ONE CLAUSE IS PASSED AND COMMITTEE RISES

OTTAWA, March 15 .- (Special.) -After a parliamentary battle, involving a ontinuous session of 17 hours, unexampled so far as private bills are concerned, the government to-day was forced to compromise on the St. Lawence Power Transmission Company

it may not pass this session.

Why the government should throw all its weight in support of a measure posed by the hydro-electric commis-n of Ontario, the Montreal harbor, municipal and commercial interests, and one or two members within its wn party, is a matter of much specu lation, and why also the government should allow its chief whip. Laurier Calls Down Pardee and Pugsley

OTTAWA, March 15 .- (Special).-It is stated to-night by several members, principally from Quebec, who resent being dragged into this St. Lawrence Power fight, that Sir Wilfrid Laurier is wrathful over the attitude towards it which the Liberal party has been forced into

When he arrived at the house to-day he sent for Hon. William Pugsley and F. F. Pardee, the chief whip.

The former he condemned for taking the leadership of house out of Mr. Fielding's hands, who had shown an inclination to adjourn the debate last night, and the latter he told plainly that, as Liberal whip, he should not have mixed up with such a bill.

HAMILTON, March 15.—(Special.)—In addressing the Adult Bible Class Federation in Knox Church this even-In addressing the Adult Bible Class Federation in Knox Church this evening, Rev. J. S. Woodsworth, Winnipeg, said that all many of the foreigners in the west knew about their responsibility as voters was that, if they cast their ballots "right," it meant a bottle of whiskey for them. It was time, he said, that the church people left their prayer meeting to prevent a whole race from being debauched by politicians to attain their ends. In a recent election in Winnipeg, 260 kegs of beer were delivered to the foreigners on two streets. Other speakers were: Rev. E. Wesley Halpenny, Rev. E. A. Mitchell, Mrs. Adam Turnbull, Dr. F. C. Stephenson, Toronto. D. A. Souter brought in the report on organization, and the following officers were elected: Rev. D. H. Wing, president; W. J. Cunningham, vice-president; J. S. OBITUARY.

Mrs. Thomas Blakey.

An old and highly respected resident of Toronto passed away in the person of Mary Ann Beatty Blakey, wife of Thomas Blakey, at her home, 317 Ontario-street, on Monday last, after a short-illness. Deceased, who was 74 years of age, was born in the North of Ireland, but came to Toronto over 60 years ago, Her golden wedding was celebrated about three years ago, and her surviving children are James and Wilkiam Blakey, Mrs. Joseph Anscomb and Mary Ann, the youngest daughter, at home. Deceased was one of the oldest members of St. James' congregation, and will be interred in St, James' Cemetery on Thursday afternoon.

Business Men Think Attempt at Reprisals Will Mean More Industries Here.

That the imposition of the United States maximum tariff against Canada will not injure Canadian manufacturers, and that it will probably tend towards a big increase in European trade seems to be the consensus of opinion shared by prominent To-ronto wholesalers, interviewed by The

"This increase of tariff will result in the immediate construction of many American factories thruout Canada." said a leading wholesale grocer.
"The higher you build up the tariff wall between the two countries," he re-marked, "the greater will be the influx of American industries into this country. I do not think that the grocery trade will be affected in any market degree, for it will be the American manufacturers who will suffer, and not the Canadian. MEDIATION IS ACCEPTED

Firemen Will Not Have to Resort to Extreme Measures.

CHICAGO, Ill., March 15.-Danger an immediate strike of 27,000 loco tive firemen on western railroads, and the contingent throwing out of em ployment of more than 125,000 othe employes, was averted to-day by cepting proposals of mediation thru the federal authorities at Washington. At the request of the general mana gers of the 47 western roads involved, Chairman Martin A. Knapp of the interstate commerce commission, and Commissioner of Labor Neill, tele graphed an offer of federal mediation to the union officers. This offer was accepted, W. S. Carter, president of the Brotherhood of Locomotive Fireand Engineers, stipulating, ever, that action must begin without

The appeal to Washington was taken as an eleventh hour move to prevent a walkout, which it was declared, threatened the greatest railroad strike since that of 1894.

Thirty-seven members of the western federated board of the brotherhood last nidnight formally voted for a strike. The hour for striking had been set for next Monday morning, and the members were prepared to start for their homes to put the strike into action, when the mediation steps were

Looking for Assistance. NEW YORK, March 15,—Grand Master W. G. Lee, of the Brotherhood of Railway Trainmen, received to-day telegram from the leaders of the Fire men's Union in Chicago, asking if the Trainmen's Union would stand by the firemen in their projected strike in the west. Mr. Lee has sent no reply, but his associates said that Mr. Lee felt that the Trainmen's Union had their hands full in the east at present.

Another Strike in Sight. NEW HAVEN, Conn., Marih 15 .- Unable to receive a satisfactory answer to their demands from the officers of the New York, New Haven and Hartforl Railroad Company, the order to begin to-night a poll of conductors, trainmen and yardmen of the system on the question of a strike to enforce the demands was issued this noon from this city. The order is in the form of a memorandum.

The Why of the Easter Season

When they first escaped from their gloomy Winter quarters in the Spring, our dim and distant Saxon ancestors began it, they say, by a feast and gift-giving of barbaric splendor.

Very little different is our Easter celebration. Everyone is full of the spirit of Spring, of returning life, quite aside from the religious beauty and meaning which we love to attach to the great awakening season of the new year.

And how better express one's joy, then, in making someone else happier by a loving remembrance, a little gift or message, particularly to the children? Steeplechase Jockey A. (Buster) Davidson, who rode for the late Col. Neville, has arrived and will remain for the opening at Pimlico. He states that 15 horses will be raced by and under the name of the Neville estates this year by Henry Craven, Mr. Neville's old trainer.

A. Allen, who trains for W. M. Kerr, who races under the assumed name of Mr. McMurtrie, came over from Philadelphia yesterday. He will ship 12 head of fencers here for the meeting during the latter part of the month. Allen reports that Steeplechase Jockey Eric Savage, who was injured at Pimlico last fall, will not be able to ride this year.

Jockey J. Gravey, a crack seeeplechase jockey from Erin's Isle; coming from County Cork, where he rode for several years, is now at Pimlico galloping horses for Trainer Boyle. He can ride at 138, and will ride as a freelance. Garvey says that the jumps here are nothing to those on the "other side," and that he could ride a bleycle over the Pimlico field.

CITY EXPERTS

In the desire to get expert advice Toronto suffers from credulity. What is needed in the first place is expert advice on experts. So far the city's experience has not been of an encouraging character. City Engineer Rust ought to be able to do the work he is entrusted with, but the city government has not sufficient confidence in one to show him how.

There have been several experts brought into Toronto in recent years, tinue to pay out so much money for so and the results have not been such as little return. to justify Mr. Rust's selection. Hour Session of Parliament.

OTTAWA, March 15.—After a continuous session, the sitting of parliament, which began at 8 o'clock Monday night, was concluded at 3.45 this afternoon. The protracted discussion was the result of the endeavors of the opposition to secure from the government certain plans in regard to the application of the St. Lawrence Power Transmission Company for right-of-way and privileges. The plans Hon, Mr. Pugsley admitted having, but he did not wish to make them public. And so they talked, and talked, and talked, all the night thru, as predicted in The World's despatches this morning. A similar session occurred during the marine department debate, a couple of sessions since, and, before that, during the famous remedial bill discussions of the nineties.

The statement is made that Hon. L. P. Brodeur has left the house for good and that by mid-summer, if his health recovers, he will go to the supreme court bench, replacing Justice Girouard, whose superannation can be accomplished all right early the coming summer.

party stepped ashore they found that the "American gentleman's clothes," for which he had wfeed ahead, were missing. Thru some mishap the glad sarments had falled to arrive at Khartoum.

Thus it happened that Mr. Roose, welt was compelled to enter the city and greet his wife in his well-worn, not to say dirty, khaki hunting continue. As he stepped ashore at the head of his party Mr. Roosevelt was a picturesque isglit—picturesque in a way, perhaps, that he did not entirely relish. Despite the strenuous scrubbing and brushing to which they had been subjected after the disappointment at Stanley's Tree, his flamed shirt still displayed vivid spots of blood, while his helmet and leggings looked much the worse for having been daubed with many different kinds of mid-African jungle mud.

A huge American flag flaunted its gay colors to the breeze as the Dal moved down the stream thru a lane of small, ships. There were, however, only as few spectators on the embankment and there wis particularly of the opposition seemed to be to get Mr. Pusible wishers and proposition device upon Mr. Lennox and Dr. Sprouid-space and there was precised by the hone. Save Children's Eyes By Hygienic Methods

Dr. Luther H. Gulick Speaks to Local

"Our present day learning is tied up with little blood marks on paper, where the children's eyes have been almost ruined by modern school methods. The defects in the vision of our children are steadily increasing. This is one of the burdens of civil!zation, and to combat this is the duty of both teachers and members of the various boards of education, or school trustees. They should have trained experts in this branch to visit all classes, and regularly examine the pupils for defects of this nature. It is essential that all children should have the greatest of care given to their eyes, for if they should be affected, it not only makes them backward in their studies, but also seriously handi-

caps them in their battles with life."
These words were spoken by Dr.
Luther F. Gulick, who addressed the
local council of women in the Margaret Eaton School of Expression yesterday, afternoon, on the subject of modern

Great importance should be attached the books given to the pupils, the speaker said. All lines should be the same width apart, while the type should be of uniform size. It should not be a case of the cost to provide proper readers that must be considered by the trustees. They should be governed by the fact that it is their duty to see the pupils receive a proper education, without being affected the slightest during their school career.

Dr. Gulick also bore out Inspector Hughes' statement regarding the substitution of blue boards for black-boards in an indirect way. He deplored the strong contrasts of black and white in the various school rooms, and suggested that special attention be paid to the color effects to avoid

doing serious injury to the eyes.
When the eye was developing little or no use was required for short focus but during the present day a large portion of the children's time was spent in school rooms, using the eyes at short focus all the time. It was therefore imperative that children should have the best possible care givn to their eyes.

Another reason given for the preval-

nce of glasses among the school children was the dust that accumulates on schoolroom floors. This is impossible to eliminate, unless the latest improved methods of cleaning floors White charmeuse gown : chiffon in are used. Great numbers of cold and grip germs are bred there. that convert the mob of human beings into a moral and highly civilized community. A man or woman who goes against custom is cutting away from the rest of humanity. This not only applies to dress, but to commercial and social life as well. Now fashion is rapidly undergoing a change in ventilation, pure air and other sanitary conditions, and soon we will see the peo ple living in a great deal better manner than at present. To-day the athletic girl is our ideal of womanhood, while but fifty years ago she was supposed to avoid all such games as she now indulges in. So the case is with sanitary conditions. What would do for the people half a century ago would not be tolerated now. The ideals of the people are growing better and with the growth better care is taken of the body and more attention paid to hy-glenic conditions."

This was a statement made by Dr. Sullek in an address to the Teachers' Association last night in Association Hall on the influence of ideals and fashion on the people. The care of the oody, the speaker said, had been espe dally developed within the past ears, and with this great attention had been given to proper ventilation; Personal cleanliness had also been given a great deal of consideration, and the result would be better developed and healthier people. It was now the custom to give the school children lessons in taking care of the body, to teach them the value of physical exercise and fresh air. The school teachers were important factors in forwarding the movement of personal cleanliness They could impress upon the children the necessity of keeping their bodies clean and free from disease. With an area of over 260,000 square miles, a population approaching three millions, and with at least ten thoueducation. Ontario could not but burst the narrow swaddling-bands of the one university in one place idea. Germany—the advance-guard of all the nations in education—with an area considerably less than that of Ontario, has 21 universities, well dispersed thruout its domains; with, it is said, an average of about 1500 students each. New Zealand, with an area of about 100,000 square miles, and a population of less than a million, has one university with four well distributed branches; all the teaching being done at the branches, the principal insti-tution being an examining body only. Things have, therefore, come to such a pass that something must be done; the single question is: What is the best remedy? Surely it will be found in the opening of the doors of the Western University, wide enough to take in as many as now over-crowd

If Queen's Was Closed. What evidence that the situation can be so relieved? Ample and cogent. 'confusion worse confounded.' the doors of the Western, as wide as those of Queen's, and the relief must be greater than Queen's affords, because the Western supplies more students than the east. Editor World: This case of slipsho English made in The World of March 12, illustrates the wonderful analytical mind of Snerlock Holmes; it is seldom his resource and wide fund of informs tion have been displayed to better advantage. It arose from the accusation made against the deputy minister of mines by some unknown, alleging the use of "slipshod English in his report." Sherlock Holmes was employed by the defence. It is one of the cases peculiarly enjoyed by that genius, in which his great powers were employed to

protect the innocent.

The great detective was found seated in his dressing gown in an atmog-phere reeking with tobacco smoke. On having a copy of the paper presented to him, he first of all read it carefully and then, acting on a favorite axiom of his which I have often heard him expound, viz., that the class of men he has to deal with are fortunately not usually accurate and generally do not take the pains to look into details carefully, he called for a copy of the report of the bureau of mines in ques-

On the corpus delicti being forthcom. ing, he at once lit a fresh cigar and turned to page 12, from which a quota-tion is given as to the number of men employed in the silver mines of Cobalt." That quotation was given correctly; Holmes, however, with his wonderful acumen, said: "As this matter refers to accidents, I will look up "Accidents' in the index." Turning over the pages he rapidly found on page 298 "Accidents," "See Mining Accidents." With his long, swift fingers he flew over the pages to 306, where Mining Accidents, Cobalt, p. 94," ap-

Like a hound now in full sight of the quarry he doubled back to p. 94, where he found the following: "Cobalt and the mines in the vicinity of Cobalt and Kerr Lakes. At the mines and prospects in the Cobalt area proper were employed on an average during 1908 from 3500 to 4000 men, working

above and below ground. The number of accidents reported from the Cobalt mines in 1908 was 23, resulting in 21 men killed and nine injured. The gendealt with in another part of this re-Holmes scrutinized rapidly pages 54 and following. "The list of detailed

accidents takes in properties of all kinds," said he, "not only silver mines." I think I have often stated that this great man, when not employing his leisure time on chemistry, reveled in the higher mathematics which he would apply to cases. Nothing gave ifm greater delight than the us higher mathematics in his work as detective. His face radiated intelligence as he said: "To obtain the rate per thousand, the problem is either to vide 21 by 3 1-2 or 4, or else take the of Cobalt and mines of all kinds elsewhere. A pyrites mine or a gold mine cannot be classified as a silver mine." said he, "altho a silver mine may be a gold brick or controlled by pirates." "I thought so," said Holmes, as he leaned back and puffed out a cloud of smoke, "my dear Watson, I believe this case would not have given any trouble even to you." Conan Doyle.

SILVER MARKET

Generally Unsettled as a Result of Increase in Indian Export Duty.

Samuel Montagu & Co. write under date March 3: On Friday, just too late for last week's letter, news was received from India that an import duty of 4 annas an ounce was imposed in lieu of 5 per cent. as heretofore, that is, an increase of about 10% per cent.

Thanks to the exceptionally adroit manner in which the official secret had been kept, the information came as a bolt from the blue, and had a stuna bolt from the blue, and had a stun-ning effect on the market.

Any material setback in the price which might take place has a corresponding effect on Chinese trade, for the lower silver falls, the larger bounty it places on Chinese export trade; and the larger the Chinese exports, the

sequative demand; the other mining stocks were quiet, with no changes of importance.

There was little doing in the higher priced section of the list, such transactions as were made being of such narrow volume as to require no special comment.

The market closed on the easy side, but with trading sentiment of a generally satisfactory character.

PORCUPINE CITY TOWNSITE

LOTS FOR SALE

The Natural Townsite of the Porcupine District,
both as to summer and winter routes, is beautifully situated overlooking
Porcupine Lake, being the old Indian camping ground for the district.

Its natural advantages are best evidenced by the locating of the following important interests on this site:
PORCUPINE POST-OFFICE, Shuniah Hotel Co., first-class hotel, now
open, 40 rooms; Traders Bank; Bank of Ottawa; Revillion Freres, general
merchants; James Bay Hardware Co.; Carter and Wright, drug store;
Christakos Bros., general merchants; Turner and Ferriers, general merchants; Dr. McLaren's Hospital; Sims Hotel, good accommodation, and
others.

others.

Its central location on the northwest end of Porcupine Lake, and the high, level ground on which it stands, make PORCUPINE CITY the only suitable townsite in the district.

Roads to all properties lead from here.

sionals were against the market. The setback in wheat to-day was only natural, but the news is still of too bad a character to make short sales safe.

Corn-Market opened fractionally lower, and ruled lower all day. A big short interest has been covered on the three-cent advance, and market lacked support from that kind of buying. We think corn is on the downward track again.

Oats-Prices were lower with other grains; cash and commission houses were sellers, and professionals were also on that side. Buying was to cover shorts and on scale orders.

Dr. McLaughlin's Electric Belt

You will never know what a grand power electricity is until you feel its genial, glowing warmth penetrating every vital part of your body from my Electric Belt.

You know how easily electricity runs street cars, makes plants grow without sun or soil, purifies filthy water and transforms night into day at the will of man, but I can't make you believe it will renew the vigor of youth until you feel it dancing through your veins and carry, ing to every organ of your body the "fire of life."

Pick out the men who have worn my Belt. See them with head erect, chest expanded, the glow of health in their cheeks, courage in their hearts, and a clasp of the hand that tells you. "I am a man." Mr. Samuel J. Harnett, North Gower, Ont., says:—"I received a Belt from you some four years ago, and I wish to say that it was all it was represented to be, having cured me of Indigestion and other allments, and I now feel like a new man, giving all the credit to your Belt. Anyone giving it a good trial, I know, will feet as I do."

Makes Some Admissions to Account for Differences.

OTTAWA, March 15.- At the sitting of the Lumsden Investigation Committee this morning, Mr. Lumsden told of making his estimates of the cost of the National Transcontinental Railway to

he government. His estimates, he said, were largely compiled from reports of various district engineers. Every year he made a report to the commissioners. The first estimates were based upon the preliminary lines, but the final location of the road revealed quantities entirely different from the preliminary

lines. Even after the final revised location there were frequent changes made and Mr. Lumsden admitted that might be the occasion for certain discrepan-

cles for the original figures.

Mr. Lumsden stated that an arrangement had been made with regard to this train haul after the first estimates, but he would not say that this item amounted to a million dollars on district "B." or a million and a half on district "F." as was suggested by Mr. Smith. At any rate this circumstance might easily account for an increase. The matter of over break, or other differences.
