Canadian Institute for Historical Microreproductions / Institut canadien de microreproductions historiques

© 1993

The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

# PRIMARY ARITHMETIC,

## Introductory Definitions.

—:0:—

1. **Arithmetic** is the *science of numbers*, and also the *art of computation*.
2. **Number** is the *result of the comparison of a quantity with unity*.
3. **Quantity** is any thing that can be increased or diminished ; as, the *length* of a road, the *surface* of a body, the *weight* of an article.
4. A **Unit** is a quantity with which we compare others of the same kind.
5. The comparison of quantity with unity produces three kinds of numbers : *Integers, Fractions and Mixed Numbers*.
6. An **Integer** is a number which contains its unit an exact number of times ; as, 12, 15 ; 6 boys, 4 apples.

7. A **Fraction** is a number which is less than a unit; as,  $\frac{1}{2}$ ,  $\frac{1}{3}$ ,  $\frac{7}{8}$ .

8. A **Mixed Number** consists of an integer and a fraction. Thus,  $1\frac{1}{2}$ ,  $2\frac{1}{3}$ ,  $4\frac{1}{4}$ .

9. According to the nature of their unit, numbers are divided into two classes; viz, *Abstract* and *Concrete*.

10. An **Abstract Number** is a number the nature of whose unit is not determined; as, 16, 425, 7840.

11. A **Concrete Number** is a number the nature of whose unit is determined; as, 16 men, 425 days, 7310 dollars.

## NUMERATION AND NOTATION.

---

12. **Numeration** is the method of reading numbers expressed by characters.

13. **Notation** is the method of writing numbers.

14. Numbers may be represented as follows:—

- I. By *words*; as, one, two, three.
- II. By *figures*, called the *Arabic Method*; as, 1, 2, 3.
- III. By *letters*, called the *Roman Method*; as, I, V, X, C.

15. In the **Arabic Method**, numbers are expressed by the following ten

**Figures:** 1, 2, 3, 4, 5, 6, 7, 8, 9, 0.

**Names:** One, Two, Three, Four, Five, Six, Seven, Eight, Nine, Naught.

### PRINCIPLE.

*A simple name is given to each of the first nine numbers, of which groups are formed. These groups also receive, each, a particular name, and are numbered by the simple names of the first numbers.*

16. The first nine figures are called *significant* because they represent a value. But the tenth, by itself, represents nothing. It is only an *auxiliary* figure: its office being to hold the place of any order

whatever, when there are no units of that order in the number.

17. Each of the first nine numbers expresses simple units, or units of the *first order*.

18. The number which follows the ninth is called *ten*. It is represented by writing the figure 1 with a naught after it; thus, 10.

19. *Ten* is the unit of the *second order*, and is equal to ten units of the *first order*.

20. Tens are counted in the same manner as single units; thus: *one ten, two tens, three tens, nine tens*. But custom has replaced these words by the following:—

|         |    |          |    |
|---------|----|----------|----|
| Twenty, | 20 | Sixty,   | 60 |
| Thirty, | 30 | Seventy, | 70 |
| Forty,  | 40 | Eighty,  | 80 |
| Fifty,  | 50 | Ninety,  | 90 |

Note.—The “ty” in these words signifies ten.

21. The names of the numbers included between two consecutive tens, are formed by joining to the name of the first of these tens, the name of each of the first nine numbers, saying:

|               |      |                  |         |
|---------------|------|------------------|---------|
| Twenty-one,   | 21   | Thirty-one, &c.  | 31, &c. |
| Twenty-two,   | 22   | Forty-one, &c.   | 41, &c. |
| Twenty-three, | 23   | Fifty-one, &c.   | 51, &c. |
| Twenty-four,  | 24   | Sixty-one, &c.   | 61, &c. |
| Twenty-five,  | 25   | Seventy-one, &c. | 71, &c. |
| Twenty-six,   | 26   | Eighty-one, &c.  | 81, &c. |
| Etc.          | Etc. | Ninety-one, &c.  | 91, &c. |

The highest number expressed by two figures, being ninety-nine, 99.

22. But instead of saying ten and one, ten and two, ten and three,... ten and nine, custom has adopted the expressions :

|           |    |            |    |
|-----------|----|------------|----|
| Eleven,   | 11 | Sixteen,   | 16 |
| Twelve,   | 12 | Seventeen, | 17 |
| Thirteen, | 13 | Eighteen,  | 18 |
| Fourteen, | 14 | Nineteen,  | 19 |
| Fifteen,  | 15 |            |    |

*Note.*—The “teen” in the words thirteen, etc., to nineteen, means *ten*. So that, strictly speaking, thirteen means three and ten; fourteen, four and ten; etc.

*EXERCISES.*

Copy and read the following numbers, naming the *tens* and *units* in each :

|     |     |     |     |     |     |     |     |
|-----|-----|-----|-----|-----|-----|-----|-----|
| (1) | (2) | (3) | (4) | (5) | (6) | (7) | (8) |
| 17  | 28  | 55  | 53  | 85  | 29  | 70  | 73  |
| 12  | 26  | 22  | 87  | 44  | 10  | 89  | 98  |
| 11  | 30  | 37  | 62  | 33  | 61  | 64  | 72  |
| 16  | 90  | 48  | 32  | 67  | 99  | 23  | 27  |
| 13  | 79  | 40  | 43  | 97  | 21  | 14  | 58  |
| 37  | 69  | 31  | 34  | 79  | 33  | 74  | 80  |
| 46  | 59  | 19  | 50  | 60  | 54  | 82  | 49  |

Express the following numbers by figures :—

|                  |                   |                  |
|------------------|-------------------|------------------|
| 1. Ten.          | 9. Eighty-six.    | 17. Seventy-six. |
| 2. Thirty-seven. | 10. Ninety-eight. | 18. Sixty-eight. |
| 3. Seventeen.    | 11. Thirteen.     | 19. Eighteen.    |
| 4. Fifty-eight.  | 12. Forty-five.   | 20. Forty-four.  |
| 5. Forty-three.  | 13. Thirty-six.   | 21. Sixteen.     |
| 6. Twenty-one.   | 14. Forty-seven.  | 22. Seventy.     |
| 7. Forty-two.    | 15. Eleven.       | 23. Nineteen.    |
| 8. Twenty-three. | 16. Ninety-seven. | 24. Twelve.      |

|                   |                   |                   |
|-------------------|-------------------|-------------------|
| 25. Twenty-six.   | 33. Eighty.       | 41. Eighty-three  |
| 26. Seventy-one.  | 34. Twenty-four.  | 42. Fifty-six.    |
| 27. Fifty-one.    | 35. Thirty-seven. | 43. Fifty-nine.   |
| 28. Sixty-three.  | 36. Sixty-two.    | 44. Seventy-eight |
| 29. Thirty-nine.  | 37. Twenty.       | 45. Forty-six.    |
| 30. Fifty.        | 38. Twenty eight  | 46. Sixty-three.  |
| 31. Fifteen.      | 39. Forty.        | 47. Ninety-two.   |
| 32. Seventy-nine. | 40. Sixty.        | 48. Eighty-seven. |

23. The number which follows ninety-nine (99) is called *hundred*. It is represented by writing 1 with two naughts after it ; thus 100.

24. *One hundred* is the unit of the *third order*, and is equal to ten units of the *second order*.

25. Hundreds are counted in the same manner as units ; thus :—

|                    |      |                |      |
|--------------------|------|----------------|------|
| One hundred,       | 100. | Five hundred,  | 500. |
| Two hundred,       | 200. | Six hundred,   | 600. |
| Three hundred,     | 300. | Seven hundred, | 700. |
| Four hundred,      | 400. | Eight hundred, | 800. |
| Nine hundred, 900. |      |                |      |

26. The names of the numbers included between, two consecutive hundreds, are formed by joining successively, to the name of the first of these hundreds, the names of all the numbers less than one hundred ; thus,

|                    |      |
|--------------------|------|
| One hundred one,   | 101. |
| One hundred two,   | 102. |

| One hundred ten,            | 110. |
| Two hundred eleven,         | 211. |
| Three hundred twelve,       | 312. |
| Four hundred thirteen,      | 413. |
| Five hundred fourteen,      | 514. |
| Six hundred fifteen,        | 615. |
| Seven hundred sixteen,      | 716. |
| Eight hundred seventeen,    | 817. |
| Nine hundred eighteen,      | 918. |
| One hundred nineteen,       | 119. |
| Two hundred twenty,         | 220. |
| Three hundred thirty-one,   | 331. |
| Four hundred forty-two,     | 442. |
| Five hundred fifty-three,   | 553. |
| Six hundred sixty-four,     | 664. |
| Seven hundred seventy-five, | 775. |
| Eight hundred eighty-six,   | 886. |
| Nine hundred ninety-seven,  | 997. |
| Nine hundred ninety-eight,  | 998. |

Nine hundred ninety-nine (999) is the highest number that can be expressed by three figures.

27. The group comprising the first three orders of units, viz., *units*, *tens*, and *hundreds*, constitutes the *first period*, that of simple units.

*EXERCISES.*

Copy and read the following numbers, naming the *hundreds, tens, and units* in each :

| (1.) | (2.) | (3.) | (4.) | (5.) | (6.) |
|------|------|------|------|------|------|
| 100  | 509  | 224  | 861  | 652  | 278  |
| 211  | 256  | 297  | 598  | 720  | 122  |
| 121  | 905  | 337  | 250  | 862  | 972  |
| 700  | 840  | 103  | 305  | 722  | 605  |
| 306  | 273  | 110  | 606  | 165  | 334  |
| 426  | 590  | 733  | 467  | 533  | 407  |
| 900  | 406  | 892  | 850  | 573  | 863  |
| 640  | 634  | 920  | 670  | 793  | 580  |

Express in figures, the following :—

## I.

1. One thousand eight hundred eighty-two.
2. Three thousand nine hundred four.
3. Two thousand, nine.
4. One thousand eight hundred sixty-three.
5. Seven thousand five hundred forty-one.
6. Nine thousand forty-seven.
7. Six thousand five hundred eighty-four.
8. Nine thousand one hundred twenty-seven.
9. Six thousand five hundred eighty-nine.
10. Three thousand one hundred five
11. One thousand one hundred twenty-two.
12. One thousand five hundred fifty-five.
13. Eight thousand eight hundred ninety-seven.
14. Six thousand three hundred forty.
15. Eight thousand eight hundred ninety-six

16. Four thousand eight hundred seventy-one.
17. Five thousand, six.
18. Three thousand nine hundred forty-five.
19. Eight thousand, thirty.
20. Two thousand nine hundred eighty-seven.

II.

21. Thirty-one thousand two hundred.
22. Seventy thousand eighty-four.
23. Eighty-seven thousand six.
24. Ten thousand, one.
25. Twenty thousand two hundred two.
26. Fifteen thousand eight hundred forty.
27. Twelve thousand three hundred seventeen.
28. Twenty-five thousand eight hundred nine.
29. Sixty-three thousand seven hundred one.
30. Forty-four thousand nine hundred sixty-three.
31. Seventy-six thousand eight hundred ten.
32. Ninety-nine thousand four hundred, twenty-five.
33. Eighty-six thousand nine hundred ninety-nine.
34. Sixty one thousand two.
35. Ten thousand, ten.

III.

36. Eight hundred six thousand nine hundred seven.
37. Five hundred twenty-seven thousand eight hundred two.
38. Six hundred twenty-five thousand nine hundred.
39. Six hundred twelve thousand one hundred thirty-six.

40. Nine hundred thousand, six.  
 41. One hundred twenty-one thousand three hundred nineteen.  
 42. Eight hundred thousand.  
 43. Eight hundred twenty-five thousand eight.  
 44. Six hundred eleven thousand ninety-four.  
 45. Nine hundred forty thousand thirty.  
 46. Eight hundred nine thousand.  
 47. One hundred sixty-one thousand seven hundred eighty-four.  
 48. Three hundred ninety-one thousand two hundred eleven.  
 49. One hundred ninety-nine thousand nine hundred ninety-nine.  
 50. Six hundred forty-four thousand nine hundred.  
 31. Continuing in the same manner, the next higher periods are formed, *Millions, Billions, Trillions, &c.*

Million is the unit of the *third* period ; billion, the unit of the *fourth* period ; and trillion, the unit of the *fifth* period.

These three periods, like *units* and *thousands*, comprise, each, three orders ; viz., the order of units, that of tens, and that of hundreds.

32. The names of the various numbers included between their several orders are formed in the same way as those included between the several orders of thousands.

### PRINCIPLE.

*Every figure placed to the left of another, represents units ten times greater than those of the other ; in other words, it represents units of the next higher order.*

33. From this principle it follows :

I. A figure standing alone, or in the first place at the right of other figures, expresses units.

II. A figure standing in the second place, counting from the right, expresses tens ; in the third place, hundreds ; in the fourth place, thousands ; &c.

III. It is necessary to have one figure to represent a number having only simple units ; two, for one having tens ; three, for one having hundreds ; four, for one having thousands ; &c, according to the order of the units.

34. Every significant figure has two values. One is called its *simple*, or *absolute* value ; and the other, its *local*, or *relative* value.

The *Simple Value* of a figure is that given to it by its form.

The *Local Value* is that which it receives from the place that it occupies in the number.

Thus in the number 4306, the simple value of the first figure to the left is 4 ; and its local value is 4 units of thousands.

## PRINCIPLES.

I. *Ten units of any order whatever, form one unit of the next higher order.*

II. *A thousand units of any period, is equal to one unit of the next higher period.*

35. For convenience in reading and writing numbers, the figures are divided into *periods*, each of which comprises three places. The *first three* places

the first place at units.

second place, counted; in the third thousands; &c.

figure to represent; two, for one hundreds; four, according to the or-

values. One and the other,

| NUMBER.                 | 840                          |                          |                           | 625                         |                         |                          | 074                         |                         |                          | 503                          |                          |                           | 040    |     |      |
| ORDERS.                 | 15th.                        | 14th.                    | 13th.                     | 12th.                       | 11th.                   | 10th.                    | 9th.                        | 8th.                    | 7th.                     | 6th.                         | 5th.                     | 4th.                      | 3d.    | 2d. | 1st. |
| PERIODS.                | 5th.                         |                          |                           | 4th.                        |                         |                          | 3d.                         |                         |                          | 2d.                          |                          |                           | 1st.   |     |      |

37. If it be required to read or write numbers above trillions, the following is the order of some of the next higher periods: *Quadrillions*, *Quintillions*, *Sextillions*, *Septillions*, *Octillions*, &c.

*EXERCISES IN NUMERATION.*

After the foregoing explanations, the pupils should be able to read any number whatever according to the following

## R U L E .

*I. Beginning at the right hand, arrange the figures in periods of three figures each.*

*II. Then, beginning at the left, read each period in succession, omitting to name the last.*

NOTE.—If an order, or even an entire period, be wanting, it is not mentioned. The name of the last or units period is also omitted, because it is understood.

1. What number is expressed by 75346821?

SOLUTION.—Separating these figures into periods according to the rule, we have 75, 346, 821. The third period is 75 *millions*; the second is 346 *thousands*; and the first is 821 *units*; hence the number is 75 millions, 346 thousands, 821.

Read the following numbers :

## I.

| (1.) | (2.) | (3.)  | (4.)   | (5.)   |
|------|------|-------|--------|--------|
| 75   | 972  | 1008  | 60001  | 794825 |
| 63   | 840  | 5000  | 73182  | 659037 |
| 37   | 569  | 6300  | 39502  | 954308 |

## EXERCISES IN NOTATION.

## RULE.

*I. Beginning at the left, and with the highest period, write the hundreds, tens, and units of each period in the number.*

*II. Fill all vacant places with naughts.*

1. Express in figures the number *two thousand four hundred three*.

SOLUTION.—This number consists of two periods, *thousands* and *units*. In the *thousands* period there is but one order, which is 2 units of thousands. We, therefore, write 2 thousands in the fourth place, 4 hundreds in the third place, a naught (0) in the second place, there being no *tens*, and 3 units in the first place. Hence these figures, 2403, are the proper expression for the given number.

Express the following numbers in figures :

## I.

2. Thirteen. Eleven. Seventeen.
3. Nineteen. Thirty-four. Eighty-two.
4. Fifty-five. Ninety-four. Forty-three.
5. Seventy-two. Twenty-nine. Thirty-one.
6. Eighty-eight. Seventy-seven. Fifty-five.
7. Forty-nine. Twenty-six. Eighty-nine.
8. Ninety-two. Thirty. Seventy-three.
9. One hundred five. One hundred eleven.
10. Three hundred ten. Two hundred sixty-five.
11. Four hundred nine. Three hundred twelve.
12. Five hundred thirty-eight. Six hundred eighty-one.
13. Nine hundred thirty-two. Eight hundred ninety-nine.
14. Three hundred sixty. Five hundred eighty-two.
15. Nine hundred twelve. Three hundred fourteen.
16. Seven hundred nineteen. Nine hundred three.

*the highest period,  
each period in the*

*two thousand four*

*ods, thousands and  
ne order, which is 2  
ousands in the fourth  
(0) in the second  
t place. Hence these  
iven number.*

figures :

*two.  
three.  
thirty-one.  
fifty-five.  
seven-nine.  
ree.  
l eleven.  
red sixty-five.  
red twelve.  
undred eighty-  
light hundred  
red eighty-two.  
undred fourteen.  
undred three.*

17. Three hundred twenty-two. Two hundred sixty-six.
18. Seven hundred eighty-eight. Four hundred four.
19. Five hundred twenty-eight. Eight hundred twenty-five.
20. Three hundred eighty-five. Six hundred sixty.
21. Seven thousand, sixty. Six thousand, seven.

II

22. Nine thousand, seven hundred eight.
23. Three thousand, seven hundred fourteen.
24. Three thousand, two hundred forty-five.
25. Seven thousand, six hundred ninety.
26. Three thousand, seven hundred fifty.
27. One thousand, four hundred seven.
28. Two thousand, two hundred seventeen.
29. Seven thousand, three hundred twelve.
30. Two thousand, four hundred ten.
31. Three thousand, eight hundred twenty.
32. One thousand, nine hundred four.
33. Seven thousand, six hundred.
34. Six thousand, four hundred sixteen.
35. Four thousand, one hundred twenty.
36. Six thousand, two. One thousand, one.
37. Eighteen thousand, seven hundred. Forty thousand, six.
38. Fifty thousand, eight hundred forty-one.
39. Seventy-three thousand, one hundred twenty-nine.
40. Eighty-seven thousand, four hundred twenty-two.
41. Seventy thousand, one. Twenty-four thousand

42. Twenty-four thousand, nine hundred sixty-eight.

43. Twenty-nine thousand, two hundred.

44. Seventeen thousand, one hundred ten.

45. Forty thousand, three hundred ninety.

46. Twelve thousand, eighty. Six thousand, two.

47. Nineteen thousand, sixty-two.

48. Ten thousand, one hundred ten.

49. Twenty-three thousand, five hundred eighty-nine.

### III.

50. Sixty-three thousand, twenty.

51. One hundred forty thousand, five hundred seventy-five.

52. Two hundred ninety-one thousand, seven hundred forty-six.

53. Nine hundred sixty thousand, ninety.

54. Nine hundred thousand, nine.

55. Three million, five thousand, one.

56. Five hundred million, five hundred.

57. Six hundred million, five thousand, four hundred seventeen.

58. One hundred eleven million, one hundred eleven.

59. Two hundred ninety-seven thousand, forty-one.

60. Four billion, six million, one.

61. Five billion, seven million, two thousand, five.

62. Eleven million, eleven.

63. Four hundred six thousand, seven hundred eight.

64. Eight hundred nine thousand, sixty-five.

65. Two trillion, twenty-five million, five.

66. Sixty-six million, ten thousand, nineteen.

82. Three hundred million, seventy thousand, nine hundred.
83. Three trillion, one hundred twenty billion, two million, five thousand, one.

84. Thirty-seven trillion, one billion, ninety-nine.  
 85. Four trillion, eighty-one billion, one thousand, two.

## ROMAN NOTATION.

38. In the *Roman Method* of Notation, numbers are expressed by the following seven letters of the Roman Alphabet :

*Letters.* I, V, X, L, C, D, M.

*Values.* 1, 5, 10, 50, 100, 500, 1000.

### PRINCIPLES.

*I. The value of the letter is repeated as often as the letter itself is repeated ; as, III expresses the number three ; XX, expresses twenty.*

*II. A letter placed to the right of one of greater value, adds its own to that of the other ; as, XV represents fifteen ; VII, seven.*

*III. The value of a letter placed to the left of one of greater value, must be subtracted from that of the other ; as, IV expresses four ; IX, nine.*

*IV. The value of a letter or a combination of letters, is increased a thousand-fold by placing a dash over it. Thus,  $\overline{X}$ ,  $\overline{LX}$ , denote, respectively, ten thousand, and sixty thousand.*

NOTE.—I. If a letter that denotes a less number be placed between two that denote greater numbers, it diminishes the latter, but does not affect the former. Thus in the combination LIX, the value of I must be taken from that of X. Hence the number expressed is fifty-nine. (59).

II. It must also be observed that no letter is written four times in succession.

million, ninety-nine.  
 million, one thousand,

ION.

notation, numbers  
 seven letters of the

D, M.  
 500, 1000.

as often as the letter  
 number three; XX,

of greater value,  
 represents fifteen;

the left of one of  
 that of the other;

notation of letters, is  
 dash over it. Thus,  
 and sixty thou-

er be placed between  
 the latter, but does  
 LIX, the value of I  
 er expressed is fifty-

written four times

39. The application of these principles is shown  
 in the following

TABLE.

|       |   |   |           |             |   |   |      |
|-------|---|---|-----------|-------------|---|---|------|
| I     | - | - | One       | XIX         | - | - | 19   |
| II    | - | - | Two       | XX          | - | - | 20   |
| III   | - | - | Three     | XXX         | - | - | 30   |
| IV    | - | - | Four      | XL          | - | - | 40   |
| V     | - | - | Five      | L           | - | - | 50   |
| VI    | - | - | Six       | LX          | - | - | 60   |
| VII   | - | - | Seven     | LXX         | - | - | 70   |
| VIII  | - | - | Eight     | LXXX        | - | - | 80   |
| IX    | - | - | Nine      | XC          | - | - | 90   |
| X     | - | - | Ten       | C           | - | - | 100  |
| XI    | - | - | Eleven    | CC          | - | - | 200  |
| XII   | - | - | Twelve    | CD          | - | - | 400  |
| XIII  | - | - | Thirteen  | D           | - | - | 500  |
| XIV   | - | - | Fourteen  | DC          | - | - | 600  |
| XV    | - | - | Fifteen   | CM          | - | - | 900  |
| XVI   | - | - | Sixteen   | M           | - | - | 1000 |
| XVII  | - | - | Seventeen | MM          | - | - | 2000 |
| XVIII | - | - | Eighteen  | MDCCLXXXIII | - | - | 1883 |

NOTE.—This system of notation is named after the Romans by whom it was invented and used. It is now principally confined to numbering chapters, sections of books, public documents, &c

*EXERCISES.*

Read the following numbers and express them in figures.

# ADDITION.

—:—

**40. Addition** is the process of finding the sum of two or more numbers.

## ADDITION TABLE.

0 and any number make that number: 0 and 1 are 1; 0 and 2 are 2.  
Any number and 0 make that number: 1 and 0 are 1; 2 and 0 are 2.

|                |                |                |
|----------------|----------------|----------------|
| 1 and 1 are 2  | 6 and 1 are 7  | 8 and 3 are 11 |
| 2 and 1 are 3  | 6 and 2 are 8  | 8 and 4 are 12 |
| 2 and 2 are 4  | 6 and 3 are 9  | 8 and 5 are 13 |
| 3 and 1 are 4  | 6 and 4 are 10 | 8 and 6 are 14 |
| 3 and 2 are 5  | 6 and 5 are 11 | 8 and 7 are 15 |
| 3 and 3 are 6  | 6 and 6 are 12 | 8 and 8 are 16 |
| 4 and 1 are 5  | 7 and 1 are 8  | 9 and 1 are 10 |
| 4 and 2 are 6  | 7 and 2 are 9  | 9 and 2 are 11 |

f finding the sum

E.

1 are 1 ; 0 and 2 are 2.  
0 are 1 ; 2 and 0 are 2.

8 and 3 are 11  
8 and 4 are 12  
8 and 5 are 13  
8 and 6 are 14  
8 and 7 are 15  
8 and 8 are 16  
9 and 1 are 10  
9 and 2 are 11  
9 and 3 are 12  
9 and 4 are 13  
9 and 5 are 14  
9 and 6 are 15  
9 and 7 are 16  
9 and 8 are 17  
9 and 9 are 18

II.

What is the sum of

|       |       |       |       |
|-------|-------|-------|-------|
| 3+3 ? | 9+8 ? | 2+3 ? | 4+7 ? |
| 7+4 ? | 9+9 ? | 3+4 ? | 7+8 ? |
| 9+2 ? | 5+0 ? | 5+8 ? | 4+9 ? |
| 6+8 ? | 0+3 ? | 6+9 ? | 1+8 ? |

| 8+9 ? | 4+8 ? | 5+6 ? | 5+9 ? |

## III.

1. 6 bats and 3 bats are how many bats ?
2. 4 boys and 5 boys are how many boys ?
3. 7 dollars and 2 dollars are how many dollars ?
4. 2 cents and 5 cents are how many cents ?
5. 4 girls and 3 girls are how many girls ?
6. 7 houses and 5 houses are how many houses ?
7. 5 fishes and 8 fishes are how many fishes ?
8. 9 tops and 1 top are how many tops ?
9. A boy paid 1 cent for a stick of candy and 2 cents for an apple ; how many cents did both cost ?

SOLUTION.—If a stick of candy cost 1 cent, and an apple cost 2 cents, both must cost the sum of 1 cent and 2 cents. The sum of 1 cent and 2 cents is 3 cents. Therefore both cost 3 cents.

10. John's father gave him two apples, and his mother gave him two more ; how many apples had John then ?
11. George had 4 chestnuts and Joseph gave him 3 ; how many had George then ?
12. If a pencil cost 2 cents, and a copy 6 cents, how many cents will both cost ?
13. William lost 7 marbles and has 6 remaining ; how many had he at first ?
14. There are 8 birds on one tree, and 9 on another ; how many birds on both trees ?
15. There are 4 hens in one coop, and 5 in another ; how many hens in both coops ?
16. I travelled 4 miles one day, and 7 miles the next ; how many miles did I travel ?
17. There are 6 eggs in one nest, and 8 in another ; how many eggs in both nests ?

Add :

1. By threes, from 2 to 110.
- Thus, 2 and 3 are 5, and 3 are 8, and 3 are 11, &c.
2. By twos, from 3 to 81.
  3. By threes, from 1 to 61.
  4. By fours, from 3 to 115.
  5. By fives, from 2 to 77.
  6. By fives, from 4 to 104.
  7. By sixes, from 3 to 57.
  8. By sixes, from 5 to 83.
  9. By sevens, from 4 to 116.
  10. By sevens, from 6 to 118.
  11. By eights, from 1 to 89.
  12. By eights, from 5 to 69.
  13. By eights, from 7 to 55.
  14. By nines, from 3 to 102.
  15. By nines, from 4 to 76.
  16. By nines, from 8 to 116.
  17. By threes, from 11 to 44.
  18. By fives, from 7 to 47.
  19. By sevens, from 9 to 86.

## VII.

1. A news boy sold 10 papers in the morning and 7 in the afternoon ; how many papers did he sell during the day ?
2. If Joseph has 3 cents in one pocket, and 10 cents in another ; how many cents has he ?
3. William paid 12 cents for a slate and 1 cent for a pencil ; what did he pay for both ?
4. There are 17 trees in one field and 9 in another ; how many trees in the two fields ?

5. If there are 15 panes of glass in one window and 8 in another ; how many panes in both windows ?

6. Francis had 25 cents and his uncle gave him 5 more ; how many cents had Francis then ?

7. Albert took 14 roses from a bush, and Mary took 9 from the same bush ; how many roses were taken from the bush ?

8. If John say 64 words in a minute, and Thomas 8, how many words will both say in a minute ?

9. Thomas plucked 47 plums from a tree, and picked 9 off the ground ; how many plums had Thomas ?

10. In a company there are 56 private soldiers, and 6 officers ; how many men in the company ?

11. How many cents must I pay for a pound of butter worth 36 cents, and a pound of cheese worth 9 cents ?

12. Robert having 65 marbles, won 8 ; how many had he then ?

13. There are 19 books on a shelf and 6 on a table ; how many books in all ?

14. During a recitation 25 questions were answered correctly, and 8 incorrectly ; how many questions were asked ?

15. Alexander is 36 years old, and Jacob is 9 years older ; how old is Jacob ?

16. During a game of base-ball, one side made 16 runs, and the other five ; how many runs were made by both sides ?

17. In the park 45 boys were playing ball, and 7 were playing leap-frog ; how many boys were engaged in both games ?

OPERATION OF ADDITION.

Let it be required to find the sum of 475, 854, and 696.

**SOLUTION.**—Having written the numbers so that units of the same order stand in the same column, we begin at the right and add each column separately. The sum of 6 units and 4 units is 10 units; and 10 units and 5 units are 15 units, which are equal to 1 ten and 5 units. We write the 5 units under the column of units, and carry the 1 ten to the column of tens. We next add the column of tens beginning with the 1 ten which we carried from units column. The sum of 1 ten and 9 tens, is 10 tens, and 5 tens are 15 tens, and 7 tens are 22 tens; that is, 2 hundreds and 2 tens. Writing the 2 tens in the column of tens, we carry the 2 hundreds to the column of hundreds. The sum of the hundreds thus increased,  $2 + 6 + 8 + 4$ , is 20 hundreds; that is, 2 thousands and 0 hundreds. As this is the last column we set down the entire sum. The number, 2025 is, therefore, the required sum, because it is the sum of the units, tens, and hundreds of the given numbers.

| 2423 feet. | 1314 days. | 2293 pounds. |       |

**NOTE.**—The operation of adding a column of figures should be abbreviated by simply naming the result of each step. Thus, in example 5, the pupil should say 1, 4, 11, 13, (1st. column); 1, 8, 9, 13, (2d column); and 1, 10, 12, 19, 24, (3d column).

## WRITTEN EXERCISES.

Add the following :

1. Three hundred ninety ; eight hundred thirty-six ; three hundred twenty-six ; and two hundred nine

*Ans.* 1761.

2. Three thousand, forty-eight ; one thousand, four hundred eighteen ; one thousand, two hundred fifty-two ; and one thousand, nine hundred ninety-one.

*Ans.* 7709.

3. Eight hundred two ; two hundred seventy-two ; two hundred sixteen ; and five hundred thirty-nine.

*Ans.* 1829.

4. Six hundred ten ; one thousand, seven hundred thirty-six ; four thousand, eight hundred ninety-seven ; seven hundred one ; eight hundred thirty-three ; and seven hundred ninety-six.

*Ans.* 9573.

5. One thousand, two hundred two ; five thousand five hundred five ; six hundred seventy-eight ; two thousand, fifty-one ; and one thousand, three hundred thirty-nine

*Ans.* 10775.

6. Two thousand, three hundred sixty-seven ; eight hundred seven ; five hundred twenty-four ; and three thousand, one hundred seventy.

*Ans.* 6868.

7. Four thousand, five hundred seventy-eight ; nine hundred sixty-one ; five hundred seventy-two ; and three hundred sixty-three.

*Ans.* 6474.

8. One thousand, three hundred nine ; four thousand, three hundred twenty-nine ; one thousand, two hundred sixty-five ; three hundred eight ; and four hundred twenty-six.

*Ans.* 5337.

9. Eight hundred ; four thousand, one hundred

eighty-three; two thousand, one hundred sixty-four; three hundred twenty; and eight hundred five.

*Ans.* 8272.

## UNITED STATES CURRENCY.

41. The *Sign*, \$, written before a number signifies *dollars*. Thus, the expression \$120 is read *one hundred twenty dollars*.

42. *Dollars* and *cents* may be written together, the *cents* being separated from the *dollars* by a point. Thus, the expression, \$25.35 is read *25 dollars and 35 cents*.

Express by proper signs and figures, the following  
*EXERCISES.*

1. Seven dollars and twenty-four cents.
2. Sixteen dollars and forty cents.
3. Forty-seven dollars and sixty-three cents.
4. Ninety-nine dollars and fourteen cents.
5. Eighty-seven cents.
6. Seventy-five cents.
7. Eleven dollars and eleven cents.
8. Fifty dollars and twenty-five cents.
9. Nineteen dollars and three cents.
10. Fifty cents. Eighty-five cents.
11. Three dollars and fifty cents.
12. Sixty-two dollars and nine cents.
13. Thirty-seven cents.
14. Sixty-two cents.
15. Thirty-three dollars and one cent.
16. Seventy dollars and ten cents.
17. Four cents. Eight cents.
18. Thirty-three cents. Five cents.
19. One hundred dollars and three cents.

43. In writing dollars and cents for the purpose of adding them, the separating points must stand in the same column.

1. What is the sum of \$10.27, \$123.06, \$206.90 \$3.10, and \$0.46 ?

OPERATION.

\$10.27  
 123.06  
 206.90  
 3.10  
 0.46

\$343.79

SOLUTION.—Having arranged the numbers according to Art. 43, we add them by the principles of simple addition. The separating point is placed in the result immediately under those of the given numbers.

signifies  
 hundred

her, the  
 a point.  
 s and 35

In the same manner add the following :

| (2.)    | (3.)     | (4.)    |
|---------|----------|---------|
| \$81.05 | \$217.75 | \$78.50 |
| 54.62   | 83.16    | 151.63  |
| 125.84  | 55.32    | 96.18   |
| 370.62  | 135.67   | 12.03   |

\$632.13

| (5.)    | (6.)    | (7.)      |
|---------|---------|-----------|
| \$65.14 | \$75.15 | \$2245.76 |
| 91.73   | 207.45  | 791.18    |
| 182.64  | 1241.16 | 33.87     |
| 79.30   | 79.67   | 6.75      |
| 20.37   | 34.81   | 650.37    |

\$1638.24

| (8.)      | (9.)      | (10.)      |
|-----------|-----------|------------|
| \$5838.24 | \$1846.25 | \$37603.75 |
| 6183.42   | 30000.00  | 6000.00    |
| 981.34    | 4706.50   | 2337.25    |
| 89.65     | 373.33    | 840.16     |
| 326.10    | 876.45    | 73.82      |
| 4823.63   | 1950.55   | 10950.63   |

\$58810.61

11. Find the sum of \$75.85 ; \$16.05 ; \$123.25 ; \$475.00 ; \$325.50 ; \$110.16.

12. Find the sum of \$3284.63 ; \$87.24 ; \$1325.55 ; \$1806.10

13. Add \$26.45 ; \$33.80 ; \$70.67 ; \$8.70 ; and \$63.73.

14. Add \$135.10 ; \$0.17 ; \$1.67 ; \$1800.00 ; \$3.60 ; and \$867.25.

15. A grocer bought sugar for \$19.26 ; coffee for \$8.35 ; tea for \$16.75 ; butter for \$17.16 ; cheese for \$5.70 ; and eggs for \$4.75. What was the amount of his purchases ?

*Ans.* \$71.98.

16. A owes \$137.75 to B ; \$297.25 to C ; \$960.00 to D ; and \$500.50 to E ; what is his indebtedness ?

17. A lady purchased a dress for \$27.60 ; a shawl for \$14.75 ; a bonnet for \$6.50 ; a pair of gloves for \$1.75 ; and 6 handkerchiefs for 90 cents ; how much money did she expend ?

*Ans.* \$51.50.

18. Mr. Owens bought a house for \$3816.00 ; paid \$175.75 for repairing it, and \$200.75 for painting it ; then sold it at a profit of \$575.50 ; what was his selling price ?

*Ans.* \$4768.

19. A merchant imported goods to the amount of \$3827.50 ; paid duties \$650.75 ; and freight \$127.50 ; what was the entire cost of the goods ?

20. A farmer made the following sales : wheat, \$687.00 ; potatoes, \$67.00 ; corn, \$180.75 ; cabbage, \$16.80 ; turnips, \$20.60 ; apples, \$76.05 ; pears and peaches, \$99.18 ; what was the amount of the sales ?

21. How much will a pupil pay for the following set of school-books : Intermediate Reader, 45 cents ; Grammar, 36 cents ; Arithmetic, 40 cents ; Catechism, 12 cents ; Geography, 70 cents ; and a U. S. History, 25 cents ?

*Ans.* \$2.28.

22. In a family of five persons, the father earns \$12.50 per week ; the mother, \$6.75 ; the daughter, \$1.25 ; one of the sons, \$10.00 ; and the other son, \$4.65 ; what are the weekly wages of the family ?

# SUBTRACTION.

—:0:—

43. **Subtraction** is the process of finding the difference between two numbers.

## SUBTRACTION TABLE.

0 from any number leaves that number; thus, 0 from 1 leaves 1; 0 from 2 leaves 2, etc.

| 1 FROM      | 2 FROM     | 3 FROM     |
|-------------|------------|------------|
| 1 leaves 0  | 2 leave 0  | 3 leave 0  |
| 2 leaves 1  | 3 leave 1  | 4 leave 1  |
| 3 leaves 2  | 4 leave 2  | 5 leave 2  |
| 4 leaves 3  | 5 leave 3  | 6 leave 3  |
| 5 leaves 4  | 6 leave 4  | 7 leave 4  |

## V.

1. Margaret bought 7 cakes, and eat 4; how many had she remaining?

SOLUTION.—If Margaret bought 7 cakes and eat 4 of them, she must have remaining the difference between 7 cakes and 4 cakes, which is 3 cakes. Therefore, if Margaret bought 7 cakes and eat 4 of them, she has 3 cakes remaining.

2. George picked 6 quarts of strawberries and William 4; how many more quarts did George pick than William?

3. A boy had 9 cents and spent 3 for fire-crackers; how many cents had he left?

4. Albert caught 7 butterflies, but 2 got away; how many had he then?

5. Jane bought five oranges and gave away 2; how many had she for herself?

6. Henry sold for 7 cents a kite that cost him 5 cents; how many cents did he gain?

7. Charles rises at 6 o'clock and studies till 8; how many hours does he employ in study?

8. You have 8 fingers on both hands. Close 3 and tell me how many remain open.

9. If I borrow \$12 and pay back \$5, how much do I still owe?

10. A boy had 16 rabbits, 7 of which were killed by a dog. How many rabbits has he left?

11. Mr. Brown purchased \$6 worth of provisions, and gave the clerk a \$10 bill; how much change did he receive?

12. In a class of 25 boys, 9 were detained for bad conduct; how many were dismissed?

13. A boat containing 23 persons capsized, and 8 were drowned ; how many were saved ?

14. How many days from the 4th to the 27th of July ?

15. I bought a harness worth \$22, and paid \$5 on it ; how much do I still owe ?

16. In a company of soldiers there were 78 men. Of these 5 were killed, and 4 wounded ; how many were fit for duty ?

17. Abel is 8 years of age. How many years will pass before he is 55 years ?

18. A school contained 9 more girls than boys. There were 67 girls ; how many boys ?

19. A farmer raised 38 tons of hay and sold 6 of them ; how many tons remain ?

20. There were 16 persons in an omnibus. After 5 got out, and 3 got in, how many persons were then in the " bus " ?

21. In a ring there were 19 marbles. James shot away 6, and Edward 2 ; how many remained in the ring ?

22. Richard had 27 marbles. He won 16 and lost 7 ; how many had he then ?

23. William had 1 cent and his uncle gave him 8 more. How much does he still want to purchase a pair of skates worth 79 cents ?

24. There were 86 peaches on a tree. The wind blew off 5 ; how many peaches remained on the tree ?

25. An arithmetic is worth 70 cents, and a slate is worth 8 cents. What is the difference of their prices ?

26. James had 17 oranges. He gave 4 to Mary, 5 to Esther, and sold the rest; how many did he sell?

27. Oliver had 15 lines to write from his history. He wrote 4 on Monday, and the same number on Tuesday; how many had he still to write?

28. James is 14 years old, Emma 4 years older, and Jessie 7 years younger than Emma; how old are Emma and Jessie?

29. 18 boys were going to have a swim; 3 stopped to hear a hand organ, and 5 ran to a fire. How many went to swim?

30. What is the difference between  $16+11$  and  $2+8$ ?

## V.

## VII.

1. Martin had 25 cents, and spent 15 cents for a lunch; how many cents had he left?

2. From a flock of 87 sheep a farmer sold 26 ; how many had he remaining ?
3. Purchased a watch for \$47, and sold it for \$34. How much did I lose ?
4. Luke is 17 years old, and his father 58 years old. What is the difference of their ages ?
5. A geography is worth 70 cents, and a small grammar 36 cents ; how much more is the geography worth than the grammar ?
6. In the last examination James had 75 per cent. and Henry 38 per cent. What per cent. had James more than Henry ?
7. A person spent 37 cents in a store. What change did he receive if he gave a 50 cent piece ?
8. Joseph ran 84 rods and William 56 ; how much further did Joseph run than William ?
9. The sum of two numbers is 75, and one of them is 25. What is the other ?
11. A man sold a horse for \$87, which was \$18 more than it cost ; what was the cost price ?
12. John has 63 cents. If he spend 4 cents for marbles, 25 cents for a ball, and 5 cents for peanuts, how many cents will he have left ?
13. A tree 58 feet high was broken off 46 ft. from the top. How high is the remaining piece ?
14. A foreman receives \$80 a month. He pays \$6 for a ton of coal, \$20 for provisions, \$3 for a pair of shoes, and \$14 for sundry affairs ; how much has he remaining ?
15. A lady went shopping with one \$5 bill and two \$10 bills. She spent \$3 for ribbons, \$6 for vel-

vet, \$7 for silk, and \$2 for lining. How many dollars and she remaining?

16. A farmer having 64 sheep, sold 17 of them to A, 36 to B, and the remainder to C. How many did C receive?

17. 16 pupils were promoted from a class of 75; and on the same day 11 were received into the class; how many pupils were then in the class?

18. John had 26 cents, and his mother gave him 32. He then lost 17; how many cents had he left?

19. Sold a sled worth 87 cents for a penknife, and 15 cents; what was the penknife worth?

20. Mr. White had \$93 in bank. He took out \$37 on Monday; and put in \$26 the same afternoon. On Tuesday he took out \$16; how much has he now in bank?

## VIII.

1. To 5 add 7; subtract 6; add 4; subtract 9; add 11; subtract 3; add 4; add 12; subtract 15; add 2; what is the result?

$$2. 7-2+5-1+9-6+12+1-5+20-37=?$$

$$3. 3+17-11+37-6+2+5-25+7-30=?$$

$$4. 18-12+4-10+1-1+6-3+7=?$$

$$5. 3+7-4+5-1+10-6+2-8+1-3-6=?$$

$$6. 3-2+8-8+6+3-2+10-6-7+4=?$$

$$7. 17+8-6+10-8-3+74-6=?$$

$$8. 47+7+10-25+5-6-4+3-13-7+4+2=?$$

$$9. 38-1+3-30+17+3-16+2-7+1-4=?$$

$$10. 67-8+1-50+47-6+7-8+32-2+3=?$$

$$11. 46-26+17+7-8+3-16+2=?$$

$$12. 18+7-5+32-6+7-2-8+16-7+23=?$$

## OPERATION OF SUBTRACTION.

1. Let it be required to find the difference between 837 and 564.

OPERATION.

|             |     |
|-------------|-----|
| Minuend,    | 837 |
| Subtrahend, | 564 |
| Remainder,  | 273 |

SOLUTION.—We write the subtrahend under the minuend so that units of the same order shall stand in the same column. Beginning at the right, we see that 4 units from 7 units leave 3 units, which we write in the line below. Since 6 tens cannot be taken from 3 tens, we add 1 hundred, or 10 tens to the 3 tens, making 13 tens. Now, 6 tens from 13 tens leave 7 tens; which we write under the tens. To compensate for the 10 tens, or 1 hundred added to the minuend, we diminish the 8 hundreds by 1 hundred. Then 5 hundreds taken from 7 hundreds leave 2 hundreds, which is written under hundreds.

The number 273 is, therefore, the difference between the two given numbers; because it is the sum of the several remainders, obtained by subtracting the parts of the subtrahend from the corresponding parts of the minuend. (Principle III.)

## UNITED STATES CURRENCY.

To subtract *dollars* and *cents* write them as in addition, so that the separating points may fall in the same column. Thus, to subtract \$17.67 from \$26.03, we place the less number under the greater, taking care to have the points in the same column, and then proceed as in ordinary subtraction.

## ILLUSTRATION.

Minuend, \$26.03  
Subtrahend, 17.67

Remainder, \$ 8.36

9. Purchased a house for \$16787.99 and sold it for \$18000.00; what was my gain? *Ans.* \$1212.01.

10. A tailor purchased cloth to the amount of \$63.25 and afterwards sold it for \$59.16; what was his loss? *Ans.* \$4.09

11. A and B began business with a capital of \$16000.00. If A put in \$9713.73, what was B's share of the capital? *Ans.* \$6286.27.

12. A gentleman having \$3800.25 in bank, drew out \$468.71; how much has he remaining in bank? *Ans.* \$3331.54.

13. A lady buys a barrel of flour for \$7.25, and hands the seller a \$10 bill; how much change should she receive?

*Ans.* \$2.75.

14. A mechanic earned \$37.48, but received only \$26.85; how much is still due him?

*Ans.* \$10.63.

15. A merchant in one day sold goods to the amount of \$3615.70, and thereby gained \$963.80. What was his buying price?

*Ans.* \$2651.90.

16. How much must be added to \$375.38 to make it \$1000?

*Ans.* \$324.62.

17. A man with \$10000 cash invests in the dry goods business, paying \$5673.75 for the store and \$2987 for the goods. How much cash has he left?

*Ans.* \$1339.25.

18. If a man receives \$150.00 per month, and pays \$32 for provisions, \$16.75 for clothing, \$30 for rent, and \$19.67 for sundry articles, how much will he be able to save each month?

*Ans.* \$51.58.

19. A farmer sold hay for \$16.15, vegetables for \$16.75, and a calf for \$18.50. He received in payment butter worth \$6.10, flour worth \$7.65, and the remainder in cash. How much cash did he receive?

*Ans.* \$37.65.

20. An auctioneer received furniture to the value of \$7864, which he auctioned off in two lots, one for \$4620.75, and the other for \$3000; what was the loss on the furniture?

*Ans.* \$243.25.

21. I bought a pair of horses for \$620, a harness for \$60.50, and a carriage for \$300 less than I paid for both horses and harness; what was the cost of the carriage?

*Ans.* \$380.50.

# MULTIPLICATION.

---

44. **Multiplication** is the process of taking one number as many times as there are units in another.

## MULTIPLICATION TABLE.

Once 0 is 0; twice 0 is 0; 0 taken any number of times is 0. 0 times 1 is 0; 0 times 2 is 0; 0 times any number is 0.

## V.

1. What will 3 pounds of raisins cost at 11 cents a pound ?

SOLUTION.—If 1 pound of raisins cost 11 cents, 3 pounds will cost 3 times as much as 1 pound, or 3 times 11 cents, which are 33 cents. Therefore, if 1 pound of raisins cost 11 cents, 3 pounds will cost 33 cents.

2. What cost 2 spools of thread at 5 cents a piece ?

3. In one gallon there are 4 quarts; how many quarts in 7 gallons ? 9 gallons ? 20 gallons ?

4. There are 7 days in a week; how many days in 9 weeks ? 5 weeks ? 3 weeks ? 13 weeks ? 15 weeks ?

5. What will 6 pounds of cheese cost at 9 cents a pound ?

6. If you solve 8 problems a day, how many will you solve in 5 days ? 7 days ? 3 days ? 2 days ?

7. At 12 cents a piece what will 8 primers cost ?

8. James earns \$6 a week and Henry \$3; how much will both earn in 3 weeks ? 9 weeks ? 13 weeks ?

9. How many inches in 9 feet, each foot containing 12 inches ?

10. What will 13 tons of coal cost at \$7 a ton ? at \$6 ? at \$8 ? at \$5 ?

11. John bought 6 rubber balls at 16 cents each. How much change should he receive from a dollar ?

12. A man travelled by stage at the rate of 8 miles an hour. How far did he travel in 9 hours ? 11 hours ? 16 hours ? 18 hours ?

13. I bought 3 pounds of beef at 18 cents a pound and 11 pounds of rice at 11 cents a pound; what did both cost ?

14. What will be the cost of 7 pounds of coffee at

17 cents a pound, and 1 pound of tea at 75 cents a pound ?

15. Two persons travel in the same direction, one 38 miles a day and the other 24 ; how far apart are they at the end of 6 days ? 2 days ? 9 days ?

16. A tailor bought 15 yards of cloth at \$5 a yard ; but it being damaged he was obliged to sell it at a loss of \$13. How much did he receive for it ?

17. Joseph has 11 chestnuts, and Henry 3 times as many less 16 ; how many has Henry ?

18. Two men start from the same point and travel in opposite directions, one 34 miles a day, and the other 26 ; how far apart are they in 5 days ?

19. How many handkerchiefs in 8 boxes, each containing 25 of them ?

20. Two men travelled toward each other, one 4 miles an hour, and the other 3. They had been travelling 22 hours before they met ; how far apart were they ?

21. What cost 4 base balls at 75 cents a piece ?

22. What cost 2 pairs of gloves at 67 cents a pair ?

23. A boy earned 67 cents a day and paid 47 of it for board ; how much had he at the end of 6 days ?

24. Bought 9 loads of wheat at \$30 a load, and sold it for \$300 ; how much did I gain ?

25. A carpenter earned \$18 a week, and a shoemaker \$11. How much more than the shoemaker will the carpenter have earned in 16 weeks ?

26. If a man dig 27 bushels of potatoes in one day, how many will be dig in 6 days ? 7 days ? 3 days ?

27. What is the amount of the following bill : 6 quarts of soft-soap at 11 cents a quart ; 7 cakes of

soap at 9 cents each ; and 2 brooms at 35 cents a piece ?

28 If 7 men do a piece of work in 19 days, how long will it take one man to do it ?

29 How many pounds of coffee in 4 bags, each containing 46 pounds ? 37 pounds ? 50 pounds ?

30. If 12 men build a wall in 12 days, how long will it take one man to build it ?

31. There are 16 ounces in one pound ; how many ounces in 5 pounds ? 9 pounds ? 3 pounds ? 2 pounds ?

32. If 14 yards be required to make one suit of clothes, how many yards will 5 suits require ? 3 suits ? 7 suits ?

33. If a pound of butter cost 23 cents, what will 9 pounds cost ?

34. A farmer sold 16 bushels of potatoes to one man, 20 to another, and 32 to a third, at \$2 per bushel ; how much did he receive ?

35. William is 15 years old and his uncle Charles is 4 times as old ; what is the sum of their ages ?

36. A farmer exchanged 17 barrels of apples worth \$5 a barrel, for 12 cords of wood at \$7 a cord. Did he gain or lose, and how much ?

## VI.

1.  $6 \times 4, -3, +9, \times 2, -10, +5, \times 4 = ?$

2.  $18 - 8, \times 10, -75, \times 2, -50, +1 = ?$

3.  $37 - 3, -30, \times 6, +17, -65, \times 8 = ?$

4.  $14 \times 4, -6, +13, +17, -65, \times 8, \times 11, -41 = ?$

5.  $12 \times 9, -90, \times 3, -4, +11, -37, \times 5, -16 = ?$

6.  $130 - 75, +5, \times 8, -400, +20, -68, \times 3 = ?$

7.  $7 + 3, -4, +27, -6, -12, \times 8, -26 = ?$

8.  $144 - 24 + 80 - 170 \times 2 + 4 - 30 \times 2 - 64 = ?$   
 9.  $19 + 7 \times 5 - 125 + 9 - 3 \times 12 - 32 - 16 = ?$   
 10.  $33 - 13 \times 8 - 70 + 10 \times 3 - 150 - 25 = ?$

CASE I.

When the multiplier contains only one figure.

1. Let it be required to multiply 895 by 7.

OPERATION.  
 Multiplicand, 895  
 Multiplier, 7

Product, 6265

SOLUTION.—After writing the multiplier under the lowest order of the multiplicand and drawing a line, we begin to multiply at the right. 7 times 5 units, are 35 units, which are equal to 3 tens and 5 units. We write the 5 in units place, and reserve the 3 tens to be added to the product of the tens. Multiplying 9 tens by 7 we get 63 tens, which increased by the 3 tens reserved, give 66 tens, or 6 hundreds and 6 tens. We set down the 6 tens in tens place, and reserve the 6 hundreds to add to the next product. 7 times 8 hundreds are 56 hundreds, plus the 6 hundreds reserved, make 62 hundreds, or 6 thousand and 2 hundreds. As we have no more orders to multiply, we put the 6 thousands and two hundreds in their proper places. The resulting number, 6265, is the required product.

1. If a horse cost \$180, what will 9 horses cost at the same rate?

2. What will 21780 pounds of beef cost at 8 cents per pound?

3. If a barrel of flour cost \$9, what will 2376 barrels cost?

4. What will 7 farms cost, at the rate of \$56450 each?

5. If there are 5280 feet in a mile, how many feet in 6 miles?

6. If a man travels 7249 miles in one year, how many miles will he travel in 4 years?

7. How much will a merchant gain in 5 years, at the rate of \$41695 a year?

8. How much will a grocer pay for 2564 heads of cabbage at 3 cents a head?

9. At \$4 a cord what will 8596 cords of wood cost?

10. If a boy earns \$6 a week, how much will he earn in 260 weeks?

11. If it take a tailor 7 days to make a suit of clothes, how long will it take him to make 426 suits?

12. There are 52 weeks in a year, how many weeks in 8 years?

CASE II.

When the multiplier contains more than one figure.

1. Find the product of 643 by 58.

OPERATION.

Multiplicand, 643

Multiplier, 58

|                     |      |                 |
|---------------------|------|-----------------|
| 1st partial product | 5144 | $643 \times 8$  |
| 2nd partial product | 3215 | $643 \times 50$ |

|         |       |                 |
|---------|-------|-----------------|
| Product | 37294 | $643 \times 58$ |
|---------|-------|-----------------|

58 is equal to 5 tens and 8 units, 58 times 643 must be equal to a

SOLUTION. — Having written the multiplier under the multiplicand so that units stand under units, tens under tens, &c., we begin at the right hand and multiply all the parts of the multiplicand successively, by each term of the multiplier. Since

tens times 643 plus 8 units times 643. Having found 8 units times 643 by the rule under Case 1, to be 5144, we set it down as the first partial product. To find 5 tens times 643, we begin by multiplying 3 units by 5 tens, which gives 15 tens, or 150 units. Omitting the naught for units place, we set down the 5 tens in tens place and carry the 1 hundred to the next product. By multiplying the remaining terms of the multiplicand by the 5 tens of the multiplier, and carrying as before, we obtain the second partial product 32150; which is equal to 5 tens or 50 times 643. Now, by adding the partial products, 5144 and 32150, we find the entire product 37294. In like manner we may find the products of any two numbers, being careful to place the first figure of each partial product under the corresponding figure of the multiplier.

45. Annexing a cipher to a number moves each of its digits one place to the left, thus converting units into tens, tens into hundreds &c. ; which is the same as multiplying the number by 10. Hence to multiply a number by 10, we annex one cipher ; to multiply it by 100, we annex two ciphers ; and so on.

UNITED STATES CURRENCY.

46. When one of the factors contains *cents*, or *dollars and cents*, multiply as in simple numbers. Point off two places from the right, in the product, and prefix the sign \$.

1. What cost 27 tons of coal at \$5.75 a ton ?

OPERATION.

$$\begin{array}{r}
 \$5.75 \\
 \times 27 \\
 \hline
 4025 \\
 1150 \\
 \hline
 \end{array}$$

\$155 25

SOLUTION.—If one ton cost \$5.75, 27 tons will cost 27 times \$5.75, which is \$155.25. Since the multiplicand contains cents, we must point off two places in the product.

2. What will 37 barrels of flour cost at \$6.85 a barrel ?

Ans. \$253.45.

3. Multiply \$472.66 by 27. Ans. \$12761.82.

4. Multiply \$1826 37 by 160. Ans. \$292219.20.

5. Multiply \$892.06 by 327. Ans. \$291703.62.

6. Multiply \$2932.25 by 1408. Ans. \$4128608.00.

7. If an acre of land is worth \$237.82, what are 462 acres worth ?

Ans. \$114629.24

8. At \$4.80 a bushel, what will 625 bushels of flax-seed cost? *Ans.* \$3000.00.
9. What cost 83 bushels of corn, at 75 cents a bushel? *Ans.* 62.25.
10. What cost 145 yards of sheeting at 8 cents a yard? *Ans.* 11.60.
11. At \$4.63 a head, what will 378 sheep cost? *Ans.* \$1750.14.
12. What cost 8 pieces of calico, each piece containing 25 yards, at 7 cents a yard? *Ans.* \$14.00.
13. How much will a grocer pay for 2 chests of tea each containing 65 pounds, at 65 cents a pound? *Ans.* \$84.50
14. What will 19 hogsheads of vinegar cost, each containing 63 gallons, at 23 cents a gallon? *Ans.* \$275.31.
15. Bought 9 cows at \$30 each, 13 horses at \$135 each, and 300 sheep at \$3.50 each; what was the entire cost? *Ans.* \$3075.
16. A merchant purchased 27 pieces of cloth each containing 54 yards, at \$3.33 a yard, and sold it for \$3.45 a yard; how much did he gain? *Ans.* 174.96.
17. A flour merchant bought 450 barrels of flour for \$3262.50, and sold them for \$8.63 a barrel; what did he gain? *Ans.* \$621.00.
18. A man earns \$3.25 a day, and his daily expenses are \$1.89; how much will he save in 365 days? *Ans.* \$496.40.
19. I sold 13 bales of cotton cloth, each bale containing 10 pieces, and each piece 19 yards at .05 per yard; what did I receive for the whole?

MULTIPLICATION.

# DIVISION.

47. Division is the process of finding how many times one number is contained in another of the same kind.

## DIVISION TABLE.

0 divided by 1 equals 0; 0 divided by 2 equals 0; 0 divided by any number equals 0.

## VI.

1. At 4 cents a piece how many oranges can be bought for 16 cents? 28 cents? 32 cents? 20 cents? 8 cents?

2. A man earns \$2 a day. How long will it take him to earn \$18? \$4? \$6? \$12? \$2?

3. How many yards of muslin can be bought for 72 cents, at 6 cents a yard? 8 cents? 12 cents? 9 cents?

4. How many times can 5 yards of cloth be taken from a piece containing 25 yards? 45 yards? 60 yards? 30 yards?

5. By writing 8 lines a day how many days will it take John to write 56 lines? 16 lines? 64 lines? 88 lines? 40 lines?

6. At 11 cents a pound, how many pounds of sugar can be bought for 88 cents? 55 cents? 99 cents? 22 cents?

7. If one man can do a piece of work in 36 days, how long will it take 9 men to do it? 4 men? 6 men? 3 men? 8 men?

8. Divide 24 into 3 equal parts. Into 6 equal parts.

10.  $86 - 31, \div 11, + 17, - 4, \div 9, + 7, \times 4, + 11, - 2 = ?$

SHORT DIVISION.

1. Let it be required to divide 32540 by 5.

OPERATION.

$$\begin{array}{r} \text{Dividend} \\ \text{Divisor } 5 \overline{) 32540} \\ \hline \text{Quotient } 6508 \end{array}$$

SOLUTION.—Having written the divisor at the left of the dividend, with a curved line between them, we begin at the top to divide the different parts of the dividend by the divisor. Since 5 is not contained in 3 we divide 32 by 5. This gives 6 thousands for a quotient and 2 thousands for a remainder. We write the 6 thousands under the thousands, and to the remaining 2 thousands we annex the next figure which is 5 hundreds. 2 thousands and five hundreds are equal to 25 hundreds. 5 is contained in 25 hundreds, 5 hundreds times. Since there is no remainder, and since 4 is less than 5, there are no tens in the quotient. We therefore write 0 in the place of tens, and annex the following figure to the four tens making 40 units. Dividing 40 units by 5 we obtain 8 units, which we place in the quotient under units. Hence the number 6508, being the sum of all the partial quotients obtained by dividing the parts of the dividend by the divisor, is the required quotient.

## LONG DIVISION.

1. Let it be required to divide 50289 by 372.

## OPERATION.

| Divisor. | Dividend.                                   | Quotient. |
|----------|---------------------------------------------|-----------|
| 372 )    | 50289                                       | ( 135     |
|          | 372                                         | /         |
|          | <hr style="width: 100px; margin-left: 0;"/> |           |
|          | 1308                                        |           |
|          | 1116                                        |           |
|          | <hr style="width: 100px; margin-left: 0;"/> |           |
|          | 1929                                        |           |
|          | 1860                                        |           |
|          | <hr style="width: 100px; margin-left: 0;"/> |           |

Remainder. 69

The quotient of 1308 tens, by 372 is greater than 3 and less than 4; hence there are 3 tens in the quotient. Multiplying 372 by tens, we have 1116 tens, and this taken from 1308 tens, leaves 192 tens; to which we annex the next figure 9 units, making 1929 units. 372 is contained in 1929 units, 5 times with a remainder. Writing the 5 units in the quotient, and multiplying and subtracting as before, we obtain the remainder 69. Hence the quotient is 1 hundred, 3 tens, and 5 units or 135, with a remainder of 69.

2. Divide 1062934 by 306, and prove it.

## OPERATION.

| Divisor   | Dividend                                    | Quotient. |

UNITED STATES CURRENCY.

48. Reduce the dividend to cents if necessary, and divide as in simple numbers. The quotient will be the answer in cents; which may be reduced to dollars and cents by placing the separating point two places from the right.

49. When both dividend and divisor are in currency, reduce each to cents if necessary, and divide as in simple numbers. The quotient will be the required number.

ILLUSTRATIONS.

1. Divide \$187 equally among 13 men.
- 2 For \$600 how many barrels of flour can be bought at \$7.50 per barrel?

## WRITTEN EXERCISES.

3. Divide \$396.76 by 28. *Ans.* \$14.17.
4. Divide \$1308.24 by 79. *Ans.* \$16.56.
5. Divide \$6048 by 108. *Ans.* \$56.
6. Divide \$37806.29 by 392. *Ans.* \$96.44+
7. Divide \$99.88 by 11 cents. *Ans.* 908.
8. Divide \$137.97 by 63 cents. *Ans.* 219.
9. Divide \$15275 by \$325. *Ans.* 47
10. Divide \$9672 by \$806. *Ans.* 12.
11. Divide \$9003.75 by \$3.75. *Ans.* 2401.
12. Divide \$276.00 by \$9 20. *Ans.* 30.
13. If 63 acres of land cost \$7938, what will 1 acre cost ? *Ans.* \$126.
14. If 516 chairs cost \$2012.40, what will 1 chair cost ? *Ans.* 3.90.
15. How much a head will I pay for sheep, if 280 cost \$840.00 ? *Ans.* \$3 00.
16. What is the price of butter per pound, when 300 pounds cost \$105 ? *Ans.* 35c.
17. At \$9.25 a ton, how many tons of coal can be purchased for \$120.25 ? *Ans.* 13 tons.
18. How many baskets of peaches can be bought for \$6, at the rate of 25 cents per basket ? *Ans.* 24 baskets.
19. Bought a barrel of vinegar for \$13.23, at the rate of 21 cents a gallon; how many gallons in the barrel ? *Ans.* 63 gals.
20. How much does a laborer receive per day, if for 42 days, he earns \$56.70 ? *Ans.* \$1.35.
21. At \$7 a barrel, how many barrels of flour can be bought for \$273 ? *Ans.* 39 bbl.
22. How many yards of cloth can be purchased for \$633.50 at \$3.62 per yard ? *Ans.* 175 yds.

## INTRODUCTORY FRACTIONS.

$$1 \text{ unit} = \frac{2}{2}$$

50. If a unit is divided into two equal parts, one of the parts is called one half.

$$1 \text{ unit} = \frac{3}{3}$$

If the unit is divided into three equal parts, one of the parts is called one third; two of the parts are called two thirds.

$$1 \text{ unit} = \frac{4}{4}$$

If the unit is divided into four equal parts, one of the parts is called one fourth; two of the parts are called two fourths, and three, three fourths.

## ORAL EXERCISES.

## I

1. How many halves in a unit? in 2 units? in 3 units? in 4 units? in 6 units?
2. How many thirds in a unit? in 2 units? in 3 units? in 5 units? in 8 units?
3. How many fourths in a unit? in 2 units? in 4 units? in 10 units?
4. How many halves in a unit and a half? in 2 units and a half? in 3 units and a half?
5. How many thirds in 3 units and a third? in 5 units and two thirds?

II

1. Find  $\frac{1}{2}$  of 4,  $\frac{1}{3}$  of 8.

SOLUTION.—To find  $\frac{1}{2}$  of any number divide that number by 2. Thus,  $\frac{1}{2}$  of 4 =  $4 \div 2 = 2$  Ans.

II.  $\frac{2}{3}$  of 8 = 3 times  $\frac{1}{3}$  of 8. Since  $\frac{1}{3}$  of 8 =  $8 \div 3$ , therefore  $\frac{2}{3}$  of 8 =  $(8 \div 3) \times 2 = 5\frac{2}{3}$  Ans.

2. What is  $\frac{1}{2}$  of 6? of 10? of 14? of 20? of 24? of 30? of 50?

3. What is  $\frac{1}{3}$  of 9? of 12? of 15? of 18? of 24? of 30? of 75?

4. What is  $\frac{1}{4}$  of 12? of 16? of 24? of 36? of 48? of 160? of 200?

5. What is  $\frac{2}{3}$  of 9? of 12? of 18? of 21? of 60? of 90? of 120? of 300?

6. What is  $\frac{3}{4}$  of 12? of 16? of 20? of 28? of 36? of 100? of 400?

7. At 20 cents a pound for honey, what must you pay for half a pound?

8. When coal is worth 8 dollars a ton, what must be paid for  $\frac{1}{4}$  of a ton?

9. If there are 12 ounces in a pound, how many ounces in  $\frac{2}{3}$  of a pound?

10. If there are 100 cents in a dollar, how many cents in  $\frac{3}{4}$  of a dollar?

WRITTEN EXERCISES.

1. What will  $72\frac{1}{2}$  yards of silk cost at \$4 a yard?

SOLUTION.—If one yard cost \$4,  $72\frac{1}{2}$  yards will cost  $72\frac{1}{2}$  times \$4.  $72$  times \$4 = \$288; and  $\frac{1}{2}$  of \$4 = \$2. Hence  $72\frac{1}{2}$  yards will cost \$288 + \$2 = \$290 Ans.

2. At 30 cents a pound what will  $8\frac{2}{3}$  pounds of tea cost?

3. If a man pays  $22\frac{1}{2}$  cents a pound for beef, what will 50 pounds cost him?

4. When raisins are worth  $\frac{2}{3}$  of a dollar a box, what will 135 boxes cost?
5. What must a grocer pay for 36 bushels of potatoes at  $62\frac{1}{2}$  cents a bushel?
6. What will 52 pounds of sugar cost at  $11\frac{1}{4}$  cents a pound?
7. A man having \$900, spent  $\frac{2}{3}$  of it. How much had he left?
8. What cost 1297 dozen of eggs at  $16\frac{1}{2}$  cents a dozen?  
*Ans.* \$214.005
9. At  $6\frac{1}{4}$  cents a spool, what cost 9245 spools of thread?  
*Ans.* \$577.8125.
10. What cost 7842 yards of muslin at  $33\frac{1}{3}$  cents a yard?  
*Ans.* \$2614.
11. What is the cost of 525 pounds of sugar at  $12\frac{1}{2}$  cents a pound?  
*Ans.* \$65.625.
12. Find the cost of 2500 melons at 25 cents each?  
*Ans.* \$625.
13. What must be paid for 6 bales of cotton, containing 420 pounds each, at  $16\frac{2}{3}$  cents a pound?  
*Ans.* \$420.
14. What will 18 pieces of calico, each containing 45 yards cost, at 25 cents a yard?  
*Ans.* \$202.50.
15. If a wheel turns 480 times in going a mile, how many times will it turn in going  $\frac{2}{3}$  of a mile?  
*Ans.* 300.
16. At \$2 $\frac{3}{4}$  a yard what will be the cost of 240 yards of silk?  
*Ans.* \$660.
17. If a boy can write 50 pages in a week, how many pages can he write in  $\frac{3}{5}$  of a week?  
*Ans.* 30.
18. A boy sold  $9\frac{1}{4}$  dozen of eggs at 4 cents a piece. He received in payment  $6\frac{1}{2}$  pounds of butter at 20 cents a pound, and  $12\frac{2}{3}$  yards of ribbon at 3 cents a yard. How much is still due him?

TROY WEIGHT.

The denominations of Troy Weight are pounds, ounces, penny-weights, and grains.

Gold, silver, jewels, and liquors are weighed by Troy Weight.

24 grains, gr., make 1 pennyweight, marked dwt.  
 20 pennyweights " 1 ounce, " oz.  
 12 ounces — " 1 pound, " lb.

The pound Troy contains 5,760 grains.

ORAL EXERCISES.

1. How many grains in a pennyweight? in 3 pennyweights? in 6 dwt.?
2. How many dwt. in an ounce? in 5 oz.? in 8 oz.? in 10 oz.?
3. How many ounces in a pound? in 4 lbs.? in 7 lbs.? in 9 lbs.? in 12 pounds?
4. How many pennyweights in 72 grains? in 96 grains? in 144 grains?
5. How many ounces in 40 dwt.? in 80 dwt.? in 100 dwt.?
6. How many pounds in 36 ounces? in 60 oz.? in 96 oz.? in 108 oz.
7. How many dwt. and grs. in 49 grains? in 80 grs.? in 100 grs.?
8. How many pounds and ounces in 27 oz.? in 63 oz.? in 89 oz.?
9. How many dwt. in 4 oz. and 3 dwt.? in 7 oz. 5 dwt.?
10. How many ounces in 6 pounds and 7 oz.? in 8 lbs. 3 oz.? in 5 lbs. 9 oz.?

## A VOIRDUPOIS WEIGHT.

Avoirdupois Weight is used to weigh all common goods, such as groceries, hay, grain, and all metals, except gold and silver.

The denominations of Avoirdupois Weight are tons, hundredweights, quarters, pounds, ounces, and drams.

|                  |                      |      |
|------------------|----------------------|------|
| 16 drams, dr,    | make 1 ounce, marked | oz.  |
| 16 ounces        | " 1 pound, "         | lb.  |
| 25 pounds        | " 1 quarter, "       | qr.  |
| 4 quarters       | " 1 hundredweight,   | cwt. |
| 20 hundredweight | " 1 ton,             | T.   |

The pound Avoirdupois contains 7,000 grains.

## ORAL EXERCISES.

1. How many ounces in a pound ? in 4 pounds ? in 8 pounds ? in 10 pounds ?
2. How many lbs. in 2 cwt. ? in 7 cwt. ? in 9 cwt. ?
3. How many cwt. in a ton ? in 6 tons ? in 9 T. ? in 12 T. ?
4. How many ounces in 3 pounds ? in a hundredweight ? in a ton ?
5. How many pounds in 32 ounces ? in 64 oz. ? in 128 oz. ? in 144 oz. ?
6. How many cwt. and lbs. in 120 lbs. ? in 260 lbs. ? in 340 lbs. ?
7. How many pounds and ounces in 39 ounces ? in 84 oz. ? in 90 oz. ?
8. How many ounces in 5 lbs. 11 oz. ? in 4 lbs. 12 oz. ? in 10 lbs. 3 oz. ?
9. How many lbs. in 6 cwt. 25 lbs. ? in 7 cwt. 36 lbs. ?
10. How many tons and hundredweight in 45 cwt. ? in 92 cwt. ? in 130 cwt. ?

## APOTHECARIES' WEIGHT.

This weight is used by apothecaries and physicians in mixing their medicines. But medicines are generally sold, in the quantity, by avoirdupois weight.

Its denominations are pounds, ounces, drams, scruples, and grains.

|                 |                 |            |
|-----------------|-----------------|------------|
| 20 grains, gr., | make 1 scruple, | marked sc. |
| 3 scruples      | " 1 dram,       | " dr.      |
| 8 drams,        | " 1 ounce,      | " oz.      |
| 12 ounces       | " 1 pound,      | " lb.      |

## ORAL EXERCISES.

1. How many grains in a scruple? in 2 scruples? in 5 scruples? in 7 sc.?
2. How many sc. in a dram? in 6 dr.? in 9 dr.? in 20 dr.?
3. How many sc. in 40 grs.? in 90 grs.? in 120 grs.? in 140 grs.?
4. How many drams in an ounce? in 5 oz.? in 8 oz.? in 15 oz.?
5. How many drams in 9 sc.? in 15 sc.? in 36 sc.? in 51 sc.?
6. How many ounces in 24 dr.? in 48 dr.? in 64 dr.? in 96 dr.?
7. How many ounces in a pound? in 3 pounds? in 5 pounds? in 15 pounds? in 20 pounds?
8. How many pounds in 48 oz.? in 108 oz.? in 240 oz.?
9. How many sc. in an oz.? in a lb.? in 1 lb. 6 oz.?
10. How many grains in a dram? scruples in 4 drams? drams in 5 lbs.?

## WINE MEASURE.

WINE MEASURE is used for measuring all liquids, except ale, beer and milk.

The denominations of Wine Measure are tuns, pipes, hogsheads, tierces, barrels, gallons, quarts, pints, and gills.

|               |               |        |       |
|---------------|---------------|--------|-------|
| 4 gills, gi., | make 1 pint,  | marked | pt.   |
| 2 pints       | " 1 quart,    | "      | qt.   |
| 4 quarts      | " 1 gallon,   | "      | gal.  |
| 31½ gallons   | " 1 barrel,   | "      | bbl.  |
| 42 gallons    | " 1 tierce,   | "      | tier. |
| 63 gallons    | " 1 hogshead, | "      | hhd.  |
| 2 hogsheads   | " 1 pipe,     | "      | pi.   |
| 2 pipes       | " 1 tun,      | "      | tun.  |

The gallon of Wine Measure in the United States contains 231 cubic inches, and is equal to 8.339 Avoirdupois lbs. of distilled water, very nearly.

The English imperial wine gallon contains 277.274 cubic inches, and hence is equal to 1.2 times the wine gallon of the United States.

## ORAL EXERCISES.

1. How many gills in a pint? in 4 pints? in 6 pints? in 12 pts.? in 20 pts.?
2. How many pts. in a qt.? in 6 qts.? in 8 qts.? in 15 qts.?
3. How many gallons in a barrel? in a tierce? in a hogshead? in a pipe? in a tun?
4. How many pints in 12 gills? in 26 gi.? in 37 gi.? in 50 gi.?
5. How many quarts in 10 pts.? in 24 pts.? in 50 pts.? in 84 pts.?
6. How many gallons in 1 hhd. 10 gals.? in 2 bbls. 15 gals.?
7. How many quarts in a barrel? pints in 2 gallons? gills in 6 quarts?
8. How many gallons in 72 quarts? in 104 qts.? in 4 bbls. 4 gals.?
9. How many pts. and gi. in 18 gi.? in 31 gi.? in 53 gi.? in 74 gi.?
10. How many hogsheads in 6 tuns? pints in 8 gals.? gallons in 3 pipes?

ALE OR BEER MEASURE.

By this measure, beer, porter, and milk are measured.

The denominations of Beer Measure are hogsheads, barrels, gallons, quarts, and pints.

|                                   |               |            |
|-----------------------------------|---------------|------------|
| 2 pints, pt.,                     | make 1 quart, | marked qt. |
| 4 quarts                          | " 1 gallon,   | " gal.     |
| 36 gallons                        | " 1 barrel,   | " bbl.     |
| $1\frac{1}{2}$ barrel or 54 gals. | " 1 hogshead, | " hhd.     |

ORAL EXERCISES.

1. How many pints in a quart? in 3 qts.? in 8 qts.? in 12 qts.?
2. How many qts. in a gallon? in 5 gals.? in 7 gals.? in 22 gals.?
3. How many gallons in a barrel? in 3 barrels? in 5 barrels? in 8 barrels?
4. How many gallons in a hogshead? in 2 hhds.? in 4 hhds.?
5. How many qts. in 10 pts.? in 19 pts.? in 31 pts.? in 56 pts.?
6. How many gallons in 11 qts.? in 32 qts.? in 2 bbls. 2 qts.?
7. How many qts. and pts. in 17 pts.? in 73 pts.? in 85 pints?
8. How many barrels and gallons in 75 gallons? in 110 gallons?
9. How many gallons in 2 bbls 5 gals.? in 2 hhds. 8 gals.?
10. How many quarts in 18 pints? gallons in 68 qts.? barrels in 144 gals.?

## CLOTH MEASURE.

Cloth Measure is used for measuring goods sold by the yard. Its denominations are ells, yards, quarters, nails and inches.

|                 |      |   |              |        |        |
|-----------------|------|---|--------------|--------|--------|
| 2½ inches, in., | make | 1 | nail,        | marked | na.    |
| 4 nails         | "    | 1 | quarter,     | "      | qr.    |
| 4 quarters      | "    | 1 | yard         | "      | yd.    |
| 3 quarters      | "    | 1 | Flemish ell, | "      | Fl. e. |
| 5 quarters      | "    | 1 | English ell, | "      | E. e.  |
| 6 quarters      | "    | 1 | French ell,  | "      | Fr. e. |

## ORAL EXERCISES.

1. How many inches in a nail? in 4 nails? in 6 nails? in 8 nails? in 10 nails?
2. How many nails in a qr.? in 5 qrs.? in 6 qrs.? in 12 qrs.? in 20 qrs.?
3. How many qrs in a Fl. e.? in 5 Fl. e.? in 10 Fl. e.? in 15 Fl. e.?
4. How many qrs. in an E. e.? in 8 E. e.? in 30 E. e.? in 50 E. e.?
5. How many quarters in a Fr. e.? in 9 Fr. e.? in 25 Fr. e.? in 40 Fr. e.?
6. How many yds. in 20 qrs.? in 56 qrs.? in 96 qrs.? in 124 qrs.?
7. How many quarters in 7 Fr. e. and 5 qrs.? in 9 E. e. and 2 qrs.?
8. How many English ells in 25 qrs.? in 30 qrs.? in 65 qrs.?
9. How many nails in 3 Fl. e.? in 6 Fr. e.? in 8 E. e.?
10. How many quarters in 5 yds. and 2 qrs.? nails in 7 qrs. and 3 nails? inches in 2 Fr. e.?

## LONG MEASURE.

Long Measure is used for measuring length without regard to breadth or depth.

Its denominations are circles, degrees, leagues, miles, furlongs, rods, poles or perches, yards, feet, inches, and barleycorns.

|                        |                         |            |
|------------------------|-------------------------|------------|
| 3 barleycorns, b. c.   | make 1 inch,            | marked in. |
| 12 inches              | " 1 foot,               | " ft.      |
| 3 feet                 | " 1 yard,               | " yd.      |
| 5½ yards, or 16½ feet, | " 1 rod, pole or perch, | " rd.      |
| 40 rods                | " 1 furlong,            | " fur.     |
| 8 furlongs             | " 1 mile,               | " m.       |
| 3 miles                | " 1 league,             | " lea.     |
| 69½ statute miles      | " 1 degree,             | " deg.     |
| 60 geographical miles  | " 1 degree,             | " deg.     |
| 360 degrees            | " 1 circle,             | " cir.     |

## ORAL EXERCISES.

1. How many barley corns in an inch? in 3 inches? in 10 inches? in 20 inches?
2. How many inches in a foot? in 4 ft.? in 6 ft.? in 9 ft.? in 15 ft.?
3. How many feet in 36 inches? in 48 inches? in 72 inches? in 96 inches?
4. How many feet in a yard? in 3 yds.? in 5 yds.? in 8 yds.? in 12 yds.?
5. How many yards in 18 ft.? in 24 ft.? in 57 ft.? in 63 ft.?
6. How many feet and inches in 26 inches? in 39 in.? in 56 in.? in 75 in.?
7. How many yards and feet in 14 feet? in 29 ft.? in 49 ft.? in 62 ft.?
8. How many furlongs in 12 miles? leagues in 21 miles? degrees in 360 geographical miles?
9. How many rods in 2 miles? in 3 leagues? in 15 furlongs? in 1 mile and 4 furlongs?
10. How many feet in 15 yds. 2 ft.? inches in 8 ft. 10 in.?

## SQUARE MEASURE.

This measure is used for measuring all kinds of surfaces, such as land, boards, plastering, and every thing else in which length and breadth only are considered.

Its denominations are square miles, acres, roods, square rods or poles, square yards, square feet, and square inches.

|                               |      |                   |        |         |
|-------------------------------|------|-------------------|--------|---------|
| 144 square inches             | make | 1 square foot,    | marked | sq. ft. |
| 9 square feet                 | "    | 1 square yard,    | "      | sq. yd. |
| $30\frac{1}{2}$ square yards, | "    | 1 sq. rod or pole | "      | P.      |
| 40 sq. rds. or poles          | "    | 1 rood,           | "      | R.      |
| 4 roods                       | "    | 1 acre,           | "      | A.      |
| 640 acres                     | "    | 1 square mile,    | "      | Sq. M.  |

## ORAL EXERCISES.

1. How many sq. in. in a sq. ft. ? in 4 sq. ft. ? in 6 sq. ft. ? in 8 sq. ft. ?
2. How many sq. ft. in 288 sq. in. ? in 720 sq. in. ? in 1008 sq. in. ?
3. How many sq. in. in 2 sq. ft. 12 sq. in. ? in 5 sq. ft. 80 sq. in. ?
4. How many sq. ft. in a sq. yd. ? in 12 sq. yds. ? in 20 sq. yds. ?
5. How many sq. yds. in 36 sq. ft. ? in 72 sq. ft. ? in 99 sq. ft. ?
6. How many sq. ft. in 4 sq. yds. 7 sq. ft. ? in 7 sq. yds. 8 sq. ft. ?
7. How many sq. yds. in 5 sq. rds. ? in 7 sq. rds. ? in 10 sq. rds. ?
8. How many sq. rds. in 3 acres ? in 6 roods ? in 5 acres ?
9. How many acres in 2 sq. m. ? sq. yds. in 81 sq. ft. ? sq. rds. in 5 roods ?
10. How many sq. ft. in 5 sq. yds. 4 sq. ft. ? acres in 640 sq. rds. ? sq. ft. in 720 sq. in. ?

## SURVEYORS' MEASURE.

The Surveyor's or Gunter's chain is generally used in surveying land. It is 4 poles, or 66 feet, in length, and is divided into 100 links.

|      |                     |                  |            |
|------|---------------------|------------------|------------|
| 7 92 | 100 inches, in.,    | make 1 link,     | marked li. |
| 25   | links               | " 1 rod or pole, | " P.       |
| 4    | poles, or 100 links | " 1 chain,       | " cha.     |
| 10   | chains              | " 1 furlong      | " fur.     |
| 8    | fur. or 80 chains   | " 1 mile         | " M.       |
| 10   | square chains       | " 1 acre,        | " A.       |

## ORAL EXERCISES.

1. How many links in a rod ? in 4 rds. ? in 8 rods ? in 10 rds. ?
2. How many poles in a chain ? in 3 chains ? in 5 chains ? in 20 chains ?
3. How many chains in a furlong ? in 4 furlongs ? in 15 furlongs ?
4. How many furlongs in a mile ? in 12 miles ? in 20 miles ? in 30 miles ?
5. How many square chains in an acre ? in 7 acres ? in 12 acres ?
6. How many acres in 120 square chains ? in 150 square chains ? in 200<sup>+</sup> square chains ?
7. How many links in 2 furlongs ? chains in 2 acres ? poles in one furlong ?
8. How many chains in 5 furlongs and 6 chains ? in 7 furlongs and 8 chains ?
9. How many acres and chains in 37 square chains ? in 86 square chains ?
10. How many poles in 2 chains and 3 poles ? in 6 chains and 2 poles ?

## SOLID OR CUBIC MEASURE.

This is used for measuring solids, that is, things that have three dimensions, viz., length, breadth and depth or thickness; as wood, timber, stone, masonry, etc.

|                               |      |                 |         |
|-------------------------------|------|-----------------|---------|
| 1728 cubic inches, c. in.     | make | 1 cubic foot,   | cu. ft. |
| 27 cubic feet                 | "    | 1 cubic yard,   | cu. yd. |
| 40 cubic feet round timber    | "    | 1 ton,          | T.      |
| 42 cubic feet of shipping     | "    | 1 ton,          | T.      |
| 50 cubic feet hewn timber     | "    | 1 ton,          | T.      |
| 16 cubic feet                 | "    | 1 cord foot,    | c. ft.  |
| 8 cord feet or 128 cubic ft., | "    | 1 cord of wood, | C.      |

## ORAL EXERCISES.

1. How many cubic inches in a cubic foot? in 2 cu. ft.? in 3 cu. ft.?
2. How many cu. ft. in a cu. yd.? in 3 cu. yds.? in 10 cu. yds.?
3. How many cu. ft. in 2 cord feet? in 10 cords of wood?
4. How many cubic feet hewn timber in a ton? in 3 tons? in 4 tons?
5. How many cu. ft. of round timber in a ton? in 5 tons? in 6 tons?
6. How many cord feet in a cord of wood? in 3 cords? in 12 cords?
7. How many cu. ft. of shipping in a ton? in 2 tons? in 4 tons?
8. How many cord feet in 48 cu. ft.? in 64 cu. ft.? in 96 cu. ft.?
9. How many cu. yds. and cu. ft. in 63 cu. ft.? in 85 cu. ft.?
10. How many cords of wood in 256 cu. ft.? in 56 cu. ft.?

DRY MEASURE.

This is used in measuring all dry articles, such as grain, fruit, salt, coal, etc.

The denominations are loads, quarters, chaldrons, bushels, pecks, quarts, and pints.

|               |               |        |       |
|---------------|---------------|--------|-------|
| 2 pints, pt., | make 1 quart, | marked | qt.   |
| 4 quarts      | " 1 gallon,   | "      | gal.  |
| 8 quarts      | " 1 peck,     | "      | pk.   |
| 4 pecks       | " 1 bushel,   | "      | bu.   |
| 36 bushels    | " 1 chaldron, | "      | ch.   |
| 8 bushels     | " 1 quarter,  | "      | qr.   |
| 5 quarters    | " 1 load,     | "      | load. |

The standard bushel of the United States is the Winchester bushel of England. It is a circular measure  $18\frac{1}{2}$  inches in diameter and 8 inches deep, and contains 2150.4 cubic inches nearly. It contains 77.6274 pounds avoirdupois of distilled water.

ORAL EXERCISES.

1. How many pints in a quart ? quarts in a gallon ? pecks in a bushel ?
2. How many gallons in 16 quarts ? bushels in 32 pecks ? pecks in 56 quarts ?
3. How many quarters in 24 bushels ? in 72 bushels ? in 80 bushels ?
4. How many loads in 25 quarters ? in 40 quarters ? in 60 quarters ?
5. How many quarts in a bushel ? in 2 bu. ? in 3 bu. ? in 6 bu. ?
6. How many pks. and qts. in 42 qts. ? in 27 qts. ? in 50 qts. ? in 37 qts. ?
7. How many pints in a peck ? in 4 pks. ? in 6 pks. ? in 12 pks. ? in 10 pks. ?
8. How many quarts and pints in 17 pints ? in 21 pts. ? in 39 pts. ? in 43 pts. ?
9. How many gallons in 16 pints ? in 48 pints ? in 64 pts. ? in 72 pts. ? in 80 pts. ?
10. How many quarters in 10 loads and 3 quarters ? in 16 loads and 2 quarters ? in 20 loads and 1 quarter ?

## CIRCULAR MEASURE.

Circular Measure is applied to the divisions of the circle, and is used in reckoning latitude and longitude and the motion of the heavenly bodies. It is often called Angular Measure, and is chiefly used by astronomers, navigators, and surveyors. Its denominations are circles, signs, degrees, minutes, and seconds.

|                     |                |           |
|---------------------|----------------|-----------|
| 60 seconds,"        | make 1 minute, | marked '. |
| 60 minutes          | " 1 degree,    | " °.      |
| 30 degrees          | " 1 sign,      | " s.      |
| 12 signs, or 360°," | 1 circle,      | " c.      |

## ORAL EXERCISES.

1. How many seconds in a minute? in 3'? in 4'? in 6'?
2. How many minutes in 120 seconds? in 240"? in 360"? in 600"?
3. How many minutes and seconds in 245 seconds? in 195"? in 370"?
4. How many minutes in a degree? in 4°? in 8°? in 10°?
5. How many degrees in 300 minutes? in 420'? in 480'?
6. How many minutes in 5 degrees and 20 minutes? in 4° 15'? in 6° 35'?
7. How many degrees in a sign? in 4 s.? in 6 s.? in 9 s.? in 12 s.?
8. How many signs in 150 degrees? in 270°? in 540°? in 90°?
9. How many signs in a circle? in 6 c.? in 10 c.? in 16 c.? in 30 c.?
10. How many circles and signs in 26 signs? in 73 s.? in 63 s.? in 74 s.?

## DISTANCE—DEPTHS—HEIGHTS.

|          |                                                         |
|----------|---------------------------------------------------------|
| 4 inches | make 1 hand, used for measuring the height of horses.   |
| 6 points | “ 1 line, for measuring length of pendulums for clocks. |
| 12 lines | “ 1 inch, “ “ “ “ “ “ “                                 |
| 5 feet   | “ 1 geometrical pace, used for measuring distances.     |
| 6 feet   | “ 1 fathom, for measuring depths at sea.                |
| 3 miles  | “ 1 league, for measuring distances at sea.             |

## ORAL EXERCISES.

1. How many inches in a hand? in 3 hands? in 8 hands? in 10 hands? in 20 hands?
2. How many points in a line? in 5 lines? in 15 lines? in 25 lines?
3. How many feet in a pace? in 8 paces? in 30 paces? in 10 paces? in 21 paces?
4. How many feet in a fathom? in 12 fathoms? in 20 fathoms? in 50 fathoms?
5. How many miles in a league? in 5 leagues? in 8 leagues? in 15 leagues? in 30 leagues?
6. How many lines in 24 points? in 18 points? in 48 points? in 30 points?
7. How many fathoms in 36 feet? in 66 feet? in 47 feet? in 108 feet?
8. How many paces in 35 feet? in 60 feet? in 75 feet? in 90 feet?
9. How many inches and lines in 47 lines? in 65 lines? in 78 lines? in 17 lines?
10. How many leagues and miles in 22 miles? in 34 miles? in 58 miles?

## TIME.

This is reckoned by centuries, years, months, weeks, days, hours, minutes, and seconds.

|                       |                          |
|-----------------------|--------------------------|
| 60 seconds, sec.      | make 1 minute, marked m. |
| 60 minutes            | “ 1 hour, “ h.           |
| 24 hours              | “ 1 day, “ d.            |
| 365 days              | “ 1 year, “ Y.           |
| 7 days                | “ 1 week, “ w.           |
| 4 weeks (com. reck'g) | “ 1 month, “ mo.         |
| 52 weeks “ “          | “ 1 year, “ Y.           |
| 30 days “ “           | “ 1 month, “ mo.         |
| 12 months             | “ 1 year, “ Y.           |
| 100 years             | “ 1 century, “ C.        |

The following are the numbers of days in each month :

|                    |                     |
|--------------------|---------------------|
| January, 31 days.  | July, 31 days.      |
| February, 28 days. | August, 31 days.    |
| March, 31 days.    | September, 30 days. |
| April, 30 days.    | October, 31 days.   |
| May, 31 days.      | November, 30 days.  |
| June, 30 days.     | December, 31 days.  |

The days in each month are often expressed thus :—

Thirty days hath September, April, June, and November.  
 February hath twenty-eight, and thirty-one the others rate,  
 Except in leap-year, happening once in four,  
 When we give to February one day more.

\ A natural day has 24 hours.

A Lunar month has 4 weeks, or 28 days.

A Solar year has 365 days, 5 hours, 48 minutes, 48 seconds, nearly.

A Civil year has 12 calendar months, or 365 days.

A Julian year has 13 lunar months, 1 day, 9 hours, or  $365\frac{1}{4}$  days.

## ORAL EXERCISES.

1. How many seconds in a minute ? in 2 min. ? in 4 min. ? in 8 min ? in 10 min. ?

2. How many minutes in 360 seconds ? in 120 seconds ? in 240 seconds ? in 720 sec. ?

3. How many seconds in 4 minutes and 12 seconds ? in 3 min. 15 sec. ?

4. How many noturs in 120 minutes? in 360 minutes? in 420 min.?
5. How many minutes in 3 hours? in 5 hrs.? in 8 hrs.? in 12 hrs.? in 30 hrs.?
6. How many hours in a day? in 3 ds.? in 6 ds.? in 9 ds.? in 12 ds.?
7. How many days in 3 weeks? months in 5 years? years in 3 centuries?
8. How many days in May? in August? in March? in January? in June?
9. How many years and months in 15 mos.? in 29 mos.? in 68 mos.? in 42 mos.?
10. How many weeks and days in 25 days? in 34 days? in 69 days?

BOOKS AND PAPER.

The terms folio, quarto, octavo, duodecimo, etc., indicate the number of leaves in which a sheet of paper is folded.

A sheet folded in two leaves is called a folio.

|   |   |             |   |                 |
|---|---|-------------|---|-----------------|
| " | " | four        | " | quarto, or 4to. |
| " | " | eight       | " | octavo, or 8vo. |
| " | " | twelve      | " | a 12mo          |
| " | " | sixteen     | " | a 16mo.)        |
| " | " | eighteen    | " | an 18mo         |
| " | " | twenty-four | " | is a 24mo.      |
| " | " | thirty-two  | " | a 32mo.         |

24 sheets of paper make 1 quire.

20 quires " " 1 ream.

2 reams " " 1 bundle.

5 bundles " " 1 bale.

ORAL EXERCISES.

1. How many sheets of paper in a quire? in 2 quires? in 4 quires? in 6 quires?

2. How many quires in a ream ? in 3 reams ? in 6 reams ? in 10 reams ?
3. How many quires and sheets in 30 sheets ? in 20 sheets ? in 80 sheets ?
4. How many reams and quires in 28 quires ? in 44 quires ? in 72 quires ?
5. How many reams in a bundle ? in 5 bundles ? in 8 bundles ? in 20 bundles ?
6. How many bundles in a bale ? in 7 bales ? in 9 bales ? in 25 bales ?
7. How many bundles and reams in 9 reams ? in 15 reams ? in 37 reams ?
8. How many bales and bundles in 19 bundles ? in 32 bundles ? in 53 bundles ?
9. How many quires in 2 bales ? sheets in 2<sup>1</sup>/<sub>2</sub> reams ? quires in 4 bundles ?
10. How many bundles, reams, and quires in 63 quires ? in 189 quires ?

### MISCELLANEOUS TABLE.

|                                       |      |                        |
|---------------------------------------|------|------------------------|

| July               | 184             | 215  | 243  | 274  | 304 | 335  | 365  | 31   | 62    | 92   | 123  | 153  |
| August             | 153             | 184  | 212  | 243  | 273 | 304  | 334  | 365  | 31    | 62   | 92   | 122  |
| September          | 122             | 153  | 181  | 212  | 242 | 273  | 303  | 334  | 365   | 30   | 61   | 91   |
| October            | 92              | 123  | 151  | 182  | 212 | 243  | 273  | 304  | 335   | 365  | 31   | 61   |
| November           | 61              | 92   | 120  | 151  | 181 | 212  | 242  | 273  | 304   | 334  | 365  | 30   |
| December           | 31              | 62   | 90   | 121  | 151 | 182  | 212  | 243  | 274   | 304  | 335  | 365  |

*RULE for finding the number of days between any given periods by table on opposite page.*

Find the first given month on the horizontal line in the left-hand column, and the other given month in the line at the top of the table, and to the number of days found at the intersection of the two lines add the difference between the days mentioned in the two given months.

*NOTE.*—It must be observed, however, that when the number of days given in the first mentioned month is greater than the given number of days in the second month, then the difference of days must be subtracted from the number found at the intersection of the lines.

**Example 1.**—How many days from March 16th to the 24th of the next July ?

The number of days at the intersection of the lines is 122, and  $24 - 16 = 8$ , the difference of days in the two given months.

Hence,  $122 + 8 = 130$  days.

**EXAMPLE 2.**—How many days from the 25th of June to the 18th of the next April ?

The number of days at the intersection of the lines is 304, and  $25 - 18 = 7$ , the difference of days of the given month.

Hence,  $304 - 7 = 297$  days.

3. How many days from May 15th to the 22d. of the next September ?

4. How many days from August 6th. to the 18th. of the next October ?

5. How many days from January 10th to the 14th of the next July ?

|          |     |     |
|----------|-----|-----|
| 61       | 304 | 365 |
| 51       | 334 | 385 |
| 50       | 304 | 364 |
| 50       | 304 | 364 |
| 41       | 273 | 333 |
| 41       | 243 | 303 |
| 42       | 242 | 302 |
| 42       | 212 | 272 |
| 212      | 182 | 152 |
| 181      | 151 | 121 |
| 151      | 121 | 91  |
| 120      | 90  | 60  |
| 92       | 62  | 32  |
| 61       | 31  |     |
| November |     |     |
| December |     |     |

## WRITTEN EXERCISES.

1. How many pencils in a box containing 2 great gross?  
*Ans.* 1728 pencils.
2. What cost 27 boxes of writing ink, each  $2\frac{1}{2}$  dozen bottles at 9 cents a bottle?  
*Ans.* \$72.90.
3. How many reams of paper in 4678 sheets?  
*Ans.* 9 reams, 15 quires, 18 sheets
4. What will 7 reams of legal cap cost at 35 cents a quire?  
*Ans.* \$49.
5. What cost 9 boxes of fancy pen-holders each containing  $\frac{1}{2}$  gross, at  $2\frac{1}{2}$  cents a piece?  
*Ans.* \$16.20.
6. What cost 2 oz. of gold, if 3 dwt. cost \$2.70.
7. What will 2 quarts of kerosene cost at 40 cents a gallon?
8. What will 3 quarts of tomatoes cost at \$1.20 a bushel?
9. How many feet high is a horse 16 hands high?
10. What is the difference between two square feet and two feet square?
11. At 8 cents a peck, how many bushels of apples can be bought for \$6.00?
12. If 25 lbs. of flour cost \$1.25, what will 2 cwt. cost?
13. How many half-pint bottles may be filled from  $2\frac{1}{2}$  gallon of wine?
14. What will 7 quires of paper cost at \$3.20 a ream?
15. What will 8 eggs cost at 18 cents a dozen?
16. If 6 oz. of tea cost 36 cents, what will 3 lbs. cost?
17. What will a gallon of molasses cost at 5 cents a pint?
18. At 8 shillings a pair, how many pairs of shoes can be purchased for 2 sovereigns?

19. At what price must  $\frac{1}{3}$  dozen of chairs, worth \$15.00 a dozen, be sold in order to gain 50 cents a piece?

20. How much will a peddler gain by selling 3 dozen combs worth 30 cents a dozen, at 5 cents a piece?

21. What will  $\frac{5}{8}$  of a lb. of candy cost at 2 cents an oz.?

22. How many tablespoons each weighing 2 oz. can be made from 1 lb. 8 oz. of silver?

23. How many leap years in a century?

24. How many pills of 5 grains each can be made from  $\frac{1}{2}$  an ounce of quinine?

25. If a gallon of wine cost \$5.00, what will 3 pts. cost?

26. What will it cost to paint a ceiling 12 ft. by 29 ft., at 25 cents a square yard?

27. How many yards of carpeting, a yard wide, will cover a floor 20 ft. long and 21 ft. wide?

28. How many quarts of milk will a boy drink in a week, if he drink a pint a day?

29. What is the weight in tons, &c. of 3 loads of potatoes, averaging 22 bu. each; 1 load of wheat, 19 bu.; and 4 loads of oats, each 25 bu. ? *Ans. 4t. 3cwt.*

30. What will it cost to ship 75 t. 8 cwt. 70 lbs. of freight at 6 cents a pound? *Ans. \$9052.20.*

31. How many farms of 75 acres each in a tract of land 6 miles long and 5 miles wide? *Ans. 256 farms.*

32. What is the height in feet of a horse 17 $\frac{1}{2}$  hands high? *Ans. 5 ft. 10 in.*
