Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

Medical Library
McGill University
Montreal

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Medical Library
McGill University
Montreal

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

OTTAWA, January 20th, 1890.

DEAR DOCTOR,

At the meeting of the Bathurst and Rideau Division Association, held on the 15th instant, the following resolutions were carried without a dissenting vote :—

“ Moved by Dr. H. P. Wright, of Ottawa, seconded by Dr. W. J. Anderson, of Smith's Falls, and it is hereby

Resolved,—That considering how few honors there are in the gift of the medical profession, and that of a Representative of a territorial division in the Council of the College of Physicians and Surgeons of Ontario being one of the greatest, and considering that the present member has held the position of Representative for the Bathurst and Rideau Division two terms, or nine years in all, it is the opinion of this Association that this distinction should now be given to some other aspiring member of the Division.—Carried.”

“ Moved by Dr. J. Sweetland, seconded by Dr. H. Hill,

And *Resolved*, That this meeting desires to express its warm approbation of the candidature of Dr. A. F. Rogers as Representative in the Council for this division, as we believe he would make a most energetic and progressive member, and further, because the rural portion of the division has had the representation now for ten years, or two terms, and it would be only paying a just compliment to the city members of the division to allow them to choose the Representative on this occasion.—Carried.”

“ I certify that the above is a true copy of resolutions unanimously passed by the Bathurst and Rideau Division Association at the meeting held the 15th January, 1890.

(Signed)

“ H. B. SMALL, M.D.

“Secretary B. and R. D. Med. Assn.”

These resolutions speak for themselves, and the movers and seconders, while endorsing the sentiments expressed therein, spoke in the kindest terms of the present representative. It is indeed highly gratifying to me to realize that I have the confidence and support of the vast majority of my professional brethren in this division, and if elected

a member of the Council it shall be my earnest endeavour to promote the well-being of the profession in this Province by requiring every student to take an arts degree in lieu of any other preliminary examination. It must be remembered the B. A. degree can be secured by simply passing the examinations, and without attending a university, so that worthy but poor men need not be precluded from entering the profession in consequence of this requirement. All the medical colleges in England, Ireland and Scotland only grant the degree of M. D. when the candidate has received the degree of B.A., or passed an examination in arts equivalent thereto, and studied medicine five or more years. By making the standard for the license to practise in Ontario the B.A. degree and four full years medical study subsequent thereto, the Council will, to some extent, approach that adopted in Great Britain, and it is easy to comprehend that such a course will stop the overcrowding of the profession, and it will, in every sense, be in the true interest of the public.

In Ontario to-day there is one physician to every 800 of the population, as against one to 1,500 in England. The rapid increase of the physicians in this Province is shown by the fact that only a few years ago the ratio was one medical practitioner to upwards of twelve hundred of the people, and the prospect for a still more serious increase is shown by the fact that in Toronto at present there are 600 medical students, besides those in Kingston, London, Ont., and McGill College, making it fair to assume that there are at least 900 men now preparing themselves to enter the practise of medicine in Ontario, while the population, owing to migration to the North-West, is remaining almost stationary. In soliciting your vote and influence in this election, I do so for the reasons expressed in the resolutions mentioned above, and because if elected to the Council I shall endeavour to inaugurate the reforms I have named, and in every way possible I shall labour in the interest of our profession and in the interest of the members of the Bathurst and Rideau Division.

Yours truly,

A. F. ROGERS, M. D.
