MISCELLANEOUS.

Messes. R. C. Margeson & Co—Dear Sirs: Please accept this testimony from one who has been suffering for upwards of five years from Gravel and Stone in the Bladder, and was advised by my friends to try your Calculifuge. I did so, and am happy to say that after using the two bottles you sent me last summer, it entirely cured me. I passed five stones the size of small peas, and upwards of a wine-glassful of smaller ones and gravel, and will send them to you by the first chance. I would advise all that are suffering with the same complaint, to secure your valuable medicine at once, as it has been the sole means of curing me. I will take pleasure in giving all the information I can to all that will call to see me at my house.

CHEZZETCOOK, March 3, 1873.

ANDREW CRAWFORD.

MESSRS. R. C. MARGESON & Co.—Dear Sirs: I was a great sufferer for upwards of eighteen years with that most distressing complaint the Gravel. Tried many kinds of medicane as well as different Doctors, but got only temporary relief at short intervals. I saw your medicine advertised called Calculifuge, as well as different certificates from those who suffered with the same complaint. Feeling encouraged, I resolved to try it, and after taking three bottles, I found myself nearly cured, and am of the opinion that the fourth bottle will make a final cure.

Wishing you every success, I remain yours, (jy23—3m) JOHN DUMBRACK, Sans. HALIFAX, July 18, 1873.

the second part—old men of the working classes are remently known as "Uncle."

This "little Mary" was by no means little, but a tall comely Cornish maiden of three-andtwenty summers; with hair of glossy blackness and deep b ue eyes, and a face that might have been called beautiful, only that there was such frankness, such simplicity, such tender, anxious love that one seemed to look in at the soul

It was on the evening of this marriage day that the old man and I sat together listening to the music of the bells coming softly and sweetly across the water. He found it rather a relief to have some one to chat with, and I bits of it from one and another, and patched them together as well as I could; and one or two incidents I had heard from bimself, but only just enough to make me eager to hear the rest. Several times I had tried and failed

At other times as I past the old Church I had stayed and listened, marvelling at the rare power and skill with which he could sway the tones, and force them into exquisite harmony, -and had felt my way up the old ricketty staircase, and stood beside him at the organ. But at such times he had no ear, no thought for anything but the music.

But this evening the coast was clear. Betty had gone to see " the little maid " settled at her new home. Uncle John had thought o going too, but Betty had settled that by decidedly but not unkindly expressing an opinion that "men-folks were always best out o' the way;" to which as a general principle on a wedding-day Zacchy might perhaps have ventured to take exception had any one but Betty said it. So early on that summer's evening we sat together, without any fear of disturbance. The gentle sea-breeze swept about us deliciously cool and balmy, and laden with the tragrance of abundant flowers, while over all tell blessing on that happy day.

He explained to the Age his mode of keeping every orchardist. His theory is, that the early rotting and decay of apples is due to a great extent to a vegetable miasma in the air, which cripled legs and leap into the water, and when I knew a man who was nearly eighty years a stick was stretched out to him, gave a look under certain conditions. The effect of the miasma is first seen in a minute speck; somethe same apple. His remedy is a daily airing of the celler or place where the apples are stored, arranging so as to have albrisk circulation till the stagnant air is expelled, and its place occupied by pure, healthy air. He exhibited to us a number of apples which were bruised when gathered, and they were as sound and as crisp as when they tell from the tree, and it seemed a mystery how they could have been thus preserved. He attributes the made by the use of these remediespotato rot to the same miasma.
