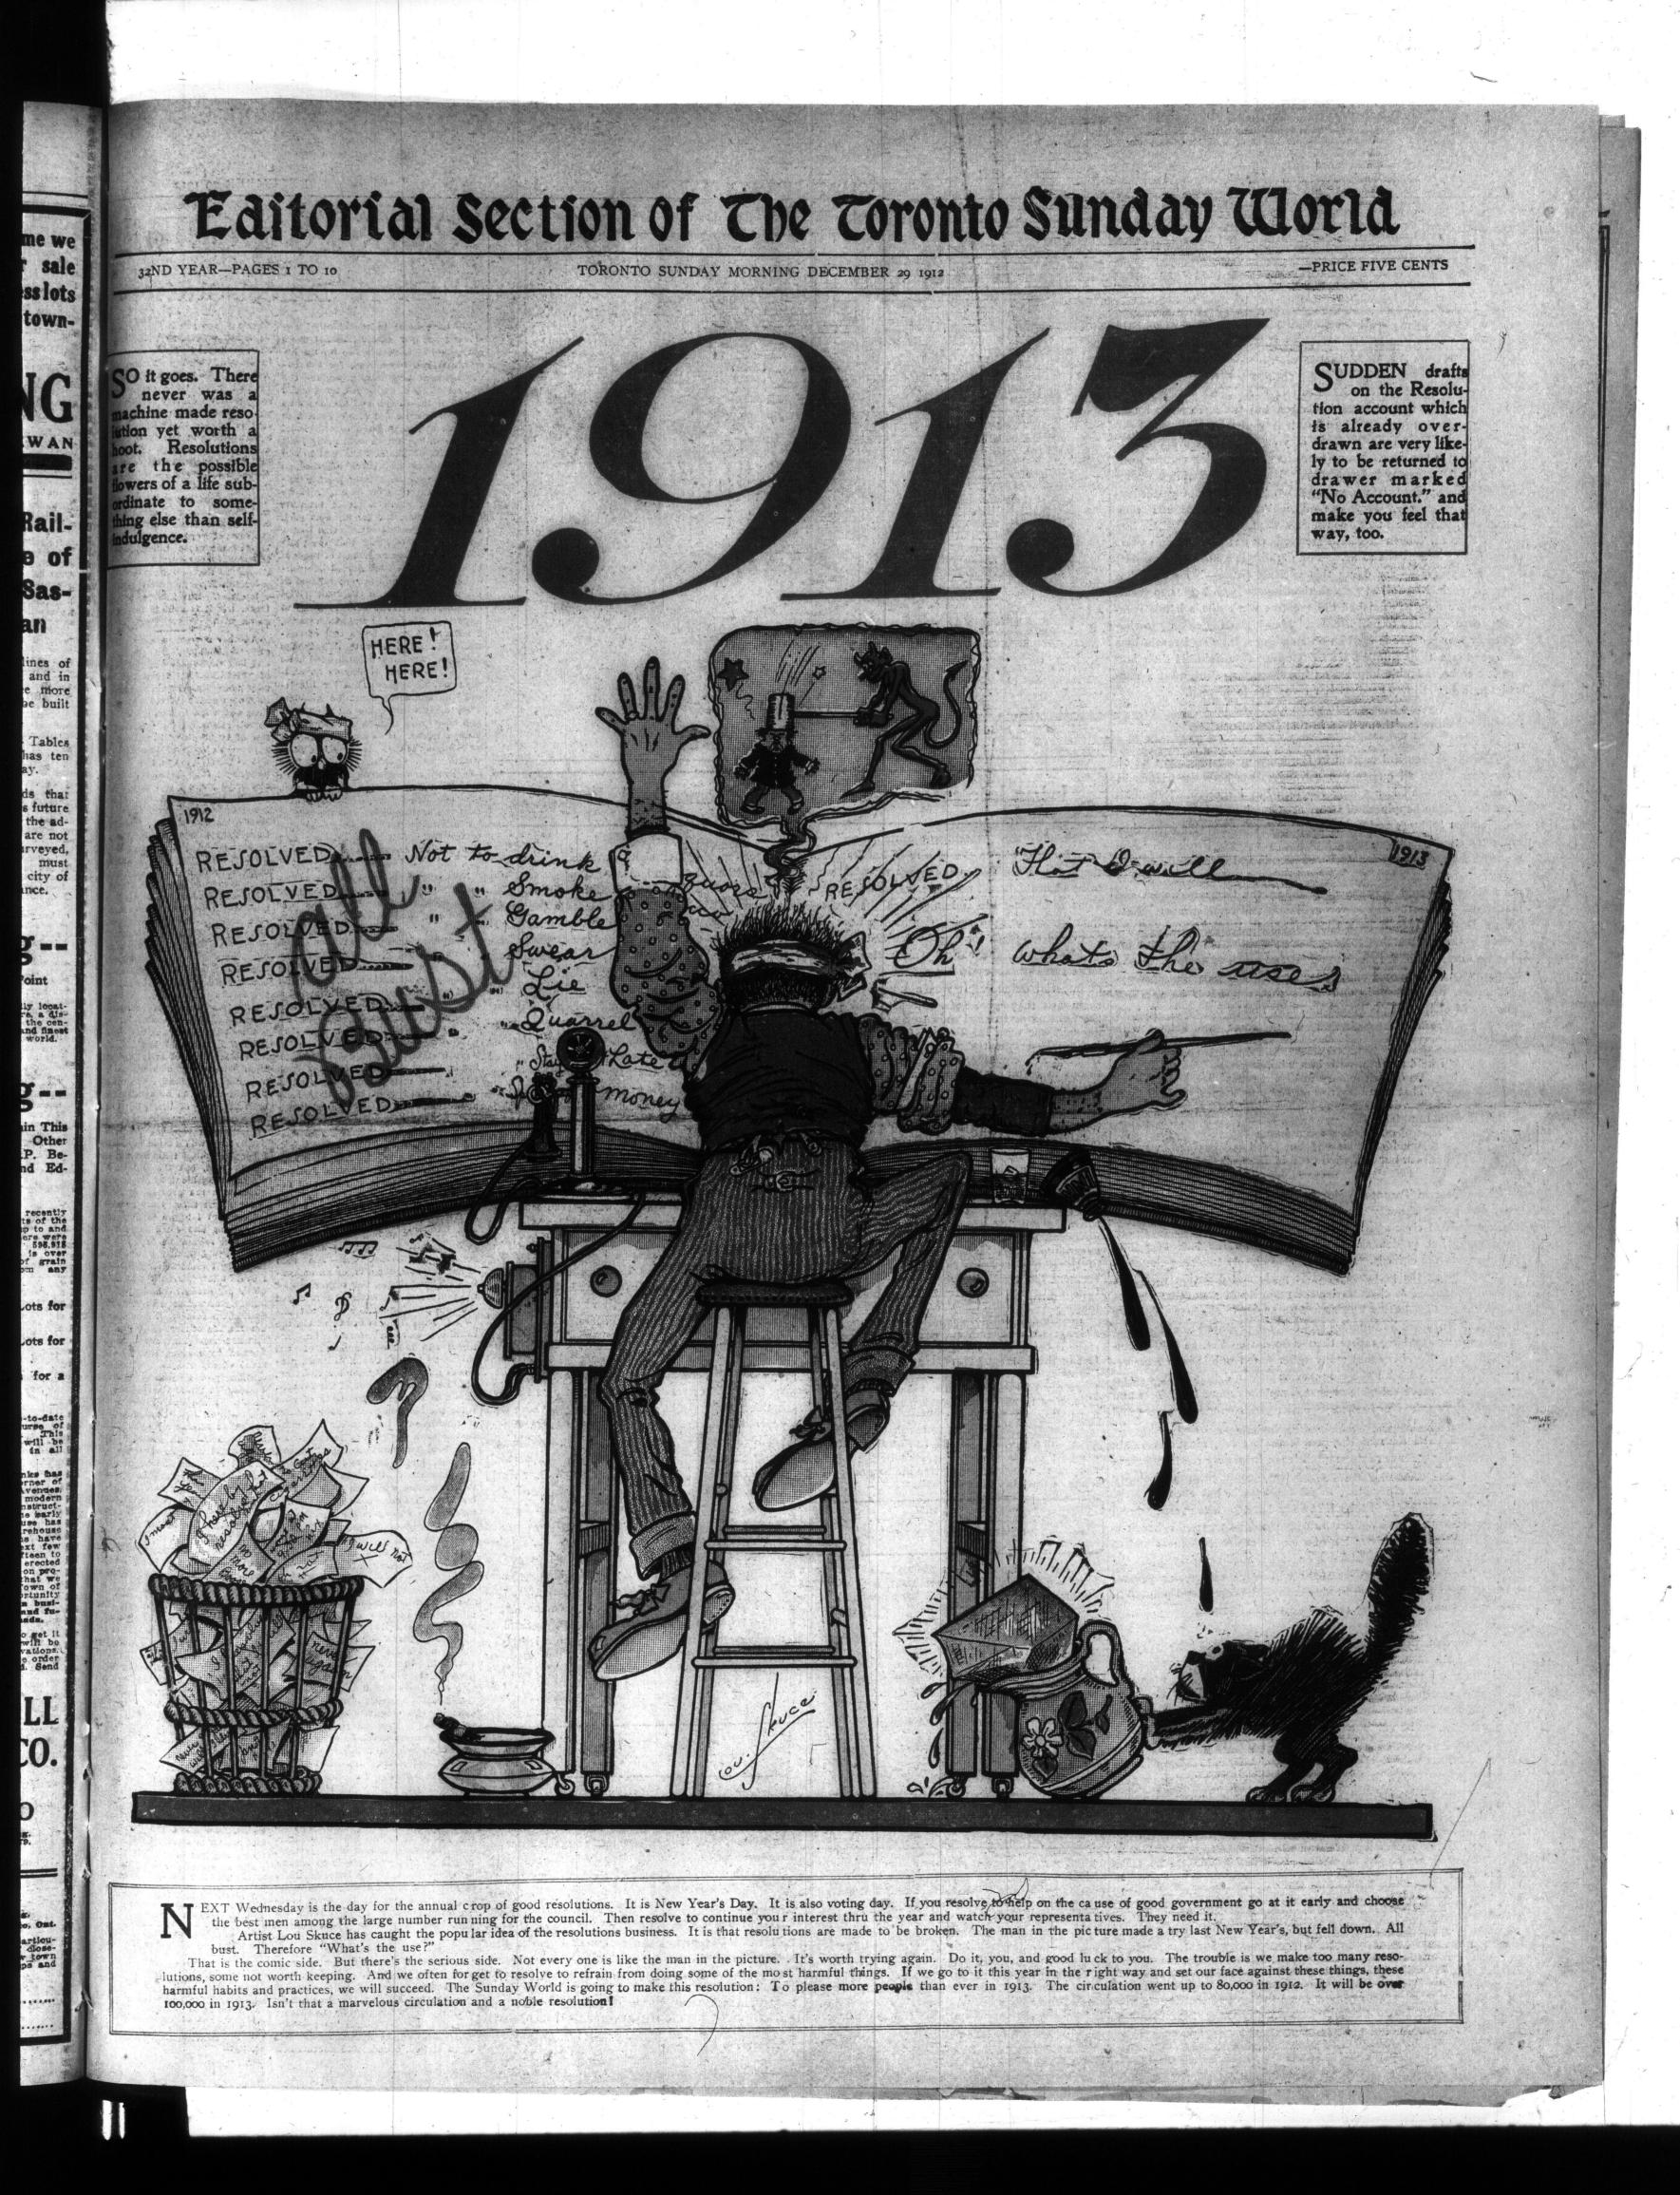

#### JOHN O'NEILL AS CONTROLLER.

Among the candidates for the important post of controllership none is more deserving of support than Mr. John O'Neill, jr., who for the last John O'Neill, jr., who for the last four years has been returned as al-derman for the second ward. As chairman of the property department of the city he has rendered splendid service, and its importance can be better understood when it is remem-bered that the value of the property administered by that department

administered by that department stands at the very large figure of from \$4,000,000, to \$5,000,000. This consists

the full together cheered with their mutual sympathy and companionship. Plans of the home are now under way, and it is hoped the building will be completed in the early future. Mr. O'Neill has strongly supported the erection of a municipal abattoir. believing that it will have the effect of

Good resolutions are even worse than good inter well traveled road that leads whitherward all know is liberally paved with both. It is an old saying that good resolutions are like pie crust, made to be broken, but the making of them, at least, provides a momentary glow of pride and self-satisfaction. New Year's Day is, emphatically the day of mental pledges, but their sincerity wanes as the journey lengthens. Therefore it is well to keep in mind the wise words of Emerson, "Write it in your heart that every day is the best day in the year. No man has learned anything rightly until he knows that ever day is Doomsday." His guide and friend, Thomas Carlyle, in pregnant fashion set down "Today is not yesterday; we ourselves change. How can our works and thoughts, if they are always to be the fittest, continue always the same?" The late Earl of Lytton, "Owen Meredith" reminds us not to think that years leave us and find us the same. "For nothing is stable-the hardest rocks distintegrate-are doing this without pause-No sooner has the tree reached its fullest growth than its strength begins to wane. Even before man has finished the greatest work of his hands inexorable nature begins to pull it down. Man himself is either growing better or worse, there is for him no standing still. Good resolutions and good intentions fulfilled are steps upward-unfulfilled their failure leaves an indelible impress on his character. But what a man can see in his fellows he does not recognize in himself.

"We see time's furrows on another's brow. How few themselves in that just mirror see."

That is a beautiful custom in Germany which requires that on New Year's Day all quarrels or estrangements between friends be buried for ever-all is not only forgiven but forgotten. Reconciliation has a deep happiness of its own. Greetings are kindlier when they replace coldness and resentment, smiles are sweeter when they erase the frown and love is warmer than the anger it follows. And so little often comes between severed friends and lovers and families, its very smallness often the worst barrier to overcome. What a good thing it would be were all to follow the German custom and make New Year's the day of reconciliation and remembrance. New Year's Day too should be a time of personal stocktaking. Trite indeed is the remark that looking back upon the old year gone for ever we never fail to see much to regret and much to deplore. Along · its pathway are strewn broken promises, wasted purposes, lost opportunities, unkind words and deeds that can never be recalled. The record of the year is closed and may not be changed. But we may begin afresh in the year that is to come and believe with Tennyson:

"I held it truth, with him who sings

All philosophies are built on Spirit and Matter being re tion, the egoes going over to the new habitat in a constantly increasing two manifested aspects of stream until a climax is reached. Absolute, out of Time and S After this the decrease, tapering down they are materialists, idealists to extinction, occurs, and another new sophists.

## Indian Independent States.

Should the "intelligent anticipation" with regard to the gift to the empire of battleships by

the heads of the Indian independent states prove to be accurate, it will not be remarkable in a sense. Time after time the Indian states have shown their loyalty to the empire, this having been demonstrated too often for it to be doubted.

Voluntarily the native rulers have offered large sums of money in the past towards the cost of imperial defence. It was a source of grief to them that they were not allowed to take part in the fighting or to send men to South Africa during our war with the Boers. At their desire the Indian Government elaborated a scheme for the training and equipment of picked contingents of

The American suffragette leader, Mrs. Catt,

This is a point that is worth the atten- ways breaking away fro tion of suffragettes and others in this country. If ways sticking to them. In the east they aspire to the vote and equality in other directions with men, they must be prepared to adopt a third and fourth general

To one clear harp in divers tones That men may rise on stepping stones Of their dead selves to higher things." with Longfellow: And "That of our vices we can frame A ladder, if we will but tread Beneath our feet each deed of shame."

New Year in Toronto is closely associated with the responsible duty of electing the city council, to whom will be entrusted the management of civic affairs. This city suffers, as almost all municipalities suffer in democratic countries, from the lack of public spirit among the citizens. In a matter so closely touching the common well-being the presence of civic pride and devotion would be naturally assumed to characterize the majority of those that possess the privilege of selecting the men who are to conduct the city's business. But men, both young and old, are prepared to spend their spare time at anything rather than civic duty. Yet, as Mr. Chamberlain, Lord Rosebery and many other noted public men have repeatedly urged with all the eloquence at their demand there is no public service more valuable or that commands more immediate and honorable reward. Nor is there any that yields so much present and evident benefit. Democratic government, dependent as it is on the loyalty and patriotism of the people themselves, must inevitably suffer from the absence of these qualities or from only rendering them lip homage. Fortunately there are always some citizens of ability and integrity who are willing to fill the breach, but even they are dependent on the votes of their fellows and are too often turned down in favor of professional politicians whom no one trusts. When it is realized that the administration of a city is really a business and to be successful must be conducted on strict business principles, the important matter of its government will become of wider general concern. But as things stand today many are prompt and pointed in their criticisms, but few are ready to give their service.

"Surely," wrote the late "Ian Maclaren," Dr. John Watson, "there is work to be done in a city that might well fire the imagination and brace the energies of youth. It were something to secure for every citizen a well-built, well-drained, well-lighted house, in which he could live as becometh a son of God; to see that the densely inhabited areas be ventilated and relieved by open spaces of greenery; to bring museums, libraries, picture galleries and every other means of culture near to the humblest of the people, to take measures that the poorest to whom the Almighty has given understanding shall have his due opportunity of gaining knowledge and becoming a strength to the commonwealth. Were a young man to give himself to municipal politics for such ends, he would have done something worthy of his manhood." In Germany young men take up city management as a profession, are trained in it as to any other line of life. The graduate begins as mayor of a small town. As he gains experience and if he prove his ability and capacity, larger municipalities seek his services until he may end as the administrative head of one or other of the great civic centres. This system would be held undemocratic among Anglo-Celtic peoples who are jealous of encroachment on popular rights but of late a distinct trend towards longer terms and larger industrial responsibility for departmental efficiency has made itself evident. The demand for a single city manager is a still later example of dissatisfaction with existing methods. Unless the representative system produces better results than it has hitherto been doing on this continent the call for either government by an elected commission or some modification of that form of city administration will become too insistent to be gnored.

in certain states, with a view to the chiefs to bear a direct share in the defence of the empire.

Thus was formed the Imperial Service Troops who are fit to take their place in line with an others. In addition, there are sappers and miners, camel and transport corps. The flower of the native Indian armies has on recent occasions been placed at the disposal of the British Government virtually a part of the imperial forces.

India is a curious conglomeration of territories governed by the king directly, and of states governed by Indian princes, or chiefs, under the suzerainty of His Majesty. There are large tracts. of tribal territory not ruled by the Indian Government the under its influence, and further than this, there are self-governing states within the political sphere of influence.

With a few minor exceptions, the native states are not under the direct control of British offi cials, it being the case that British law has no effect in these states. Not taking into account such countries as Afghanistan, Nepal, and Bhutan, there are 688 native states, which, in the aggregate, cover some 700,000 square miles, and possess a population of 70,000,000

Many of the Indian states do not ordinaril appear in the official tables, tho forming an integral part of the empire. It may be stated, however, that, roughly, the native states occupy twofifths of the total area of India.

## About Ourselves.

The Sunday World wishes its readers a Happy and Prosperous New Year, and takes the opportunity to thank all who have contributed towards its success during the year that is just closing.

We have gone steadily onward and close the year with a circulation of approximately 80,000. Taking five readers to every copy of the paper, 400,000 people in Toronto, Hamilton and many of the smaller towns and cities of Ontario read The Sunday World every week, and we look forward to even a further increase in popular estimation during the year 1913.

We believe that no other paper in Canada has made such satisfactory progress, and we thank our readers for their support.

## The Good Fellows.

Thru the kindly efforts of The World Good Fellows over two thousand kiddies were provided with a substantial Christmas dinner and otherwise made to feel the spirit of the season ...

Three months ago. The Sunday World in augurated this movement in Toronto. It is the best movement that has been devised for bringing those who have plenty into personal contact with the poor and distressed. Many cases of sore need were reported to The World and we believe that a splendid work was done.

Next year we hope that the movement will be on a stronger basis and that even more families prosperity, as well as the employers and sharewill be assisted.

wearing the corsets and dresses she is thrust into. Ing lest they forget the way. Here is The American woman, like her European sister, is a creed, contra, from a Hamilton man I became nothing more than a rack upon which dressmakers who signs himself "Peebles Junior," hang ideas embodied in fashionable fabrics. Can tending public meetings, as he puts you fancy Chinese women being the slaves of his creed in the form of a resolution. European dressmakers? ## **GENERAL SALES CONVENTION OF AUTOMOBILE FACTORIES**

### Big Gathering Results in Comprehensive and Useful Discussion of Best Methods of Selling.

INDIANAPOLIS, Ind., Dec. 25.-What is believed to be the most comprehensive discussion on intensified salesmanship and advertising for the retail automobile merchants is the proceedings of the General Sales Convention held in this city, which has been issued by President J. J. Cole of the Cole Motor Car Company, the originator of the convention idea which resulted in the formation of the Automobile Sales Association. This organi-

zation meets next year in Detroit. The book is a full discussion of the selling of motor cars today, and the methods that the automobile dealer, should take in handling the sales of cars, how to properly advertise them and work with a viewpoint of pleasing his customer, and at the same time to make money. It is understood that make money. It is understood that the books will be distributed to all

the books will be distributed to all persons making application for them to President J. J. Cole. Auto Selling Principles. Summed up, the book gives prin-ciples for the proper conduct of the automobile business taken from the opinion of some of the most success-ful men in the subomobile advertising and other lines of business, the whole thing being backed up by intensified salesmanship and advertising. The principles are: Helping the dealer to form a money-

territory backed up by the use of more concentrated sales effort because of advertising. Briefly he said:

**RAVINE BRIDGES** The accident which happen-ed last Saturday to Dr. J. L. Davidson, when his car skid-ed on the Huntley street ed on the functey street bridge, and broke thru the railing, almost crashing into the ravine, brings up the ques-tion of these bridges as far as the motorist is concerned.

Skids are everyday. occur-rences during the snowy and wet weather, and while they are often events of no particuare often events of no particu-lar danger on the streets, they might result in a horrible ac-cident if they occurred on a ravine bridge. The guard rails of these bridges, as has been proven, are very filmay. We would suggest to the works department that they have these railings reinforced by a stout steel guard rail, three or four feet in height, either in front of or behind the existing railings. railings.

In the case of a car skid-ding, this guard rail would eliminate the horrible possi-bility of a motor car and its occupants being hurled to in-

nobile business as a game, said:

speculation in automobiles, has gone. In its place stands a young and power-

concentrated sales effort because of advertising. Briefly he said: the proved efficiency of this method "There is nothing that so absolute- day, Tuesday, Wednesday or Sunday in your paper, and you will see how that

The above apparatus when applied to the business of road making becomes one of the greatest instruments for improving modern living conditions that civilization has ever known. Good roads are an absolute essential to the progress and prosperity of any country. They bring the people into closer touch with each other, they lower the cost of the necessities of life, and they improve one hundred per cent. the conditions under which the farmer lives. All over the United States wherever a new state highway has been built, farms have appreciated in value, and markets for the farm products have become better for the farmer and better for the consumer, both as to price and as to the condition in which the goods are delivered at the market centre.

Motor traction has changed the method by which freight of all kinds is handled. Thruout the United States and England, deliveries formerly made by the railways, expensively and with much delay, are now being made cheaply and expeditiously by means of the motor truck. The one thing essential to this style of delivery is, of course, good roads.

Every citizen of Toronto should on the coming election day, see that whatever else he does, he votes in favor of the good roads bylaw. It will benefit him and further the interests of the community to an enormous extent.

the amount of the salesman's salary, or the amount of expense that has to be charged to him for his services."

Newspaper Advertising. John Wetmore, dean of American utomobile editors, breught out some pertinent truths about newspaper advertising, saying: Now, when you sell cars you want to be a good seller yourself. If you

which in some parts of French marriage, which in some parts of France exists' today. A young man and young wo-man to the vlews of their parents are guite intended for each other. Either side arranges a dowry and they are married forthwith, without any regard as to their own wishes. This is the theme of the play and it is the foll theme of the play, and it is the fail-ing in love of the apparently unhap-pily married couple that furnishes the charmingly amusing incidents of the piece. It is a play brilliant with with and sparkling with crisp lines, a comedy which will surely amuse you, and a good deal of which you will take bome to your private apartments and remember. The occasion of Mr. Wal-ler in "A Marriage of Convenience," in this city will undoubtedly be looked forward to with much pleasure.

For the interpretation, Mr. Waller has brought out a number of the members of his own English company Hughes, Mr. Charles Dodsworth, Mr. adge, Mr. Maxwell Ryder, Miss Annie Hughes, Mr. Charles Doelsworth, Mr. Reginald Dane, Mr. George Allison, and several others.

The City of Schoneberg, Germany, in an endeavor to bring down the cost of living, will try the experiment of breeding rabbits for food. ## THE FIRST SUFFRAGETTE 4000 YEARS

AGO Interesting Records and Relics of Queen Hatshepsut, Pharaoh of Ancient Egypt, the First Woman to Win Full

The Queen Making Offerings to Painting on the Temple Wall at Deir el-Bahri

### The Vulture, Emblem of Queen Hatshepsut.

ER

3

K

THE first great suffragette lived nearly. 4,000 years ago. She ruled over Egypt m the sixteenth century B. C. She was the first woman who ever ruled alone in Egypt. Archaeologists have just been bringing to light her works and the story of her achievements. Her name was Hatshepsut. She fought as hard as any modern suffragette for her rights. She compelled her father, Thutmose I., to surrender the throne to her, as she was the only remaining child of Queen Ahmose, descendant of the older line of Pharaohs.

All this has now been revealed with wonderful clearness by the latest expedition to Nubla from the United States. The Eckley B. Cox, Jr., expedition, headed by D. Randall-Maciver and C. Leonard Woolley, has now returned to Philadelphia, bringing thither many of the remarkable jewels and inscriptions which were uncovered in the ruins of the Temple at Buhen. This was the Southern Temple built by Queen Hatshepsut, and from its inscriptions much more of this remarkable woman's history has become known.

A half-brother, Thutmose III., son of the same father, but whose mother was a favorite named Isis, plotted long with the priests that he might be proclaimed king. Hatshetpsut had married this half-brother, but refused to allow him to rule. First she forced him to acknowledge her as coruler, and her next step was to force her husband into the background and assume all the honors and rights of the Pharaoh. She was called "The Female Horus," and the word "Majesty" was made feminine in Egyptian for the first time in the history of the country.

Hatshepsut proved her royal power by beginning the erection of great monuments and a mighty temple on the west side of the Nile at Thebes. This is the temple of Deir el-Bahri, lately excavated by the Egypt Exploration Fund. But her struggles were only beginning. Her father was still alive, and another brother known as Thutmose II. plotted with his father and managed to wrest the throne from the queen. He ruled but three years, when Thutmose III. managed to. edge his way to the throne, even plotting to keep his wife in retirement. She was too smart for him, but she acted at first as co-regent until she had gathered strength enough again to force him into retirement

From this moment Queen Hatshepsut showed how great she was. "Egypt was made to labor with bowed head for her, the excellent seed of the gods. The bow-cable of the South, the mooring-stake of the southerners, the excellent sterncable of the Northland is she; the mistress of command, whose plans are excellent, who satisfies the Two Regions when she speaks," is the record of Ineni, the great architect of the temples built by her father and herself.

Her own partisans were placed in all the high offices in the empire. Her scribe, Amenemhat, and his assistant, Aahmes, stood next to the Queen, not only recording all her wondrous deeds.

Political Rights for Herself

but helping her to bring them to pass, and the sanctuary, fianked by an open colonnade on two most powerful of her adherents, Hapuseneb, acted as vizier and high priest of Amon, the great god. All the inscriptions on her two temples, those at Buhen and at Thebes, were filled with adulation of the Queen. One scene depicts her father, Thutmose I., saying before the assembled court on New Year's Day: "Ye shall proclaim her word, ye shall be united at her command. He who shall do her homage shall live; he who shall speak blasphemy of Her Majesty shall die."

Queen Hatshepsut now continued the work of building her great temples, interrupted by the family quarrels, and especially at Deir el-Bahri did she expend all of her ingenuity in planting the terraces with myrrh trees from Punt, supposed to be the original home of the gods. She sent her ships to transport the trees, and on the walls of the temple her great enterprises were pictured in full detail.

The latest excavations at the Southern Temple reflect great light upon the luxury of her age. As a woman she introduced many refinements, and used the great wealth of the nation for gold and jewels. Here is a magnificent necklace of gold and amethyst, a yard long, found in one of the tombs, with other strings of gold beads, gold bracelets and rings.

In these tombs, too, were found strings of amulets in the shape of Hathor heads and gold hawks. Statues of the scribes, Amenemhat and Aahmes, were discovered, perfectly preserved, and a statue also of Merer, the gardener, a most important personage in her court, for his was the task of caring for the sacred myrrh trees in the temples.

Hatshepsut was not above the vanities of woman, for the perfume-pots, the little pincers and magnificent mirrors that lay upon her toilet table have all been brought to light, proving that with all her wonderful, almost masculine statesmanship, she was not above making herself as attractive as the art of her maids could make her. From the records of her reign it is known that even though she did not lead her armies in person, she controlled wide domains in Nubia and Sinai, working the mines of that district, and that

she measured her gold by the sackful. This southern temple at Buhen was built of fine sandstone from a Nubian quarry, and contained two

parts-a closed and roofed oblong building, in the centre of which is the

of four sides, and a fore-court, open to the sky, composed of square and round columns. The inscriptions show that the temple was built almost entirely by Queen Hatshepsut, although her husband tried to steal away the credit by writing his name on every wall. He even removed whole blocks of stone bearing her picture and placed his own portrait in their stead.

The square pillars were all sculptured with the Queen receiving the symbol of life from the great gods and goddesses.

On the front wall of the entrance are two fine reliefs, one on either side of the doorway showing Hatshepsut and Thothmes II., each with the right hand extended, to symbolize the offering of the temple and its endowments to the gods. On the south side Hatshepsut is again shown, first between the two gods and then alone.

Some of the inscriptions on the temple walls are interesting as showing the religious ideas of this great Queen:

"All that enters the temple of Horus, Lord of Buhen-It is pure."

"Oh, Horus, Lord of Buhen, may he grant life, prosperity, health, a ready wit, favor and love."/ When at last she died, after ruling for twentyone years, her miserable husband, who had hardly dared to raise his head while she was alive, hastened to deface every one of her monuments, erasing her face and name from every obelisk and temple erected by her, and striving in every way to steal the glory of her great and beneficent rule. It has remained for modern excavations to prove how great this woman was and what striking achievements really belonged to this, the first great Queen the world had ever known, Hatshepsut, Pharaoh of Egypt.

claim to be now?"

ly, "but you yourself have just dem-onstrated conclusively that the rob-bery couldn't have taken place at the hour mentioned." "Iff grinned appreciatively. "You're improving," he said. "I guess that doesn't get you even with me for the rest of your life—what?" "Moreover." Manyers went on dog-Captain Cobb

A Serial Story

"You say you have proofs of this of yours?" demanded the captain at length.

captain at length. "Oh, yes—surely yes." Iff's tone way almost apologetic. He thrust a hand between his shirt and waistcoat fumbled a moment as if unbuttoning a pocket, and brought forth a worn lea-ther wallet, from which, with great and exasperating deliberation, he pro-duced a folded paper. This he handed the captain—his manner, if possible, more than ever self-offacing and meek.

the captain—his manner, if possible, more than ever self-effacing and meek. The paper (it was parchment) crackled crisply in the captain's fing-ers. He spread it out and held it to the light in such a position that Staff could see it over his shoulder. He was unable to read its many close-ly inscribed lines, but the heading "Treasury Department Washington, D. C." was boldly conspicuous, as well as an imposing official seal, and the heavily scrawled signature of the See-retary of the Treasury. Beneath the blue cloth, the captain's shoulders moved impatiently. Staff heard him say something indisting-uishable, but of an intonation calcu-lated to express his emotion. If giggled nervously: "Oh, Captain! Holding himself very stiff and erect, Captain Cobb refolded the document and ceremoniously handed it back to the little man. "I beg your pardon," he said in a

"I beg your pardon," he said in tion.

Miss Landis offered no objection: Staff and Manvers volunteered to maintain discretion, Jane was sworn to it. Motion seconded and carried; the meeting adjourned sine die; the sev-eral parties thereto separated and went to their respective quarters. Staff accompanied Alison as far as in her sisternew, but didn't tarry long low voice. "Don't mention it," begged Iff. He replaced the paper in his wallet, the wallet in his pocket. "I'm sure it's quite an excusable mistake on your part, captain dear. As for you, Mr. Manvers, you needn't apologize to me," he added maliciously: "just make your apologies to Captai Cobb."

VII.

Stole Away. And then (it seemed most astonish-ing!) nothing happened. The net out-come of all this fuss and fluster was precisely nil. With the collapse of the flimsy structure of prejudice and suspicion in which Manvers had sought cerned seemed to simmer off into apathy. Nobody did anything helpful, offered any useful suggestion helpful, to trap Iff, the interest of all much frony. "And what, pray, do you offered any useful suggestion or brought to light anything illuminating. Staff couldn't understand it, for he life of him. There was, to be sure, a deal more

talk in the captain's cabin-talk in which the purser took little or no part. in the background and betrayed every indication of a desire to crawl under the table and be a good dog. The captain had his say, however, and in the end (since here), however, and in

was scowling ter should be kept quiet; it would do be argued, to noise it about amongst the passengers; the news seemed perilously was leaning grace-hair-her pose stud-effective-while she

(in some obscure' and understigation. shion) impede official investigation. He would, of course, spare ne pains to fathom the mystery: drastic meas-ures would be aken to secure the detection of the culprit and the resti-tution of the necklace to its rightful owner. The ship would be minutely, if quietly, searched; not a member of the crew, from captain to stoker, would be spared, nor against any passenger against whom there might develop the least cause for suspicion. Detectives would meet the ship at New York and to cooperate with the customs officials in a most minute investigation of the passengers' effects. Everything pos-sible would be done—trust the captain! In the meantime, he requested all pre-to sent to regard the case as confidenlealousy, and in general (as Staff ound a chance to tell her) seemed to be having the time of her life. "And why not?" she countered.

"Judged by your conduct," observed Staff, "one would be justified in think-ing the Cadogan collar an article de

Paris." Paris." "One might think any number of foolish things, dear boy. If the col-lar's gone, it's gone; and not all the moping and slooming imaginable will bring it back to me. If I do get it back-why, that'll be simply good luck; and I've never found it profit-able yet to court Fortune with a dole-ful mouth."

ful mouth "You certainly practise your theory." he said. "I swear I believe I'm more concerned about your loss than you

"Certainly you are, you silly boy. For my part, I feel quite confident the necklade will be returned. He stared. "Why?" She opened her hands expressively.

"Tve always been lucky. . . . Besides, if I never see it again, it'll come back to me this way or that — in advertis-

The year swings to its close. any of us it'may be the last year of There must come our

Butast year, like our day, our hour, which had won thru all deter-herself crowd, s well-for there is such a thing as of life. But with each New year comes plans and hopes and good world going. Without it life began end of ummed silken hardly worth while-as our too frequent suicides prove. It takes ither madness or mettle to do away with oneself. A week ago I counted e asked he suicides wthin six days in Ontario They numbered sixteen. What uite full dered it

the state of the second st ed, en awl by by old earth was making conculhe ensive efforts to wreck humanity-clean out the whole existing lot-before she er tone. d, this ed the corner with a new year.

Our Good Resolutions

It is hope that prompts our good resolutions, and if we never kept one of them for more than a week it is ine to make them. That is why each aid she.

fine to make them. That is why each new year is really a soul tonic. You are going to do better. Perhaps you tell God, that, on your knees in the Father—that you will try—with His with, perhaps, tears no man may feel ashimed of, you promise Him—Our f ther—that you will try---with His hep—to be a better man and woman the to the writing, on Canada, of an-You for You'll n: "I'm or make lequate

wards English girls who come across to better themselves in a new country. I suppose we shall always have the printed opinions of the tripper who runs thru a country, and, returning, airs his opinions. I would like to say a word for the English girl who say a word for the English girl who comes over here, as I have often said a word for the Englishman—son of the best race in the world. (And I am Irish, mind you. And we Irish and Scots count when it comes to talking or doing in Imperial matters.) For the English girl, I would tell with fond memory—of a little maid I once picked up at the emigration of-fice. She was thin, but rosy, and fresh in the sense that the newly-plucked flower is fresh and of sweet odor. And she was dear all thru—my little Kentish maid! The kindest girl with a baby (the dearest of bables, of course! Aren't old mothers garrulous?) Her name was Emmie—and she was of color-ful, and amiable character. I wonder what has happened to her! wonder what has happened to her! When last I saw her she had begged the little red shoes of the baby, on which her tears and kisses showered as the train moved out, treading soft-ly, as our big cars do.

The White Plague

Recently there was a list of the difoccupations represented in losis patients given in a Toferent es plans and hopes and good ronto daily. Almost the only trade or After all, it is Hope that profession not mentioned—in plenty, was that of steeple-jack, but, no doubt that active fellow has no time for consumption. I noted among the larger figures that bookkeepers (120), clerks figures that bookkeepers (120), clerks (104), domestics (169), housekeepers (?) (1180), laborers (343), and, sadly enough! school children (298) are sufferers. Teaching school also come high, the number of school-teachers who are (or were) consumptives, high, the humber of school-teachers who are (or were) consumptives, reaching (119). But perhaps the most astonishing item on the list is that of Canadian farmers (308). There are 35 doctors on the list, 98 tailors, 16 clergymen, and but one journalist. The list is headed with the sentence:

"We are almost disposed to say that if your occupation is not named we do

if your occupation is not named we do not ask you for a contribution to the King Edward Memorial Fund." Well, you are not a steeple-jack, you know, so dig down into your purse and send something to this fine fighter of the terrible white plague. W. J. Gage, St Spadina avenue, or the Secretary-Treasurer National Sanitarium Asse-ication, 347 West King street, Toronto, are I believe, the persons responsible

Talking of the white plague brings heip-to be a better man and woman in the coming months. ments. Legs that are too short give one a commonplace carriage and take away all impression of nobility

It is only thru complete, unswerving devotion to the perfect blending of form and substance; it is only thru an unremitting, never discouraged care for the shape and ring of sentences that an approach can be made to plasticity, to color; and the light of magic suggestiveness may be brought to play for an evanescent instant over the commonplace surface of words; of the old, old words, worn thin, defaced by ages of careless usage. The sincere endeavor to accomplish that creative task, to go as far on that road as his strength will carry him, to go undeterred by faltering weariness or reproach, is the only valid justification for the worker in prose.

And if his conscience is clear, his answer to those who, in the fulness of a wisdom which looks for immediate profit, demand specifically to be edified, consoled, amused; who demand to be promptly improved, or encouraged, or frightened, or shocked, or charmed, must run thus: My task which I am try-ing to achieve is by the power of the written word to make you hear, to make you feel—it is before all to make you SEE. That -and no more, and it is everything. If I succeed, you shall find there, according to your deserts, encouragement, consolation, fear, charm-all you demand; and, perhaps, also that glimpse of truth for which you have forgotten to ask .- Joseph Conrad (as quoted in, "Some English Story Tellers," by Frederic Taber Cooper.)

Cold House for Plants We of the north temperate zone have our hot houses in which we nurture those plants which are unable to stand the sometmes frigid temperature of our clime. Calcutta, India, has a very curious reverse of this custom." In the public botanical gardens there is what may most aptly be called a cold" house, where plants from the

less torrid regions are kept, in order that they may flourish as they are wont to do in their native environ-ment. Calcutta's botanical gardens contained, even thirty years ago, a fine collection of plants from both the orthern and southern American cities do not boast of any-thing exactly resembling this cold house. Our substitutes for it in any extensive nursery are a series of rooms or chambers in the hot house, each of which is heated to a special temperature, according to the species of plants that are to be placed therein. Thus, one chamber may be at a temperature of 68 degrees and the chamber immediately connecting may record on its hermometer 80 degrees. In this way, the botanist may study,

simply by passing from room to room, the flora of every clime, from that of the tropical to the mosses and lichens the sub-arctic.

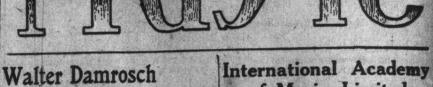

Houses Without Nails. Some of the Ruthenian immigrants

who are settling in northern Alberta are introducing somewhat novel architectural methods. Their first attempts at house building are usually of the kind they have been accustomed to over in Europe, and their buildings are of the typical Ruthenian style-log, pitch-roofed, thatched, and wide in

Narrative of Twenty Years of Unceasing Effort For Country's Welfare-Trailed by Spies and Hired Assassins Sun Yat Sen, the Type of a Perfect Gentleman, Brings About a Bloodless Revolution.

Take off, your hat to a Chianaman. For why? Because he is the truest type of patriot to be found in mod-ern times. Imagine, if you can, any Canadian, any British, any United States politician, working day ine and drug erit at the right of his life for any of Macao, but, because of Portu-subscription of the right of his life for any of Macao. day out, at the risk of his life for guese regulations, was compelled to twenty years, in order to change the quit there, and took up his mind to work in society of some eighteen whose object was to "men of his country, and then, having ac-complished that change, instead of reobject was to "mend or end taining the high office of the leader the Manchu rule. Seventeen of these of the nation, to voluntarily hand it were beheaded shortly after the inover to another, apparently relinquish-ing that for which he time and again ception of the society and Sun Yat Sen alone left to carry out its gram. For seventeen years—from 1895 to 1912—death by violence threatened him. For seventeen years he preached placed his head in danger. Yet, that is what Sun Yat Sen did. Yet, that is what Sun Yat Sen did. to 1912-death by violence threatened being the series of it, fragmentarily, in our him. For sevence years he preached ing his famous New York Symphony newspapers a few months ago; but the cause of a new China in all parts or concerts to be given by the Nater and the series of the accomplishment, did be found, and under all sorts of dissectional convention and increases it was practically a bloodless revolution. It is to found on and imprisoned in the Chinese embassy, there. ## Work of Dr. A. S. Vogt Lauded in England

Choir Conductor Has Unique Opportunities of Intercourse With Leaders in Music.

An excellent photograph of Dr. A. on Thursday, Jan. 2nd, 1913. All branches of music taught S. Vogt. accompanied by a sketch of his career, appears in the December teachers of recognized abil-1st issue of The Musical Times of Special method for piano ar-London. The following paragraphs gleaned from the sketch may be of interest to Torontonians:

"It is evident that Dr. Vogt is a musician of wide experience, an acute and receptive observer, and able to estimate judicially the force and value of Year Book mailed on applithe stream of tendency he has ex-amined. He is best known in this country by his repute as the conduc-tor of the Mendelssohn Choir, on whose chievements critics in Canada and the States have lavished their enviable opulent vocabulary of praise.

"Dr. Vogt's father was a native of Baden and his mother a native of Berne. His musical leanings were in-herited from his father, an organ-SCHUBERT CHOIR builder, who emigrated to Canada in 1842, and was among the first to es-tablish an organ factory in Ontario. Dr. Vogt was born in 1861, at Wash-ington, County of Oxford, but his early boyhood was spent in Elmira, a centre of the most fertile and wealthy section of the province, in-MADAME WAKEFIELD. Barron Berthald, Dramatic Tenor. FEB. 24th AND 25th. Subscription lists at Massey Hall. habited principally by Germans. When Marie C. Strong he was twelve he was appointed organist of St. James' Lutheran Church Teacher of Singing. Pure Tone. Artistic Interpretation. Studio: Nordheimer's, 15 King St.E. Elmira, where the organ built by his father still remains. The musical portion of the service was plain and large-ly congregational in character, consisting chieffy of chorales of the usual German type. Dr. Vogt believes that this dignified and serious music ex-

ntrancing the sight! What tlife is around! around! The air is so bracing-the snow on the The glimmering steel, in it's flash on the Marks out the line as the skater goes

Grasshopper. Start straight ahead on the plain forward movement, and while under good speed bend the knee of the right so low that the skater almost appears to be sitting on the ice, taking hold of the right skate with the right hand, stretch the leg out horiiontally to the ice going in the dition in which you started-straight ahead. This movement may also b skated backward by bending the knee of the balance foot fi.e., the foot that was at first horizontal to the ice) to such a position that the skater appears to be sitting on both legs at the same time traveling over he ice at a good speed.

#### Wheelbarrow.

While one skater is executing the "Grasshopper" with the right foot horizontal to the ice, his nands are swung up behind him, while another skater takes hold of them and pushes the low-bent human wheelbarrow along the ice. The wheelbarrow and rasshopper are known by other ames, the grid-iron also the flat-iron other and even bowsprit.

#### Crosscuts or Anvils.

Grosscuts or Anvils. Fig. 38). Formeriy the "crosscut" was known as the anvil owing to the resemblance to a blacksmith's anvil. It is supposed to have originated in Canada about the year 1870. These figures, in which there is absolutely no change of edge, are remarkable for their difficulty. Feweexperts excel in the crosscuts. To execute the crosscut the skater starts Fewwexperts excel in the crosscuts. To execute the crosscut the skater starts on an outside edge with crosscuts or anylis. Continue a curve, say, of the right foot. The curve if a finished ringlet and if completed, would have a radius of about two feet. When the skater; has completed the semi-circle, and would naturally make the exemplete revolution the right foot is complete revolution, the right foot is drawn very sharply back in a per-fectly straight line of about six inches, fectly straight line of about six inches, the skater then continuing forward on the outside edge, and crossing his former lines, in two places, as shown in diagram. The balance foot swings backward with much force as the skater draws backward, and forward as he draws forward.

SCHOOL. questions of disqualification, interpre-tation of the programme, and merits the inspectors are conversant with every phase of hygiene, child welfare, as gracefully as flocks of sea-birds skimming over a placid sea. Quadrilles. Here we have "United Skaing," i. e. movements in which more than two persons participate. The "Quadrille," is rarely skated in Ontario, but occas-Figure Skating Program.

The Demon Eight. This figure eight is undoubtedly the This figure eight is undoubtedly the most difficult to accomplish of all the "eights" and to the spectator appears comparatively simple. Start as if to execute an ordinary backward cross roll by making a backward circle, say, roll by making a backward circle, say, on the right foot first. Continuing the figure the skater would naturally cross the left foot behind the right and execute the other circle on the outside edge backward of the left, thus forming an eight. In executing the Demon the skater executes the the Demon the skater executes the backward circle on the right but inbehind the right it is crossed, in front, at the same time being placed on the backward outside edge, the same as the it had been placed in that position by crossing it behind. Unless the reader has had a long acquaintance with the ice he had better not waste time endeavoring to cut this figure, with the ice he had better not waste time endeavoring to cut this figure, seeing that it may take him more years than he would care to spend to learn it: Ox Horns. (Fig. 40). Begin as if to execute the crosscut, ut, instead of crossing the outside seeing that it may take him more years than he would care to spend to learn it! but, instead of crossing the outside edge line, simply change the edge from outside forward to inside back-ward then outside to the the matter in biennial congress to settle ward, then outside backward to in-side backward, and finally to outside forward, finishing thus: Swedish-Crosscut. (Fig. 41.) Begin as if about to execute the ordinary Canadian Crosscut, but in-side of crossing the lines on the in-side of the straight line at the top, cross them on the outside. See diaforward, finishing thus: cross them on the outside. See diagram THE INTERNATIONAL SCHOOL OF SKATING. Canada and the United States at the Parting of the Ways. Solely, so far as figures are concerned, the International School has taught us absolutely nothing new; in fact their obligatory movements scar-cely come under the head of "Fig-ures" would be more than a scar-siderable familiarity with all the varures." "Turns' would be more appli-ious simple movements ("the Funda-ious simple movements ("the Funda-mental Principles"), and, if in addi-the state of the have much to learn from this com-paratively new school. The Interna-tional, in the way of style and grace, far greater beauty and interest would and particularly in the freedom of their be added by the performance. Diffi-movements. The International skater cult, far more difficult, such additions "skates," and is not riveted to one spot; undoubtedly render the figures of the in other words, his movements cannot be skated in a space of the size of the top of a washtub. To fully enjoy the delights of this fascinating winter ing up a few wrungs higher on the sport-skating-one should move hith- skating ladder. er and thither now in, now out, forward and backward, outside and inside Figure skating program of the Am-edges, just as freely and easily as the ateur Skating Association of Cannewly-arrived swallow when swooping ada, which is now on its last legs: and darting in chase of elusive flies, or ' The object of this program is to set

a great moment for him. He left his Turkish pipe, and came to the front of the shop. When the tourists left, he

THE CAFE BRISBANE WAS AS BRILLIANT AS THE STREET.

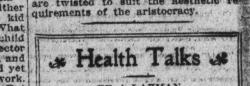

were a riot of color, and shopkeepers stood in their doors urging the crowd to buy. Even the pollcemen paused in their beats to answer a "Happy New Year, Copper," and hot tamale vendors called their wares the louder. It was as if everyone wished to make the last hour in the year a memorable one. Nicola and Rosa jostled too, and laughter and talked. Rosa could never remember being so happy. It was remember being so happy. It was such a night as she had scarcely ever

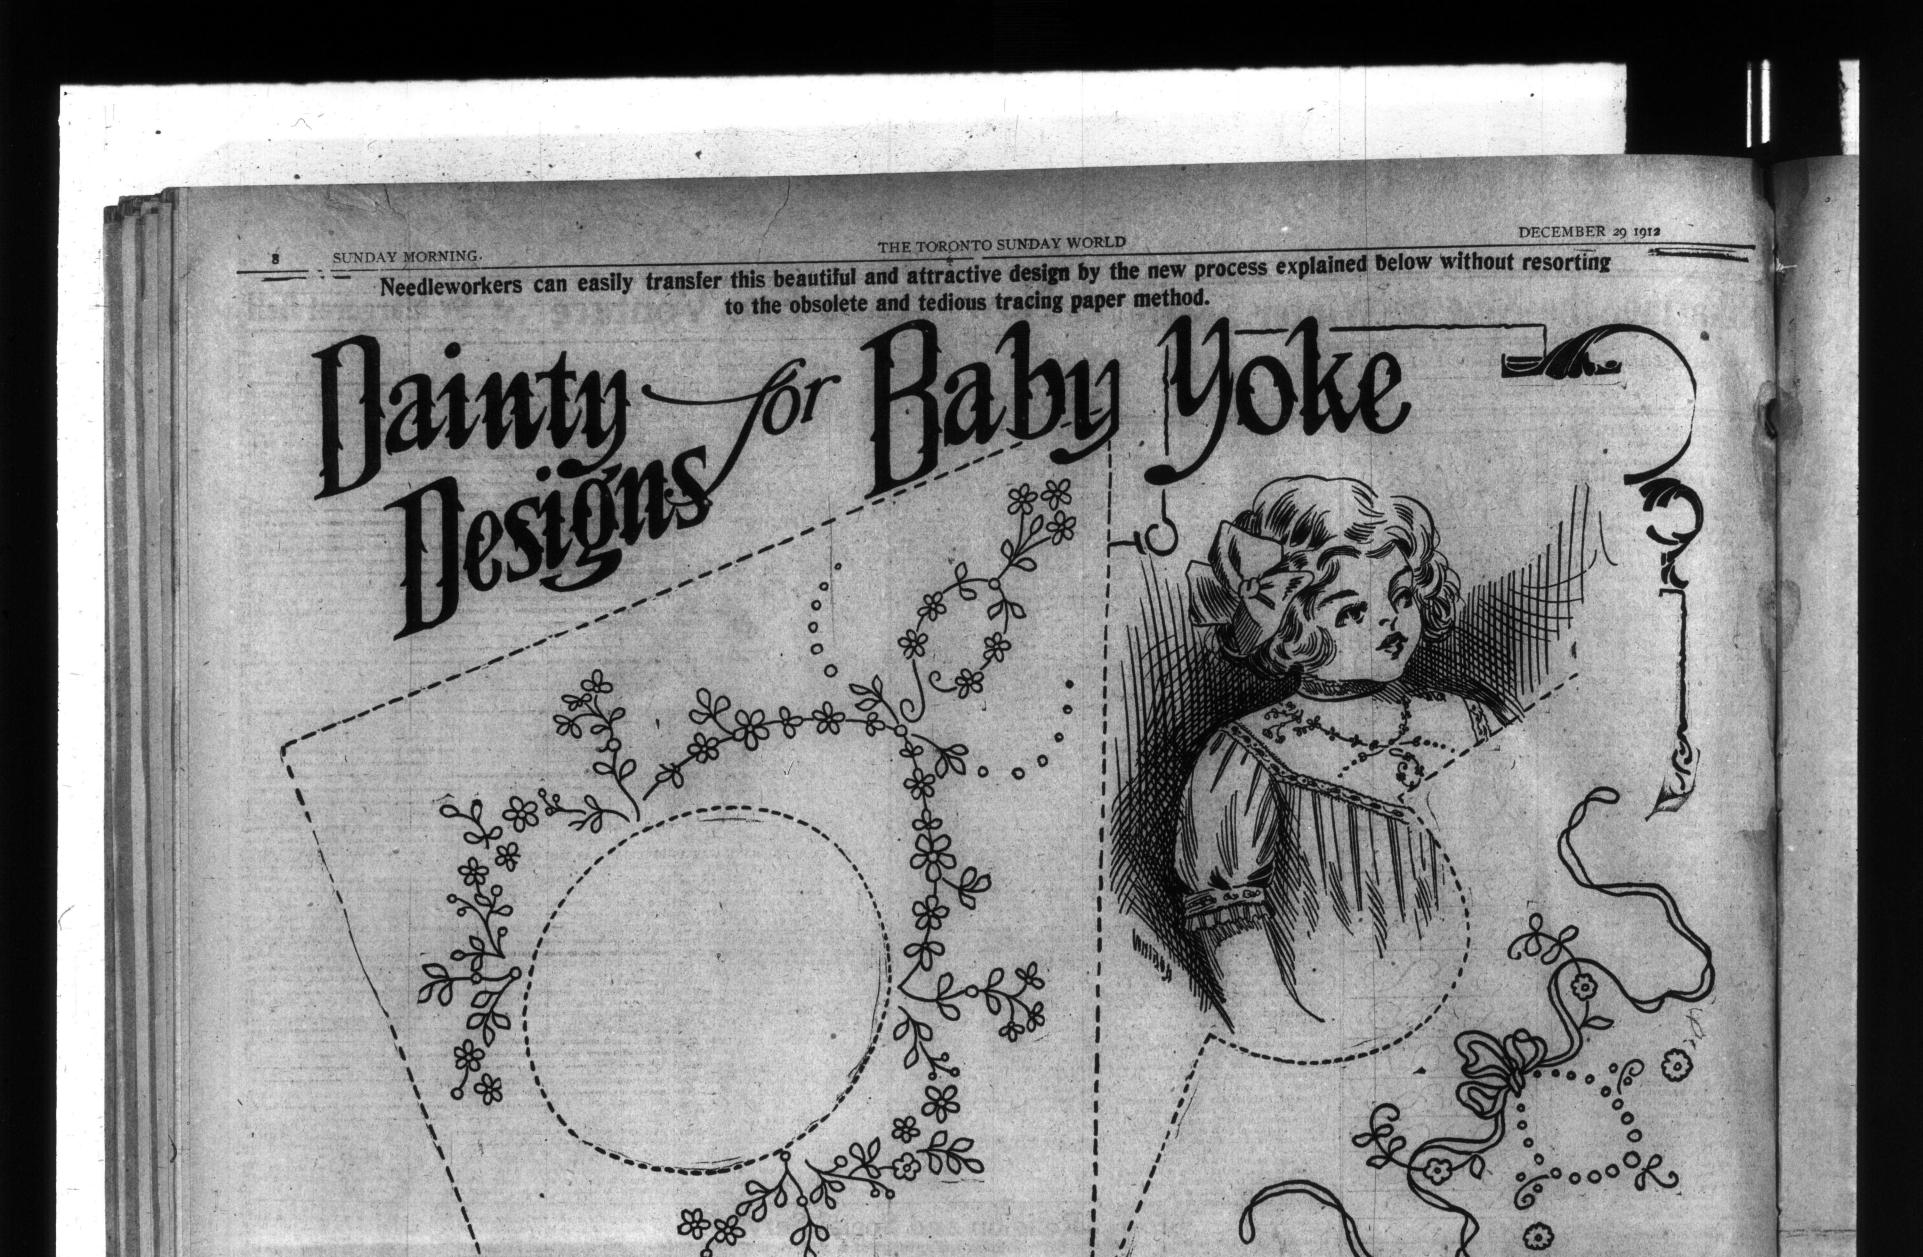

The Cafe Brisbane was as brilliant as the street. Lackeys stood inside the swinging doors, and somewhere in the distance an orchestra went lilting thru a popular two-step. Nicola gave his coat to the boy who paid the cafe seven dollars a week for that privilege, and they went inside more doors. Rosa moved like one in a dream, almost afraid to look around. lest she should tind herself in the llt-tle attic room, where the wind whistled threateningly. She was glad they sat apart from the crowds in evening clothes for she felt rather conscious of her little suit. But a spangled girl began to dance on the platform at the other end of the room, and she forgot herself. Nicola ordered some red wine and some peculiar looking stuff she that had never seen before. She rathers liked it, and the wine set her humming liked it, and the wine set her humming the song the spangled girl sang. Soon everyone was singing and cheering her. Rosa's eyes glowed bright, and two red spots burned into her cheeks. As the clocks all over the city struck twelve, she rose with the rest of the crowd, and toasted the New Year. There were shouts and hurrahs, and Incre were should and hurans, and large silver pieces were thrown toward the spangled girl on the platform. And then everyone began dancing between the tables. Nicola grasped Ross, and they whirled round and round, with they whirled round and round, with the crowd. The orchestra grew more riotous, and corks popped more fre-quently. From the far end of the room, dancing from table to table, came the spangled girl, shaking a tam-bourine. Flowers were thrown at her, and her dress was drenched with wine. "I can dance that way too," Rosa hissed in Nicola's ear. "Let me go, and "Il show you." She tried to wrench herself from his grasp, but he held her close, and whispered in her ear. "Tes, yes, Rosa, dearest, I know you can, but you must not. For then, she would come to me."

A New Year's Eve Venture & By Margaret Bell

BY THE WAY

By "THE WAIF". Issually at this festive season of the year there is apt to arise a spirit of homesickness in the British-born away in any of the Colonies. clined to think he stayed about a week to study his subject, and did it chiefly from prejudiced native evi-dence. I certainly have not seen any of the same sort of English girls here as he describes, nor have I met any person who has. In any case, the Doctor's opinions are of very marked uninterest to the majority of Britishers, and the doubtless well-meaning bunch of nonentities who employed him would have exhibited their normal fatheadedness less con-spicuously if they had suppressed the written evidence of his incompetency, immediately on its receipt. last resort for a cause going under.

Putnam's Corn Extractor makes the corn go with-\* \* \* There is NOT! out pain. Just apply according to direc-tions and you can then forget you ever

Globe's assertion that during the whole of their wedded half a century they nave been readers of that journal ....

Doesn't it seem to you to be the very apex of invulnerable conceit that the Board of Control should even contem-plate dismissing anyone from the City Hall on the score of incompetency?

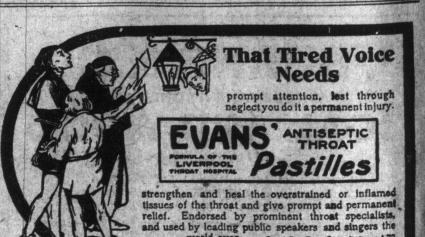

You can generally find a bright little item hidden away somewhere in The Mail if you are in no hurry. An in-structive article on India's Butter trees is one of the latest. These, it is said, structive article on India's Butter trees is one of the latest. These, it is said, yield some 350 pounds of pulpy flow-ers, which have a luscious taste, but smell like mice. They are cured in the sun and they look like raisins. The natives then boil them and use them as sweetmeats. For these causes it is explained, the tree, which bears this kaleidoscopic blossom is called the "but-ter" tree. Even The Mail does not at-tempt to explain the appropriateness of the name.

#### STUFFED DATES.

There, are many ways to prepare stuffed dates. The favorite recipe in one family is this: Into a saucepan put quarter of a cupful of milk and half a cupful of granulated sugar, and let boil rapidly without stirring. When the syrup forms a soft ball in cold water,

world over. nal Drug and Ches

Here are two patterns for Baby Yoke. Each calls for very little needle work. Of course, there are bits of eye-let, always tedious, but not dif-ficult of construction. The solid work in leaves, bow knots, etc., should not be padded. Fragile goods cannot bear the strain of heavy embroidery. A cheap white material, having coarse mesh, is not suited to fine em-broidery. The goods should be closely woven mesh and a single strand of floss should be used in the needle.

used in the needle. used in the needle. To transfer: Put a cake of soap in a pint of hot water, stir vigorously and remove the soap. Saturate the design with the mixture, then remove the excess moisture. Place the fab-ric to which the design is to be transferred on a hard, flat sur-face and lay the design face down on the material. Cover with a dry sheet of thick paper and with the bowl of a table-spoon rub hard till the design is transferred, being careful to rub from rather than towards you. Do not wet the material with damp fingers. To remove the design after the article is completed wash in warm water
