Victory Complete!

The Old Opposition Annihilated

Carleton Co. Sustains Its Reputation.

In Hartland election day passed very quietly. There was no riotousness, little if any drinking, and the only thing apparently out of common was the crowd of mildly enthusiastic voters, and an unusual plentifulness of crisp bank-bills.

However, "at even when the sun was set" excitement grew apace. The telephone and telegraph offices were crowded around by those anxious to hear the returns. At first the Opposition people were jubilant, and it did

certainly look as though the Government supporters would breakfast off crow sandwich. When there were only three places to hear from the Opposition was 100 ahead. But victory finally perched on the banners of the Government party.

It will be noticed in the following table that Mr. Dibblee was at the foot of the poll in Hartland, where last election he led grandly. Mr. Fleming led the Opposition here, as elsewhere. He is by all odds the strongest man in the Carleton County opposition today. Had he been treated as such by his party, had Mr. Dibblee canvassed for "the whole ticket and nothing but the ticket," our Peel neighbor would doubtless have given Mr. Smith a much closer rub. As it is Mr. Fleming deserves congratulations.

One of the most peculiar features of the election is the fact that the old Opposition party is totally annihilated—not one of the old members is returned. Still another feature of note is the utter failure of the Moncton Convention. That affair caught Dibblee, Fowler and Chipman, but where are they now?

The new Legislature will be as follows:

Albert—Emmerson, Osman.
Charlotte—Todd, Hill, Russell, O'Brien.
Gloucester—Venoit, Poirier.
Kent—Legere, Barnes, Johnston.
Kings—White, Scovil, Pugsley.
Madawaska—LaForest, Gagnon (Independents.)

Northumberland—O'Brien, Burchill, Fish, Tweedie.
Queens—Carpenter, Farris.
Restigouche—Mott, Labillois.
Sunbury—Glazier, Hazen.
Victoria—Porter, Lawson.
Westmoreland—Humphry (Op.)
Sumner, (Op.) Wells, Robinson.
York—Gibson, Whitehead, Thompson, Campbell.

St. John City—Robertson, McKeown
Shaw (Op.), Purdy.
St. John Co—Dunn, McLeod.

It will be seen that there are 39 Government supporters, two Independents, and five Opposition.

A PACKING HOUSE.

With a Capacity of 80,000 Head—May be Established at St. John.

A London meat-packing company, Campbell, Shearer & Co., through E. P. Bender, have been engaged in a lobby of the Nova Scotia Legislature. They propose to erect in Halifax a half-million dollar slaughter house and cold-storage warehouse. This establishment would have a capacity for handling annually at least 30,000 head of cattle, 30,000 head of sheep, and 20,000 head of swine. If this they would purchase in Nova Scotia, if the stock could be had, 10,000 head of each, the balance to come from New Brunswick, P. E. Island and the West. The product of

this live stock would be sold in England at current rates there, the company retaining 2½ cents per pound for the expense of management and handling, the balance to be returned to the producers.

Mr. Bender asks that the province guarantee the bonds of the proposed company for half a million dollars, which would make it possible to raise all the capital necessary. To secure their guarantee, the promoters offer to keep to the credit of the government the proceeds of the hides and offal, which would be more than sufficient, they urge, to meet the interest should its payment at any time be defaulted.

Mr. Bender's people say they have assurances that if the Nova Scotia government will not give the guarantee, Premier Emmerson's government will do so for the placing of the establishment at St. John.

An Accommodating Train.

A year or two ago I had occasion to pay a brief visit to a place situated several miles up the Tobique River. The means I used to reach my destination was not an Indian's birch bark canoe but the Tobique Valley Railway.

I started from Perth Junction on a very beautiful day in autumn, and whether or not it was in honor of my presence I do not know, but the train was a Special, and drawn by an old-fashioned wood-burning engine—the loan of the I. C. R. By the way, on the Tobique Valley at that time the only difference between a special and a regular, was the time it started from Perth, for the regular always went up in the morning and if it did not run into a snow drift or something else it came back the same morning.

The only passengers other than myself were a number of young men going to the "woods" away up Tobique. They busied themselves with digging apples out of a barrel from the head of which a large knot had come out, much to the annoyance, no doubt, to the gentle to whom they were being carried. All this time I, being a lover of the beautiful, was viewing the varied tints of the autumn leaves and looking out for something intensely interesting; nor did I have long to wait, for soon the train came to a sudden standstill and I, fearing something dreadful had happened hastened to the Conductor who was also General Manager of the road, and asked the cause of the trouble. The reply was that it was "only some cows." Now for some time we had been passing through a very narrow gully the sides of which were steep and I do not yet see how those cows got on the track, neither did I see how they got off alive, but someone evidently did see for almost immediately the train began to move quite rapidly and as the cows were not passed I looked as far out from the car as I dared and there what should I see but several cattle running at full speed, and at the ends of their tails rushed a man equally fast, while roaring behind came—the train. This very exciting race lasted for perhaps nearly half a mile, when the sides of the valley abruptly parted and the race was ended, the cattle winning and the man coming in a good second.

After this, things passed off quite quietly and very pleasantly especially as I reached my destination. Shortly before the end of my journey was reached I asked one of the train officials if as we passed he would show me where a certain man lived, for I should have to stop there and should like to be able to find the place without trouble as I came from the station. "Oh" said he "are you going there? Then we will stop at his gate and let you off." And they did.

But the most pleasing part of my experience was yet to come for when I was about to come away they told me that I need not go to the station to get on the train, but if when I heard it coming I went to the track and waved my umbrella, the train would stop and I could get on. When I heard it coming I went out and did as directed and as it began to slacken speed I went back to take a lingering good bye of

my friends; and when I again reached the track I found that not having been able to stop at the gate it was backing up to meet me. This kindly act showed me that it was no respecter of persons and was equally considerate for all animals. But that glorious time is past and the accommodating railroad has passed into the possession of the cruel and hard-hearted C. P. R. and the only train passing over it is the Tobique Valley Hobo which many Normal students know to their disgust.

The fane is fallen! the rite is o'er
And that train rides the track—no more.

A. FISHERMAN'S TRIALS.

Exposure While at Sea Brought on an Attack of Sciatica Which Caused the Most Excruciating Agony.

Mr George W. Shaw, of Soudford N. S., follows the occupation of a fisherman and like all who pursue this arduous calling is exposed frequently to inclement weather. Some years ago, as a result of exposure, Mr. Shaw was attacked by sciatica, and for months suffered intensely. He says the pain he endured was something agonizing, and he was not able to do any work for some months. His hip was drawn out of shape by the trouble, and the doctor who attended him said that it also affected the spine. After being under the care of a doctor for several months without getting relief, Mr. Shaw discontinued medical treatment, and resorted to the use of plasters and liniments, but with no better results. He was advised to try Dr. Williams' Pink Pills and finally decided to do so. After using them for a couple of weeks, he found a decided relief, and in about two months' time every trace of the trouble had disappeared, and he has not since been troubled with any illness. Mr Shaw says he occasionally takes a box of pills to ward off any possible recurrence of the trouble.

Those attacked with sciatica, rheumatism, and kindred troubles, will avoid much suffering and save money by taking Dr. Williams' Pink Pills at the outset of the trouble. Sold by all dealers or sent postpaid at 50c a box or 6 six boxes for \$2 50, by addressing the Dr. Williams Medicine Co., Brockville, Ont.

His Marks

A commercial traveler entered the hall of a hotel, and, picking up a pen, proceeded to make several perpendicular lines upon the register. When he had made half a dozen, more or less, he threw down the pen, with some exclamation about it being unfit to write with. Then he took up another and began making more straight marks, like capital I's with the shoulders cut off.

By this time the clerk was angry and informed the stranger that the register was intended for signatures and must not be defaced in that manner.

"Oh, don't get angry about it!" said the man with the pen.

He made a few horizontal dashes and giving the register a twirl, showed the angry clerk that he had only been writing his name, which was H. H. Hill.—Pearson's Weekly.

How a Woman May Retain Beauty.

True beauty rests on plain living and high thinking, on blood, bearing and brains. It is in one sense a relative thing. To dip far into philosophy on the subject is not necessary. Beauty means harmony, balance, the mental fire of sensibility, as well as bodily attractiveness. Banish fretting, trivial perturbation, scowling, whining, wailing, excessive laughter and pointless smiling.

In the first place, health is all important. Flesh texture and tint, for example, depend upon it. A complexion lacking luster, plumpness and elasticity, shows a lack somewhere in the vital or nutritive system. A mild diet, gentle temperature, even digestion, open air exercise, sleep and a tranquil mind pertain to good looks. Mistakes in diet begin usually in childhood. Often a girl sits down to a potato and pickles, several cups of strong tea, pies, cakes, ices and fiery condiments. If meat be on the bill of fare, there is a chance that it has been spoiled in the cooking.

As a result, when the girl is 20 her eyes are dull, teeth yellow, gums pale, lips wan, flesh flaccid and skin unyielding. Recourse is had to padding, face washes, stains and belladonna. The habits of life are unaltered. Before there can be an improvement a change must be made and firmly persisted in. The diet, while generous, must be temperate. Peppery soups, stews, game, patos, ragouts and spices are not good for the complexion. What is termed the epicurean woman will have before she is 30 a blotched face and flabby flesh. Women of nervous and sanguine temperament should restrict themselves to a diet of eggs, milk, bread, fruit, light broths, etc. Pure water should be the daily beverage.

A great deal of beauty at low cost can be obtained through the plentiful use of rainwater, sunlight and open air exercise. Frequent bathing is a healthful luxury. Bodily exercise should be carried on temperately, its aim being facile muscles, supple joints and pliant limbs—in a word, physical beauty.—Science Digest.

Pretty Japanese Tearoom.

A Japanese tearoom may be made by covering the walls, two-thirds up, with matting, topped by a narrow shelf entirely around the room. Above the shelf fill in with Japanese prints of coarse fabric nicely decorated. Cover the ceiling with Japanese paper crossed with bamboo. Suspend several Japanese lanterns. Cover the floor with matting harmonizing with the wall. Dainty bamboo chairs and bamboo stools should be placed here and there. On a table in the center of the room have a tea set. A service can be purchased from any of the larger Japanese stores. Cover the windows with the Japanese slat curtains, inside of which put Japanese silk curtains daintily festooned. Dark blue or red may be the prevailing color of the room. If you select red, have the table and chairs black.—Ladies' Home Journal

Relief at Last.

The long suffering man was trying to read, when, with a crash and a roar, the train left the rails. Down, down, down it went. The seat in which the long suffering man sat shut up like a knife and caught him in its tenacious embrace; another seat rose up and smote him in the side. Two trunks flung themselves upon his breast, and the luggage rack slid down and poked him in the back. Then all was silent.

The long suffering man tried to move. One foot, then the other, was found imbedded in the debris; his arms were securely pinioned by the wreckage. It was dark and warm and still.

The long suffering man nestled his cheek down on the cool surface of a window and heaved a sigh of relief.

"At last," he murmured, "at last those two maniacs behind me have stopped talking golf."

And a blessed silence reigned.—Pearson's Weekly.

To Lighten the Room.

A room situated so that it does not get any direct sunlight, but only reflected light, may be made more cheerful if the walls are covered with a paper that has a background of some delicate yellow. The painted woodwork should be a creamy tint, and the yellow should be or a dusky green. The walls can be lightened with a...

A FABLE.

Look out of the East window, Mary,
And John may look out of the West,
And tell me which one of the cloudlets
Today is the prettiest.

Yes, Mary, that wee one is pretty
All bordered around with white;
And John sees a beautiful pink one,
All tinged with the sunset's light.

So you want me to tell you a story I
I fear me they all are old;
Well, sit you here beside me—
Her's one I've never told.

You know, some people tell you
Clouds are steam like that from cars—
But they really are made from cobwebs
And fastened to the stars.

Who spins them? Why, spiders, darring;
And the woman who went so high
With her broom to sweep the cobwebs,
Swept the cloudlings from the sky.

Well, once when the cloudlings were playing
Not heeding their mamma's frown,
They bumped into a great high mountain,
And the spiders came tumbling down.

They ran about shouting and laughing,
With plenty of sport and mirth;
And that is how the spiders
First got upon the earth.

But when they spun their cobwebs
To go back again to the sky,
And found they must always stay here
They all began to cry.

But they never have given up trying—
And to this day, very high
The spiders will spin in the tree tops,
And try to get back to the sky.

And the cloudlings love their babies,
E'en as your mamma loves you
When you have done something naughty
That she told you not to do.

They feel sorry when any one hurts them;
The reason you see is plain
That when you kill a spider
The clouds cry drops of rain.

So always be good to spiders,
Or the drops will fall in crowds;
For the spiders you see, my darlings,
Are the children of the clouds.

 HARTLAND, N. B., FEBRUARY 25, 1899

WHAT ARE WE COMING TO?

What are we coming to, and where are we at? That's the question! Would this journal be considered pessimistic if it suggested that we as a town were nearing the end of our tether? But someone should make the suggestion, lest we suddenly come to a stand still, even in the midst of revelling in our greatness.

Within a few weeks the long and anxiously waited for bridge will be in course of construction, so we are quite certain of at least one more prosperous summer, as the building would mean the spending of much money, and the employment of many people.

The bridge will bring increased trade for our merchants; more people will come to the village. But will it cause the town to grow any larger? Bridge or no bridge why should we expect any more houses to be built in Hartland? Who would occupy them? Why should we look for anybody else to move in?

The ADVERTISER is far from wishing to speak disparagingly, but these very questions should agitate every mind, for there is a remedy, which is not outside our reach. It is this—we MUST seek to bring in new industries. Unless we succeed in this we will lose our footing. So, gentlemen, "keep a pushin' and a shovin'."

THE PULP INDUSTRY.

In a recent issue the St. John Gazette speaks editorially of the pulp industry, which it believes should be fostered and propagated. There are at present two pulp mills operating in the province, both in Chatham. The Mooney mill at Mispec is about completed, and the Cushing Sulphite Mill at St. John, which will be a gigantic affair, will be ready for operation at the end of the year. Then there is the prospect of the development of the industry at Tobique Narrows, to say nothing of the great establishment projected for Grand Falls and we presume Woodstock's pulp mill agitation is not a dead issue. Altogether the province is moving toward the speedy development of this profitable industry. But it still is far behind. Now the question. Why may Hartland not look to share the profits of

pulp making? What in the way of natural resources does this particular spot of the province lack to hinder the successful inauguration of a pulp mill? There are three primary requisites—spruce and other wood, an abundance of water, and good shipping facilities. In these this locality is rich. How best may we push forward and see what can be done?

ENGLISH IMMIGRANTS.

Lord Strathcona Canadian High Commissioner in London has written a letter to the London Times, in which he cordially invites immigrants to our Dominion. He says "The great need of Canada is population, and there is room for many millions of people in the different provinces. With a territory nearly as large as Europe it has a population scarcely exceeding that of London." Lord Strathcona sets forth Canada's many advantageous points, and especially invites capitalist, farmers, male and female farm hands, domestic servants, etc. He offers to do all in his power to furnish information to people in England who contemplate immigration to Canada.

Bristol.

Duncan Rogers has returned from Lewiston, Maine.
 Mr. and Mrs James Carter, Fort Fairfield are visiting friends in Bristol.
 Rev. D. E. Brooks has gone on a visit to Nova Scotia to assist in a church dedication there.
 Smith, the jeweller, is at Caldwell's hotel this week, and is being well patronized.
 Moody Rogers is seriously ill with the grip.
 Neil McLean of Cape Breton has been visiting his brother, A. J. McLean, and on Saturday left for the west. He intends going to the Klondike in the spring.
 Rev. A. H. Hayward and Rev. J. W. S. Young have been holding special meetings in the Hall for some weeks, and on Sunday baptised nine converts. The meetings are being continued.

ESTEY & CURTIS are prepared and competent to fit, and have been fitting **SPECTACLES and EYEGLASSES** during the year 1898, and if they have a dissatisfied customer they would be only glad to have that person call upon them. They guarantee perfect satisfaction or goods returnable, and no charge made.

In many cases persons are fitted with Glasses when there is no need for them. But the average Spectacle pedlar and Jew "Optician" recommends glasses whether they are needed or not, and when the person who is cheated finds that the Spectacles are of no benefit, the pedlar is gone.

Estey & Curtis examine the Eyes Free of Charge.

We believe some of the people can be humbugged all the time, along some lines, but we believe Mr Jew "Optician" has done all the business he can in this vicinity.

If You want Spectacles give us a call.

We have as fine a test case is used in Canada or the United States. We guarantee perfect satisfaction or money refunded.

ESTEY & CURTIS. MEDICAL HALL, HARTLAND, N. B.

We make a specialty of fitting Trusses, Glass Eyes and Artificial Limbs, under guarantee.

CLEARANCE SALE

TO make room for our Spring and Summer Goods, which will soon be here, we will sell the following goods at a very slight advance over cost. The goods are all right, but we must have the room, so swing in and make good interest on your money.

Such Goods as Parlor and Cylinder Stoves, Stove Backs, Skates, Handsleds, Horse Halters, Skate Straps, Snow Shovels, and other Winter Goods must go.

We would have you first and always to believe that we advertise simply and only what we intend to do. We will not knowingly make any false statements. So, if you want any of these Goods and want them at a low price, now is YOUR CHANCE.

THE HIGH COMMISSION.

Adjourns to Meet in Quebec Next August.

The Conservative newspapers are wasting wind in deriding the results of the Joint High Commission. There was nothing for it but adjournment it being impossible to conclude the treaties in time for ratification by the parliament this year. So in postponing the conclusion of the matter until August, when the commission will meet at Quebec, the "high jointers" have done only that which was necessary.

Correspondence gives the feeling in Ottawa as follows:

"In the postponement of the pending negotiations at Washington till after the conclusion of the approaching session of parliament, Sir Wilfrid Laurier and his colleagues have acted upon the advice of their best friends here and elsewhere. It was apparent that whatever the verdict it could scarcely be expected to come before the American Congress, now sitting in Washington. In view of the state of public business there, to have it hanging fire for a whole year was more than sensible advocates of the success of the proposition would urge in its behalf. Liberals here, albeit sorry that the negotiations have been of a nature to consume so much time, and regretting that they were not concluded early enough for ratification by both countries this year, are prepared to accept the conditions as they find them, and point out that for weeks and months public sentiment in the United States has been coming more and more our way, so that the delay which is so generally regretted may now prove itself a blessing in disguise before the time for the resumption of the commission's work arrives next summer."

Nova Scotia Finances.

The Nova Scotia legislature is in session, and on Monday Premier Murray laid on the table of the house returns of expenditure and revenue for the past year. The expenditure for the year has been \$849,330, the receipts \$855,960, leaving a surplus of \$6,630, which is more than double that which was anticipated. The money to the province's credit at Ottawa is \$1,056,133, yielding 5 per cent interest. The public works department expended \$11,803, which is scarcely more than one-sixth that expended in the same manner by New Brunswick. The total expenditure on capital account was \$119,206. The net debt of the province is \$2,387,314, which is less than that of New Brunswick.

Nova Scotia has greater sources of revenue than this province, particularly the coal royalties, which amount to nearly \$800,000. It also has a larger population, accounting for its larger revenue.

The Liberals won a victory in North-west Lanarkshire, Ont., Tuesday, electing Dr. Douglas in place of Holborn, deceased. The liberals had a greatly increased majority.

Provincial Grand Lodge at Fredericton.

The annual meeting of the provincial Grand Orange Lodge was held in the Y. M. C. A. building on the 21 inst. About 100 members were present and great enthusiasm prevailed. The reports of Grand Master Hipwell and Grand Secretary Morrison were submitted and adopted. Five new lodges were organized during the year. The work of the past year has been exceedingly prosperous. Three new halls have been erected and more are in the course of construction. At no time in history has the Orange lodge stood better than it does today. There are now 114 lodges on the register in first class working order, besides a few delinquents. Reports have been received from twelve county lodges and seven isolated primary lodges, which show in nearly every case a growth numerically and financially. Following is the list of officers: David Hipwell, Grand Master; J. A. McDonald, D. G. M.; S. L. Semore, G. Chap.; N. J. Morrison, G. Sec'y.; P. E. Hannie, G. Treas.; G. A. Gray, G. Lect.; J. W. Hoyt, G. Dir. of Cer.

A NEW RIVER BOAT.

Will It Come to Hartland

A strong endeavor is being made to arrange for an all-summer steamboat service on the river between Fredericton and Woodstock. Geo. F. Baird of the Star Line waited on the Fredericton Board of Trade the other evening, and said a boat of extreme shoal draft would be necessary. He had the plans and details of such a craft and stated that with a small increase of subsidy from the government, the company would be willing to put the boat on.

Why could not arrangements be made to run this boat up as far as Hartland, or get as far as Bath? Our Board of Trade should look into this matter at once; while the columns of this journal are open for correspondence in the matter.

GETTING OVER THE GRIP.

The gods let slip that fiendish grip
Upon me last week Sunday—
No fiercer storm than racked my form
E'er swept the Bay of Fundy;
But now good-bye
To drugs say I—
Good-bye to knowing sorrow;
I'm up to-day,
And, whoop, hooray!
I'm going out to-morrow!

What aches and pain in bones and brain
I had, I need not mention:
It seems to me such pangs must be
Old Satan's own invention.
Albeit I
Was sure I'd die,
The doctor reassured me—
And true enough
With his vile stuff
He ultimately cured me.

'Twas hard, and yet I'll soon forget
Those ills and cures distressing:
One's future lies 'neath gorgeous skies
When one is convalescing!
So now good-bye
To drugs say I—
Good-bye thou phantom sorrow!
I'm up to-day,
And, whoop, hooray!
I'm going out to-morrow.

Josh Billings' Definitions.

- Silence is a still noise.
- Bashfulness is ignorance afraid.
- Conscience is our private secretary.
- Economy is a first mortgage on wealth.
- Prudery is nothing more than coquetry gone to seed.
- Pleasure is like a hornet—generally ends with a sting.
- Flattery is like cologne water—to be smelt of, not to be swallowed.
- A "gentleman about town" is one who pays cash for everything except his debts.
- Rumor is like a swarm of bees—the more you fight them the less you get rid of them.
- Anxiety is milking a kicking heifer with one hand and holding her by the tail with the other.
- Fortune—is the aggregate of possibilities a goddess whom cowards court by stealth but who brave men take by storm.
- Kiss—the only way to define a kiss is to take one, and then go and sit down alone out of the draught and smack your lips.
- Friendship is like earthenware—if it is broken it can be mended—but love is like a mirror—once broken that ends it.
- Contentment is a kind of moral laziness; if there weren't anything but contentment in this world man wouldn't be any more of a success than the angle-worm is.

Be Careful How You Sit.

Recently an eminent physician gave utterance to the opinion that appendicitis is more common in this country than in others because of the Yankee custom that men have—and men are more frequently sufferers from the disease than women—of habitually sitting with one leg thrown over the other. This habit, the physician was quoted as saying, restricts the action of the digestive apparatus, and especially of the lower intestine and causes stagnation of the contents and the stretching of the opening of the vermiform appendix, making it possible for obstructions to reach the latter and thus giving rise to appendicitis.

There is no other disease, if we may judge from the attention given to it by current publications, in which the general public takes so much interest as in this one, which is comparatively new to medical practice. Probably much of the popular interest is due to the fact that only within a few years what may be called the literature of appendicitis has reached the reading community.—Leslie's Weekly.

Messrs Shaw & Dibblee say they are more than pleased with their new Acetylic Gas Machine, the saving of time compared with the old system of oil lamps amounts to 2½ hours per week or 5½ days in the year. This is no small item, while the saving in cold cash will amount to about \$25 a year. Then the light is whiter, cleaner and better in every respect.

It is a contradiction of terms to say that this man or that man had "a touch of the grip." It is more truthful to say "a grip of the grip." The grip never touches. It grips. It is the doctor who touches you if you recover.
