TORN TO PIECES BY A BEAR.

The Fate of a Boy Hunter on the Border of the Mojave Desert.

From The San Francisco Chronicle.

A thrilling story of an encounter with a bear, a boy hunter's life, comes from Gorman's Station, 60 miles southwest of Bakerfield, in the mountains on the border of the Mojave Desert.

Two boys, whose names are not given, left Gorman's Station one morning recently for a day's hunting. While traveling along the foothills in their search for game they came suddenly upon a large grizzly bear.

Acting upon the impulse of the moment, both raised their guns and fired. The shots were well aimed, but were only effective in inflicting the bear's side.

One lad, dropping his gun, succeeded in reaching another who was safe from attack, he was compelled to witness the awful sight of his comrade's death.

One lad, dropping his gun, succeeded in reaching another who was safe from attack, he was compelled to witness the awful sight of his comrade's death.

TRADE IN CANADA.

Further Advances in Prices of Several Lines of Merchandise.

From Dun's Daily Bulletin. Most commodities do not indicate any special change in the trade situation since a week ago.

For raw wool there is a better demand, stimulated by the strong conditions in wool and fine sales have been effected at some little advance.

Fine grades of butter are more active at better prices, but cheese does not advance. Owing to the continued upward move of the raw cotton market, mill agents have again issued notices to the wholesale dry goods trade.

Further advance in shirtings, tickings, denim, flannels, ginghams, cottons, adzes, carpet warp, etc. Some of the woolen mills also announce an advance in tweeds and shawls.

The condition of the wholesale trade at Toronto is somewhat improved. In many lines of business there is an increase in the number of orders received, and the general feeling is one of confidence.

Prices of the leading staples are very strong. The notable change this week has been in the advance in sugars, which is thought to be legitimate, and which has stimulated the demand for sugar, selling at 10 1/2-11-12c, and yellows at 3-3 1/2c.

The retail market is with a few exceptions fairly satisfactory. Galvanized iron is higher and the general trend in prices seems to be in that direction.

The higher prices for cotton goods mentioned last week are fully maintained. The demand for these goods for wheat from millers and prices are relatively firm at 85c to 86c on the Grand Trunk Railway.

The number of failures in Canada this year according to R. G. Dun & Co. were 22, as compared with 21 last year and 20 the corresponding week of last year.

The production of wheat in the United States this year according to October report is 125 bushels to the acre, and the condition is placed at 85 per cent. Corn condition is 85.5 per cent.

THE IRON TRADE.

Over a Hundred Thousand Tons of Rails for 1926 Delivered.

Cleveland, Oct. 10.—The Iron Trade Review today says that the iron trade has spent another week in the effort to find its proper level, and as in every such period the market has been active, prices have settled.

Though it were certain that the checking of the advance was due in part to a bear campaign, whose influence was expected to reach into the buying market, it is plain that deeper forces will decide what the outcome is to be.

One of the main factors of the iron trade is the production of iron, which is expected to bring the western roads into line. The amount of Bessemer pig located in the hands of millers is estimated at 1,000 to 1,400,000 tons of rails for 1926.

The amount of Bessemer pig located in the hands of millers is estimated at 1,000 to 1,400,000 tons of rails for 1926. The amount of Bessemer pig located in the hands of millers is estimated at 1,000 to 1,400,000 tons of rails for 1926.
