The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol  $\rightarrow$  (meaning "CONTINUED"), or the symbol  $\nabla$  (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole  $\rightarrow$  signifie "A SUIVRE", le symbole  $\nabla$  signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

INLAND REVENUE DEPARTMENT  
OTTAWA, CANADA

BULLETIN No. 305

EVAPORATED MILK

OTTAWA, 8th March, 1915.

J. F. VINCENT, Esq.,  
Deputy Minister Inland Revenue,

SIR,—I beg to submit a report upon one hundred and seventy-eight (178) samples of Evaporated Milk, purchased by our inspectors, as therein described, in March, April and May of last year.

This report has been delayed on account of the necessity for taking in hand, work which, in its nature, could not so well wait, without injury.

Our last inspection of evaporated milk was made in 1910 (See Bull. 208). At that time nine (9) brands were found on the Canadian market. The present report deals with fourteen (14) brands, seven of which were not found in 1910, while two brands then found, are not represented. Details will be found in Table II, which at the same time shows the average results for the brands therein named. This average value is a better guide to an opinion as to the quality of the brand than the result obtained with single samples; and for this reason, it is undesirable to form a judgment as to the nature of the article in cases where only one or two samples of a brand have been submitted for analysis. Such results apply to the particular samples only.

Legal standards for evaporated milk are defined by Order in Council of 3rd November, 1910, and published in circular G. 934 of this Department. "Evaporated Milk is milk from which a considerable portion of water has been evaporated, and contains not less than 26 per cent of milk solids, and not less than 7.20 per cent of milk fat."

The U.S.A. Standard, as established in 1906, required 28 per cent of total solids, and 7.7 per cent of milk fat. While this standard was satisfactory so far as natural milk produced in Middle and Eastern States was concerned, it was found that, owing to climatic and food conditions, in the extreme west the non-fat solids demanded were relatively too high for the fat content. American requirements have therefore been modified by the Department of Agriculture and the following are promulgated under date 20th November, 1914:—

Milk fat. . . . .	7.8 per cent.
Non-fat solids. . . . .	17.7 per cent.
Total solids. . . . .	25.5 per cent.

While no complaint has been made by Canadian manufacturers it is altogether probable that changed conditions of production in the extreme west of Canada may justify some modification of our standards as regards relative fat and non-fat solids, in evaporated whole-cream milk. Of course the partial removal of cream from normal milk, before concentration, will result in a product in which the non-fat solids will be relatively predominant.

The following brands show an average content in both solids and fat, which practically meets our present standard requirements of 25 per cent total solids and 7.20 per cent of fat.

Canada first—mean of 39 samples.	Solids	26.52	Fat	7.51
Carnation " 3 "	"	25.72	"	7.19
Jersey Cream " 12 "	"	27.14	"	7.67
Peerless " 31 "	"	26.03	"	7.10
Reindeer " 2 "	"	27.25	"	7.45
St. Charles " 60 "	"	26.51	"	7.42

One of these brands (Carnation) shows a somewhat lower content in solids than corresponds to the content of fat. This becomes more pronounced in the following:

B.C. brand—mean of 6 samples.	Solids	22.63	Fat	6.74
Empress " 1 "	"	22.35	"	6.48
Spencers Perfect " 1 "	"	21.92	"	6.21

It is unfortunate that two of these are represented by single samples only; but the showing, unconvincing as it is, would seem to indicate that milk of the extreme west possesses a somewhat lower relative content of non-fat solids than that of Eastern Canada.

Evaporated milk, as judged from the results of this inspection, appears to be a very satisfactory food product; and the occasional and exceptional occurrence of a sample, slightly below normal, may be held to be almost unavoidable when we take into consideration the variability of the material (milk) used in its production. The season of the year; the state of the pasture, the character of the herd, and other factors, necessarily cause variation in the character of milk; and so long as cases of failure to meet standard requirements are relatively few, and the deficiencies small, there may be considered no evidence of any intent to defraud the purchaser. The fat content is, of course, the most important, from the consumer's point of view. Six brands show decided deficiency in this respect, namely:

B.C. showing a mean fat 6.74 for 6 samples.				
Empress " 6.48 " 1 "				
Gazelle " 6.62 " 2 "				
Primus " 6.39 " 2 "				
Spencers Perfect " 6.21 " 1 "				
St. George " 6.77 " 19 "				

Utility brand is labelled and sold as a skimmed milk, and meets the defined requirements for such an article.

I beg to recommend publication of this report as Bulletin No. 305.

I have the honour to be, Sir,

Your obedient servant,

A. MCGILL,

Chief Analyst.
