The Saddest Ceremeny of All.
CLARKE'S CROSSING, N.W.T., April 27. -Yesterday was a sad experience for our troops, as the remains of several brave boys were borne to their last resting places near the scene of the battle at Fish creek. They were Private Hutchinson, of of No. 1 Co., 90th regiment; Private Ferguson, the same; Private Ennis, of No. 4 Co., 90th; and Gunner Demonilly, of A battery, Quebec. Poor Arthur Watson, of the Toronto School of Infantry, died while the Toronto School of Infantry, died while the obsequies of his companions were taking place. D'Arcy Baker has since died. The roll call was a melancholy spectacle and many a half-suppressed "too bad, poor fellow" could be heard as the report was announced "dead," "seriously wounded," or "wounded." No clergyman was present with the force, so that the funeral services had to be read by officers. It was a solemn and impressive ceremony for all that and brave read by officers. It was a solemn and impressive ceremony for all that and brave men who had stood all the hardships of the march unflinchingly, who hadstood motionless as the rebel bullets whizzed past them, whose nerves had remained braced even as those poor fellows who were now being laid to rest fell mortally shot, gave way and tears coursed down their bronzed faces in streams. It was a sight that no man of the whole force will ever forget. Major-Gen. Middleton conducted the ceremony in person and was evidently deeply affected. He has been kindness and gentleness personified ever since the engagement, constantly visiting the wounded and expressing earnest hopes for their recovery. To the men he has been won derfully considerate and forbearing. Rough monuments were erected around the graves to show where the bodies were interred, and to whom they belonged.

A courier from the camp reports the death of Gunner Armsworth, of "A" battery, who was wounded in Friday's fight, making a total of nine. Lieut. Swinford is better to-night, but the doctors say he will hardly recover. This morning the

CLARKE'S CROSSING, N.W.T., April 27.

—It is still in doubt if Gabriel Dumont was really killed, as reported. The greater part of the evidence, however, appears to be that he was not. Certain it is that his body was not found in the ravine when the search was made.

Only two corpses were found and they were both of Indians. No less than fifty-five horses were discovered mowed to death. Blood abounded and there is every indication that if the rebel dead are not many the wounded were at least numerous, some arms were found, but they were only common shot guns.

A couple of casualties are reported to the 10th Royals, although not by the hand of the enemy. Private Cane, No. 2 company, was drawing his rifle after him in the bushes when it exploded and he was shot in the hand. Private Wheeling of No. 2 company fell and dislocated his knee pan. The remainder are well and eager for more fighting. The feeling is now very bitter, and it will go hard with the enemy in the next conflict.

Mr. Gladstone replied "No."

Mr. Gladstone bringing up the subject of the vote of credit on army and navy account asked the house to vote the entire \$55,000,000 en bloc. He said that he hoped the motion to divide the credit would not be pressed. The government would not devote any portion of the money for particular purposes for use in the Soudan, but would reserve discretion to apply the money taken for Soudan account for the purposes of special preparations.

to apply the money taken for Southan account for the purposes of special preparations.

Mr. Gladstone said the government considers it necessary to have the entire resources of the empire ready for use and application wherever required. Events since the fall of Khartoum have shown that the mahdi's power has collapsed. England's possession of Khartoum would not put a stop to the slave trade, and therefore it would be useless to shed blood and treasure in the Soudan. In regard to the smallness of the special vote, he reminded the house that it was the largest asked since the Crimean war. He would say in regard the sad contingency of an outbreak of war or the rupture of relations with Russia, that her majesty's government had striven to conduct the diplomatic controversy in such a way that if it unhappily ended in violent rupture they might be able to challenge the verdict of civilized mankind whether or not they had done all that men could do and had used every just and honorable effort to prevent the plunging of two such countries into bloodshed and despair. It also appears that on the night of his disappearance he had been drinking heavily and it is supposed he had got up in a dazed condition, wandered off and fell into the creek. There was an insurance policy on his life of \$20,000.

The Criminal Assizes.

The criminal assize court opened yesterday in the Adelaide street tombs before Chief Justice Wilson. The crown business is conducted by Hugh MacMahon, Q.C. The grand jury heard evidence in five cases, and found true bills in the following: Henry Reid, larceny; Albert MoBride, larceny; Harry McGee, larceny; Harry Veitch, Albert Hobberlin, Joseph McEvoy, robbery. In the case of Annie McGinnis, child murder, no bill was found.

Paid for Using His Baton. on Saturday and considered the complaint on Saturday and considered the companies against P. C. Whitesides who is charged with committing a brutal assault on two prisoners. The charge was sustained and Whitesides was taxed \$20. Fatal Accident at Buffalo

THE TORONTO WORLD: TUESDAY MORNING

THE TORONTO WORLD:

A GRECCENT HOWING ST. EAST, TORONTOO
OPPICE IN KING present the French wedge of Quebec blocks our whole political activity; but the day is coming when there will be one stretch of English speaking provinces from the Ottawa through to the Pacific ocean. It is our interest, then, to hasten the organisation of these English speaking provinces in the Northwest; their weight and influence in the Northwest in the Northwe ence along with ours will soon be such that

orous application of torpedo warfare will transfer England's monopoly of the carrying trade to other nations. Well, we should say, that depends. Where is the czar going to get "improvised cruisers" to match those five picked fast sailors of the Atlantic fleet-the Oregon, the America, the Arizona, the Umbria and the Alaska? Each of these is chartered for six months, with the privilege of purchase by the British government. The terms, in most vessels would quickly overhaul any cruises in fact nothing on the ocean that can either eatch them or get away from them.

Mormon missionaries in Europe appear to be the most successful of all emigration agents in getting the people they and become farmers. And their proselvies are mostly from the cities too It might be worth while considering the possibility of adopting what is good in the normon system, while leaving out the bad. The way the mormon elders succeed in getting people to leave the town and go upon the land is something phenomenal.

Over the border it is argued that, in the event of war between Eugland and Russia, the goods of both belligerents alike would be exempt from seizure if carried in American vessels. In other words, that free ships make free goods. The demand is further made that an extra session of congress be called, if for nothing else than to pass an act enabling American citizens to burchase and sail foreign, built vessels.

Arthur there was very little and the dust was flying in Winnipeg. There is none between here and there save where it drifted deep. For some distance west of Winnipeg the country is very level and a good deal of it under water. As we get west it changed to rolling prairie and got direr. Here the ground is as dry as powder. We are in the rainless region. One night it snowed about an inch—the most there pass an act enabling American citizens to pass an act enabling foreign, built vessels. Over the border it is argued that, in the purchase and sail foreign-built vessels,

Menschikoff has scarcely been heard of since the Chinese war, and Gortschakoff, another of the celebrities of that time, died

able to get something of later date than the levidently worthless, save for grazing.

I did not notice a tree or bush for the celebrated vintage of 1872. This is really last 200 miles or more of our journey, but the most important point of all in legislathe most important point of all in legislawe have been trying to compel that each can shall contain so much, and over in "York state" they have been trying to pass a bill requiring date and maker's name on every can. The manufacturers, however, had influence enough at Albany to get the date and name clause voted down. The consequence will be, we suppose, that on neither side of the border will it be possible to get canned goods less than seven years old. But if any enterprising dealer can guarantee the public that his canned goods are never more than two years old. he may count on doing a rushing business.

Gen. Grant's physicians are united in the opinion that his disease is cancer, and

About 10 30 we started in open cars. The day was fine but cold. That evening we the French wedge in Quebec will have little effect on the welfare of this great dominion.

A cable correspondent represents the case as being convinced that improvised cruisers of the Alabama type and the vigerous application of torpedo warfare will

tramped over twenty miles across the ice through a blinding storm of sleety snow, and then rode thirteen miles in open cars.

Our fare at Heron bay was abominable—bread, tea, vile pork, blackstrap and half melted lard for butter. This was served in a dea filther than ordinary pic stys. in a den filthier than ordinary pig stys.
Some of the men did not take any breakfast. The long tramp was pretty severe on the men. We got a little beef tea before taking the cars. That night we reached Jackfish bay, where we overtook to some of the Quebec battalion. We laid

The next day we drove 25 or 30 miles over the ice behind broken down horses and mules and then took open cars. That night at dark we reached Nepigon bay, which we marched across, some ten miles. The railroad from Heron bay to Nepigon skirts the lake. One must travel over it are so many that it reminds one of the elevated railroads. This stretch is very incomplete. The other stretches between the breaks are in pretty fair condition and

We came through Nepigon without gon the snow was not so deep. At Port Arthur there was very little and the dust

they say.
We arrived here last Wednesday. Some days have been quite summer like, but most of the time pretty cold. It is quite cold at night. On the way across the not long ago. Schouvaloff was the Russian minister at London a few years back, but neck with the train for about two miles—

minister at London a few years back, but we have not seen his name much in the papers lately. But Komaroff, Popemoff, Dockemoff, Knockemoff, and more such like, are on hand, and Mr. Gladstone had better be well prepared for them.

An American paper recently expressed the hope that European governments at war or expecting soon to be would just clean the country out of all the canned clean the country out of all the canned goods in the market. Then, it went on, the free-born American citizen might be

tion regarding canned goods—to secure some way of fixing the date. In Canada the buffalo. The earth's surface is literally corrugated with their paths or trails, and though all tending north and south, yet they cross obliquely in every direction. The banks of a stream near by is literally strewn with their skulls and bones. What

countless thousands must have roamed these vast plains! What a pity they have been exterminated! This place is situated on a plain several This place is situated on a plain several miles across, and surrounded by rising and quite high ground. The plain makes a splendid camping and parade ground.

The Queen's Own arrived Saturday before we did and left the following Monday. They are some forty miles off at the crossing of the Saskatchewan. Part of our men have gone to join them and we expect to follow every day and then all start for Battleford. I understand the first men Battleford. I understand the first men who came up, including the Queen's Own, is incurable. None the less, however, there are thousands of people who would like to see it proved that they are all wrong.

Surely we need not wonder that it should be a difficult matter to settle the fishery question between Canada and the United States. For the sovereign states of Delaware and New Jersey are at legal war with each other as to fishery rights, and with each other as to fishery rights; and the state of Maryland allows no interloper to meddle with the value ble cyster fisher—

The present outlook is for a slightly decreased area. A special from California reports some damage to decreased area. A special from California reports some damage to the wheat crop. In the central western and western states, where the winter-wheat crop is reported so heavily short, the continued warm weather has shown vitality in the plant in fields where the loss had been supposed to be almost total. It is possible, therefore, that the damage to winter wheat, great as it is, may be overstated. The speculative market for breadstuffs has been stronger and prices higher. Trumboener has made five post mortem oxaminations, and in each case has declared that unmistakable evidence of the disease was found. The source of the contagion was a buil imported from Peoris, Ill., and the animal might have conveyed the disease as easily to Wyoming, where Moreton Frewen so confidently says there is no danger of its obtaining a footing. Western and northwestern breeders must import well-bred buils from or through the eastern and middle states, and as long as that is the case there cannot be any real security against pleuro-pneumonia in any part of the country.

gelians, all yield to the fascinations of the American game, and the poker-playing among the foregn legations is high and fast and furious. They are made to pay pretty dearly for their experience, and some of the smart American officials pluck the gentle foreigners most unmeroifully. The head of a government bureau ahoved me a big roll of bills the other night, and said, "there's \$300 I win to night from So and so," naming a moon faced Mongolian minister, who goes about the street in flowing robes of peacock blue and royal purple. The terrible thing about this soil destroying game for the unsophisticated foreigners is the "bluff."

Baron de Struve, who, like all others, is a tireless devetee of the game went on for aome months in happy ignorance of the bluff and supposing himself to be a pretty expert poker player. But one evening in a little game with a mischievous young cabinet officer, he went his whole heat, soul and pooket on three aces and was bluffed by his opponent with a pair of trays. It was a new development of the great American game and its sublime possibilities dazed and bewildered the baron and, as he expressed it in good "United States" language, "broke him all up."

He said: "Oh, dis fearful, fearful American game and dot terrible bluff. I did not know dot bluff and what I do with it."

The baron concentrated all his time and intellect upon the "bluff" for several days, and then tried it on his wife. He and the madame have a little private game, and keep a very strict account. The wicked baron bluffed the unsuspecting partner of his bosom unmercifully, and there was a little coolness in the Be Struve family for half an hour, the first in many years of happy married life.

The First of the Season.
On Saturday afternoon between 5 and 6 o'clock, the first boating accident of the season took place on the bay. Three young season took place on the bay. Three young men were returningsfrom Hanlan's in a sail boat, under a very stiff breeze, when suddenly the mast went by the board. All three were sitting on the gunwale, but when the mast went, they sprang imme-diately to the lee side of the boat, just in time to prevent it capeizing but not to prevent it filling. A boat was hailed and came up, but the occupants were inhuman enough to refuse to render any assistance, even to towing the swamped boat and crew to the beach at Hanlan's, about 200 yards to the beach at Hanlan's, about 200 yards distant. There was a big sea running, but the unfortunates managed to bail out by keeping the boat's head to the waves and making vigorous use of two hats and an overcoat. The trio got to the boat house after an hour and a quarter's cold comfort, wetter but wiser men.

THE CENUINE PIANO, Manufactured by Rainer & Co., Guelph, Ont.

The undersigned respectfully announce that on the 2th day of April, 1884, Joseph F. Rainer dissolved partnership with Frank Sweetnam and John Hazelton, as piano manufacturers, and that said Joseph F. Rainer, with his son, will continue to manufacture the original cross-scale Pianos, of which the said Joseph F. Rainer is the sole inventor.

Since the above dissolution, Mr. Rainer, sr., has greatly improved the small Cross-scale Piano by adding one string more to each note throughout the middle, making three strings to each note instead of two, thus giving the Piano a third more power of tone throughout the middle. There will be fity-three notes from the treble down that will have three strings instead of twenty-four notes from the treble down as formerly. The undersigned will give to wholesale, and retail customers the benefit of this improvement by letting them have these Pianos for the same price as the ones formerly made with two strings.

These Pianos have now been before the public for 23 years, and have always ranked among the very best, and are celebrated for quality of tone, great power and durability of action, prompt elastic touch, fine finish and elegant nufactured by Rainer & Co., Guelph, Ont Felt covered Tennis Ball, cemented and sewn guaranteed this season's make, \$3.50 per doz. and made up of 28 first prizes, medals and diplomes, received at the principal exhibitions in Canada—Montreal, Kingston, Toronto, Hamilton and London. At the Centennial Exhibition in Philadelphia, in 1876, we secured a medal and diploma for our piano. The great favor with which the cross-scale pianos have been received for so long a period, and the reputation they bear, has induced others to imitate them. We therefore caution intending purchasers and dealers wishing to obtain the original cross-scale piano to see that the name of "Rainer & Co." is on each instrument. We make the Upright and Square Grand Pianos. For further particulars, Price List, &c., address EAINEE & CO., Sweiph, Ont.
