FOR SALE

One sow and six pigs 5 weeks old; also pure bred York sows ready to breed.—E. V. Thornicroft, Appin.

DISTRICT AND GENERAL

The pavement from Lambeth to Delaware Village will be finished this fall.
E. E. Boughner, of London, has purchased the Queen's Hotel at Dutton from George Vowel.

The population of Windsor is estimated at 52,000, and the combined population of the Border Cities at 77,000.
A potato crop 13,000,000 bushels smaller than 1923 is forecast for 1924 by the United States Department of Agriculture.

During the first six months of 1924 charges of kidnapping were filed against 400 men in Mexico who stole their brides in this way.

The Canadian dollar was quoted at 132 of 1 per cent. on the New York market on Thursday, the highest since December, 1922.

A profit of \$4305.629 on liquor sales, fines, tax on beer, etc., was realized by the Province of Quebec in the fiscal year just ended.

The cost of living in Canada generally remains close to fifty per cent. higher than it was at the outbreak of the Great War in August, 1914.

During April, May, June and July a total of 64,000 immigrants were admitted to Canada, and 18,000 Canadians returned from the United States.

It is estimated that the total income of the farmers of Ontario this year will be 20 to 30 per cent. higher than in 1923, due to the good crop conditions and higher prices.

Graham Chiness, seven-year-old son of David Chiness, of East Williams, had his foot amputated below the ankle as a result of having his leg caught in the blades of a mower.

After building a house and making a garden around it, Herbert Green, of York, Pa., discovered that he did not own the lot on which the house had been built. His lot was the adjoining one.

When sugar first was made from beets it took about twenty tons of beets to produce one ton of sugar; now it requires but six tons, the change being due to scientific production of beets.

John Poland, a prominent stock breeder, of Bridgen, disposed of his stock of Shorthorn and Holstein cattle by public auction. The prices obtained were much below real value and were quite a disappointment.

While visiting at the summer home of her daughter at Bright's Grove, Lake Huron, Mrs. Mary Jane Mitchell, aged 76 years, of Watford, was fatally burned when she attempted to extinguish a fire which caught in the curtains from an oil stove.

Fire, caused by the spark from a gasoline engine on a straw-baling machine, completely destroyed the large bank barn and sheds, 775 bushels of wheat, 100 tons of hay, 50 tons of straw and farm implements on the farm of Donald Ferguson, North Yorkmouth.

Robert Raikes, a Gloucester (England) printer and publisher, in 1789 noticed some urchins playing in the street on a Sunday morning and gathered a number of them into a class, private religious instruction. This was the beginning of Sunday schools.

While Fred McKay and Stanley Bennett were cutting oats in West Zorra during a thunderstorm a bolt of lightning struck their machine, instantly killing three of their horses which were drawing it. The men were stunned by the force of the shock, but suffered no material injuries.

It is stated that at the next session of the Ontario Legislature a tax of two cents a gallon on gasoline will be submitted for approval. The tax, instead of being imposed at the retail end of the distribution system, will be imposed upon the wholesalers. It has been estimated by the department that a two-cent tax would bring in from \$2,000,000 to \$3,000,000 additional provincial revenues each year. Besides this move to secure additional moneys for highways, the government proposes to considerably increase the license fees on motor trucks using the highways.

With construction expenditure curtailed and labor rates the same as last year, fully 25 and 30 per cent. more work is being done for the same money this season on federal-aided highways in Eastern Ontario and Quebec.

A. W. Campbell, commissioner of highways, states on his return from an inspection of some 900 miles of federal-aided roads in the two provinces. Mr. Campbell says the year is closing many gaps on through routes which will result in a continuous, serviceable road between Windsor, Toronto, Montreal, Quebec, St. John, Halifax and Sydney, a distance of about 2,000 miles.

THE BOWLING GREEN

In a local tournament held Wednesday afternoon and evening, the first prize was won by W. J. Ford and Clarence Leitch; second by C. E. Davidson and Thos. Brand, and third by James Poole and Matthew Knox.
Eight rinks of ladies and gentlemen participated in a local tournament on Monday afternoon and evening, which attracted a great deal of interest. The prizes were won by Charles Mawhinney and Ophelia Thomson, first; Mac, McAlpine and Mrs. Luckham, second, and J. D. Brown and Mrs. Sutherland, third.

HIGH SCHOOL OPENING

Glencoe High School opened on Tuesday with an unusually large attendance, and those concerned are to be congratulated on the beauty of the old building.

The general public will be given an opportunity of seeing the school on Friday afternoon when the staff and pupils will be "at home" to their friends.

McLACHLAN PICNIC

The third annual picnic of the descendants of the late Hugh MacLachlan was held in the grove of the original homestead, lot 1, con. 8, Mosca, on Wednesday, August 15th.

Despite the fact that recent rains had handicapped many of the farmers, the great majority of them, firmly believing in the unfulfilling promise of seed-time and harvest, assembled at the picnic grounds to spend a pleasant day with their friends.

As the day was ideal presently the friends from a distance began to arrive and soon the woods re-echoed with the exchange of greetings, guests being present from Montreal, Detroit, Port Huron, Sarnia, Windsor, Chicago, Uby, and even from far-off Saskatchewan.

About 1230 p. m. the "skirl of the pipes" announced that dinner was ready. After partaking freely of the many dainties that had been provided the Rev. D. Robertson in a very fitting manner opened the program, which was then left in the hands of the Henderson Pipe Band of London, with the exception of a Gaelic song by Master Gordon Nisbet.

As the various strathpeys, reels, etc., were executed by these youthful performers many of the old pioneers were heard to voice their appreciation of the same and many were the reminiscences related of the days "when they were young" and attended the balls in the neighborhood.

At the close of this program supper was served, after which a program of sports was carried out. The prize winners in each case were as follows:—Boys under 6—Wm. Caruthers, G. Nisbet; Girls under 6—H. Brathby, F. McNeil; Boys 6 to 8—A. Leitch, A. McKellar, E. Worke; Girls 6 to 8—M. Leitch, E. Caruthers, M. McNeil; Boys 8 to 10—J. Innes, M. Campbell, K. Campbell; Girls 8 to 10—S. Campbell, P. Moore, L. Lawrence, M. MacLachlan, J. Nichols; Boys 10 to 12—K. McKellar, H. MacLachlan, G. Ross; Girls 10 to 12—A. Lawrence, N. Innes, M. Watson, S. Campbell, P. Moore.

After the races there was a lively game of baseball in which the older men took part; many declaring that they had not played or enjoyed such sport since the days when they attended school. While these were so engaged others tripped the "light fantastic" to music provided by the standard instruments of Scotland the bagpipes and accordion. But the low rays of the sun foretold too soon that it was the close of the day; so after joining in "Should Auld Acquaintance be Forgot" and "God Save the King," the company dispersed, each and every one declaring that the MacLachlan picnic of 1924 would be a green spot in their memories.

A FIERCE BEVERAGE

In the county police court at London on Thursday, Roy Erwin, of the township of Caradoc, pleaded guilty to charges of having liquor in a place other than a private dwelling, and of violating the Inland Revenue Act by manufacturing liquors and using fake labels on the bottles. He was fined \$600 and \$20 costs.

Erwin, according to the police, has been selling fake whiskey for some months, labelling the bottles with the names of well-known brands. He had no still, but managed to produce a liquid that passed for whiskey by using a hydrometer to measure the amount of alcohol; glycerin for sweetening banana oil and burnt sugar for coloring. Erwin is alleged to have posed as a bootlegger and to have had a large number of customers.

Say it in The Transcript.

THE TENNIS COURTS

Glencoe players won from Bothwell 6 games to 3 in the tennis tournament played on the local courts last Wednesday afternoon.

The results are as follows:—Ladies' doubles:—Mrs. Mayhew and Mrs. Hill defeated Mrs. McLean and Mrs. Vincent, 6-0, 6-0. Miss O. Watts and Miss Lorna Luckham won from Mrs. Curtis and Mrs. Prout, 6-1, 6-4. Miss Evelyn McLachlan and Mrs. Hill defeated Mrs. Berewin and Miss Johnson, 6-2, 6-1. Men's doubles:—R. D. McDonald and Arnold Aldred won from Mr. Smith and Mr. McLean, 6-2, 6-2; E. Mayhew and P. Hill lost to Mr. Beauls and Mr. Vincent, 6-2, 6-2. Singles:—R. D. McDonald lost to Mr. Smith, 6-4, 6-3; C. Bechill won from Mr. Vincent, 6-3, 6-3; H. Moss lost to A. Prout, 5-7, 6-2; Miss Lorna Luckham won from Mrs. Vincent, 6-2, 6-1.

Lunch was served and a social time was enjoyed.

In the Labor Day tennis tourney at Alvinston Glencoe won four events out of six.

In the men's doubles R. D. McDonald and Arnold Aldred romped away from R. McLean and Dr. Duncan, Alvinston, in two straight sets.

In the ladies' doubles Mrs. Mayhew and Miss Lorna Luckham had an easy win in two sets from Miss Irving and Miss Wallace.

In the single events Miss Frances Moss was defeated by Miss Ella Martin in a hard fought set.

E. A. Mayhew won the men's singles by defeating Dr. Urie, Watford, in a long drawn out game that went three sets.

Ross Lethbridge and Miss Olive Watts were defeated by Mrs. Leitch and Mr. Johnson, winning the first set by hard smashing drives and losing the next two by their opponents' lobs.

Harry Moss and Miss Luckham defeated Harry Bindner and Miss Gray in two straight sets.

A social time was enjoyed by all afterwards.

MacCALLUM-MacALPINE REUNION

The annual reunion of the descendants of John MacCallum and Margaret MacAlpine MacCallum, who settled in Dunwich over a hundred years ago, was held at Port Stanley, and in every way proved to be a most enjoyable outing. The attendance numbered about 70, coming from many parts of Ontario, to meet and mingle once more in the glad reunion of relatives. After the basket picnic, Thomas Urquhart, of Toronto, addressed the gathering in his usual happy mood, recalling many incidents in connection with the clans. A short address was also given by Sam, McFarlane, of London, a series of sports for the younger members of the gathering following. It was decided to hold the next reunion at the home of Godfrey McMurphy, Glencoe.

METCALFE COUNCIL

Meeting of Metcalfe council held at Napier Saturday, August 30th. Members present—C. C. Henry, J. Rowe, P. Morrison and Joe Blain. Minutes were read and approved.

On motion of Rowe and Blain the usual orders were paid.

Moved by Blain and Morrison that J. Rowe have the Davis drain repaired in accordance with the engineer's report.

Moved by Blain and Morrison that the clerk and reeve have the Mosca and Ekfrid township accounts adjusted.

Moved by Blain and Rowe that the clerk ask parties concerned to have the open part of drain from 16 side road on lot 17, con. 14, to railroad cleaned out as it has been filled up and complaint has been made to the council to have the filling removed.

Township rate for 1924 was struck at 7 mills on the dollar. County rate is 10.25 mills.

Council adjourned to Monday, October 6th, at 1 p. m.
Harry Thompson, Clerk.

The Government Building will be a feature of the Western Fair this year. The Dominion Postal Department, the Canadian National and the Canadian Pacific Railways, the Dominion Live Stock Branch, and the Dominion Experimental Farms will be represented by enlarged exhibits.

An Essay on Men

A little girl wrote the following composition on men:

Men are what women marry. They drink and smoke and swear, but don't go to church. Perhaps if they wore bonnets they would. They are more logical than women and also more zoological. Both men and women sprung from monkeys, but the women sprung farther than the men.

LEAGUE FIELD DAY

Appin, Sept. 2.—A successful field day was held by the Young People's Leagues of the Strathroy district on Wednesday afternoon at the Appin community park, over 300 young people being present. Soft-ball, basketball and tennis were played by teams from the various societies, the largest number of points being made by the Kerwood and Cairngorm leagues. After the ball games other sports were enjoyed—relay race, 50-yard dash, etc.

A splendid picnic supper was then set on a long cover on the grounds, over 175 being seated at once. After supper community singing was enjoyed, and all went to the Methodist church, where the final debate in the tournament was heard.

Miss Anna Farrell and Ronald Macfie, of Appin, upheld the affirmative, and Miss Florence Edwards and Rob Parker, of Zion church, near Watford, the negative, on the subject "Resolved that it is easier to live a Christian life in this generation than at any other previous time."

The subject was wonderfully well handled by all the speakers, everyone scoring several points, and their material and delivery were to be highly commended. The judges—Mr. Reycraft, of Watford; A. F. Munroe, of Metcalfe, and C. Pentland, of Strathroy—after deliberating for some time gave their decision in favor of the negative. After the decision the pastor of the Appin circuit and chairman of the evening, Rev. Clare Motyer, M.R.E., on behalf of the Strathroy district Young People's Leagues, presented the winners with a beautiful pennant in recognition of their victory in the debating tournament of 1924. Miss Edwards replied very appropriately.

The program was then added to splendidly by the giving of a pageant entitled "The Call of the Nations." Canada was beautifully represented, and Japan, China, India, Italy, Russia, South America and North America were all represented by the different leagues, who came with their plea for help to Christianize their people, and were responded to by Miss Canada. Solos by Miss Alice Brownlee and Miss Olive Black were also enjoyed.

Altogether the field day was pronounced to be the finest yet held by the Young People's Leagues of the Strathroy district.

DEATH OF MITCHELL WALKER
Mrs. James Poole received word yesterday morning of the death of her brother, Mitchell Walker, at his home near Aylmer.

Mr. Walker was a son of the late Mitchell Walker, of Mosca township, and a brother of the late Dr. Walker, of Glencoe. Isaac Walker, of Alaskan, Sask., is a brother, and Mrs. J. D. Smith, of Glencoe, and Mrs. A. D. McCullum, of London, are sisters.

The funeral arrangements had not been made at time of writing.

WILL ATTEND NORMAL SCHOOL

Graduates of Glencoe High School who will attend London Normal School this term are Catharine Lawrence, Florence McEachern, Marion Campbell, Lillian Campbell, Mabel Gardiner, Susie Gardiner, Christina Leitch, Helen Cameron, Verna McCullum.

WINSHIP—TUFFIN

Newbury, August 30.—The marriage of George L. Winship, youngest son of Mr. and Mrs. James R. Winship, to Miss Edith Tuffin, of South Ekfrid, took place at the rectory in Wardsville.

The bride looked exceedingly pretty in a dress of brown crepe de chine with hat to match. The bridesmaid, Miss Violet Frank, of Byron, was also dressed in light brown. Wm. Tuffin, cousin of the bride, was groomsmen. James Haggitt, cousin of the bridegroom, was chauffeur and had his car prettily decorated by friends. After the marriage ceremony the happy couple left mid showers of rice and confetti for the bride's home, where a dainty lunch was served, guests being the near relatives of the contracting parties. After a honeymoon trip to Toronto and Niagara Falls Mr. and Mrs. Winship will be at home to their friends from the middle of September.

The vaudeville performance in front of the grand stand at the Western Fair in September will be of outstanding merit. The best performances available have been secured and patrons are assured an unexcelled display of fireworks.

It's a hard world, and when you haven't time to shave you always meet a man you wish to impress.

TENTH
of the series dealing with the establishment of
the Bank of Montreal at representative points in Canada
and elsewhere.

ON Threadneedle Street, in the old City section of London, the financial heart of the British Empire, the Bank of Montreal has been representing the interests of Canada since 1870.

Its first London office was located at 27 Lombard Street. Later the Bank established an office at 47 Threadneedle Street E.C., afterwards extending its services to the Pall Mall section of London by creating an important branch at Waterloo Place in the heart of the theatre and shopping districts.

WORST STORM IN YEARS PLAYS HAVOC WITH SHIPPING ON NOVA SCOTIA COAST

Many Boats Missing in Gale Which Sweeps Maritimes—
Passengers of Aspy Endure Hardships After Perilous
Rescue.

A despatch from Halifax, N.S., says:—With sections of the Nova Scotia coast strewn with wreckage; with vessels failing to reach their destinations; with no hope that the crew, six all told, of the three-masted schooner Anna MacDonald, of which have come ashore on the lonely Prospect Ledges, near here, were alive; with the American cruising yacht Shanghai wrecked off White Point Bluff, Canoe, but her company heroically and miraculously saved; with the coastal steamer Aspy, wrecked at 15 women and children, had a perilous passage over the boiling surf to a ledge at the foot of the cliffs. With the aid of the Aspy's searchlight, a cove was discovered, and entering this the party clambered to the top of the cliff, where they spent the night far from human habitation. With daylight the seamen in the party found a road, by which all made their way to Neil's Harbor.

The first boat lowered was smashed by seas against the ship's side and a reef. The others met with more success. The passengers, including 15 women and children, had a perilous passage over the boiling surf to a ledge at the foot of the cliffs. With the aid of the Aspy's searchlight, a cove was discovered, and entering this the party clambered to the top of the cliff, where they spent the night far from human habitation. With daylight the seamen in the party found a road, by which all made their way to Neil's Harbor.

Captain York and the mate are still aboard the Aspy awaiting the arrival of other boats of the same fleet, which will attempt to salvage the baggage and some of the cargo. The vessel is split open, her stern is gone, and although there are 15 fathoms of water at her bows the middle of the ship is stuck fast among the rocks.

A despatch from Gloucester, Mass., says:—The fishing schooner Dorcas was reported swept aground on the coast near here on Thursday night. Her captain was reported to be dead as a result of the accident. Details of the reported wreck were not available.

The coastal schooner Lady Thor-

not for years has such surf piled up along the ledges and shoals and headlands of the Province, dashing its victims to destruction.

The schooner Julia F. C., Captain Devons, which was reported abandoned and about to become a total wreck near the Bird Rocks, sailed into port just as several craft were about to be despatched in search of her. The captain stated his crew were dead tired with fighting the storm and were sound asleep in their bunks when hailed by the vessel that brought the news of their peril to Sydney and did not hear either hulls or whistles.

Straw—Carrots, per ton, \$9.50 to \$10.

Screenings—Standard, cleaned, 1c; extra, 1½c.

Cheese—New, large, 50c; twins, 20½c; triplets, 21c; Stiltons, 22 to 23c; Old, large, 23 to 24c; twins, 24 to 25c; triplets, 25 to 26c.

Butter—First creamery prints, 38 to 39c; No. 1 creamery, 36 to 37c; No. 2, 34 to 35c; dairy, 28 to 29c.

Eggs—Extras, fresh, in cartons, 45c; extra, loose, 43c; extras, 37c; seconds, 30c.

Live poultry—Hens, over 5 lbs., 20c; do, 4 to 5 lbs., 17c; do, 3 to 4 lbs., 15c; spring chickens, 2 lbs. and over, 25c; Roosters, 12c; ducklings, 4 to 5 lbs., 18c.

Dressed poultry—Hens, over 5 lbs., 26c; do, 4 to 5 lbs., 22c; do, 3 to 4 lbs., 18c; spring chickens, 2 lbs. and over, 30c; roosters, 15c; ducklings, 4 to 5 lbs., 25c.

Hens—Can. handpicked, lb., 6½c; primes, 6c.

Maple products—Syrup, per imp. gal., \$2.50; per 5-gal. tin, \$2.40 per gal.; maple sugar, lb., 25 to 26c.

Honey—60-lb. tins, 12½c per lb.; 10-lb. tins, 12½c; 5-lb. tins, 13½c; 2½-lb. tins, 14c.

Smoked meats—Hams, med., 27 to 28c; cooked hams, 42 to 43c; smoked rolls, 18 to 20c; cottage rolls, 21 to 22c; breakfast bacon, 23 to 27c; special brand breakfast bacon, 29 to 31c; hocks, loaves, 36 to 40c.

Cured meats—Long clear bacon, 50 to 55 lbs., \$17 to 18 lbs., \$16.50; 50 lbs. and up, \$15.50; lightweight rolls, in barrels, \$32; heavyweight rolls, 32½.

Lard—Pure, tierces, 17½ to 18½c; tubs, 17½ to 18½c; pails, 18 to 18½c; prints, 20½ to 20¾c; shortening, tierces, 16 to 16½c; tubs, 16½ to 17c; pails, 17 to 17½c; prints, 18 to 18½c.

Export steers, choice, \$7.50 to \$7.75; do, good, \$6.50 to \$7; export heifers, \$6 to \$6.50; baby heaves, \$7.50 to \$10; butcher steers, choice, \$6 to \$6.50; do, good, \$5.50 to \$6; do, med., \$5 to \$5.50; do, com., \$4 to \$4.50; butcher heifers, choice, \$6 to \$6.50; do, med., \$5 to \$5.50; do, com., \$4 to \$4.50; butcher cows, choice, \$4 to \$4.25; do, fair, \$3.50 to \$4; bologna, \$2 to \$3; canners and cut-

ters, \$1 to \$2.50; feeding steers, choice, \$6 to \$6.25; do, fair, \$5 to \$5.50; stockers, choice, \$4.50 to \$5; do, fair, \$3.50 to \$4.25; milkers, springers, choice, \$7.50 to \$9; do, fair, \$4 to \$5; calves, choice, \$9 to \$10; do, med., \$6 to \$8.50; do, com., \$3.50 to \$4.50; lambs, choice ewes, \$12.50 to \$13; do, culls, \$10.50 to \$11; do, culls, \$8 to \$11; sheep, light ewes, \$6.50 to \$7.25; do, culls, \$2 to \$4.50; hogs, fed and watered, \$10.60; do, f.o.b., \$10; do, country points, \$9.75; do, select, fed and watered, \$11.50; do, off ears, long haul, \$11.

MONTRÉAL.

Oats, Can. west, No. 2, 62 to 63c; do, No. 3, 60½ to 61c; extra No. 1 feed, 60c; No. 2 local white, 59c. Flour, Man. spring wheat, 1st, \$7.90; 2nd, \$7.40; strong bakers, \$7.20; winter, \$7.40; choice, \$6.80 to \$7. Rolled oats, bag, 90 lbs., \$3.55 to \$3.75; Bran, \$29.25. Shorts, \$31.25. Middlings, \$37.25. Hay, No. 2 per ton, car lots, \$16.50 to \$17.

Cheese, finest, Wests., 17½ to 17¾c; finest Easts., 17¾c. Butter, No. 1, pasteurized, 36 to 36½c. No. 1 creamery, 35 to 35½c; seconds, 34 to 34½c. Eggs, fresh extras, 42c; fresh firsts, 36c.

Fairly good to good milk-fed calves, \$8 to \$9 per cwt.; light hogs, \$9.50 to \$10; better weights, \$10.50.

Among the British scientists who

are now touring Canada is Prof. S. S. Blair of Edinburgh, Scotland, a famous

alpine climber, who is convinced that

the British really conquered the peak

of Mt. Everest.

Coast of Britain to be Guarded

by Powerful Seaplanes

A despatch from London says:—

Great Britain's coast line will in the

near future be patrolled and guarded

by powerful seaplanes, now under con-

struction for the navy. Each will

carry a pilot, navigator, two machine

gunners, and a torpedo for launching

at hostile surface craft.

Still more powerful planes are being

built to make longer flights seaward,

and these will carry five men each.

The first shipment of Manitoba

salted butter was made to England

recently, comprising 99,000 pounds.

After deducting freight charges, two

cents per pound, the butter netted one

cent per pound over the local quota-

tion for salted butter.

United States tars have been busy laying anchor buoys off the mouth of Indian Harbor, Nova Scotia, in preparation for the arrival of the 'round-the-world' fleet.

DAWES PLAN SET IN OPERATION BY THE REPARATIONS COMMISSION

Paris, September 1.—The Reparations Commission today officially declared the Dawes plan in operation. The plan became effective at noon.

The decision to proclaim the plan in effect was reached by the Commission in a plenary session presided over by Louis Barthou, president of the Commission, and attended by Jacques A. Logan, the United States representative with the Commission. Official cognizance of the texts of the laws voted by the German Reichstag to put the plan in effect, was taken by the Commission, which approved the laws as in conformity with the terms of the Dawes report. The Dawes plan, which was presented by the office of Agent-General Young, was now officially opened and ready to function, and that the de-

lays granted by the terms of the London pact for fulfillment by both the Allies and Germany should begin being counted from today.

The Commission officially recognized Owen D. Young as Agent-General for payments. Mr. Young and his associates, the other officials appointed by the Reparations Commission—M. Delacroix, of Belgium; Signor Nogara, of Italy, and Andrew MacFadyen, of England—will leave for Berlin on Wednesday evening to receive the first payment of 20,000,000 gold marks.

The Railway and Bank Commissions will be appointed during the coming week. They are to be elected by majority votes of the Boards of Directors of the railways and banking committees, respectively.

FIFTH ASSEMBLY OF LEAGUE OF NATIONS

Workers for Peace of the World Seek Ideal Solution in Geneva.

Geneva, Sept. 1.—The first day's session of the Assembly of the League of Nations, which elected Dr. Giuseppe Motta, of Switzerland, President, and started in motion the machinery of the great congress, which is expected to last a month, appeared to convey an impression of sincerity and determination to reach substantial decisions.

To-morrow will be devoted to the selection of the six Commissions of the Assembly, and the election of six vice-presidents, and on Wednesday, when Premiers MacDonald and Herriot are present, the delegates will inaugurate the heralded debate on the report of the Council, which includes the supreme questions of security and reduction of armaments.

Some disappointment was manifested here when the Secretariat distributed a letter from Hugh S. Gibson, the United States Minister to Switzerland, announcing that the United States Government had declined the invitation to send a representative to the Third Commission when it considers the draft convention on international control of the traffic in arms. The letter explained that the United States had adequately set forth its views in the previous discussions before the permanent League Commission on Disarmament, and points out that the chief object, now, of the discussions was the convocation of an international conference to adopt the convention. Such a conference the United States would be glad to attend.

The Hall of the Reformation, which symbolizes the work of John Calvin, never held a bigger crowd than today. Visitors from many lands early besieged the doors, and many were turned away. Two notable addresses constituted a feature of the opening session, and served to create a background for the Assembly's work.

Woman's wiles, wit and charms versus criminal craftiness is a possibility of the future, and the outcome is expected by Scotland Yard to be more crime perpetrated than has been the case recently, says a London despatch.

Recruiting for the new women's police force is opening shortly, and from the many applicants, the Criminal Investigation Department hopes to get some bobbed-haired, daintily groomed detectives who will prove more than the equals of the wily jewel thieves and dope traffickers who have hitherto eluded attempts of mere men detectives to track them down.

The authorities are satisfied that many of the present crimes and robberies are engineered by a new set of smart criminals who can only be countered by detectives of the same outward smartness and equal wit.

Ontario continues to hold premier position among the provinces.

Farmers Here Receive Greater Returns Than the Earnings of Western Agriculturists.

A despatch from Toronto says:—The golden feed of wheat from the West for a few weeks each year is apt to blind Easterners to the riches at their own door. The very fact that estimates of the major Western crop vary by millions of bushels with every change in the weather makes the situation spectacular—but at the same time very uncertain. In Ontario, on the other hand, 200,000 farms are producing revenue every week in the year. There is no feverish climax, but this steady return over which the weather has relatively little control runs up a tremendous total at the end of the year, exceeding by a third the gross agricultural revenue from the leading Prairie Province, Saskatchewan. It is almost double the output of Manitoba and Alberta combined.

A year ago the total revenue received by Ontario farmers was estimated by the Dominion Bureau of Statistics at \$400,511,000, compared with \$376,470,000 received by their fellow-workers in the three Prairie Provinces. It is impossible to take an accurate inventory of agriculture in Ontario at any given time, as the revenue in a mixed farming province depends upon prices of dairy, poultry, and other animal and field crop products on the world markets during 365 days in the year. One is safe in concluding, how-

ever, that an increase of from 20 to 30 per cent. in total income should be received by Ontario farmers this year. Grain prices have risen over 20 per cent. and the crops on the whole promise bigger yields than in 1923. Fall wheat has averaged 27 bushels per acre, oats should run about 35, hay yielded a ton and one-half, potatoes and roots promise the best crop in years, and corn, while late, in the majority of fields should mature safely. Pastures, upon which Ontario's great live stock industry depends during the summer months, have been particularly good. Fruit growers expect at least fair returns.

Markets are even more encouraging. In every important line, save beef cattle, prices are firmer by 5 to 50 per cent. above the low point reached last spring. The demand for farms, almost non-existent a few months ago, is picking up, with many inquiries from the United States. The labor problem, formerly urgent, has now been largely solved.

Field crops should be worth \$250,000,000, dairy products at least \$100,000,000, the sale of farm animals should bring over \$40,000,000, the poultry industry will add \$25,000,000 to the farmer's income, which should total more than \$450,000,000 for 1924. Ontario is still the banner agricultural province of the Dominion.

Canada From Coast to Coast

Summerside, P.E.I.—Fox farming continues to be the chief branch of fur farming in Canada, according to a report issued by the Bureau of Statistics. According to the report there were 1,179 fox ranches in operation in 1923, of which number 448 were situated in Prince Edward Island, 123 in Nova Scotia, 89 in New Brunswick, 198 in Quebec, 201 in Ontario, 22 in Manitoba, 4 in Saskatchewan, 44 in Alberta, 29 in British Columbia, and 21 in the Yukon. The revenue derived from the sale of live foxes and pelts totalled \$2,159,898 in 1923, compared with \$1,536,822 in the preceding year.

Halifax, N.S.—Owing to the continued dry weather the apple crop has been quite heavy, and as a result of the total yield for the Annapolis Valley is now estimated at 1,274,744 barrels, which is approximately 70 per cent. of last year's yield. There is practically no injury from insect pests, but there is some scab developing, even in some of the well sprayed orchards.

St. John, N.B.—New Brunswick and Prince Edward Island report light hay yields, while Nova Scotia harvests an average crop. Potatoes continue to make satisfactory progress.

Quebec, Que.—Price Bros. Co. will start work shortly on the erection of a new pulp and paper mill at St. Joseph d'Alma. The work will not be completed until January of 1926, by which time it is expected that the mill will be ready to produce 200 tons of paper a day, and this amount will gradually be increased until in 1929, the daily production will amount to 600 tons.

Timmins, Ont.—Production of gold from the mines of Northern Ontario during July was maintained at a rate of over \$25,000,000 annually. Nine mines figured in the output of approximately \$2,125,000. Hollinger was the chief producer, being responsible for over \$1,000,000 of the total.

Winnipeg, Man.—Approximately 60 per cent. of 1,252,604 of the population of western Canada lived on occupied farms. Of the balance, 474,516 live in its twenty cities and towns of over 2,500 and 228,962 live in 3,309 small towns and villages of 2,500 or under.

Edmonton, Alta.—More than 400 miles of new roads are now under construction in the province under the direction of the Provincial Public Works Dept. Several contracts have recently been awarded for roadwork in various parts of the province.

Trail, B.C.—About 10,000 tons of ore concentrates and bar metals, roughly valued at more than \$220,000, have been shipped to Antwerp, Belgium, by the Trail smelter of the Consolidated Mining and Smelting Co. since the beginning of the present year.

How Blotting Paper Absorbs Ink.

To the ordinary principle that a liquid will find its own level there is the exception that we may see if we dip a very narrow glass tube into a basin. Inside the tube the water will be seen slightly higher round the edges than outside.

This is due to what we call "capillary attraction"—the liquid is slightly "attracted" to the body in it.

The first principle of blotting paper rests on this attraction, for while ordinary paper is sized over, so filling up every crevice, blotting paper is left unsized, with millions of minute roughnesses upon which capillary attraction leads the ink, till at last every separate particle of the paper is so covered that it can absorb no more.

Over and above this principle of attraction modern manufacturers treat their paper with certain chemicals which have the property of absorbing moisture. The result is our blotting paper which absorbs till it can hold no more—and then literally "blots."

Germans Become British Subjects by Act of Parliament

A despatch from Cape Town, South Africa, says:—Wholesale naturalization of Germans under British citizenship is being effected under a bill which is passing the final stages in the Union House of Assembly. The bill relates to the mandated area formerly known as German Southwest Africa and stipulates that every male adult who is a European and a subject of a former enemy power, domiciled in the territory, automatically becomes British unless he signs a declaration within six months, disavowing British naturalization. Only in the event of his return to Germany will his original citizenship be revived.

Three Horse Stung to Death by Bees at St. Hyacinthe

A despatch from St. Hyacinthe, Que., says:—Three horses employed in moving loads of gravel were killed on the high road near here when thousands of bees settled on the animals and literally stung them to death. The horses were completely covered by the bees, and maddened by the stings tried to kick themselves loose from the heavy wagons. The horses were eventually covered by knives, and the animals, took weakened to bolt, were sprinkled with poison to get rid of the bees. They died shortly afterwards.

PRINCE OF WALES PLAYS POLO IN UNITED STATES

H.R.H. Seeks Word from Air Officer Whom He Met During War.

New York, Sept. 1.—Major Lascelles, secretary to the Prince of Wales, to-night requested newspapers to notify Lieutenant A. E. James, M. C., formerly of the Royal Air Force, that the Prince would be delighted to hear from him. Lieutenant James is believed to be living in New York City, but his address is unknown.

The Prince and Lieut. James became acquainted in France, Major Lascelles said, and immediately upon his arrival here, His Royal Highness unsuccessfully sought the lieutenant.

A polo game, in which he played No. 1 on the winning team, and a garden party—in which he had about 300 representatives of Long Island society. Lunch was served at small tables on the terrace overlooking the Sound, with the Prince and his party seated under a large, green and white awning.

This, the first formal affair in the Prince's honor since his arrival in America was attended by his entire personal staff and about 300 representatives of Long Island society. Lunch was served at small tables on the terrace overlooking the Sound, with the Prince and his party seated under a large, green and white awning.

Church Property in Palestine Claimed by the Soviets

As mandatory power for Palestine, Great Britain greets with surprise upon soon to decide whether title to the vast properties of the Russian church in this country shall go to the Soviet Government, or to Russian Church interests outside of Russia.

The controversy involves hundreds of thousands of dollars of property in Jerusalem and vicinity, as well as in Bethlehem, Nazareth and Haifa, consisting of churches, monasteries, hospices, parks and other valuable plots of land. One of the churches is in the Garden of Gethsemane and another on the Mount of Olives.

Eskimo Chief Dies on Delta of the Mackenzie

A despatch from Edmonton says:—Ilavink, head man of the Eskimos at the mouth of the Mackenzie River, and staunch friend of the governing white race, died on the delta of the Mackenzie this summer, word of his death having reached Edmonton by travelers who arrived from the Arctic circle. Ilavink, besides hunting and trapping and trading with a schooner on the Arctic, was official interpreter for the Mounted Police. He assisted in the capture of the two Eskimos who were hanged for the murder of Roman Catholic priests and served as interpreter in their trial.

Crew of Lady Kindersley Are Rescued by Str. Boxer

Aboard the U.S.S. Boxer, in the Alaska Arctic, Aug. 31.—The crew of the Lady Kindersley, a gasoline schooner that the ice of the Arctic Ocean is carrying away to the north, were today taken aboard the Boxer. The Kindersley was abandoned.

Canadian Dollar Quoted at Highest in the World

A despatch from Ottawa says:—At a slight premium in New York the Canadian dollar stood for a time today the highest in the world. The quotation of 1-32 of one per cent. premium was the highest since the Dominion Government floated a hundred million dollar loan in New York in 1922.

The present situation is regarded as temporary and due to heavy borrowings on the New York market and flood of money in the United States.

BRITISH ENTER PLANES IN RACE

Factories work night
and day on craft.

Four Nations to Compete for
Schneider Cup at Baltimore
in October.

British aircraft manufacturers are working day and night constructing two seaplanes to compete for the coveted Schneider Cup, which was lost to the United States at Cowes last year, and for which four nations will contest next October in Baltimore.

A team of pilots and mechanics already have been selected, and satisfaction over the possibility of winning the cup this year is expressed generally throughout the country. At one time it appeared unlikely that Great Britain would enter the contest. Owing to the poor financial condition of the aircraft industry, there was little prospect of sending over even a team, much less specially constructed super-speed seaplanes.

Arrangements were completed at the last moment, however, and work on the planes is being rushed. One of the machines will be a one-float seaplane driven by a 550-horsepower Napier Lion motor, and is being built by the Gloucestershire Aircraft Company. She is a biplane—a development of the famous Handley-Page design—designed specially for the contest by H. F. Poland. The Napier engine is one of three, also built specially for the race. It is generally believed the plane will do better than 270 miles an hour.

Flying Boat of Great Speed.

The other entrant is to be a super-marine biplane flying boat, driven by a 550-horsepower Rolls-Royce Condor, and is expected to attain almost unbelievable speed. Lord Edward Grosvenor will have charge of the team when it sails for America next month.

Larry Carter, one of Britain's foremost air pilots, will handle the Gloucester boat. Henry Brad, who won the Schneider Cup in 1922 and was the only British starter in last year's contest, will pilot the super-marine. Hubert Broad, noted for his experience with De Havilland planes, will accompany the team as relief pilot.

Both France and Italy are reported to be developing much time and thought on the planes which they hope to win the highly prized trophy. However, the consensus of opinion is that the contest will be chiefly between Great Britain and the United States, with England having a shade in its favor.

The prediction is based on the report that the American entrant will be a Curtiss navy racer which as a land machine did 266 miles an hour last year. Converted into a seaplane, its speed, according to the experts here, will be reduced considerably.

Odd Accident Statistics.

Every day in the year two people who leave their homes in London to go to business fail to return. They are killed in street accidents. Each year sees an increase in the number of street and road accidents, so that today more people are killed in this way than by any other sort of accident.

Insurance companies transacting accident business have calculated that one out of every ten persons insured meets with an accident of some kind in the course of the year, and that one accident in every hundred ends fatally.

The number of people who die as the result of accident is highest in the United States. There, out of each 10,000 deaths, 370 are violent ones. The number of fatal accidents which occur yearly in the United States is over 50,000.

In English towns road accidents account for nearly one-fifth of all violent deaths. Next come burns and scalds. In this case the greater number of victims are children, but a good many women are killed in this way.

The largest accident death-roll among men is caused by accidents in coal mines and in factories. Then comes the number of those killed on railways. The risk of drowning is not so great as is generally supposed, for out of 10,000 deaths only twenty-one are caused by this means.

The risk is even smaller for in England only seven persons in each 10,000 are burned to death. Out of 100 deaths from fire, fifty-eight are women and forty-two are men.

The most risky occupations are those of miners and fishermen. Next comes that of motor-driving, and fourth, that of the house painter. The safest occupation is that of the cobler.

Spilled.

It was her birthday. "Dearest," his note read, "I'm sending you a rose for each year of your life."

Diplomatically, he ordered the florist to deliver but twenty roses.

When he had gone the florist said to himself, "Well, Bismarck is a good customer. I'll add another ten for good measure."

He who receives a good turn should never forget it; he who does one should never remember it.—Charron.

Kindness is the money of the spiritual realm and should be kept in circulation. When you receive one of the precious coins pass it on.

RED ROSE TEA "is good tea"

Folks who want the very best use
RED ROSE ORANGE PEKOE

Surnames and Their Origin

SPENCER.

Variation—Spenser.
Racial Origin—English.
Source—A title of office.

One of the most peculiar points about the social and military system of the Normans was the manner in which occupations, which today we look upon as of a humble, household nature, were exalted into titles of nobility.

The answer, of course, is that in those days each feudal castle, the social unit of all who were not tillers of the soil, was, though a single "household," a small nation in itself, largely independent and owing vassalage to counts and kings only as a unit.

Thus the keeper of the "family" purse was in reality the "secretary of the treasury," and the head of the household kitchen was the commissary-general.

The "dispenser" or "despenser," under the feudal custom of the Normans, was the officer responsible for the "buttery" or food warehouse of the castle, an office of great responsibility in days when sieges were laid, often not to be lifted for months or even years.

This title, however, when coupled with the word "le" (the), as of course it was, soon became too clumsy even for the Norman tongue, with the result that it did not take many generations before the more common form of the word was "spencer" or "spenser." There

were many, many castles in medieval England. Hence there are many Spencer families to-day.

SELLERS.

Variation—Seller, Seeler, Sadler.
Racial Origin—English.
Source—Occupations.

It is not possible to tell with accuracy in the individual case which of two sources these family names have come from, with the exception of the last name.

It may be taken for granted, however, that the name saddler, the rest of them in the vast majority of cases come from the occupation of making saddles. The assumption that there is any connection with our modern word "seller," or salesman, is erroneous, for the medieval English did not use this word to designate tradesmen.

"Sadler" is a form of the name traceable to the Anglo-Saxon word "sell," however, was the word most often used by the Normans in the early period to denote a saddle, and it endured for a long time. In fact, it did not become obsolete until after Spencer wrote.

"He left his lofty steed with golden sell, And goodly gorgeous barbes." The form Sellers, Seller and Seeler, however, may also be derived from the old word "sealer," which was the appellation of those craftsmen who manufactured seals.

If he never shows her any tenderness or affection, or gives any sign that he still cares for her. The thing that would make her go down on her knees and thank Heaven for having given her her heart's desire in a husband would be for him to be pleasant to live with; for him to keep up the love-like attentions of their courtship days; for him still to give her kisses with a thrill to them; for him to tell her that she grew more beautiful to him and dearer as the years went by, and that his lucky day was the day he won her for a wife.

A woman rejoices in her husband's success in business. But she can be utterly miserable if he has a surly disposition; if he never speaks at home except in find fault, and if the family lives in fear of doing or saying something that will bring on a burst of temper. The husband who makes life a grand, sweet song to his wife is the man who is pleasant to live with; the man who is cheerful and good-natured, who follows his wife and pets his children, and at the very sound of whose key in the door everybody brightens up and begins to smile.

And precisely the same thing is true of wives as of husbands. The good wife is not necessarily the best woman, or the best cook, or the best housekeeper, or even the woman who loves her husband best. Many a woman who would gladly die for her husband nags him so that he would be willing to die to get rid of her.

The perfect wife is the woman who is pleasant to live with. She is the woman who is cheerful and good-natured; who is reasonable; who is appreciative and contented, and who can say a thing once and let it go at that.—Dorothy Dix.

Model of Niagara.

A model of Niagara carrying an amount of water directly proportional to that of the real Niagara is helping engineers to remedy an evil that threatens to destroy the beauty of the falls. As the limestone wears away underneath the "throat" of the Horseshoe more and more water is concentrating there and seems likely before many years to make the falls no more than a huge V-shaped gully.

Experiments with weirs and artificial islands, placed in the stream above the falls on the model, show how the water can be distributed so as to give the American Falls a greater volume and keep on the Canadian edge of the Horseshoe water that the power company on that side now fears that it will lose.

Quite Respectable. "I hope," remarked his mother to little Willie, who had been to a party in her absence, "that you washed your hands before tea."

"I didn't have time to wash more than one," he confessed, "but I ate with that and kept the other in my pocket."

The Only Reason.

Bingo—"I'm going to bring my wife round to call on you to-night."

Winterby—"That's right; but do me a favor, old man. Don't let her wear her new costume. I don't want my wife to see it just now."

Bingo (grimly)—"Why, that's just what we are coming for."

Minard's Liniment for Rheumatism.

Saturday's Child.

Some are toothed on a silver spoon,
With the stars strung on a rattle;
I cut my teeth as the black raccoon,
For implements of battle.

Some are swaddled in silk and down,
And heralded by a star;
They swathed my limbs in a sackcloth gown,
On a night that was black as tar.

For some godfather and goddame
The opulent fairies be;
Dame Poverty gave me my name,
And Pain godfathered me.

For I was born on Saturday,
"Bad time for planting a seed,"
Was all my father had to say,
And, "One mouth more to feed."

Death cut the strings that gave me life,
And handed me to Sorrow,
The only kind of middle wife,
My folks could beg or borrow.

—Countess P. Cullen.

A Cross of Pearls.

What are perhaps the most remarkable natural pearls in the world are being exhibited in the Australian Pavilion at the British Empire Exhibition.

This extraordinary exhibit, known as the Southern Cross, is a cluster of nine pearls forming an almost perfect Latin cross. The shaft is composed of seven pearls measuring an inch and a half in length, while the arms of the cross are formed of one pearl on each side opposite the second pearl from the top downwards.

Examination under a powerful microscope shows that the gems were produced by nature in their present arrangement, probably as a result of mutual compression during growth.

The pearls were discovered in 1874 by a pearl fisher at Roeburn, in Western Australia, but so amazed were the finder and the owner of the vessel that, believing it to be a heaven-wrought miracle, they buried the treasure and left it to be forgotten.

It remained hidden until 1878, when an Australian explorer, Alexander Forrest, passed near Roeburn and, hearing accidentally of the pearl, disclosed its existence to the world.

It is now the property of a London merchant, and is valued at \$50,000.

Gas Replaces Brazier.

The charcoal brazier, characteristic of Japanese homes for many years, is being displaced rapidly by the gas stove.

Japan is also using 1,000,000 gas lamps in city streets and 2,300 gas engines in the tiny factories that produce everything from ivory carvings to toothbrush handles and from sandals to sausages.

A woman production to-day, with 10,000,000 cubic feet annually, is double that of 1914. Seventy-six companies, as compared with ten in 1914, furnish the service.

CHILDHOOD INDIGESTION

Nothing is more common in childhood than indigestion. Nothing is more dangerous to proper growth, more weakening to the constitution or more likely to pave the way to dangerous disease. Fully nine-tenths of all the minor ills of childhood have their root in indigestion. There is no medicine for little ones to equal Baby's Own Tablets in relieving this trouble.

They have proved of benefit in thousands of homes. Concerning them Mrs. Jos. Lunette, Immaculate Conception, Que., writes: "My baby was a great sufferer from indigestion, but the Tablets soon set her right, and now I own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont."

Two brothers—call them William and Henry, although being good business men, were absolutely ignorant in so far as book-learning goes, not even being able to tell the time of day, so that a clock being entirely useless to them, was not among their possessions. However, the idea of having a good watch took their fancy, and so one was purchased to be worn jointly and carried by each on alternate weeks. One hot afternoon as they were working the corn, Henry paused and, wiping the moisture from his face, observed: "Wonder what time 'tis." William, whose watch it was to carry the watch, leaned on his hoe handle and, producing the glittering timepiece, held it out toward his brother with a flourish saying, "Wall, thar she be." "Darn if she ain't," replied Henry, whereupon they took their customary glance at the sun and resumed work.

Major-General Sir Lee Stack, governor-general of the Sudan and aide of the Egyptian army, has had a difficult situation to handle the past few weeks, but the iron hand of authority has won out.

TRIALS OF INDIGESTION

Common Errors About This Trouble Into Which People Fall.

Many people so far misunderstand the digestive system as to treat it like a machine; neglecting it until it works sluggishly, then irritating it into work again by the use of purgatives. The stomach needs help at all times, but a study of the process of digestion will show that purgatives, as commonly taken, are seldom necessary and often harmful.

To safeguard your digestion the diet must be controlled. Over-eating is always harmful, but one must assimilate enough food to supply the needs of the blood. Remember, the blood has to carry nourishment to all parts of the body and find fuel for its energy.

Heed when the blood becomes weak and fails to do its work, indigestion arises. Therefore the sure remedy for indigestion is to build up the blood. If you suffer from any form of indigestion choose your diet carefully and take wholesome nourishment. Above all, start building up your blood by taking a course of Dr. Williams' Pink Pills.

Under the influence of the new blood supply, your digestive system will respond naturally, your appetite improve and your food will do you good. So begin to improve your digestion by starting to take Dr. Williams' Pink Pills now.

You get these pills from your druggist or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

What's become of the good old names "Prudence" and "Patience"? "I guess they've changed them to 'Impudence' and 'Impatience'."

Useful Watch. Two brothers—call them William and Henry, although being good business men, were absolutely ignorant in so far as book-learning goes, not even being able to tell the time of day, so that a clock being entirely useless to them, was not among their possessions.

However, the idea of having a good watch took their fancy, and so one was purchased to be worn jointly and carried by each on alternate weeks. One hot afternoon as they were working the corn, Henry paused and, wiping the moisture from his face, observed: "Wonder what time 'tis." William, whose watch it was to carry the watch, leaned on his hoe handle and, producing the glittering timepiece, held it out toward his brother with a flourish saying, "Wall, thar she be." "Darn if she ain't," replied Henry, whereupon they took their customary glance at the sun and resumed work.

Nature's Wonders. Muriel, visiting the country on a May day, came to a pond whose shallows were full of tadpoles—thousands of them floating about in an inch of water.

"Oh," she cried, "see those tadpoles! And just to think that some day every one of the horrid wriggling creatures will hatch into a beautiful butterfly!"

Ancient Indian people of the Valley of Mexico built a mighty stone structure to the gods of their land, centuries before Pharaoh and his slaves built the great pyramids of Egypt. It is said that this great structure has remained silent and buried for nearly 8,000 years.

The effect of athletics on women and girls was the subject of a recent questionnaire in England. It was addressed to those persons who were thought to have special knowledge on the subject, such as physicians, principals of schools and women students. The answers showed a general approval of all games except football, but cautioned girls to be moderate in hockey, swimming, rowing and other sports in which severe competitive effort may produce unusual fatigue or strain.

Longest in the Empire.

It is just over a year since Mr. Massey, Prime Minister of New Zealand, opened at Otrira the longest tunnel in the British Empire.

The Southern Alps, which run from North to South of the South Island, for many years formed an insurmountable barrier to railway travel. Railways had been constructed to the eastern and western slopes of these mountains but the heights themselves had to be crossed by a dangerous coaching-road over Arthur's Pass.

Then, for a long time, engineers belonging to the British Electric Company were hard at work boring a tunnel through this pass, where the mountains rise to a height of 3,000 feet.

The Otrira Tunnel is nearly five and a half miles long, and forms the only direct connecting link between the east and west coasts of South Island. It is now possible to travel from Christchurch in the east of Greymouth on the west coast without any change at all.

Constructed entirely by British workmen, using only British materials, Otrira Tunnel is one mile longer than the Severn Tunnel and is the seventh longest in the world.

The Simplon Tunnel, on the main Paris-Rome railway, is cut through the heart of the Swiss Alps for a distance of 12 1/4 miles, while a huge boring made through the St. Gothard Pass, also in Switzerland, is nearly ten miles in length.

The greatest achievement of this kind in the United States is a four and three-quarter mile tunnel through the Hoosac Mountains in Massachusetts.

The five-mile spiral tunnel in the Canadian Rockies at Kicking Horse Pass is a marvellous piece of engineering.

Pocket Sundials.

It was not uncommon in the days of Queen Elizabeth for men to carry pocket sundials for the purpose of time-telling.

Dials of all kinds were common then, though previous to that time they had been little used in this country. One of the oldest, erected about the time of Edward the Confessor, is still to be seen over the south door of Kirkdale Church, in Yorkshire, England. It bears the inscription: "This is the sun's marker at every hour, and Hayward made me and Brand the priest."

The fashion for dials began to spread until the whole countryside, particularly in the North and in Scotland, was dotted with them. We see them today in interesting forms at St. Andrews, Melville House, Holyrood Castle, Dundas Castle, and many other places which are popular resorts of sightseers to England.

The legends engraved on some of these old dials are very quaint. One, humble in its opinion of itself and mankind, announces: "Shadows we are, like shadows we depart."

In China and Japan small dials made of boxwood are still carried and consulted by their owners.

Deserved to Succeed.

A story that is characteristic of Lord Leverhulme—for has he not himself made good owing to his dogged perseverance?—relates how a certain dogged and persevering commercial traveller worried the manager of a business, in the most praise-worthy way, for an order.

The manager, however, was one of those nasty, soulless creatures, and turned the traveller away every time.

Finally, he went still further and had the poor man thrown out.

The traveller picked up his hat, and also himself, rushed upstairs again, and hailed the manager.

"Look here, sir," he panted, "joking apart, what about that order?"

Plane Photos of Crops. Airplane photographs are being experimented with as an aid in crop reporting.

Brothers of B.C.

"Attempt not to direct a married woman in her house when thou knowest that she is a perfect housewife. Say not to her: 'Where is that (i.e., such-and-such a thing)? Bring it to us'; when she has put the object in its proper place."

This was not written in A.D. 1924, but round 4,000 B.C. It is one of many similar sayings of Egyptian sages that go to prove that the great brotherhood of married men had the same problems and the same tribulations in the days of the Pharaohs as in the days of King George V.

These sayings are contained in the Moral Papyrus, which have been collected by Sir Ernest Wallis Budge, the famous Egyptologist, and are now being published in book form. Other gems from this husbands' "Golden Treasury" are:

"The interfering man only sets confusion in his house."

"If thou wouldst be wise or prosperous, get married."

"Undertake nothing as the result of having drunk beer. For if thou dost, words which can have a second meaning may come forth from thy mouth without thy knowing it. When thou fallest down and breakest thy bones, there will be no one there to put out his hand to help thee. Thy boon companion will stand up and say: 'Away with this drunken beast!'"

Minard's Liniment Relieves Pain.

Nothing Less Than a Million for This Little Girl.

The perfectly absurd inflation of the German currency has been the source of some humor along with a great deal of wretchedness. So the Berlin paper Ullk tells of a little German girl who informed her father that she could count.

"Wonderful!" exclaimed her father. "Begin then!"

"One million, two million, three million," said the child importantly.

Important as it may be to consider what you are making of life, it is no less important to size up just what life is making of you.

If you say nothing, your words cannot be brought into court.

TO EXPECTANT MOTHERS

Letter from Mrs. Ayars Tells How Lydia E. Pinkham's Vegetable Compound Helped Her

Spring Valley, Sask.—"I took the Vegetable Compound before my last confinement, when I got to feeling so badly that I could not sleep nights, my back ached so across my hips, and I could hardly do my work during the day. I never had such an easy confinement and this is my sixth baby. I read about Lydia E. Pinkham's Vegetable Compound in the 'Farmer's Telegram' and wrote you for one of your books. We have no druggist in our town, but I saw your medicine in T. Eaton's catalogue, I am a farmer's wife, so have all kinds of work to do inside and outside the house. My baby is a nice healthy girl, who weighed nine pounds at birth. I am feeling fine after putting in a large garden since baby came. (She is as good as she can be.) Yours is the best medicine for women, and I have told about it and even written to my friends about it."—Mrs. ANNIE E. AYARS, Spring Valley, Sask.

Lydia E. Pinkham's Vegetable Compound is an excellent medicine for expectant mothers, and should be taken during the entire period. It has a general effect to strengthen and tone up the entire system so that it may work in every respect as nature intends. All druggists sell this dependable medicine. Give it a trial.

Keep The Hair Live And Glossy With Cuticura

On retiring, gently rub spots of dandruff and itching with Cuticura Ointment. Next morning shampoo with a suds of Cuticura Soap and hot water. This treatment does much to keep the scalp clean and healthy and promote hair growth.

The Transcript

Published every Thursday morning from The Transcript Building, Main Street, Glencoe, Ontario. Subscription—In Canada, \$2.00 per year; in the United States and other foreign countries, \$2.50 per year.

Advertising.—The Transcript covers a wide section of territory in Western Ontario, and its readers are the leading farmers and townspeople. It is a first-class advertising medium. Rates on application.

Job Printing.—The Jobbing Department has superior equipment for turning out promptly books, pamphlets, circulars, posters, blank forms, programs, cards, envelopes, office and wedding stationery, etc.

A. E. Sutherland, Publisher.

Holidays are over; now for business and preparations for winter.

Another excuse for the man with a stubble beard. The women are monopolizing the barbers' chairs.

Occasionally, on a long trip, you meet the road-hog and the fool driver, but for every one of these you meet one hundred that are kindly, careful and courteous.

The county police announce that they are going to make a cleanup of the bootleggers some time this month. Now the bootlegger should be real thankful for this little tip.

Fashion addicts are always waiting to know "what the Prince is wearing." His Royal Highness will probably be stocking or cutting sunflowers on his ranch, in a khaki shirt and a sombrero, with a red handkerchief around his neck. You may go and do likewise.

Voting on the by-law to provide for remodelling the public school takes place tomorrow from nine until five o'clock at the town hall and public school building. Whatever views the ratepayers have in the matter, they evidently are not talking through a megaphone.

The children are back to school, after their long summer holiday. How much their bright, cheery faces were missed is only fully realized as again they greet us on the streets. Glencoe has a prime lot of youngsters who will be no laggards on the highway to wisdom and successful citizenship. May their best hopes be realized.

There are only three weeks left for making the necessary preparations to ensure the success which should crown an event so important to the town and district as our annual fall fair, and every citizen should unite with the members of the board in their efforts to make this year's exhibition the best yet. The dates are September 24 and 25.

The party of prominent Holland journalists now touring Canada to investigate conditions here and to secure first-hand knowledge of the Dutch settlers through the country, visited Essex county recently. In the vicinity of Wallaceburg they called on several Hollanders who have purchased farms in the last few years and gone extensively into sugar beets as well as general agriculture, and found all their countrymen happy and very prosperous.

The indifference of a large percentage of the people of Canada to-

wards public matters is frequently commented upon. 65 per cent of the eligible vote is regarded as a good showing in provincial and dominion elections. The same indifference obtains in the United States. In that country in 1920, 80 per cent of all eligible voted in the presidential elections; in 1900, 73 per cent. In 1908 the percentage decreased to 66 per cent.; and in 1920 less than 50 per cent of the voters exercised their franchise. In the hope of securing a fuller expression of opinion in the elections this fall the Kiwanis Clubs are commencing a campaign "to urge all citizens to express the desires of the entire people." The campaign has nothing to do with any of the parties. It should result in arousing many influential men and women to a realization of their duties to the State.

FORD'S NEW ORDER

The young man of today will be well advised to know that good business methods have reached that stage in which even the moderate drinker will not be tolerated. That booze can have no place in business is given emphasis in a recent order posted in all the plants, shops and offices of Henry Ford. The motor magnate gives the following notice to all his employees: From this date on, dismissal without opportunity for appeal will be the penalty imposed on any man found to have the odor of beer, wine or other liquor on his breath or to have intoxicants on his person or in his house. The Eighteenth Amendment is part of the fundamental laws of this country. It was meant to be enforced and so far as our organization is concerned it is going to be enforced to the letter.

THE RIGHT VIEWPOINT

Hon. J. S. Martin, Minister of Agriculture, left for Europe a few months ago with the feeling that things in Canada weren't at all promising. He returned with a different viewpoint. "Now," he told a Welland County gathering Tuesday, "I feel after spending these months in the old lands, that Canada has no peer as a land of peace and plenty." Exaggeration, you say. Not at all. We often find ourselves too close to a picture to gain the true perspective. It takes a visit to less favored countries to reveal to us what a great country this Canada of ours really is. We may not be rolling in wealth but we have vast potential resources besides which the vaunted riches of the ancient empires pale into insignificance. But without the human element and work they will be as naught. What is needed now, at this moment, is more of the spirit and determination of our forefathers and less of the flabby "blue ruin" talk. Such talk only destroys our moral fibre. Red blooded Canadians have no use for it. —Hamilton Herald.

FORD FORESIGHT

Henry Ford, passing through St. Catharines on the Welland canal, aboard his yacht, the Silalia, gave a Standard reporter a lengthy interview. Mr. Ford declared that with the incoming population there could be no holding back of Canada. "The time is coming when Canada will no longer import coal from the United States. The white coal age is coming rapidly," he further said.

A PROMISING PLAN

An important contract was signed by Hon. James A. Robb, acting minister of immigration and colonization, whereby the British government undertakes to place 6,000 families, to be approved and selected by Dominion authorities, on Canadian land, and to provide each family with the sum of about \$1,500, repayable in 25 years. Canada, on its part, agrees to assist the newcomers in establishing themselves and to see after their welfare. These British settlers are not to be placed on any particular section of territory, but will be distributed throughout the whole country. The scheme will come into effect in the spring, and it is proposed to bring over three thousand families in the course of next year and the remaining three thousand in the following year. In this way the British government will supply us not merely with the very best possible type of settlers, chosen by ourselves, but will send into this country along with them a sum of about \$4,500,000 to set them on their feet.

AIR LIZZIES, MAYBE

Henry Ford is building an aviation field near his tractor plant at Dearborn, Mich. He will experiment possibly he contemplates producing airplanes by the millions. The time is almost ripe for that. Ford has uncannily far vision in his particular industry. Does he sense that the number of autos in use in America has about reached the saturation point or possible limit—and that the time is ripe for another means of transportation? Primitive man could move about only by his own legs. Then he tamed the horse and camel and elephant to carry him. Next came the steam railroad and electric street car, then the auto. These did not displace the horse, as was the early fear. Time demonstrates that we need as many horses as ever. The job of transportation simply got too big for the horse alone. He needed help.

Similarly, the job is getting too big for the auto. Traffic congestion is becoming unbearably acute in cities, where autos are needed most. The airplane is the logical solution. Its "street" is not curbed by sidewalks and blocks of buildings. Where autos are limited to roads, planes have the entire atmosphere—and many levels. Also no roads to pave and repair.

Found Out

The minister of a certain church called upon a woman, a member of his congregation, and, finding no one at home, slipped a card through the letter-box, after scribbling upon it the words, "Sorry to find you out." When the woman returned home Mary, the maid, met her at the door and presented the card with a whisper. "Here, mum, I took charge of this. It would never do for the master to know the minister's found you out."

An Oil That is Prized Everywhere.—Dr. Thomas' Electric Oil was put upon the market without any flourish over fifty years ago. It was put up to meet the wants of a small section, but as soon as its merits became known it had a whole continent for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

Glencoe Fall Fair, Wednesday and Thursday, September 24 and 25.

BUTTER FOR INTERUSE

How to Make and Pack to Best Advantage

Use Clean, Sweet-flavored Cream—
Coat the Box Inside With Paraffine—
Finish the Package Off Neatly—
Blade Blight of Oats—Honesty Pays.

(Contributed by Ontario Department of Agriculture, Toronto.)

I attended an institute meeting one day and heard one of the speakers close his address with this little verse:

"Good, better, best,
Never let it rest,
Till your good is better,
And your better, best."

It is the very best butter that we can make that must be packed for winter use.

Butter undergoes changes in the keeping, and two things necessary for good results when keeping butter for winter use are best quality of butter and low temperatures for holding.

Use Clean, Sweet Flavored Cream.

Use cream that has a clean, sweet flavor. Churn it at a temperature low enough to bring the butter in nice, firm granules in from 20 to 30 minutes.

If by any chance the butter comes soft, be very careful to get rid of the buttermilk. It will be necessary to wash it with cold water.

Salt the butter in the usual way and work it thoroughly. Should the butter soften during the process of working, put it away in a cool place to become firmer before continuing the working.

As butter keeps best in a solid form, crocks or boxes are used for winter use.

Coat the Boxes Inside With Paraffine.

The boxes have a coating of paraffine on the inside, and it is necessary to line them with heavy parchment paper.

While many people have a 56-lb. box filled for winter, in some cases it would be much better to have it put in two 28-lb. boxes.

The crocks should be in good condition, free from cracks or breaks in the glazing.

When packing the butter, be sure to pack solidly. See that there are no openings in the sides, and that the corners are well filled.

If there is 8 or 10 lbs. of butter in a churning, do not put the whole lump into the crock and then try to pack it down. Rather put it in in pieces, making sure that each piece is solidly packed.

Finish the Package Off Neatly.

Finish the top off evenly, and cover with parchment paper. A thin layer of salt paste may be put over the top and fastened down the lid.

With crocks it will be necessary to tie clean wrapping paper over the top after the lid has been put on. All butter should be stored in a clean, dark place where the air is pure and the temperature is low and even.—Miss Belle Millar, O. A. C. Guelph.

Blade Blight of Oats.

This disease occasionally causes heavy losses in the oat crops of Eastern Canada and Eastern and Central States of America. It attacks also barley, wheat and bluegrass to a limited extent. So says Prof. Dan Jones, Ontario Agricultural College.

It is most noticed in the spring and early summer when causes the young plants to turn yellow, brown and red, withering them up. In the latter part of the season it induces blast in the heads.

Its spread and the amount of damage it causes is largely dependent on weather conditions. The seasons when much rain, cloudiness and foggy weather prevail are the seasons most favorable for its development.

Primary infection is chiefly through the stomata resulting from wetness of the leaves by the rain with the organisms from the soil. Two species of bacteria working together are considered necessary to cause the disease. They are found in the soil. They do not, however, affect the plant through the root.

Little can be done to prevent or control this disease except to select and breed resistant varieties.

Honesty Pays.

The man who aspires to the accomplishment of things worth while in the realm of pedigreed live stock, must realize that his integrity as a breeder will be one of his greatest assets, and he must guard it, as he would his stocks, from foul admixtures. As his herds and flocks increase and his business expands, he must make certain that, at the same time, there grows up a reputation for absolute honesty and fair dealing. Only by the help of these essentials can he expect his business to endure and yield to him satisfaction and profits.

A Song of Good Feed.

A handful of grain walle on pasture May seem like a trifling waste, But the cow will return it all later If given of grain a slight taste.

The stomach of a young calf is very delicate, and changes in feeding must be made slowly. The calf will begin to eat grain and hay when it is about four weeks of age. Shelled corn is about the best grain feed, as it takes the place of cream in the milk.

Poorly-fitting collars are sure to cause sore shoulders. It is a good practice to bathe the shoulders noon and night with cold water. This avoids the chance of blood congestion and is at once soothing and pleasant to the animals.

Growing Up With The Telephone

CHARLES J. LESLIE,
of Toronto.

The celebration in Brantford a few days ago of the 50th anniversary of the birth of the telephone reminded Charles J. Leslie, of Toronto, of an interesting incident in his own career.

As a boy of ten, Charlie Leslie was visiting in Brantford in the autumn of 1876, when Alexander Graham Bell was carrying on his epoch-making experiments. One morning Leslie watched the work of stringing a telephone line from the Bell homestead to the telegraph office. He even volunteered to carry the linemen's tools, and when the railway was reached, he was elected to carry the line through a culvert beneath the rails. When he emerged with the line, Professor Melville Bell, father of the great inventor, showed his appreciation by brushing the dust from young Leslie's clothes.

Perhaps it was as a result of this early experience that Mr. Leslie decided to be a telephone man. He has made the business his lifework. He is now Division Plant Supervisor for the Bell Telephone Company.

WHAT ABOUT BOOTLEGGERS?

According to statistics the ownership of cars in Canada is as follows, showing percentage:

Farmers	37
Salesmen and travelers	16
Businessmen, brokers, etc.	8
Gentlemen of no occupation	7
Laborers	4
Contractors	3
Liverymen	3
Miscellaneous	6

It will be seen that the bootleggers do not appear on the list. Possibly they are disguised as "gentlemen" of no occupation.

STRAY WOLF EXPLAINS

Stray Wolf, an Oklahoma Indian who had become rich in oil, bought an expensive automobile and soon had an accident on the public highway. Limping and somewhat bruised, he came into the local salaroom carrying a pocketful of money. He wanted another car and explained the loss of his original purchase in this way: "Drive out big red car. Buy moonshine. Take drink. Stop on gas. Trees and fence go by. Pretty soon big bridge come down road. Turn out to let bridge go by Bang! Car gone. Gimme 'nother."

PITHY PICKINGS

The greatest buying power in Ontario will this year be found on the farms.—Farmers' Sun.

And women don't find hairpins in hubby's car any more.—Brandon Sun.

The only universal language that seems to have much success is a wink.—Pittsburg Post.

It was not so long ago that the West was a howling wilderness and it is still howling.—Columbia Record.

A good place to go in order to absorb optimism these days is an Ontario farm.—Hamilton Herald.

Everybody wonders what the world is coming to, except those who have hay fever, and they don't care.—Montreal Herald.

Poise is the quality that keeps a small-town man serene the first time he negotiates Main street with a walking stick.—San Francisco Chronicle.

Henry Ford is camping out somewhere in Canada, and he likes the country so well that he may offer to buy it.—Hamilton Herald.

A local wag who always carries a pint bottle says that it is just as easy to get hilarious on water as it is on land.

Another difference between death and taxes is that death is satisfied with one lick at you.

A New Jersey girl is suing a barber for \$500 for a piece of her ear that he clipped off while bobbing her hair. A girl with ears that big ought to be pleased to get them trimmed.

CASTORIA

McAlpine
Grocery

We have a few broken lines
of Shoes to sell at greatly re-
duced prices. Don't miss your
chance if you need shoes.
Now is your opportunity.

Keep your eye on our store
for week-end bargains in
Groceries; also Fresh Fruit
in season.

BRUCE McALPINE

There will be five days of trotting
at the Western Fair—September 8,
9, 10, 11 and 12.

The man who halts on third base
to congratulate himself is not likely
to make a home run.

They don't call locomotive pilots
cow catchers any more. They call
'em Ford catchers.

Mike—Is your brother a musician?
Ike—Is he? Why, at the age of three
he played on the linoleum.

The young fellow who burns the
midnight oil is likely to get further
than the young fellow who burns the
midnight gas.

An agreement between the Canadian and British governments provides for the placing of 6,000 families on farms in Canada in 1925 and 1926. The British government will advance \$1,500 to each family. This means careful selection of settlers and proper guidance upon arrival in Canada.

Twenty-five cents will be the general admission to the grounds for the 1924 Western Fair.

BIBLE THOUGHT
—FOR TODAY—
Bible Thoughts memorized, will prove a
precious heritage in after years.

RESTORE THE ERRING.—Brethren, if a man be overtaken in a fault, ye which are spiritual, restore such an one in the spirit of meekness; considering thyself, lest thou also be tempted.—Galatians 6: 1.

Born

BELL.—In Glencoe, on Sunday, August 31, 1924, to Mr. and Mrs. John Bell, a son.

HAGERTY.—On Friday, August 29, 1924, to Mr. and Mrs. Bert Hagerty, Mosa, a daughter—Doris May.

HOWE.—In Appin, on Thursday, September 2, 1924, to Mr. and Mrs. Al. Howe, a daughter.

MUNROE.—In Mosa, on Saturday, August 30, 1924, to Mr. and Mrs. Neil W. Munroe, a daughter.

In Memoriam

ESSEY.—In loving memory of a loving daughter and sister, Mabel Elizabeth Esseey, who passed away one year ago, September 5, 1923:

In our hearts her memory lingers
As it dawns another year;
In lonely hours of thinking,
Thoughts of her are always dear.

Sadly missed by Father, Mother and Family.

TOWN AND VICINITY

A pessimist is a man who hasn't had a trip into the country lately.

Sunday was reported the hottest day of the year, with the mercury a fraction above 84.

The regular monthly meeting of the town council will be held Thursday evening of this week.

Lightning destroyed the barns and season's crops of Colin Munroe, near Fingal, on Sunday evening.

It is proposed to make the Normal School students' course a two-year instead of a one-year term.

George L. Munro has been promoted to inspector of motors in the Ford factory at Highland Park, Detroit.

Rev. A. S. Whitehall and J. A. McLachlan won second prize in a bowling tournament at Petrolia on Labor Day.

Wednesday afternoon, September 24, will be the last of the weekly half-holidays in Glencoe for this season.

Wm. McCallum has sold the Service Garage to John Kettler, of Metcalfe, who is now conducting the business.

The average number of cars being handled by the Wabash is about 1,000 daily, and the loads represent well over 50 per cent.

Miss Emma Reycraft entertained a number of her friends at a weiner and marshmallow roast at her home on Monday evening.

The 1924 apple crop for Middlesex County will be only 65 per cent. of last year, according to R. A. Finn, district agricultural representative.

J. C. Watterworth reports the largest hen's egg this season. It is the product of a White Leghorn, and measures 3.4 inches by 3.8 inches.

Edward Link, of Leamington, was instantly killed, and S. Hadley, of Chatham, seriously injured when an automobile they were driving near Leamington turned over.

Prior to leaving for Windsor, Miss Jean McLachlan was presented with a beautiful parasol by the members of the Methodist League at their picnic held at Rondeau Park last Wednesday.

An enjoyable social time was spent on Friday evening when a number of young people were entertained by the social committee of the local tennis club at a corn and weiner roast on the tennis grounds.

Howard Gordon has resumed his classes in violin and voice culture at the home of Mrs. Mary McAlpine on Wednesday.

Mr. Gordon has quite recovered his usual good health during the holidays.

The sacrament of the Lord's Supper will be observed in the Presbyterian church next Sunday morning. Preparatory service will be held on Friday evening at 8 o'clock, when Rev. Mr. Bolingbroke, of Newbury, will address the congregation.

The Labor Day celebration at Bothwell was a great success. In the morning street sports were enjoyed, and the afternoon was devoted to races and baseball. Newbury gave Bothwell an 18-3 defeat in baseball. The races were excellent, and were attended by a huge crowd.

James Dymond, of the first concession, Metcalfe, sustained a severe loss by fire when his two barns and contents were completely destroyed Monday night. The buildings and contents are valued at \$4,000, with an insurance of \$1,500. It is thought that the fire was due to the overheating of green oats.

H. J. Jamieson, of Glencoe, is the winner again this year of the prize awarded by the Manufacturers Life Insurance Company to their agent in Western Ontario writing the largest amount of business up to the end of June. The prize is a sixty-dollar club bag. Mr. Jamieson scored 1,210 points. The next highest score was made by Harold Every, of Tilbury, with 751 points.

PERSONAL AND SOCIAL

Miss Ruby Suttler returned to Toronto on Monday.

Dugald W. Munroe left on Monday for a trip to Scotland.

Miss Florence Hurley was home from London for the holiday.

Mr. and Mrs. Joseph Grant spent a few days this week with friends in Buffalo.

Miss Gertrude McGill has returned home after spending her holidays in Detroit.

Mrs. J. B. Gough has returned from a visit with friends in Sarnia and Petrolia.

Miss Christina M. Sutherland is home after spending a year in Des Moines, Iowa.

J. M. Wyatt, of Ottawa, spent a day last week with his sister, Mrs. Savill Simpson.

Mrs. F. E. Lloyd, of Pontiac, has returned home after visiting Mr. and Mrs. W. G. McCallum.

George W. and Noble McCallum are visiting at Niagara Falls, Buffalo and Toronto Exhibition.

Mr. and Mrs. W. T. Jelly and Mr. and Mrs. Chas. Dean spent the holiday in Wallaceburg.

Mr. and Mrs. Ed. Anderson, of Detroit, were week-end guests of Mr. and Mrs. H. J. Jamieson.

Miss Jennie Morrow, of Detroit, has returned home after visiting her uncle, John Beckett, Appin.

Miss Annie McClellan, of Harper Hospital, Detroit, was the guest of Mrs. G. McChurly last week.

Mrs. Chester M. Martin and children, of Detroit, were guests last week of Mr. and Mrs. M. J. McAlpine.

Mr. and Mrs. D. L. Mitchell, of Detroit, spent Labor Day with their parents, Mr. and Mrs. E. F. Reycraft.

Misses Viola and Beryl Payne and Betty Stuart, of Appin, spent the week-end with Mrs. Calvert Reycraft.

Mrs. A. Burchell and son Russell spent a few days this week with her daughter, Mrs. (Rev.) H. K. L. Charlton, Onondaga.

Miss E. McCaig, of London, and Miss McEachern, of Muskogee, Mich., were week-end guests at Mac O. McAlpine's.

Misses Jetta, Jean and Merle Holman and Milton Holman, of Appin, visited Mr. and Mrs. Hugh McTaggart over the week-end.

Mr. and Mrs. M. Hansen, Miss Lillian King and Mr. and Mrs. R. M. Hansen motored from Detroit and spent Labor Day at W. C. King's.

Mrs. George Cushman and two children, Archie and Dorothy, of Stratford, are the guests of her daughter, Mrs. George L. Munro, Detroit.

Mrs. J. M. Beckett has returned home after spending a week in Toronto with Mr. Beckett, who is sales manager for the Suburban Homes Land Co.

Dr. and Miss Evelyn McLachlan were at Tupperville for Labor Day, and were accompanied home by Mrs. James Brown and baby Ruth to spend a week.

Mr. and Mrs. Dan McAlpine, Mrs. Archie Leitch, John McAlpine and Mr. and Mrs. Godfrey McChurly attended the McCallum reunion at Port Stanley last week.

Mr. and Mrs. J. S. McDonald, accompanied by Mrs. Herman Galbraith and Mrs. Den. McAlpine, have returned from a motor trip to Detroit and Windsor.

J. C. Elliott, K.C., who with other members of the Canadian Bar Association has been the guest of the British Bar Association in England, has returned home.

Mr. and Mrs. Hovermell and daughter Betty, of Courtland, and Mr. and Mrs. E. H. Ackert, of Ingersoll, spent the week-end at the home of Mr. and Mrs. Lewis Suttler.

Mrs. John Hayter has returned from a week's visit at Marine City. On returning home she was met by Mr. Hayter at Sarnia, where they spent the week-end with Mr. and Mrs. R. F. Howard.

A. P. Cramp, of Brooklyn, N.Y., is spending a couple of weeks in Glencoe at the home of Mrs. Cramp's father, W. D. Moss, where Mrs. Cramp and little daughter have been visiting for some time.

F. J. Bright, of the editorial staff of the Detroit News and one of the early "grads" of The Transcript office, gave Glencoe friends a call on Tuesday on his way to Toronto to fill an assignment for his paper.

Visitors at the home of G. W. Sutton, for the holiday were Mr. and Mrs. John Sell and Miss Gertrude Sells, of Sheddin; Mr. and Mrs. Ed. Frost and Philip Frost, of St. Thomas; and Mr. and Mrs. Robert Casement, of Windsor.

Mrs. Oxley and daughter Miriam have returned from holidaying at Tollendale Park. During their stay they became much interested in the English game of roque, Miriam winning first prize and Mrs. Oxley second prize in one of the large tournaments.

Holiday visitors at the home of James Gilbert were Mrs. Chas. Colerick and daughter Dorothy, Mrs. Bert Colerick and Miss Ruby Gilbert, of London; Mrs. Fitzsimmons, of Portersburg; and Mr. and Mrs. Harry Harding and Thos. Holland and daughter Laverna, of Thorndale.

Mrs. P. D. McCallum and daughter Audrey, who have been spending the summer with the former's mother, Mrs. Wm. Tait, left last week via the lake route for their home in Regina. They were accompanied by Mrs. W. T. McCallum and son Jack, of Stoney Beach, Sask., who have been visiting her parents, Mr. and Mrs. Duncan Graham, of Wallaceburg.

Walter Steels, signal supervisor for the C.N.R. and Wabash Railway, says that extensive repairs are to be made to the crossing gates at Glencoe, with the possibility of new ones if the proper repairs cannot be effected.

An appeal for some appliances to be attached to motor cars which will limit the speed of such vehicles to 30 or 35 miles an hour was recommended by Senator McCoig in an address before the Chatham Rotary Club. The Senator scored speeding, and maintained that 35 miles an hour was fast enough for any person.

SPECIAL NOTICES

New fall goods. See Mayhew's ad. Niagara peaches and plums arriving daily at W. A. Currie's.

Call at Scott's Shoe Store before buying elsewhere; and see our prices for cash.

Clearing out sale still on at W. A. Currie's. See price cuts marked in store.

Old beef prices at Jelly's. Boils, 6c up; roasts, 12c up. Save your money. Free delivery. Phone orders.

20c trade and 25c cash for eggs, at Mayhew's.

All marketable produce taken at current prices, 30c for fresh eggs—W. A. Currie.

Dances will be held every Saturday night in the pavilion at Wardsville. Music by Melbourne orchestra.

New coats, hats and dresses, novelty trimmings, etc., on display at our opening this week—Mrs. W. A. Currie.

The people are crowding in to take advantage of the clearing-out cut prices at W. A. Currie's.

Ford cars new on display—M. J. McAlpine. Ford service and sales, Glencoe; Galbraith Bros., Ford dealers, Appin.

Upholstering, fine cabinet work, carpenter work, furniture finishing—J. D. Brown, first door north of Transcript office; phone 63.

Lost—At No. 5 tournament, a nurse's gold ring with monogram V.H.T.S. 23. Finder please leave at this office and receive reward.

AUCTION SALES

On east half lot 25, con. S. Euphemia, one mile east of Cairo, Friday September 5th, at 1 o'clock sharp—Farms stock, feed and implements; also some household effects. See bills. Farm is rented, Dugald Smith, proprietor; H. D. McNaughton, auctioneer.

Corn crippled the feet and make walking a torture, yet sure relief in the shape of Holloway's Corn Remover is within reach of all.

The steel superstructure of the new bridge at Beaufort, B.C., which is to replace the destroyed edifice at the famous shrine, has now been completed and it is expected that by next July the exterior of the church will be nearly finished. It is not anticipated, however, that the building will be entirely ready until July, 1926. In the meantime, thousands of pilgrims continue to visit the shrine and several miracles have been recently reported.

Figures issued by the Department of Agriculture for the Province of Quebec show that there has been a marked improvement in the condition of farmers of the province over last year, due to good crops, to such an extent that, instead of distributing grain seeds to the value of over \$125,000 as was the case last year, only \$60,000 worth was necessary to meet this year's requirements. Hon. J. E. Caron, Minister of Agriculture for the province, basing his anticipations on present crop prospects, expects a still further improvement in the near future.

"Never has the opportunity for Canadian business in the Orient been so good as it is today," said Allan Cameron, Oriental Manager of the Canadian Pacific Railway, in Montreal recently. "It is true that the general volume of business in China and Japan is somewhat below normal owing to both local and world conditions but if Canadian manufacturers and producers now fail to make an effort to secure the large share of Oriental trade that would naturally come to them, the opportunity will pass and someone else will get the business."

Following its success at the British Empire Exhibition, the Canadian Pacific Railway is arranging unusually fine displays for fall exhibitions in Canada. At Toronto, the exhibits will include a Northern Ontario hunting scene, having a painted background and sixty by sixteen feet, a feature of which will be moose and deer moving through the forest and an attendant guide a give information to enquirers. A full-sized model of the front of a Canadian Pacific engine and other displays illustrative of the Company's many activities will also be shown in Toronto. Wonderful electrical models depicting Canadian winter sports, round-the-world cruises, etc., are also at Quebec, Sherbrooke, London and North Bay.

It should be an easy matter for you to have from \$5,000 to \$50,000 at 65, according to your earning capacity. Spending all you earn, relying on one day "Striking it rich," can bring only an old age governed by poverty and ruled by dependence.

There is a saner, safer way of ensuring a comfortable income for your declining years. Our booklet, "The Measure of Your Income," will show you how to accomplish this.

Soils and Crops

Address communications to Agronomist, 73 Adelaide St. West, Toronto

WESTERN CANADA TURNS TO CORN.

It was long universally accepted that the area where corn might be raised successfully and profitably stopped long short of the line dividing the United States from Canada.

For years no one dreamed of attempting this crop on a commercial scale in Canada. American experts said it couldn't be done and Canadian farmers believed them.

It has been only of very recent years that the Western Canadian agriculturists, having arrived at that state of development where they were in some need of a fodder crop, began at all seriously to question the infallibility of these theorists. Though corn has been grown on the Western Canadian prairies on a very small scale, it was not until 1919 that a corn crop was considered even as a possibility on the prairies.

The four crop years that have elapsed since that time have wrought something like a revolution in Western Canadian agriculture.

Farmers there had need of such a crop, and were merely waiting for the feasibility of its production to be proved.

Fields of one hundred acres or more of corn are now not unusual in Western Canada, and practically every farm has at least a small acreage under this crop.

In 1923 there were 148,089 acres devoted to corn in the three provinces of Manitoba, Saskatchewan and Alberta, whereas in 1915 there were only 10,168. The annual corn production in the same period has increased from 26,900 tons to 781,800 tons.

The prices received for the 1923 Western Canadian corn crop were \$4.70 a ton in Manitoba, \$5.25 in Saskatchewan and \$3 in Alberta.

In the depressed condition of prices obtainable for farm products in that year these were much lower than in previous years, but even so, in the case of each of the three provinces, the value of an acre of corn was practically double that of an acre of wheat.

In the fall of 1923 the first corn growers' association of Western Canada was formed in Southern Alberta where, on the irrigated lands, an average for fodder corn of fifteen and a half tons to the acre has been achieved

Early in 1923 the Alberta Corn Growers' Association, a provincial organization embracing the entire province, came into being, and this was almost immediately followed by the formation of the Saskatchewan Corn Growers' Association. Steps are being taken at the present time in Manitoba to form a similar association.

Those who said that corn would never be raised north of the international boundary should be interested to learn that the first corn show ever held in Western Canada was at Prince Albert, in Saskatchewan, more than 200 miles north of the line, where just as fine corn was produced and ripened as in Southern Alberta.

The judge of this show, Professor Champlin, of the Saskatchewan Agricultural College, who was formerly at the North Dakota Agricultural College, said: "I once thought that North Dakota was the northern limit of the Corn Belt. This show has shown that excellent corn can be grown several hundred miles farther north than was believed possible twenty years ago. The Yellow Dent that captured the sweepstakes is the equal to any corn of its kind I have ever seen."

In the development of dairying the need for economic silage was very urgent, and the feasibility of corn fodder has brought the dairy industry along in a phenomenal manner.

Formerly there were no silos. Corn has changed that. To-day silos are being erected so extensively and rapidly in this Western territory that one may confidently anticipate the time when one of these will be the natural adjunct of every prairie farm where a few cows are kept.

The Corn Belt has unquestionably shifted north. The year 1923 saw the most pronounced and general acceptance of that fact in Western Canada since the visioning of a broader, more intensive prairie agriculture.

When this triumvirate of Manitoba, Saskatchewan and Alberta, comprising a broad area which it was said would never grow wheat, accounts for wheat harvests of substantially over 400,000,000 bushels, one naturally hesitates to believe the time, especially in light of recent experience, before committing oneself to prophesy on the future of the territory in corn growing.—E. L. Chicanot.

Oddities in Cows and Horses Mouths

BY DR. A. S. ALEXANDER.

A perplexed and agitated lady who had been trying to detect the intentional errors in some prize puzzle asked my assistance.

"I've corrected all of them," she said, "except that plaguery one of the cow's head. For the life of me I can't tell what's wrong with it, unless it be the expression of its contentment—for I never saw a moo-cow show such a hideous grin. Do, please, look at the picture and tell me what is incorrect!"

Well, I did. That alleged cow had a most fearful and wonderfully constructed visage, for the lips gaped apart and disclosed a set of huge incisor teeth in both the upper and the lower jaw.

All you real farmers know that there are no incisor or pincer teeth in the upper jaws of your cow and sheep. They wear eight incisors, the same as we humans. We have four above and four below, but in the ruminant animal all of them are in the lower jaw. A dental pad or cushion of gristle replaces the incisor teeth in the upper jaw. Probably you have noticed that the incisors are somewhat loose, shovel-shaped, and directed forward. That is so they will not injure the dental pad.

The horse, on the contrary, has six rigid upright incisors in both upper and lower jaw, and in the male there is in addition a canine tooth, or tush, on each side, above and below.

Some farmers do not know that a cow's incisor teeth naturally are somewhat loose. I have several times been asked what disease caused the looseness which men have discovered for the first time on examining the mouth of a sick cow. It is also erroneously believed by some men that silage loosens the teeth of cattle or causes them to drop out. Were it so, thousands of silos would not now be benefitting farmers and livestock throughout the land.

The mouth contains some other interesting things. A man whose cow took sick once wrote me that on opening its mouth he noticed a number of slim-necked 'warts' growing from the mucous membrane lining the cheeks.

"Although I snipped all of them off with scissors, she is not a bit better," he said. And no wonder. These were not warts, but fleshy protuberances called papillae placed there by the Creator to help keep the feed in the mouth and between the grinding teeth during mastication of cud. You can also see a single row of very large papillae on the inside of each cheek in line with the grinding surfaces of the molars. The bars or ridges of the hard palate lie in the roof of your cow's mouth have sawlike teeth projecting

backward and provided for the same purpose to detect the papillae.

There are no papillae on a horse's cheeks, and the ridges of his hard palate are smooth. When they swell just behind the upper incisors, the horse-man calls the condition "lambers." Behind the hard palate the soft palate slopes downward and backward like a curtain between the mouth and the vestibule of the throat (pharynx). During the act of swallowing it is raised to permit passage of food. At other times it lies upon the tongue and prevents breathing through the mouth or vomiting.

I know of an ignorant "quack" who mistook the soft palate for an abscess, and made swelling or abscess in the mouth of a horse suffering intensely from sore throat. He punctured it in three places with a red-hot poker. Only by inserting a silver tube in the windpipe was the poor beast kept from dying.

Your cow's tongue is thick and rough, like a coarse rasp, with the points directed backward. The tongue of the horse is quite different, being long, slim, and smooth. The cow curls that rough tongue around tufts of grass when grazing, pulls them between her incisor teeth and dental pad, and then crushes and breaks them off. The horse scoops grain into his mouth with his lips, and nips off grass with his double set of incisors.

Nature has provided different methods of grazing and taking feed into the mouth so that your various animals may subsist in the same pastures. Your sheep nibbles close to the surface of the ground. Its upper lip is cleft, and each section is moved at will when eating grass.

Mr. Hog goes the sheep one better, for he digs under the surface for such things as white grubs (from which, by the way, he contracts his thorn-headed worms) various roots and certain minerals he needs to correct the dyspepsia from which he usually suffers. To prevent hogs from excavating your pastures, you insert rings in the strong nose cartilage, or sever it with nippers made for the purpose. Do you know that the hog's nose also is fitted with a bone called the os rostri, which helps him to root for a living? That is a hidden point the anatomist can disclose. When telling you of it he will likely mention two bones called the ossa cordis, found in the cow's heart and not in that of other animals.

Nature has supplied all sorts of prehensile and accessory organs that every animal might obtain feed. Thus we account for the long neck of the giraffe, the immensely strong trunk of the elephant, the inquisitive, insensitive proboscis of the ant-eater, the fly-

Richard O. Marsh's much-discussed White Indians of Darien. Two of the boys are shown.

catching tongue of the lizard, and the caudal climbing appendage of the monkey. And have you watched how animals masticate feed when they have taken it into the mouth?

"Ow 'e do chew on 'is bit o' meat, don't 'e, Charlie?" said a cockney girl to her beau, as they watched a zoolion eating its Sunday dinner of raw horseflesh, and Charlie answered: "Blime if 'e ain't! 'E's gettin' the full flavor, ye see!"

In the same way every animal chews feed to obtain its relished taste and needed nutrients.

The horse starts eating by giving a side chew to the right or left. He continues the work on the other side of his mouth until the muscles tire and the flow of saliva from the glands is about exhausted. Then the opposite side takes up the process for a similar time, until the feed is fully insalivated, ground, and swallowed. But the grinding is not done between perfectly level molar tables. In the horse the upper jaw is wider than the lower, and the teeth grind in somewhat scissor-like fashion, not completely cross-cutting one another. The result is that sharp points of enamel are left un-

worn next to the cheeks above and the tongue below, and, unless filed off periodically by a veterinarian, seriously interfere with mastication. It takes a horse about one and one-half hours to eat six pounds of dry hay, and more than half an hour to eat the same weight of oats.

In your cow the motions of chewing are more complex, being transverse, longitudinal, vertical, and somewhat rotary. If you watch a llama at meal-time in the zoo or a moving picture, you will be interested to note that the lateral movements of the jaws are regularly alternated from one side to the other.

Old Shep snaps his food, gives it "the once over," chews in all directions, and gulps it down, unless he uses the slower process of cracking and grinding bones with the tremendously strong teeth provided carnivora for the latter purpose. The hog is omnivorous, and combines all methods of mastication.

No doubt you have heard about a horse having "wolf teeth." On looking closely you may perhaps see one in each upper jaw, just in front of the first large grinding tooth. "Wolf teeth" are present in the mouths of comparatively few horses. They are small, insignificant vestiges of the seventh grinder or anterior premolar teeth of the prehistoric horse. They do not weaken the eyes or cause "moon blindness" (periodic or recurrent ophthalmia), although there is an erroneous belief that they do. Neither need they be extracted, unless they happen to interfere with the bit of the over-head check rein of a trotting horse.

The hog is the only domesticated animal still possessed of anterior premolars. They are present at birth as tiny, sharp teeth, and often are nipped

off to prevent them from causing lacerations which may become infected and induce troublesome sores.

While talking about chewing, can you tell how the grinding tables of the molar teeth of the herbivorous animals are kept rough? If smooth, they would not perform their work. You have heard that the "rasher and the upper millstone" in the grist mill have to be chiseled rough now and then to keep them efficient. In an animal the roughening process occurs automatically. The grinding table of the molar tooth is composed of material of different densities interposed or folded alternately into the structure. Of these, enamel contains about 96 per cent. of mineral matter, dentine 76.5 per cent., and cement 67 per cent. Enamel wears away slowly, dentine faster, and cement faster still. Rough ridges are left in the wearing process, and do the work of cutting and grinding feed. In carnivora, where tearing and crushing are requisite, the molars are sharp, pointed, and serrate; in omnivora, whose food is general, the teeth are mixed in character.

As the horse watches you while making some of these examinations, you may be able to see the "soot balls" hanging into the pupil from the inner edge of the iris in his eyes. And if you happen to touch one of those long hairs below the eye, and it causes the horse to wink, you will understand that it is a "tentacle" with a sensitive nerve-ending, and serves to warn the animal of dangerous objects. It acts in exactly the same way as the whiskers on pussy's nose, or those ropes dangling from an overhead beam that warn a brokenman on a box car to duck his head to keep from being struck by a low bridge.

If the horse is old, you will observe that the hair on the temples is gray, as in an aging man, and the depression over each eye is quite deep, unless it has been pumped full of air, a trick the horse "kyp" calls "puffing the gills." The horse also has two false nostrils or pouches of skin overlying the true nostrils. On the floor of each nostril, near the front, is the opening of the tear duct from the eye, which should not be mistaken for an ulcer denoting glanders.

You have of course noticed the "chestnuts," one on each foreleg above the knee, and one on the inner lower face of each hock joint; and the "ergots," or horny spur, that projects from the skin in the "foot lock" of each fetlock joint or ankle, that has derived its name from these locks of hair. These excrescences are considered vestigial hoofs or foot pads of the prehistoric horse. Chestnuts are missing on the hind legs of a jackass and some mules. They are small in the fresh-skinned thoroughbred horse, and the ergots help to protect his fetlock.

Sometimes, after a hard race, they are found bleeding from contact with the tiny, sharp teeth, and often are nipped

James Cassels, who was 102 last March, is Saskatoon's oldest inhabitant. He came from Ireland when he was seven years old, when Toronto had only three grocery stores. Mr. Cassels is shown with his great-granddaughter.

Home Education

"The Child's First School is the Family"—Froebel.

The Rights of Children — By Elsie F. Kartack.

Does the adult arrange his daily life to fit in with that of the child or must the child fit his to the adult's? The following illustrations may serve to show that in some cases, at least, the child is not considered.

A nightly sight from my window is that of little children, in company with their parents, hurried along so fast that their little feet barely touch the ground. And where are they going? To the picture show, of course—an unfit place for a little child. It is generally over-heated or draughty, the air is bad and the music jazy. Most likely the picture is not of the kind that will foster his taste for good. If he falls asleep he escapes the jazz awakening and to be dragged out again in the chill night air. His rest has been broken and his nerves strained.

A little boy, four years old, whose friendship I have won, comes often to the home where I live. His parents are young and sadly lacking in the understanding of children. They expect him to sit perfectly still and let them talk. He has nothing with which to play and besides he is tired as it is long past his bedtime.

"Mother," he finally ventures. No notice is taken of him.

"Mother," this time his voice is raised.

Tests With Winter Crops.

Winter wheat is sure to be one of the best of the cash crops on the Ontario farms in 1924. The yield will be good and the prospective prices are encouraging. There will likely be a very good acreage sown to winter wheat this autumn, so says Dr. C. A. Zavitz of the O.A.C. The results of experiments show that it is important to sow large, plump, sound, well-matured, unsprouted seed, free from smut and impurities, and of the best varieties, if the highest returns are to be secured.

In time for seeding this autumn, valuable material will be sent out from the College to those farmers residing in Ontario who wish to conduct experiments upon their own farms through the medium of the Experimental Station. The material will be supplied, free of charge, to those who wish to conduct the experiments and report the results in the early autumn of 1925. Any Ontario farmer may apply for the material for any one of the following seven experiments:

1. Three choice varieties of winter wheat.
 2. One variety of winter rye and one of winter wheat.
 3. Spring applications of five fertilizers with winter wheat.
 4. Autumn and spring applications of nitrate of soda and common salt with winter wheat.
 5. Winter summer and winter barley.
 6. Hairy vetches and winter rye as fodder crops.
 7. Mixtures of winter rye and hairy vetches for seed production.
- The size of each plot is to be one rod wide by two rods long. Fertilizers to be sent by express for Experiment No. 4 this autumn, and for Experiment No. 3 next spring. All seed will be sent by mail except that for No. 4 which will accompany the fertilizers. The material will be sent out in the order in which the applications are received and as long as the supply lasts.
- Of all the forty varieties of winter wheat which have been tested at the College under uniform conditions in each of the past four years, the highest average yield per acre was produced by the O.A.C. No. 104 variety. This new hybrid wheat will be included this year in Experiment No. 1.

What is the Best Breed?

At this season of the year many people are asking: "What breed shall I keep?"

It is a perfectly natural question and one that sometimes puzzles every poultryman. Since not all persons to whom a beginner might put the question would give him the same answer, it is likely that eventually he will have to answer it for himself. It is important, therefore, that he have some facts on which to base a decision.

It may fairly be assumed that egg yield is the point of most interest, since few hens would be kept if they did not produce eggs. After studying the records of several thousand hens entered in the International Egg Laying Contest, from 1911 to 1919, Dr. L. C. Dunn concludes that the similarity between the chief egg-producing breeds—Plymouth Rocks, Wyandottes, Rhode Island Reds and Leghorns—in the average number of eggs they lay as pullets amounts almost to equality.

Among these four popular breeds there is little choice as egg layers under contest conditions. The decision as to which is best for any poultryman will depend rather on the number of hens to be kept, the market demands with respect to egg color and, last but not least, on the preference of the owner.

All Wool and a Yard Wide.

The value of an article is not in the article itself. It is in the customer's conception of the article. If he doesn't see value, it isn't there, so far as the sale is concerned.

"Keep still," replies his mother. After a little pause, "Mother, I want—"

"I told you to keep still," answers his mother.

A whine from the child is followed by "I'll spank you if you don't keep still."

An impatient surly cry from the child results in a spanking and more noise. His parents and their friends consider him a very naughty child.

I will cite one more instance of injustice to children. Another couple, who have a little girl three or four years old, visit this same home. Unlike the little boy, she has been trained or perhaps cowed into absolute silence. She sits in an erect position in a straight backed chair, until, her senses deadened by the vile tobacco smoke in the room, she falls asleep. Her parents, unmindful of her, play cards and gossip until a late hour. The next day the mother telephones us the usual story.

"I don't know what is the matter with Jane to-day. She seems dull and listless and if anything goes wrong she cries."

If a mother but realized the effect that long, peaceful, regular hours of rest have upon the health and disposition of her child, she would arrange her recreation time to fit in with the little one's waking hours or else sacrifice it entirely.

THE CHILDREN'S HOUR

THE VISIT TO OLD MOTHER COON'S HOUSE.

It was the bright rays of the morning sun as it peeped through the leaves of the trees of the Big Woods that first awakened the three little Woodland boys, Jackie Rabbit, Johnnie Muskrat and Willie Woodchuck. They stretched themselves upon their bed of leaves, gave a big yawn and sat up.

"Where am I?" asked Willie Woodchuck rather sleepily.

"You tell me and I'll tell you," answered Johnnie Muskrat.

"You haven't forgotten that ducking we had last night, have you, Willie?" asked Jackie Rabbit. "I don't believe I shall ever climb on a log again."

"That's right, we did have a cold bath last night," said Willie. "But now that we have learned our lesson I'm hungry. I wish I had some of mother's cakes," he said, rubbing his stomach.

"Such luxuries," said Johnnie Muskrat. "You will probably get more than that when you get home for running away."

"We didn't run away, we just drifted away," corrected Jackie. "But I feel like I would get the spanking all the same. I'm hungry, too, and no porridge in sight."

"I think if we go right in that direction we'll find home," decided Johnnie Muskrat, pointing to the east. "We can find some berries in the woods for breakfast, and maybe we will be home for dinner."

"Maybe-ee-ee," said Willie Woodchuck as they started off through the woods.

Soon they came to a berry patch with just heaps of big fat juicy berries, and the three little Woodland boys ate their fill. But in wandering around the berry patch they soon lost their way. The path in the woods was gone and they were really lost.

It was three weary, hungry and homesick little boys that slowly plodded through the woods, hoping to find something that would tell them the way. Late in the afternoon as Jackie Rabbit was hopping wearily in the lead he spied a path.

"Hip, Hip, Hurrah," he called, as Johnnie Muskrat and Willie Woodchuck ran up very much out of breath.

"But which way shall we go?" asked Johnnie.

"Let's see, the last tracks go this way," said Jackie Rabbit. So off they started to the right.

They walked nearly a mile through the briars and brambles before they came to a little log cottage hidden in the bushes. After many whispered pleadings with the others, Jackie Rabbit summoned courage to knock at the door.

"Hello, boys!" smiled a big motherly Coon as she opened the door. "What can I do for you?"

Her friendly smile gave Jackie more courage and he said, "We are lost and hungry. Can you tell us the way home?"

So in her motherly way, she told them the direction carefully, gave each two sugar cookies and a glass of milk and sent them on their way.

Age and Egg Production.

Though it is well known that pullets lay better than do old hens it is worth while to consider just how rapid is the falling off in egg production as age increases.

From the Missouri Agricultural Experiment Station comes a report based on the study of a good many trap-nest records, showing that egg production during any year is 88 per cent. of the preceding year's production when expressed as the number of eggs for each hen. Some of the hens observed had individual records extending over a period of eight years.

THINGS AS THEY ARE

Are you living to-day or in the past?

We hear much complaint about the affairs of the world as we find them to-day. To hear some people talk they apparently must think that our political life is all corrupt, religion no longer a great influence for good, and business strictly on the blink. They laud the good old days when land and labor were cheap and confidently declare that the automobile has been the ruin of the country. They will tell us the sacredness of the home is in the balance because our women wear short skirts or knickers and bob their hair.

Such people are to be pitied. The attitude they choose to take is both humorous and tragic. They are mentally lazy. Their hindsight is all the sight they have. They refuse to look intelligently at the present or with confidence into the future. The reason we hear so much about "those good old days," is because we have lived through them and understand them. Especially do we remember the good things about them. It takes little mental effort to see what has been. If those same conditions were with us now we would know just what would be best to do. We could quickly become rich.

It is not given to us humans, however, to control time. We cannot go back and live the years over. Neither can we go ahead and foretell what the future holds. But we are always sure of the present day. It is the only day that is really worth anything to us and it is always full of opportunity. It is the man who lives his life to the fullest each day as he comes to it that gets the most out of life and that gives us the most to others.

The business man who does not grapple with conditions as they present themselves each day soon goes by the board; the best preachers we ever knew found a way to apply their truths to present day life; farmers today who cannot or will not apply up-to-date methods and practices are doomed.

In spite of high taxes and bobbed hair, the country we live in to-day is the richest, the happiest, and the freest of any major country on earth. There is more real life to be found in a good Canadian summer day than some of our forefathers knew in a month. Opportunities in business, in industry or in agriculture are the greatest to-day that any normal period in the world's history has witnessed. Grasping them requires but the application of sound sense and energy to things as they are.

A Good Melon Test.

I have heard so many people exclaim, on my being able to pick out a ripe watermelon by simply thumping or snapping upon its surface. However, it is not so hard, and absolutely nothing mysterious about it. A green melon has a very hollow, loud sound, while his ripe neighbor gives forth a flat dead sound when his sides are thumped.

To make certain that the melon is well ripened, hold said melon balanced on one hand, and rap sharply with the knuckles of your hand. If it is nice and ripe it will quiver and tremble, while if green it will have a tendency to roll on or remain as a stone. No shaking will be felt.

To be sure you know just what I mean by a flat, dead sound, just lean over (drawing up the toes so as to stretch the side leather where it touches the foot. A flat dead sound without any carrying power will result.

Have you ever had any trouble reselling to any parties who have bought melons of you? Quite often one poor melon will kill your come-back trade.

One thing a good melon overlook. The person buying will ask, "Is it ripe?" I say, "If it isn't you tell me. I consider no melon sold until it satisfies the consumer."

I never plug a melon I sell. A man would rather cut into his own melon first.

I have people walk right past the other fellow's stand and ask me if I have any of those good melons.

Very many have told me that they have bought so many green melons that they wouldn't buy any more. But, "Guaranteed satisfaction or money back" fetches 'em and—they come back.—J. O. Roberts.

POULTRY.

When the men haul in the alfalfa there will be large quantities of shattered leaves on the racks, and after the mow is emptied the floor will be found covered with them. In the bottom of the cow mangers often there will be a half foot of leaves. All these should be saved to feed the hens, as they are ideal for green. They can be steamed or may be mixed with the mash. Hot water poured over them and allowed to stand for a time, closed, will make them soft and green and the hens will relish them and give eggs for them. If you have no chance to get alfalfa leaves thus, you may cut very young sweet clover or white clover and dry, and it will answer about as well. The lawn clippings from a white clover lawn should be saved.

Actions Tell.

The real way to honor the flag is to obey the laws that are passed under its shadow.

Smart New Fall Goods - Low Priced

Every Item New, Fresh, Advance Fall Styles

The New Fall Materials are a revelation, as so many New Fabrics have made their appearance this season, among them Flamingo, Vela Suede and Chev-o-sheen. The colors feature many New Lighter Shades.

SPECIAL

E. A. MAYHEW & CO.

What were the eight woes which Christ denounced against the scribes and Pharisees?—Matt. 23: 13-29.

WARDSVILLE

Wellington Walton, who has been managing the Central Garage at Glencoe for the past five years, is at present holidaying here, prior to his departure for Windsor, where he has secured a lucrative position. The "Duke" has a host of friends around here as he is a real mixer and a good sport. Everybody wishes him the best of luck in his new home.

The Wardsville girls' soft-ball club played the Walkers girls' team at Walkers on Wednesday afternoon. The score was 10-9 in favor of the latter. It was one of the fastest, snappiest and cleanest games of soft-ball played this season. At the close of the game Mrs. Stewart McCallum served a nice lunch to the players of both teams.

Hugh Lamont and C. Bilton were home from Detroit for the week-end. W. Alchison, of London, is visiting his sister, Miss Margaret Alchison.

Ethridge Purdy, of Ford, is visiting at Chas. Palmer's.

Harry Gies, of Detroit, is visiting at Don Reid's.

Alban Sheppard, of St. Louis, Mo., spent the week-end at J. V. Faulds'. Miss Ida Wilson, of Detroit, is visiting her grandfather, J. Wilson.

Mr. and Mrs. E. Purdy and children, of Windsor, were visiting in the village for the week-end.

Miss Ava Weer spent last week with her cousin at Knappdale.

Albert Constant, of Windsor, spent a few days in the village.

Allan Spence, of Detroit, spent the week-end with his sister, Mrs. F. Radcliffe.

Audrey Willis has returned home after a week's visit with relatives in London.

Mr. and Mrs. C. Harold, of Orion, Mich., were visiting relatives in the village last week.

Wm. Tomlin and Carlisle Bilton, of Detroit, spent Sunday at the home of J. Bilton.

Allan Henderson spent Sunday with his mother, Mrs. Wm. Henderson.

Mr. and Mrs. T. H. Weer and family spent Sunday with relatives at Knappdale.

Joe Guest, of Detroit, called on friends in the village Monday.

Rev. R. J. Murphy spent last week at his old home in Alliston.

A number from the village attended the races in Bothwell on Labor Day.

Notice.—Monuments, in Scotch and Canadian granites; inscriptions engraved at your cemetery a specialty.—Wardsville Granite & Marble Works; Chas. Mimma, proprietor.

MODEL CENTRE

Visitors at Fred McGill's during the week-end were Mr. and Mrs. Walter Morrison, Mr. and Mrs. Tucker and Miss Anna and George McGill, all of Detroit.

Mr. and Mrs. Jack Spackman, of London, spent Sunday at D. A. Graham's.

Mrs. Lorne Armstrong and children, of Blytheswood, have returned home after visiting her brothers, Archie and Hector McCallum.

Arthur Mud is attending Toronto Exhibition.

Wm. Woods spent a few days in Detroit this week.

A number from here attended the soft-ball tournament at No. 5 on Friday, August 29. Three games were played by the Heartbreakers boys, and they lost only the last one by one point.

NORTH EKFRID

North Ekfrid baseball team played the Carleton Place team at Glen Oak field day picnic. Score in favor of North Ekfrid, 12-11, our team receiving the prize of \$5.

Mrs. Will Clark and little son, of London, are the guests of her parents, Mr. and Mrs. Henry Roemmel, Jr.

We are pleased to learn that Henry Roemmel, Jr., is recovering from his illness.

A large number from here attended the field day picnic at Glen Oak on Thursday last.

The Ladies' Aid of North Ekfrid church had a quilting in the school house last Wednesday afternoon with a large attendance. The young people played ball, and lunch was served on the lawn.

Mrs. Ernie Irwin, of Ridgeway, is the guest of her mother, Mrs. Adam Roemmel.

Norman Storing, of Detroit, is calling on friends in this vicinity.

Mr. and Mrs. Joseph Blackmore and family are leaving the farm and moving to Mount Brydges.

Mr. and Mrs. Stanley Ramey, of Toledo, accompanied by Mrs. Catherine Bowers, of Defiance, Ohio, motor-ed to Niagara Falls and called on relatives here on their return home.

North Ekfrid soft-ball team defeated the Mount Carmel team at Glen Oak field day picnic, 27-19.

North Ekfrid received the prize, a soft-ball, Arthur Hardy, of Windsor, is calling on friends in this vicinity.

Mr. and Mrs. Richard Nicholls, of Windsor, spent the week-end with Mr. and Mrs. Chas. Roemmel.

Mr. and Mrs. Alfred Webber and the Misses Webber, accompanied by Miss Klemm, all of Newark, motored here last week and are holidaying with Mr. and Mrs. Will Webber.

North Ekfrid soft-ball team played Appin team Friday afternoon. Score was 14-13, in favor of Appin.

Miss Irene Ramey is holidaying in Toledo.

Mr. and Mrs. Roy Pettit and Geo. Pettit motored from Detroit and spent the week-end with Mr. and Mrs. Henry Pettit.

RIVERSIDE

Anniversary services were conducted in the Presbyterian church here on Sunday by Rev. Mr. Carr, of West Lorne, with a good attendance in spite of the threatening weather.

The choir rendered special music at both services and were assisted in the evening by Mrs. (Rev.) Colling, of Melbourne, who rendered a beautiful solo.

Mrs. Stephens, of Detroit, is spending a few days with friends here, and Jean, who has been spending the vacation with Mr. and Mrs. Wm. Graham, will return to Detroit with her.

Miss Ethel Mullins, of Cayuga, is here to take up her duties again as teacher at S. S. No. 1, Ekfrid.

Mr. and Mrs. Donald McGugan spent a few days with friends in Windsor.

Threshing is the order of the day in this vicinity and crops are turning out extra good.

CAIRO

Mrs. Jack Baird and son Maurice have returned to their home in Windsor.

Miss Beatrice Prangley is spending this week at Toronto Exhibition.

Mr. and Mrs. Chas. Dalster, of Detroit, motored over and spent the week-end with her sisters, Mrs. R. Longley and Mrs. Fred Burr.

Mrs. Robert Huffman has returned home after visiting her mother, Mrs. Carter, in Walkerville.

Quite a few attended the races in Bothwell Labor Day.

Mr. and Mrs. Roy Downie spent Sunday with Mr. and Mrs. R. Hands. Glad to say that Fred Burr has recovered from his attack of quinsy.

MELBOURNE

Melbourne, Sept. 1.—A. D. Brown has purchased a 100-acre farm from Mr. Warren Lockwood, of St. Thomas. Mr. Lockwood has purchased a house in the village from Mr. Brown.

Mrs. (Dr.) Dewar and daughter are visiting Toronto friends.

Mr. and Mrs. Leo Campbell are visiting with the former's parents, Mr. and Mrs. R. E. Campbell.

Mrs. Dan Campbell and Miss Dorothy are holidaying at Windsor, the guests of Mrs. T. Pool.

Dr. and Mrs. Howells are visiting their daughter at Kingsville.

Mr. and Mrs. Norman Brown, of Dutton, have sold their business and are moving to this village soon.

Mr. and Mrs. Drinkwater and family, of Toronto, are the guests of Mr. and Mrs. McDougall.

Miss Marion Campbell and Miss Dorothy Hiscoc have returned home from a visit at Walkers.

Rev. J. M. and Mrs. Colling have returned home after a three weeks' vacation in London, St. Thomas, Aylmer and Toronto.

Mrs. John Lee is visiting Toronto friends.

Rev. Maxwell Parr and wife, of Tilbury, are visiting friends here.

The W.M.S. of the Presbyterian church met at the manse to celebrate the 60th birthday of the society. About forty members were present.

Mrs. Oliver gave a talk on her experiences in the West.

Mrs. Archie Carruthers, of Windsor, is the guest of her mother here.

Misses Mildred and Muriel Richards have returned from a vacation with their brother in Banff. They also visited at the coast.

Mrs. Squire, sr., has returned from a six weeks' visit with her daughters at Oil City and Sarnia.

Miss K. Lee is holidaying with her relatives here.

Rev. Mr. Motyer, of Appin, will preach in the Methodist church here next Sunday morning. Mrs. Anna Beckett, of Detroit, will sing.

Mothers can easily know when their children are troubled with worms, and they lose no time in applying a reliable remedy—Mother Graves' Worm Exterminator.

WOODGREEN

School has opened, with large attendance. The teacher is Mrs. Pad-dick.

Mrs. George Harvey is visiting in St. Thomas.

Miss Florence Simpson, of Windsor, spent the week-end at her home here.

The Woodgreen soft-ball team took part in the tournament at S. S. No. 5 on Friday afternoon. Woodgreen vs. No. 5, 42-11; Woodgreen vs. Appin, 16-10, both games in favor of our team.

Woodgreen girls won first prize in the tournament, a ball and bat.

A number from here attended the races at Bothwell Monday.

Woodgreen girls played Cheerio girls a game of soft-ball last Tuesday. Score 16-10, in favor of Woodgreen.

A large number attended the corn roast at Fred Squire's in honor of his daughter, Mrs. Russell Clannahan, prior to her leaving for her home in Detroit. A good time was enjoyed by all.

Glycerine Mixture for Gas on Stomach

Simple glycerine, buckthorn bark, etc., as mixed in Adlerika, helps any case gas on the stomach in TEN minutes.

Most medicines act only on lower bowel but Adlerika acts on BOTH upper and lower bowel and removes all gasses and poisons. Brings out matter you never thought was in your system. Excellent for obstinate constipation. Guards against appendicitis. H. I. Johnston, Druggist.

APPIN

James Barney, of Strathroy, spent the holidays with his niece, Mrs. J. H. Jeffrey.

Evan McMaster, of Detroit, spent a few days last week at his home here.

Mr. and Mrs. R. J. Martin, of Detroit, spent the week-end with Mrs. Martin's parents, Mr. and Mrs. W. J. Farrell.

Mrs. Orville Hathaway and daughter, Mrs. Hugh Cavan, and children spent a day last week with Mr. and Mrs. Geo. Tuffin, Riverside.

Miss Jessie Jeffrey has returned from Detroit, after a three weeks' visit with her sister, Mrs. Boyce.

Mr. and Mrs. Tucker and George and Annabelle McGill, of Detroit, motored over and spent the week-end at George McGill's.

Hugh Cavan spent the week-end with his father-in-law, O. Hathaway, and returned to Sarnia on Monday accompanied by his wife and family who have been spending two weeks with her parents.

MOSA

The No. 9 W. I. held their monthly meeting at the home of Mrs. A. B. McLachlin on August 28th. There were present 22 members and 20 visitors. Collection, \$5.80; members' fees, 75c; cook books, \$1.50; total, \$8.05. After the business part of the meeting Mrs. J. A. Gillies gave a demonstration on how to slip rose bushes. The following program was then given:—Paper on "Perseverance," by Jean McEachren, read by Mrs. McEachren; vocal solos by Miss Agnes McEachren, Mrs. A. Douglas, Miss Isabel McAlpine of Shields and Miss Phemie Mitchell of Chatham; instrumental solos by Mrs. Doug. Munro and Miss Jessie Mitchell. The meeting then closed in the usual way and lunch was served by the hostess. The next meeting will be held at the home of Mrs. Archie Burke on Thursday, October 2nd.

Mrs. D. J. Mitchell is visiting with friends in Detroit.

Messrs. Sander and Leroy and son Allan and Mrs. Crawford, of Detroit, spent the week-end at M. A. McIntyre's.

Mr. and Mrs. Dan Secord and little son and George Secord, of Detroit, spent the week-end with friends in this vicinity.

Mr. and Mrs. Alex. Clements and little daughter spent Sunday at Mrs. Mary McLean's.

No Rest With Asthma...Asthma usually attacks at night, the one time when rest is needed most. Hence the loss of strength, the nervous debility, the loss of flesh, and other evils which must be expected unless relief is secured. Fortunately relief is possible. Dr. J. D. Kellogg's Asthma Remedy has proved its merits through years of service. A trial will surely convince you.

WALKERS

Misses Dorothy Hiscoc and Marion Campbell, of Melbourne, were recent visitors at the home of the former's sister, Mrs. R. Collier.

Mrs. Nancy McGregor, of Detroit, visited friends here one day last week.

Miss Catherine Campbell, of Inwood, visited her cousin, Mrs. Marian Walker, recently.

Mr. and Mrs. John McFarlane and son Dan and Mack Munroe, of Detroit, called at James Walker's while on a motor trip to Toronto, Buffalo and New York.

A large crowd attended the soft-ball game which was played between Wardsville and our girls here Wednesday evening. The game was fast and interesting. Score 11-9, in favor of Walkers.

Mr. and Mrs. Donald Galbraith motored to Blenheim one day last week and visited with friends there.

Mr. and Mrs. Dan Secord and son, of Detroit, called at James Walker's Saturday.

Miss Myrtle McMillan, of London, is visiting at Stewart McCallum's.

STRATHBURN

Mrs. Ossey Gray, of Sault Ste. Marie, is visiting her parents, Mr. and Mrs. Ren. Siddall.

Mr. and Mrs. Dobson and Mr. and Mrs. Jones motored from Detroit and spent the week-end at Dugald McIntyre's.

Mrs. Fleming, of St. Thomas, is visiting friends here.

Mr. and Mrs. Thos. Dykes and friends, of Aldborough, left this week on a motor trip to Niagara Falls.

We are pleased to hear that Mrs. J. Lethbridge is improving nicely after her operation.

Over 2,600 cars passed through here on Saturday and over 2,600 on Sunday.

Mrs. Chas. Simpson, of Windsor, is visiting her sons and friends.

Stanley Hyndman and D. H. McRae, who have been in Detroit for some time, are attending Westervelt school, London.

An Oil for All Men.—The sailor, the soldier, the fisherman, the lumberman, the out-door laborer and all who are exposed to injury and the elements will find in Dr. Thomas' Electric Oil a true and faithful friend.

To ease pain, relieve colds, dress wounds, subdue lumbago and overcome rheumatism, it is excellent. Therefore, it should have a place in all home medicines and be amongst those taken on a journey.

KILMARTIN

Mr. and Mrs. Jack Dorney and daughter Patricia have returned to their home in Milwaukee, after spending the week-end with Mr. and Mrs. Alex. Dewar.

Master Lloyd D. Mitchell has returned to his home in Brooke after spending some time with his grandparents, Mr. and Mrs. Alex. Dewar.

Will Moore, of Windsor, spent the week-end at his home here.

Miss Edna McKellar has returned to Detroit after spending her holidays with her parents, Mr. and Mrs. Neil McKellar.

The school teachers of this section have gone to their respective schools.

Miss Margaret Little to Toronto, Miss Elsie Leitch to Sombra, Miss Beatrice McAlpine to McKay's Corners, Miss Malcolmina Munroe to Windsor and Miss Mary McNaughton to Chatham.

Mr. and Mrs. Alex. Moore have returned to Detroit after spending their holidays with his mother, Mrs. Joseph Moore.

Rev. Mr. Bowen, of the Bible Society, will occupy the pulpit in Burns' church next Sunday morning.

On Thursday afternoon the friends and neighbors of Miss Mae Moore gathered at the home of her mother, Mrs. Joseph Moore, and showered her with many varied and useful presents. After a dainty lunch was served the gathering dispersed by singing "For She's a Jolly Good Fellow."

George Secord, of Detroit, motored up and spent the holiday here.

A soft-ball tournament was held here on Saturday, which resulted as follows:—No. 9 and locals; score 11-2 in favor of locals; Napier and Walkers girls, score 26-13 in favor of the latter; Appin and No. 5 Ekfrid boys, score 26-19 in favor of Appin; No. 5 and Kilmartin girls, score 18-4 in favor of Kilmartin. The play-off games resulted as follows:—Appin and Kilmartin boys, tie; Walkers and Kilmartin girls, score 14-6 in favor of Walkers.

The 33rd annual picnic of Burns' church was held at McAlpine's grove on Labor Day. The weather was ideal and the crowd was large. Receipts were \$260. Dinner was served at 2 o'clock. A good program was given afterwards, consisting of solos, recitations and speeches. Rev. Dr. Robertson ably filled the chair.

Sports for old and young were then enjoyed. The committee wish to thank all those who took part in the program and the ball teams for their help in making the picnic a grand success.

Will Woods and daughter Eileen have returned home after visiting in Detroit.

Miss Marion McNaughton, of Carleton Place, is visiting here.

Mr. and Mrs. Neil McLarty and family, of Walkerville, and Mrs. Johnston, of Bothwell, were visitors at A. L. Munro's last Friday.

Miss Joanna Munro, of Windsor, spent Labor Day at her home here.

CHEERIO NOTES

On Tuesday evening, August 26th, the members of the Cheerio Club held their regular meeting at the home of W. Reyecraft. The president, Miss Agnes McEachren, had charge of the meeting and the following program was given: Solos by Walter Walker, Sid Hartley and Gladys Bechill; readings by Helen McCutcheon and Mary Dodge; violin solo, Della Squire; Live Wire, Agnes McEachren. Contests and community singing were enjoyed by all. A dainty lunch was served by the hostess.

The next meeting of the club will be held at the home of Isaac Walker, the program to be in charge of Marvin Waterworth and Helen Gillies.

On Thursday evening the Cheerio girls defeated the No. 9 girls in a game of soft-ball; score, 28-13.

On Friday afternoon the Kilmartin girls defeated the Cheerio girls at No. 5 tournament.

At the same place the Cheerio boys defeated the Tall's Corners boys 8-3, and defeated the Heartbreakers 3-2, winning first prize, a soft-ball and bat.

Miller's Worm Powders do not need the after-help of castor oil or any purgative to complete their thoroughness, because they are thorough in themselves. One dose of them, and they will be found palatable by all children, will end the worm trouble by making the stomach and bowels untenable to the parasites. And not only this, but the powders will be certain to exert most beneficial influences in the digestive organs.

A Faithful Servitor

The teacher wanted some plums in order to give an object lesson during school hours, and, calling one of the small boys, she gave him ten cents and dispatched him to the fruit stand down on the corner.

"Before you buy the plums, Willie," she cautioned, "you had better pinch one or two to make sure they are ripe."

Little Willie flitted away. Soon he came back and smilingly put the bag on the teacher's desk.

"Oh, thank you, Willie," said the teacher, taking up the bag. "Did you pinch one or two as I told you to do?"

"Did I?" was the gleeful response. "I pinched the whole bagful and here's your ten cents."

Fletcher's CASTORIA

MOTHER! Fletcher's Castoria is a harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, prepared to relieve Infants in arms and Children all ages of

Constipation Wind Colic
