

# COMMANDER PEARY REACHES NORTH POLE APRIL 6, 1909, BUT FAILS TO FIND ANY TRACE OF EXPLORER F. W. COOK

## SUSSEX EXHIBITION OPENED MONDAY

Hon. J. K. Flemming, Officiates—Fair One of the Best Ever Held in Kings County Town.

SUSSEX, N. B., Sept. 8.—The annual exhibition of the Sunnyside and Stoddard Agricultural Association was formally opened this evening by Hon. J. K. Flemming. The other speakers were Dr. D. H. McAllister, M. P., James E. Murray, M. P., W. B. Dickson, M. P., and Col. H. Montgomery Campbell. A programme of music by the Sussex Infants Orchestra, Col. Montgomery Campbell, as chairman, with a few brief remarks introduced Hon. J. K. Flemming as the speaker of the evening. He announced that the teachers' institute would be held Thursday, and on Friday there would be an address by the judge. Hon. Mr. Flemming followed the chairman. It afforded him, he said, a great deal of pleasure to attend the opening of the Sussex Exhibition. Exhibitions were the most important factors in the progress of the province. As far as the Sussex exhibition was concerned, the exhibits which he had seen were a credit to that part of the province. The farmer nowadays must be educated in agriculture. New Brunswick was the best to be bought anywhere and the world was realizing the fact. Dr. McAllister was the next speaker. He spoke of the value of the exhibition to a nation and also of the prominent place it occupied among the professions. James A. Murray, M. P., endorsed Hon. Mr. Flemming's remarks concerning agricultural education. W. B. Dickson, M. P., congratulated the people of Sussex on the excellence of the exhibition.

The attendance so far has been very large. The amusements features are first class. Prof. Shaw's pony, dog and monkey circus being the main feature. Among the exhibitors at the local fair with exhibits in the main building are J. A. McArthur, Sussex; D. Magee, St. John's, who has a fine exhibit of furs; the Sussex Artillery; W. G. Abel of Sussex; A. G. Gould, artist; M. B. Keith, Petticoat; Ladies' Art Club of Sussex; E. W. McDougall, who has a splendid exhibit of corn; J. J. Goodfellow and others. At a meeting of the Every Day Club last evening, the members decided to send Messrs. Brooks, Sterling and Stubbs to Halifax to compete in the maritime championship sports to be held in that city on Saturday next. These men will represent the club in the sports. With the good records that they hold, it is expected that they will meet with great success in the maritime championship sports. Messrs. Brooks and Stubbs will be the club's delegates to the annual meeting of the M. E. A. A. to be held on Saturday evening.

Peary's success in reaching the North Pole is a historic achievement. He led an expedition of three men and a dog team to the North Pole on April 6, 1909. His journey was fraught with danger and difficulty, but he persevered and reached the top of the world. His discovery of the North Pole is a landmark event in the history of exploration.

Mrs. Peary's role in the expedition was crucial. She managed the supplies and provided moral support to her husband and the other crew members. Her presence was a source of strength and comfort for everyone on the journey.

Mrs. Peary's dedication and courage are a testament to the spirit of exploration. She faced the same hardships and dangers as her husband and the other crew members. Her contributions to the expedition were invaluable.

## WIRES FLASH HIS SUCCESS

### Peary Sends Message to His Wife and Others--Conquest Now Complete

### DR. COOK HEARS THE NEWS Glad of It, He Declares-- Captain Bartlett Says There Was Nothing to Indicate Cook's Success

ST. JOHN'S, N. S., Sept. 8.—Captain Peary found nothing to indicate that Dr. Cook reached the Pole. Peary does not expressly repudiate Dr. Cook's intention in so many words. PEARY, Sept. 8.—Commander Peary announced April 6th as the date of his reaching the North Pole, in a despatch to the New York Times reading as follows: "Indian Harbor, via Cape Race, N.F., September 6. "To the New York Times, New York: "I have the Pole April 6th. Expect arrive Chateau Bay, September 7th. Secure control wire for me there and arrange expedite transmission big story." (Signed) "PEARY."

The date Peary refers to is April of the present year, although not stated in the despatch, as his expedition to the Pole did not leave until July, 1908.

WIRE FROM MCMILLAN, WORCESTER, Mass., Sept. 8.—Dr. D. Abercrombie, principal of Worcester Academy, received the following despatch at three o'clock this afternoon over the Postal Telegraph Company's lines: "Indian Harbor, Nfld., Sept. 8, 1909. "Dr. D. Abercrombie, Worcester Academy, Worcester, Mass.: "Top of the earth reached at last. Greetings to faculty and boys." (Signed) "B. D. MCMILLAN."

COPENHAGEN STARTED. COPENHAGEN was electrified tonight by the report of Commander Peary's announcement that he had reached the North Pole. Dr. Cook was immensely interested and said, "That is good news. I hope Peary did get to the Pole. His observations and reports on that region will confirm me." Asked if there were any probability of Peary's having found the tube containing his records, Dr. Cook replied: "I hope so, but that is doubtful on account of the drift." Dr. Cook added: "Commander Peary would have reached the Pole this year, probably while I was in the Arctic region last year, his route was several hundred miles east of mine. We are rivals, of course, but the Pole is good enough for two. "That two men got to the Pole along different paths," continued the explorer, "should furnish large additions to scientific knowledge. Probably other parties will reach it in the next years, since every explorer is helped by the experience of his predecessors. As my Sverdrup's observations and reports were of immeasurable help to me, I can say nothing more without knowing further details than that I am glad of it." While Dr. Cook was conversing casually this morning with American friends the possibility of the announcement which electrified the world was laughingly suggested. Dr. Cook remarked: "It is quite possible that Peary will

## ALLAN LINER WRECKED OFF THE NEWFOUNDLAND COAST

ST. JOHN'S, N. S., Sept. 8.—Thrilling scenes attended the loss of the Allan Line steamer Laurentian, bound from Boston for Glasgow, which piled up on the rocks near Cape Race during a dense fog at six o'clock this morning. The vessel is a total wreck, but the entire list of passengers and the crew escaped to land after a trying experience. The Laurentian left Boston Friday and when off the coast of Nova Scotia ran into a thick fog bank, which compelled her to run at reduced speed. Early this morning the steamer was making about 13 knots an hour when she struck the rocks near Cape Race, probably the most dangerous section of the Newfoundland coast. Captain Imrie took a course more northerly than usual and the thick fog caused him to lose his reckoning. The steamer carried 20 cabin passengers and 20 persons in the steerage, the crew numbering 46. When the ship struck she rebounded heavily, the shock throwing most of the passengers who were all asleep at the time, from their berths. They stampeded for the deck without stopping to dress and for half an hour much excitement prevailed. Captain Imrie and his officers, however, succeeded in quieting all hands and persuaded everyone to return to quarters and dress. A stiff northwest wind banged the ship about and the situation became so serious at 7 o'clock that orders were given to put the ship's boats overboard. Twenty-five of these people, mostly women and children, were placed in the first boat, but unluckily the boat collapsed and several persons were thrown into the sea. Others who managed to cling to the half-upturned boat were injured by the thumping of the small craft against the sides of the collapsing Atlantic liner. Had Ropes Thrown Captain Imrie and his officers had ropes thrown from the deck and within 15 minutes those who had been clinging to the ship were drawn to the deck. The passengers in the disabled boat were also rescued. Finally six more lifeboats were put over, but the passengers say that some of the seamen of the Laurentian did not know how to row and that they were obliged to handle the oars themselves. The seas constantly drenched the shipwrecked people and it was only by constant bailing that the lifeboats were kept afloat. To add to the troubles of all hands, no one knew just where the ship had struck, and in consequence it was decided not to approach too closely to the beach lest the lifeboats be dashed to pieces on the iron-bound coast where in many places the cliffs rise to a height of 80 feet. About 10 o'clock, after the boats had been adrift two hours, there was a lift in the fog and a boat from a nearby fishing village was sighted. The fishing boat piloted the life craft to a harbor, where the passengers and crew were cared for. A steamer left St. John's late tonight to bring the shipwrecked people to this port.

## MRS. PEARY HEARS THE GLAD TIDINGS

### Peary Wires Her—She Tells Him to Hurry Home

SOUTH HARPSWELL, Me., Sept. 8.—Commander Robert E. Peary announced his success in discovering the North Pole to his wife, who is summering at Eagle Island here, as follows: "Indian Harbor, via Cape Race, Sept. 6, 1909. "Mrs. R. E. Peary, "South Harpswell, Me.: "Have made good at last. I have the old pole. Am well. Love. Will wire again from Chateau. (Signed) "ROBERT." In reply Mrs. Peary sent the following despatch: "South Harpswell, Sept. 8. "Commander R. E. Peary, "St. Roches rd., Chateau Bay: "All well. Best love. God bless you. Hurry home. (Signed) "JO."

## PEARY SAILED FROM NEW YORK, JULY 6, 1908

### Hoped to Plant Stars and Stripes at Pole Within a Year

NEW YORK, Sept. 8.—The last Peary expedition sailed from New York July 6, 1908. Commander Peary's last words were: "Unless unforeseen circumstances intervene within the next year I hope to plant the Stars and Stripes at the Pole." From New York the Roosevelt went to Sydney, thence to Hawk's Harbor, where she took supplies, then crossed Davis Strait to Holstenberg and followed the coast from there to Cape York. Peary was rescued some time in August, and from that point the route of the expedition can only be conjectured from the plans its commander had already announced.

## LITTLE BOY SEIZED WITH CONVULSIONS

### Willie Hughson Passes Away Without Regaining Consciousness

The home of Mr. and Mrs. James Hughson of Millidgeville was cast into sadness, when it became known yesterday morning that little Willie, as he is known to all, had been taken from their midst. On Sunday morning about ten o'clock the little fellow, who was particularly bright and the picture of perfect health, was suddenly seized with convulsions, from which, until about nine o'clock yesterday morning, when he breathed his last, he never fully recovered consciousness. He was the youngest child of a family of four—three boys and one girl—being about one and a half years old. The funeral will be held on Wednesday afternoon from St. Clement's church, the steamer Maggie Miller making a special trip, leaving Millidgeville at one o'clock. Interment will be made at White Head, Kings County.

## BRIGHTEN UP

There are very few houses that don't contain something that could be improved in appearance by the use of Paint or Varnish. Ask your dealer for SHERWIN-WILLIAMS PAINTS AND VARNISHES. Made in Canada. THE SHERWIN-WILLIAMS CO. Montreal, Toronto, Winnipeg.

## HUNGARIANS HOLD UP JOHN DAY AND ONE IS ABOUT TO SHOOT HIM WHEN WOMAN INTERVENES

That Plaster Rock is becoming a typical wild and woolly western town was once more testified late Sunday night, when three Hungarians held up John Day. One pointed a revolver at him, and was about to shoot, when the intervention of a woman saved the Mr. Day from being a victim of the foreigners. About six Hungarians arrived in Plaster Rock three or four weeks ago. They found employment at Donald Fraser & Son's mill and took up their abode in an old shanty belonging to Mr. Day. Everything went off quietly until about 9 o'clock Sunday night, when three of the foreigners, with "Mike" Starns, supposed to be the ring-leader, went to Mr. Day's house, which is not far distant from their own apartments, and lurched their landlady to the street. One "knocked out" Day's "lim", a second pointed the revolver at the man's face, and the third shouted out, "Give it to him!"

The Hungarian was just about to fire his revolver when Mrs. McDonald ran between the bandits and tenants and shouted in an extremely loud manner. The three Hungarians became alarmed at the woman's yell, and quickly hid themselves to their hut. The trouble is supposed to have arisen over the fact that Mr. Day promised to supply his tenants with wood, and it is alleged that he failed to keep his promise. Matters of money concernment are looked for in the future, which have provoked the Hungarians.

Yesterday morning Constable Broad went in search of the three men and landed "Mike" Starns quite easily, and also succeeded in rounding up the other two about noon. They were taken to the jail at Plaster Rock and this morning will be brought to Antigonish, where their preliminary examination will likely be begun.

## AFTER ALMOST HALF A CENTURY OF SERVICE

Colonel Frederick S. Moore Retired From the Command of Military District No. 12.

(Charlottetown Patriot.)  
Today Colonel Frederick Strong Moore retires from the command of Military District Number Twelve, retaining his rank of Colonel. Colonel Moore was born August 14th, 1846, has been connected with the militia for nearly half a century, having enlisted in the local militia before Confederation at the age of sixteen. He attended the military school conducted by officers and instructors of the Imperial Army, for more than a year, was appointed a Second Lieutenant in the Provincial Militia on the 10th of March, 1867, Lieutenant on March twenty-sixth, 1867, and promoted to a Captaincy on May twenty-third, 1868. In 1868 he organized Number Two Battery, forming part of the Prince Edward Island Brigade, Garrison Artillery, which at once took a foremost place among the best in Canada.

At the first inspection as an artillery unit, this Battery captured the Governor General's prize for general efficiency, and continued to win the first prize every year, that he continued in command of the Battery. This Battery had the proud distinction of capturing the Governor General's first prize seven years in succession. In 1877 he was promoted Major, commanding the Brigade, and in 1889 he advanced still further to the position of Lieutenant General. In 1894 he was appointed to the command of Military District Number Twelve, with the title of Deputy Adjutant General, and in January, 1909, was promoted Colonel.

Colonel Moore also holds certificates of qualification first grade, A. B. S. A., issued from the Royal School of Artillery at Quebec, and this certificate has been twice duplicated, in July, 1884, and July, 1887. He also holds a certificate in Equitation, granted in October, 1888, by the Royal School of Cavalry. For several years he has been Vice-President of the Dominion Artillery Association. He is retired under the provision of King's Regulations and Orders, which provides that officers can retire on reaching the age allotted to the rank held.

The above facts show that Colonel Moore has a military record of which any officer in Canada would have reason to be proud. He was not only thoroughly at home in his profession, but was very popular with his fellow-officers and with the men of all ranks, who had confidence in him as an officer and who esteemed him as a gentleman. While possessing the firmness and dignity which make a commanding officer respected, he showed none of the snobishness nor the key exclusiveness of the martinet, for he was always approachable and sympathetic. A man of sterling character and high principles, he set a standard to his own life which could not fail to have an influence for good on the men under his command. In the various social duties pertaining to his military office the colonel displayed admirable tact and good taste which generally wait upon sound common sense.

Although the inexorable military law requires his retirement at a certain age, he is still full of that measure of strength and vigor which will make an officer respected, notice a matter of the distant future.

He is succeeded to the command of the District by Colonel George Hunter Ogilvie, who has been Deputy Staff Adjutant of St. John for some years past. Colonel Ogilvie is an officer of the B. C. R., who has been active service in the Northwest Rebellion in 1885, and in South Africa. He has had an excellent military record, and we trust his career here will be marked by the success attending his work elsewhere.

Eloquence is a painting of thought, and thus, those who, after having painted it, still add to it, make a picture instead of a portrait.

## WARRANT OUT FOR ALBERT FIRE BUG

House Owned by J. C. Prescott at New Ireland Set on Fire

HOPEWELL HILL, Sept. 6.—Some days ago a dwelling house at the Canada Settlement, New Ireland, owned by J. C. Prescott of Albert, was burned down, the circumstances being such as to prompt the opinion that the fire was not of accidental character. Yesterday information was received that a warrant had been issued for the arrest of a young man suspected of having set fire to the building. No arrest has yet been made but developments are looked for.

While C. L. Peck, registrar of deeds, was driving to his home here from the Cape on Friday, his horse stumbled on a stone and broke one of its legs, the accident necessitating the shooting of the animal, which was valued at \$125.

R. S. Wright, the winner of the Sun's prize touring car, arrived at his home at Hopewell Cape, last evening, with his machine, having ridden up from town, under the pilotage of an experienced driver. It is needless to say that the car is an object of much interest, and the residents of the shire have given it a pretty thorough examination. Mr. Wright's friends are greatly pleased at his success.

## WEDDINGS

**ROBILLIARD-SUTHERLAND.**  
Trinity Church will be the scene of an interesting wedding this afternoon at four o'clock when Dudley S. Robillard, of Creighton, England, employed in the St. John branch of the Canadian Fairbanks Company, will lead in the altar Miss Florence May Sutherland, second daughter of W. J. Sutherland, of M. R. A. Ltd. The ceremony will be performed by the curate of Trinity, Rev. J. W. Stewart, in the presence of the intimate friends and relatives of the contracting parties. The bride will be attended by a sister, wearing the conventional veil and orange blossoms and will be attended by her sister, Miss Maude St. John Sutherland, while Howard C. Gallant will support the groom. After the ceremony Mr. and Mrs. Robillard will leave for a wedding tour of American cities and on their return will reside in St. John.

The popularity of the young couple will be attested by a very beautiful wedding present among them a handsome brass clock from the Canadian Fairbanks Company and local friends and relatives fellow boarders at St. John's Hotel.

## CHAMBER-BETTS

NEWCASTLE, N. B., Sept. 7.—Intercolonial Station Master Pops Chamberlain of Doaktown and Miss Martha Betts of Doaktown, were united in marriage at the same place were married yesterday in the Doaktown Baptist Church, Rev. J. C. Belyea officiating.

The bride was attended by Edward Mitchell and Miss Winnie Belyea. They left last night for a wedding trip to Montreal and other points.

## MOONEY-DONOVAN

A very pretty wedding took place this morning at the Cathedral of the Immaculate Conception when Miss Gertrude Geoghegan Donovan was united in marriage by the Rev. A. H. McMan to Mr. John Mooney of Geoghegan Station. The bride looked charming in a suit of cream serge with white corded silk hat with ostrich plumes. The groom was wearing a very pretty gown of pale blue with hat to match. The groom was supported by Mr. John Simmons, the wedding breakfast was served at the home of the bride's sister, immediately after which the happy couple left on the Boston train for two weeks in Boston and New York. The bride's going away suit was of London make with hat to match. The numerous gifts testified to the esteem in which the young couple are held by their many friends.

## SIMMONS-MELLIDAY

A pretty wedding was solemnized at the Cathedral of the Immaculate Conception on Monday morning at 6 o'clock, by Rev. A. W. Mosher, when Alexander J. Simmons was united in wedlock to Anna E. Melliday, daughter of Francis X. Melliday. The bride was accompanied by Mrs. J. J. Taylor, made traveling costume, of green cloth and wore a hat of old rose. She was attended by her sister, Frances,

## MR. CURTISS' BIPLANE IN FLIGHT

A special train from Albert and Hillsboro today took a large number of excursionists to the Catholic picnic at Salsbery, and to Moncton.

who wore a pretty costume of champagne tulle with trimmings of pale blue and large black velvet hat. The groom was supported by his brother, John W. Simmons.

After the ceremony a wedding breakfast was served at the residence of the bride's parents to the bride and groom and their immediate relatives. The happy couple left by steamer Prince Rupert for a two week honeymoon trip through Nova Scotia and on their return will reside at 19 Castle street.

The numerous and beautiful gifts which they received testified to the popularity of the young couple. From the groom's associates with T. H. Estabrook they received an English china tea set of rare design. The groom's gift to the bride was a gold and pearl bracelet; to the bride a gold and pearl crescent brooch, and to the groom a pearl stick pin. Mr. John F. Melliday, brother of the bride, came from New York to attend the ceremony.

## ROBINSON-SIMONDS

The wedding of Miss Frances Mary Simonds and Mr. Gilbert Kennedy Robinson of London, England, will take place this afternoon at half-past four in Trinity church, Rev. Mr. Stewart will be the officiating clergyman and Mr. Evid will preside at the organ.

The bride will be attended in a tailored suit of blue Rajah silk. The bride will be given in white braided and white moire revers. The picture hat is of blue Ottoman, trimmed with blue marabout and large gold buckle. She will be given in white braided and white moire revers. The picture hat is of blue Ottoman, trimmed with blue marabout and large gold buckle. She will be given in white braided and white moire revers. The picture hat is of blue Ottoman, trimmed with blue marabout and large gold buckle.

After the ceremony the wedding party will take the train for Montreal, where they will make their home.

## FILEWELLING-VANMANN

The home of D. A. Vaughan, Wellington Row, was the scene of a pretty wedding yesterday, when his daughter, Miss Eva Blanche, was united in marriage to Justus Sherwood Wetmore Filewelling of Hampton. The ceremony took place at 3 p. m. in Rev. W. Camp officiating. The groom was assisted by his father, Mr. W. E. Vroom.

Miss Gertrude DeBury will act as bridesmaid and Mr. H. H. Smith will support the groom.

After the ceremony the wedding party will take the train for Montreal, where they will make their home.

## ATON-MACMULLIN

A largely attended marriage was solemnized at the home of Mrs. W. P. MacMullin, Harland, on Wednesday, Sept. 7, the contracting parties being the daughter Janet and Frank A. Aton. The ceremony took place at 3:30 o'clock, Rev. J. B. Drasset officiating, assisted by Rev. Mr. Stevens.

The bride wore a witness gown of cream chiffon panama, en train, with princess lace bertha, and carried a shower bouquet of cream roses. She entered the parlor on the arm of her father amid the strains of Mendelssohn's Wedding March, rendered by Miss Ivy Bradbury, Mary, sister of the bride, acted as flower girl and wore a dress of white net over pink silk

and carried a basket of pink carnations. The spacious parlors were beautifully decorated with potted plants and cut flowers. After the ceremony a dainty luncheon was served. The presents were in abundance and costly, consisting of cut glass, silver china, table linen, furniture and several substantial cheques. The groom's present to the bride was a superb set of pearls, to the little flower girl a diamond ring was presented, and to Miss Bradley a pearl brooch. Mr. and Mrs. Aton left on the afternoon express for a honeymoon trip. Her travelling suit was of white broadcloth with hat to match. They have a cottage at the "Lodge" where they will remain two weeks. During their stay they will visit St. John, Digby and Amherst. On their return they will reside in the Vanward House. Both young people are widely known and very popular. The bride's father has been engaged in the fruit business for several years. The groom has a lucrative position as druggist with the Eddy & Curtis Co. Their many friends join in wishing them a long and happy wedded life.

## McLEAN-BRANSCOMBE

At Cumberland Bay, on Wednesday, the marriage of Capt. Arthur McLean, son of Mr. and Mrs. Donald McLean, St. John, N. B., and Miss Beatrice P. Branscombe, daughter of the late Thos. H. Branscombe, was celebrated in her home at half-past twelve o'clock.

The ceremony was performed by Rev. C. N. Barton, pastor of Lower-Prince William Church, York Co. N. B., and a cousin of the bride. The bride, who was given away by her brother, Mr. Harold A. Branscombe, was handsomely attired in a travelling suit of elegant gray broadcloth, with hat to match. The groom was the recipient of many beautiful wedding gifts, consisting of silver, china, cut glass and gold. The groom's present to the bride was a substantial check.

After the luncheon was partaken of the wedding party repaired to the station where Mr. and Mrs. McLean left on the two o'clock train on a bridal trip to Toronto and other Canadian cities. On their return Mr. and Mrs. McLean will reside in St. John.

## KIRKPATRICK-GRAHAM

An event of more than ordinary interest took place at Jubilee at four o'clock on the afternoon of Sept. 1st, at the home of Mrs. Jas. Graham, when her only daughter, Miss Leola

V., was united in matrimony to Mr. Burton L. Kirkpatrick of Hoyt. The ceremony was performed by Rev. J. K. King of Welsford, assisted by Rev. George Morris. The bride looked charming in a garment of white multi-colored tulle, and carried a bouquet of sweet peas. The groom was assisted by his brother, Mr. Alfred A. Kirkpatrick. About seventy of their near friends and relatives witnessed the ceremony. The groom was supported by his brother, Mr. Alfred A. Kirkpatrick. About seventy of their near friends and relatives witnessed the ceremony. The groom was supported by his brother, Mr. Alfred A. Kirkpatrick. About seventy of their near friends and relatives witnessed the ceremony.

The Kind You Have Always Bought  
Beware the Signature  
Dr. E. F. Sanden

## MISS LEACH DIDN'T REGAIN CONSCIOUSNESS

Stricken on Main Street on Friday Night She Expires Late Sunday Night

Miss Fannie Leach, who was suddenly stricken with paralysis on Friday evening near McMillan's drug store on Main street, passed away late Sunday night at the residence of her brother, 17 Simonds street. She never regained consciousness. Dr. J. C. McLean attended the young lady.

Miss Leach was well known in the North End, and her many friends will feel the loss of her life. Her death is a great loss to her family. She is survived by one brother, Thos. B. Leach of Simonds street. Her funeral service will be held at her brother's home this evening at eight o'clock, by Rev. N. H. McLaughlin, and interment of the remains will be made at Sussex tomorrow morning.

### FREE TO MEN

Until Robust Health, Strength and Vigor is Regained.

Perfect Manhood. The man of courage, of strong nerves, of self-confidence and undaunted energy. The embodiment of success, popular in every walk of life, respected and esteemed by all. Such is the manly man.

For forty years I have been making strong, vigorous men out of the puniest weaklings. A man comes to me weak, nervous, despondent and discouraged; with Drains, Losses, Impotency, Varicocele, Rheumatism, Lame Back, Kidney or Stomach Troubles. I give him my world-famed Dr. Sanden Electric Belt, with suspensory, absolutely free, to use for two months. Mind you, not one penny in advance, or on deposit. A few nights' use convinces him that he has found the right remedy. It fills him with new life, joy, vigor and strength, and at the end of the time he is only too glad to pay me for the Belt, and we recommend it to his friends.

This is the way I cure men. This is the way thousands every year regain their lost strength, without the slightest risk to themselves, for if I fail it costs you nothing whatever. You pay me only when cured, or if you want to pay cash, full wholesale discount.

My great success has brought me many imitations of my Belt, but my great knowledge, gained by forty years' experience, enabling me to guide you, and to give freely with the Belt. Be sure you get the genuine.

Call and take a Belt along. Or send for one and my two books on electricity and its medical use, which I send free, sealed, by mail.

### THEY SPENT TWO YEARS AMONG SAVAGES

English Nationalists Back  
PERILOUS TRIP  
Papuan Thirst for Blood—Head Hunting  
Pastime

LONDON, Sept. 7.—Three English nationalists, a father and two sons named Pratt, have just returned to England, after spending two years among the savages of Dutch New Guinea.

"Two years ago," says the Singapore correspondent of the Pall Mall Gazette, "the naturalist landed at Doreh, in Geelvinck Bay, where missionaries had been stationed for over fifty years. Behind Doreh stretch the Afrik mountains, with two large lakes lying at a height of 8,000 feet above the sea. The savages, who stretch their quarters in the midst of savage Papuans, whose characteristics they soon discovered were untouchableness and thirst for blood.

"They were right on the extreme fringe of the Dutch authority, so had to be careful. They found the savages far below the African natives, without knowledge or understanding of the most elementary virtues of kindness or thankfulness. They were of good physique and lived partly by agriculture, but their habits were loathsome.

"It was largely due to his ability to keep his temper even under provocation that Mr. Pratt was able to manage them. They fancied that the traveler must have supernatural powers to control his anger, and in addition to this the danger of being shot by the natives was a constant menace. They were of good physique and lived partly by agriculture, but their habits were loathsome.

### LOVE ROMANCE OF A SPANISH PRINCE

#### Titles and Honors Sacrificed for a Wife.

Niece of King Edward—King of Spain Much Incensed by His Cousin's Marriage.

A wonderful love-tale comes from Spain, Prince Alfonso of Orleans, first cousin of the King of Spain, having sacrificed his titles and honors to marry the girl of his choice, Princess Beatrice of Saxo-Coburg.

King Alfonso, being the union in account of the Princess Beatrice, a niece of King Edward, the Prince also took the law into his own hands, the wedding ceremony being performed according to both Roman Catholic and Protestant rites.

The King of Spain was so incensed, the more especially as all three brothers of the King's family have contracted marriages, that he has now deprived the Prince of the rank of Infante, and of the Orders of the Golden Fleece and of Charles III, and has dismissed him from the army.

In court circles at Madrid King Alfonso's action is attributed to Queen Ena of Spain, who it is said, has always maintained a bitter feeling against the Coburgs since the difference of opinion between her mother, Princess Beatrice of Denmark, and the Dowager-Duchess of Coburg, on questions of precedence at the English Court.

It is hoped that the measure will be only temporary, as in the case of the Grand Duke Cyril of Russia, who was deprived of his decorations for refusing to marry a sister of Princess Beatrice, but who was eventually reinstated with all honors.

The marriage had been in contemplation for over a year, took place last week at Coburg. When the marriage was first suggested, the Infante Prince Alfonso of Orleans, in opposition to the most energetic opposition, Prince Alfonso's own wedding to the Infanta Eulalia, and he was separated by mutual agreement for some years. When Prince Alfonso became aware of his father's opposition to the marriage he wrote, saying, "I shall marry the Princess Beatrice whatever the cost it may entail."

### KILLS WIFE OF GUEST, AS BURGLAR

#### Carolina Planter Fires With Shotgun in Darkness

Receiving No Answer to Challenge Physician, It is Said, Advised His Host to Fire—Husband Seen Tragedy.

CHARLESTON, S. C., Sept. 7.—Mrs. C. C. Bigham, wife of Dr. C. C. Bigham, was shot and killed last night by a burglar, a prominent planter, who mistook her for a burglar. Mrs. Bigham had accompanied her husband on a professional visit to Avanti's home, Sunnyvale plantation, on Murrell's Inlet, near here.

Dr. Bigham and Mr. Avanti were sitting on the front porch of Avanti's home at about 10 o'clock last night, when a burglar, who was dressed in the darkness of a figure, passed the house and got toward a nearby creek. Not being answered when they called they got a shotgun and followed. They saw the figure apparently crouch near the creek bank and hearing no reply when they called, Avanti asked Dr. Bigham what he should do.

"Shoot it," said Dr. Bigham, it is alleged, and Mr. Avanti fired both barrels at close range, running back to the house, they obtained light, and returning to the creek bank, to find Mrs. Bigham stretched there dead. The contents of both barrels having struck her in the back. Even the gun was heard to penetrate her flesh.

Avanti then called the police and accompanied the deputy sheriff and coroner back to Murrell's Inlet.

### RAIL RACES A DAMPER ON THE ECHATHAM MEET

#### Only One Heat in Each Event Was Run, But Magnificent Racing Was Seen and Good Sport is Anticipated for Today

CHATHAM, N. B., Sept. 7.—There were three racing events on the card for the second day of the horse races, the 2:31 class, the named race and the free-for-all, but only one heat in each had been run off when rain fell so heavily that it was decided to postpone the races until next day. Some great racing is looked forward to as a result of these first heats for it was neck and neck in all of them, with three horses in each race near apart that there is no picking of winners, if the named race expected where Torbrook, Jr., looks very strong.

The named race was the first event called. There were three starters, Northern Star, drawing the pole and Torbrook, Jr., on the outside and Northern Star started well with Brown Hal close. Torbrook, Jr., struck his gait on the back stretch and walked to the front. Here Wery Willie showed a surprising spirit but could not hold it long enough to lap Torbrook, who kept his lead and finished first in 2:17 1/4.

In the next there were five starters. Those J. had the pole with Cecil Mack next. On the back stretch Cecil Mack went through the bunch like a rocket and struck a lively clip, followed by Cecil Mack and Cecil Mack. The positions remained the same until the back stretch the second time around was reached when driver Cummings put the seat to his horse and Wilton came to the utmost but Wilton proved too fast and he thundered under the wire a neck to the good. Cecil Mack came third and Cecil Mack fourth. Time 2:19 1/4. Wilton all but put himself in the 2:19 class in this heat and there were some watches caught his time as

### DETECTIVES SHOT BY A DESPERADO

#### Murderous Resistance to Arrest in Paris Flat.

A Master Criminal—Chief of Gang Who Rifled Churches and Museums in France.

A master criminal of a type more familiar in fiction than real life has been arrested in Paris after murdering M. Blot, deputy chief of the French Criminal Detective Department, and M. Mugat, an inspector.

The two police officers had visited the flat of a certain Emile Delaunay in the Rue de la Folle-Mercurio, situated on the road from the Place de la Republique to the Cemetery of Pere Lachaise. Delaunay shot them, one after the other, and then shot himself.

Two men were arrested and have been taking place in churches and museums round Paris and in the country, articles which could not be carried away being wantonly damaged, but every attempt to discover the culprits had failed until quite recently, when the Criminal Detective Department found a clue.

As it was not known whether Delaunay questioned the speaker of an individual who set them on the track of plunder and took charge of it when he was on the right track, Emile Delaunay was at the address given, the tenant of a small but smartly furnished second floor flat, containing an ante-chamber and a dining room communicating with a large bedroom, which in its turn opened on a kitchen. He had settled there in October, and was described as tall and very strongly built, and as being invariably well dressed.

### AMATEITE ROOFING

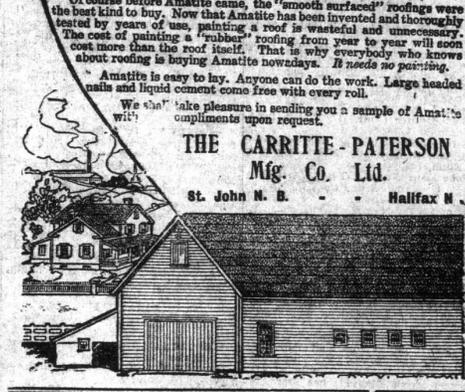

#### MINERAL SURFACE—NEEDS NO PAINTING

A MATITE roof needs no painting. The owner need never look at them; they take care of themselves. They are "no-trouble" roofs. They present to the weather a real mineral surface against which storm and wind and snow are absolutely powerless. This surface does not require constant painting like the smooth surfaced or so-called "rubber" roofings. The mineral surface is far better than paint.

Of course before Amateite came, the "smooth surfaced" roofings were the best kind to buy. Now that Amateite has been invented and thoroughly tested by years of use, painting a roof is wasteful and unnecessary. The cost of painting a "rubber" roofing from year to year will soon cost more than the roof itself. That is why everybody who knows about roofing is buying Amateite nowadays. It needs no painting.

Amateite is easy to lay. Anyone can do the work. Large headed nails and liquid cement come free with every roll.

We shall take pleasure in sending you a sample of Amateite on request.

THE CARRITTE-PATERSON Mfg. Co. Ltd. St. John N. B. - - - Halifax N.

### PULLED DOWN OLD GLORY, RELEASED BY COURT

Toronto Highlanders Would Not Have Their Bare Legs Belittled by American

TORONTO, Ont., Sept. 7.—Last Thursday night William Carson and James Mahoney, two Highland laddies, were wearing their "home" from the exhibition, arrayed in the full splendor of their Gaelic costumes. On Lincoln street they met an American, P. W. Benner, who scoffed at their naked legs and cast contempt on their Highland skirts. Benner was drawing attention to the beauty of the American flag which was hanging from the Alexandra Royal apartments on Lincoln street. After some words the Highlanders scaled the verandah and seized the "Old Glory" and wrenched it from the staff and cast it down into the dust and ashes. They were summoned, but the magistrate dismissed the case today.

### STRANDED IN BOSTON, STANLEY CARR RETURNS HOME AND IS PLACED UNDER ARREST

Stanley D. Carr, the ex-Waterloo Street grocer, who left the city about a week ago, having obtained from several prominent citizens large sums of money, totalling over \$1000, fell into the hands of the police early last evening, he having been forced to return to Boston, as he was penniless and could not obtain employment in the city.

Carr, who is only nineteen years of age, opened up a grocery, fruit and candy store at 7 Waterloo street about the first of July. He did not meet with very great success and began to purchase goods on extended credit. At various times he also borrowed sums of money from friends, and on Friday last he had pretty heavy accounts to pay and would like to have a loan for a few days. He was willingly given the money for a few days, but it was never returned, and immediately Carr's departure from the city, and action in the matter was at once taken. Fred Scott, his landlord, seized the stock, and immediately sent a man to Carr, but the amount being sixty dollars. Alvan H. Chapman, manager of the Equitable Life Insurance Company, from whom sixty dollars was obtained by Carr, laid the information against the young man, and served out the warrant for his apprehension.

Chief Clark learned that Carr was in Boston and immediately sent a man to Carr, but the amount being sixty dollars. Alvan H. Chapman, manager of the Equitable Life Insurance Company, from whom sixty dollars was obtained by Carr, laid the information against the young man, and served out the warrant for his apprehension.

### DESERTEE CHILDREN DISOWN FATHER, 87

Court Upholds Them Because Parent Had Neglected His Family

CHICAGO, Sept. 7.—"A father not willing to regard his children as a liability when they are powerless to help themselves is not entitled to consider them an asset when they are enjoying the fruits of prosperity."

This ruling by Judge A. H. Williams of McHenry county, temporarily occupying the bench in the Cook county court, spoiled the prospects of John Griffin from becoming a charge on the family he is alleged to have deserted thirty-seven years ago.

His four children told the court of their dead mother, and how she labored at the wash-tub to educate and clothe them.

Thomas Griffin, a well-to-do learning contractor, a son, was taken into court under the state support act, and "he has looked at his home with a contemptuous eye, and has neglected the story of abuse and neglect related against his father."

The old father knew none of them; and when Judge Williams instructed him to pick out his son and three daughters, who he had sought to support him now, he was unable to do so.

### COLD-BLOODED CRIME

He lived alone, a charwoman doing what work he needed, since, as he explained when he took the place, he was more often away than in Paris, as he was a commercial traveller. The man often went out on a bicycle, returning with boxes and parcels; indeed, he had asked the concierge to accept any that might come in his absence and to deposit them in his quarters, as it would be all right.

It was noticed, too, that he frequently went about in cabs and automobiles, and that the few meals which were cooked for him were comfortable, as he denied himself nothing. That there was some mystery about all this the neighbors had begun to amount to two inspectors made their inquiries, and, as tongues were freed freely, the police officers promptly jumped to the conclusion that here was the instigator of all the more recent church and museum robberies which had baffled their colleagues in town and country.

"So it was decided, says the "Telegraph," that Delaunay should be arrested, and minute search made on his premises. M. Blot being entrusted with the task. He set out at seven o'clock on Saturday evening with his secretary, M. Perot des Gachons, M. Doll, a chief inspector, and with Inspectors Mugat and Mathieu. On reaching the flat Delaunay was found in his dining room, so that he would probably remain there all night. M. Blot, however, had a key, and he ascended a narrow and very plain staircase, and on tapping at the door heard a woman behind it ask "Who is that?"

"Open in the name of the Law," replied M. Blot, adding who he was. The woman replied and was heard to say "Delaney, please, I am at home. I open." "Go away, I shall do it myself," the man answered in a deep voice, and he opened it.

Blot, however, had no door, so when his head poked in at M. Blot, who, putting his hand to his chest, tottered and fell backward into the arms of his secretary and Inspector Doll, rushed for Delaunay.

This murderous scene took place on the threshold of the door. M. Mugat and M. Perot des Gachons tried to hold M. Blot up, and carried him away. At the same time the other detective, M. Leon Mugat, followed by Inspector Doll, rushed for Delaunay.

M. Mugat tried to seize him by the collar, but Delaunay fired and wounded him. Still the detective clung to him, and hence struck a blow, M. Doll took out his revolver and fired at Delaunay, but missed him.

The bullet soon got the better of Mugat, and threw him on the floor. Standing over him, he then fired two shots through his back, which instantly killed the detective. Inspector Doll, who the murderer now inspected, sheltered himself behind the door, whereupon Delaunay closed and bolted it. A moment afterwards two more shots were heard, and Delaunay, who had blown out his brain, was afterwards apparent, fell beside the dead body of Mugat.

The three inspectors carried M. Blot down stairs and across the street to a pharmacy, where a doctor was soon in attendance. M. Blot had been shot by only a few words after he was wounded, and his few thoughts were about his wife. "I am dying," he said. "What a shock it will be to her!" When his last breath arrived, he was still breathing, but only very feebly, and had lost consciousness.

MURDERER'S SUICIDE.

The doctor tried every possible means of saving him, but from the first he saw that it was hopeless. He had been wounded in the region of the heart, and had an hour afterwards he was dead. A big crowd had already gathered in the street, and some three thou-

### SIAM WILL BE OPENED UPTO WESTERN TRADE

WASHINGTON, Sept. 8.—The Anglo-Siam treaty which was ratified July 16, has opened a channel for the bringing of some very stringent laws relating to the House of Bourbon, of which the King of Spain is the head, and no marriage of any member of a reigning Catholic family with a princess belonging to a Protestant House.

In reply to this Prince Alfonso declared his unalterable intention to proceed with the marriage, despite the opposition of his family, the law, and the Church.

The Prince is in a very difficult position, as his marriage without the King's consent has created the breaking of some very stringent laws relating to the House of Bourbon, of which the King of Spain is the head, and no marriage of any member of a reigning Catholic family with a princess belonging to a Protestant House.

### COBB CHARGED WITH INTENT TO MURDER

CLEVELAND, Ohio, Sept. 7.—A warrant charging Ty Cobb, right fielder of the Detroit American League baseball team, with assault with intent to kill, was sworn out today by J. J. Kleit, attorney for George Standfield, night watchman at the Euclid Hotel, who, it is said, was assaulted by the ball player in his room Saturday.

Standfield signed the affidavit in his room at the hotel, as it was said he is too weak to leave his bed.

Detective employed by a private agency will go to Detroit, where Cobb is now playing, to serve the warrant.

### SENSE ABOUT FOOD Facts About Food Worth Knowing

It is a serious question sometimes to know just what to eat, when a person's stomach is out of order and most foods cause trouble.

Grape-Nuts food can be taken at any time with the certainty that it will do good. Actual experience of people is valuable to anyone interested in foods.

A "Three Hints" woman writes: "I had suffered with indigestion for about four years, ever since an attack of typhoid fever, and at times could eat nothing but the very highest food, and then suffer such agony with my stomach I would wish I never had to eat anything."

"Our boy thinks he cannot eat a meal without Grape-Nuts, and he learns so fast at school that his teacher and other scholars comment on it. I am satisfied that it is because of the great nourishing elements in Grape-Nuts."

"It contains the phosphate of potash from wheat and barley which combines with albumen to make the gray matter of the brain and nerve centres."

"It is a pity that people do not give attention to feed their children. There are many mothers who give their young ones almost any kind of food and when they become sick begin to pour the medicine down them. The real way is to stick to proper food and be healthy and get along without medicine and expense."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

### THE "FAVORITE" is the Churn for a Woman

No more tired arms—no more aching backs.

The "Favorite" can be operated by hand or foot, or both—while you are sitting in a chair. Easier than a sewing machine. Steel roller bearings and other improvements make it the ideal churn for farm and dairy. 8 sizes, to churn from 1/2 to 30 gallons of cream.

Improved Roller Gear—covered—are only two of its many improvements. Beautifully finished in Oak, Rose Blue or Wine Color, and Silver Aluminum. Write for booklet about these universal favorites, if your dealer does not handle them.

### CANADIAN NORTHERN SHOPS FOR TORONTO

TORONTO, Sept. 7.—D. D. Mann stated today that the Canadian Northern Railway will erect its general repair and construction shops in Toronto, and will employ between two thousand five hundred and four thousand men. He stated also that work will commence this month on the construction of 120 miles of road east from Toronto, which will be the first section of the ultimate Toronto-Ottawa line. It was money for this line that William MacKenzie secured, as well as other money, on his last visit to the old country.

### FREDERICTON BUSINESS COLLEGE

FREDERICTON, N. B.

THIS SCHOOL IS Well Heated Well Lighted Thoroughly Ventilated and Equipped with all Modern Conveniences

Book-Keeping Commercial Arithmetic Correspondence

Commercial Law Book-Keeping in connection with Joint Stock Company Expert Accounting, Export Auditing, Banking Penmanship Shorthand Plain and Ornamental Typewriting Isaac Pitman Touch Method

Students have attended from all the Provinces east of Manitoba, several of the Eastern States, England and the West Indies.

The Principal has had an experience as a practical accountant and business educator dating from 1882.

The only school in New Brunswick in affiliation with the Business Educators' Association of Canada.

There is NO other Business College in the Province, which can give you such a thorough and practical training, place you in such comfortable and attractive rooms for study, and provide you with as complete an equipment for your work, as can the

FREDERICTON BUSINESS COLLEGE.

Don't think of attending a Business College, without first sending for a catalogue of the BEST school in the province.

STEADY NOT SENSATIONAL GROWTH WHAT IS WANTED

A great many farmers are so anxious to see their lambs do well from the beginning that they start right in feeding them large quantities of food...

There are several reasons why a lamb crowded in its early life does not prove a satisfactory feeder later. The tissues of its stomach are tender and delicate...

The aim during the early life of the lamb should be to produce bone and lean tissue, to get surface, in other words, on which to later put the finish...

George T. Angell died recently at his home in Boston at the ripe old age of 88 years. Mr. Angell was founder of the Society for the Prevention of Cruelty to Animals...

Some forty years ago St. August was an exceptionally plain, dry, and a good and rapidly growing pasture, and an extremely promising future...

Mr. Angell was a pioneer in a sort of philanthropy that was new to his age; and after the manner of all similar pioneers, ridicule, contempt, and continually were heaped upon him without stint...

Spring is here and with it again comes the problem of keeping the earth roads of the country in passable condition. No matter how well roads are graded...

The hen is getting her appreciation this season, for the price of fresh eggs has gone away. Many are worried at their hens not laying. An expert along this line says: "It is natural to all fowls to lay, or endeavor to lay, their eggs in spring, though the hen is willing that all the world should know after it is done that she has laid an egg."

It is advised to use a mixture of lime and sulphur in the bottom of the nest. The nest in the meadow is the hen's paradise, one of the stolen sweets of summer. Do not feed whole corn; do not make the hens too fat. Wheat with a little oats make a good whole grain food.

SWINE SUMMER AND FALL CROPS FOR THE PIGS

What is Best to Grow and the Economy of Its Production.

In this age of lean meat production, economical production of necessary foodstuffs is to be attained. The most profitable to grow is that which makes it possible to produce a large quantity of cheap production...

At the World's Fair at St. Louis in 1904, Figgis was champion and grand champion over 21 entries. She is entered in the register of merit, Class A, and has a total of 15 lbs. 10 oz. milk in her 17th year...

She did her work well as long as she could stand two weeks. In one morning she did not appear right. She lay down slowly, her pulse was weak, and she was all drawn up. I thought she was cold, for the weather was very cold...

For treating the fowls the most popular remedy is Potassium permanganate. This is used in a weak solution of one part to sixty parts water, into which the birds are dipped...

The little red mite is very common and very active, attacking the birds at night. By day it hides in the crevices and corners of buildings, in nooks, perches, floors, etc., where it may be found in great clusters.

One of the most eminent fattening known, and the one most commonly used in the Northwest, probably is corn. When this is brought off in the field as it should be, no feed is more economical or more effective.

POULTRY KEEPING DOWN VERMIN THAT INFEST HENS

Some Suggestions as to Getting Rid of Lice and Mites.

It seems a little hard to be obliged to chase the vermin daily and to keep them away from the flock. Nearly every one has a best way of his own, but they must be kept down, else they do not prosper.

Two early for the mites. Not a bit. We learned that lesson last spring. We thoroughly dusted the chickens with kerosene, and the lice and mites clean nest and fresh eggs to sit upon.

I have read a great deal about a fine insecticide and I think it would be all right on a level place where a person could use a tower, but in part of the country, where it is so hilly, you can not tell any moment whether your wagon would go over a lower ridge or out of the question.

One mistake common to most of us is that we plant the trees too close together. If we plant three or four trees in a row, they will shade each other and will not grow so well.

Most of our late apples from getting started after coming from the States, I went through our orchard the last part of September and I never saw an old worm on any of the fruit. If you don't, you just keep breeding insects faster than you can destroy them.

The building now shown is well suited to the needs of the suburban or village resident, or of the man owning a small tract of land, and making a specialty of gardening, poultry, bees or fruit. It can be varied within certain limits.

HORTICULTURE DOES IT PAY TO SPRAY QUERCY TREES CLOSE TOGETHER

A Great Mistle (Made) in Plants Trees Close Together.

It more than paid for me, and I would not want to raise apples without spraying. About fifteen years ago we started to spray and we always had a fair crop of apples, and there was not one year that we did not have apples to sell.

We started in with a barrel pump, but as we planted more and more trees each year it gave us more spraying and that is not an easy job in the summer time, especially in hot weather.

I have read a great deal about a fine insecticide and I think it would be all right on a level place where a person could use a tower, but in part of the country, where it is so hilly, you can not tell any moment whether your wagon would go over a lower ridge or out of the question.

As shown it has one single and one double horse stall. The latter can be used as a box stall. There are two single cow stalls. The cows are loose, being kept in by chains behind them. There is a harness room, shelves for milk, salt, etc., medicine cupboard, ventilator, three feed bins in hopper form, so to speak, for rough feed, and a stable and filling from above, and

DAIRYING COW WITH SHOW RECORD PREFERABLE

But the Animal Should Be a Heavy Milker.

A correspondent asks whether we would prefer to purchase a dairy cow with a show yard record or an animal plain in some parts, but one that could yield a heavy flow of milk? We would prefer to buy a cow with the show yard record and at the same time a heavy yielding cow.

It is a general custom to allow the udders of the cows to remain full of milk for approximately twenty-four hours (longer or shorter in different instances), before the animals enter the show ring. This results in spoiling the udder in numerous instances, and in any case is not good for the cow.

There is no reason why an animal should not be a good show ring winner and at the same time a good milk producer, except that there are not many cows which combine the two qualities to the point of perfection.

Most of our late apples from getting started after coming from the States, I went through our orchard the last part of September and I never saw an old worm on any of the fruit. If you don't, you just keep breeding insects faster than you can destroy them.

ANSWERS TO CORRESPONDENTS

NOTE:—Not more than one question from one correspondent can be counted. At one time. Questions should be specific, clear and brief. Answers should be addressed to the Editor of the Agricultural Department of the paper. Any person requiring answer by mail must enclose stamped envelope.

Worm Remedy.—W. K. I saw a remedy for worms in Harper's Sulphur, 10 oz.; pulv. spigelia, root, 8 oz.; pulv. poplar root, 20 oz. Are these liquid medicines? I had the prescription filled at the drug store and he gave me a root to be boiled and mixed. Ans.—The drugstore should have mixed all the powder together. Give a tablespoonful of the powder in feed three times daily.

After Foaling.—P. A.—How soon after foaling should a young mare be bred? How soon should she be worked? What age should she be when bred the first time? Ans.—If the mare does well and does not have to work too hard she can raise a colt each year from three years on. If carefully handled the mare will not need to rest more than two weeks. Many mares raise fine colts which are not given any rest after foaling.

Wire Cut.—C. B.—Mare was cut with barbed wire on her shoulder muscle. The cut was large but not deep. The cut was washed thoroughly with carbolic solution. In a day or two the leg swelled badly, but subsided after poulticing with flaxseed. There is now a soft spongy swelling. Is there danger of blood poison? I wash the swelling with carbolic and apply hard soap. Ans.—If the swelling is eating and feeling good, the swelling need not worry you. Pressure treatment is not good, but you may have daily exercises.

Lump on Test.—H. J.—I have a cow that came in fresh last spring and in one test just where it starts from the udder there was a little lump which stopped the flow of milk. She is coming fresh in about two weeks and that lump is there yet. Two days ago another cow came in and is in the same condition. What is the cause and treatment? Ans.—The little lumps or tumors in the teats can only be removed by a surgical operation. If the cows do not pass milk better sell for beef.

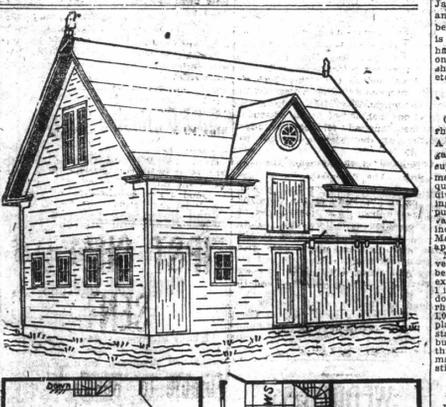

Ring Bone.—A. H.—I have a horse that has a large ununiform growth or bony enlargement on one of her hind legs. We have blistered several times this winter, but it does not seem to help. She is lame and rather drag her leg when she walks. It seems to be aching all the time, for she keeps it raised from the floor more than half the time. Please advise. The swelling is situated in the large socket. Ans.—You have done all you can. The swelling should have the horse treated surgically by a competent veterinarian.

Cows Shrink in Milk.—Subscriber.—My cow shrinks badly in milk; and seems to show out of condition after coming from the States. They seem to be listless; do not eat much; sometimes they even refuse to eat their grain feed. There is a peculiar odor about them that is very noticeable, especially when they are milked. I have a very prominent normal eruption on the udder; it is very dry. One cow that was milked in January, about two weeks after calving, and was sick about three weeks, and began to recover and now the milk flow is about normal. Now I have two that have just got sick and have two and one three weeks ago. Ans.—These cows should be fed on roots, carrots, potatoes, etc., with some bran meal each day.

HOW TO RAISE RHUBARB.—Give a good place and proper care a rhubarb or plantain is very productive. A dozen hills set on the south side of a garden wall or similar warm place will supply an average family. The plants may be grown from the seed, but the quickest way to get them started is by dividing old plants. These should be divided so that a few stalks are pulled the first season. The ordinary rhubarb is a good variety. It is a deep, dark red color. It is a good variety. It is a good variety. It is a good variety.

ANIMAL FOOD FOR POULTRY.—Bones and meat secured from the butcher and cut into fine pieces by means of a bone cutter are perhaps the best substitute for the insects a hen finds when on free range. Horse manure, being free from tuberculosis, is probably slightly preferable to that from the butcher's shank. Skin milk is a good substitute for meat, but being so bulky the fowls rarely use enough of it to supply the required nutriment unless it is soaked to a soft consistency. Dried chicken manure and the whey drawn off from a beef scrap is a product of the grain houses and if of assured quality makes a fair substitute for fresh meat. It should be fed in hoppers and should constitute about eight to ten per cent of the grain ration.

DIGESTIBILITY OF MILK.—There are but few foods that have such a high digestibility as milk. When it is combined with other foods, it is practically all digested, and also assists in rendering foods with which the milk is combined. In experiments at the Minnesota Experiment Station it was found that when milk was added to a ration, the digestibility of the entire ration was materially increased. This is probably due to the digestive action of the enzymes or chemical ferments which are present in the milk, and which enable cheese when placed in cold storage to undergo ripening or digestive process. Milk then, which it contains, but also because it makes the foods soft with which it is combined more digestible and valuable.

The building now shown is well suited to the needs of the suburban or village resident, or of the man owning a small tract of land, and making a specialty of gardening, poultry, bees or fruit.
