© 1983

The copy filmed here has been reproduced thanks to the generosity of:

Hamilton Public Library

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Hamilton Public Library

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

INTRODUCTORY NOTE.

The Authors of the present work have frequently heard a wish expressed for a more complete set of **ADVANCE TABLES** than any hitherto published in this country. To meet that want the following **TABLES** have been prepared, and are now offered to the Mercantile Public, in the belief that they will be found, not only more comprehensive, but also more accurate and reliable than anything of a similar kind in use. A glance at a page will show the arrangement of the work. The top line contains the rates per **CENT**, and the left hand column the prices or sterling costs.

The **FLANNEL TABLE** will be found a new, and it is hoped, a valuable feature in a work of this kind.

It may be proper to state that repetend decimals and others, where they exceed the five thousandth of a cent, are expressed as a one hundredth part, for example, 60 per cent on a penny is 0,026666, expressed 0,02⁶⁷, 80 per cent on the same amount is 0,02999, expressed 0,03. The computations have been made with the greatest care, and the method adopted in checking the proof-sheets has been such as almost to preclude the possibility of typographical errors occurring.

[Faint, illegible text covering the majority of the page]
