THIS PAPER may be found on the desks of all the merchants and business men in BRIDGETOWN.

Select Literature. Just in Time.

Dinner was over at last, and Mr. Walker Carrie, English commissioner at the...

On three sides the house was surrounded by its compound, a large enclosed space, serving the purpose of a courtyard.

'I wish you'd been in my place, then, retorted the colonel; 'you'd have changed your opinion, I warrant. Why, the year before last, when I was in the...

'The colonel's broad face reddened indignantly, and an explosion of angry voices from the room above drew them all to the front of the veranda.

'The cause of the disturbance was visible at a glance. Two half-drunken Englishmen, who had been drinking at the...

'The other officer, Major Armstrong, was a popular and able man, whose name was in action rather than in talking.

'That the story of our being short of water, for a guinea's worth of the market, it delays their attack two days longer, they may be time for help to arrive yet.'

'Be off with you!' 'And who is to be off, you shrewd fellow?' roared the infuriated major, to whose eyes the major's plain evening dress bore no token of his being an officer; 'just you!'

'At the sound of that insolent defiance, Armstrong's sorely-tried patience gave way altogether, and he started forward, ready to lay his hands on the insolent man's neck.

'The latter was sorely bruised in many places, and the blood faces and glittering bayonets were lying among the fragments of the half-destroyed stocks.

'Six months had come and gone, and Mr. Currie's health had improved so much that he had been able to get out for a walk in the garden.

'The Sepoy mutiny of 1857 is blindingly clear to the eyes of the Englishman, and Colonel Armstrong is blocked in Huttie-Bagh, with a certainty of a hideous death for himself and the men of the few who are still true to him unless help comes speedily.

'No fear of the water running short, for the water was not to be cut off for four days more.'

'And then we'll just go right at them, the colonel said, with grim smile on his face, for, with all his lucubrations and injunctive, Colonel Armstrong was, in reality, a very brave man.

'What the deuce was that?' exclaimed the colonel suddenly. 'It looked like a very arrow flying past!'

'It's worse than that, said the Major in a low voice. 'The muskets are shooting lighted chibys on to the roof of the house, and the women up with buckets to flood the tatch; there's not a moment to lose.'

'I'll go and see to it myself,' cried Mrs. Currie, hastening out of the room.

'But the power of this new weapon had already become fatally manifest. The house was on fire, and as fast as the flames were quenched in one place they broke out in another.

'When the day dawned the fire had already got a firm hold of one corner of the building, and a crushing discharge was pouring upon the attempt to extinguish it, while the triumphant yell of the human figures below told that they felt sure of their prey.'

'It's all over with us, old fellow,' said the colonel, grasping his old comrade's hand, 'but at last we shall have done our duty.'

'Give me one of your pistols, whispered Mrs. Currie to her husband, in a voice that was not her own. 'I must not fall into your hands!'

'At that moment Major Armstrong was seen to start and backward as if hissing, for he thought—although he scarcely believed his ears—that he had suddenly caught a faint sound of distant firing.'

'In another instant he heard it again, and then there could be no doubt, for several of the others had caught it likewise, and a gleam of hope once more lighted up their laggard faces and drooping eyes.'

'Loud and nearer came the welcome sound, while the sudden terror and confusion visible among the men showed that they were at no loss to guess its meaning.'

'Then high above and through the smoke cloud broke a charging line of glittering bayonets and 'ruddy English faces, sweeping away the cowardly murderers as the sun chased the morning mist.'

'That boy's worth his weight in gold,' said Colonel Armstrong, as a few hours later he listened to Ismail's account of how he had dived under the boat and kept it between him and the Sepoys, that they might believe his story. 'He's the pluckiest little fellow I've seen, and although he belongs to the Major, I'm going to take my share of helping him on, by Jove!'

'I can scarcely say for those bushes,' said Colonel Armstrong, 'but he seems to be showing them the wound on his shoulder, and telling them it was our doing.'

'At that moment an exciting cry from the enemy came pealing through the still air. 'Water for a guinea's worth of the market, it delays their attack two days longer, they may be time for help to arrive yet.'

upper part of the body was singed, but perfect enough to be recognized. It was the body of a female. There was a cut on the head on the left side back of the ear. Saw no other marks of violence. The face was turned away from the granite rock so as to escape the fire. The left side of the body was close to the rock, lying on the back. The face was discoloured, but easy to be recognized by those who were acquainted with it. She was undoubtedly pregnant before death. Probably about six months. Held the ligatures on the spot. Had the remains brought to Annapolis in a box for identification. They were deposited in James Gavaza's office in charge of a constable named Scott Kippy. They were afterwards brought to the Court House at the time of the investigation. The arms were a good deal shrivelled. The right hand was burned off at the wrist. Saw the remains photographed while they were in Gavaza's office. The photograph was produced. (Objected to by Mr. Shreve as secondary evidence.) The question is, is it a correct representation of the remains? At the request of Mrs. Addie Scott, I removed the lip and found the front teeth, except part of a front tooth entire. I think tongue was a little protruding. Can give no particular reason for it.

Cross-examined by Mr. Shreve.—Was first informed of the murder by one of the Murders. There was a cut over the temple. I do not think it was sufficient to cause death, but would stain a person. It, and the bruise on the back of the head, could not have both been caused by a fall. There were no remains of wood under the girl—nothing but ashes; made an examination and found she was pregnant.

MRS. JANE ROBBINS, sworn.—I reside at Hainsworth, Digby County. Do not know the prisoner; knew a girl named Charlotte Hill; have known her for about twenty years; think, if living, she would be upwards of thirty. Lived with me twelve years ago; lived with me two years. Then she went to live with Mr. Jeremiah Souther, about ten miles from us. She remained one year; then came back to me. Lived with me five months. Lived in several places after leaving me. Then came back to me three months. The last time she came to live with me was about six years ago. Then she went to live at Mr. Cousens'. Lived about three or four years. I know that Mr. Theobald kept the poor house; heard she was there. She was short, had light brown hair, blue eyes, high cheek bones and her face drooped. She was short limbed; not very stout. She, I think, had two upper teeth. If I saw her likeness I would recognize it. (Likeness produced.) She was a very true picture and taken when she was young. Never saw her picture before. Do not know when it was taken. (A likeness produced.) She was living with me as a girl on the town. She was about twenty-one. She lived with me for two years, then went away one year, and then she came to me till she last came to live with me was about four years. If alive, she would be somewhere near there. She had two prominent teeth. When she came to live with me, her hair was a light brown. The top of her head might be a little above my shoulder.

ARTHUR KING, sworn.—I reside in Annapolis. Am a photographer; carry it on in Annapolis. Have carried it on for about fourteen years. Have been following the business here for three years. I saw the remains in Gavaza's office. Cannot remember the date. Think it was the day after it was brought to Annapolis. Made a photograph; made two negatives; have taken several copies from them. This is one of the photographs I made.

Cross-examined by Mr. Mottou.—The picture shown is a copy from the negative. Have made a number of copies. Did so as private speculation. Took about fifty or seventy-five copies. A negative is a picture taken on glass, and the picture is then copied from it. (Objected that the picture produced is not an original picture. (The Court ruled that it should be allowed.)

JOHN THOMAS, sworn.—I reside at Barton Digby County, am an overseer of the poor, for about eighty-one. Have been an overseer for several years, was also appointed two years ago. The prisoner had the poor of our district for the past two years; knew Charlotte Hill. The prisoner had a contract for keeping Charlotte Hill with the rest, Charlotte Hill and Mrs. Scott were among the rest. He kept them up to two months ago. Saw Charlotte Hill on prisoner's premises at the North Range, Digby County. He boarded them at his own house. Last saw her at prisoner's house about a week or ten days before he was arrested. Have known deceased fifteen or twenty years. She has been charged on the district ever since she was a small child. The last time she was on the town she lived about four months at the prisoner's house. Addie Scott has been a pauper at Theobald's for about two years. Deceased was not tall; light complexion, small features, not (Continued on fourth page.)

 4600 NEW WORDS and Meanings,
**Biographical Dictionary
 of over 9700 Names.**

From The Canada Educational Monthly, Toronto.—And just here comes in the contrast of the position of the Englishman with that of his kinsman on this side of the Atlantic. He has no "Webster;" no book of an all-satisfying requirement, no one reference work in which he will find all that he may be in quest of, no single quarry that will yield him every ore his demands require the inspection of—such as he may find in the mammoth "Unabridged Webster." Having regard to its issues, its thoroughness, its compactness, and its price, it is an amazing product of literary skill and mechanical workmanship.

There should not be a school in the Dominion, where access cannot readily and constantly be had to it. No teacher, and we might add, no reader of the language, can afford to be without it, for it is a monumental work, a noble tribute to our grand old mother-tongue.

From London Quarterly Review.—On the whole, as it stands, it is most respectable, and certainly the BEST PRACTICAL ENGLISH DICTIONARY EXTANT.

"A necessity to every educated man."—Lord Brougham.

"Every scholar knows its value."—W. H. Prescott, the Historian.

"The book has become indispensable to every student of the English language."—Dr. Wallis.

FEVER AND AGUE.

Are you troubled with Ague, Chills and Fever, Bilious Fever, Remittent or Intermitting Fever, Night Sweats or any disease that comes from Malaria or disordered Liver and Hot Suns? If so, procure a bottle of Green's Ague Conqueror, which is an acetic extract of strong tonic roots, combined with sulphate of Magnesia, etc., and positively contains no Quinine, Arsenic or other poisons. It purifies the blood, cleanses the liver, spleen and other secretive organs so effectually that the chills will not return. We have never found any case of Fever and Ague it will not cure. Price, 50 cents and \$1.00 per bottle. One large bottle has cured as many as five in one family. Sold by all druggists and dealers every where.

THE VOICE OF THE SUCCESSFUL.—My success is owing to liberality in advertising.—Bonner. The road to fortune is through printers' ink.—P. T. Barnum. Success depends upon a liberal patronage of printing offices. F. F. Astor. Frquent and constant advertising brought me all I own.—A. T. Stewart.

WHOLESALE AND RETAIL.

Manchester, Robertson & Allison.
St. John, N. B.

Isiah Munroe's evidence continued from preceding page.

which were as told by other witnesses. I never saw the man I met on the road before. I see him in court now.

To Mr. Motion—I don't think it was much after 8 when I commenced work on the meadow. I visited the place where the dead body was three times and saw no tracks from the Meadow Road. The road had the appearance of a road in use. The man I met didn't try to avoid me.

To Mr. Motion—There were two men in the wagon, one on the horse and one on the seat. The harness was not attached to the wagon, but was tied to a tree. The harness wasn't in the wagon, it was on the horse.

To Mr. Motion—The man who was on the horse, I saw him look at me. He was looking at me when I saw him in the wagon. I saw him look at me when I was on the road.

Producing classes to greater efforts in the production of larger quantities of surplus products in order to meet the question naturally arises in our minds: how can we best better our condition in this respect? I answer, it is in the opinion of the farmers and other interested parties, that a partial solution of the question was given at the Annapolis meeting in the session presented, and I think it is a matter of course that the requirements of farmers and merchants and all others interested in the welfare of the Province. Practical men, who are not only willing to improve the condition of our people, and more especially those of this County, in the building up of manufactures and other industries by bringing among foreign capital giving employment to a large number of the laboring classes—in the converting of our material into usable and valuable products, to the effect that the time had arrived that the agricultural counties of this Province required a steamboat to be owned and operated on the waterway between the requirements of the Province, and as also for the convenience of merchants in transportation of goods on their various trips. Now, however, it would not be out of place, at this stage of the proceedings, to draw a comparison between a wooden steam ship, as proposed, and a steamboat, to meet the requirements of the Province, and as also for the convenience of merchants in transportation of goods on their various trips.

Mr. Motion—The basket was in the wagon and that it was sealed with wax. I saw the basket on the road and that it was sealed with wax.

Window Gardening!! Little or no Labor! HYACINTHS are the most beautiful and fragrant of spring flowers, a few Hyacinths may be forced in deep flower pots, filled with light earth or sand; or, with still greater advantage, in boxes filled with damp moss, and when coming into flower, transferred to the parlor window, where they enliven the most dead season of the year.

Lost! Lost! On the night of the 6th inst., between the residence of Mr. John Z. Bente, Bridgetown, and the residence of Mr. Busby Ben, Newville, DANK FITCH FUG ALIVE. The finder will be suitably rewarded by leaving the same at either of the residences above mentioned. Bridgetown, Nov. 27th, 1880. 1546p

Correspondence.

Mr. Editor, I have been much interested and have carefully noted the remarks made by the several speakers at the meeting recently held at Annapolis to discuss the feasibility of having direct communication with Europe in the form of a steamship. It is a matter of course that the requirements of the Province, and as also for the convenience of merchants in transportation of goods on their various trips.

The United States, we must, as an intelligent people, feel proud of our natural capacity, and assume a certain degree of confidence in competing favorably with the United States in the markets of the world with our products, in wheat, fruit, beef and mutton, but in order to do so, it must be plain to all of us, that the producing classes and others interested must co-operate and enter into a stretched condition in their means of work with a proper spirit and wisdom which have animated and guided those of other countries. Scotland might be cited as a worthy example for us to follow in this respect, as she has resorted to improve her agriculture and make her people prosperous and wealthy. Up to 1793 Scottish Agriculture was in a stretched condition, and the means of transportation still worse; but the opening of steam navigation and the system of railways, changed as once the systems of agriculture for the better, giving as they did to the producing classes, a quick and cheap mode of transportation to the permanent market that England offered and invited them to. Best came up in price: new and better breeds of cattle were introduced, and these in turn encouraged the farmers to look to the better cultivation of their fields, in the growing of immense quantities of roots and grain for the fattening of their cattle. Other branches of industry, as well as agriculture, received a stimulus by the opening of their new markets through the increased facilities of steam communication. Well may we, Mr. Editor, copy with profit the better methods in agriculture, from our more scientific brothers of Scotland, who have made Nova Scotia their home and farming their chief industry, and whose success in the characteristics of their country with them. Now, Sir, on one point I think we can all agree, viz: that the producers and consumers of food, profit, be brought as near together as possible. The large expenses that are being incurred as the present time in the transportation of our cattle and other products, is a matter of course that the requirements of the Province, and as also for the convenience of merchants in transportation of goods on their various trips.

When we look upon our Dominion of Canada, with its vast extent of territory, embracing as it does an area of nearly 3,600,000 square miles—being greater than the United States, and nearly equal to Europe, we must, as an intelligent people, feel proud of our natural capacity, and assume a certain degree of confidence in competing favorably with the United States in the markets of the world with our products, in wheat, fruit, beef and mutton, but in order to do so, it must be plain to all of us, that the producing classes and others interested must co-operate and enter into a stretched condition in their means of work with a proper spirit and wisdom which have animated and guided those of other countries.
