SONG OF THE GREEK AMAZON. BY W. C. BRYANT.

Vol. I.-No. 120.]

I backle to my slender side The pistol and the seimetar, And in my mainen flowers and pride Are come to share the tasks of war. And yonder stands my fiery steed, That paws the ground, and neights to **go**, My charger is of the Arab hreed-I took him from the routed foe.

My mirror is the mountain spring, At which I dress my ruffled hair; My dimused and duty arrays is bring, And wash away the blood-stain there Why should I quard frow wind and sur This check, whose virgin rose is ded I It was for one---bt only one--I kept its bloom, and he is dead.

But they who slew him-unawar Of coward murderers lurking nigh-

And reit mill to the towns of air, Are yet alive—and they must die. They slew him ; and my virgin years Are vowed to Greece and vengeance now, And many an Otham dame, in tears, Shall rue the Greecian maiden's vow !

Itouched the lute in better days, I ted in dance the joyous band ; Ab they may move to mithful i hys Whose hand can touch a lower's hand, The march of hosts that late to uncet Seems gayer than the dance to me, The lute's weet tones are not so sweet As the deree shouts of victor j.

#### (From the New-York Herald.) THE VIRGIN QUEEN OF ENGLAND-

LITTLE NAPOLEON IN PETITCOATS.

Why is it that in this republican country— this pure democracy—this great locofoco hive why is it, that every body, man and woman, takes such an interest in the younr, spotless, fair, interesting virgin Queen of England ! There is more interest felt about her move ments--and more enthusiasm created about her

ments—and more entlusiasm created about her fate—than for all the sovereigns that God ever made out of old leather and punella. Young and old—locofoco and consevative—democrat and federalist—read, and talk, and speculate, on Encland's maiden Queen. Why is its of At the last accounts, she was at Windsor Castle, enjoying the hewitching scenery of that delightful spot. Windsor Castle, if it had a little American sunshine—if a pure american atmosphere hung over it—would be one of the sweetest spots in Europe. With the fost, and mists, and showers, and cloudy weather of England, his even a lovely place. This re-

On one occasion, the halies of her suite were over-heard by, discussing, in whispers, the probability of her marriage. "Ladies," said she—"it is all very natural for you to talk of that event-but, I can assure yon, that your thoughts are all in advance of mine." After -pause, during which the "pale cast of thought " gave its hue to her fair check, she added, with a sigh—" if I were married to-morrow, every error of my government would be laid to my charge, and my husband "—but here she sopt in mid career, and instantly changed the conversation.

Her spirits is also proud and imperious, at the same time that she has much good feeling and depth of reflection. In the garden attach-ed to Buckingham Palace, one day she order-ed the Lady in Waiting to bring her a shavy. The Lady in Waiting colded to see at the take place again."

tak: [hee again." The personal influence of the young queen is increasing as her energy and talents are un-folded. She sets from strong and natural im-pulses. There is, to be sure, a little of the young woman in them, but still they are be-coming. She believes the old to iss to be her person d foes, and never hesitates in express her feelings. To the Duchess of Northum-berland site said one day—44 know you are my enemy, but yet 1 love you." Melbourne and Palmeiston are both great personal favoand Palmeiston are both great personal favo-rite with the Queen. They are very attentive to her little whims, and with polished mannets, The wint the Queen. They are very attentive to ber little whins, and with polished manners, she is much captivited. She has a very high regard for the Dake of Wellington, and never takes any important step without seeing him. The Queen of England, from her character, her youth, her power, occupies a more impor-tant position in the England alone does she excite enthusissm—throughout Europe and America, there is an intense feeling of in-terest felt for her position and destiny. In En-gland, she is the idol of the mob—the divinity of the masses. Wherever I went, I could see this. In this republican council interest, though of a nore refined and poetical character. In England, puty and faction mix with the sen-timed-here it is a pure abstraction—a vision of the imagination—a throb of the heart alone. How comes it to be so? How can it be

of the imagination --- a though the statistical theory of the heart alone. How comes it to be so? How can it be explained philosophically? Very easily. In the classic age of Greece, the brilliant fancy and refined feelings of that wonderful people, clothed every power of matter and of mind with the attributes of humanity. Wisdom was represented as a young woman with classical features, starting from the head of Juno-Love was pictured forth as another, b-autiful, enchanting, and luscious-rising from the waves that flows gently around the rock of Salamis--the Graces walked over the Naiada reclined on the flowery vales, or laved their naked beauties in the limpid streams. Political power has been heretofore held by woman, but aver, in the history of the world,

finterspersed with the gory chargers which had carried Albion's Chiltrairy. Here the heavy fragoon, with "Erinis" badga upon his hel-met, was grappled in dea" with the Polisin hel-met, was grappled in dea" with the Polisin hel-lancer ! Could the melancholy appearance of the field of death be heightened, it would be by winnessing the researches of the living, amilities there sting in the listory of empires, that such a field of death be heightened, it would be by winnessing the researches of the living, amilities the such and bright of the objects of its love 1-Mothers, and wives, and children, were for the singular and poetical juncture in human and poetical juncture in human and a fame, that is perfectly unique. If the contastion of the compass, friend and look inter-mingled as they were, often rendered the affection of the surface of the earth ! How much have been enacted on the surface of the earth ! How much have been enacted to the surface of the earth ! How much have been enacted to the surface of the earth ! How much have been enacted to the surface of the earth ! How much have been enacted to the surface of the earth ! How much have been enacted to the surface of the earth ! How much have been enacted to the surface of the earth ! How much have been enacted to the surface of the earth ! How much have been enacted to the surface of the earth ! How much have been enacted to the surface of the earth ! How much have been enacted to the surface of the earth ! How much have been enacted to the surface of the earth ! How much have been enacted by, discussing, in whispers, suit show -eff the chart is, short ceth this, high the heek by discussing, in whispers, suit show -eff the earth ! How much have been enacted by discussing, in whispers, suit and enace which that is a live rest to the suit were is anow the towe theney the earth is a during id dimpled cheeks of fair Victoria.

These are not idle fancies. We do verily clieve, that the Virgin Gacen of England is lestined to be one of the most extraordinary characters of the present age, or any century. She is a little Napoleon in peticonts—as do-termined, as lofty, as generous, as original as he was. Wait and see.

### MISCELLANEOUS EXTRACTS.

TYPE STICKERS.—We casually mentioned a day or two ago that the newly elected Mayor of Baltimore was a s<sup>1</sup> ort time since a journey-man printer. And what is of more consequence, in the editorial profes-sion, some of the most distinguished were bred in the crait. Our neighbour Greene, the po-pular editor of the Morning Post, was once a ragged little roller boy. Mr. Homer of the Gazette, was brought up on pica and breinz. We recollect, many years since, of secing a two-headed, overgrown boy, in an obscure pinting office in Vermont. That boy is now Mr. Greely, the talented editor of the New Yorker. Of equally obscure origin was the editor of the New York Spirit of the Times, Mr. William T. The truth is, if a boy has gr-nius, the art of printing will draw it out and set it to work. Printers, with the same amount of natural talent, always make the most popular editors, because they imbibe the tact of the profession. Schooled, among "types and shadows," they have every oppor-truity of studying public testes, and of diversi-fying their minds so as to meet the values wants of their various readers. The disci-pline of their minds may not be so severe and rigid as that required for eminence in the le-gal profession ; but this is a peculiarity which

The New MEXICAS MINISTER.—Mr. Pak-enham sailed in the *Popue* frigate from Daven-port, on Sunday, the 20th ult. The *Popue* was to proceed to Halifax, and thence to Mexi-co. The British Government had actuated Sir Chalaes Paper to nacceed with a nava Sir Chailes Paget to proceed with a naval force from the St. Lawrence to the coast of Mexico, to render any protection to British interests that circumstances might require.

A terrible explosion had taken place in a conjpit at Lowca, near Whitehaven, by which forty of the workanen were killed. Two men forty of the workmen were killed. Two men and two boys were blewn out of the mouth of the pit, like bullets from a gun. Three of them were not killed, although severely wounded, but the fourth fell back again down the shart, and was dashed to pieces. Thirty four of the mon, who were at the bottom, were found crushed together in a mass, horibly disfigured.

The Liverpool took her departure from Liverpool on the 20th, but after making 950 miles against extremely tempestuous weather, she put back on the 25th, on account of the great consumption of coal, which caused apprehen-sions that her stock would fail. The result was that she put into Cork on the cighth day.

## BALDNESS.

A BEAUTIFUL HEAD OF HAIR is the A BEAUTIFUL HEAD OF HARK'S to grandest ornament belonging to the hu-man frame. How strangely the loss of it changes the countenance, and prematurely brings on the appearance of old age, which causes many to recoil at being uncovered, and sometimes even shun society to avoid the jests and sneers of their acquaintances; the remainsometimes even shun society to avoid the jests and sneers of their acquaintances the remain-der of their lives consequently spent in retire-ment. In short, not even the loss of property fills the generous thinking youth, with that heavy sinking gloom as does the loss of his hait.—To avert all these unpleasant circum-stances, OLDRIDGE'S BALM OF COLUMstances, OLDRIDGE'S BALM OF COLUM-BIA stops the hair from falling off on the first application and a few bettles restores it again. It likewise produces eyebrows and whiskens; prevents the hair from turning gray, makes it curl beautifully, and frees it from scurf. Nu-merous certificates of the first respectability in support of the virtues of Oldridge's Balna are shown by the proprietors.

MORISON'S UNIVERSAL MEDICINE

NOTICE. THE Subscribers, general agents for Mo-rison's Pills, have appointed William Whitaker, Sub-Agent for the Upper Town, No. 27, St. John Street. LEGGE & CO.

LEGGE & CO. That the public may be able to form some idea of Monson's Pills by their great con-sumption, the following calculation was made by Mr. Wing, Clerk to the Stamp Office, Somerset House, in a period of six years, part only of the time that Monison's Pills have been before the public, the tamber of stamps delifered for that medicine amounted to three million, nine hunded and one thon. to three million, nine hundred and one thou. sand.

The object in placing the foregoing power ful argument in favour of Mr. Morison's system, and to which the public attention is directed, namely, that it was only by trying ful encieta, handley, that was only by dying fan innoctans purgative medicine to such an extend that the truth of the Hygcian sys-tem could possibly have been established. It is clear that all the medical men in Eagland, or the world, put together, have tried asystem of vegetable purgation to extend and in manner prescribed by the Hy-geists. How, therefore, can they (much less individually) know any thing about the exten of its properties.

Every thing has two distinct principles to its nature ; one

THE PRINCIPLE OF LIFE

THE PRINCIPLE OF DEATH.

So long as the principal of Life predomit es, Health is enjoyed. When the princip ates, Health is enjoyed. When the principle of Death, Sickness takes place. How is this ounted for ?

By the principle of Death, I mean the principle of decomposition or decay, which is each hour going on in the human frame from the hour of birth, to that of our final exit. While the ratural outlets-the pores-the bowels-and all other directories of the body. discharge these decayed particles as fast as they are generated, we are in a state of health; we are free from the presence of the

And should the cause which pro-duces this state of the body remain, and nothing be done to drive the accumulated and accuing be done to drive the accumulation of the body, the prin-ciple of death or decomposition, will become paramount, and the last glimmering of life de-

Does it arise from internal or external cause.—I still say purge — For know this self-evident truth, that pain cannot exist, save by the pre-sence of some impurity—some deposite of decomposed particles upon the organ or part where the particles upon the organ or part where the particles upon the organ or part where the particles are also be back and con-tinuing the practice daily will cure every complication of discase; and will prevent any one from becoming serior... yi indisposed; even complication of di-case; and will prevent any one from becoming serior.ly indisposed; even when in constant contact with the most ma-lignant fevers which cannot by possibility se-tionsly affect the body, if we are continually careful to preserve it in a pure state, by fre-quent and effectual purgation. *Hippocrates* avs, " Purgation expulses what must be ex d, and patients find relief; if, on th d, and pulsed, and patients and relief; if, on the contrary, they are tormented by purgation, it is a proof there are yet matters which must be expulsed." xpule

The subscriber of this has resided in every ariety of simate, and by always purging variety of refenate, and by atways propor-onthe first appostance of sickness, has enjoy-ed for the last ten years, indicating the health For we may call such the stars of him who is never sick more than 6 or 8 hours, about the never sick more than 6 or 8 hours, about the ime it takes to secure the effect of is my tive. The purgative I make use the star tain knowledge, the most judiciously balanced purge in existence. I have used them for 8 months daily, in does of from 2 to 16 pills per day, to satisfy myself as to their innocence. It therefore, cannot be doubted. It is my opinion, that any person, he he ever so pros-trated by disease, provided he is capable of taking exercise at all, my lengthen his life to 60 years, by continuing to assist his natural variety chimate, and by always purging appearance of sickness, has enjoyattent AR Laking exercise at all, may lengthen his life to 60 years, by continuing to assist his natural functions with the BRANDETH VEGETA.
