How to Use Crisco

In deep frying use Crisco as you would any other fat. But remember this: By straining Crisco you can use it again and again. For example, after frying fish in Crisco you can strain it then fry potatoes. otatoes will not taste of the fish. For all frying and cooking purposes Crisco is the ideal fat. At grocers.

And after many years of seeking I tracked her down the other day, and found her ill, her hinges creaking, the poorhouse just a rood away. Oh, what a joy to bring her dishes of tempting tripe and wholesome prunes to load her down with loaves and fishes-my heart was singing happy tunes! A burden from that heart was taken, my wintry days were sweeter made; I felt like one by peace forsaken until that ancient debt was paid.

There are not many changes of fashion, though we are glad to note that the interest in the old English types of dogs is returning. The Mastiff, the Airedale, the sheepdog, the bulldog, the wire-haired terrier, are preeds which are incontestably to be preferred to importations from the Continent. They have merits which that animal of Teutonic origin, the Alsatian, does not possess, and they are none the worse for lacking his strain of wolf blood. As for the freak dogs, they appear to be on the wane, nowhere be lamented.

The dog is so popular because we see in him a life and intelligence akin to our own. Indeed, Coleridge said of nim that "alone of all brute animals he has an affection upwards to man in which remark he perhaps did some But even if we make this qualif an, and that he can be trusted to tand by his master whatever the dau

Report of the Council of the Board of Trade, March 6

It will have been observed from the a the first of a series of meetings to be arranged by your Council, and during their term of office it is their inn to hold these bi-monthly, pro ided the plan is acceptable to the The real purpose behind eetings is to create and mainain an active interest in the work and blems dealt with by the Council and at each meeting a synoptical reort will be submitted and discussion wited on the matters referred to

There are many problems affecting the public's interests which may very properly be discussed at a general eeting of the board and it shall be endeavour of your Council to proride for a full and open discussion

The Council's report for the present neeting, will naturally be a very brief one as the new Council did not take office until the first week in February. There were, however, several matters turned over by the previous Council and which are referred to in paragraphs 1 and 2.

1-Inspection of Life Boats, Coastal Service—Following the stranding of the Prospero in November last and the subsequent disclosure of the condition of the life boats, the Council addressed a letter to the Railway Commissioners, requesting a copy of the report of the Commission appointed to conduct an enquiry into the accident, and further to advise the Council what steps had been taken to ensure that life boats and life saving equipment will be kept in proper condition. A reply has been received stating that the investigation has not been completed but that definite steps have now been taken to make certain that periodical inspection of all life boats will take place and every effort made to keep them in a sea worthy condition.

2-Insurance at Corner Brook-Early in January, the Council was advised by the Board of Fire Underwriters that the Fire Insurance business of the Newfoundland Power and Paper Utilities Corporation was being taken out of their hands and authority given to an outside broker to negotiate same. As Mr. Stadler, the manager of this Company had publicly stated that it was the desire and intention to place their business locally whenever the terms and conditions were equal, and being assured that the rates quoted by the Local Board were in line with similar risks elsewhere, the Council communicated with the Company and have since received a reply confirming the appointment of Major Hay of London, England, as their Insurance representative. It would appear that more advantageous rates than those quoted by local agents have been se to the fact that the rates fixed by the Board of Fire Underwriters, must of necessity include a proportion of the Government Tax, while insurance underwritten elsewhere is tax free, the Council are of the opinion that this matter can only be dealt with by the agents interested.

3-Street Car, Electric Light Charges and Telephone Complaints-The Council has received many complaints with reference to the above and which matters have been taken up with the Companies concerned. The Manager of the Newfoundland Light and Power Co., has informed the Council that extensive repairs and alterations will be made in the Street Car service, as soon as weather conditions permit. A reduction in electric light rates has al-For painless work, reasonable ready been made. The Telephone Co. prices and modern methods this is the office. Arlie Marks Co. in Powerful Play

THE SIDEWALKS OF NEW YORK," PLEASES LARGE AUDIENCE.

a large audience was in evidence the Casino Theatre last night, hen the Arlie Marks Players played The Sidewalks of New York," a play neming with thrills, emotions and heart interest. The term intellectual has generally been hurled at the noken drama often as one of reproach. and the reviewer is far from denying that this use of it has been justified many cases. It can be appended "The Sidewalks of New York," and his time it will be an accurate term and one carrying no stigma of reproach with it "The Sidewalks of New York" is a most interesting and musual play. It is interesting because is a drama of moving quality, and is unusual because it arouses the motions and holds the fixed attention the spectator. The versatility of liss Arlie Marks is clearly seen in is bill. In the role of the "Queen Queen Street" she is seen in a most lovable character and her acting houghout is flawless. Ray Wasmund gets good value out of the role of Robert Hillman. He is a fine technician and a player with much color, Paul Brady is seen in this play in his reatest characterization, that of Phillip Schuyler and his acting in the mal scene is nothing short of wonderful. Agnes Stutz did ample justice to the part of Bridget Flannigan. Walter DeLuna as Mari Vanni, the artist interprets the role with much talism, whilst Louise Addel as The Model is exceptionally fine. W. L. (Billy) Phillips acts the part of Limpy with dexterity and Carence Kane as rancoise, the Inn Keeper, is good, Lindsay Perrin, the prime minister mirth, was "right there" with the comedy, and his performance of Skillsy was a sure gloom-chaser. Merdle Scott plays well the role of Marcia chuyler. The settings were beautifulrealistic and adds much to the sucess of the production.

The new artistes. DeLuna and Adreceived a royal Newfoundland elcome, and their nonsensicalities ook the house by storm. These peoe are in a class to themselves as enrtainers. The Scotch Lads and Lases again scored big in their new cotch Review. The other numbers "The Sidewalks of New York" will ly be played two more nights and norrow's matinee, so you are adsed not to miss this entertainment sic. Watch for "The Flapper" on

Iron From the Sky

Occasionally we hear of people seeing a meteorite fall, and these "messengers" from the sky have been known to cause extensive dam-

was probably the largest meteorite known to have struck the ground fell in Alsace in 1492. This np of metal weighed no less than 260 lbs. Another large the size of a man's head and weighing 54 lbs. fell in Provence in 1637, and seventeen years later a man was killed by one while walking in the streets of Milan.

One of the largest meteorites of recent times fell in 1917 at Perth, in Scotland. It weighed 38 lbs. In the British Museum there are

now over five hundred different specimens of meteorites, of which about three hundred were actually seen to fall Large masses of iron have been

found near the surface of the ground in Greenland, and scientists believe they are of meteoric origin. Similar deposits of iron from the skies have also been found in Mexico.

Just Folks. By EDGAR GUEST.

Oh, this I've found through many a day of wandering round about.

This life is not all chimneys tall and buildings staunch and stout.

The chicks were divided into three groups. All were given the same diet, but one group was kept in natural This life is not all busy streets, nor stugs the merchants sell, Or one could move to any town and be content to dwell.

Now I have been to many a town, much like the one I love,
I've seen the self-same stars at night, the self-same moon above;
I've seen the buildings staunch and tall, much like the ones I boast, But never in another town the thing I needed most.

All up and down this land I've fared, but far away from home
I've learned that as a stranger man is ever doomed to roam;
He's in the place, not of the place, and night time always brings
A longing for his distant town of long familiar things.

Treached in ten weeks the same stage of physical development that those raised in natural sunlight attained in twelve weeks. The rickety chicks were cured when subjected to ultraviolet ray treatment.

Between 97 and 100 per cent. of the

Cabbage is exceedingly wholesome when shredded raw and eaten with oil a little bacon drippings and chopped onion.

Many people like peas cooked with pleasing seasoning for buttered gy, boil with them a couple of potatown I love the best.

Charming leave that bullelings tall the joy of living lies; it's not the wealth possessed, it's certain men and women make the town I love the best.

The Things We Are Up Against

An interesting discussion has been going on in both the United States and England as to whether or not orporations are justified in purchasng in their own countries supplies at figures in excess to what the materials might be bought for abroad. Of course the free trader will not admit there is anything to discuss, the obvious thing being to buy in the cheapest market and let it go at that. However, there are really two sides to this question as there are to

most problems. Over in England a tramway comany was in the market for rails and other accessories. The United States Steel Corporation underbid the British firms for the order by goodly margin. But eventually the order went to the home concern, regardless of price. Another example comes from Boston which wanted a lot of cast iron pipe, and a bid was received from a Continental firm underbidding all the United States manufacturers, but on patriotic grounds the contract was awarded to United States firm.

On the other side of the picture we have Henry Ford who wanted several thousand tons of rails for the Detroit, Toledo and Ironton Railway. In this case the bid of a Belgian firm was ten dollars per ton under what he could have obtained them for at home and Henry ordered Belgian rails, thereby saving \$105,000.

To bring this problem pearer home we are told that Wabana iron is being shipped from Newfoundland to Belgium and Germany, made into steel in these countries, shipped back to Canada and sold at a price that undersells the Canadian product by some dollars per ton.-Saturday

A "Bluebeard" of 500 Years Ago

Five centuries after he was hanged at Nantes for heresy and for the supposed murder of (150 women and children Marshal Gilles de Rais, or Retz, whose name is associated in France with the story of Bluebeard, may be cleared of guilt as a result of a suit for his rehabilitation which is to be brought in the French courts by a group of historians and legal men (says the Daily Mail). Marshal de Retz, who was one of the most faithful companions-in-arms of Joan of Arc, possessed magnificent castles in the region of Nantes, to which he retired after the death of Joan of Arc.

He had amassed an immense fortune at the wars, but he rapidly disipated it. He had forty-four private chaplains, and maintained a huge

Mr. Wm. Wrigley, Jr., the chewing gum king, of Chicago, in explaining the rapid growth of his company, said it was all due to advertising. "But," interrupted one of his friends, travelling with him to the Pacific Coast, "you have already built up a remarkable business. Why not save some of this advertising money and run along on momentum for a while?" "Well," Mr. Wrigley said, "we have had a fine, fast trip West from Chicago so far. But the great out-of-doors is Mr. Griffith's special field. Tremendous battle scenes and the wild rides of the Ku Klux Klan are staged with thousands of participants. Eighteen thousand human actors and 3.000 horses were employed in the making of the picture, which cost half a million dollars and took eight months to produce. Some idea of its immensity is gained from the fact that there are no less than 5,000 distinct and indiv-

What, then is our present Insolvency Law, and what is

Up to 1834 we had no law of Insolvency. Those who owed money and were unable to pay were thrown into prison and remained there until they paid. How they could pay when their energies were restrained by stone or wooden walls was a mystery to thinking people of the age, and accordingly an Act was passed on June 12th, 1834 which was the genisis of our local Insolvency Law. It merely provided that persons in prison because of inability to pay their debts could be released upon their showing that they were any fraud. They were furthermore years if, granted a discharge.

CENTRAL LEATHER CO. acing A Much Clearer Prospect-Important Corrective Developments In 1924.

(Halifax Chronicle, March 2, 1925). Boston, Feb. 27.—Central Leather's final result for 1924 closely approximated the estimate made at the time the new \$15,000,000 six per cent. bonds were sold. It reported an actual loss of \$484,307 after interest charges against the estimate of \$500,000. This contrasts with a loss of \$7,272,2433 in

Less significance attaches to the fact that a loss was shown in 1924 than to the fact that there was a material improvement in earnings in the last two final three months. At the end of June a loss of \$1,114,383 was register ed, but profits of \$272,760 and \$357,-317 in the third and fourth quarters respectively cut the final loss to the figure above mentioned.

In 1924 the earnings available for nterest charges were \$1,353.900 gainst a deficit of \$5,434,035 in 1923. should be remembered that the 336,763,150 first mortgage 5 per cent. onds, although up to the end of 1924 \$18,128,100 of these bonds had been acquired for and held in the stumpage and special depreciation fund and in the general treasury. There were thus only \$18,635.050 really outstanding.

The new \$15,000.000 6 per cent. first lieu sinking fund bonds issued to refund the 5s, will call for interest charges of but \$900.000 per annum which will be reduced \$45,000 each year by operation of the \$750,000 minimum sinking fund. Interest from the old bonds held in the sinking fund has been set aside in a "special de reciation fund," which aggregated a net amount of \$2.687,598 as of Dec. 31, 1924, and President Brown states that this fund has been and will be used to offset the capital depreciation resulting from the abandonment of certain surplus tanning and extract plants of the company.

Presentation

A very pleasing incident took place at St. Barnabas' Hall, (C. of E.), Bay de Verde, when the performers of a very successful concert held Dec. 30th and 31st, under the supervision of the eacher Mr. W. E. Brown, met by request the Rev W. K. Pitcher and made him the recipient of a very nandsome walking stick. The presentation was made by Miss Muriel Emberley, the youngest member of the troupe who in a few appropriate words presented it on behalf of the performers. Public Notice!

The attention of the public is hereby called to the "Alcoholic Liquor Act", Sec. 2 (19), which reads as

"The word 'import' herein shall not be construed to include

(a) Alcoholic liquors in transit from and to places outside this Colony placed in bond in a Customs warehouse in the Colony. (b) Alcoholic liquor, part of a ship's stores, ware-

housed or sealed up, as provided by Chap-ter 22, Consolidated Statutes (Third Series), and Acts in amendment thereof. (c) Wines imported for the purpose of being matured and re-exported, or to be sold to the Board, deposited in establishments licensed

for that purpose by the Board. Provided that the Board shall be notified by the importer or master of the ship, as the case may be, respectively, of the importation and exportation of such alcoholic liquor at the time thereof, and the Board shall keep a register of such importations and exportations, open during office hours of the Board for public inspection.

(d) The Board shall keep an inventory showing the importations and exportations, and stocks on hand, of alcoholic liquor in bond in Customs warehouses, and of wines stored for maturity and export.

(e) Alcoholic liquor on board warships of any nation, for the use of officers and crews, shall not be subject to this Act while on board the said ships. BOARD OF LIQUOR CONTROL
