They always were turned in his direction when he was in the room. That was one of the things the doctor found out before long.

"Why, I do, sir," said Temple, "I wouldn't let anyone else touch her."

The Weekly Monitor.

The Woman's Suffrage movement in this province appears to be progressing backward. Two or three years ago a measure conferring a limited franchise upon woman passed through several preliminary stages in the House of Assembly, and was defeated, if we remember correctly, on its third reading. The next year when the question again came up it was defeated on its second reading by the narrow majority of three votes. Last week the matter was again before the House, and after being ably and eloquently debated for a whole afternoon and evening, the bill was given the three month's hoist by the decisive vote of twenty-one to twelve. Thus it appears that the present House is much more emphatic in its opposition to woman's suffrage than the last one was, and the vote of last week will doubtless give the subject its quietus for at least four years. This will doubtless prove somewhat discouraging to the friends of the movement, some the whom have apent a good deal of time in circulating petitions and doing other work in arousing public sentiment in favor. From the ecisive vote that was given, kowever, it would appear that the members of the House have from these petitions but little consideration. And, indeed, it is doubtful if petitions, however numerously signed they may be, can be relied upon as an indication of public sentiment. A great many men will sign almost any kind of a petition which may be presented to them without stopping to consider whether they are in aymonathy with the ob-

There is no doubt that of late years dairying has not received from our surely a mistake for our farmers to allow any one branch of farming, however profitable that may be, to absorb all or even the first of their attention. There occasionally comes a year, not infrequently either, when the fruit crop proves a failure, either onally comes a year, not infrequently either, when the fruit crop proves a failure, either in yield or in prices, and upon these occasions the farmer who trusts to his fruit alone suffers keenly. Dairying is one of the most profitable branches of our farming industry, the indirect benefits in helping to keep up and enrich the farm with the manure being not the least part of the profit by any means.

Now that so large a demand has been made on the other side for Canadian cheese, and as is hoped will soon be the case with butter, prices are liable to rule higher for these products in our local markets, and there is altogether a favorable outlook for the dairying industry of the province. We trust, therefore the the farm of the province where trust the regular hour. industry of the province. —We recently received from a prominent gentleman in Amherst a request to forward copies of MoxIvor containing the articles on Mexico, which he informs us were of deep interest. Similar demands are made upon us from week to week by persons living even at a greater distance than Amherst, and are convincing proof of the appreciation with which the contents of the MoxIvor are read. A steady increase in our subscription list, and enjoying a strong advertising patronage from the best and most reliable dealers in the eastern portion of the county. coupled from the best and most reliable dealers in the eastern portion of the county, coupled with facilities for turning out job work accord to none in the province, we have every reason to be proud of the MoNITOR'S record and the esteemed support of a gener-ous and appreciative public.

During the years from 1882 to 1894, the fishermen of Lunenburg County were paid fishing bounty amounting to \$234,422.44, almost a quarter of a million dollars. The increase from year to year is astonishing. The amount earned in 1882 was \$18,273.03, 194 is was \$35,817.36.

sented to them without stopping to consider whether they are in sympathy with the object of the petition or not. This of course ought not to be so. No man should sign a petition unless he is in full sympathy with the object it seeks to accomplish. The man who signs a petition asking for full female suffrage, as many of these petitions did, puts himself on record as being in favor of a polygical and social revolution of the most radical and far-reaching character. Had all who were asked to sign these petitions but realized this there would probably have been fewer names attached to them.

We are not by any means satisfied that the desire for the franchise is at all general among the women of our land. Nay, more, we are fairly well convinced that for every woman who is out in the world hustling for the right to add voting to her other luxuries, there are hundreds, if not thousands, at home who care nothing about the matter, or who would shrink from having a whole round of new duties and responsibilities thrust upon them, such as the franchise would bring. Above all we fail to see any good reason for giving the franchise to wid. Dominion Atlantic Railway Folder.

the one who has barely sufficient property to entitle him to the franchise. In so far, therefore, as the bill which was before our provincial legislature last week proposed to enfranchise only widows and spinsters, it appears to us to have been but a half measure and scarcely deserved a better fate than it received.

We observe, too, that of our representatives, Mr. Baucroft voted in favor of the bill, while the attorney general as usual kd the opposition to it, making a very able, eloquent and argumentative speech against the principle of female suffrage.

—The interest which is now being manifested all over the province in the dairying industries is a hopeful sign of the times, and augurs well for the future of our agricultural interests. There is no doubt that of late wears deliving has not received from our province in the same will be accomplished without any increase in rates.

week's end and from one year's beginning to the seizures and it was also a fact that the House of Representatives in Washington had rejected the proposal to appropriate money for compensation for sealers whose vessels had been seized. No representations, he said, had as yet been received from Canada in regard to the matter, but the delay in payment must cause great disappointment and loss. The original negotiations for the payment of individual claims was suspended when the offer of payment of a lump sum was made. The right to resume negotiations was conditional upon the acceptance of this offer. When her Majesty's government learned of the vertection of the proposals they immediately cabled instructions to Sir Julien Paunceforth, British Ambassador at Washington, to urge the neccessity of taking immediate steps, and enquire whether the Secretary of State would at once resume negotiations, but that the matter must be submitted to the Senare and confirmed by a two-thirds majority of that body. This, the Secretary said, could not be done until the Senate resumed its sessions. Secretary Gresham expressed his own deep regret and that of President Cleveland at the unexpected position of affairs and the impossibility of preventing the unfortunate delay in discharging international obligations of the United States respecting these claims. Sir George Baden-Powell asked if, in the event of the United States not paying these claims for some time, the government would advance the required aum of the sealers.

Mr. Sydney Burton, Under Colonial Search and the theory of the sealers and confirmed by a two-thirds majority of that is and the unexpected position of affairs and the impossibility of preventing the unfortunate delay in discharging international obligations of the United States respecting these claims for some time, the government would advance the required aum of the sealers.

Ottawa, March 7.—Concerning the action of the United States Senate in declining to yote the suprof. \$425,000 to compensate the canadian sealers, whose property was illegally confiscated by the United States Government, it is learned that this by no means ends the matter. The Republic is pledged to give such relief as the arbitration may decide. The offer of \$425,000 was made simply to save sime and expense. Its rejection means save time and expense. Its rejection means another arbitration, expensive alike to both the countries concerned.

A new development occurred in the Hyams alleged murder case yesterday. Chief Hughes, of Montreal, received a telegram from Chief Grassett, of Toronto, asking him to arrest with all speed and secrecy a certain Mr. Pillow and wife on a charge of conspiring to defraud an insurance company. Detectives Arcand and Lafontaine were entrusted with the case. Both the accused were arrested at 1434 Notre Dame entret, the address of the Medical Supply Company, starfed by the Hyams. Mr. Pillow was the superintendent of the Medical Supply Company. Mrs. Pillow has a baby six months of age. She is reported to have said that she had been told that if they kept their mouths shut about the Hyams treal this morning to convey the prisoners to

Marriage of Miss Gould.

Count DeCastellane and Miss Anna Gould, Count DeCastellane and Miss Anna Could, were married at the Rome of George J. Gould, Monday, 4th inst., by Bishop Corrigan. The ceremony could not be held at the Cathedral, owing to the bride being a Protestant. The bride wore a gown of heavy ivory white satin. The bridesmaids wore costumes of cream white cloth, trimmed with sable.

George J. Gould made this statement after the Count and Countess DeCastellane had sailed: "I wish to deny, he said, the

General Booth's visit to Canada has be incalculable benefit to the Salvation done incalculable benefit to the Salvation Army throughout the Dominion. It has in-spired the members of the army and the officers to renewed energy, and it has raised cal religion, and their efforts to assist fallen humanity have given them a popularity among the non-church-going people. Like the Master they bring the gospel to the people. It is plain and simple, costs little and is all the more powerful in consequence. During the first four months of his sojourn in Canada and the United States General Booth travelled 18,453 miles, 1,847 hours on the cars, has written 216 letters and 11 articles on his work, spent 429 hours in army business, and made 47 short and 293 long addresses to 437,500 persons.

"A Prominent Witness."

Rev. J. M. McLeod, Pastor of Zion Church, Vancouver, B. C., writes, July 3rd, 1894:—"It is nearly three months since I finished the package of K. D. C. which you sent me; and though I have for more than twenty years suffered from indigestion that one package seems to have wrought a perfect cure. Stoe taking your remedy I have not had the slightest symptom of a return of my old enemy. It affords me much pleasure to recommend K. D. C. to the numerous family of dyspeptics as the best known remedy for that most distressing malady."

A copy of the will of the late Mr. Winchester, father of Mrs. Howard B. Evans, of Halifax, has been received in that city. The estate is worth \$600,000. Mrs. Evans is to get \$10,000 for life, and in addition, \$3,500 is to be paid to her in quarterly payments. She is also to get a tenth of the estate. Her two children, by her first husband, Mr. Fay, who was drowned in Hal fax harbor, are to receive \$3,000 each. The children by her second husband, Howard Evans, and the two Fay children are to get a tenth of the the residue.

You've no Idea. How nicely Hood's Sarsapariila hits the needs of the people who feel all tired out or run down from any cause. Hood's Pills cure liver ills, constipatio

-According to the Electrical Review which is a pretty safe authority, the West-ern Union Telegraph company collected about \$1,500,000 last year for telling the time of day. The company has a telegraph desk in the naval observatory at Washing-ton. Four minutes before noon the wires of the system an over the country are charter of business, and the instant the sun passes the seventy-fifth meridian electricity carries the news to every city. It is only in trying to realize a fact like this in all its bearings, says the Portland Argus, that we can get some idea of the way modern life is being regulated by science.

Cause and effect; constipation is the cause of a host of diseases. Hawker's liver pills cure constipation, thereby preventing its onsequent ills. For children's coughs and colds Hawker's halsam of tolu and wild cherry is unequalled. It is the childen's favorite.

Agricultural.

There is some danger that farmers may become so intent on making their land pay a money return that they will lose sight of much that is beautiful in country life. It is not all of life to be able to say at the end of the year that there is a good margin on the right side of the farm account. This is all right, of course; we are on the farm as a business. We ought to do our best to make

it pay.

But it will not do to make money the solution of the if we have children. To bend every energy from daylight to dark, from week's end week's end and from one year's beginning to another, to the getting of money, is demor-

We have no right to entail upon our children the heritage which many parents do when they teach them to hate farm life. We ought to love it and teach our children to love it, too. Farm life pays if it leads him who follows it one step higher than he was at first.

The officers from Toronto arrived in Monwithout labor of carrying it in pails, is greatly to be desired in dairying. The ice house connected with the dairy house if desired. Where a large dairying business is done such a house is almost a necessity, if the finest butter is to be economically made. Making butter on the porch, and in the house or the cellar has altogether too many disadvantages.

-Milk in every form may be properly fed to poultry, and the economy of feeding skimmed milk to laying hens is gradually made upon Count DeCastellane. He asked where dairying is carried on it will be found made upon Count Decastellane. He asacut of ronne; none was made. The report is absolutely untrue as regards the \$2,000,000.
