PUMPKIN PIE.
DECORATE for the Fair.
THANKSGIVING DAY, Monday.
MEN'S fine tailoring at SWIFT'S.
EAST LAMBTON TEACHERS are in convention at Petrolia today.
ALL accounts due T. DODDS & SON must be paid as soon as possible.
FORD size guaranteed tires at \$17.00 up.
—RAY MORNINGSTAR.

EVERYBODY come to the Daughters of the Empire Dance in the Armory Fair Night.

AN Ohio girl who is unable to speak above a whisper, has had forty-seven offers of marriage.

D. W. GRIFFITH'S latest photoplay "The Great Love" will be presented at the Lyceum on Saturday, Oct. 18th.

SCHOOL PRINCIPALS are asked by the Minister of Education to aid in publicity work for the coming Victory Loan.

WITH the exception of Petrolia all the neighborhood fairs have been favored with fine weather and large crowds.

PEOPLE who are looking for trouble are fortunate in one respect at least—they seldom meet with disappointment.

THE Watford Council will pay for the things presented to returned soldiers, but will not give any grant towards the memorial for our fallen heroes.

GET in your order for ladies' tailor-made suits at SWIFT'S.

You will not be disappointed if you attend the Fair Night Concert in the Lyceum. Two hours of entertainment. Concert will start at 8 o'clock sharp. Tickets at Taylor's Drug Store.

SEVERAL specimens of second growth raspberries have been brought to this office, the last one on Monday, Oct. 6th, by Reeve Johnston, some of the berries were quite ripe.

IF YOU FAIL to answer all four questions on the prohibition ballot you may as well not answer any. There must be four crosses on each ballot paper or it will be declared spoiled.

"Pack my box with five dozen liquor jugs" is the shortest sentence in the language containing all the letters of the alphabet. But now the fellow who does so is apt to draw one of the longest sentences on record.

A BOUNTY of twenty-five cents will be paid on the heads of all crows killed in St. Clair county, Mich., when the heads of the birds are brought to the office of the county clerk. A bounty of ten cents is also paid for rats.

THERE will be special services in the Methodist church next Sunday when the pastor, Rev. A. C. Tiffin will preach in the morning on "Intercessory prayer, its Place and Power" and in the evening on "The Referendum and its relation to Prohibition." Every person welcome.

SOME real bargains in used Ford and Chevrolet cars.—R. MORNINGSTAR, Watford Garage.

Rev. and Mrs. T. DeCourcy Rayner motored to Hamilton on Monday, where Mrs. Rayner is visiting her parents. Rev. Mr. Rayner motored on to Elcho, to attend the Western Ontario Congregational Association, where he is to deliver an address on "The Preacher's Message for the New Era."

THE Ailsa Craig Banner, of which Mr. J. W. Kedwell, publisher, has suspended publication on account of the hard times. Mr. Kedwell has been making a hard fight for the past year to keep the paper on a paying basis, but the high cost of paper, ink, help, etc., were too much and the paper had only one thing to do, and that was to suspend.

THE new Haws Hat, it's the best.—SWIFT'S.

ARRANGEMENTS have just been completed at Ottawa whereby ex-members of the Imperial force suffering recurrence of war disabilities may receive education, training, pay and allowances on the same conditions and at the same rate as ex-members of the Canadian expeditionary force.

"IF I COULD LIVE LIFE OVER" is a lecture that sums up, in wit and wisdom, the rich experiences of a most successful career. It will prove invaluable to the young, inspiring to those in middle life, and a rare treat for all. Col. Bain will give this lecture in Watford, Wednesday next, Oct. 15.

THE person who finds an article and retains it after it has been advertised for is in the eyes of the law, as well as of morals, as guilty as a person who commits a deliberate theft. Moreover, the person who does not make an effort to find the owner is dishonest. Keeping a thing you find, when the owner may be discovered is as bad as stealing it.

SAVE the money you are in the habit of spending on doctors and drugs, says the Toronto Telegram: If you are not feeling up to the mark, skip a meal. If that doesn't do it, skip the next meal also. If there's "nothing doing," double your stakes and skip the third meal. You will have results. The high cost of living should worry no one. Don't write to the papers, but skip a meal, and then another, and then one more.

You will save big money in fall goods buying at SWIFT'S.

ONE Chautauqua manager says: "Col. Bain was unanimously pronounced the best on the program, and we had the best in the land. He is the most successful lecturer I have ever had on my platform." Hear him at the Lyceum, Watford, on Oct. 15.

THE thrilling "Story of the First Thanksgiving Day" will be told by Rev. T. DeCourcy Rayner in the Congregational Church, Watford, on Sunday evening at 7 p.m. The morning topic will be "Does Prayer Change Things? You should hear these messages. Everybody welcome.

COME for Ladies' Coats—and don't delay. A big city store stock.—SWIFT'S.

COL. BAIN is the nestor of the lecture platform. His eloquence is such that he has been called the John B. Gough of today. Alton Packard says that "behind his silver tongue is a heart of gold, while his wit and wisdom are diamonds in their brilliancy." Will lecture in Watford on Oct. 15.

LOCAL MASONS spent an evening of profit and pleasure in their lodge room on Tuesday evening, the occasion being the official visit of Rt. Wor. Bro. J. D. Morrison, of Theford, D. D. G. M. of St. Clair district. Mr. Morrison was accompanied by several prominent Masons of that town and visitors were also present from Inwood, Forest, Arkona and other places. A candidate was raised to the third degree by W. Bro. Orlo Jacklin and officers the work being performed in an exceedingly creditable manner. After the close of the lodge about fifty of the brethren sat down to a tasty luncheon catered by Bro. Frank Lovell, and a pleasant hour was spent in speech and song.

LAMBTON'S 149, I.O.G.E., held the October meeting on Tuesday afternoon at the home of Mrs. F. Rogers, nineteen members and one guest being present. Arrangements for the dance to be held in the armory on Fair night were completed. An invitation to the I. O. G. E. Rally was read, also a letter from Mrs. Bruce, the new National President. Miss Saunders gave a very interesting talk on her work among the Belgians during the war. The musical numbers consisted of a duet and piano solo. At the close of the meeting luncheon was served. November meeting at the home of Miss Muriel Taylor.

VERY successful harvest thanksgiving services were held in Trinity church on Sunday last. The interior of the church was decorated with a profusion of flowers, fruits, etc., artistically arranged, and presented a very attractive appearance. At the morning service the rector, Rev. S. P. Irwin, preached a thanksgiving sermon to the children and holy communion was partaken of by over seventy of the congregation. At the evening service Rev. D. W. Collins, rector of the Church of the Ascension, Windsor, preached to the large congregation from Psalm 144, v. 10. The burden of his theme was the advancement of Christianity as a by-product of the war. The discourse was a learned and forceful one, replete with information, instruction and deep thought. The choir gave special music, two anthems "Fear Not, O Land," and "Praise Ye the Name of the Lord," being nicely rendered. A substantial offering was made to Huron College fund.

THE Guelph Mercury of Sept. 23rd, has the following account of the death of Mr. Colin Cameron, well-known in his uncle and the late Mr. and Mrs. James Armstrong, 10th con., and was here about a year ago.

"Rockwood lost a highly esteemed resident and Wellington County a well known citizen, in the death of Mr. Colin Cameron, who passed away after a short illness at his home in Rockwood on Sunday evening. Deceased was a native of Puntisburg, where he was born 71 years ago. In early life he was a school teacher by profession, and taught for several years at No. 5 and No. 9 schools in the Township of Nassagaweya. Mr. Cameron was married twice, his first wife being Miss Emmeline Ramsay, daughter of the late John Ramsay, of Eden Mills, who predeceased him eight years ago. He re-moved to Rockwood after the death of his wife, and six years ago was united in marriage to Miss Margaret Shultis, of Rockwood, who survives. Mr. Cameron took an active part in municipal life, and was for years Clerk of Nassagaweya Township. He was also secretary of the Halton Union Farmers' Mutual Fire Insurance Co., and after taking up his residence in Rockwood was appointed school trustee, and was also director several times of the Rockwood Fair. Mr. Cameron was particularly well known as a notary public, and in this respect conducted a great deal of the legal affairs of the residents of the village. He will be very much missed in this connection. Mr. Cameron leaves no children. Besides his wife he is survived by four half-sisters, Jennie McRobbie; Mrs. Fred Beaufort, Waterdown; Mrs. Peter Campbell, Campbellville; and Mrs. Peter Clark, Moffatt, and one half-brother, John McRobbie, of Lacombe, Alta. The funeral will take place on Thursday afternoon, from his late residence to the Friends' Cemetery, Rockwood. Deceased was a devoted member of the Presbyterian church."

Petrolia Chamber of Commerce made a grant of \$200 to assist sports of all kinds in the town.

THE home of Mr. and Mrs. John Bowie seventh concession, Brooke township, on Friday last, Oct. 3rd, after a few days illness with pneumonia, in his 58th year. The funeral was held from the family residence, lot 27, on Sunday afternoon to St. James' cemetery, Brooke. The Rev. Mr. McLean conducted the service at the house and grave, and a large number of neighbors attended the service. The pallbearers were Robt. Toohill, Geo. Bowie, Arch. Fisher, N. McLachlan, D. Fisher and J. Brown.

THE Harvest Thanksgiving services were very largely attended at Christ Church, Sutorville, on Sunday. The Rev. D. W. Collins, of Windsor, preached a very telling and eloquent sermon in the morning and the rector conducted the service. The church was beautifully decorated with fruit, flowers and grain. The choir's efforts were very much appreciated by the large congregations present. The rector and wardens asked for a thank offering of \$150.00, but this was largely over paid.

BROOKE

Robert Taylor, of Watford, sold his 50-acre farm, being part lot 3, con. 12, Brooke, to L. H. Melton and J. H. Melton.

Don't fail to hear Colonel Bain's lecture "If I could live life over," in the Lyceum, Watford, on October 15th. This is one of the finest lectures ever presented to the public.

Mr. and Mrs. Lance Coristine and son Alex, Mr. and Mrs. J. W. Bryce, Sutorville, spent Sunday in Appin and Glencoe, with the latter's cousins, Mr. Donald McColl of Appin and Mr. John McColl of Glencoe.

"Free light, Free heat, and Free Power" will be the subject next Sunday morning at Bethesda Methodist church, service at 10.30. Walnut at 3 o'clock and Salem at 7 o'clock in the evening. Come and what you can do for your community.

The regular meeting of the Brooke Women's Institute will be held at the home of Mrs. Duncan Campbell, on Thursday, Oct. 16th, at 2.30 p.m. The interesting program which will be presented, will include an address by the District President, Mrs. J. A. Lawrie of Theford. Roll call will be answered by "Helpful Quotations." There will also be a question drawer. A cordial invitation is extended to all ladies to attend.

A record congregation gathered at St. James' church, Brooke, on Sunday afternoon at the Harvest Thanksgiving service. The Rev. D. W. Collins, of Windsor, gave a very inspiring sermon on some reasons for thanksgiving. The choir rendered special music which was much appreciated. The thank offering was a feature of the service, amounting to considerably over \$200. The church as usual was beautifully decorated with flowers, fruit and grain.

Mr. John Lett, con. 10, passed away on Friday last, Oct. 3rd, after a few days illness with pneumonia, in his 58th year. The funeral was held from the family residence, lot 27, on Sunday afternoon to St. James' cemetery, Brooke. The Rev. Mr. McLean conducted the service at the house and grave, and a large number of neighbors attended the service. The pallbearers were Robt. Toohill, Geo. Bowie, Arch. Fisher, N. McLachlan, D. Fisher and J. Brown.

SIR WILLIAM HEARST SPEAKS AT WATFORD

Premier Makes Opening Speech of Campaign Here on Saturday

DR. J. B. MARTYN, OF ALVINSTON, THE PRESENT MEMBER, AGAIN NOMINATED AT CONSERVATIVE CONVENTION.

Sir William and Dr. Martyn Ask Support On Their Records

A convention of Conservatives of East Lambton as constituted for provincial purposes was held in the Lyceum, Watford, on Saturday afternoon, Oct. 4, for the purpose of nominating a candidate for the coming election.

Fortunately the executive secured Sir William Hearst to address the assemblage. He arrived on the 12.30 train and was met at the station by a number of leading citizens.

The convention met at two o'clock and at once proceeded to business, Mr. W. R. Dawson, president of the association, presiding. Dr. J. B. Martyn was again chosen as the standard bearer of the party. Messrs. D. R. McCahill and Howard Fraleigh, of Forest, were also nominated but both withdrew. The convention passed a hearty resolution of confidence in the Hearst administration.

After the routine work of the convention, Sir William Hearst gave a rousing address on behalf of the government and Dr. Martyn.

"If on no other ground," began Sir William Hearst, "I think we should be entitled to support on our war record," and he went on to point out the part Ontario played in providing hospitals, raising troops and money and increasing production.

There was no charge of wrongdoing against the Hearst administration. The only one, that brought by Hartley Dewar against Mr. Ayearst, had been absolutely disproved. The finances of the provinces were healthy. Instead of having a yearly deficit there was a surplus annually of \$1,350,000.

"U. F. O. speakers," said Sir William, "hold up their hands in horror and say we have a debt of \$75,000,000. Let us see what we have against that. We have \$5,000,000 in the bank. We have \$22,000,000 in the T. & N. O. Railway, from which we could realize more than that tomorrow; and we have \$50,000,000 invested in hydro-electric.

"Hydro saved us an actual collapse of industry during the fuel shortage and took the place of millions of tons of coal. Who will say we did not do well to borrow money and invest it in such a good thing?"

"We actually have liquid assets of \$93,000,000 against that \$75,000,000 debt. If we need more we can go to our unlimited natural resources."

By the largely increased revenue secured by taxing corporations and estates the public service in every respect, grant more to agriculture and education and to hospitals and charitable institutions.

"To-day for education we spend within \$600,000 of the total amount of revenue in the province in 1904," he said. He referred to Hon. Dr. Cody as the greatest educationist in North America, and outlined the policy which has been mapped out by the Government in respect to extension of rural education, consolidated schools and community centers.

"The Government," he said, "will make a special grant to teachers, to the school and for the conveyance of pupils to the school to help the expense of the consolidated system."

Sir William referred briefly to what had been done in agriculture along the lines of the O. A. C., fall fair grants, county representatives, live stock improvement, women's institutes and boards of agriculture. The money, he thought, had been well spent.

"When I was minister of agriculture," he said, "I pointed out the opportunity for farmers to be representatives. But the answer from President Halbert, of the U. F. O., is that I would have put a padlock on their lips and thrown the key away. I have always found farmers men of ideals and principle and not men whose lips could be padlocked. But President Halbert and others are now trying to padlock the farmers' lips in demanding his resignation so that he can be recalled from the Legislature by a single class of the people. Who is the keeper of that man's conscience?"

"The U. F. O. should pronounce judgment on the acts of this Government, not the Ottawa Government, and their appeal should be an appeal to reason and not to prejudice."

"One of their speakers, Mr. Powers, in Essex, spoke a provincial campaign and attacked the Government for the tariff. Then he advocated a tax on the idle lands held by speculators in the West, land over which we have no more control than we have over the Fiji Islands."

Regarding the referendum and the Ontario Temperance Act, Sir William said:

"Under the same conditions I would do the same thing, whether it means my political life or not. We originally intended to submit the act to the people, but all classes were against it, and our mandate to help win the war justified

our action. We willingly have stood abuse and displeasure, but now it is on the hearts and consciences of the people of the province. Whatever the majority say, that we will fearlessly carry out.

"Consider the ballot as four separate questions and there will be no confusion. If you wish the Ontario Temperance Act continued just as it is, vote four 'no's' all the way down the ballot."

Sir William closed with these words:—"We do not ask for your support on promises for the future, but on our performances for five years. Judge as by our record. Platforms to get in on an easy to construct, but it is performances that count."

Dr. J. B. Martyn, the candidate, gave a record of his stewardship and stated plainly his position on the questions before the election. He was in entire sympathy with the government on the prohibition question and said he would stand by the Ontario Temperance Act. He had obtained for the farmers grants for a corn show building and also grants for fruit and vegetable shows and had also obtained black bass fry for the rivers Aux Sable and Svidenham. He thanked the electors for their support at previous election and hoped that his record would enable them to again support him and place him at the head of the poll.

Mr. Harry Elther, of South Huron, lauded the Hearst government "because I think it honest and in the best interests of Ontario." The province had never had a man more loyal to the people than Sir William Hearst.

The Convention passed a resolution of confidence in the Hearst government and the meeting closed with cheers for the King, Sir William Hearst and Dr. Martyn.

Officers of the Association were elected as follows:— President—W. R. Dawson, Inwood. 1st Vice-Pres—Dr. R. McCahill, Forest. 2nd Vice-Pres—Mrs. Thos. Allison, Alvinston.

Rec. Sec.—Thos. Harris, Watford. Cor. Sec.—W. E. Fitzgerald, Watford. Treas.—Dr. J. Newell, Watford. Auditors—W. G. Willoughby and T. B. Taylor.

VICE PRESIDENTS
Arkona—Thos. Lang
Alvinston—Sanford Lucas.
Bosquet—Hugh Russell.
Brooke—Geo. R. Shirley.
Euphemie—Dr. A. W. Kelly.
Forest—Geo. Beattie.
Plympton—J. B. Woodhall.
Warwick North—D. Hay.
Warwick South—Chas. Hawkins.
Watford—J. H. Hume.
Wyoming—Dr. W. Reid.

THE FAIR

As we go to press the exhibits are coming in rapidly and are being put in place in the buildings. The number of entries so far surpasses last year at the same time and if the weather turns favorable the prospects look bright for a very able attendance. Secretary Kenward and the directors are being kept very busy and are looking forward to a breaking of the records of entries and attendance.

Swiff's Special Prizes

Oldest lady on the grounds, pair gloves valued \$1.50.
Oldest gentleman on the grounds, pair gloves, value \$1.50.
Youngest baby boy on grounds, baby's outfit, consisting of pair booties, bonnet and veil.
Youngest baby girl on grounds, baby's outfit, consisting of pair booties, bonnet and veil.

QUEEN ALEXANDRA FILM

Noble Women of England Shown in "The Great Love"

It is not often that a motion picture producer can call to his aid the services of a Queen and women of the most exclusive nobility of England. But David Wark Griffith, producer of the famous "Birth of a Nation", "Intolerance" and "Hearts of the World", has succeeded in accomplishing this in "The Great Love," his photoplay which will be shown at the Lyceum, Watford, on Saturday, October 18th.

In this photoplay, Queen Alexandra and many titled ladies are seen engaged at their various duties in hospitals and on their estates—some scrubbing, some mopping floors, others engaged in attending convalescent soldiers while others do menial work, but which they do not deem degrading, because it is necessary for them to do their bit in order that the cause of world democracy may triumph.

DIED

In Brooke, on Friday, Oct. 3rd, 1919, John Lett, aged 57 years.

At Kilworth Sanitarium, on Sunday, Oct. 5, 1919, Lexy F. beloved wife of John W. Beattie, of Watford, aged 49 years, 6 months, 20 days.

In Kelliker, Sask., Sept. 21st, 1919, Lorna May, infant daughter of Mr. and Mrs. Russell Parker, aged 4 mos. and 10 days.

Put a few marbles in the kettle when cooking catsup. They prevent burning.

For Trade
Extension

BEFORE buying Victory Bonds again you may want to know how Canada used the money you loaned her last year.

Canada borrowed the money to carry on the war and to provide credits for Great Britain and our Allies.

CONSIDERABLY more than one-half of the Victory Loan 1918 was spent on our soldiers. This included \$312,900,000, for paying them, feeding them, bringing them home, separation allowances to their dependents, maintenance of medical services and vocational training schools.

\$59,000,000 of the Victory Loan 1918 was paid on account of authorized Soldiers' gratuities.

\$9,000,000 was spent at Halifax for relief and reconstruction after the disaster.

+ + + + +

Other disbursements were not, strictly speaking, expenditures, but National Re-investments.

To Great Britain for example:

- \$173,500,000 was loaned for the purchase of our wheat and cereals.
- \$9,000,000 for our fish.
- \$30,000,000 for other Foodstuffs.
- \$2,900,000 for Canadian built ships.
- \$5,500,000 to pay other British obligations in Canada.

Making in all \$220,900,000 advanced to Great Britain.

To our Allies, we loaned \$8,200,000 for the purchase of Canadian foodstuffs, raw material and manufactured products.

The Re-investments will be paid back to Canada in due time, with interest.

These credits were absolutely necessary to secure the orders for Canada because cash purchases were impossible.

They have had the effect of tremendously helping agricultural and industrial workers to tide over the depression that would have followed the Armistice, had we not made these credit loans.

As far as money is concerned, 1919 has been, and is still—just as much a war year as 1918. Our main expenditures for war cannot be completed until well on into 1920. Thus another Victory Loan is necessary—*Get ready to buy.*

FARMS MORE VALUABLE

When the Well Water Is Pure and Wholesome.

Price of Hogs at High Levels So Prepare to Rear Fall Litters of Pigs—Choose the Strongest and Healthiest Young Sows—Litters Should Be Farrowed Before Cold Weather.

(Contributed by Ontario Department of Agriculture, Toronto.)

THE well is the usual source of the farm water supply, and a good well, that is, one which supplies plenty of pure fresh and wholesome water the year round is certainly one of the most essential and valuable assets of the farm. Without it no man could live there for long, to say nothing about bringing up a healthy family, or building up an efficient dairy herd. The well must be there first and last and all the time, and we cannot conceive of an intelligent man buying a farm without a good well if he intended to live on it and make it pay dividends.

Fortunately, most of Ontario's farms are well supplied with water, in fact it is a rare thing to find a farm where it could not be secured in sufficient quantities by drilling to reasonable depths. The supply, therefore, will probably never cause us any serious worry, but judging by a recent report on analysis of many well waters from this Province one seems justified in concluding that there is still need for education of the rural public in regard to the protection and care of the farm well. The following suggestions will be found helpful to any farmer desirous of making his water supply safe against possible underground and surface contamination.

The first step in the solution of this problem of purer water supply is the location of the well. This should be by all means on ground higher than any source of contamination such as barnyard, cesspool, or outside privy. If there should be no choice in location, and this cannot be done, then the well should be kept a considerable distance from such contaminations, at least 100 feet in clay, and 200 feet or more in sandy soils, and the cribbing and top of the well specially protected as detailed later against the entrance of any seepage and surface washings. In the second place the cribbing for at least 10 feet below the surface should be made impervious to water so that any contamination in solution reaching the well would have to pass down through this extra depth of soil before getting into the well, when in all probability it would be taken up by the soil and never reach the well water. This may be done in case of an old well by putting a wall of puddled clay 1 foot thick and 10 feet deep around the well cribbing, and in case of a newly-dug well, or re-cribbing an old one, by using large concrete tile for the cribbing and setting the joints thoroughly in rich cement. Before the tile are placed in the well the outside should be washed with pure cement plaster in order to fill up all pores and make the tile absolutely impervious to soil waters. Thirdly, the cribbing should be extended at least one foot above the ground level and the soil banked up to the top of it to provide good surface drainage away from the well. Fourthly, the well should be provided with a strong and tight-fitting cover made of heavy plank or concrete so that it will always be safe for man and beast and proof against the entrance of dirt, small animals like frogs, etc. Even better still the pump may be placed over a shallow dry well to one side and the top of the real well made absolutely tight by a concrete cover. In this case the well should be ventilated by putting a small iron pipe with the exposed end turning downwards, through the top or cover. And, fifthly, the stock should not be allowed to tramp about close to the well.

What has been said refers chiefly to dug wells, but even the drilled or driven wells should be well drained and protected at the top, for otherwise contamination may work down along the well casing and reach the water, especially if the casing is not tightly driven into the rock below.

Attention to such matters of construction and protection of the farm well as I have detailed and an occasional pumping out and cleansing of the well with a little lime will assure a pure and wholesome water supply.—R. R. Graham, B.S.A., O. A. College, Guelph.

COUNTY OF LAMBTON

Treasurer's Notice as to Lands
Liable for Sale for taxes
for 1919.

TAKE NOTICE that the list of lands in the County of Lambton liable for sale for the arrears of taxes by the Treasurer of the County of Lambton has been prepared by me and that copies thereof may be had in the office of the County Treasurer.

And further take notice, that the list of lands for sale as aforesaid is now being published in the Ontario Gazette in the issues thereof bearing date the 12th, 19th,

and 26th days of July and 2nd day of August, 1919.

And further take notice that in default of payment of the taxes in arrears upon the lands specified in said list, together with the costs chargeable thereon as set forth in the said list, so being published in the Ontario Gazette before the day fixed for sale of such lands, being the 18th day of October A. D. 1919, the said lands will be sold for the taxes pursuant to the terms of the advertisement in the Ontario Gazette.

And further take notice that this publication is made pursuant to Assessment Act Revised Statutes of Ontario 1914, Chapter 195, Section 149 sub. sec. 3. Dated at Sarnia this 5th day of July, A. D. 1919.

H. INGRAM,
Treasurer of County of Lambton.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Medicine

Hall's Catarrh Medicine has been taken by catarrh sufferers for the past thirty-five years and has become known as the most reliable remedy for Catarrh. Hall's Catarrh Medicine acts through the Blood of the Mucous surfaces, expelling the Poison from the Blood and healing the diseased portions.

After you have taken Hall's Catarrh Medicine for a short time you will see a great improvement in your general health. Start taking Hall's Catarrh Medicine at once and get rid of catarrh. Send for testimonials, free. F. J. CHENEY & CO., Toledo, Ohio. Sold by all Druggists, 75c.

Mitchell's Hobby Made Him Famous

BRIG-GEN. C. H. MITCHELL, C.B., C.M.G., D.S.O., Legion of Honor (French), Order of Leopold, Croix de Guerre (Belgium), Order of the Crown and Cross of War (Italian); had a hobby. And that hobby suddenly picked him up in its arms and carried him up to the stars.

In spite of the blazing streak of ribbon on his left breast, he is not a professional soldier. Before the war, he was an engineer, an enthusiastic investigator of industry, both in the engineering and sociological sense. And he had a hobby which he rode fervently, furiously, joyously.

corps of Guides was formed and he became one of its senior officers. He studied the ground. He learned to see a landscape in a map, a bird's-eye view from a chart. He studied earth, trees, streams, contours, figured out how to defend any place from anything.

He doped out the defence of Toronto against invaders from all directions.

His engineering conferees regarded his zealous devotion to the subject with deprecatory smiles. Why couldn't Charlie bend all this energy to something more profitable?

But then the war fell with a crash, and the major, (as he was then in the Corps of Guides), promptly stepped into his ordained place as staff officer, intelligence, in the first contingent. His hobby developed into a gold mine for the troops.

For besides having an eye trained to see everything of importance in a piece of ground, the major's enthusiastic studies had taught him also how to see spies, and more important still, how to grasp instantly the features of such things as trench warfare, patrols, organization of intelligence branches in small units.

Gen. Mitchell was one of the most distinguished of these intelligence officers. To describe all that the Intelligence Service deals in would take an encyclopaedia. But they gather everything, from the movement of enemy armies down to the digging of a new Hun machine gun post on a quiet sector of the line. They must know everything from the number of enemy guns on a certain piece of front to the number of good wells of drinking water to be found in a village we propose to capture.

Gen. Mitchell did great work as Chief of Intelligence in the Canadian Corps from its first trip to the line. He was a wizard with maps. He boosted the airplane as a topographer of enemy positions. He helped make air photos. He helped the soldier's best friend, the map, to help his countrymen do that job. And you will recall we did it.

So Gen. Mitchell is home again, slathered with ribbons like an air hero. And his conferees, who smiled deprecatively at a "hobby," swing still in their swivel chairs, with no decorations other than those which four years of worry have hung on them.

When the corps went to Passchendaele a year later, few will forget the splendid information that was supplied us for that seemingly impossible task by Gen. Mitchell. His resumes of previous actions, studies of the ground and forecasts of probable enemy action were masterpieces. He did all in his power to help his countrymen do that job. And you will recall we did it.

In October, 1916, during the Somme offensive, he was promoted to be General Staff Officer (Intelligence) of the Second Army under Gen. Plumer.

The Referendum Ballot

WHAT EACH QUESTION MEANS AND WHY YOU SHOULD VOTE "YES" ON ALL FOUR QUESTIONS

Vote "Yes"

1. Are you in favor of the repeal of The Ontario Temperance Act?

The repeal of The Ontario Temperance Act does not mean a return to the general sale of spirituous liquors, as the Premier, in his speech of April 7th, said: "Now, practically no one suggests a return to old conditions. The distillers in a recent manifesto say that they themselves are opposed to it. Many hotel-keepers say they are opposed to it. The brewers say they are opposed to it. Honourable gentlemen in the House and people out of the House, who are opposed to the present Act, say they are equally opposed to the old order. The labor men who ask for stronger beer, say they don't want the sale of hard liquor."

The Premier and the Government, realizing this, would not be parties to a continuance of the general sale of spirits as under the old license system, but would amend the License Act in accord with public sentiment. This would be in keeping with the policy of the Provincial Governments of the past fourteen years, which have from time to time amended the License Act to conform to the wishes of the people. To vote "Yes" to question number one would enable the Government to provide for the sale of beer and light wine in the hotels, and beer and spirits in Government stores for home consumption.

The Citizens' Liberty League does not want a return to the conditions under the old License Act and the sale of liquor over the bar. It does ask, however, for the general sale of beer 2.51% alcohol by weight (non-intoxicating) and light wines, and that the Government should only allow the sale of heavier beers and liquors through agencies established and maintained under Government supervision and control. It is, therefore, necessary that question one should be answered "Yes," repealing The Ontario Temperance Act and making it possible for the Government to enact a new temperance measure in accord with the expressed will of the people.

By voting "Yes" on question number one you will be in agreement with Premier Hearst when he said: "Many good and conscientious citizens, as good and conscientious as there are in the Province, do not approve of the Act as it stands today." Vote "Yes" on question number one and repeal the unsatisfactory Ontario Temperance Act.

Vote "Yes"

2. Are you in favor of the sale of light beer containing not more than 2.51/100% alcohol weight measure through Government agencies, and amendments to The Ontario Temperance Act to permit such sale?

Vote "Yes" on question number two. This provides for the sale of light beer in Government stores for home consumption and removes the necessity of procuring a doctor's certificate.

Vote "Yes"

3. Are you in favor of the sale of light beer containing not more than 2.51/100% alcohol weight measure in standard hotels in local municipalities that by majority vote favor such sale, and amendments to The Ontario Temperance Act to permit such sale?

Vote "Yes" on question number three. There can be little doubt that the majority of people will vote "Yes" on this question. There is a demand for a beer of good flavor and body that is non-intoxicating, and the public want to obtain it by the glass as well as by the bottle.

A beer of 2.51% alcohol by weight, no matter in what quantities consumed, is absolutely non-intoxicating. In European countries beer of this strength is sold generally without license and without excise duty.

In voting "Yes" on questions two and three you can be assured that no one can become intoxicated by beer of this strength.

Vote "Yes"

4. Are you in favor of the sale of spirituous and malt liquors through Government agencies, and amendments to The Ontario Temperance Act to permit such sale?

Vote "Yes" on question number four, which provides for the sale of all liquors for home consumption from Government stores under such regulations as the Government may deem it wise to adopt. The public will be able to purchase from these stores without procuring a doctor's certificate.

Study the Referendum Ballot; if there is any point not clear, call or write the Secretary of the League at Committee Headquarters. It is to your interest that you vote wisely and intelligently. And if you are a lover of liberty and an advocate of true temperance, you will vote "YES" on all questions on the Referendum Ballot.

The Citizens' Liberty League is not in favor of the sale of spirits over the bar as under the old License Law. It is, however, in favor of the general sale of non-intoxicating beer of 2.51% alcohol by weight and light wines, and the sale of liquor for home consumption through Government stores under such restrictions as the Government may deem wise to adopt.

Remember—every voter must vote on every question, or his ballot will be spoiled.

MARKETING OLD HENS

Egg Production Falls Off After Month of May.

Small Cold Storage Plant Both Practical and Profitable on Each Progressive Farm—It Adds to the Comfort of the Family and Increases the Profits—Essential Factors of Construction Explained.

(Contributed by Ontario Department of Agriculture, Toronto.)

IN almost every flock there is a percentage of hens who are poor layers. These hens lay so few eggs that they frequently do not pay for the feed they eat and therefore reduce the profits of the better layers. The market price is high for old hens, and where the birds are not good producers it is a good plan to market them fairly early. There are also in most flocks a number of hens that were hatched in 1917 or earlier. Our figures suggest that most hens fall back about twenty eggs annually in their production. It is true that most of this occurs during the winter months, but one must also consider that the number of eggs falls off considerably after the month of May and, moreover, it is not uncommon for July and August to be poor egg-producing months.

The price of old hens usually is at its lowest point during the fall of the year, so that in many cases it pays best to sell the old birds not wanted for next year fairly soon, as the decline in price frequently is more than the profit made upon the eggs laid from June to October.

In a word the hen that has bright yellow legs and beak at this season is a poor producer, as is also usually the bird that has a large amount of internal fat or is very full and hard in the space between the end of the breast bone and the tail.

A good laying hen is active. If of the yellow-legged breeds her feet are usually faded, as is also the bill. Her toe-nails are shorter than her poorer laying mates. She appears as if she had worked harder, that is she is not so sleek and fat. Her skin is usually thin and soft. She is busy and not a loafer.

The non-laying hen has a small dry vent whereas the laying hen has a large moist vent.

Small Cold Storage for Every Farm.

Cold storage practice so far has been connected with the large produce warehouses in our towns and cities. These establishments could not do successful business if their plants were not provided with large storage chambers kept cool and in other particulars suitable for the long storage of perishable products of the farm, such as eggs, butter, meat, cheese, fruit, and so forth. Some day, probably not so far distant after all, the farmers may become sufficiently well organized to build and equip mechanical cold storage warehouses of their own, whereby they will be able to have complete control over the products of their own labor until they are disposed of to the consuming public. Personally, I believe the problem of cold storage on the farms should be handled through co-operatively owned warehouses provided with adequate cold storage facilities.

Apart, however, from the question of a cold storage with up-to-date mechanical equipment for the farm or farmers' association as suggested above, there is the problem on almost every farm pertaining to the storage for a few days of small quantities of various foods used on the table from day to day, such as butter, meat, milk, etc. It is certainly a great saving and matter of convenience to have on the farm a small cold storage chamber or refrigerator in which to keep these very perishable articles of food in a good fresh and wholesome condition for use on the table during the warm season of the year. This is made possible by the use of ice, and as it is procurable in almost every district of this country at a reasonable cost, there is no excuse for farmers not laying by in the winter season a few tons in some cheap form of icehouse. In the summer time this ice will be found most useful for cooling the milk and cream, supplying an ice-box or refrigerator in which the butter, for example, may be kept firm, the milk and cream sweet, and the foods in good condition for the table day by day. With ice always so handy and the best of cream available, it is possible for the housewife to make such delicious and wholesome delicacies as ice-cream, sherbets, and many delightful and cool drinks, all of which are most refreshing and stimulating to the folks on the farm in the hot and busy season of the year. In case of sickness, too, ice is sometimes a necessity. There is no doubt then about the fact that every farmer would find a supply of good ice a great advantage in many ways, whether it be stored in some bin from which it is removed as required or in some form of small ice-cold storage which it cools automatically a small refrigerator room adjoining

CHOP STUFF
The corn is nearly all in the silo. Forest pickling factory put down 240 tons of cucumbers this season. Strathroy is considering the advisability of starting a Y. M. C. A. Two girls working side by side in a Chicago department store discovered they are sisters, who were separated 17 years ago. An Illinois farmer sold the hide of a calf for \$8 and then went to town and paid \$3 for a pair of shoes. Now he knows what a skin game is.

There is a story of an old Indian at Ft. Vermilion who went barefooted all one winter. If the price of shoes goes any higher we are going to make strong efforts to find out how he did it. Morris, the 6-year-old son of Lawrence Wilkinson, corner of the 4th concession, Leamington Sideroad, had his right cheek badly lacerated on Tuesday. The little fellow in some manner got in the manure spreader and one of the teeth cut a gash in his cheek five inches long, which required a good many stitches to close it. The death occurred in Enniskillen tp. on Tuesday, Sept. 30, of Mr. Charles Isaac Postill, aged 57 years. Deceased who for some years was in failing health, had lived in Enniskillen township for nearly 40 years. He was known as a kindly neighbor and honorable citizen. He is survived by his wife, two sons and three daughters. A new bug has appeared in potato patches in this vicinity which is killing the potato bug in much the same way as the spider does the fly. This new bug has a flat back like a beetle and rather pretty marked and is not larger than an ordinary potato bug. The bug kills a potato bug with a sort of spear which he carries doubled up beneath his stomach when not using it in attack. The new bug does not appear to harm the potato leaf, and in local potato patches it is not unusual to see little bunches of dead potato bugs lying on the ground where the new bug has been at work.—Walker-Ton Telescope.

The Navy League of Canada Its Vital Work for Canada

THE Navy League of Canada fosters the splendid spirit that made the British the greatest of maritime nations. It organizes loyal Canadians so that practical work may be accomplished for the development of Canada's direct interests at sea.

The human side of Canada's Merchant Marine is the League's especial interest—training Canadian boys to become the sturdy type of British manhood that won its laurels again and again in the great war—relieving distress among victims of the submarine warfare—and giving the sailor ashore an alternative place for rest and recreation in the places of doubtful entertainment that abound in port.

Why the \$500,000 is needed

On Nelson Day, October 21st, starts a 3-day campaign throughout the Dominion to raise \$500,000 necessary to finance the coming year's work of the Navy League of Canada. Help the work by giving liberally. As a nation whose expanding trade will depend on exports, we must educate our boys to the highest type of seamanship so that they will be equipped to man our ships to carry our exports to foreign markets.

You will do your part in this work by contributing liberally to the support of the Boy's Navy Brigades, the organizations by which the Navy League trains boys for our merchant marine.

Every dollar subscribed will be used to further the work of the Navy League in Canada—the work in which you are personally interested as a patriotic citizen. Help by giving.

NELSON DAY CAMPAIGN for \$500,000 October 21-22-23

"Canadians Must Sail The Seas"

Big Sale of Farm Stock

IMPLEMENTS, ETC.
The undersigned has received instructions from
ARENCE ZAVITZ
public auction on the premises
n. 3, N.E.R., Warwick, known
as the Fitzsimon's farm, on
DAY, OCT. 11, 1919
the following valuable stock, etc., viz:
1 G. P. horse, 1 driving
w due in October, 1 Durham
November, 1 cow due in
row cow, 1 yearling heifer, 1
ewe, 3 spring calves, 2 pigs
1 old, 35 hens, 1 colt, dog, 1
1 milk wagon, binder, disc,
vel box, riding plow, drill,
egy, cutter, set double har-
ngle harness, 2 sets whiffle-
barrow, new cream separator,
balls binder twine, mail box
gging chain, wagon jack, 1
1 bus. alfalfa seed, quantity
and corn, sling ropes and
solen horse blankets, forks,
numerous other articles.
as proprietor is moving to
\$5 and under, cash; over
11 months' credit on approv-
es. 6 per cent. per annum
cash on sums over \$5.
M. SADLER, Auctioneer.

AUCTION SALE OF Farm Stock

The undersigned has received instructions from
RICHARD ADAMS
to offer for sale by public auction on the
premises

Lot 22, Con. 1, S. E. R., Warwick

—ON—
WEDNESDAY, OCT. 15,

the following valuable stock, etc., viz:
1 Clydesdale Mare 7 years old eligible
for registration, 1 Clydesdale mare 3
yrs old eligible for registration, 1 Clydes-
dale mare 2 years old eligible for regis-
tration, 1 Clydesdale foal eligible for
registration, 1 H. D. gelding 3 years,
1 H. D. gelding 1 year, 1 aged horse
general purpose, 1 cow due Oct. 25, 1
cow due Nov. 20, 2 cows due in January,
2 cows due in March, 1 3-year-old heifer
milk, 2 steers 2-years-old Durham
and Hereford, 4 heifers 2 years old Dur-
ham and Hereford, 4 yearlings Durham
and Hereford, 9 steer calves Durham
and Hereford, 1 heifer calf Durham
and Hereford, Sow and pigs seven weeks
old, About 20 tons Timothy hay, Six
acres of Corn in stock. A quantity of
oats and mixed grain.

No reserve as proprietor is unable to
work the farm through accident.

TERMS—\$10 and under, Cash; over
that amount 12 months' credit on approv-
ed joint notes, 6 per cent. per annum
discount for cash on sums over \$10.
J. F. ELLIOT, Auctioneer.

USES FOR ODDS AND ENDS

Save old ribbons of various colors, press with a hot iron and put them away to be used in mending old silk garments. The under seams of silk waists may be beautifully mended in this manner if you have a strip of ribbon the same color.

Often round dollies can be cut from the best part in such a way as to bring a pattern in the center. A border may be crocheted around this and pretty plate dollies made for ordinary use.

To make kitchen towels last longer when they begin to wear thin, place two together and stitch all around the edge, then lengthwise down the middle of the towel and once each side at the middle half way to the edge of the towel.

Linen collars which have been discarded make excellent bandages for use for cuts, burns and bruises. Soak them in water until soft, cut off the stitching, then dry and make into rolls ready for any emergency.

Old stockings, especially heavy fleeced ones, may be used to make underdrawers for small children. They are easily made by making a V seat.

Importation of Intestines.

Intestines are imported into the United States from China to the extent of nearly \$400,000 worth a year. They are used by packing houses for sausage casings. The intestines are prepared for shipping at Shanghai, Hankow, or Tientsin by being scraped, cleaned and preserved with salt and salt water, and packed in oak barrels having a capacity of 2,500 to 3,000 bundles with about 50 per cent salt. Pig intestines are exported in a dried condition.

Environment Counts.

It is well to remember that environment has much to do with achievement. Associate only with those who are full of enthusiasm and determined to succeed. Keep close to people who encourage you. Create peace in the home. Make of it a harbor of refuge, a means of escape from a work-a-day world. If you will do this, you will soon find yourself well on the road to success.—Fern Howard.

Skilled in Fine Work.

One of the trades calling for the greatest skill is the making of compasses. This work had never been undertaken by women until dilution of labor became necessary. Of the infinite number of delicate parts demanding absolute accuracy, women have succeeded in making all but two or three and even these will shortly be to their credit.

The Lucky Horseshoe.

The superstitious use of horseshoes as emblems of good luck originated in England in the seventeenth century. They were at first deemed a protection against witches and evil spirits, and were nailed on doors of houses with the curve uppermost. The custom of nailing horseshoes to ships and other sailing craft is still in vogue.

Simply Couldn't Be Done.

Mother knew several practical gifts were to be given Daniel, so she was preparing him in advance by telling him gifts as well as toys. "But, mother," said the little fellow, "my appreciator isn't so big that I can be glad for shoes and such things."

A MILD PILL FOR DELICATE WOMEN.

The most delicate woman can undergo a course of Parmelee's Vegetable Pills without fear of unpleasant consequences. Their action, while wholly effective, is mild and agreeable. No violent pains or purgings follow their use, as thousands of women who have used them can testify. They are, therefore, strongly recommended to women, who are more prone to disorders of the digestive organs than men.

AUCTION SALE OF IMPLEMENTS, ETC.

The undersigned has received instructions from
THOMAS THOMPSON
to offer for sale by public auction on the
premises

Lot 25, Concession 12, Brooke

—ON—
THURSDAY, OCT. 16, 1919

the following valuable goods, etc., viz:
Deering binder, nearly new; Deering hay loader, new; Deering mower, nearly new; Deering rake; Noxon drill; buggy; hay rack; Wilkinson plow, set double harness, set single harness, watering tank, steel hay fork, track, ropes and pulleys, several other small articles.

Sale to commence at 1 o'clock.
TERMS—\$10 and under, Cash; over that amount 12 months' credit on approved joint notes, 6 per cent. per annum discount for cash on sums over \$10.00.
GORDON HOLLINGSWORTH,
Auctioneer.

Far more effective than Sticky Fly Catchers. Clean to handle. Sold by Druggists and Grocers everywhere.

CLEARING SALE FARM STOCK, IMPLEMENTS

There will be sold by public auction for
ROBERT SMITH

at Lot 3, Con. 3, S. E. R., Warwick, on
TUESDAY, OCT. 14, 1919

At 12 o'clock noon the following—
1 light mare; 1 colt, 2 yrs., by Guelph Performer; 4 fresh cows; 1 milch cow, due Jan. 1st; 5 cows due in April all giving milk; 6 yearling heifers; 2 yearling Hereford steers; 1 steer, 8 months; 1 Hereford reg. bull, 18 months; 4 veering calves; 1 reg. Durham cow, 1 year, due Jan. 1st; 12 C. O. ewes; 75 hens, 1 new lumber wagon, 2 other wagons, set Hastings sleighs, M. H. binder, Deering mower, Deering hay rake, Deering disc, D. B. litter carrier and 170 ft. track, set hook tooth harrows, set straight harrows, road scraper, corn sheller, root pulper, fanning mill, seed drill, Happy Farmer 24 h. p. tractor and three furrow plow, nearly new; M. H. manure spreader, set double light harness, set heavy harness, circular saw outfit, a quantity of hay, straw stack which can be moved, sap pan and 60 buckets, DeLaval separator, Edison Phonograph and 75 records, parlor heater for coal or wood, frame buildings, hay fork rope new, with pulleys, set scales 2000 lbs. and numerous other articles.

No reserve, as proprietor is giving up farming.
TERMS—\$10 and under, cash; over that amount 12 months' credit on approved joint notes, 6 per cent. per annum discount for cash on sums over \$10.

At the same time the farm of 52 acres, being S. E. quarter lot 3, con. 3, S. E. R., Warwick, well tilled and good supply of water, all needed down, will be sold on terms to suit purchaser.

M. J. ROCHE, Auctioneer.

Clearing Sale of Farm Stock IMPLEMENTS, ETC.

The undersigned auctioneer has received instructions from

JOHN A. SPALDING

to sell by public auction on the premises
Lot 25, Con. 2, S. E. R., Warwick

—ON—

TUESDAY, OCT. 14th, '19

the following valuable stock, etc., viz:
2 geldings rising 3 years old H. D., 1 sucking colt; 3 cows, due to calve in November; 1 cow, due to calve in December; 2 cows, due to calve in April; 1 farrow cow; 1 heifer, due to calve in November; 1 heifer, due to calve in December; 1 heifer, due to calve in January; 2 2-year old heifers; 1 2-year-old steer; 7 yearling steers; 7 yearling heifers; 6 calves; 25 breeding ewes; 6 ewe lambs; 75 hens; 300 bus. oats; 10 tons hay; Seed drill; hay rake; mower; hay loader, new; disc harrow; hook-tooth harrow; straight-tooth harrow; plow; sifter; set of Hastings sleighs; wagon; set steel wheels; fanning mill; corn sheller, new; hay rack; open buggy; democrat; cutter; set team breeching harness; set chain trace harness; set single harness; incubator; DeLaval separator; cream can; dash churn; oak barrels; horse clippers; grass seeder; sugar kettle; 20 ft ladder; grindstone; forks; chains; shovels; car, ropes, fork and slings, and other articles too numerous to mention.

Everything without reserve.
Sale to commence at 1 o'clock.

TERMS—\$10 and under, cash; over that amount 12 months' credit on approved joint notes, 6 per cent. per annum discount for cash on sums over \$10.

J. F. ELLIOT,
Auctioneer.

CLEARING SALE FARM STOCK, IMPLEMENTS

The undersigned has received instructions from

JOHN W. LUCAS

To offer for sale by public auction on the
premises

Lot 17, Concession 14, Brooke, on
FRIDAY, OCT. 17, 1919

the following valuable farm stock viz:
1 aged driving mare; 1 cow, due in November; 1 3-year-old heifer, due in November; wagon, buggy, set bob-sleighs, cutter, disc, mower, hook-tooth harrows, plough, car, slings and rope, fanning mill with bagger, 2 fence stretchers, rope and pulleys, set of single harness, set of double harness, neckyokes, whippetrees, forks, the scoop, grindstone, scythe, cook stove, heater, and numerous other articles.

Sale to commence at 1 o'clock.

TERMS—\$10.00 and under, Cash; over that amount 10 months' credit on approved joint notes, 6 per cent. per annum discount for cash on sums over \$10.00.

 WATFORD BRANCH, F. A. MacLEAN, Manager.
 ALVINSTON BRANCH, G. H. C. NORSWORTHY, Manager.

GUARD THE CHILDREN FROM WINTER COLDS

The Fall is the most severe season of the year for colds—one day is warm, the next is wet and cold and unless the mother is on her guard the little ones are seized with colds that may hang on all winter. Baby's Own Tablets are mothers best friend in preventing or banishing colds. They act as a gentle laxative, keeping the bowels and stomach free and sweet. An occasional dose will prevent colds or if it does come on suddenly the prompt use of the Tablets will quickly relieve it. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A GREAT PRODUCTION

David W. Griffith's special picture, "The Great Love", which will be shown at the Lyceum, Watford, Saturday, Oct. 18, is one of the finest ever brought out by that master, proved a revelation to those who are unacquainted with war conditions in England. The chief roles are charmingly portrayed by such screen players as Henry B. Walthall, Robert Harron and Lillian Gish.

ONIONS and scents of pickles issue from almost every dwelling house one passes these days.

THE lawn mower has not been overworked during the past summer but the snow shovel may need some extra manipulation to even things up before the winter is over.

SOWING WINTER WHEAT

Dawson's Golden Chaff the Most Popular Variety.

Life of Machinery Shortened by Standing Exposed to Weather After Harvest—All Machines Should Be Overhauled and Stored as Soon as Operations Are Completed.

(Contributed by Ontario Department of Agriculture, Toronto.)

WINTER wheat is one of the great cash crops of Ontario. It has been found by farm surveys in the United States and Canada that in very many instances, even in the live stock districts, cash crops can frequently be grown to great advantage. Ontario is an important producer of winter wheat, especially of the white varieties which yield well and bring good prices for pastry, breakfast foods, etc.

Winter wheat can be grown satisfactorily on a variety of soils. It thrives particularly well, however, on a rich loam containing a considerable amount of vegetable matter. This crop fills an important place in the rotation and generally thrives well after beans, peas, and especially after a clover sod or a bare summer fallow.

In experiments conducted at Guelph the winter wheat which has been sown about the end of August or in the first week of September has given the most satisfactory results. If the land is in especially good condition, as in the case of a summer fallow, the seeding might be delayed a little later. In sowing winter wheat it is important to use large, plump, sound, well matured seed of strong vitality at the rate of about six pecks per acre on average soil.

The Dawson's Golden Chaff has been the popular winter wheat of Ontario for a number of years past. It is very stiff in the straw and usually furnishes a high yield per acre. A new variety called the O. A. C. No. 104, originated at the Ontario Agricultural College from a cross of the Dawson's Golden Chaff and the Bulgarian, is very promising. In the past six years it has produced an annual average yield of grain per acre of 45 bushels, while the Dawson's Golden Chaff for the same period has produced 40.8 bushels and the Bulgarian 37.5 bushels. It has also taken the lead over Ontario in the co-operative experiments in each of the past two years. This variety will again be distributed in the fall of

the present year. Co-operative experiments over Ontario to be tested with one or two other varieties in plots one rod wide by two rods long. Those wishing to conduct this experiment should apply to the Director of Co-operative Experiments in Agriculture, Ontario Agricultural College, Guelph.—Dr. C. A. Zavitz, O. A. College, Guelph.

The Importance of Storing All Harvesting Tools and Machinery After Use.

The importance of storing all harvesting tools and machinery after use is an economic factor still to be realized by a very large percentage of farmers. Much of this apathy on the part of the farmer towards the proper care and management of his farm equipment is due in a large measure to the lack of appreciation of the fact that tools and machines cannot give maximum of efficiency when allowed to become coated with dirt and rust.

The first requisite in this direction is to properly house them. This alone is the most important. It is needless to show the rapid deterioration of steel, iron, wood, canvas, or anything that goes into the construction of farm machines, when they are out of doors and exposed to the elements. Of course, the factors conditioning their life and working efficiency are corrosion of the metals entering into their construction, due to atmospheric actions; the disintegration of the paint and varnishes from the same cause, and the decay of the wooden parts due to heat and moisture. There is, however, no reliable data available that will give us the coefficient of corrosion, but every farmer is aware that the moldboard of a plough subjected to dewy nights or damp weather conditions for a few nights will so rust the bright moldboard as to pit its surface that it requires several rounds of the field to bring it back to good working condition. Such a hard metal is undoubtedly much slower to corrode than either cast or wrought iron, hence machines and tools left out exposed to all kinds of weather, the bearings and working parts of machinery and the cutting edges of tools will become so badly affected with rust as to render new parts necessary in the machines and good grinding and honing of the tools to put them in workable condition.

The question of good and efficient management of machinery is an important one to the farmer if he only could be made to realize the amount of hard cash he loses through his indifference and neglect of them. What farmer would not protest in vigorous terms if he were told when purchasing his binder, say for \$150, that its life would be about thirty days—a competent authority estimates its average life to be twenty-four days used for six days in a year. Yet, through the same farmer's carelessness and indifference, a machine built to last at least twenty years is reduced to, say at most, five years.

At the present time there are many reasons why farmers should take good care of their equipment. One is the actual shortage of machines, and the other the savings in dollars in getting the most possible out of a machine before sending it to the junk heap.—Prof. John Evans, O. A. College, Guelph.

Early After-Harvest Cultivation.

"A stitch in time saves nine." In case of weeds prompt and thorough after-harvest cultivation prevents many thousands of weeds from developing seeds, and thus saves hours of tedious labor the succeeding season. Early after-harvest cultivation is one of the best ways to destroy annual and winter annual weeds, such as False Flax, Corn Cocks, Wild Buckwheat, Pigweed, Ball Mustard, Wormseed Mustard and Annual Sow Thistle. Plough shallow not more than three or four inches deep immediately after harvest, and harrow and cultivate frequently. By the shallow ploughing the weed seeds are kept near the surface and by the frequent stirring of the soil they are made to sprout, and having sprouted they are easily destroyed by further cultivation.—Dr. C. A. Zavitz, O. A. College, Guelph.

A Strange Post Office.

South America can boast of the simplest post office in the world. Opposite Tierra del Fuego is a very high, rocky cliff overhanging the Strait of Magellan, and from one of the rocks is suspended, by a long chain, a barrel which receives mail. To be sure, there is no postmaster nor is there any regular letter carrier or collector, but every ship that goes through the strait stops and sends a boat to this curious little post office, looks over the letters that are in it to see if there are any for the men on board that particular ship, and places therein letters for seamen on board ships that are known to be headed for the strait.

Oil of Turpentine.

Various confers, the pinus pinaster in France, the Scotch pine, the swamp pine, the loblolly, the long-leaved pine, Southern yellow pine and Georgia pine are sources of oil of turpentine and resin.

A fine of a dollar and costs was imposed on a Chatham man for allowing his daughter under 16 years of age to drive his car. At Ridgeway last week three boys were fined sums ranging around \$5 and costs for the same violation of the law.

TORTURED BY RHEUMATISM

"FRUIT-A-TIVES" Brought Quick and Permanent Relief

MR. P. H. McHUGH
103 Church Street, Montreal.

December 10th, 1917.
 "I was a great sufferer from Rheumatism for over 16 years, I consulted specialists, took medicines, used lotions; but nothing did me good. Then, I began to use "Fruit-a-tives"; and in 15 days, the pain was easier and the Rheumatism was better. Gradually, "Fruit-a-tives" overcame my Rheumatism; and now, for five years, I have had no return of the trouble. Also, I had severe Eczema and Constipation, and "Fruit-a-tives" relieved me of these complaints; and gave me a good appetite; and in every way restored me to health."
 P. H. McHUGH.

50c. a box, 6 for \$2.50, trial size 25c. At dealers or sent post paid on receipt of price by Fruit-a-tives Limited, Ottawa, Ont.

GENYRA Business College

D. A. McLachlan, Principal.

The Ontario general election will be held on Monday, October 20, the same day as the referendum on the Ontario Temperance Act. The date of the last election was June 29, 1914. The parties stood after the votes were counted, Conservatives 84, Liberals 25, Independent Liberal 1, Labor 1. The standing of the parties at dissolution of the Legislature is: Conservatives 76, Liberals 30, United Farmers 2, vacant seats, two Conservatives and one Labor.

FROM CHERRY-BLOSSOM LAND

The Japanese Give Good Example

It is a proverb of Cherry Blossom Land that beauty of face and figure depend on womanly health.

What is it that makes our Canadian women often pale, sallow-faced, with dark circles under the eyes, and very often old at forty-five when they should be in their prime?

Women suffer in girlhood from back-ache, spine-ache and headaches, followed by irregularities and as a result diseases of the womanly organs are more common than any one but a physician in active practice could suppose.

After long experience in the treatment of women's diseases, Dr. Pierce evolved a vegetable tonic and corrective which he called Dr. Pierce's Favorite Prescription. This is a purely vegetable preparation, without a particle of alcohol contained in it.

When a woman complains of back-ache, dizziness or pain—when everything looks black before her eyes—a dragging feeling, with nervousness, she should turn to this "temperance" herbal tonic. It can be obtained in almost every drug store in the land and the ingredients are printed in plain English on the wrapper. Put up in tablets or liquid. Dr. Pierce, of Invalids' Hotel, Buffalo, N. Y., will send a trial size of the tablets for ten cents.

2.51% BEER—the Beer of the Ballot—is not Intoxicating

A determination as to whether or not a particular beer is intoxicating can be reached only by a proper understanding and analysis of the manner in which the alcohol in such beer affects the human organism.

Beer containing 2.51% alcohol by weight has been proven non-intoxicating by actual experiments, scientific tests, thorough research.

Fourteen specially qualified experts, testifying before the United States Circuit Courts of Appeals, were unanimous in agreeing that beer containing even as high as 2.75% alcohol by weight (or .24% stronger than the beer of the Referendum Ballot) was non-intoxicating.

These experts were Professors of Chemistry, Toxicology, Therapeutics, Nerve Specialists, Physical Training Instructors, Medical Doctors and specialists in charge of city departments where alcoholics were cared for. Experiments were conducted upon twenty-four men chosen from various walks of life—medical students, laborers, mechanics, business executives, clerks in banks and brokers' offices, artists, writers and professional men.

The experiments proved conclusively that beer of 2.75% alcoholic content strength could not possibly be intoxicating—not the slightest signs of intoxication were shown by any of the subjects.

In view of the sworn statements of these experts, based upon the results of their experiments, that beer containing 2.75% alcohol by weight is non-intoxicating, it must follow that 2.51% beer, the Beer of the Ballot, is non-intoxicating.

It is the strong conviction of the Citizens' Liberty League that—as no harmful results can possibly come from drinking 2.51% beer—then there is no fair or just reason why the general sale of beer of this quality should not be permitted.

Unite with the Citizens' Liberty League in its earnest, sincere endeavor to obtain moderate Temperance Legislation.

Vote "YES" to all Four Questions

Mark your ballot with an X. Any other marking will spoil it. Remember, also—every voter must vote on every question or his ballot will be spoiled

Ontario general election will be held on Monday, October 20, the same day as the referendum on the Ontario Temperance Act. The date of the election was June 29, 1914. The parties were the Conservatives, Liberals, Progressives, and Labor. The Conservatives were defeated, and the Liberals formed a government. The Ontario Temperance Act was passed, and the province became a dry one.

CHERRY-BLOSSOM LAND

Japanese Give Good Example

It is a proverb of Cherry Blossom Land that beauty of face and figure depend on womanly health. What is it that makes our Canadian women often pale, sallow-faced, with dark circles under the eyes, and very often old at forty-five when they should be in their prime? Women suffer in girlhood from back-pain, rheumatism and headaches, followed by general debility and as a result diseases of womanly organs are more common than they are. A purely vegetable preparation, Dr. Pierce's Favorite Prescription, could suppose.

long experience in the treatment of women's diseases. Dr. Pierce evolved a tonic and corrective which he called Dr. Pierce's Favorite Prescription. It is a purely vegetable preparation, and contains no alcohol.

What are Peps

Peps provide a new treatment for coughs, colds and lung troubles. They are little tablets made up from Pine extracts and medicinal essences. When put into the mouth these medicinal ingredients turn into healing vapors, which are breathed down direct to the lungs, throat and bronchial tubes. The Peps treatment is direct. Swallowing cough mixtures into the stomach, to cure ailments and disorders in throat and lungs, is indirect. Peps are revolutionizing the treatment of colds and their price is within the reach of all. All dealers, 50c. box. Send 1c. stamp for FREE TRIAL PACKAGE.

Do you consider your bread a Luxury as well as a Necessity? If so, then you want the best. Our ever-increasing trade and satisfied customers are reasons why you will not be disappointed if you give us a trial.

Now is the time for Weddings and your wedding will not be complete unless you have one of our cakes.

High School Field Days

The annual Field Days of the Watford High School were held in the Park on the 25th and 30th of September. On the first day the weather was fine and the sports went off well under the able direction of Mr. Ballantyne, the different events were carried out and the championship for the year decided upon. The students entered heartily into the various contests and emphasized the feeling of unity existing among them, as pupils of the Watford High School.

For the second day, a goodly number of boys and girls from Strathroy Collegiate Institute, and a baseball team from Forest, came for the events. The sports were not much interfered with by the damp weather and were entered into with a spirit of friendly competition and good feeling.

The day was brought to a suitable conclusion by a banquet in the Armory at which the Watford students entertained the visitors.

JUNIOR GIRLS.
Throwing the Basket Ball—A. McNaughton 38' 8"; M. Irwin 33' 5"; R. Bruce 32' 3".
Throwing the Baseball—A. McNaughton, D. Fowler, H. Williamson.

ALL WEAR VELVET
Material Also Popular for the Small Girl.

Enters Largely into Construction of Best Frocks as Well as Garments for School Wear.

Everyone wears velvet this winter. This means that the small girl is either entirely or partially velvet-robed during the majority of her wide-awake hours. Velvet is not used to develop evening frocks for the very young, but it enters very largely into the construction of many best or "Sunday" frocks, as well as into the garment designed for school wear. The dress made entirely of velvet is usually very picturesque and distinguished, with white collar and cuffs, and often a wide sash of satin in self or contrasting color. For school or service wear a velvet skirt may be accompanied by a blouse of crepe de chine or satin, or a sleeveless velveteen blouse may be worn over a plain or plaid frock of serviceable wool material.

The sketch shows a smart little frock for a girl of six or eight years, combining a one-piece dress of plaid serge in red and black with a square cut, hip-length coat of black velvet or velveteen, finished at the neck with a ruffle of white organdie or georgette. The sleeves of the jacket are cut short enough to show a few inches of the plaid sleeve.

The cap to be worn with this outfit may match either dress proper or jacket, or a combination of the two materials may be employed.

A great deal of attention is being paid to clothes for children this winter, and it is interesting to observe the exactness with which the wardrobe of the well-dressed grown-up is copied in miniature for the child.

Sleeveless and low-necked under-slips of pale colored silks and satins.

Velvet and Plaid Serge Dress.

for girls as young as four years are shown, to be worn under little party frocks of net and other sheer fabrics. Hand-embroidered silk pajamas and silk nightgowns are also developed for these very little people. This scheme of dressing has its advantages, too. It is a real education in the art of being well dressed, started at the right time.

Is He Seventeen or Eighteen?

Do you remember those ages, when your character was being formed — how you followed examples, did what other people did — your senior years at school — your start in business? Recall them if you can. You gained a knowledge you will find useful when your own boy starts out.

Give him the right start. Teach him the value of personal appearance and self respect. Tell him how confidence may be gained merely from a clean shave—or, better still, *show* him—and show him in a practical way.

Give him a GILLETTE Safety Razor

and make his morning shave come easy. The old time pulling and scraping is a thing of the past. The haphazard element is gone. There is no need for your boy to know anything but the ease and comfort of the Gillette shave. It is the razor of his time—that to which he is entitled—nothing more, nothing less.

Sold at most stores catering to the needs of men.

The Gillette Safety Razor Company of Canada, Limited, 73 St. Alexander Street, Montreal, Que. 554

ARKONA

The Evaporator opened for operation this week.

Silo filling is the order of the day around here.

Mr. Wm. Evans Jr., returned home from Detroit last week.

Miss Edith Waterman is visiting her sister, Mrs. S. Lucas, Alvinston.

Mrs. Moulton, of Toronto, visited her niece, Mrs. J. F. Dickison.

Miss Margaret Fuller is visiting Miss Ella Copeland of London this week.

Miss Muriel Dewar spent the weekend with Miss Jessie Ridlev.

Mrs. J. G. Brown has returned home from a trip to the North West and Chicago.

Mrs. A. W. Augustine and Miss Annie Augustine are visiting relatives in Port Colborne.

Messrs. Wm. Williams and Ed. Crawford spent a couple of days last week in London.

Miss Shirley Pressy is spending a few weeks at her home here, owing to the illness of her mother.

Mrs. Detwiler, who has lately returned from points in the West, is visiting her parents, Mr. and Mrs. Ranks.

Several young people motored to London to attend Epworth League Convention on Thursday.

Placed into Stock this week the new Styles in Ladies Fall Shoes. The most complete range we have ever shown. See them.—Brown Bros.

THE MAN WITH ASTHMA, almost longs for death to end his suffering. He sees ahead only years of endless torment with intervals of rest which are themselves fraught with never ceasing fear of renewed attacks. Let him turn to Dr. J. D. Kellogg's Asthma Remedy and know what complete relief it can give. Let him but use it faithfully and he will find his asthma a thing of the past.

Friends not a few were cast into a cloud of sorrow last week when the news of Joseph Fair's death came. He was found dead in his bed Monday morning, having passed away, apparently of heart failure, during the night, at his home in Durand, Mich. He resided with Mrs. Wm. Wyley, his sister. Mrs. William Evans, another sister, left Arkona the next day to attend the funeral.

Large congregations assembled on Sunday last in the Baptist church to say farewell to Miss Anna C. Murray on the eve of her return to India. She joins a party of eighteen returning missionaries after the big Farewell, this Friday, in Massey Music Hall, Toronto. She left for London, Montreal and other points, Monday afternoon.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work irreparable harm to the constitution of the infant. The little sufferers cannot voice their ailment, but there are many signs by which mothers are made aware that a dose of Miller's Worm Powder is necessary. These powders act quickly and will expel worms from the system without any inconvenience to the child.

Special Thanksgiving Services will be held in the Baptist church, Sunday, at 11 a.m. and 7 p.m. with messages in song and sermon appropriate to the occasion.

Monday following the annual Rally of the B. Y. P. O. of Middlesex and Lambton Association will be held here. Among the interesting items on the programme will be a debate by representatives of two of the visiting young people's societies on the question of "Evangelism or Social Service, Which is the More Important?"

The Rev. Albert Hughes, one of McMaster University's most brilliant graduates, will be among the speakers.

KERWOOD

(Too late for last week)

Mrs. Johnston and little daughter, of Detroit, visited her aunt, Mrs. Gilbert Dowding.

Mrs. Chas. Sunday of Carlisle, Pa., has returned after spending a few days with relatives in the village.

Mr. and Mrs. Geo. B. Preston have returned to Detroit spending a week with the former's grandmother, Mrs. Brandreth, and other friends.

A family reunion was held at the home of Mrs. Wm. Leacock when Mrs. Brandreth's family, namely, Mrs. Case of East Torras, Mich., Mrs. (Dr.) Preston of Carlisle, Pa., Dr. Brandreth, Strathroy, Mrs. J. M. Brunt and Mrs. W. Leacock of the village spent a very enjoyable time together.

On Thursday evening about fifty of the young people met at the home of Mr. and Mrs. Richard Demary where a miscellaneous shower was tendered their daughter, Miss Winnifred, prior to her coming marriage. A very pleasant time was spent.

The Women's Institute held a very successful meeting at the home of Mrs. Redmond with about 45 ladies in attendance. The program consisted of a solo by Miss Beer, a duet by Misses Sullivan and papers by Miss T. Brunt and Mrs. Jas. Sullivan. Each number was exceptionally well given. A delightful luncheon was then served. During the afternoon Mr. Harry Smith took several pictures of the Institute members and their hostess. The next meeting will be held at the home of Mrs. H. Kerr.

FOR FALL SEASON

Serges, Wool Velours, Tricotines, Among Favored Fabrics.

Styles in Coats and Suits Are Said to Be Leaning Toward the Smartly Tailored Effects.

With the fall buying season fairly under way, manufacturers of coats and suits for women feel that they are now in a position to form a fairly accurate idea as to what will be the leading features for the coming season, both as to materials and as to the manner in which they are to be worked up, says a fashion writer in New York Times. There are few, if any, new novelty materials available for their purposes, and it seems that for coats such more or less staple fabrics as serges, wool velours, tricotines, silvertones, and oxfords are in the highest favor with buyers. Some plain and novelty plushes are also selling. The leading suit materials thus far and those which manufacturers believe will be the best throughout the fall and winter, are broadcloths, men's wear serges, tricotines, and a few plushes.

Styles in both coats and suits are said to be tending unmistakably toward smartly tailored effects. A severity and plainness in this respect which borders on the mannish are creeping in, and partly for this reason, it is thought, colors are usually confined to the darker shades. While this is given as the general direction in which styles are drifting, there are, however, exceptions. Many shades of tan are seen, ranging all the way from sand to very dark brown. There is also a liberal sprinkling in most lines of such shades as geranium red, French blue and Nile green. This latter color, however, is said to meet with only perfunctory approval either in coats or in suits.

Some houses are featuring furs for trimming on both coats and suits, but many others are using furs sparingly. The majority opinion in the trade seems to be that prices are already high enough without the addition of expensive furs, and the early experiences in many showrooms, from all accounts, have demonstrated that buyers with but few exceptions concur in this belief.

There seems to have been considerable effort expended this season on the development of new ideas in collars for coats, and quite a few more or less novel treatments have resulted which are apparently pleasing to many buyers.

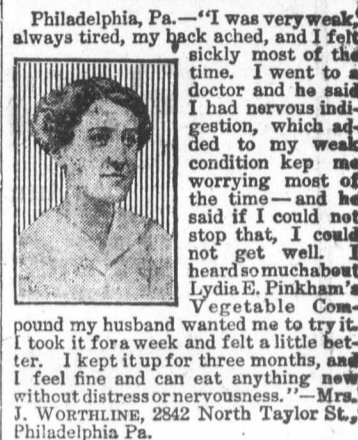

OLIVE OIL.

Although olive oil as a food and medicinal oil can be replaced very largely by other vegetable oils, there are one or two technical uses, wool spinning, for instance, for which no entirely satisfactory substitute has yet been found.

Tokio has an astronomical observatory that for size and completeness will equal anything in the world.

THIS WEEK, NERVOUS MOTHER

Tells How Lydia E. Pinkham's Vegetable Compound Restored Her Health.

Philadelphia, Pa.—"I was very weak, always tired, my back ached, and I felt sickly most of the time. I went to a doctor and he said I had nervous indigestion, which added to my weak condition kept me worrying most of the time—and he said if I could not stop that, I could not get well. I heard so much about Lydia E. Pinkham's Vegetable Compound my husband wanted me to try it. I took it for a week and felt a little better. I kept it up for three months, and I feel fine and can eat anything now without distress or nervousness."—Mrs. J. WORTHLINE, 2842 North Taylor St., Philadelphia Pa.

The majority of mothers nowadays overdo, there are so many demands upon their time and strength; the result is invariably a weakened, run-down, nervous condition with headaches, back-ache, irritability and depression—and soon more serious ailments develop. It is at such periods in life that Lydia E. Pinkham's Vegetable Compound will restore a normal healthy condition, as it did to Mrs. Worthline.

BUILD IT NOW

Reconstruct the Old Home For Longer Usefulness

Reconstruction begins at home. If the old house isn't all you desire, and you can't build a new one, a little of the right kind of repairing and remodeling will readily restore it to present day standards.

Perhaps it's a new porch, a summer kitchen, a side entrance, a new roof, extra rooms in the attic or a renewing of old, cracked walls and ceilings that is needed.

The right kind of lumber used in the right way will make the change and we have all the material you will require including that knotless and crackless manufactured lumber Beaver Board, for better walls and ceilings.

Suppose you ask us about it?

Geo. Chambers Est.

AGENTS WATFORD jan3

TO THE ELECTORS Of The Riding of East Lambton

LADIES AND GENTLEMEN,—

At a recent convention of the Liberal Conservatives of this riding, held at Watford, at which Sir William Hearst was present, I was the unanimous choice as the standard bearer for the Conservative party in the coming provincial election to be held on the 20th instant.

I have had the honor of representing you in the Legislative Assembly since June 1914 and during that time I have endeavored in every way to advance the best interests of Lambton County.

I have always felt that when a member is elected he should forget his politics and in every way work for the interests of his riding, this I have tried to do, and if my work has met with your approval I ask you to give me your support in the coming election.

We have just passed through five years of war and discontent, and during that time there has not been one breath of scandal against the Ontario Government, of which Sir William Hearst is the head. Sir William has done his work nobly and well and with two sons at the front, he has not been without his worries.

I think I can safely say without boasting, that I have accomplished more for Lambton county during the past five years than has ever been done before. I have secured for you an annual grant of \$350.00 for your own show, and this in itself has advertised Lambton county as it has not been advertised before. As a result of this grant our farmers now have a market for their seed corn as far north as Simcoe county and as far east as Leeds. I have also secured for you an annual grant for a fruit and vegetable show amounting to \$250.00, this I secured four years ago, but owing to the failure of the fruit for the past two years only one show has been held, that in the city of Sarnia, I hope to reorganize this show this year in the northern part of the county. I have also had the Sydenham river stocked with small

mouthed black bass fingerlings and expect to have the southern part of the stream stocked with pickeral next year.

I have also arranged with the Department of Agriculture for a grant of \$1500.00 for the erection of a winter fair building at Petrolia for a corn show, poultry show, fruit and vegetable show, and dispersion sale of pure bred live stock, this means a week's fair at the town of Petrolia.

Having accomplished this much for the county, I feel that I have very good reasons for asking for your support in the coming contest.

As to the Ontario Temperance Act. I was one of the first members of the house to support it. I believe it was a wise measure, and if elected, I shall support it again as I have done in the past.

Yours very truly,
J. B. MARTYN.

Alvinston, October 6th, 1919

RHEUMATIC PEOPLE

Can Only Find Relief by Enriching the Blood.

Rheumatism is a disorder of the blood. It attacks people when the blood is overcharged with acid and impurities, thus setting up inflammation in the muscles and joints. Wet weather or cold weather of autumn may start the tortures of rheumatism, but is not the cause. The cause is in the blood and the blood only. Victims of this malady have every reason to fear the first dull ache in the limbs and joints, followed by sharp pains through the flesh and muscles; these are the symptoms of poison in the blood which may shortly leave the victim pain-racked and helpless.

There is only one way to cure rheumatism, and that is through the blood. Liniments, hot applications, and rubbing may give temporary ease, but cannot possibly root the trouble out of the system. That can only be done by the rich, red blood which Dr. Williams' Pink Pills actually make. This new blood drives out the poisonous acids and impurities, and the rheumatism disappears. If you are a sufferer from this painful malady begin curing yourself to-day by the use of Dr. Williams' Pink Pills, and see how soon the pains and stiffness of the joints fade away, leaving behind new energy and new health.

You can get Dr. Williams' Pink Pills from any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

WATFORD COUNCIL.

Watford, October 6, 1919.
Regular meeting of Council. Present—Johnston, Harper, Doan and Stapleford. Minutes of last regular and special meetings were read; no objections offered; Reeve confirmed same.

Doan—Harper, that we grant Messrs. Williams Bros. the privilege of putting down a gas tank at the edge of Main St. sidewalk in front of their premises, not to interfere with drain on street and assume all breaks and repairs, keep the walks in good repair and protect traffic.—Carried.

Stapleford—Harper, that the Council of the Village of Watford endorse the request of a loan of \$3,000,000.00 from the County of Lambton in connection with the Victory Loan of 1919, and request the citizens of Watford to do all in their power to help the County meet their objective.—Carried.

Stapleford—Doan, that the account for \$348.00 for rings for soldiers made to the Soldiers' Aid Commission be paid, with the understanding that the village be exempt from any grant towards a memorial for fallen soldiers.—Carried.

Finance committee examined accounts and recommended payment.

C. A. Class, rings for soldiers.....	\$348 00
John McIntosh, labor at cemetery.....	11 00

DIMITY AND DOTTED SWISS

Fabric Used for Blouses Which Give Most Pleasing Effect—Handkerchief Linens Used.

Dimity and dotted swiss blouses are made up in smartly tailored waists which button up to the chin and have long sleeves and tight-fitting cuffs. So many women like this sort of waist for morning wear and for sports that it is a delight to find it in these two such cool and fresh materials.

The organdie waist, which was brought out some seasons ago, never really caught on, though it was attractive in the rather vivid shades of blue, rose and canary. The organdie being so transparent, though so delightfully crisp, it looked particularly refreshing. Blouses made of it seemed practically two, as the smoothest fitting and most perfect of linings only underneath could be permitted.

It is the handkerchief linens which have supplanted these transparent beauties, and the linen lends all the charm of color which the crisp organdie presented. Many of the white linen waists have touches of color, as for instance in one smart model which has three stripes of color, one below the other and on each shoulder, these forming a sort of yoke. Very narrow frills finish the little yoke at the shoulders and trim the shallow, round collar and small cuffs.

Smocks for Girls.

The pretty little cotton smocks and frocks worn by Miss Eight-Year-Old are made smart with cross-stitching or something in brightly contrasting wool. Pale green cotton crepe de chine, for example, is trimmed with stitches of rose wool. All kinds of wool dresses have oriental effects done in coarse stitches on the pockets, collars or sash ends. Wool embroidery, many times ornaments the frock, about the neck, as a substitute for the white collar worn formerly.

A man at Milwaukee ninety-two years old has applied for a divorce. Another case of the first hundred years being the worst.

To the Voter

TO establish that the 2.51% beer to be voted on—the "Beer of the Ballot"—is not intoxicating, The Ontario Brewers' Association deposited \$5,000 with the Canada Permanent Trust Company on September 16th.

On September 19th, The Ontario Brewers' Association formally challenged the Referendum Committee through the Press to deposit an equal amount with the same Trust Company to support their contention that this beer is intoxicating.

That challenge has never been accepted—clear admittance by the Referendum Committee they do not consider that they have a case. It is too late now to make the tests and render a decision before the day of voting—October 20th—but the failure of the Referendum Committee to answer our challenge will not be overlooked by the man or woman who votes on facts and evidence, and not on sentiment or false statements.

We again assert that 2.51% beer—"The Beer of the Ballot"—is not intoxicating. Tests have only recently been made which prove this conclusively—we will mail a copy of the test to anyone sufficiently interested to write for it.

Moreover, while the "Beer of the Ballot" has an alcoholic strength of but 2.51%, official tests made by the laboratory of the Inland Revenue Department—published in Bulletin 196—showed that the beers on general sale before The Ontario Temperance Act and Prohibition were enacted, had an alcoholic content ranging as high as 7.33% by weight measure—practically three times as strong as the beer to be voted on October 20th. Even such American beers as were sold in Canada and always spoken of as "very light, non-intoxicating beers," were over fifty per cent. stronger than the "Beer of the Ballot."

The "Beer of the Ballot" is a mildly stimulating, healthful and refreshing beverage, brewed from a high grade of malt and hops—containing only sufficient alcohol to make it digestible and nourishing.

Ontario Brewers' Association.

EAK, IS MOTHER

Lydia E. Pinkham's
Vegetable Compound
for Her Health.

"I was very weak, back ached, and I felt sickly most of the time. I went to a doctor and he said I had nervous indigestion, which added to my weak condition. I was worrying most of the time—and he said if I could not stop that, I could not get well. I heard so much about Lydia E. Pinkham's Vegetable Compound that I wanted to try it. I took it for three months, and an eat anything new without nervousness."—Mrs. M. Taylor, 42 North Taylor St.,

of mothers nowadays so many demands on strength; the result weakened, run-down, with headaches, back-ache and depression—and 33 ailments develop. Is in life that Lydia E. Pinkham's Vegetable Compound will healthy condition, as thine.

New Fall Shoes

for Men, Women and
Children

New shipments are coming in every week—as often as we can secure them and many of our customers, realizing that shoes are going higher and higher in price, are buying two pair now. They will see how much they have saved on them before spring. If you want to save money on your shoes come in and get them now. Every shipment we receive, the price is higher.

P. Dodds & Son

Children Cry for Fletcher's

CASTORIA

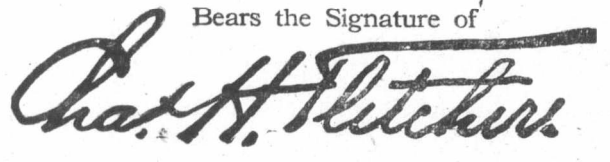

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

In Use For Over 30 Years

THE CENTAUR COMPANY, NEW YORK CITY

YOU NEED NOT STOP

working or playing, as the case may be, when you sustain a skin injury, so long as you apply Zam-Buk at once. This herbal balm will stop the bleeding, end the pain, destroy all germs, prevent blood-poisoning and heal quickly.

Zam-Buk should be in every home, especially where there are children. Children who have once had Zam-Buk applied will cry for it again. They never forget a remedy that ends their pain. Get a box to-day and keep it handy. Zam-Buk will keep indefinitely without losing any of its strength or purity. As a household balm, therefore, it is most economical.

Equally good for cuts, burns, scalds, bruises, sores, rashes and eczema. All dealers 50c. box.

Zam-Buk

A Word of Advice

Have Your Furnace or Boiler Put in Order Now

Don't wait any longer than necessary to have this work done. The cost of repair parts is steadily advancing, and the labor situation shows no sign of improving.

Get our Repair Department on the telephone to-day and give us your order.

No matter what style or make of heating apparatus you have, we can secure the required parts.

Watford.

RIGHT-HAND MAN OF LENINE.

Radek is the Arch-Conspirator of Bolshevism.

No attraction of opposites could be more striking than that between Nicolai Lenine and Karl Radek, the Damon and Pythias of Bolshevism. In their devotion to the republic of the Soviets they are one. In all else, according to the Petit Parisien, they are as the poles asunder, for Lenine inclines to moderation and Radek is the most fanatical of Spartacides.

Lenine, we learn from our French contemporary, is of goodly size physically. Radek is a pale, slim youth when not in one of his countless disguises. Lenine is quietly dressed, his linen always white and starched. Radek is true to Bolshevism in the picturesqueness of his madly-synthesized attire, the collar rolling, the hair a bush atop of the skull, the coat looking as if it had been slept in. Lenine evidently has a bourgeois tailor, but Radek looks as if he had attired himself out of the stock of a theatrical costumier who specialized in the period of the Robespierre terror. Lenine is bald. Radek has almost as much hair as Trotzky unless we are to assume that the real Radek is never seen through his perfect disguises. Some journalists accuse him of running regularly across to Paris in false wig and whiskers, equipped with forged passports that bear the most suspicious scrutiny. Lenine looks hungry and emaciated. Radek has lots of neck, but his huge head neutralizes that accident. One would deem Lenine a country doctor. Radek looks like a metropolitan actor. Lenine has spectacles, a notebook and lead pencil that he chews nervously. No one ever saw Radek with such a professional apparatus, even when disguised.

Lenine is mild and smiling. Radek looks violent even in repose, and when in action his gestures make him look like a windmill. Lenine is satisfied and confident. Radek is nervous of speech, declamatory, argumentative, shouting proletarian ideas with a wave of a substantial fist. Lenine is no Jew, despite many statements that he is; but Radek is a Jew to the finger-tips. Lenine, again, is a true native Russian, whereas Radek is a Galician Pole who has been Germanized, but Germanized romantically, even poetically.

Radek's occupation is that of traveling man for Bolshevism, its agent in the field, and thus he shows markedly the difference between his temperament and that of the contemplative Lenine. All conspiracies must be hatched by the people's "commissars" at headquarters, but Radek is the only man with authority to actualize, realize, dramatize them in the name and with the authority of the Soviet republic. Radek will undertake to overthrow any bourgeois government anywhere, but he is true to Bolshevism and will never set to work until Lenine gives the order. Whether he is leading his bands through the Thiergarten at Berlin or blowing up the royal palace at Bucharest, Radek, the man of action, knows neither fear nor defeat, and he shouts his hatred of the bourgeoisie with a fury that makes Len-

me seem tame. Radek in point is a master of intrigue.

This remarkable pair have been friends, according to the Paris press, for a long time, although there is a decided difference in their ages, Radek being much Lenine's junior. The intimacy began when Radek, then known as Sobelsohn, was having his troubles with the Socialists of Warsaw. Sobelsohn, or Radek, spent his early manhood in the Jewish quarter of Warsaw, the London Post says.

Schelde Was Barred to Belgium.

The broad river Schelde winds its way through western Belgium and finally empties into the North Sea as a wide estuary studded with islands, writes Lothrop Stoddard in the World's Work. Some distance inland above this estuary, but with water deep enough to float the largest ocean steamships, lies the great port of Antwerp. Antwerp is marked out by nature as the sea-gate to the whole Belgian area, and flourished during the Middle Ages. But in the sixteenth century came the revolt of the Dutch against Spain, who then owned both Belgium and Holland. The inhabitants of the lower Schelde estuary, who had always felt themselves to be part of the Dutch region to the north rather than the Belgian region to the east and south, joined the revolt and freed from Spanish rule not merely the islands but also the mainland fringe along the southern bank of the lower Schelde—the district known as Dutch Flanders. After nearly a century of war, Holland forced Spain to recognize her independence in 1648, and, by one of the clauses of the treaty, Spain recognized Holland's right to close the Schelde to navigation, thus making Antwerp an inland town. The Vienna Congress of 1815 laid down the principle that navigable rivers which flowed through more than one country should be free for the merchant shipping of the inland nations.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Extremator. Lend the crippled soldier a hand—Buy Victory Bonds.

Holloway's Corn Cure takes the corn out by the roots. Try it and prove it.

Taylor's Throat and Lung Balm

is different from ordinary cough syrups, mixtures, etc., because it acts not only upon the throat and lung passages, but also upon the eliminating organs of the body. This enables the system to throw off the worst cough or cold in a few hours.

Taylor's Throat and Lung Balm gives almost instant relief, and as the dose is small—only 1/2 teaspoonful—it cannot upset the stomach.

Prices 35c, 65c, \$1.20

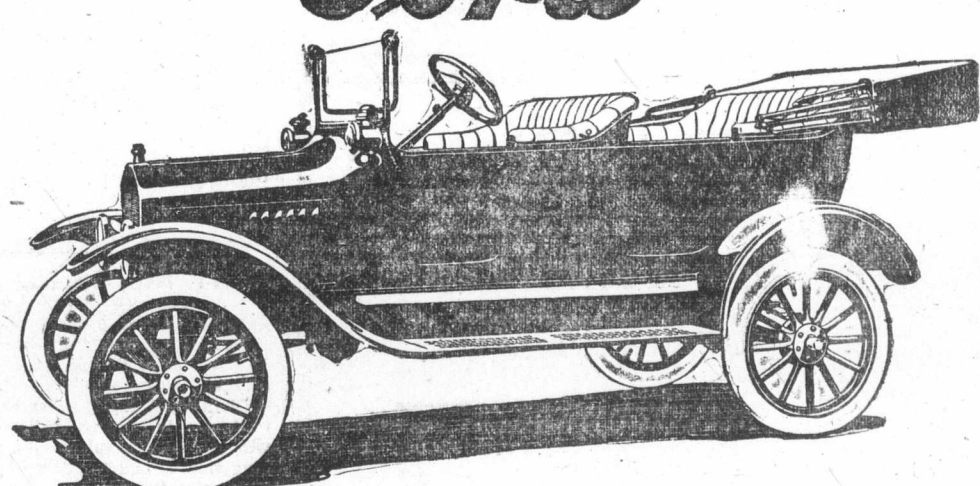

Nothing equals our Stomach and Liver Cure for a general tonic.

Ford

"A Joan of Arc Machine"

SHE withstood everything in the field and above all was, and still is, the last and only car to survive until the cessation of hostilities"—Extract from letter received by Ford Motor Company from a British Soldier, in Africa.

Over shell-torn roads, through water soaked fields, second only to the tanks in its power to climb debris and crater holes, the Ford car made a world famous record in the fighting area of the great war. In press despatches, in field reports, in letters, in rhyme and song the praises of the Ford were sounded.

In France	-	700 cars out of 1,000 were Fords
In Italy	-	850 cars out of 1,000 were Fords
In Egypt	-	996 cars out of 1,000 were Fords
In Mesopotamia	-	999 cars out of 1,000 were Fords

The Ford power plant that established this world-wide record in every theatre of the war remains the same. It will be in the Ford you buy.

Ford Runabout, \$660. Touring, \$690. On open models the Electric Starting and Lighting Equipment is \$100 extra. Coupe, \$975. Sedan, \$1,175 (closed model prices include Electric Starting and Lighting Equipment). Demountable rims, tire-carrier and non-skid tires on rear as optional equipment on closed cars only at \$25 extra. These prices are f. o. b. Ford, Ont., and do not include War Tax.

Buy only Genuine Ford Parts. 700 Canadian Dealers and over 2,000 Service Garages supply them.

FREED AFTER SERVING 10 YEARS PUNISHMENT

MAN CONVICTED OF NEGLIGENCE IS
EMANCIPATED AFTER NEW
TRIAL.

A case which deserves much thoughtful consideration is that of Wm. H. Barron, 103 Morgan Street, Bennington. For ten years Mr. Barron suffered the agonies caused by rheumatism. At times he was bound hand and foot by the grip of rheumatic pains. On the advice of a friend he stood for a new trial and used T.R.C.'s.

Read what he has to say:—
"I have been a sufferer from Rheumatism for ten years. Have been so bad at times I could not move hand or foot for months. A friend advised me to try Templeton's Rheumatic Capsules, and I have been thankful ever since. They worked wonders for me, and I have never felt any return of the disease."

It's practically impossible to obtain evidence stronger than this testimonial, and a word to the wise is always sufficient. If you suffer, have a new trial—use T.R.C.'s.

Sole Agents for Watford, J. W. McLaren, druggist, the Rexall Store, or if you live out of town mail \$1.04 to the above address or to Templeton's Limited, 142 King Street West, Toronto, and capsules will be sent postpaid.

DRAINAGE OF HILLSIDES

Wet Surfaces Greatly Improved
by Tile Drains.

Only by Keeping Individual Milk
Records Can the Dairyman Weed
Out All His Unprofitable Cows—
Monthly Milk Record Sheets Are
Furnished Free.

(Contributed by Ontario Department of
Agriculture, Toronto.)

THE erosion of hillsides and
the flooding of the land be-
low by the eroded material
has long been a worry and
an economical loss to many farmers
in hilly and mountainous sections.
This can frequently be prevented,
and the method employed depends on
the conditions existing, such as the
nature of the soil; light or heavy,
the steepness of the slope, and the
type of agriculture practiced; pasture
or tilled crops.

Wet hillsides used as sheep pas-
tures may be much improved by what
are sometimes called "sheep-drains."
These are merely shallow open
ditches about 30 inches wide on top,
nine inches wide on the bottom, and
18 inches deep for removing the sur-
face water, and carry it in a defi-
nite channel to a suitable outlet at
the base of the hill. The removed
earth should be thrown out on the
lower side to form a sort of em-
bankment to the drain. The grade
of the ditch should not be so steep
as to give the water sufficient force
to destroy the drain by either wash-
ing away the banks or digging the
drain itself deeper and thus making
it dangerous for the sheep and lambs.
Sub-drains are sometimes necessary.

A system of terracing is quite
universally used to prevent destruc-
tive washouts on hillsides. The ter-
races are made perfectly level and
of any width and then carefully seed-
ed to grass. At the time of rain the
water spreads out evenly over the
surface of these and then flows gen-
tly over the slope below without suffi-
cient force to wash away any portion
of the hill and thus prevents
"gulleying."

For the drainage of tilled hillsides
a system of under-drains is some-
times used successfully. The amount
of erosion of the land largely de-
pends on its condition. If the sur-
face soil can be kept firm the erosion
will be lessened. Soft spots on the
hillside, though, frequently occur as
a result of seepage water from above
which has penetrated the surface
soil and reached an impervious layer
and thus deflected to the surface on
the side of the hill. Water flowing
over this with considerable force will
naturally wash it away more easily
than the firmer soil free from this
seepage water.

If tile drains are so laid to inter-
cept this seepage water, considerable
erosion can be prevented. If the hill-
side is comparatively steep, drains
laid at an angle to the incline will be
more satisfactory. They will naturally
intercept all of the water flowing
through the soil above them. Also
the grade will be less and the drains
are not so liable to be affected by the
water moving slowly through them.
If the slope is not very steep the
drains may be laid down the incline
with satisfactory results. Here the
tile drains the land on both sides
and so double draining results.

In this under-drainage the general
benefits are again obtained. The
water level is lowered, thus giving
more root capacity to plants and the
prevention of surface washing by
allowing the water to penetrate
through the soil to the drains, thus
carrying much plant food to the roots
of the plants.—R. C. Moffatt, M.A.,
O. A. College, Guelph.

Methods of Keeping Cow Records.
Four things are necessary for keep-
ing cow records:

1. A monthly milk sheet, ruled so
that there shall be a column for re-
cording the weight of the morning
and evening milking of each cow for
each day of the month, though some
use a sheet ruled for three days only,
and estimate the weight of milk given
for the month from these three days,
which may be consecutive, or on the
first, tenth and twentieth of the
month, making ten-day periods be-
tween. The Ontario Department of
Agriculture, Toronto, will furnish
(free) monthly milk record sheets
to those interested.
2. A milk scale—preferably one
having a dial face and two hands, one
of which shows the net weight of
milk in the pail, when properly set.
This scale costs about five dollars.
3. A four to eight bottle Babcock
test, where it is desired to know what
each cow's milk tests in fat. This
will cost from eight to twelve dollars
complete. (If a member of a cow-
testing association or convenient to
a creamery or cheese factory, ar-
rangements can usually be made to
test the samples, hence the tester is
not needed, but a progressive dairy-
man should have his own testing out-
fit and use it.)
4. The fourth and most important

requirement is "THE WRITING."
Without this, milk sheets, scales,
testers, etc., are valueless. By having
scale, sheet, pencil, sample bottles
properly labelled, etc., all conveni-
ently arranged, it takes but little time
to keep a record of each milking cow
in the herd.

We would add a fifth need, which
is some form of permanent record
book for monthly totals and tests, as
milk sheets, and notes or records of
testing, are likely to be lost and not
available for reference. But if these
are recorded once a month in a per-
manent form, they will prove a source
of help in breeding, feeding and
weeding dairy cows.—Prof. H. H.
Dean, O. A. College, Guelph.

FOR BURNS AND SCALDS.—Dr. Thomas'
Electric Oil will take the fire out of a
burn or scald more rapidly than any
other preparation. It should be at hand
in every kitchen so that it may be avail-
able at any time. There is no prepara-
tion required. Just apply the oil to the
burn or scald and the pain will abate and
in a short time cease altogether.

Use only three level tea-
spoonfuls for five cups

Has Done Good Work Ontario Temperance Act A Great Benefit to Province

THE Ontario Temperance Act has reduced
crime by over one-third and drunkenness in
public has practically disappeared.

Alcoholic insanity has disappeared.

Gold cures and alcoholic institutes for treat-
ing alcoholism have been closed for lack of
patients.

Ontario has been saved an annual drink bill of
\$36,000,000, enough to pay our share of interest
on the War Debt.

Many victims of alcohol three years ago, thank
God to-day for the Ontario Temperance Act.

To repeal the Ontario Temperance Act would be a calamity. The
amendments would make it practically worthless. To every ques-
tion on the Referendum vote NO.

Abraham Lincoln

"The Liquor traffic is a
cancer in society, eating out
the vitals and threatening
destruction, and all attempts
to regulate it will not only
prove abortive but will ag-
gravate the evil. It must be
eradicated—not a root must
be left behind."

Drink is a Cancer

Doctors, Alienists, Criminolog-
ists, Insurance Actuaries, States-
men, Generals, Big Business Men,
and Social Workers agree that
alcohol as a beverage is a racial
poison and a national curse.

British Columbia, Alberta, Sas-
katchewan, Manitoba, Quebec (ex-
cepting beer and wine), New
Brunswick, Nova Scotia, Prince

Edward Island and Newfoundland
have enacted prohibition.

The United States is perman-
ently "dry."

France has abolished absinthe,
Scotland has now a local option
law, England is initiating a great
campaign for temperance reform.
The movement is world wide.

Ontario must go forward, or be left behind, but be careful

How to Grow Plants for Winter From Cuttings.

August Ploughing Destroys a Considerable Proportion of White Grubs and Wire Worms Infesting Old Sod Fields—Flax Is a Splendid Crop for a First Crop on Such Fields.

(Contributed by Ontario Department of Agriculture, Toronto.)

TOWARD the end of the summer, the amateur flower grower often wonders how the stock of geraniums in the flower border can be increased and preserved by some other means than by taking up the old plants in

the autumn; the last named method not having, perhaps, proved successful in past seasons. By starting fairly early, toward the end of August, before cold chilly nights appear, a nice supply of young plants, more especially of all kinds of geraniums of the flowering kind, or those having fragrant leaves, or even the bronze or silver-leaved kinds, can be had by starting cuttings or slips of these plants. First of all obtain a shallow box about three inches deep, ten or twelve inches wide, and from twelve to twenty-four inches in length, an empty huddle (fish) box will do very well. It should have some small holes bored through the bottom for drainage. Pack this box firmly with moist, clean, gritty sand; sand that will make good stone mortar will do. Then take the terminal or top part of the young growth of plants about four or five inches in length, each shoot or cutting having from four to six joints where leaves are produced. Make the base of the cutting just below one of these nodes or leaf joints, making a clean cut with a sharp knife flat across. Cut off some of the lower leaves, leaving two or three leaves at the top. Cut off all bloom buds and blossoms where possible. Make a hole or drill in the wall of sand deep enough to set fully half the length of stems of cuttings in the sand. Water them well once and keep the sand moist until cuttings are rooted, which should be in five or six weeks' time. The box can be set out of doors in partial shade until the first week in September, when they can be taken into the window. When cuttings have roots about an inch in length dig them carefully from the sand without injuring the roots and pot them singly into small 2 1/2 inch pots or set them about two inches apart in well-drained shallow boxes in a soil made up of one part sand, one part leaf mould, and about six parts of light loamy soil enriched with one part of dry pulverized cow manure from the pasture field. This last is one of the best possible fertilizers for soil for pot plants. Set the young plants in the window in a temperature of 60 to 70 deg. Fahr., an ordinary house temperature. — William Hunt, O. A. College, Guelph.

White Grubs and Wireworms.
White grubs are the larvae of the large dark brown May beetles, or "June Bugs," as they are commonly called, and, being underground feeders, are very difficult to control. A great variety of experiments have been made with chemicals of many sorts, but none has proved successful. The only method of control is the adoption of a system of rotation of crops. No field should be left in grass for more than three years. An old pasture, when broken up, is often found to be full of these grubs, and they will attack the roots of any plants that are sown in place of their ordinary food which has been removed. Corn and potatoes will suffer severely, but clover is least affected by them and may be seeded down with rye. After the second year any crop will usually be safe. Deep ploughing in October before the weather becomes cold will expose the grubs and destroy many. Pigs and poultry, crows and other birds and skunks greedily devour them. Where an old field is found to be badly infested, it is a good plan to turn in some hogs; they will soon root out and eat up all the grubs. If the field is large it would be well to confine them with hurdles to a small portion at a time, and when that is cleared move them on to a fresh feeding ground.

Wireworms are the larvae of Click beetles, so called from their curious habit of springing up in the air with a "click" when laid upon their backs. The beetles are long and narrow, rounded above, with very short legs, and usually dull gray or black in color. The grubs are long and round, with a very hard skin, from which they get their name of Wireworms, and yellow or whitish in color. Their life-history is very similar to that of the White Grubs, as they thrive in old pastures and take two or three years to mature. They feed upon the roots of any plants that may be grown where they are, and are especially injurious to corn and potatoes, in the latter of which they often burrow great holes. As in the case of the White Grubs, no treatment of the soil with poisons of any kind has been found effective. There is a prevalent idea that salt will kill them, but this is an entire mistake. The only remedy is a short rotation of crops as in the case of White Grubs. Ploughing in August and cross-ploughing in September will destroy great numbers. Clean cultivation, leaving no weeds or other shelter for the beetles, in fence corners and elsewhere is also of importance. Flax is a particularly valuable crop for sowing on old sod, as the worms injure it but very little. Break up the old pastures is the advice all farmers should follow.—Dr. C. J. S. Bethune, O. A. College, Guelph.

The Canadian Oil Refinery, Petrolia, have contracted with the local Hydro Electric Commission for 63 horse power of electric energy. The refinery are putting in four motors as an experiment and if found satisfactory will equip all their works with others.

Residents in the neighborhood of Wyoming, Watford, Dresden, Alvinston, Inwood, Bridgen and many other places come to ROBSON, Petrolia, to be photographed.

From the leading makers of England and Canada. Ladies will find the new Chamoisette Gloves to give perfect satisfaction and an ideal weight for fall wear. They come in all sizes in shades of grey, brown, castor, black and white at.....\$1.00 and \$1.25 per pair.

A. Brown & Co.

"The Store that Satisfies."

Good News!

At last we have received an import shipment of

Limoaes China

Along with our favorite 6225 pattern we have received two new patterns—one, a plain White and Gold and the other a Dainty Rose pattern. Both these new patterns will be placed in open stock and can be bought a piece at a time as desired.

See our windows for a display of these two new patterns.

Next Wednesday, Oct. 15

COL. GEORGE W. BAIN

will give his world-famous lecture,

"If I Could Live Life Over"

This is a lecture that sums up, in wit and wisdom, the rich experiences of a most successful career. It will prove invaluable to the young, inspiring to those in middle life, and a rare treat for all.

THIS IS A LECTURE WITH A PURPOSE.
