## Nature's Provisions and Problems

God has provided abundantly for us on this continent from the icy stillness of the frozen north to the warm animated air of the southern tip of Florida. Wherever he is, the true Christian as the truth of God's providence dawns upon him will fall on his knees in deepest gratitude and adoration. In farthest north the dog teams race over the crisp snow with the speed of airplanes, the traveller is covered warmly with northern furs, when night comes the northern lights play their sweet music amid scenes of unutterable beauty, while during the summer, short as they are, vegetable growth springs up with greatest rapidity. In the Sunny South there are, before cultivation, still deserts where one would wonder if a fly could live. Yet lying all around, and in some places springing up in abundant growth, are all the elements and requisites for entrancing the senses and nourishing the body. In the North and in the South nature's provisions and problems give abundant opportunity for man's intelligence and man's ingenuity. The great heat in the south, if properly dealt with, is a great blessing. Shade is the refuge. The scripture speaks of the blessing of the "shadow of a great rock in a weary land". This text can be fully understood when you take the thermometer from the sun where it stands at 120 and bring around the corner to the shade where it reads 70 or 75 degrees. The lesson is obvious, do your work in the early morning or late evening, there is always a way. Then again the sunlight seems to lack violet rays, and so there is never any sun-stroke. Further, certain fruits are cooling. Grape-fruit seems to chill the teeth. Other fruits which can not at present be shipped, like limes, large lemons and mangoes, refresh one in the heated term. In the North, the heavenly lights scintillate; in the South, lights glow softly. There is the tender blue dome at mid-day across which like the wings of angels float the filmy clouds. At sunset purple and yellow and gold predominate. The evenings grow hushed and quiet as the King of the day sinking beneath the billowy waves of the ocean, bids us good night. Let us drop from the sky to the earth again. There are dangers in the South. Are there alligators? There are, I have never seen one out of captivity. Niggers hunt them. Locate him. He loves a watery hole. Have a noose ready in front of him. Get behind him and force him forward. It is little trouble to catch him, but requires stout arms. Why do niggers hunt him? His skin makes purses and valises. His flesh tastes like pork—so the niggers say.

H. J. LEAKE.

These concerts will be held at intervals of four or five weeks throughout the year.

**IMMIGRATION.**

**Trade Will Not Flow Strongly For Over a Year.**

Probably a year, or slightly more than a year, will elapse before the movement from Great Britain to Canada reaches a really large number, in the opinion of Hon. James A. Calder, Minister of Immigration and Colonisation. Mr. Calder, who has returned to Ottawa, after an official trip to England and Scotland, finds that shipping conditions are at present operating to restrict the movement. Moreover, Canadian immigration agents overseas have instructions to take every precaution to see that no more people migrate to the Dominion than can at present be absorbed.

They advise persons not likely to find employment within a reasonable time of their arrival in Canada to defer their departure from England. Shipping agents, too, in view of the penalties to which they are liable for bringing unsuitable persons to the Dominion, are careful to scrutinize applicants for passages. In consequence, Mr. Calder asserts that Canada is securing a better and more suitable class of new citizens than ever before.

The shipping situation, however, prevents any immediate increase in the volume of immigration. Mr. Calder interviewed officials of the North Atlantic shipping conference, and was informed that accommodation on vessels coming to Canada was booked for about a year. In so far as the outlook for immigration in the future is concerned, it will depend a good deal upon economic conditions in Great Britain. For instance, Mr. Calder states that there is at present almost as great a shortage of domestic servants in England as in Canada. Women, who were trained for domestic service, found employment in industry during the war. They are only gradually leaving that field and returning to domestic service. The Minister of Immigration, however, found in Great Britain a feeling that a fairly serious unemployment situation might develop there in the near future. Such a condition would lead to drive people to seek homes and livelihoods in other countries. It has been variously estimated, moreover, Mr. Calder points out, that Great Britain has a surplus population over pre-war days of from 600,000 to 1,200,000. Before the war 250,000 people left Britain every year. At the same time, having regard to the shipping situation, Mr. Calder inclined to the view that immigration would not reach really large numbers for probably a year, or until the spring of 1922.

# Help burned Ontario over the Winter,

**M**EN and women of Ontario—it is time that we should all realize the terrible completeness of the fire calamity that devastated Northern Ontario in the early days of October. Fires and calamities we have had before, but never such complete destruction as this.

Over 1,200 square miles laid desolate, town after town nothing but a bleak expanse of ruins, hundreds of farms swept bare, thousands of your fellow citizens "cleaned out" and thrown abruptly back into man's primeval struggle against nature and her grim forces: fire, hunger, ice and the stark northern cold.

**Give 1,800 families a fighting chance to get on their feet.  
Temporary relief must go on. We must not fail the North.**

#### Winter—the relentless foe

Coming as this terrible fire did, in the autumn, with the harvests in, with the townspeople already preparing for the rigors of winter—the complete destruction wrought is the harder to overcome.

Thousands of people at first had literally no place to lay their head, little to wear and nothing to eat. They had to be taken care of at first, somehow, and then, desperately as the days went by, and the cold grew more intense, rough but serviceable standard shacks, 16' x 20', have been replacing tents, old street cars, packing boxes and sheet iron—a regular food supply has been established, and rough clothing is being distributed.

What can a man do with his house a blackened hole in the ground, his barn a charred heap, his work shop a twisted pile of rubbish—and a northern blizzard raging over all?

#### Temporary Relief Until Spring

In the name of humanity we must see these fellow citizens through until Spring opens up the land and general business activities are resumed. Money must be forthcoming from the citizens of Ontario, from municipalities, industries, societies, public bodies, lodges, churches, etc.—not for rehabilitation or re-establishment, but for the supply of bare necessities. "temporary relief" in fact, to the stricken North.

#### The Brighter Side of the Picture

Everywhere throughout the fire swept district one hears only a strong, manly note of confidence, of resolution to go forward, to "stick to the country" if body and soul can be held together, to make good once more, to restore the hundreds of burned farms, to rebuild the eight or ten destroyed towns—And it will be done if the stream of temporary relief from Old Ontario does not dry up!

#### All for One—One for All

Here is a portion of our Province in ruins, and for the sake of the whole Province as well as for its own sake, this section must be restored to prosperity and happiness. We need the North, we need its vigorous, pioneering spirit so one and all, let's "give a hand into the saddle"—and do it NOW.

Money is needed. The Relief Committee can buy in large quantities, get big discounts, and often free gifts of merchandise from the many manufacturers who are generously co-operating with the Committee. The exact needs are now known.

#### The Northern Ontario Fire Relief Committee

has been enlarged and now is thoroughly representative of the Province of Ontario. The Provincial Government is co-operating to the fullest extent and is doing everything that a Government can properly do to assist in temporarily relieving the fire sufferers.

To give immediate relief the Committee must secure actual cash without delay. If each municipality or county would devise some means of raising an amount equal to one half mill on the total assessment the relief can be continued. The raising of relief funds could be undertaken by public spirited citizens, clubs, churches or councils and provides a most deserving cause for Christmas giving. Now it is up to every community in Ontario to help a neighbouring district in its hour of trial. Make cheques payable to—
