Results Placarded. The results were placarded as received on broad colored muslins hangrom the cellings. Blue was used for the bylaws carried and black for he defeat of the bylaws.

Peterboro was heard from by o'clock, and the first comers feared vote at Owen Sound. Until the assurance that Owen Sound would remain dry was received the tension repressed rejoicing over the series of minor repeal contest victories, and the news that Acton had gone back to license made the situation look rather gloomy just before Owen Sound was heard from.

Encouraging Result. F. S. Spence said that the adoption of local option by 133 majority in excess of the three-fifths majority in Sarnia, in Hon. W. J. Hanna's home town, was one of the most significant and encouraging results from the

NO SPECIAL MEETING TO CONSIDER REPORT ON PLANT

Most of the Members of Council Speak Against Controller Foster's Motion Regarding Filtration Plant's Condition, Characterizing Request as a Want of Confidence Motion -Vote to Force Controller's Hand.

"Unlimited gall." "Playing to the gal'ery." "A direct insult to his worship," and cries of "No! No!" greet ed Controller Foster's request, seconded by Ald. Yeomans, which in reality was a vote of want of confidence in Mayor Hocken under the guise of a resolution asking the mayor to call a special meeting of the new board of control for the purpose of dealing with Commissioner Harris' report on the filtration plant.

"Unlimited gall." "Playing to the a quest'on as this." said the mayor, "but there have been many reports current, which I know nothing about, and this motion seems to be directed at me. Personally I don't want the old counc'l to pass this vote of want of confidence in me, and have it placed in the minutes of council at its last meeting.

Ready for Service.

"I never felt more ready for service to the city than I do at th's mo-

control for the purpose of dealing with Commissioner Harris' report, on the filtration plant.

At the commencement of yesterday's council mesting, Controller Foster fired his much-heralded bombshell at the mayor, which, much to the former's chagrin, refused to explode. The little attention paid to it by the rest of the council members did not improve matters for the economical controller, who had as much as said that he was actuated by reports which had no virtuous origin.

He commenced by asking the mayor what information he had regarding the report. This elicited the reply that his worship had heard from Commissioner Harris that more water was leaking from the filtration plant than was estimated in the county judge's report, and he (the mayor) suggested to the commissioner of works that a private investigation should be held. As to the results of this investigation, he knew no more than the questioner, and was waiting for the report to arrive.

This apparantly did not satisfy the controller, who effected, just what he had so severely criticised while on the hustings, namely, a "saw off" with Ald. Yeomans, who seconded his freak motion for a similar action on the controller's part.

"I never felt more ready for service to the city than I do at the smorting into the work this year full of bope. I never had more confidence in a board of control than I have in the newly into the work this year full of hope. I not the work this year full of hope. I not the work this year full of hope. controller's part.

Wouldn't Withdraw.

The mayor rose to read the motion which inferred that he was withholding the information, but suggested that it was a knock at himself. "Withdraw it?" asked some of the aldermen. The controller reddened a little, but stack

to his guns.

"This is a direct insult to yourself and to the city as a whole," declared Ald. Anderson with some heat. "Why should the controller be allowed to hold a club over your head. Council possesses confidence in oyu, as you have always don: the square thing. This motion suggests that you are afraid to do your duty. We know different, and I would ask the controller to withdraw it."

After the business for the day had been transacted encomiums for the retired, forced and voluntary, were in order, and many were the good things sa.d. Controller Church started the "ball a-rolling" by moving that Messrs. Maguire, Graham, Austin, Yeomans and Saunderson be presented with an illuminated address conveying council's appreciation of services rendered. The loquacious Sam rather overdid things, by saying too much. He was not only content with speaking of the good points in the records of the exmembers, but wound up his peroration by giving himself a little puff on his alleged relations with the press, but was good enough to add that the lack of support from the source which he personally spurned, was the cause of the other fellow's defeat. He inferred that he is the only man in Toronto that can afford to follow the policy adopted by Sam McBride.

to go elsewhere."

Civic Abattoir. Controller Foster started a lengthy argument on the progress of the civic battoir, and said that this was a sample of what an American expert will do. He accused Mr. Perrin of having did not comply with the local building Brigadier-General Drury was on a bylaw, and he could not be eventually supplied with a copy, because only one existed. Therefore, the plans had to be changed, and Mr. Perrin left plans for the excavations in the city when he departed for the old country. "He

Statistics show a loss of 10.000 fived a year in railroad accidents in the United States. It is a tremendous and inexcusable waste.

But in the City of New York alone tuberculosis slays its 10,000 each year. The total of its toll thruout the nation is many times greater.

Most railroad fatalities are classed as preventable. Practically all tubercu-losis fatalities come under this head. There is not much that the general public can do to prevent railroad accidents. The general public can do s great deal to prevent tuberculosis.— Cleveland Plain Dealer.

Law a Game of Skill

So long as the present system of technicalities, hair-splitting discussion of immaterial points, and the general turning of litigation into a game of skill rather than an inquisition into facts for the sake of justice, continues, there will be no reform, says The Milwaukee Sentinel. We might profitably borrow the expeditious methods of Canada and of England in legal procedure, especially in regard to the present farcical methods of selecting a jury on the apparent basis that qualifications for that duty involve complete ignorance of everything that has happened in the county for several years.

The good work of Addison kept Parkdale from scoring, while Torontos got thru for two goals.
Gordon Meeking was easily the best man on the ice, but little Barlett, the Parkdale royer, was giving him a chase for it at all times.

A Nice Forward Line.

Barlett, Evans and Edwards had it over the biack and with forward line for the first thirty minutes, and the play was at Torontos' end for the bigger part of the half. Jack Brown at right for Torontos was checked hard and often during this period, and was looked after so well that he did not show up effectively. Edwards and Barlett used their bodies and sticks with a will, and when the T. R. and A. A. line did get. working they failed to go far. Code and Lawson were like a stone wall, and the man checked lost his balance nine times out of ten. Moag in goal was overshadowed by Addison, and it was due to this that Torontos ran up the score after half-time.

Horsfield, the former Barrie boy, was a hard little worker, and will improve. He went on the ice with only two practices under his beit. Torontos had the combination game, and this is what they have been dead to them, and Torontos came back told on them, and Torontos came back to their feet towards the end.

DUKE OF CONNAUGHT STEEPLECHASE CUP

Ottawa Will Have Richest Cross-Country Race on the Continent.

OTTAWA. Ont., Jan. 6.—Ottawa is to have the biggest steeplechase in America according to directors of the Connaught Park Jockey Club. It will probably be known as the Duke of Connaught Steeplechase, and carry a trophy, either in the form of a cup or plate, with it. It will also have a handsome purse, and the added money will make it the richest cross-tountry event on the continent. The Ottawa track is rounding into shape n'cely, and should be one of the best in Canada. Its location is unrivaled, while the grand stand, stables and other equipment are declared to be the best in Canada by representative horsemen. The stabling capacity has been largely increased from the original plan.

they might regain prestige.

The sinking fund has nothing to do with a war scare, for the International League has no reason just now to claim equality with the big leagues in the matter of attendance. There may be only a slight difference in the playing standard of the majors and in the Class AA leagues, but the financial backing and the population of the big leagues changes the entire situation.

The elevation of Jack Johnson to the championship undoubtedly set the game back considerably, but now, by the action of Johnson and the extraordinary ability shown by McCarty, the colored man, in the eyes of the fight followers, and the game should enjoy a boom, or a new lease of life.

Negotiations for a fight between Jack Johnson and Bombardier Wells in France next summer are under way. R. C. Jenkins, representing Johnson in England, received a cable despatch recently from the big nergo to the effect that a letter had been mailed to Jenkins authorizing him to sign articles of agreement. The French promoters who staged the Klaus-Carpentier fight last fall are prepared to pull off the proposed Johnson-Wells affair either in Paris or at Dieppe during Grand Prix week. Wells, according to an English paper, is ready to sign articles as soon as Johnson's agent hears from the discredited champion. Johnson and Wells were matched to fight in London a year ago, but the authorities interfered. It is believed that Wells, if he can secure a match with Luther McCarty in Callifornia or New York, will decide to back out of the affair with Johnson.

About 15 annual meetings of different associations are slated for the week. On Feb. 4 the Sherman anti-trust law and held that, following associations will meet: Ontario Registration.

The name adopted was suggested by tario Plowman's. Ontario Registration of the Sherman law was contained for the Controverted Elections A and applications under the Controverted Elections A and applications are commodities such as articles of clothance and applications are commodities and applications are commodities and applications and applications are commodities and applications Sherman anti-trust law and held that, as far as the Sherman law was concerned, the indictment in the New York federal court of James A. Pat-

sent back for trial or other proceedings.

Justice Vandeventer announced the opinion of the court. Justice Lurton delivered a dissenting opinion in which Chief Justice White and Justice Holmes concurred. The majority of the court held that the circuit court for Southern New York had decided that the indictment charged a "withholding" of the cotton from the market, a necessary element of a corner as admitted by the government. The minority held that the circuit court found the indictment did not so charge and for that reason the indictment was faulty.

Can Stop Price Inflation.

According to all the justices, the correctness of the holding of the circuit court as to the indictment charging a "withholding" and as to the sufficiency of the indictment on other technical points had to be accepted at this time without question by the supreme court supreme court.
The points thus left undecided today

may be made the basis for bringing the case to the court again, if the de-fendants are convicted on trial. Solicitor-General Bullitt, who presented the government's side of the case to the court, issued a statement after the decision in which he said that at last a way had been found to stop the running up of prices by men who sought to corner the market, not only of cotton, but of wheat, corn, lard and other commodities.

Great Collections in American Libraries

Modern Tendency in Library Making Is to Concentrate on Some Particular Field.

One of the world's best collections of books on Turkey and the Balkan states is in an American library. It is the famous Riant collection now in the Harvard University library, and is interestingly described in a bulletin just issued by the United States bureau of education. It was acquired by Harvard in 1899, and has since been add d to, until today the section on the Ottoman empire comprises about 4000 volumes. American libraries have a very large

Gaby, herself, is an agile dancer, and with Harry Pilcer, she gaby-glided with an ease, abandon and grace that warranted every praise. But the chief support of the production was Al Jolson, without whom gate receipts would not be overly large. This black-faced comedian has been seen and appreciated before on many occasions, and more laurels many occasions, and more laurels were heaped upon him last night. It is he who is responsible for most of the fun.

Montreal is said to have given the production a rather frigid reception. This cannot be said of Toronto. Enterore were plentiful thruout, these going principally to Miss Deslys and all Jolson.

"The Traveling Salesman" tells a story of a good-natured commercial traveler stranded on Christmas Day in a small town in the middle west. The circumscribed horizon which is presented to him as a place to spend his holiday, probably accounts for the minute interest he takes in things focally, among them being a plot to defraud a preity girl of some land showns. This plot he defeats, repulses the men who engineered it and wins the girl for his own.

It is a story true to life, and between the numerous laughs that the play contains are bits of pathos to add variety to a most interesting performance.

She was passing the Hyeres Islands when the steam collector pipe of one of the boilers burst. The warship was immediately stopped and the engine room staff rushed to the stokehold, where they found a petty officer, six stokers and an artificer lying on the floor dead. The ship put back and

landed the bodies. The cause of the accident has no yet been ascertained, but it has occasioned great surprise among the na-val authorities, as the steam piping renewed two years ago, and was tho-

roly tested last year.

An officer of the Massena says that immediately after the explosion men from the stokehold rushed on deck, but there was no panic, altho at first it was feared that the explosion might pouring in great clouds.

As soon as possible ambulance asest only to a specialist or technical sistance entered the compartment where the accident had occurred, and Everybody's Cyclopedia is beyond wrapped the eight scalded bodies in doubt the most useful set of books on wadding and placed them on gratings earth. It is fully illustrated with which were hoisted to the decks. The port admiral has ordered an en into the cause of the accident, which did considerable damage in the stokehold.

CAUSES OF CRIME.

Rev. Dr. Chambers, jall warden, read a paper on causes of crime, be-fore the Methodist Ministerial Association yesterday. He considered intemperance the chief cause with men, and feeble mentality a potent factor in the case of women.

The Yorkshire Nightingale. It is nearly two years since Enos Bacon, an ordained local preacher among the Primitive Methodists of England, visited Toronto on his way from Australia, and preached and sang at the Elm Street Methodist Church. At that time he promised the pastor and people to make them a return visit in the near future, which promise will be kept. Mr. Bacon, "the Yorkshire Nightingale," was the musical sensation at the great C. E. convention last year at Atlantic City, and is on his way to Los Angeles to will spend the week in Toronto. Liverpool Cattle Market.

LIVERPOOL, Jan. 6.—John Rogers & Co. cable that there was good demand for cattle at Birkenhead today, and ample supplies on the market to meet the needs of buyers. Quotations remain steady and unchanged, at 12c to 131/2c per pound for the present the steers.

CHICAGO GOSSIP.

Neill, Beatty & Co. had the following Neill, Beatty & Co. had the following.
Wheat.—There was at least the merit of good activity in wheat today, and, along with it a demonstration of considerable strength, with prices well advanced at times, altho the close was not around top figures. Offerings were light at the times, aitho the close was not around top figures. Offerings were light at the opening, and advance easily established, but later there was influential selling by local leaders, one individual trader putting, perhaps, three-quarters of a million bushels on the market well over 32 cents. Almost regardless of the current news, it may be stated that there is more confident feeling among buyers, especially on reactions. The weather the statement of the city is 82,979. The population as returned by the assessors in 1913 is 410,063, while last year it was 374,369. A large number of dwellings were erected during the past year, totaling are expenditure of over \$15,000,000. It is represented as follows:

The following table shows the figures free. Day and Night Sessions.

Wheat—The strength in the market to-day seems largely based upon apprehension of possible damage to the growing crop from the expected cold wave in the southwest.

Corn—The advance in price will, in our opinion, stimulate country deliveries, and cur advices indicate that a slight increase in bids in lowa will loosen up much corn.

future. As usual, speculators here tagged along in the wake of the London crowd, and a good deal of buying for investment account was explained for investment account was explained in that way. The net advance in the shares for the day amounted to 1 3-8 points, with the dealings running into greater volume than for some time.

The general list in the Toronto stock market showed a good deal of resiliency, and several marked advances plainly evidenced the continued sustained demand. The most important feature of the session was the movement in some of the preferred issues, brought about, of course, by investment buying. This was hailed as a very favorable indication as evidencing the confidence of investors in the Canadian situation, and, more particularly still, because the usual the Canadian situation, and, more par-ticularly still, because the usual "spring rise" in the market is gener-ally preceded by a period of purchase for investment account. The issues prominent in that respect yesterday were the preference shares of F. N. Burt, Monarch and Russell Motor, all of which improved their position. Russell preferred reached par, and Russell preferred reached par, and Burt preferred at 105 1-4 stood at its highest since November. Monarch preferred gained 2 1-2 points to 96½. The more speculative issues were dull in the extreme, but, on the whole, dull in the extreme, but, on the whole, gave a remarkable exhibition of firmness in view of the abrupt decline in Wall street. Consumers' Gas gained a point to 189 1-2, Locomotive was up 2 at 62, Tooke reached a new high record at 59, a gain of 2 points, and such issues as Canners and General Electric were firm. Optimism Regarding Peace Outlook Has Favorable Effect on Sentiment-Stocks Steady.

LONDON, Jan. 6.—Repayments to were steady and slightly higher. Discounts were easy. Most of the \$5,000,000 new gold offered in the open market is expected to go to the Bank

of England.
Optimism regarding the peace conference held the stock market steady, but business was quiet. Gilt-edged securities and home rails were marksecurities and home rails were marked up in anticipation of the reinvestment of dividends, and Paris buying advanced Peruvians and Rio Tintos.

Turkish bonds gained a point.

American securities opened steady.

Most of the list advanced early on fair buying, which advanced Union Pacific over a point. Prices eased off in cific over a point. Prices eased off in the afternoon, but New York buying hardened values in the late trading and made the closing steady.

U. S. FAILURES WERE LARGEST IN 20 YEARS DULUTH SUPERIOR

In the number of defaults the failure exhibit for the United States for 1912, as reported by R. G. Dun & Co., is especially remarkable. There were 15,452 failures during the year, which, 15.452 failures during the year, which, with one exception, is the largest number recorded since 1893; the exception was in 1908, following the panic of 1907, when there were 15,690 defaults. During 1912 there were about 2000 more failures then in the about 2000 more failures than in the receding year.

TTON REPORT DUE LATER IN THE WEEK

Neill, Beatty & Co. had the following weekly cotton review: With the usual end-of-the-year dulness in cotton extending into the beginning of the new year, there is little, if any, news to attract outside trade to the news to attract outside trade to the future markets. The stock of raw material abroad is large and export business from now on will be watched very closely. Foreign manufacturers demand may not be as keen as prices beyond this level. The ginning report be issued on the 9th inst, will be awaited with interest.

UNION PACIFIC LEADER STANDARD OIL "BOOM" IS UNDER WAY AGAIN IN BREAK AT NEW YORK

the "Subs" on the New York Curb of Late.

What seems to be in effect a revival of the recent "boom" in the Standard Oil stocks is now under way on the New York Curb. It will be remembered that last fall somebody pricked the oil bubbs, and prices dropped back rapidly when profit-taking sales came into play, During the last month a remarkable recovery has been under way, and the day-to-day advances which are being made rival the sensational spurts of last spring and summer.

Brazilian stood at the highest record attained since the memorable semipanic in the Canadian stock exchanges on Oct. 11 last. The shares were in active demand thruout, with the inspiration for the movement again coming from London, where optimism was general owing to the belief that the peace negotiations would be brought to a successful conclusion in the near future. As usual, speculators here specified in the spiration of the make of the Longola and summer.

Last, Friday, for instance, the "subs' went soaring, and before the close advances of \$50 a share were shown in Swan and Finch, \$100 in Continental Oil, \$3 in Standard Oil of California, and \$8 in the New Jersey Company. Brokers report that the demand for the oil stocks is increasing steadily, and in some quarters it is being whispered that the present movement will carry prices up beyond the top levels of the book days of 1912.

The following table shows some of the more extensive advances of late:
