AUGUST 20th.

THE BRIDGE

Across the St. John River opposite this City.

Particulars of its Structure .--- Its Strength Demonstrated by the Best Authorities.

The Bridge across the St. John at Fredericton will be about 3000 feet in length over all, including the approaches. It will consist of eleven spans including the draw. Of these nine will be 250 feet in length; the draw gives two openings of 69 feet each, and there will be a short

land span on the Fredericton side of about 80 feet. The piers are of cedar resting, where under water, upon a crib work of hard wood and heinlock, and are filled with stone from bottom to top. They will be thoroughly secured by piles and sheathed on three sides by birch plank, the apron or ice guard being protected by $\frac{3}{4}$ in, plate iron extending from low water to a point above the highest freshet point. They will present a flat surface to the current below high water mark, above which they will be of a cut water pattern for the purpose of breaking any ice pushed above high water mark. The piers will be eleven in number with two shore abutments. They will be twelve feet wide at the top, eighteen feet wide at the low water and seventy two feet long. The cribe will be eight three feet long. drive in so as to meet the people with

The bridge will be built upon what is

is to guard against vibration, from 1500

But the arches will sustain a great pressure. Dismissing the footing arch from consideration for the present the two through arches present a section surface of 1,600 square inches. If the whole weight of the bridge . sted upon these it would be equivalent to pressure Ontario. of 195 lbs. to the square inch, the may. imum weight allowed in practical work being 800 lbs. to the square inch, while if we allow for the footing arch the pres sure to the square inch will be 130 lbs. The archetine therefore capable of bearing very much more than the weight of the bridge. To guard against lateral vibration all necessary bracing both over head aud underneath will be provided, and there seems no good reason why, one of its most houored and consistent mer testing the structure by the

rules laid down by the authorities this bridge should not be very strong. As an illustration of the pressure to which bridges may be subd, it is worthy of remark that at the ge across the St. John at Andover, the there is a span of 160 feet, made ipally of soft pine, the bridge was for loading the piers before the jected, it is worthy of remark that at the bridge across the St. John at Andover. where there is a span of 160 feet, made principally of soft pine, the bridge was rches were put on, and Mr. Simmons. the contractor, says that he has seen light double horse teams loaded with stone upon one of the spans at the same time. That is to say the Andover bridge was capable of carrying more than any was the sume of that institution. He was also a Vice-President of the Bible Society, and for many years chapel steward of the Methodist Church, a Trustee of the Church and a Trusweight it would be required to in actual weight it would be required to in actual practice, without the arches at all. At the Woodstock bridge a Howe truss span was lengthened 40 feet by the removal of a pier, making a span of 210 feet, and the could a different span of 210 feet, and and Mr. R. A. Payne, editor of the St. John the only additional strength given it was a single arch chord seems therefore abundantly clear that

the Fredericton bridge ought to be strong enough for every imaginable purpose.

The Governorship.

Moncton Transcript has the following:-On dit-and it is generally believed-that Lieut. Governor Wilmot has been 'asked to agree to an extension of his term of office for three months. His term expires February 10th, and an addition of three months would extend to the close of the next parliamentary session, when Sir S. L. Tilley, will probably be ready to retire from Parliament and from active Withcal life and labor for the benefit of his breeding country in the gubernatorial of his breeding country in the gubernatorial mansion at Fredericton—the principal part of said labor to consist in wearing a Windfor uniform, gracing public occasion his presence, and drawing his salary. The Lieutenant Governor was seen by GLEANER reporter this morning, and he

Only a Trifle in Advance of the Rules.

Where was He.

Now the rules of the school allowed the young ladies to go out only with the father, the brother or the young man to whom she might he engaged. So, when Rachel's friend, Maria Kent, went to ask permission to drive with Mr. Wilcox, the principal marches to the counter. selects the costliest, and says in tones of majesty____ "Send the bill to my husband!" O acme of faith ! The martyrs knew that the Almighty was equal to the occa-

asked : sion. She knows that her husband is not: And who is Mr. Wilcox, Miss Maria ?' And who is Mr. Wilcox, Miss Maria ? 'He is a friend of mine.' 'You know the rules Miss Maria ; he is certainly not your father ? 'No,' said Maria, demurely. 'You have no half brother named Wilcox ; 'No,' said poor Maria. 'Are you engaged to the gentleman ? 'No,' said Maria, ''but I shall be-before w come home.''-N. Y. Sunday Mercury. yet she trusts, or what is the same thing here, gets trusted. Men allied to such women are soon lifted up t-attics. It is

still true that great deeds bring humanity Therefore, my reader, deem it not trivial that I have paused so long over the

Allens' party. It is philosophical to trace

great events and phenomenal human action to their hidden causes. "Where was your father last Sunday after noon?" asked the minister of an unsophis ticated young lady. There were also diffident men and

There were also diffident men and maidens who descended into the social arena of Mrs. Allen's parlors, as awkward swimmers venture into deep water, but this is fleeting existence in fashionable life. And we sincerely hope that some believed that the old divine paradox, "It is more blessed to give than to receive," was as true in the drawing-poon as when

was as true in the drawing-room as when
