### MOTOR CRASH AT WARDSVILLE

At Wardsville on Sunday evening Thomas Creagan was severely cut in the neck and almost bled to death when two motor cars collided at a street intersection. Creagan was thrown partly through the windshield. He and the McDonald brothers of Strathburn were driving home from Ridgetown in a Chevrolet car, and when opposite O'Hara street a Ford car driven by Hugh Lamont came down a hill and crashed into the Chevrolet, which was almost completely wrecked. Creagan was the only one seriously injured. Dr. Glenn dressed the injuries and found Creagan's neck to be badly lacerated, by the broken glass of the windshield, which narrowly missed the jugular vein.

### CELEBRATE GOLDEN WEDDING

Wardsville, June 12.—Mr. and Mrs. Joseph Winger celebrated their fiftieth wedding anniversary on June 12th at their home in Mosa. Mr. and Mrs. Winger were married in Bertie, Ont., June 4, 1872, and came to Mosa fifty years ago when their farm was a dense forest. To their union were born five children, all of whom are living—George Winger, Aldborough; Mrs. W. Cucksey, Newbury; H. Winger, Ekfrid; Mrs. F. Fry, Mosa, and Joseph Winger, on the home-estate. The reunion brought together all their children and grandchildren and two great-grandchildren, numbering in all thirty-six. Tables spread on the lawn were beautifully decorated with flowers, and a luxurious dinner was served. Mr. and Mrs. Winger were presented with a mantle clock decorated with gold. Miss Mary Winger read a pleasing address while Miss Alice Winger presented the gift. Mr. and Mrs. Winger responded in a few well-chosen words.

### WEDDING ANNIVERSARY

One of the prettiest of June wedding anniversaries was held on June 3rd when the children and relatives of Mr. and Mrs. E. V. Thornicroft, of Ekfrid, gathered to honor them, together with B. Williamson, father of the bride of thirty-five years ago, on his eighty-second birthday. Tables were spread outside, decorated with carnations and snow-balls, and dinner was daintily served at high noon. The bride was charmingly gowned in black satin, with touches of shirmp, and corsage of pink carnations and maidenhair fern.

After dinner was served the guests were invited to the drawing-room, which was decorated with roses and peonies, where a short program of violin selections, songs and piano solos was enjoyed by all. Mr. Williamson was presented with a five-dollar gold piece from his four daughters, and Mrs. Thornicroft was the recipient of a beautiful gold-handled parasol and Mr. Thornicroft of an Oddfellows' ring from the family. The latter made an appropriate reply.

Guests numbering about fifty were present from Brantford, Cleveland, Watford, Arkona, Forest and Lambeth.

A game of ball was enjoyed by the young people in the evening.

Don't lose hope. Tanlac has helped thousands who had almost given up in despair. Try it.—P. E. Lumley.

"Andie" Miliken has been appointed superintendent of the hydro and water department of Alvinston at a salary of \$1,000 per year.

Alfred Peasey, of Walkers, has been awarded the contract of painting the buildings on the grounds of the Strathroy Agricultural Society.

Miss Walpole, Major Geo. Vanier, D.S.O., M.C., A.D.C., and Mrs. Vanier, Captain Balfour, Major Hodgson, and Captain Erskine, A.D.C., assisted in entertaining the guests with the customary delightful hospitality of Government House. From the Blue Room the visitors passed out to the lawn where they mingled about in an informal manner and enjoyed a pleasing program given by the G.G.F.G. band. Tea was served later in the ballroom from long buffet tables adorned with spring blooms.

Thursday evening the Press party assembled in the ballroom at the Chateau Laurier, where a supper dance was given through the courtesy of the Grand Trunk and Canadian National Railways.

Following the afternoon business session on Friday all delegates and their ladies were motored to the Experimental Farm where they were graciously entertained by Dr. J. H. Grisdale, Deputy Minister of Agriculture; E. S. Archibald, Farm Director; W. F. Macoun, Dominion Horticulturist; and P. C. Nunnick, P. C. Elford, F. X. Charland and Geo. Robertson.

An enjoyable tea was served to the visitors on the main lawn of the farm. Following this, short addresses were delivered by Mr. Grisdale, who spoke in English and French, and by Mr. Archibald. Mr. A. R. Brennan, the newly-elected president of the Canadian Weekly Newspapers' Association, expressed the appreciation of the delegates for the kind hospitality.

Business notes of the convention and feature subjects of the various addresses will be dealt with later in these columns.

The Transcript wishes, especially at this time to express its thanks and appreciation for courtesies ex-

### CANADA'S WEEKLY PRESS

Annual Convention of Editors a Notable Affair at Ottawa

Newspaper editors and their wives and the number of upwards of three hundred gathered at Ottawa last week in annual convention to discuss business matters pertaining to the craft and enjoy a social reunion. The gathering comprised representatives of six weekly papers from all parts of the Dominion, with Ontario leading in numbers, closely followed in order by Saskatchewan, Alberta and Quebec, while there was a fair sprinkling of delegates from British Columbia and the Maritime Provinces.

Business sessions were held in the assembly room at the Chateau Laurier, where Mayor Frank Plant welcomed the delegates to Ottawa in an aptly phrased speech and extended them the freedom of the city.

Three national leaders, Rt. Hon. W. L. Mackenzie King, Premier of Canada; Rt. Hon. Arthur Meighen, ex-Prime Minister and leader of the Conservative party, and Hon. T. A. Crerar, chief of the Progressive group in the House of Commons, for once saw eye to eye, when they joined in extending a whole-hearted welcome to the delegates. Each speaker stressed in turn the great power and influence of the press in politics, social evolution, community life and in all spheres of human activity.

That the press held in its hands much of the destiny of the state, and that the men responsible for the press of Canada must realize more and more the great responsibility that was theirs, was the opinion of the Rt. Hon. Mr. Meighen.

In the opinion of Premier King there was no single agency to which the government and the people were so much indebted as the press of the country, particularly the weekly press.

Mr. Crerar referred to his connection with weekly press early in life, and spoke of the great opportunity that was given to the weekly newspapers in the moulding of a steady, sound public opinion.

While the men were engaged in the business matters before the convention, splendid social features were enjoyed by their wives and daughters. Thursday at noon they were at the Rivermead Golf Club, guests at luncheon of Central Canada Exhibition under the auspices of the Ottawa Women's Press Club, members of which had met the visiting women on their arrival earlier in the day. The speakers at this function were Mrs. Madge Macbeth, president of the Press Club; Lady Foster, and Mrs. J. Fielding, of Windsor, N.S., a newspaper publisher for 17 years, while honored guests were Mrs. Arthur Meighen, Mrs. R. F. Parkinson, Mrs. Frank Plant and Lady Foster.

Other entertainment provided specially for the ladies included a visit to the Royal Mint and the National Gallery, followed by a motor drive under the auspices of the Ottawa Board of Trade and the Rotary and Kiwanis Clubs.

Thursday afternoon all the delegates and the ladies proceeded by special cars of the Ottawa Electric Company to Government House, where Their Excellencies the Governor-General and Lady Byng of Vimy entertained at a delightfully arranged garden party in honor of the visiting Newspaper Association. The beautiful gardens and lawns at Government House looked at their best and an ideal June day favored this charming affair. Their Excellencies received in the Blue Room, with Major H. Willis O'Connor, D.S.O., A.D.C., in attendance. Her Excellency wore a handsome white embroidered gown with black girdle and large white straw hat trimmed with daisies.

Miss Walpole, Major Geo. Vanier, D.S.O., M.C., A.D.C., and Mrs. Vanier, Captain Balfour, Major Hodgson, and Captain Erskine, A.D.C., assisted in entertaining the guests with the customary delightful hospitality of Government House. From the Blue Room the visitors passed out to the lawn where they mingled about in an informal manner and enjoyed a pleasing program given by the G.G.F.G. band. Tea was served later in the ballroom from long buffet tables adorned with spring blooms.

Thursday evening the Press party assembled in the ballroom at the Chateau Laurier, where a supper dance was given through the courtesy of the Grand Trunk and Canadian National Railways.

Following the afternoon business session on Friday all delegates and their ladies were motored to the Experimental Farm where they were graciously entertained by Dr. J. H. Grisdale, Deputy Minister of Agriculture; E. S. Archibald, Farm Director; W. F. Macoun, Dominion Horticulturist; and P. C. Nunnick, P. C. Elford, F. X. Charland and Geo. Robertson.

An enjoyable tea was served to the visitors on the main lawn of the farm. Following this, short addresses were delivered by Mr. Grisdale, who spoke in English and French, and by Mr. Archibald. Mr. A. R. Brennan, the newly-elected president of the Canadian Weekly Newspapers' Association, expressed the appreciation of the delegates for the kind hospitality.

Business notes of the convention and feature subjects of the various addresses will be dealt with later in these columns.

The Transcript wishes, especially at this time to express its thanks and appreciation for courtesies ex-

tended its representatives by the management and officials of the Grand Trunk and Canadian National Railways, the management of the Chateau Laurier and all those of the various departments at Ottawa who took such great pains to make the annual gathering of the newspaper publishers a pleasurable and memorable one. For personal courtesies extended during our stay in Ottawa we wish also to thank the members for West Elgin, Mr. H. B. McKillop, and Mrs. McKillop, who piloted us through the House and in a social way did all that was required to make us feel quite at home.

### COUNTY COUNCIL NOTES

Middlesex county council completed its June sessions on Saturday.

Among the resolutions passed was one requesting the provincial government to call a halt on their expenditure on highways throughout the province.

A tax rate of seven mills for the county was struck by which it helped to raise \$276,801.86 to meet the current expenditures for the year. The new rate is one-tenth of a mill higher than last year.

The council heard a large deputation from Glencoe and adjacent country asking assistance in a request to the provincial government that certain portions of the road known as the Mosa-Ekfrid townline leading to Alvinston be designated as a provincial road. The deputation also wished that certain portions of the townline between Dunwich and Aldborough be assumed by the province. J. G. Lethbridge, M. L. A. for West Middlesex, introduced the deputation. It was an important proposition, he thought, that the deputation was presenting to the council. When completed there would be a provincial highway connecting practically three other provincial highways, going through Glencoe, on to Alvinston, to Sarnia, and thence to the northern highway.

A. Aldred, of Glencoe, by means of a map showed to the council the portions of the road concerned, and declared that the roads in question had many advantageous features.

M. McAlpine, of Dunwich, and Malcolm McIntyre, of Alvinston, two other members of the deputation, also spoke in favor of the proposition.

When the council came to the order of introduction of resolutions the following resolution was adopted: "Moved by C. C. Henry, seconded by A. McPherson, that the Middlesex county council place themselves on record as approving of having the county road now assumed by the county, known as the Mosa-Ekfrid townline road leading to Alvinston, and also that portion of the road from the provincial highway to the Walker bridge in the township of Mosa, be made a county provincial road, on condition that the county of Elgin will take steps and carry them out to make the road known as the townline between Dunwich and Aldborough townships the same type of road, and that the county of Elgin take the first steps to have the work carried on, in order to meet the wishes of the large petition signed by the people of that section."

A resolution was passed to the effect that the reward of \$2,000 offered last year for the capture of the Murrills be cancelled.

**STANDING OF BALL LEAGUE**  
During the week the following games in the West Middlesex Baseball League have been played:—  
At Delaware—Newbury 11, Delaware 11.  
At Appin—Glencoe 5, Appin 4.  
At Appin—Delaware 4, Appin 5.  
At Glencoe—Newbury 1, Glencoe 15.  
Present standing of league—Delaware, won 3, lost 1; Appin, won 2, lost 3; Newbury, won 1, lost 3; Glencoe, won 3, lost 2.

**COUNCIL AND JURY DIFFER**  
Inspection of County House of Refuge Probably More Thorough by Latter

The grand jury, who visited the house of refuge at Strathroy Wednesday, showed by the report they rendered to the county court that they were not, as well satisfied with the condition of the place as were the members of the Middlesex county council, who visited the home a few hours before them.

They drew the attention of the court to the fact that there were one or two sanitary arrangements that might be better than they are at present, and especially commented upon the location of the punishment dungeon, in which inmates are confined for breaches of the regulations for a period not exceeding 24 hours, and in which they declare the air is not even pure.

The complaint that separated milk is given to the inmates was investigated by them and found to be true, and they pointed out that as only \$30 a month was saved by separating the milk, it might be advisable to expend this amount extra and give the unfortunate the benefit of the pure milk.

In connection with their visit to Strathroy, the members of the grand jury had to pay the own expenses. As nine members of the jury are taxpayers of the county, they believe that provision should be made for paying for visits to the county house of refuge.

### JUBILEE ANNIVERSARY

Glencoe Presbyterian Congregation Hold Rare Celebration

Sixty years ago, St. Andrew's church—a building on Main street near where the manse now stands—was opened for worship. Special anniversary services were held on Sunday, June 11th, in the Glencoe Presbyterian church, commemorating the event. The congregation of St. Andrew's was then in connection with the Church of Scotland. Presbyterian denominations in Canada, however, have long since united, and as St. Andrew's was the first Presbyterian church building in Glencoe, "Free Kirk" and "Auld Kirk" people as well as those who have known only one Presbyterian church joined heartily in making the jubilee an historic occasion.

Rev. Alex. Macgillivray, D.D., of Toronto, conducted the services. Out of his long experience he drew reminiscences of many of the past ministers, and spoke appreciatively of the present minister, Rev. D. G. Paton, whom he had known intimately in Dunrobin. Dr. Macgillivray's sermons were appropriate to the occasion. In the morning, taking as his text Psalm 90, he referred to the noble and self-sacrificing work of past generations, the reliance these forefathers placed on the power of God, the results which had crowned their efforts and the challenge which now came to the church today. He pled for righteousness and consecration so that there might be some worthy work for God to establish.

In the evening, speaking from two texts, Dr. Macgillivray likened life to a journey whose destination was in sight. He urged an acceptance of Jesus who was ever seeking to "draw nigh" to pilgrims and who would be our guide till death. Dr. Macgillivray's powerful personality and his rich exposition of truth made a deep impression on the congregations which filled the church to full capacity. The choir, assisted by Mrs. Cooper, of Chatham, and under the leadership of Miss King, provided music of such high order as to delight all.

On Monday evening under the auspices of the Willing Workers Association, a supper and program were given. The attendance was large. Splendid musical numbers were given by the choir, the male quartette, the orchestra, Miss Luckham and Miss Watts, Miss King and Master Donald McRae. Miss Mayme Grant gave a reading, and greetings were conveyed from their respective congregations by Rev. Mr. Garbutt, Rev. Mr. Charlton, Rev. C. H. Cooke and Rev. George Weir. Rev. John Currie, of London, brought greetings from the Presbytery of London. Dr. McLachlan, the clerk of Session, gave a short historical talk, touching on the church's past.

A printed Order of Service used at the Sunday services contains a brief historical sketch of St. Andrew's church. This will be found in another issue of The Transcript.

**HONOR B. S. SUPERINTENDENT**  
In recognition of his valued and efficient services as superintendent of the Glencoe Presbyterian Sunday School for the past 15 years, officers and teachers on Sunday morning presented John Strachan with handsomely bound copies of the New Testament and the Book of Praise. Accompanying the presentation, which was made by Miss Florence Keith, the following address was read by Miss Margaret Morrison:—

Dear Mr. Strachan.—The teachers and officers of the Sabbath School of the Glencoe Presbyterian church desire to congratulate you on the fifteenth anniversary of your appointment as superintendent of our school.

There have been many changes since you assumed the superintendency. The pupils who were in the school then have grown to maturity. Many who have been pupils during your term of office are now members of our church. Many of them are church members in other communities. Some of them are now teaching in this Sabbath School. It must be to you a pleasure that your work has borne fruit and that you with others have been instrumental in strengthening the cause of Christ in this place.

Your regular attendance has been an example to us; your faithfulness has been an inspiration; your earnestness and devotion have added to our ideal of Sabbath School work as one of the most important works to which God calls men and women. This New Testament and Book of Praise are but a small gift, but your staff in the Sabbath School wish to assure you that loyalty, respect and every good wish accompany this remembrance which we wish you to accept.

**MILLS—McDONALD**  
A quiet but pretty wedding took place at 32, Rogers avenue, London, when Ora, daughter of Mr. and Mrs. A. McDonald, was united in marriage to Herbert W., son of Mr. and Mrs. David Mills, Rev. W. S. Wright officiating. Following the ceremony luncheon was served at the home of the bride, after which the young couple left on the steamship Hamonic for Port Arthur and Duluth.

In every community there are people who have been wonderfully restored to health by taking Tanlac. Try it.—P. E. Lumley.

Nothing stimulates the digestion like

### CHAPTER III.—(Cont'd)

The shadows had deepened into darkness, and the admiring silence of the hills hung about them as they dropped from their saddles at the Eliden door. A light shone from within, and Dr. Hardy, who was now able to move about with the aid of a home-made crutch, could be seen setting the table, while Mr. Elden stirred a composition on the stove. They chatted as they worked, and there was something of the joy of little children in their companionship. The young folks watched for a moment through the window, and in Dave's heart some long-forgotten emotion moved momentarily at the sight of the good fellowship prevailing in the old house. Irene, too, was thinking; glimpses of her own butlered home, and then this background of primal simplicity, where the old cow-man cooked the meals and the famous specialist set the plates on the bare board table, and then back of it all her mother, sedate and correct, and Irene, shocked over this mingling of the classes. But the girl's reverie was cut short by a sudden affectionate licking of her fingers, and glancing downward she found Brownie, adopted early in her visit at the Eliden's, expressing its fondness in the only fashion at its command.

The calf had been an incident in her ranch experience. It was a late comer, quite unable to keep pace with the earlier fruits of the herd, and had the additional misfortune to be born of an ambitious mother, who had not thought of allowing her domestic duties to impair her social relationships with the matrons among the herd, and immediate set. She had no place for old-fashioned notions; she was determined to keep up with the herd, and the calf might fare as best it could. So they rambled from day to day, she swaggering along with the set, but turning now and then to send an impatient moo toward the small brown body stuck on four long, ungainly legs—legs which had an unfor-

**Why Enamelled Ware is favored**

"Poor old Coffee Pot," whispered the enamelled Double Boiler to the Cup. "Missus was awfully mad at him today, wasn't she? She scraped and scoured and rubbed him, but he's almost as black and dirty as ever. And when he arrived here he shone like silver."

"How about me?" groaned Sauce Pan from underneath. "Missus says she's ashamed to have me in the kitchen. Once I was just as shiny and silvery as Coffee Pot. I wish I were like you, Double Boiler. You enamelled ware fellows are always so clean. You are the favorites in this kitchen."

"Cheer up," squeaked the enamelled ware cup with a sleepy yawn. "I heard Missus say today she is going to replace all you fellows with SMP Enamelled Ware utensils."

"She's wise," admitted the dirty-faced Sauce Pan sulkily. And silence descended on the kitchen.

Insist on the clean, healthful

continued, when they had commenced supper, "but I've already overstayed my holiday. Well, I had a good excuse. I feel that I can travel now, and my leg will be pretty strong by the time I am back East. If Dave will oblige us by going to town tomorrow and bringing back someone who can drive a car we will be able to start the following morning. I will just take the car to town, and either sell it there or ship it."

The following morning found Dave early on the trail leading a saddled horse by his side. The hours were tedious for the girl all that day, and looking into the future she saw the spectre of her life shadowed down the years by an unutterable loneliness. How could she ever drop it all—all this wild freedom, this boundless health, this great outdoors, this life, how could she drop it all and go back into the little circle where convention fenced out the tiniest alien streamlet, although the circle itself might be deep in mire? And how would she give up this boy who had grown so imperceptibly but so intimately into the very soul of her being; give him up with all his strength, and virility, and—yes, and coarseness, if you will—but sincerity too; an essential man, as God made him, in exchange for a machine-made counterfeit with the stamp of Society? Deeply did she ponder these questions, and as the day wore on she found herself possessed of a steadily growing determination that she would not follow the beaten trail, let the by-paths lead where they might.

Darkness, save for a white moon, had settled over the foothills when the boy returned with another young man. The stranger ate a ravenous supper, but was not too occupied to essay conversation with Irene. Indeed, from their meeting at the doorway his eyes scarcely left her. He chose to call her cook.

"Swell parakeet, cook," was his opening remark. "Can you find another for yours truly?"

She refilled his plate without answer.

"Used to know a girl mighty like you," he went on. "Waitress in the Royal Edward. Gee, but she was swell! A pippin! Class? Say, she had 'em all guessing. Had me guessing myself for a while. But just for a while." He voiced these remarks with an air of intense self-approval more offensive than the words.

Irene felt the color rise about her neck and cheeks and run like an over-

flowing stream into her ears and about her hair. It was evident that, for a second time, Dave had chosen to say nothing to strangers about her presence at the ranch. But that was not what brought the color. She was addressed as a menial, as a hired helper in the Eliden household! Her own honesty told her that even that was not what brought the color. It was not even the man's insolent familiarity; it was his assumption that his familiarity would not be resented. Her father and Mr. Elden were in Dave's room; Dave had stopped eating, and she saw the veins rising in his clenched fists. But the challenge was to her, and she would accept it; she felt no need of his protection.

"Fill your stomach," she said, passing more pancakes; "your head is empty."

He attempted a laugh, but the meal was finished in silence. The stranger lit a cigarette, and Irene went to the door with Dave. An over-lace of silvery moonlight draped the familiar objects near at hand and faded into the dark, vague lingerie of night where the spruce trees cut their black wedge along the valley.

"Come for a walk," he whispered. "The horses are dead, so let's walk. It's our last chance."

She ran for her sweater, and rejoined him in a moment. They walked in silence down a path through the fragrant trees, but Dave turned from time to time to catch a glimpse of her face, white and fine as ivory in the soft light. He had much to say; he felt that the ages could not utter all he had to say to-night, but he was tongue-tied under the spell of her beauty.

"You squashed him, all right," he broke out at length.

"Just in time, too, I think," she replied. "I was watching your hands."

He smiled a quiet but very confident smile. "Reenie," he said, "that fellow makes me sick. All the way out he talked about girls. If it hadn't been that I was makin' the trip for your father I'd 'a' licked him on the nose, sure. He's a white collar, an' wears a white collar, but he ain't fit to speak your name. Another minute an' I'd 'a' had 'im by the neck." He seized a spruce limb that stuck across their path. It was the size of a stout tree trunk, and he snapped it with a turn of his wrist. It was very tough; it oozed sticky stuff where he broke it. "His neck," he said, between his teeth. "Jus' like that."

(To be continued.)

## Woman's Interests

### Wedding Plans.

For an informal church or home wedding, an afternoon frock of silk, crepe, tulle or satin, is quite appropriate. Brown, blue or grey shades are smart in this costume. There are wonderful possibilities in an out-of-door ceremony which seems to call for crisp organdies for the bride and her attendants.

Ancient lore declares June to be the luckiest month of all for the bride and surely nature sends her choicest blossoms to grace June weddings. Who would call upon the florist shop when right in our own garden are roses, sweet peas, lilacs or old-fashioned flowers for old-fashioned bouquets?

A shower bouquet of white is for the bride who wears white. With the informal wedding frock, the corsage bouquet is usually worn.

A wild flower wedding fits into the out-of-door scheme. Daisies, violets, buttercups or mountain laurel will be in bloom. Some of the loveliest summer weddings nowadays are arranged on the lawn. A shady, grassy spot is quite essential and a flower garden or group of shrubbery makes an ideal background. White ribbons looped between stakes mark the path of the wedding party from the house to the arch of wild flowers under which the vows of "love, honor and obey" are taken.

In setting the day for the wedding, don't forget this old rhyme:

Monday for health,  
Tuesday for wealth,  
Wednesday the best day of all;  
Thursday for losses,  
Friday for crosses,  
Saturday no luck at all.

Fashion dictates the orange blossom ring. No longer does the plain gold band suffice. It has been replaced by the chased or engraved ring, with dainty orange blossoms standing out in relief. These rings are not half so wide as our mothers' wedding rings and are rather thick through. They are seamless, just as tradition tells us they should be; to signify endless love the hopes of a prosperous marriage are expressed by the blossom. Even the long-suffering groom may have an especially for masculine use. Heirloom wedding rings may be made over into one of the new orange blossom rings and may even be overlaid with platinum or white gold.

The bride's cake is frosted with white icing. A thimble, wedding ring and coin are baked in the cake, which is cut by the bride at the wedding breakfast. The girl who draws the piece of cake containing the ring will be married within a year. The coin predicts wealth. The thimble—what do you suppose?

Every guest will wish to "dream" on the wedding cake, of course, so they will either carry away a small piece of the big cake, or be given individual bride's cakes in tiny white boxes. The groom's cake is dark, and is cut by the groom.

For the shower of rice, from which no bride escapes, provide individual

bags for each guest. The tiny bags are made from a twelve-inch square of tartan, by bringing the four corners together and tying with a white ribbon. Another clever idea is to make a slipper-shaped bag of the tartan and fill with rice; or if you could escape the rice shower, provide baskets or bags of rose petals.

There will be guests, hence the question, "how to invite them." Where only relatives and a few intimate friends are to be invited, it would be quite lovely if you ask them in person. An alternative is the phone call or personal notes. Engraved invitations on unglazed white paper are used for church weddings or when many guests are bidden. These are mailed from two to four weeks in advance. If you prefer announcements they should be mailed just after the wedding.

### Canning Rhubarb.

Fortunate it is that the first fruit of the season to be canned is one of the most easily and safely done. As a rule, all fruits and vegetables with a large amount of acid "keep" well. Because of the extreme acidity of rhubarb it is possible to can it without cooking or sugar, like cranberries and gooseberries. If it is cooked, the sterilizing process is more simple than for the less acid fruits.

A combination of the "open-kettle" and "cold-pack" methods is good, as it does away with the waste space in the jar from shrinkage, but keeps all the flavor. Cut the rhubarb in one-inch pieces and cook with one or two tablespoons of water and sugar (one-half to one cupful for each pint of fruit) for three or four minutes. Pack in sterilized jars and sterilize in a water bath ten to twenty minutes, or under pressure (five pounds) ten minutes. If the fruit is to be used for pies, omit the sugar. Seal, invert and cool.

Some people prefer hot water canning without sugar—which is the same as recipe No. 2, substituting hot water for the syrup. Pack the sterilized jars with uncooked pieces, fill to overflowing with boiling water and sterilize twenty to thirty minutes in a pressure cooker at five pounds pressure. Seal, invert and cool.

Cold water canning—The quickest and simplest way of handling is to can without cooking—a procedure which is possible because of the extreme acidity. To do this, wash the stalks and cut them into desired lengths—either one inch pieces or in pieces long enough to stand upright to the neck of the jar. Pack a sterilized jar and fill to overflowing with pure cold water by placing it under the faucet and allowing the water to fill up all air spaces. (If the water supply is uncertain use boiled, cooled water.) Adjust the rubber and seal.

Cold pack canning—For a cooked, sweetened sauce, pack the rhubarb in a jar and fill it to overflowing with a hot syrup made of equal quantities of sugar and water and boil five minutes. Adjust the rubber and cover, and ster-

## That Luscious Raisin Toast!

A NEW delicious breakfast bread. Full-fruited-raisin toast! A new delight for the entire family.

Made with big, plump, tender, seeded raisins—Sun-Maid brand.

The raisin flavor permeates each slice.

You can get such bread from any grocer or bake shop if you insist. No need to bake at home.

Once try it and you'll always have this kind. You'll serve it at least twice a week.

Fine food for business men and children due to the energizing nutriment and the iron of this famous, healthful fruit.

Make dainty bread pudding with left-over slices. No need to waste a crumb.

Order now for tomorrow's breakfast. But be sure to say you want "one of those full-fruited raisin loaves."

## Sun-Maid Seeded Raisins

Make delicious bread, pies, puddings, cakes, etc. Ask your grocer for them. Send for free book of tested recipes.

Sun-Maid Raisin Growers  
Membership 13,000  
Dept. N-43-6, Fresno, Calif.

### Idealist.

I would go adventuring  
When I was a child,  
Riding down the garden paths,  
Fancy running wild.

Mounted on a tro-a-stick  
I would journey far,  
Leading fairy fighting men  
Gallantly to war.

### Lilacs.

Beside the farm-house, old and gray,  
The lilac waves its purple plume,  
And blossoms, bright with dewy spray,  
Shed all around a sweet perfume.

And as the purple banners toss  
Amid the breeze of the May,  
The heart turns back, with sense of loss,  
To May-time and a garden gay.

There, lilacs bloomed beside the door,  
An enchanted spot it seemed to be,  
And one, whose voice is heard no more,  
Was there to share its joys with me!

And ever now when spring returns,  
And lilacs bloom beside the gate,  
For her loved voice my spirit yearns  
While I can only trust and wait.

—Helen B. Anderson.

## SPRYWHEEL

The \$185 Tractor (F.O.B. Toronto).

Plant More Rows and Get Bigger Crops

There's no need to plant in wide rows when you cultivate with Sprywheel. Only 7 inches wide, it weeds and cultivates the narrowest rows. You plant more rows and get bigger crops and profits.

Agencies open in some localities.

62 COLBORNE ST. TORONTO

## THE WORLD'S GREATEST ROOKERY

### HAT ISLAND IN GREAT SALT LAKE.

#### Flocks of Young Pelicans, Ungainly and Fat, Present a Strange Sight.

What is probably the most densely populated rookery in the world is Hat Island, in the Great Salt Lake. Too remote from the mainland to be disturbed save by the passing boat parties, on a rocky mountain top that juts a hundred feet above the brine, with not a drop of fresh water to be found and where there is nothing to excite the cupidity or commercial instinct of man, these birds make their home.

The island can be seen at a distance of ten miles, rising like a cocked hat out of the sapphire of the inland sea. As one nears "the Hat" great pelicans with their enormous pouches showing distinctly circle near the craft and settle lazily into the water. Seagulls, at first singly, then in pairs, and finally by hundreds, also join in the "reception." As the boat comes to rest in a little cove of the island tons of thousands of shrieking, screaming birds fill the air. The birds are utterly fearless. Protected as they are by the laws of the State, they have had little cause to fear man and his death dealing weapons.

#### Circle in a Living Cloud.

The air is literally alive with birds—beautiful white crested seagulls, terns, gulls, darker and more slenderly built but larger than the other gulls; blue herons, commonly called blue herons; flocks of huge, unwieldy pelicans that measure six to nine feet from tip to tip when full grown, and an occasional cormorant. They rise from the ground when man approaches, deserting their nests and their young, and circle in a living cloud.

It is necessary to exercise the greatest care to avoid stepping on the nests and eggs of the tens of thousands of sea fowl that have established their rookeries on that islet of twelve acres. The eggs of the gull, colored like those of the English sparrow but almost as large as those of the chicken, are found by the hundreds in the hot, white sand, with no protection from the elements. There are eggs of the tern, gull, too, a little larger and darker than those of the ordinary gull. Then, too, there are the pelican eggs, larger than a goose egg and chalky white. The eggs of the blue heron or crane are a beautiful blue almost like those of the robin, but of course much larger. Those of the cormorant are white, with tiny freckles of rusty brown.

Thousands of young seagulls, looking almost like young barnyard chicks but with longer sharper beaks, scramble from the nests of the intruder and squawk feebly if too young to scamper to safety.

The strangest sight of all is presented by the flocks of young pelicans, which act like a much sheep. Great, ungainly bodied, but fat, so clumsy that they can scarcely waddle out of the way, these young birds flock in droves. With their long yellow beaks, sharp as sword points, they would be able but for their clumsiness and helplessness to make it extremely uncomfortable for any man. But they are so helpless that they may be herded together like sheep and driven at will across the sand and in the sage brush.

#### Pouches Filled With Fish.

When these ungainly birds are pursued they disgorge the contents of their pouches. It has been charged that the pelicans destroy many trout, bass and other game fish, but among the thousands of dead fish one sees on Hat Island there will be found less than a dozen trout or bass.

As the sun nears the western rim of the lake an uproar is heard. Far away to the northeast specks are seen in the air. They are the adult pelicans returning from the mouth of the Jordan River or from Bear River, fifty and seventy miles distant, laden with fish for the young. Their pouches are distended with carp and other fish, and the young pelicans, always hungry, set up maddening screams when they see the old birds approaching.

The cormorants are as numerous on Hat Island as the gulls and pelicans. The cormorant is a famous fisherman, and although he has a "gripsack" beneath his bill like the pelican he carries great cans across the seemingly limitless expanse of brine to his young. They, like the young of the pelicans, are fat as butter balls.

#### Debt of Honor.

Efforts are being made to secure that in the coming season hospitality and recreation for wounded men in the London hospitals shall be forthcoming as in the past. There are still some 5,000 men in hospital whom the public are in honor, bound not to forget. Drives, river trips, concerts and theatrical and other parties were given last year. The King invited many ex-service men to the grounds of Buckingham Palace.—London Times Weekly.

#### Rapid Sand Sifter.

A sieve shaken by compressed air machinery at a speed of 1,800 vibrations a minute has been invented for sifting foundry sand.

## KING ALEXANDER AND PRINCESS MARIE MARRIED IN ROYAL SPLendor

A despatch from Belgrade, Jugoslavia, says:—King Alexander of Yugoslavia and Princess Marie of Roumania were married on Thursday amid pomp and enthusiasm such as Belgrade has not seen since the establishment of the new kingdom. No untoward incident marred the occasion. Every step of the way to and from the Cathedral was marked by endless ovations.

Artillery salutes at ten o'clock in the morning announced that the ceremony had begun, and at its conclusion, as the royal party left the Cathedral, the Queen of Roumania, smiling through her tears, was seen to bend towards her favorite daughter and caress her—a little human touch which

caught the imagination and deeply affected the simple people. Inside the Cathedral was a scene of magnificence. Representatives of all the states of Europe, in gala uniforms, mingled with ladies in brilliant toilettes, relieved here and there by plain dress suits and khaki. The scenes outside were no less gorgeous, and the streets were a fest of color. Three thousand persons from all parts of the Kingdom of Croats, Serbs and Slovenes, came to witness the marriage. Never has there been such a display of costumes, some of them worth a king's ransom, or such wonderful horses, not to be seen in any other part of Europe.

Notwithstanding this enormous gathering there were no disorders, and no attempts at bomb-throwing.

## BRITISH TROOPS TAKE ULSTER TOWN

Republicans Vacate After a Brief Skirmish at Border Point.

A despatch from Belleek, Ulster, says:—British troops were in action here on Thursday supported by howitzers firing 4.5 high explosive shells. The fighting lasted for nearly an hour, at the end of which the village was in undisputed possession of the attacking force. This consisted of detachments of the South Staffordshires and the Lincolns, who advanced from Pettigoe by road, skirting Lough Erne on the northwest, while the Manchester, with the Hampshire in reserve, a field company of the Royal Engineers, and two howitzers, followed the road which runs along the southern shore. Altogether about 300 officers and men were engaged in the operation.

The following official report was issued in Enniskillen on Thursday night:

"Orders were received to discover whether forces from the Free State were still in occupation of the Belleek district. Orders were issued that Free State territory was not to be entered unless fire was opened on the troops while in Ulster territory. Means of water transport were arranged, as 150 yards of the road entering Belleek from the south were in Free State territory. The infantry were divided into two columns, one on each side of Lough Erne. Armored cars were sent on ahead of these columns to reconnoitre. These were fired on from Free State territory while they were still in Ulster territory. The infantry then advanced from the North. Artillery shelled a ridge to the North, from which fire was being brought to bear on the northern column, and Cliffe, which was the headquarters of the forces occupying Belleek. The fire was very accurate and the enemy retired.

"At 2 p.m. the columns entered Belleek. Our casualties were one man of the Lincoln Regiment, who was slightly wounded. Those of the enemy are unknown, as no wounded were recovered."

A later despatch from Belfast says:—With the British occupation of Belleek, peace ruled along the Fermanagh border on Friday afternoon. The main body of the troops engaged in the operation passed through Enniskillen and returned to headquarters on Friday. Refugees also were returning to Belleek.

## Guarding British Ministers From Irish Extremists

London, June 11.—Several members of the British Cabinet are being closely guarded by special detectives from Scotland Yard, as a presumed result of renewed activity on the part of Irish extremists, said The Illustrated Sunday Herald to-day. Winston Spencer Churchill, Secretary of State for the Colonies, was declared to be one placed on the "protection lists."

Some Ministers, the newspaper asserted, have received serious threats against them if the Irish negotiations do not result favorably.

## Prince of Wales Receives Highest Egyptian Honor

Cairo, June 11.—King Fuad has conferred the Order of Mohammed Ali on the Prince of Wales. This is the highest Egyptian honor, and the Prince of Wales is the first recipient of it. The Prince leaves for Port Said to-night, and will depart on board the Renown to-morrow morning.

## COLLINS AND DE VALERA HAVE REACHED STATUS OF UNIFICATION

Dublin, June 11.—It is stated upon the highest authority that a status of absolute unification has been reached between Eamonn De Valera and Michael Collins.

Following several informal conferences with the Free State leader, De Valera made a speech at Mallow to-day, in which he declared:

"It is not wise to change horses while crossing a stream. It is advisable to return once more to a show of confidence in those whom you returned unanimously on the last occasion."

This reference to the elections of next week is taken as final assurance that a complete accord has been reached between the real leaders of the Republican and the Free State factions.

Michael Collins is going to Cork to-morrow, where he will also declare for "a campaign of unity."

It is stated that Cathal Brugha will remain in the open opposition to the acceptance of the treaty, in spite of the attitude of Collins and De Valera, but it is said that his influence will not be a serious factor.

## British to Withdraw When Raids Cease

A despatch from London says:—The British Government intends to withdraw the British forces within Ulster territory, it is said, as soon as it is satisfactorily assured of the unlikelihood of a repetition of the incursions and raids which have disturbed the area, and communications to this end and for the restoration of tranquility on this part of the frontier have been addressed to the Provisional Government.

Princess Marie, second daughter of the King and Queen of Roumania, whose marriage to King Alexander of Jugoslavia at Belgrade was marked by elaborate ceremonies.

## BOLSHEVISTS ROB MONARCHS' TOMBS

Continue Work of Ferreting Out Church Treasures for Confiscation.

A despatch from Paris says:—The Russian Bolsheviks, leaving no stone unturned in their work of ferreting out Church treasures for confiscation, have violated the tombs of the Czars and Czarinas in St. Peter and St. Paul's Cathedral, Petrograd, says Le Journal, quoting private advices from a reliable source.

The tomb of the Czarina Anna Ivanovna, which is made of silver, was removed bodily, and the coffin of Catherine the Great was broken open and a necklace and rings of great value were taken. The Bolsheviks are declared to have even pried the lid from Peter the Great's coffin, but finding the body marvellously preserved, were abashed, and dared not strip it of its jewels.

The despatch adds that news of the sacking of the tombs spread rapidly among the Russian people, who are extremely indignant at the desecrations.

A reduction of approximately 15 per cent. in the Saskatchewan wheat acreage is indicated in a Government crop report just issued. Shrinkage in wheat seeding is largely counterbalanced by an increased acreage in oats, flax and barley. Rather heavy frosts are reported from the Battle district, but permanent injury to growing grains is not looked for.

## Educational Economy.

One of the series of bulletins issued recently by the alumni of the University of Toronto deals with the cost per pupil of education. It is a well known fact that the cost per pupil in the public schools has greatly increased during the past two decades and the same is true with regard to the high schools. Such, of course, is only natural not only on account of the continually decreasing value of the dollar but also on account of the greatly diversified type of education which the modern world demands. No longer is instruction in the three basic subjects of the early school curriculum sufficient for the needs of the modern boy and girl. The same is true, this bulletin demonstrates, in the provincial university. To meet the requirements of modern life it has been necessary to add very many university departments. And yet the cost per student in the universities of Great Britain and of the United States. This is proof, if proof were needed, that the University of Toronto is managed with the most careful economy. It is easy for the Anglo-Saxon to criticize anything that is his own, but the series of bulletins already referred to has served to show that criticism of the provincial university's expenditures is not supported by fact and that everything possible is being done to furnish to the youth of Ontario the very best of higher education at a minimum of cost.

## Hints for Campers in the Forest.

Be sure your match is out. Pinch it before you throw it away. Build a small camp-fire. Build it in the open, not against a tree or log or near brush. Scrape away the trash from all around it. Never leave a camp-fire, even for a short time, without quenching it with water and then covering it with earth. If you find a fire, try to put it out. If you cannot extinguish it, send word of it to the nearest Forest Ranger. Throw pipe ashes and cigar or cigarette stumps in the dust of the road and stamp or pinch out the fire before leaving them. Don't throw pipe ashes and cigar or cigarette stumps into brush, leaves, or pine needles.

## A Menace to Children.

Many children lose their lives every year from tetanus or lockjaw caused by stepping on the points of nails thoughtlessly left protruding from boards which are thrown down and left where barefoot children or children with worn thin shoe soles can step on them. It takes only a few minutes to remove the nails from the boards. Better be safe than sorry.

## DUTCH FLOWERS ON LONDON MARKET

Cut at Daybreak, Reach Covent Garden by Air at Eight O'clock.

A despatch from London says:—Although aerial passenger traffic between England and the Continent has been falling steadily as a result of accidents, transportation of freight is increasing. Consignments of Dutch cut flowers for London by a group of Rotterdam growers, who are sending crates of peony roses, have been begun.

Flowers cut at daybreak with the dew still on them are on sale in Covent Garden market at 8 o'clock. Beside de luxe parcels such as robes, perfumes from Paris and men's clothing, cigars and whiskey from London, there is a big traffic in newspapers from the Capitals.

London dailies are on sale in Paris at 9 o'clock in the morning. As a matter of fact passengers are growing timid, the flying official figures showing 7,000 persons in 1920 and 14,000 last year, with only 3,000 so far this season, which is half over.

## Postpone German Loan For Three Months

A despatch from Paris says:—The international bankers, at a session held on Friday, virtually decided to adjourn for three months and then resume consideration of a proposed loan to Germany. The decision to adjourn was taken Friday evening after its members had agreed that in view of the situation created by the reparations commission's vote, nothing could be done at this time toward arranging a large loan for Germany.

## Weekly Market Report

**Toronto.**  
Manitoba wheat—No. 1 Northern, \$1.41; No. 2 Northern, \$1.36½; No. 3 Northern, \$1.27.  
Manitoba oats—No. 2 CW, 59½c; No. 3 CW, 56½c; extra No. 1 feed, 56½c; No. 1 feed, 54½c.  
Manitoba barley—Nominal.  
All the above, track, Bay ports.  
American corn—No. 2 yellow, 77½c; No. 3 yellow, 74½c, all rail.  
Barley—No. 3 extra, test 47 lbs. or better, 60 to 65c, according to freight outside.  
Buckwheat—No. 3, \$1.00.  
Rye—No. 2, 95c.  
Milfeed—Del. Montreal freight, bag included: Bran, per ton, \$28 to \$30; shorts, per ton, \$30 to \$32; good feed flour, \$1.70 to \$1.80.  
Baled hay—Track, Toronto, per ton, extra No. 2, \$22 to \$23; mixed, \$18 to \$19; clover, \$14 to \$18.  
Straw—Car lots, per ton, track, Toronto, \$12 to \$13.  
Ontario wheat—No. 1 commercial, \$1.40 to \$1.45, outside.  
Ontario No. 3 oats, 40 to 45c, outside.  
Ontario corn—53 to 60c, outside.  
Ontario flour—1st pats., in cotton sacks, 98's, \$7.70 per bbl.; 2nd pats. (bakery), \$7.20. Straights, in bulk, seaboard, \$6.55.  
Manitoba flour—1st pats., in cotton sacks, \$8.70 per bbl.; 2nd pats., \$8.20.  
Cheese—New, large, 16½ to 17c; twins, 17 to 17½c; triplets, 18½ to 19c. Old, large, 21c; twins, 21½ to 22c. Stiltons, new, 20c. Extra old, large, 25 to 27c. Old Stiltons, 24c.  
Butter—Fresh dairy, choice, 20 to 25c; creamery prints, fresh, finest, 36 to 37c; No. 1, 33 to 34c; No. 2, 30 to 31c.  
Dressed poultry—Spring chickens, 60c; roosters, 55c; fowl, 24 to 30c; ducks, 35c; turkeys, 40 to 45c.  
Live poultry—Spring chickens, 50c; roosters, 17 to 20c; fowl, 26c; ducks, 35c; turkeys, 30 to 31c.  
Margarine—20 to 22c.  
Eggs—New laid, candled, 31 to 32c; new laid, in cartons, 35 to 36c.  
Beans—Can., hard-picked, bushel, \$4.25; primes, \$3.75 to \$3.90.  
Maple products—Syrup, per imp.

## FIFTY PERSONS KILLED IN HURRICANE SWEEPING NEW YORK HARBOR

New York, June 11.—Wind of hurricane velocity, the outrider of a torrential rainstorm that swept from the eastern edge of New Jersey across this city and over Westchester county late this afternoon, was responsible for at least fifty deaths, hundreds of minor accidents, large destruction of property, and riots and panic at traffic terminals and pleasure resorts.

The most numerous fatalities were drownings off City Island of men and women in rowboats. Eight bodies had been recovered at 10 o'clock to-night, and 30 persons were not accounted for. The dead calm of the late afternoon following a day of scorching heat, had driven millions to seek relief anywhere it promised to be cool. The number of those in rowboats off the Westchester shore, at City Island and thereabouts, was estimated at 15,000. The gale came out of an almost clear sky, and reaching shore before it struck was hopeless for most of those in the boats.

A Ferris wheel at Clason's Point Park, in the Bronx, was blown into Long Island Sound, causing deaths to five and serious injury to 35 persons. A tree was blown over on the brick chimney of Red Lion Inn, on the Boston Post road, and the chimney fell through the roof of the main restaurant, killing two persons. Drivers of motor cars were caught under falling trees, one woman dying in such an accident near Hackensack. Broken glass, blown from big windows in this city, injured several persons.

New York, June 12.—The New York World this morning estimates yesterday's hurricane toll at 50 killed in New York City and immediate vicinity. The World says: "Thirty-eight persons are known to have been drowned in Pelham Bay, off City Island, when their rowboats overturned. Eight bodies had been recovered at midnight, and thirty persons were not accounted for."

## Who Caused World War Still in Question

A despatch from Peking says:—Wu Pei-Fu, dominant Chinese leader, and Chang Tso-Lin, Manchurian war lord, have agreed on an armistice, the suspension of hostilities to continue indefinitely while the two discuss a permanent peace.

King Alexander of Jugoslavia who was married to Princess Marie of Roumania on June 8th.

## CAIRO WELCOMES PRINCE OF WALES

H.R.H. Tendered Tremendous Reception in Egyptian Capital.

A despatch from London says:—The Prince of Wales has arrived at Cairo, where he was given a tremendous reception. He was received by the Premier, the High Commissioner of Egypt and Crown representatives. The last stop of the Prince on the homeward leg of his long journey, which took him to India, the Far East and the Philippines, will be at Gibraltar, where he is expected to arrive on the 17th. After a few hours' stay he will depart for Plymouth.

## North China Leaders Agree on Armistice

A despatch from The Hague says:—I learn that a large sum of money from an American, who desires to re-organize and it is proposed to make the first shipments in the course of the next few weeks. The Rocky Mountain Paint Company, recently incorporated, which has located in Calgary, Alta., controls vast deposits of color-bearing material in the western area of the province and is utilizing these western resources in the manufacture of paints and colors. Arrangements have been made for placing the local product on the western markets.

Operations have commenced at the new egg melange plant owned at Winnipeg, by the William Davies Company, for the exploitation of the Hull process of freezing eggs. The product is being shipped East where it is used in the manufacture of confectionary.

## Oldest Wedded Couple in Britain Pass Away

Prince Rupert, B.C., June 11.—The death of Thomas Minty and his wife, aged 99 and 98, respectively, at Aberdeen, Scotland, is reported in a message received by A. C. Minty, a son here. They were said to have been the oldest living wedded couple in the United Kingdom, having been married 72 years. Nine children survive, all in Canada.

The Earl of Balfour is discharging the duties of British Foreign Secretary, owing to the protracted illness of the Marquis of Curzon.

## PROGRESS IN WESTERN CANADA

A paper mill, to cost \$100,000, is to be erected on the north arm of the Fraser river within the boundaries of the city of New Westminster, according to an announcement made by the Westminster Paper Company. This is a new organization backed by United States capital, most of the individuals interested being Wisconsin men. About one hundred men will be engaged, and it is the intention to manufacture tissue and other thin papers from British Columbia pulp for the Canadian and Oriental markets.

Present indications point to a considerable revival of placer mining in the cariboo district. Gold mining is the most attractive mining enterprise at the present moment, because the cost of labor and supplies has dropped, and there is a sure market for the whole of the output. Several United States concerns have purchased and bonded placer leases, and already a good deal of machinery has been freighted to the respective claims.

The Western Abrasive Paper Co., Ltd., has been incorporated with headquarters at Victoria, B.C., for the purpose of manufacturing sandpaper. The company is using as abrasive material a hard crystalline quartz from the Prince Rupert district, which has proven to be of hardest quality.

New creameries are being built in several sections in the northern part of the province of Alberta. Cheese factories are being erected at Rossington, Round Hill and Calmar, and a creamery is being built privately at Wetaskiwin. A creamery is also being built at Peace River Crossing and another at Bervyn, end of steel on the Edmonton, Dumvegan, and British Columbia Railway.

Considerable progress has been made in connection with the scheme of shipping chilled beef to the United Kingdom, according to William Spruell, who is a member of the United Farmers' committee appointed to inquire into the matter. Prominent Alberta stockmen have formed an organization and it is proposed to make the first shipments in the course of the next few weeks.

The Rocky Mountain Paint Company, recently incorporated, which has located in Calgary, Alta., controls vast deposits of color-bearing material in the western area of the province and is utilizing these western resources in the manufacture of paints and colors. Arrangements have been made for placing the local product on the western markets.

Operations have commenced at the new egg melange plant owned at Winnipeg, by the William Davies Company, for the exploitation of the Hull process of freezing eggs. The product is being shipped East where it is used in the manufacture of confectionary.

## Research Develops New Use for Canadian Woods.

Many people when passing a shop where automobile storage batteries are sold must have noticed in the window one or two batteries cut open to show the interior construction. These sections show the edges of the lead plates used in the battery and between the plates very thin corrugated sheets of wood. These sheets are known as separators and while perhaps appearing relatively unimportant have in fact been the subject of extensive research.

Wood for battery separators must possess special chemical and physical properties and until very recently the wooden separators used in Canada were made almost exclusively of imported woods. The Forest Products Laboratories of the Forestry Branch, Department of the Interior, recently undertook research to determine whether any Canadian wood was suitable for separator work, and as a result found a most excellent material in the yellow cypress of British Columbia. This wood was found to process the requisite properties to a high degree and is now in regular commercial use for the manufacture of separators.

What Did He Say?  
"Will you please open this gate for me?"  
The gentleman did so, then he said kindly: "And why, my child couldn't you open the gate yourself?"  
"Because," said the little girl, "the pain's not dry yet."

Forest fires destroy more trees than the woodman's axe. Many of these fires are caused by carelessness on the part of those who make use of the forests for recreational purposes.

The season is at hand when the fire danger is at its height. It is the duty, therefore, of everyone to realize his individual responsibility to Canada's trees, and guard against fire.

GENE DYKES

## THE OUTING SEASON DEMANDS OUTING WEARING APPAREL

### MOSA COUNCIL

A meeting of the council of the  
township of Mosca was held at Glen-  
coe on May 27th. Members all present.  
The minutes of the last meet-  
ing were read and approved.  
Moved by E. Hurdle, seconded by  
D. A. Mitchell, that Babcock and  
Miller be paid \$60 for work done on  
the Deacon-Winship drain. Carried.  
Moved by F. J. James, seconded by  
D. A. Mitchell, that Commissioner  
Hurdle be hereby instructed to erect  
a wire fence along the Burchell-Suth-  
erland drain on the road allowance  
between concessions 3 and 4. Car-  
ried.

Moved by E. Hurdle, seconded by  
D. A. Mitchell, that Jas. M. McGreg-  
or, C. E., be paid \$37 for surveying  
Gov. Drain No. 3. Carried.  
Moved by E. Hurdle, seconded by  
D. A. Mitchell, that Commissioner  
Hurdle be instructed to survey the  
Reycraft-Winship drain, and \$15  
for schedule of cuttings and re-stak-  
ing the Lethbridge drain; A. E.  
Sutherland, \$60.25, for printing audi-  
tors' reports, etc.; E. F. Reycraft,  
\$2. E. Hurdle \$2, F. Haggith \$2, Chas.  
Telfer \$2, for assistance surveying  
the Reycraft-Winship drain; Charles  
Fennell, \$2, for valuating sheep killed  
by dogs; Canadian Express Co.,  
45c, charges on collector's roll; E.  
Hurdle \$2.50, Dunc. P. McCallum  
\$2.50, Arch. Gillies \$2.50, John Craig  
\$2.50, Arch. Gillies \$2.50, for assist-  
ance surveying Gov. Drain No. 3;  
F. J. James \$2.50, O. Dewey \$2.50,  
J. T. Lethbridge \$2.50, for assist-  
ance re-staking the Lethbridge drain;  
R. W. McKellar, \$130, for services as  
assessor for 1922; Corrugated Pipe  
Co., for steel culverts, \$252.47. Car-  
ried.

Moved by J. A. Leitch, seconded  
by F. J. James, that all taxes collect-  
ed from oil companies be spent on  
the roads along the lands where the  
oil wells are located. Carried.  
Moved by E. Hurdle, seconded by  
F. J. James, that by-law No. 699,  
to provide for the construction of the  
Duncan Graham drain be provision-  
ally adopted, and the clerk is here-  
by instructed to have the by-law  
printed and a copy served on each  
owner assessed, and that the 17th  
day of June be set as the date for  
holding a court of revision at New-  
bury at the hour of 2 o'clock p. m.  
Carried.

Moved by F. J. James, seconded  
by J. A. Leitch, that the engineer's re-  
port on the repair of the Reycraft-  
Winship drain be adopted, and the  
clerk is hereby instructed to prepare  
a by-law in accordance with the said  
report. Carried.

Moved by J. A. Leitch, seconded  
by E. Hurdle, that F. J. James be  
appointed chairman in the absence  
of the reeve. Carried.  
Moved by E. Hurdle, seconded by  
J. A. Leitch, that the engineer's re-  
port on the repair of Gov. Drain No.  
3 be adopted, and the clerk is hereby  
instructed to prepare a by-law in ac-  
cordance with the said report. Car-  
ried.

Moved by D. A. Mitchell, seconded  
by J. A. Leitch, that E. Hurdle be  
appointed commissioner for to let  
and superintend the work of repair-  
ing the Reycraft-Winship drain and  
Gov. Drain No. 3. Carried.

Moved by D. A. Mitchell, seconded  
by J. A. Leitch, that E. Hurdle be  
hereby directed to extend the culvert  
on the McKee drain where said  
drain crosses No. 12 sideroad. Car-  
ried.

Moved by J. A. Leitch, seconded  
by D. A. Mitchell, that by-law No.  
700, to provide for the provincial  
grant to the township for roads, be  
passed. Carried.

The council adjourned to meet at  
Newbury on June 17 at 10 a. m.  
C. C. McNaughton, clerk.

### S. S. No. 5 GARDEN PARTY

The garden party held by the  
sports club of S. S. No. 5, Ekfrid, on  
Friday evening, was a success in  
spite of unfavorable weather. The  
program was decidedly first-class and  
was much enjoyed by all who were  
fortunate in finding accommodation  
in the school house.

The Maple Leaf Quartette, of Galt,  
will always be assured of a welcome  
here. It would be difficult to find an-  
other company of four men with so  
much talent as is possessed by this  
quartette. Their voices blend and  
balance to perfection. Miss Margar-  
et Morrison ably assisted as pianist.  
Miss McLean rendered several read-  
ings in a very pleasing manner. Old  
friends were delighted to hear Mr.  
Gordon's Scottish songs, and Master  
Donald McKee's singing was heartily  
applauded. Laughton's orchestra  
rendered a number of pleasing se-  
lections during the evening. In the  
unavoidable absence of J. C. Elliott  
the chair was ably filled by L. L. Mc-  
Taggart.

### EXECUTORS' SALE OF REAL AND PERSONAL PROPERTY

In the Village of Middlemiss, in the  
County of Middlesex

The undersigned Executors under  
the Will of Robert B. Campbell, late  
of the Village of Middlemiss, in the  
County of Middlesex, gentleman, de-  
ceased, will offer for sale by Public  
Auction on the premises, on SATUR-  
DAY, JUNE 24, 1922, at 2 p. m., the  
following Real Estate:

Village lots numbers 17 and 18 on  
the south side of Main Street in the  
Village of Middlemiss in George Mid-  
dlemiss' survey of part of lot number  
1 in the 3rd range south of the Long-  
woods Road in the Township of Ek-  
frid, in said county, containing one  
half of an acre more or less.

This property has on it a good  
frame dwelling house in good repair,  
a small frame stable and other im-  
provements, and is well situated in  
the Village of Middlemiss.

Terms of sale of real estate:—One-  
quarter of the purchase price to be  
paid at the time of sale and the bal-  
ance within two weeks thereafter.

There will also be offered for sale  
at the same time and place the fol-  
lowing personal property:—1 book-  
case, 1 cupboard stand, 1 lounge, 6  
chairs, 2 rocking chairs, 1  
fall-leaf table, 1 coal oil stove, 1 air-  
tight heater, 1 coal oil heater, 1  
writing desk, 2 wash stands, lamps,  
washing machine and wringer, pic-  
tures, carpet, wash tub and board,  
boiler, quantity of quercwood, 2 iron  
beds, mattress and springs, weigh  
scales, numerous other articles.

Terms of sale of personal property  
—Cash.  
Donald Campbell and Robert H.  
Campbell, Executors; L. L. McTag-  
gart, Auctioneer; ELLIOTT & MOSS,  
Solicitors.

### ADMINISTRATRIX' SALE OF REAL AND PERSONAL PROPERTY

In the Township of Mosca, in the  
County of Middlesex

The undersigned administratrix of  
the estate of William Robinson, late  
of the township of Mosca, in the  
county of Middlesex, farmer, de-  
ceased, will offer for sale by public  
auction on the undermentioned prem-  
ises, on FRIDAY, JUNE 30, A. D.  
1922, at 1:30 p. m., the following real  
estate:—

The east half of the north half of  
lot number eleven in the first range  
south of the Longwoods Road in the  
township of Mosca, containing fifty  
acres more or less.

This property is well situated on  
the Longwoods Provincial Highway,  
about two and one-half miles east of  
Wardsville, and is convenient to  
church and school. The soil is  
sand loam. It is all cleared and has  
on it a frame-house and frame barn  
and other improvements.

Terms of sale of real estate:—One-  
fourth of the purchase price to be  
paid at the time of sale and the bal-  
ance within two weeks thereafter.

There will also be offered for sale  
at the same time and place the fol-  
lowing personal property:—3 horse,  
3 milch cows, 1 yearling steer, 1  
mower, 1 binder, 1 plow, 1 two-fur-  
row plow, 1 set iron harrows, 1 corn  
cultivator, 1 fanning mill, 1 hay rack,  
1 set of small scales, 1 set of team  
harness, 1 set of light double har-  
ness, 1 lumber wagon and gravel  
box, 1 cream separator, about 50  
bushels of oats, a quantity of corn  
on the ear, forks, shovels, and other  
articles; 1 clock, 4 tables, 1 bureau,  
1 cupboard, 1 cooking range, 1 heat-  
ing stove, other household articles.

Terms of sale of personal property  
—Cash.  
L. L. McTAGGART, Auctioneer;  
ELIZABETH TULLISON, Administra-  
trix; ELLIOTT & MOSS, Solicitors.

### FLOUR AND FEED

The C. E. Nourse Company wish to  
announce that they have purchased  
the flour and feed and other business  
connected therewith from Bruce Mc-  
Alpine, and are prepared to give their  
best attention to the wants of the  
community in their line. The busi-  
ness will be conducted on a strictly  
cash basis.

They are also prepared to buy all  
kinds of grain, paying the best mar-  
ket prices.

J. D. McKellar, Manager.

## FOUNDERS IN CANADA

ON Place d'Armes in the City of Montreal stands a  
monument to Sieur de Maisonneuve who, landing  
near this spot in the year 1642, founded the settlement  
which is now the City of Montreal.

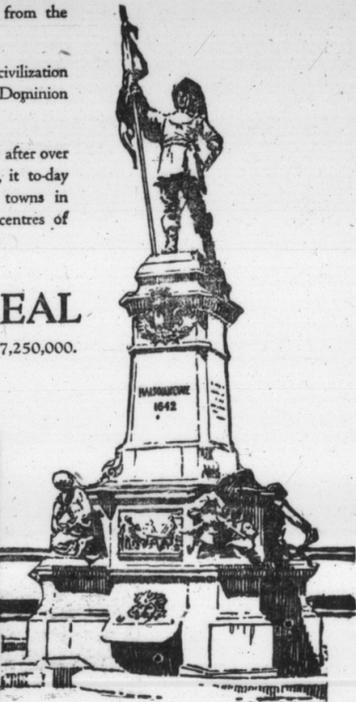

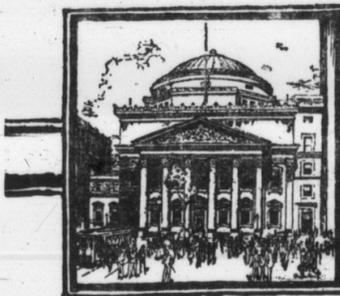

Facing Place d'Armes stands the Bank of Montreal, which  
opened its doors for business a short distance from the  
same spot over one hundred years ago.

From the Settlement founded by Maisonneuve, civilization  
has spread to the east and west until to-day the Dominion  
of Canada extends from Halifax to Vancouver.

Likewise the Bank of Montreal has grown, until after over  
a century of steady and conservative progress, it to-day  
has Branches in all of the cities and larger towns in  
Canada, with offices in the principal financial centres of  
the world, and correspondents in every country.

## BANK of MONTREAL

Capital Paid Up \$27,250,000. Reserve \$27,250,000.  
Total Assets \$653,869,071.21.

BUILDING - 1000-1002 W. WILSON ST.  
DETROIT

## DUNLOP TIRES

Ensure  
HIGH-MILEAGE—DOUBLE-LIFE

- ☑ Dunlop leadership in Tiredom is most manifest. Mileage records almost unbelievable are piling up all over Canada.
- ☑ The Special Mileage-Making Process, which is the basis of our Fabric Tires, has worked wonders.
- ☑ Perfect shape and balance, stronger side walls to resist curb and rut abuse, special wear-resisting anti-skid tread, etc., add the last touch to popularizing to the full a tire that has long stood in high favor.
- ☑ Dunlop "Cords" made good from their inception.
- ☑ These tires taught motorists to expect more resiliency, greater air space, larger amount of material, better carrying capacity—in short, bigger mileage; and that is the standard by which all Cord Tires are judged to-day.

**Dunlop Tire & Rubber Goods Co., Limited**

Head Office and Factories: TORONTO.

Branches in Leading Cities.

"Adeline" is most fetching dress in very fine quality, good weight, Bodice serge; adorned strikingly with a new all-over design of silk, featuring narrow band girdle of self material with streamer ends; no flare sleeves; dress done in back. \$14.50 splendidly tailored.

J. A. RAEBURN Contractor for OIL, WATER AND GAS DRILLING

All kinds of Pumps and Pipe Supplies. Up-to-date Drilling Rig at your service. GORE CONCESSION, EKFRID.

**Born**  
DEWAR.—On Saturday, June 10, 1922, to Mr. and Mrs. John Dewar, Detroit, Mich., a daughter, Nettie Jean.

SMITH.—On Friday, June 9, 1922, to Mr. and Mrs. Arthur Smith, Glencoe, a daughter—Doris Norene.

STUART.—At York Hospital, Moosejaw, Sask., on Friday, June 9, 1922, to Mr. and Mrs. Dan. H. Stuart (nee Isabel McTaggart), a son—William Lachlan.

### TOWN AND VICINITY

July 1st—the anniversary of the birth of the Dominion of Canada—falls on Saturday this year.

J. McKellar, of Ailsa Craig, has purchased the grocery business of W. Lindenman at West Lorne.

Glencoe races were on when The Transcript went to press. Thirty-five horses were entered in the three events.

Preparations are under way for this season's three-day Chautauqua series of entertainments in Glencoe, beginning August 14th.

Dan A. Walker, of Metcalfe, and Chas. Sutherland, of Ekfrid, were serving on the grand jury at the county court in London last week.

The death occurred near Paris on June 4th of Henry S. Moss, a prominent public man of South Dumfries. W. D. Moss, barrister, Glencoe, is a brother.

J. A. McLachlan has sold his grocery and confectionery business to A. J. Traver, of Theford, who takes possession June 21st. Mr. McLachlan retains the building, the residence part of which he will continue to occupy.

Leonard Hillman has the editor's thanks for a box of delicious strawberries. They are of the White Elephant variety and are truly elephant both in size and quality. Some of the berries are the largest we have ever seen.

A number of friends met at the home of Mr. and Mrs. Dan A. Graham on Friday evening in honor of their daughter May, a popular June bride-elect, and tendered her a miscellaneous shower. Lunch was served and altogether an exceedingly pleasant time was spent.

A strawberry and ice cream festival will be held at the Appin Methodist church on Monday evening, June 19. A first-class program has been arranged. Strawberries, ice cream and cake served free. Lighthouse four-piece orchestra will furnish music throughout. Admission, 25 cents.

No. 16 Eastern Flyer on the Grand trunk narrowly escaped being wrecked Sunday evening when the locomotive hauling the train was derailed near Jeannette's Creek while running at its usual speed. Fortunately no one was hurt. The St. Thomas auxiliary replaced the engine on the rails and the train was not delayed more than a couple of hours.

At the annual Conference of the Methodist church recently held in London, Rev. A. S. Whitehall, of Thamesville, and Isaac Waterworth, of Wardsville, were elected as delegates to represent the Ministerial and Layman's Associations of the Ridgetown district respectively at the General Conference of the Methodist Church to be held in Toronto last week of September and first week of October.

The London Thistle Bowling Club is holding its twelfth annual Scotch doubles tournament Wednesday and Thursday, June 21st and 22nd, for their three trophies and \$200 in prizes. This is the big Scotch doubles classic event of Western Ontario, with keen contests. So popular is this tournament and so attractive its prizes that contestants go annually from all over Western Ontario and as far east as Ottawa. Our home club should go after these much coveted trophies and prizes. Entries close Monday, June 19th.

What promises to be an interesting meeting will be held in the lecture room of the Glencoe Presbyterian church on Wednesday afternoon, June 21st. It is the regular monthly meeting of the Women's Missionary Society and an address will be given by Mrs. McSchren, of London, who will give her impressions of the Ontario Provincial W. M. S. meeting held in Ottawa. The auxiliaries of the churches at Appin, North Ekfrid, Kilmartin, Tall's Corners, Newbury and Wardsville have been invited to attend, and tea will be served.

The regular meeting of the Women's Missionary Society of the Methodist church was held on Tuesday afternoon at the home of Mrs. J. D. Smith. The president, Mrs. B. F. Clarke, gave a vivid and comprehensive report of the London Conference Branch of the W. M. S. convention held in Windsor recently. A duet was given by Mrs. Gould and Mrs. Nixon, which was enjoyed by all. One of the most interesting features of the afternoon was the presentation of a life membership certificate to Mrs. Garbutt, who with her family is to make her home in London. Mrs. Yorke read the address and Mrs. Mumford made the presentation, after which the hostess served tempting refreshments.

### SPECIAL NOTICES

Lamont's big 3-day reduction sale of pants, shirts, etc.

Organ for sale. Apply to Mrs. John O. Archer, Newbury.

Residence on Main street for sale. Apply to Mrs. Mary McAlpine.

Remember Kilmartin's monster garden party, Monday, July 10th.

Road gravel for sale—Chas. Faris, lot 4, Longwoods Road, Moss.

Good showing of ad. and children's millinery at the Keith Cash Store.

Lawn social tomorrow evening—Methodist church lawn. Everybody welcome.

Pure bred Black Minorca eggs for sale; \$3 per setting.—B. F. Clarke, Glencoe.

At the Graham Style Shop, Newbury branch—all early millinery one-third off!

Wanted—a girl for upstairs work. Apply F. Loosmore, McKellar House, Glencoe.

For sale—pure bred Airedale pups, pedigrees furnished. Apply to Joe Walton, Wardsville.

The regular meeting of the South Ekfrid U. F. O. will be held on Friday evening, June 16th.

White Leghorn baby chicks for sale, ready June 17th.—W. J. Caruthers, Route 4, Glencoe.

Upholstering, fine cabinet work, carpenter work, furniture finishing.—J. D. Brown, second floor Graham's garage.

Remember the strawberry and ice cream festival at Appin on Monday, June 19th. A real treat is assured everybody.

For sale—6 pure bred Poland China pigs, 2 months old, and 1 sow, 2 years old, due 12th July.—Lorne Goff, Glencoe.

For the June bride—Give her the gift she will appreciate—Community plate silverware and Rodgers 1847.—Wright's Hardware.

The Methodist Mission Band are holding a lawn social on the church grounds, Glencoe, Friday evening of this week. Adults 25c, children 10c.

Big sale of high grade aluminumware, less than market prices. Sale starts Saturday, June 17, at Wright's Hardware. See our window display.

At the Graham Style Shop, Newbury branch—a pretty line of sport hats in felt and straw, all the newest shades, and white millan hats from \$3 up.

Annual monster lawn social at S. S. No. 12, Moss, tomorrow evening, by Ferguson Crossing Needle Club. Supper served from 7 to 9 o'clock, followed by an excellent program. Adults, 50c; children, 25c.

Hear Miss Agnes McPhail, Canadian first lady federal member of parliament, at Webster's lawn, on August 10th. Good program and booth. Harold Currie, Strathroy, chairman. Watch for further particulars.

The management of the Glencoe Rick Co., Ltd., are desirous of closing the business for the year, and would like all unpaid stock paid not later than June 20. The treasurer, M. J. McAlpine, has stock certificates. Please pay at his office.

Our display of millinery is bigger and better than ever. We have a large stock of trimmed hats, and ready-to-wears, and are prepared to give the best values and best styles to be had. See our interesting display of midsummer millinery.—The Keith Cash Store.

Come to the U. F. O. celebration at Strathroy July 1st and enjoy a \$4,000 program. There will be no speaker this year. It has been found to be a physical impossibility for any speaker to make himself heard, so great have the crowds become at this great annual event.

### MINISTERIAL ASSOCIATION

The Glencoe Ministerial Association met in St. John's church basement on Tuesday afternoon, the president, Rev. R. J. Garbutt, in the chair. There was a good attendance. The meeting opened with the singing of a hymn and prayer as usual. The Scripture subject was introduced by Rev. W. Leitch, and an excellent paper on Mormonism was read by Rev. D. Robertson, to whom, after discussion, a hearty vote of thanks was tendered. Very sincere regret was expressed re the departure of Rev. Mr. Garbutt, and it was unanimously resolved to send him a written expression of the association's loss owing to his absence. The next meeting of the association will be held on the first Monday in July.

T. J. Charlton, Secretary.

Dread of Asthma makes countless thousands miserable. Night after night the attacks return and even when brief respite is given the mind is still in torment from continual anticipation. Dr. J. D. Kellogg's Asthma Remedy changes all this. Relief comes, and at once, while future attacks are ward off, leaving the afflicted one in a state of peace and happiness he once believed he could never enjoy. Inexpensive and sold almost everywhere.

### PERSONAL AND SOCIAL

—Miss Margaret Kerr, of Windsor, spent the week-end at her home here.

—Miss Grace McLachlan was home from Tapperville over the week-end.

—Mother Earth had a big drink at the week-end, and has been smiling ever since.

—Miss Dobear, of Alvinston, was a guest of Miss Nellie Farrell over the week-end.

—Mrs. Mac McGeechie and children, of Ridgetown, are visiting Mr. and Mrs. S. Hart.

—Mrs. Sterling left on Tuesday to visit her daughter, Mrs. Hugh S. Gunn, at Winnipeg.

—Mrs. Brockiebank, of Windsor, spent a few days last week with Mr. and Mrs. Robert Eddie, sr.

—Frank House and Arthur Angood, of Mount Elgin, were visitors at the home of Joseph Grant on Sunday.

—Morley Farrell and Mr. and Mrs. Thos. King, of Chatham, spent Sunday with the former's parents, Mr. and Mrs. M. L. Farrell.

—Mrs. J. McIntyre, Miss Mary Jane McTaggart, Will McTaggart and Milton Holman motored to Bad Axe, Mich., and spent the week-end with Mrs. McIntyre's sister, Mrs. Neil Gray.

—Mr. and Mrs. Neil McFarlane, of Ekfrid, announced the engagement of their second daughter, Catharine, to Lorenzo Gardner, of Moss, the marriage to take place the latter part of June.

—Dan McArthur, editor on the agricultural page of the Toronto Globe, visited at the home of his father, Peter McArthur, in Ekfrid, on Sunday, while on a business trip to Windsor.

—Mr. and Mrs. Peter McArthur were in Toronto last week attending the annual picnic of the Globe staff, and Mrs. McArthur spent over the week-end at her former home at Niagara-on-the-Lake.

—Rev. D. G. and Mrs. Paton expect to leave about July 1st on an extended vacation to be spent in Scotland, England and the Continent. The Passion Play at Oberammergau, Bavaria, will be visited.

—Mr. and Mrs. T. E. Yates, of Hazenmore, formerly of Newbury, announce the engagement of their daughter, Ruby, to Robert T. McKeith, of Hazenmore, Sask., the marriage to take place the last of June.

—Rev. and Mrs. Geo. Weir and son Stewart, of Ridgetown, spent a couple of days with friends in Glencoe this week and attended the anniversary on Monday evening in the Presbyterian church, of which Mr. Weir was formerly minister.

### AUCTION SALES

Auction sale of household effects and miscellaneous articles, at the residence of George Highwood, Main street, north, Glencoe, on Wednesday, June 21, at 2 o'clock. The list comprises household furniture, piano and about 100 records, piano and stool, tables and chairs, beds, stoves, kitchen cupboards, couch, oil stove, heater, pig trough, lawn mower, large boiler, buggy, barrels, milk cans, and other articles.

### WOODGREEN

Jack Archer, of Shetland, spent a few days last week with Syd. Harold, John Lumley, who spent some time in Detroit, has returned home.

A meeting was held on Friday at Simpson's cemetery. Plans were made to improve it.

Mr. and Mrs. Thos. Simpson, son Lee and daughter Florence and H. Harvey spent Saturday in London.

Edwin Weekes has been on the sick-list.

Mr. Lawrence Harvey and children, of St. Thomas, spent a few days with Mr. and Mrs. Harry Harvey.

Mrs. T. Elliott and son Lyle spent a few days with Mr. and Mrs. T. Simpson.

Mr. and Mrs. W. Edwards and son Howard, of Strathroy, spent Sunday with Mr. and Mrs. Geo. Edwards.

It is reported that the strawberry crop is abundant this year. The recent rains have been of great benefit.

A number from here attended the anniversary services in Glencoe on Sunday.

If you feel half sick, tired and worn out all the time, it is nature's warning. Avoid a breakdown by taking Tarlac.—P. E. Lumley.

Arch. McPhee, one of the early residents of West Lorne, who left some forty years ago, is back on a trip, and is visiting at the home of W. Clark.

**For the Quick Service that brings repeat orders**

"Let me get him on Long Distance, and I'll soon settle this," says the shrewd business man, as an emergency arises.

His personality, with the persuasive tones that helped him build up his business in the old days, is still the greatest force at his command. It seldom fails to bring the needed results.

Long Distance permits him to retain that personal contact and influence with men in distant places on which his success was built. "If one of our travellers fails to secure an important order, he gets me on Long Distance before the interview is over, and I nearly always land it."

The power of Long Distance as a business-getter is only beginning to be appreciated. "Use the Bell to Sell", and see how economically it produces results.

Every Bell Telephone is a Long Distance Station

## THE BIG NEW STORE

will look after all your Spring needs in Dry Goods, Groceries, Shoes, Hats and Caps, Confectionery, Garden and Flower Seeds.

We have just received a large order of Spring and Summer Hats and Caps, stylish and up to date, at very low prices.

Special lines in Girls, and Children's School Hats. Get a pair of our men's guaranteed Work Shoes. Fresh Groceries and Fruit always on hand. Eggs and Butter taken at cash and trade prices. Store will close every Wednesday afternoon during the Summer.

## Making Hens "Feel at Home"

Egg yield is largely controlled by two important factors—environment and food—and each must be at its best. The hen might be termed a "fussy animal." She wants everything just right, and unless everything is entirely satisfactory, she simply refuses to get down to business.

In other words, she must be contented; she must have that "at home" feeling. She is not extravagant in her tastes; she does not demand gothic houses and elaborate fixtures, but she does want comfortable and clean quarters. Her house must not only be cheerful in the daytime, but it must be restful at night. There must be good ventilation, but no drafts.

To give good results, a poultry house must allow the sun's rays to penetrate it in the morning; it must give shade when needed; give the birds outdoor conditions without exposing them to rain, snow and windstorms. A house that will meet these requirements need not be elaborate. It may be a crude building.

There must be plenty of room, so that while indoor fowls may scratch among the litter without bumping up against each other. When the flock is overcrowded, only a few of the birds will take exercise; the others will stand about in small groups, or spend their time on the roosts. Overcrowded flocks, too, are likely to have "bullies" among them, and it takes only one or two birds of that disposition to upset the entire family. Get rid of such birds.

To shell out the eggs, hens must be tame, and not of a scary disposition. Tame hens "feel at home"; wild hens are discontented. Tame hens are laid up by the attendant is kind and gentle, it will not take the hens long to find it out, and then in turn, will gain confidence. Every movement made by the person in charge should be quiet and easy. The hens must be taught that they are safe in the presence of their keeper. We may laugh at the person talking to his hens, but those hens are the tamest and do the best laying.

A hen is more contented in clean quarters than in filthy ones. Even though they do not have a sense of smell, they appreciate clean and bright pens. It may be a little old-fashioned to whitewash the interior of the coops, but I still have strong faith in it. Whitewashed walls are not only attractive, but they kill disease germs. Whitewashing is labor well spent.

The size of the outside run is not so important as is the condition in which the run is kept. A small yard that is kept clean, in which the earth is turned under every now and then, and one which is partially shaded, is preferred to a large run that is sandy neglected. A well-littered scratching shed is better for exercise than an acre of range. When a hen is contented she is sure to be healthy. A contented, healthy hen is known by her quick movements and her bright appearance. She sings and cackles, and in many ways shows that "life is one long, sweet song."

Hens love peace. The presence of quarrelsome hens or a tyrant male soon develops discontent. Everything must be congenial. Environment must not be treated with indifference. There is a streak of human nature in a hen. She is not unlike the workman who does his work more easily when his surroundings are pleasant. Environ-

## Success With Guinea.

I keep a flock of about twelve or fifteen guineas of the Pearl variety. Each female will lay from fifty to 100 eggs between April or May and October. If she is not allowed a nest of eggs to sit upon when she commences to be broody. The eggs are just as good for eating and cooking as hens' eggs. In fact, some prefer their flavor, for when cooked they are of finer fibre than the hen egg. Guinea eggs are smaller, but the yolks are about as large as those of hens' eggs.

To find a satisfactory market I would suggest that you get in direct communication with the steward or chef of any well-known club or hotel in your nearest city. For if you can once establish a market, you will never have any worry as to the disposal of your flock.

If the Guinea have been raised by a chicken mother, they will follow her to the nests and begin to lay with the chickens; but when the grass is long enough to wave in the breezes, they will slip away to make nests in the fields and fence-cows. In the wild state they mate in pairs, but I have never experienced any trouble in mating three or four hens to one male. Both the males and females work on the hidden nests.

I have the best success in hatching the eggs with the ordinary hen, I use except in the extreme cold weather, and perch on trees or on roofs are ever ready to sound the alarm if anything disturbs them. Summing up, the Guinea is good for eggs during the summer months; good for market when weighing from one and one-half to three pounds, and retails anywhere from 60 cents to \$1.50 a pair, depending upon the market; good to look at around the farm home, and a good burglar alarm.

ment takes in considerable scope. It calls for proper location that there may be no exposure nor dampness. It means that a house must be well ventilated, so that moisture does not gather on the walls and ceiling. What a revelation the open-front scratching shed has been in this respect!

Egg production is also regulated by the quality and quantity of food, and the manner in which it is served. Food builds up the waste tissues, it produces heat to the body, fat and meat to the carcass, and it makes eggs. The usefulness of the hen is, to a large extent, at command of its keeper. When eggs are wanted, the quality of the ration must be such as will produce eggs. So it is with foods that grow fat. A hen that is busily engaged in laying is not so readily overfatted as the one that is not laying.

It is admitted that in order to become a good layer a hen must have some fat. She must not be thin in flesh. Two extremes should be avoided—too thin and too fat.

Some pullets accumulate considerable fat before they lay their first egg. This condition naturally delays laying; but, in my experience, it is better a little fat than too lean. I have noticed that those pullets which are slow starting are generally the most steady layers after they do begin and their eggs are of better size and shape.

For egg production the ration must be highly nitrogenous. Wheat is the leading nitrogenous food. While it is the most complete grain fed to poultry, it must never be given to the exclusion of other grains. A sole diet of wheat will quickly give the egg an odor similar to that of a decayed egg, and the flavor is not at all appetizing. This is especially noticeable upon opening a soft-boiled egg laid by a wheat-fed hen. Therefore, it is necessary to balance the nitrogenous foods with some carbonaceous material, such as corn. Corn alone is not a good egg food, though.

Egg farmers say that better results are obtained in feeding a moist mash rather than a dry one. The hen eats more of it, and it assimilates better. But mashes must never be given in a sloppy condition. There should be just enough water or milk added to make the mash crumbly. Green stuff and animal food are of great importance daily.

We measure the effect of food upon egg production by the manner in which it is digested. Unless the digestive organs are in good working condition, there will not be many eggs. Use good, hard, sharp grit.

This food-environment question leads on to other requisites. The blood of the hens must be kept in a pink state—must be purified. For this purpose, poultry science has found nothing better than linseed-meal and charcoal.

To summarize: we must feed nitrogenous food, balanced by carbonaceous material. We must give green stuff, or its substitute daily. We must supply animal food. We must keep oyster-shell, grit and charcoal constantly within reach. Fresh water daily, exercise, comfort and contentment—then we have the profitable laying hen.

We improve our stock and make it more profitable by giving careful attention, by making a happy and healthful home, by inspiring confidence. Tame hens tell the tale of proper attention, and scary hens voice the temperament of their keeper.

from the house screens; the wee Guinea can slip right through the ordinary poultry wire mesh, and wander away, usually never to return, for they retain the wild instinct of skulking along and hiding, and are almost impossible to locate when they have wandered away. After the first few days they become attached to the hen and will follow her on range and return safely to roost at night in their own coop. But keep them confined in the morning until the dew is off the grass.

After two or three weeks the young Guinea will find their own living on range and glean seeds and insects from the fields, or even from the gardens, for they will not scratch. At first, feed them just as you would chickens, beginning with boiled eggs, grit, sour milk and pin-head oatmeal, gradually changing to ground feed and cracked grains. There is one other critical time in their lives, and that is when they begin to change the feathers of brownish tint for the sober gray, with the white "pearls" of adult birds. Leave them on range, but in addition feed them some good mixed ration at this moulting period.

The Guinea is most disliked because of its shrill, strident cry, but this is a protection to the farm home. The Guinea is best to roost outside, except in the extreme cold weather, and perch on trees or on roofs are ever ready to sound the alarm if anything disturbs them. Summing up, the Guinea is good for eggs during the summer months; good for market when weighing from one and one-half to three pounds, and retails anywhere from 60 cents to \$1.50 a pair, depending upon the market; good to look at around the farm home, and a good burglar alarm.

## THE CHILDREN'S HOUR

### The Water Fairies.

It was spring. Down the river floated the large, white chunks of ice, glistening in the sun. Slowly under the warm spring sun, the ice was beginning to melt. Soon there would be none at all and the river would flow unhindered. But there was one particularly big piece of ice that was more stubborn than all the others. It seemed as if the sun's warm rays could not penetrate it. But gradually it too began to thaw.

Now this piece of ice was a very uncommon one and entirely different from its sister pieces floating down the river. On the outside, except for its unusual size, it looked just like the others. But the secret was on the inside. For there early in the winter had been imprisoned some lovely, little, green water fairies by a cruel, cruel witch. All through the long, cold winter, the fairies had lain in their prison waiting for the spring to come. For then, they thought, surely the old witch would relent and let them go once more to their beloved home at the bottom of the river.

Finally their icy prison did begin to melt, and the little, green water fairies were very happy. But it was not in the mind of the cruel witch to be lenient with them. She called them all together in her room in the ice and told them that before she gave them their freedom, they must perform a difficult task for her. Then indeed were the fairies dismayed. For what new torture had the old witch in store for them.

"You must select the one, whom you consider the wisest, to go forth over the land inhabited by human beings and there he must find that which does the most good to the human beings. If he is successful in bringing this, whatever it may be, back to me before the ice melts, then you shall all be free to go to your palace beneath the waters," said the witch. "But," and here she looked darkly at them, "if you fail, you shall all die."

The fairies shuddered and looked at each other disheartened. None of them had ever been on land and who would be brave enough to venture into the unknown region on the cruel witch's errand. They were silent. Then up piped the prettiest one of all the green water fairies. "I'll try," he said, and then without another word he was off, leaping from one icy chunk to another until he reached the land.

Far and wide did the little sea fairy travel, always seeking for something that did people the most good. He found many things, but always there was some drawback. Still the little, green water fairy was not discouraged. If only he could find the desired object before the ice melted, how happy he and all the other water fairies would be to escape from the old witch. He knew therefore that he must not give up.

So on he went. On the outskirts of a big city he came across an old man who had wandered all over the world and who was well versed in all the secrets of the earth. The little green water fairy in the course of his wanderings had heard about this old man and all his knowledge. Boldly the little fairy approached the big man and asked him what it was that did people the most good.

The wise man laughed and said, "Why, don't you know, it is very simple. It is an egg. Children eat eggs and grow up to be strong men and

women. Sick and weak people eat them and become well and healthy. Besides," he continued, "eggs taste so good. There is nothing to be said against them."

"Oh, thank you, kind sir," said the fairy excitedly, "and where can I get the wonderful egg?"

"Just across the road in that farm yard, from Mother Chicken," replied the wise old man.

Immediately the little fairy hurried across the road, took a white egg from the Mother Chicken, and then carefully treasuring it, he went at top speed back to the river.

If only the ice had not melted yet! Breathless he arrived at the river and eager scanned it. Ah, there was just a tiny piece of ice left. All the others had melted. On the tiny piece, he saw all the little fairies anxiously waiting for him. He did not take him long to get to the ice and there he laid the egg carefully in the old witch's lap. She was very angry at his success, but she knew that she must keep her promise to free the fairies.

Just then the ice gave its last creak and into the water and down to their own home dived all the little, green water fairies. They lived happily ever after and the happiest and most honored of all was he who had found the egg.

## Peace River Farming.

Canada has a valuable agricultural region in the Peace River district. Bulletin No. 6 of the Federal Department of Agriculture deals with experiments at the sub-station of the Dominion Experimental Farms located at Fort Vermilion, Alberta. The settlement at this place lies on the banks of the Peace River, 350 miles north of Edmonton, in fifty-eight degrees twenty-four north latitude, 116 degrees west longitude, and 950 feet above sea level.

Fort Vermilion has had the usual romantic career of settlements depicted in Sir William Butler's "Great Lone Land." First the trapper and fur trader, then the Indian mission, next the pioneer and agricultural development. The Hudson's Bay Company had done some tilling prior to the establishment of the Mission, which did not come about until 1880. Twenty-eight years later, or in 1908, the first Director of the Dominion Experimental Farms, Dr. William Saunders, entered into an arrangement with Robert Jones, an early settler, to carry on investigational work with cereals, fruits and vegetables. Five acres of land were first rented and then added to until now twenty-five acres are occupied and conducted by Mr. Jones, from whose annual reports the bulletin here referred to has been compiled. From these reports it would appear that potatoes, asparagus, beets, cabbage, cauliflower, carrots, celery, lettuce, parsley, onions, parsnips, spinach, turnips, and rhubarb can be termed certain crops, and crops that mature fairly early. The season is short but vigorous. Peas have done well every year since 1909, except in 1910, when an exceptionally heavy frost proved destructive. Beans do well in ordinary years; but corn, pumpkins, tomatoes, and citrons may be regarded as uncertain, although fodder corn can generally be relied upon. Cucumbers have to be hot-bedded first. Of fruits, strawberries, currants and raspberries have done well, but gooseberries, plums and apples have not thriven to any considerable extent. The hardier flowers flourish, and the garden at Fort Vermilion has attracted much attention.

Five varieties of wheat tested in six-year averages have yielded as follows per acre: Bishop, 58 bus. 40

## Parents as Educators

### Walks and Talks—By Elsie F. Kartack

We were in the garden one morning, shortly after my arrival, John, Mary, Bobby and I. Mother had gone away for a vacation.

The garden was beautiful, and we were quietly enjoying all its loveliness when suddenly Mary cried, "Oh, there's an ugly old toad, I'm afraid of it."

John and Bobby ran toward it in eager anticipation of destroying it. "I hate toads," said John with a vengeance. "I'll step on it," exclaimed Bobby at the same time.

I was just in time with my "Wait, Bobby. Why are you going to kill it?"

"Because I hate it," he answered. "And why do you hate it?"

"It's ugly."

"Oh, is it? I don't think so. Let's take a better look at it. Why, see, it has beautiful jewels on its back, and look here at its gold rimmed spectacles."

The children looked surprised. "Suppose we sit down and watch it while I tell you all about it," I continued.

"Don't do that, you'll get warts." This from John as I reached out to stroke the toad.

"No, you won't," I replied. "Not any of the books that I have ever read about toads say that you get warts from stroking them. The toad likes it and she sometimes sings a song, just as a cat purrs when it is stroked. Do you see the pouch under his mouth? That swells as he sings. He cries, too, when he is hurt. There are different kinds of toads. The tree toad becomes the color of the surface on which he finds himself so that people or animals cannot see him."

## Formation of Clubs

By Marion Dallas

Ruekin says, "Every day read a little in a good book—either a poem or a fine bit of prose—and think about it." There is much to be gained by solitary study of a book which cannot be gained in any other way. There are some people who plan out a course of study and always keep a book close at hand thereby never losing a moment of time. This plan is the result of an organized life in the ultimate analysis, the strongest type of character in many respects. There are others, however, who accomplish their best work under the stimulus of companionship. The communion of thought seems necessary to arouse the latent ability to think swiftly and clearly and conserve the results to advantage.

Canadian women are only beginning to realize the great advantage of cooperation along the various avenues of service open to them. The business world has taught men the wisdom of standing together in the noblest and best meaning of that term. Canadians must realize that to mould and maintain one great National Idealism we must combine all our energies, must make common capital of all industrial knowledge, experience and talent.

The Possibilities of the Rural Club. There are little communities dotted here and there all over our vast Dominion which are dull and uninteresting because they are a mere aggregation of individuals and not a community as such. A real community "is a number of people so united in spirit and so interested in the advancement of their town that they are willing to drop their little differences and unite to form one great brotherhood."

If your town is dull it is because there is no organized effort to overcome that dullness. If the people who go about bemoaning the barrenness of life in the rural districts would just meet together and in a sane, red-blooded way face the proposition, they would discover avenues of development of which they never dreamed. Wherever there are three or four families in a group there is almost invariably talents which will make for the welfare of all concerned. No community appreciates its resources until it places the social emphasis on its community life. Unsuspected talents are displayed when team work is adopted. Men and women who have never been tested are drawn out by the inspiration of doing something in common with others. In the modest young girl is found a singer; the care-worn mother suddenly develops a talent for writing; some of the so called commonplace people disclose a wit which astonishes their neighbors. The great majority of people need only a little sympathy and a sense of responsibility to respond to some unsuspected power.

Making a Club Practical. The success of a club is measured, not by the scope of its program, but by the interest it awakens and the number of people it sets to work. If a club is to be formed, someone must take the initiative and invite from six to eight of the people who have impressed her as being interested in practical issues of an intellectual and social order. These should confer along the broad lines of organization. It would be well to discuss the line of work the club should take up, the style of the meetings, the days of meeting and the frequency of them. A small committee should be appointed to draw up a tentative program and prepare a list of names to be canvassed. A wide-awake committee

working under keen aggressive leadership will soon make an impression. Those who can sing or read or entertain along any line will be sought out and a place on the program found for each. Such a study as the "Colonization of Canada During the French Regime" will make possible a program as to include any and all who will take part. The old French boat songs and legends are almost unique and always entertaining and educative in spirit and character.

Divide the Program. Another important item in a successful club is the preparation of three or four papers for each meeting. The writing of a paper tends to give a clearness and precision to thoughts and transparency to the expression of them. For the encouragement of those who are timid about contributing papers, I would like to quote a paragraph from an address which Viscount Middleton gave to the Woman's Canadian Club in Montreal some time ago. "I dare say most people are too timid to think anything they can write worthy to be put before an audience. I would say do not be afraid of what you have written. The great Greek Lysias once wrote a defence for a client. The client said he was delighted when he read it the first time. I liked it less the second time, and after a third reading do not consider it a defence at all. Console yourself, said Lydia, the judges have only to hear the defence once. That conviction," continued Viscount Middleton, "has taught me to face many an audience with what seemed to me a subject of insufficient interest."

In every club the simpler the organization the less work involved and the greater the chance for success. Discussion and the presentation of opposite ideas has its value in every club, but if care is not taken, contradiction will prove very injurious to any organization. It was a clubman who said, "Well, wife, this is club night and I must go and contradict a bit."

Club Programs. There are many and various classes of clubs. Clubs for the study of individual writers, clubs for the study of history. Canadian history contains an unsuspected wealth of association, sufficient to cover several winters' programs. Musical clubs have a great fund from which to arrange interesting programs. Sometimes a few people are especially interested in some individual writer, Carlyle for instance. If Carlyle be chosen, the club should secure an inexpensive set of his works. Programs could be arranged as follows:—First heading, BIOGRAPHY. 1. "Biography." References may be found in the "Life of Carlyle," by R. Garnett. 2. "Carlyle, Personally," by D. Masson. 3. "Reminiscences," by J. Froude. 4. "Thomas Carlyle," by J. Froude. Second heading, CRITICISM. 1. "My Study Windows," by J. R. Lowell. 2. "Hours in a Library," by Leslie Stephens. 3. "Modern Humanists," by J. M. Robertson. 4. "History of English Literature," by Taine.

From these books will be gathered a good deal of information regarding the man and his writings. The following suggestions as to titles of papers may be of help: "Carlyle as a Representative of Scotch Peasant Character," "Carlyle's Gospel of Work," "Carlyle's Literary Power."

## THE BENEFICENT GRASS

"Next in importance to the divine profusion of water, light and air, those three physical factors which render existence possible may be reckoned the universal beneficence of grass. It bears no blazonry of bloom to charm the senses with fragrance or splendor, but its homely hue is more enchanting than the lily or the rose. It yields no fruit in earth or air, yet should its harvests fail for a single year, famine would depopulate the world."

The above lines are taken from John James Ingall's beautiful ode to grass. Grass is such a common thing in this rich, well watered land of ours that we take it for granted, not giving it credit for many good things or stopping to think just how much we are dependent upon it. We turn it with the plow and till the soil until not one green spear shows. We continue cultivation until the humus is depleted and the soil becomes lifeless, and the rains wash the top soil away and gully the hillsides. Grass hides its time to return and restore the destruction we have wrought. The grass fields do not wash, they become richer rather than poorer with the lapse of time. They attach us to the land. Our affections are not deeply set on a plowed field or a corn crib. It is the pasture with its inhabitants, the frolicking lambs, the pigs in clover, the sturdy colts, with their big gentle mothers, and the rugged bright-eyed calves, that touch the heart and make us happy to be a part of the great wide country.

In the past we have not esteemed pastures as we should. They feed mankind. Each evening sees the cows come home from their work of transforming nature's carpet of green into the richest of food for man—foaming milk, rich cream and yellow butter—the most perfect food for all the young. Their flesh is grass. The steers graze the rich pastures till they are filled, then they lie down in a herd on the hillside contentedly chewing their cuds for an hour or two and making grass into juicy steaks, the food that has enabled those who ate thereof to dominate the world.

The races of men who wear wool have always been the leaders of civilization. Wherever the golden hoof has trod there has come prosperity. The white fleeced sheep eagerly nip the tender grass and are the medium through which pastures clothe mankind.

There is something that comes from living amid broad pastures and caring for good live stock that makes great souls in men; that gives them faith; that makes them sane, patient, enduring, clear thinking; that imbues them with a deep love for their land and for their country.

## Cheese in the Diet.

It is a remarkable fact that although Canadian cheese is equal to the finest of its class in the world, cheese is not as generally used on the table in Canada as in many other countries. In England, for example, a large percentage of the homes use cheese almost daily. To some people cheese is believed to be indigestible, but as pointed out in Pamphlet No. 7 of the Department of Agriculture at Ottawa, its digestibility is improved when combined with other foods. When eaten with bread or other starchy food such as potatoes, or macaroni, it forms one of the most satisfactory food combinations, and one which will not be difficult of digestion for most people. It is when eaten at the end of a heavy meal that it is liable to overtax the digestive organs. Cheese is a very concentrated diet, nearly all of it being used by the body to build up new tissues and to provide energy for the body to do its work. For sturdy boys and girls and normal adults, it is one of the best muscle builders and one which is entitled to a large place in the diet.

While cheese may be served without any further preparation, it can be used in cooking in many different ways. It should be borne in mind, however, that cheese will be harder to digest if cooked at a high temperature. The pamphlet to which reference is made contains many cheese recipes. These include sauces, soups, Welsh rarebit, pudding, soufflé, croquettes, omelette, biscuits, salad, and many other enticing dishes. The recipe for cheese biscuits taken from this pamphlet is: Two cups flour, 4 teaspoons baking powder, 2 table-spoons lard or butter, ¼ teaspoon salt, ½ cup milk (about), grated cheese. Sift the flour, baking powder and salt together and rub in the fat evenly. Add the grated cheese and enough milk to make a soft dough. Roll, cut in shapes, and bake in a hot oven. The dough should be handled as quickly as possible and mixed only enough to blend the ingredients.

Inhalation of impure air breaks down the resisting power against disease.

A dripping June brings all things in tune. Calm weather in June sets corn in tune.—Old June Proverbs.

Good nature is the cheapest commodity in the world and the only thing that will pay ten per cent. to the borrower and lender alike.—Ingwersoll.

Many farmers believe that older hogs are immune to round pig worms, but the pigs are most susceptible. These worms have been found working havoc in both. The worms delay or stop growth because they cause a loss of appetite. That brings on general unthriftiness. In six inches of the small intestine of one pig, sixty-three worms were counted. The pig, before being killed, had been losing weight daily.

To prevent round worms keep the pigs coming. Keep them in clean, dry lots where rubbish and cobs are burned regularly. Drain the pastures and lots. Don't throw corn into mud. If there is an outbreak of round worms use santonin and calomel, equal parts, five to ten grains each for a 100-pound pig; seven and a half to fifteen grains for the 200 to 300-pounder.

Allow free access to such conditions as air-slaked lime, charcoal, powdered sulphur, or common salt.

Mineral matter in hog rations reduces the cost of producing pork and adds to the daily gain in every case.

He who waits until June to fight vermin has his hands full. There must be continual warfare.

A man who wears his pants well polished behind, is pretty likely to have lots of rust on the parts of his wheelbarrow.

Samantha says: Some women who are mighty particular about who their children play with will buy all the latest slang, smut, and profanity for their pianos and graphophones.

lbs.; Huron, 56 bus. 30 lbs.; Red Fife, 55 bus. 25 lbs.; Marquis, 52 bus. 35 lbs.; and Prelude 41 bus. 50 lbs. Oats in the same average have yielded: Banner, 88 bus. 33 lbs.; Daubeny, 66 bus. 31 lbs.; and Eighty Day, 62 bus. 2 lbs. Barley similarly tested has produced: Manchurian, 60 bus. 40 lbs.; Champion, 55 bus. 15 lbs.; Success, 53 bus. 36 lbs.; and Hullless White, 51 bus. 42 lbs. Various sorts of field crops have been experimented with successfully. Sunflowers for ensilage have proved promising, and surprisingly large crops of green fodder have been obtained from corn. Of clovers and grasses, Grimm and Ontario Variegated varieties of alfalfa, and red clover, have proved promising; Alsike clover has not been sufficiently tested; timothy, Western Eye grass, Awlless Brome and Meadow Fescue, tested for hay value, have wintered well, but Orchard and Red Top grasses have proved disappointing.

Weather records for twelve years are given in the bulletin which show the average sunshine per day for nine months last year, that is from April to December, inclusive, was six hours.

Setting those slugs: A reader reports that sprinkling lime around plants failed to dispel garden slugs. Perhaps the lime was not renewed frequently. A circle of soot or lime about plants requires frequent renewal, because slugs exude a slimy fluid over which they can crawl with impunity. If the soil in beds and frames is saturated with a solution of ammonia several days before planting, it will drive slugs from hiding and turn them a whitish color so that they may easily be seen and picked off the bed.

To check cabbage worms, spray or sprinkle the plants with buttermilk.

## JOURNEY TO MOON BY RADIUM ENERGY

FRENCH SCIENTIST SAYS  
IT'S COMING.

Problem is to Control Speed of  
4,000 Feet a Second and  
Assure Respiration.

How near is modern science to a realization of the fantastic dreams of H. G. Wells and Jules Verne on the exploration of interplanetary space? Robert Esnault-Pelterie, whose "Considerations on the Results of Indefinite Speed of Motors" was published in 1913, after saying that voyages between the stars at present are impossible to man, adds significantly: "Only one discovery is necessary, namely, some physicist must master the nature of the energy given off by radium. Then it will not be five years before exploration of the moon, Venus and Mars is possible."

M. Esnault-Pelterie begins by saying that he deals only in planetary vehicles inhabited by living beings. The energy concealed in radium, if properly controlled, supplies all the power required for a voyage to the moon. Every known factor of the problem is being studied by M. Esnault-Pelterie, who says:

"If a projectile leaves the earth, going at least 4,000 feet a second, the projectile would never return, for while its speed diminishes under the earth's attraction, it would soon pass out of that influence. Save for the energy revealed by radium we possess no possibility for generating such speed. Radium offers a power of 5,760 times that of the aggregate force developed by all our high explosives."

**Physiological Difficulties.**  
"Granting that such speed may be controlled, next is the problem of keeping alive in interplanetary space. Aeronautics have taught us much in the last decade. Once out of the earth's attraction it is easy, of course, to keep a machine going anywhere—to the moon or to Venus—because there is no resistance."

"Here appear physiological difficulties, however, for experience shows that when propulsion ceases human beings, even when supplied with oxygen, have the sensation of being in a void, which interferes with respiration, and, if prolonged, probably would affect the heart. It is necessary, therefore, in order to provide artificial acceleration, to give human beings the sensation of a normal relation of their weight to the earth."

M. Esnault-Pelterie points out that, granted the energy required is obtainable from radium and the solving of physiological difficulties, a voyage to the moon, as regards time, would not be difficult.

### To My Mother.

As a pure stream, whose silver-bright  
cascades  
Quicken her thirsty drink, your way  
you went,  
One tireless purpose and one sole content:  
To find the folk unloved, and cheer and  
bless  
Such as had only heard of human hap-  
piness.

Not all the deepening shades of your  
own woe  
Could blind your vision to another's pain,  
Your tender quest and sure response  
restrain,  
Or bate the toll that you would under-  
go  
Compassion swift to bring and gentle  
ruth bestow.

Now stilled the generous heart that  
never beat  
For self in all your length of fruitful  
years;  
And shut the eyes that shed not many  
tears  
For your own sorrows; stopped the  
ready feet  
That on a thousand roads your mercy  
made so fleet.

I was your first-born son and me you  
bore  
To share through half a century of  
time  
Your gracious days, to see your hope  
sublime,  
Rejoicing that a widowed love of yore  
Had fashioned me a part of you for  
evermore.

Mother, you win the song of human  
praise  
For righteous souls who wrought and  
now are gone,  
Unto Faith's Household add a precious  
one,  
And, in the after-glow of your good  
days,  
Lift up some patient hearts still beat-  
ing on their ways.  
—Eden Phillpotts.

### Not Far Wrong!

A little London boy was visiting  
Scotland for the first time. One after-  
noon he suddenly left the hotel win-  
dow in great excitement as a high-  
lander came down the road, playing  
the bagpipes.  
"Mother, mother!" cried the little  
boy. "Come quick! There's a man  
outside, with a dead pig that stings."

Blanket tossing is a favorite sport  
among many of the Eskimos.

## ELECTRICIAN SAYS HE ALMOST FELL

BECAME SO WEAK AND  
DIZZY HE COULD  
HARDLY WORK.

Now Well and Strong, He  
Says Tanlac Will Help  
Anybody.

"Tanlac rid me of about as bad a case of stomach trouble as a man ever had," said J. A. Deslauriers, 119 Beaudry St., Montreal. "My appetite was so poor I had to force down the little I did manage to eat but I had terrible cramping pains, gas formed and pressed against my heart until it palpitated terribly. I felt weak and worn out all the time and became so dizzy that many times I could hardly stay on my feet. It seemed like I was going down to nothing in spite of everything I could do."

"My first bottle of Tanlac convinced me it was the very thing I needed and six bottles have me feeling like a new man. I have a big appetite, eat what-  
ever I want, and am entirely free from indigestion. I believe Tanlac will help everybody who tries it."

Tanlac is sold by all good druggists.

Minard's Liniment: Relieves Neuralgia

## Surnames and Their Origin

**GOODLIFE**  
Variation—Goodlife.  
Racial Origin—English.  
Source—A given name.

In view of the freedom with which nicknames were used in the Middle Ages as surnames, in the period before family names, as we know them to-day, had become a general custom, one might be pardoned for assuming that this family name was at first a surname bestowed upon some individual or individuals as a result of the kind of lives they led.

The theory, however, does not hold good in the light of more careful investigation. This is not to say that the family name could not or did not originate in this manner in certain instances. It means only that there is another source, and one which, from all the evidence available, appears to account for the name in the greater number of instances.

"Guthlaf" was a given name among the Anglo-Saxons, and by no means an uncommon one. Remember that the Anglo-Saxons did not give the "th" sound that we do to-day, though they had begun to approximate it. Remember, too, that the "u" with them had the sound of our modern "oo," and that in this name the accent on the first syllable, which would tend to make the pronunciation of the "u" indistinct. The change to Goodlife, therefore, is not so great as it might seem upon first consideration.

The spelling Goodlife, of course, is due to the similarity of the more authentic spelling to the combination "good-life."

### Watching it Work.

A wonderful invention called the oscilloscope has set everyone talking about its peculiar possibilities.

It is a new appliance which has the illusory effect of slowing down the apparent speed of a swift engine to a mere crawl.

The device operates a certain kind of electric lamp which, when shone on, say, the swiftly operating needle of a sewing machine, makes it appear as if that particular part of the machine is dawdling at a snail's pace.

By its use the actual working of high speed pistons and other engineering parts can be observed, and this, of course, is a great advantage to engineers.

The light of this strange lamp is not continuous although it appears so to the human eye. Actually, it sends out a constant series of flashes of one millionth of a second duration.

By adjustment, the flashes light up the movement of the machine at certain fixed intervals, and thus one hundred revolutions per second appear as only a single revolution per second.

In fact, the human eye is deceived by an optical illusion, receiving a number of impressions as only one impression.

The earliest example of needlework known to exist dates back 3,500 years. The oldest operated mine in the world is in Sweden. It was working in A.D. 1225.

"The blackest lie ever hatched is to say, 'once a thief always a thief.' Respectable people who draw away from the unfortunate and declare there is no hope for them are doing much to make professional criminals. Once a person starts in the wrong direction there are plenty to help keep him going. The worst thing about it is the feeling of hopelessness that seizes so many first offenders; in place of bracing up for a new start, they yield to the forces that are dragging them under, and keep on going from bad to worse."

## A GOOD MEDICINE FOR THE BABY

Nothing can equal Baby's Own Tablets as a medicine for little ones. They are a laxative, mild but thorough in action, and never fail to relieve constipation, colic, colds and simple fevers. Once a mother has used them she will use nothing else. Concerning them Mrs. Saluste Pelletier, St. Damas des Aulaines, Que., writes:—"I always keep a box of Baby's Own Tablets in the house. They are the best medicine I know of for little ones and I would not be without them." The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### A Little Knowledge.

Two Japanese words, very similar in sound and spelling, have very different meanings. One means "ridiculous," and the other "splendid."

A visitor to Tokyo was proud of his linguistic attainments, but he did not fully appreciate the importance of the difference between the two words. He mixed them up most fatally, as the following instance will tell.

One day he had occasion to go to felicitate a Japanese colleague of his on the arrival of a new baby. The European visitor spoke in fluent Japanese something to this effect:

"I hear, sir, your wife has a new son. How ridiculous!"

**Succeeded in Producing Unbreakable Glass.**

According to recent reports, a Bohemian inventor, after 13 years of research, has succeeded in producing unbreakable glass. At a recent demonstration, it is said, plates and vessels of the material remained whole when thrown to the ground from a height of 12 feet. Meat was roasted on a thin glass plate over an open fire at a temperature of 750 degrees F. Tin was melted in a glass pot, and nails were driven in a piece of hardwood, using a piece of glass for a hammer.

Only 2 per cent. of the population of Kingston, Jamaica, are white.

## LINGERING WEAKNESS FOLLOWING DISEASE

Due to the Fact That the Blood  
Has Become Thin and Watery.

In almost every case the victims of the grippe, influenza, fevers and contagious troubles, are left weak, ailing and despondent after the disease itself has disappeared. They do not pick up strength as they ought, and remain tired, listless and discouraged. The only reason for this is that the blood has been impoverished by the ravage of the disease through which the victim has passed. Strength and full activity will not return until the blood has been restored to its normal condition. The blood can be enriched and purified quickly and surely by Dr. Williams' Pink Pills. To enrich the blood and strengthen the nerves is the whole mission of these pills, and thousands have found them beneficial after disease has left them weak and run down. Among those who have proved the value of these pills in cases of this kind is Mr. Charles A. Turner, light-keeper, Thrum Cap Light station, N.S., who says:—"In Jan., 1917, I took a severe cold which I neglected until it developed into pneumonia, which confined me to bed for some weeks. When I was able to get up and sit around the house, I found that I was not regaining my usual strength; in fact I seemed to be growing weaker and was reduced almost to a skeleton. I took an emulsion, but it did not help me. Then one day a friend who came to see me said, 'Here's some Dr. Williams' Pink Pills; just the thing to put you on your feet again.' I took them and then got six boxes more and soon could feel they were helping me. By the time the last box was empty I was doing my work again and feeling fine, and I had gained in weight. My health has since continued good, and I give the credit to Dr. Williams' Pink Pills."

You can get these pills through any medicine dealer or by mail at 50c a box, or six boxes for \$2.50, from The Dr. Williams' Medicine Co., Brockville, Ont.

**When the Kettle Sings.**  
The same thing that enables us all to sing makes the kettle sing—vibration.

Water exists in three states—solid, liquid, and gas. Solid is ice—liquid we all know. Water vapor is always being formed, but it forms most readily when the water is at a temperature of 212 deg. Fahrenheit—in other words, when it is boiling. In a kettle of boiling water, water vapor is being formed so quickly that it has to force its way out, and it "ebullishes its way" so unceremoniously that it makes the sides and top of the kettle vibrate. The air vibrates in sympathy, and the air waves pass to your ears. Then you say the kettle is singing.

**MONEY ORDERS.**  
When ordering goods by mail send a Dominion Express Money Order.

**Rose Lore.**  
It is probable that a greater amount of love has attached itself to the rose, England's national floral emblem, than to any other flower.

The Syrians take the rose as their emblem of immortality, and in China it is planted over graves—a custom which is also favored to some extent in this country.

Persians believe that on a certain charmed day—a secret which few have ever discovered—the rose has a heart of gold.

If in a garden a white rose blooms in late autumn, the belief is widespread that some member of the household will shortly die—a maid in her teens, for choice.

To get good luck in any undertaking, which concerns itself with love, rose leaves should be thrown on the fire, and a wish murmured as they curl and die.

In Germany the custom still prevails of girls carrying a rosebud in the breast to ensure the fidelity of their lovers, and in most European countries rose leaves are used to discover which, out of many lovers, is the true one.

Finally, there is the queer belief that a red rose will not bloom over a grave until the person who planted it is dead.

**Belgian Prince Visits Japan.**  
The British battle cruiser Renown, which brought the Prince of Wales to Japan, brought also a Prince of another royal family of Europe. But she had almost arrived off the Yokohama breakwater before the presence on board of Prince Charles, second son of King Albert of the Belgians, was known generally in Tokio. Prince Charles, who is eighteen years old, is a midshipman in the British Navy assigned now to service on the Renown.

He is "Charlie" to his messmates on the British cruiser, and as "Charlie" he did Tokio with his bluejacket pals. The only recognition his visit to Japanese shores elicited was his presentation to the Empress and an informal reception at the Belgian Embassy for members of the Belgo-Japanese Society.

At the present rate of increase, Japan will have a population of 65,215,000 persons in 1928.

**WARNING!** Say "Bayer" when you buy Aspirin. Unless you see the name "Bayer" on tablets, you are not getting Aspirin at all. Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 23 years and proved safe by millions for

Colds  
Toothache  
Earache  
Headache  
Neuralgia  
Lumbago  
Rheumatism  
Neuritis  
Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade name registered to C. Bayer, manufacturer of Bayer Tablets of Aspirin. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the Bayer Cross.

## The Road to Mandalay.

It is a green and leafy road, pleasantly restful to the eye after the yellow scorchiness of most of northern India. There is yellow here, too, for of the 385 miles of the way—the way up from Rangoon by the one-meter gauge line of the Burma railways—the greater part runs through one vast rice field, a wilderness of paddy, and the rice has just been cut and is being threshed.

The agricultural laborer and the menfolk of the very poor may be dressed only in single strip of cotton cloth of dirty white, being maked down to the waist; but the costume of the great mass of the people of both sexes—the white jacketlike garment above and bright colored petticoat skirt below—is eminently picturesque and graceful. It is astonishing also how far down one goes in the social scale before reaching the point where, at least on holidays, the skirt is not of silk, and it is this almost universal use of silk in every imaginable shade of the loveliest blues and greens, pinks and apricot and maize, that gives the Burmese crowd its distinctive appearance. The gay, small turbans of the men and the coiled black hair of the women, always with a bright spray of flowers, and often richly jeweled, are both becoming and attractive headresses.

The Burmese—especially the women—seem never to talk together except with constant ripples of laughter, and the children are a joy. Like the high born Manchu girl among the Chinese, the well bred Burmese girl is of the most delicate porcelain, almost too dainty and frail to handle, and some of the small maidens who have been put forward to present bouquet to the Prince have been the loveliest little dreams dolls imaginable. It is a good road, this road-to-Mandalay.—London Times.

**Spherical Electric Fan Throws Air Radially.**  
Unlike the ordinary electric fan, a fan, spherical in form, recently patented, is so designed that it throws the air radially from it in every direction. This is made possible by a construction of the fan blades so that the air is drawn in from above and below the fan, and then thrown out again in a radial stream of the width of the blades.

**Preserves Fruit.**  
The invention is claimed in Australia of a chemical solution for treating some fruits to enable them to be stored for long periods without refrigeration.

**Africa has 30,000 miles of railway.**  
A friendship that makes the least noise is often the most useful, for which reason I prefer a prudent friend to a zealous one.—Addison.

**Nothing to Equal**  
**MINARD'S**  
"KING OF PAIN"  
**LINIMENT**

For Sprains and Bruises.  
The first thing to do when you have an injury is to apply Minard's famous Liniment. It is antiseptic, soothing, healing, and gives quick relief.

**WOMAN TOO WEAK TO WALK**  
Now Works Nine Hours a Day.—  
Lydia E. Pinkham's Vegetable Compound Restored Her Strength

Union Village, Vt.—"I was weak and nervous and all run-down. I could not walk across the floor without resting and I had been that way for weeks. I saw your advertisement in the paper and after taking one bottle of Lydia E. Pinkham's Vegetable Compound I felt the good it was doing me and I took seven more in all. Before I finished nine hours a day in a steam laundry. I cannot say too much in favor of your medicine. I trust all sick and suffering women will take it. It has been two years since I took it and I am strong and well."  
—Mrs. L. A. GUDMANN, Union Village, Vermont.

This is only one of such letters we are continually publishing showing what Lydia E. Pinkham has done for women, and whether you work or not. Mrs. Gudmann's letter should interest you. Many women get into a weak, nervous run down condition because of ailments they often have. Such women should take Lydia E. Pinkham's Vegetable Compound at the first sign of trouble. Good health is necessary and this splendid medicine will help you to keep it.

**PIMPLES ON FACE AND SHOULDERS**  
For Several Months, Festered and Itched. Cuticura Healed.

"I was affected with pimples on my face and shoulders for several months. They festered and itched and my forehead was disfigured. I tried different remedies which did no good. I sent for a free sample of Cuticura Soap and Ointment which seemed to help me. I bought more and after using two cakes of Cuticura Soap and one box of Cuticura Ointment I was completely healed."  
(Signed) C. V. RANDALL, Granada, Colorado, Feb. 11, 1921.

Clear the pores of impurities by daily use of Cuticura Soap and occasional touches of Cuticura Ointment as needed to soften, soothe and heal. They are ideal for the toilet as is also Cuticura Talcum for powdering and perfuming the skin.

Sample Each Free by Mail. Address: "Lemon-Lime," 246 St. Paul St., W. Montreal. "Sold every-where." Soap, 25c. Ointment, 10c. Talcum, 25c. Cuticura Soap shaves without soap.

### NEWBURY

Miss Alena Telfer, of Port Huron, is visiting at her home here.  
Miss Ida Gibb returned to Detroit on Monday after spending a week with her mother, Mrs. Harris, and Miss A. L. Tucker.  
A Graydon Batener has returned to Cincinnati after visiting his parents and aunt.  
Reeve Holman attended county council in London last week.  
Mr. and Mrs. Macaulay, of Mount Brydges, spent the week-end at Dr. Gordon's.  
N. D. Campbell and wife and W. P. Campbell and wife and family attended the Campbell clan picnic at Poplar Hill on Thursday.  
Mrs. J. Cousins and baby Bobbie, of Harrow, are visiting at R. J. Hagith's.  
Rev. C. D. Farquharson preached in London on Sunday. His work here was taken by Rev. Mr. Stewart, of London.  
Frank Robinson had seven head of cattle killed by lightning during the storm on Saturday forenoon. The cattle were together under an ash which was struck.

Mrs. Jane Armstrong and son, Thomas E., motored over from Strathroy on Friday, calling on friends here.  
Mrs. Kettle returned home to Watford on Monday after visiting her sister, Mrs. P. T. Galbraith.  
Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

### MIDDLEMISS

Duncan Love, of Detroit, paid a short visit to friends here last week.  
Mrs. Geo. Graham, who has been on the sick-list, is able to be out again.  
John and C. H. Lucas motored to Port Huron Sunday.  
The L. O. L. held their regular meeting in the hall on Wednesday.  
Frank Cady has leased his house to Art. McArthur and has gone to Chatham to work.  
Dr. and Mrs. Henry Graham, of Mishawaukee, Ind., are spending a week with friends here.  
John Bowles was in St. Thomas Saturday on business.  
The recent rains have been a great benefit in this district.  
George Lucas and wife, of Toronto, are holidaying under the parental roof here for the summer months.  
Graham McDonald had a close call of a broken nose when a board hurled by a citizen accidentally struck him in the face, leaving a black eye and a bad-looking nose.  
Miss Elmer Corb has handed in

her resignation to the trustees of S. S. No. 11 here.  
Iona played Middlemiss a friendly game of ball here Friday. Result—Iona 3, Middlemiss 5. Guess our boys play ball. Come again, Iona.

### NORTH EKFRID

Mr. and Mrs. Lemon, of Chatham, spent Sunday with Mr. and Mrs. Will Down, Jr.  
Mr. and Mrs. Thomas Ramey, accompanied by Mrs. Uri Pierce, motored to Sarnia Saturday.  
Mr. and Mrs. Fred Perry and family, of Windsor, were the guests of the former's parents, Mr. and Mrs. Thomas Howe, Appin.  
Clarence Sifton is improving nicely in health.  
Mr. and Mrs. Willard Kettlewell, of Windsor, spent the week-end with Mr. and Mrs. Henry Rossmelle, jr.  
Mrs. George Laughton, of London, is calling on friends here.  
Mr. and Mrs. Ernest Irwin, of Ridgetown, are calling on relatives in this vicinity.  
The men are busy repairing the roads. The fifth concession will soon be a boulevard.  
There were a large number at the anniversary services on Sunday.  
One of Mrs. John Davis's twins is ill.  
David Down has purchased a new tractor.  
Mr. and Mrs. Allen Perry motored from Windsor and spent the week-end with Mr. and Mrs. Geo. Chisholm.  
Robert Pierce has been quite ill.  
Mrs. Joseph Klemm is visiting in Detroit.  
Mr. and Mrs. Elgie, of Chatham, called on Mr. and Mrs. Wm. Down one day last week.

**ADARWORTH EKFRID**  
Mr. and Mrs. Chas. Telfer and sons John and Keith and Mr. and Mrs. Calvert Reycraft were guests of Mr. and Mrs. Geo. Chisholm on Sunday to attend the North Ekfrid anniversary.  
**DAVISVILLE**  
The many friends of Mrs. George Turner were sorry to hear of her death which occurred at her home in Mossa on June 5th. Sympathy is extended to the bereaved husband and family.  
Mrs. Wm. McLean spent the week-end with Jarvisville friends.  
Frank Robinson had a big loss on Saturday last when he had seven of his cattle killed by lightning.  
Paul Shumaker, of Cobourg, is spending his vacation with Davisville friends.  
Mr. and Mrs. Fred Jeffery, of Shetland, spent Sunday at Davisville.

If one be troubled with corns, he will find in Holloway's Corn Remover an application that will entirely relieve suffering.

### MELBOURNE

While the school children were playing Wednesday morning, Margaret Dewar fell from the wood pile, dislocating and breaking her right arm. She was carried home and taken into London to the hospital.  
Mr. and Mrs. Alex. Williamson and John Preece left Wednesday morning to attend the funeral of the latter's daughter-in-law, Mrs. Duncan Preece, Detroit.  
Men are busy on the school grounds, hauling old cement from the foundation, scraping, etc., getting ready to begin building at once.  
Mr. McEachren, of Alvinston, has the contract for the new school building, and Mr. Murray, of London, is the architect.  
Dr. Brown, of the Methodist church, has returned home after attending Conference in London. Mrs. Brown has been visiting her sister in Sarnia.  
Mrs. Gilbert McLean has been appointed to attend the Rebekah assembly in Owen Sound.

### WARDSVILLE

Mrs. McLean and daughter, Miss McLean, have returned to Wardsville from New York, where they spent the winter.  
Mr. and Mrs. Will Aitchison, of London, spent the week-end here.  
Mr. and Mrs. Alex. Stewart and daughter Ruby and Mr. and Mrs. Will Telfer and son Stuart spent Sunday with Mr. and Mrs. Thomas Weir.  
Miss Farrington is in Glencoe this week, where she has charge of the examinations.  
A number from here attended the Cashmere and Ekfrid socials on Friday evening.  
Miss Mildred Grim and Miss Dorothy McFattie, of Bothwell, spent the week-end with Miss Marion Reid.  
Mr. and Mrs. Parnall and Mrs. Farquharson spent Friday in London.  
Mr. Yorke, of Glencoe, has charge of the examinations here this week.  
The W. M. S. of the Methodist church held a meeting last week. A large number were present and Mrs. (Dr.) Husser gave a very interesting report of the convention held in Windsor.  
Mrs. (Rev.) Murphy has returned home from an extended visit in Toronto.  
A large number attended the show given in the hall here on Monday evening by the "Eight Black Dots."

### KNAPDALE

The boys around Knapdale are busy playing football.  
Mr. and Mrs. Alexander Stewart and little daughter Ruby spent Sunday with Mr. and Mrs. Thomas Weir, of Wardsville.  
Born—to Mr. and Mrs. K. Nickle, of London, a son.  
The U. F. O. held a social evening on Friday at S. S. No. 7. An enjoyable time was had by all.  
We are glad to hear that Mrs. McDonald is somewhat improved.  
Willie Brown is home again owing to the misfortune of having his hand hurt.  
A large number from here attended the funeral of the late Mrs. Geo. Turner, who passed away suddenly June 5th. She was of a kind disposition and was liked by all who knew her. The floral offerings were beautiful. She leaves her husband and thirteen children, the youngest one being two weeks old. Much sympathy is extended to the family.  
Arch. McKillop, B. A., has resigned from the staff of the Strathroy Collegiate to accept the position of science teacher in the London Collegiate at a salary of \$2,900.

### APPIN

There was a large gathering on Thursday evening at the home of Mr. and Mrs. Jas. Allan to bid farewell to Rev. H. D. and Mrs. McCulloch, who are shortly to leave Appin. A program, consisting of solos by Miss Barbara Sinclair and Mrs. McCulloch; vocal duet by Misses Betty and Mayme Grant, and speeches by J. S. Macraul, David McArthur and Joseph Squire, was much appreciated. During the evening a presentation of a purse of money was made to Mr. and Mrs. McCulloch. Evan McMaster read an address which expressed the regret of all in losing such faithful minister as Mr. McCulloch and so loyal a church worker as Mrs. McCulloch. The presentation was made by Mrs. Elmer McIntyre on behalf of the Appin Presbyterian congregation. A dainty lunch was served by the ladies, and before the gathering dispersed a hearty vote of thanks was tendered Mr. and Mrs. James Allan for their kind hospitality.

Mrs. James McMaster, Mrs. Hugh Rankin and Duncan Campbell have returned from Toronto, where they attended the funeral of their nephew, Wm. Campbell, son of Mr. and Mrs. James Campbell, formerly of Appin. Deceased, who was 15 years of age, passed away in the General Hospital from injuries received when he fell off his bicycle under the wheels of a motor truck the day before.

The Orange lodges of Middlesex were celebrating the coming of the 100th of July at St. Thomas. This was decided on at the semi-annual meeting of the county lodge at Komoka June 10th. W. T. May, of Appin, represents the county at the grand lodge to be held at Kingston next week.

Rev. Mr. Stevens gave an excellent sermon in the Presbyterian church on Sunday. He is expected here next Sunday and all members are urged to be present, as Mr. Stevens is a candidate for the vacancy.  
Mr. and Mrs. John Macfie attended the closing exercises at Alma College on Tuesday.  
Garden parties are the order of the night.

### EKFRID STATION

H. Winger and family attended the golden wedding of Mr. and Mrs. Joseph D. Winger, Mossa, on Saturday.

Much sympathy is extended to Charlie Adams and mother in the passing away of his father, John Adams, Detroit.

Miss Gunn, of St. Thomas, spent Sunday at H. Winger's.  
**Muscular Rheumatism Subdued.**—When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully estimated.

Master Four, 22-35 Special

## The Reliable McLaughlin - Buick Transmission Is a Feature of the McLaughlin-Buick "Master Four"

The same quietly operating, dependable transmission that has been so pronounced a feature of the McLaughlin-Buick Six, is employed in the McLaughlin-Buick Four. The design is the same—the quality is the same—Only in size is there any difference.

Every part of the remarkable line of McLaughlin-Buick four-cylinder cars is as distinctly McLaughlin-Buick as if the name were stamped upon it.

And back of every McLaughlin-Buick car is the skill and experience of 20 years, combined with unparalleled manufacturing equipment facilities.

McLaughlin Cars are BUILT—not merely assembled in Canada
