The copy filmed here has been reproduced thanks to the generosity of:

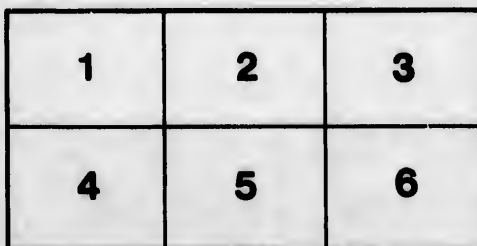

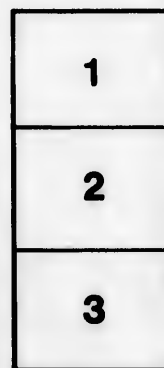

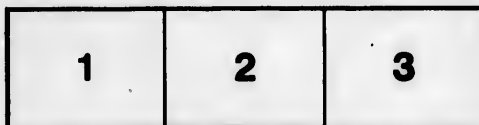

Library of the Public  
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shell contain the symbol  $\rightarrow$  (meaning "CONTINUED"), or the symbol  $\nabla$  (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives  
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole  $\rightarrow$  signifie "A SUIVRE", le symbole  $\nabla$  signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

## PREFACE.

---

Again we take the liberty of coming before the Canadian public with a new Directory, and here beg to offer a few remarks by way of explanation.

In undertaking the publication of a new Canada Business Directory, we feel that while endeavouring to meet the wants of the public we are treading upon dangerous ground, as in the edition of '57-'58 the work was so well and faithfully executed that it would be a labor of supererogation attempting improvements, and hence our efforts have been to the end that all changes occurring since the publication of that work shall be embodied in the present edition. How well we have succeeded it will be the province of the public to decide; but here we will say that neither expense nor effort have been spared to make it acceptable to Canadians in every walk of life.

The style adopted is the same as that of Mr. Lovell's book, so far as concerns the body of the work, but following the alphabetical list of trades and professions will be found, under the title of Miscellaneous Information, a compendium embracing the Executive, Legislative and Judicial Departments of Canada, and also other matters of a miscellaneous nature, interesting to every citizen of the Province. Following the above will be found a feature which, we think, cannot fail to meet the approbation of business and professional men: we allude to the Classified Business Directory, in which the mechanics, merchants and professional men, are classified under their appropriate headings, showing at a glance the name, occupation, and post office address of each.

The Advertisers—to whom we tender our warmest thanks for the liberal manner in which they rendered material aid—will find that they have not been forgotten. By reference to the Advertisers' Index, they will see that their advertisements have been distributed through the cities, towns and villages, in which their names appear, and as near thereto as possible, also having a reference from the name to the page of advertisement.

We cannot close these remarks without a word of thanks to the Postmasters, by whom we have been so ably and efficiently aided. The value of a Directory is enhanced upon its coming to light in the shortest possible time after its commencement, and through the means of circulars promptly filled and returned by Postmasters, we have much earlier and more reliable information than it would be possible to obtain by any other method—much earlier—as to send an agent would involve the usual delays of travelling by public and private conveyance, and more reliable—as an old resident of a place is more competent to obtain correct information respecting his neighbours than an entire stranger. Again we heartily thank the Postmasters.

And lastly, we beg that our patrons and the public generally may pass lightly over errors, which unavoidably creep into every work of this nature, and without which, indeed, no Directory would be entirely complete.

J. L. MITCHELL,

*Publisher.*

**BELLEVILLE, C. W.**—An incorporated town, situated on the Bay of Quinté, at the mouth of the River Moira, in the township of Thurlow and South Riding of the county of Hastings. It possesses some of the finest water privileges in the province, and at different points on the river various manufactories are established, giving employment to five or six hundred men, and contributing largely to the prosperity of the town. It is a port of entry, and being the chief town of the county, does a large business in imports. Its exports are principally flour, lumber, and agricultural produce, of which there are large quantities shipped annually. Belleville, having communication with the principal markets in the province and the United States, both by railway and water, bids fair to become one of the most flourishing towns in western Canada. Many of its stores and public buildings are of the finest description—the court house, Montreal and Commercial Bank buildings are costly structures and ornaments to the town. The Grand Trunk Railway has a first class station here, and during the summer season a steamboat plies daily to and from Kingston, calling at intermediate ports. Stages also daily to Sterling and Madoc. Distant from Toronto 113 miles, and from Montreal 220 miles. Daily mails and money order office. Population, by last census, 9,277.

# KERBY HOUSE,

BRANTFORD, C. W.

JAMES KERBY, PROPRIETOR.

WM. EDGERLY, Superintendent.

THE PEOPLE of Canada are respectfully informed that the above Hotel is open for the reception of visitors. The House is large and commodious, second to none in Canada, being capable of

## ACCOMMODATING 500 GUESTS.

It is built on the most approved principle—every attention having been paid to its proper ventilation, Heating, &c. The BEDROOMS are large and airy, and the PARLORS, HALLS and PASSAGES constructed with a view to the comfort and convenience of Travellers. The House is furnished throughout in the best modern style; the Upholstering and Furniture being of the most splendid and *recherche* description. While the KERBY HOUSE possesses all the attributes of a first-class Hotel, it will be found also to combine the more genial comforts of a home. Within, there is also in connection with the House a magnificent

## CONCERT HALL AND BALL ROOM,

100 × 40 feet, to which the attention of Proprietors and Managers of Exhibitions is respectfully directed. The Hall is well lighted with Gas, and can be converted into a Theatre at the shortest notice. The LARDER and WINE CELLAR of the Kerby House are not inferior to those of any Hotel on the Continent, while the terms are reasonable.

It is needless to state that BRANTFORD is a large and growing Town, containing at present a population approximating to EIGHT THOUSAND. It is the County Town of the County of Brant, without exception the first Agricultural County of Upper Canada. The Grand River flows through the Town, affording to the SPORTSMAN and TOURIST ample means of gratifying their respective tastes, for the Scenery on this noble stream is grand and beautiful, while Fish of all kinds are found in its waters, and its banks abound with Game.

## THE BUFFALO AND LAKE HURON RAILWAY,

Which has its principal Depot in Brantford, connects Lake Erie and Lake Huron; also connects at Paris with the Great Western Railway, and distant from Buffalo and Toronto three hours' ride, and from Detroit six hours; thus affording superior facilities of access from all parts of the United States and Canada, at all seasons of the year.

The Hotel is in a central position, situated on Colborne and George Streets, facing the Market Square, the Post Office and Telegraph Office being in the Kerby House Block.

**COBOURG, C. W.**—An incorporated town in the township of Hamilton, county of Northumberland, beautifully situated on Lake Ontario, having an excellent harbour, affording safe accommodation. It is the chief town of the counties of Northumberland and Durham, and being comparatively close to Rochester, Oswego, and other ports on the American shore of the Lake, it ranks only second to Toronto and Hamilton in a business point of view; the fertile soil of the surrounding country, with the advantages of a ready market, and almost unlimited water power, have raised Cobourg in the last half century to its present position. It contains many elegant public buildings and private residences. The Town Hall is a noble building, containing the best proportioned ball room in the Province. There are, also, many large manufacturing establishments, and a number of the merchants import their goods direct from Europe. The College and schools are well supported. During the summer, the Royal Mail Line of Steamers call on their regular trips to and from Montreal, and the Grand Trunk Railway has a first-class station here. Distant from Toronto, 72 miles; Belleville, 45 miles; Kingston, 108 miles; and Montreal, 260 miles. Daily mail. Population, by last census, 4,977.

**HAMILTON, C. W.**—Beautifully situated on the south-western curve of Burlington Bay, in the township of Barton, county of Wentworth. It was laid out in 1812, and occupies a delightful position on a plateau of slightly elevated ground, winding around the foot of the Mountain. The distance between the Mountain and the Bay is about two miles, and on the area thus included, stands, in point of population, wealth, and commercial importance, the second city in the western section of the Province. As early as 1813, it became of military importance. General Proctor, who was commanding the army of the West, made it a resting point after his defeat, and General Vincent, after being driven from the Niagara frontier, and previous to his brilliant victory over the American Army at Stony Creek, made his rendezvous at Burlington Heights. Burlington Bay is a beautiful basin,

CHANCERY BLANKS TO BE HAD AT W. C. CHEWETT & CO.'S, TORONTO.

navigable in all parts to within a few yards of the shore, making one of the most commodious and safe harbors on the Lakes. There are several lines of steamers in summer plying regularly between the city and Montreal, and all intermediate points. The Great Western Railway, from Suspension Bridge to Windsor, has its head offices and machine shops here, and the Company is about putting under contract the building of a large rolling mill for the purpose of manufacturing its own rails. There is a branch of the Great Western Railway running to Toronto, connecting with the Grand Trunk Railway East, for all points down the lake. The head office of the Gore Bank is here, and the Bank of British North America, Commercial, Upper Canada, Montreal and Toronto Banks each have a branch at Hamilton. The streets are mostly laid out at right angles with each other, the principal of which are King, James, John, York and McNab. The chief business portion of the city is situated about a mile back from the Bay, and some of the largest wholesale and manufacturing establishments in the Province are located here. The buildings are chiefly stone and brick, and many of them are very fine, and present an imposing appearance. On the rising ground approaching the Mountain, are a number of elegant residences, with grounds beautifully laid out and tastefully ornamented. The city is well supplied with water and gas. The Desjardins Canal connects Hamilton and Dundas, and has a navigation of about four miles in length. The exports of Hamilton for the year 1861, as shown by the last census, were valued at \$1,674,297, and the imports for same time were \$2,656,639. The amount of duties collected were \$437,457. Distant from Niagara Falls, 45 miles; London, 76 miles; Windsor, 183 miles; Toronto, by rail, 38 miles; and from Montreal, 373 miles. Population about 22,000.

**Analysis of Charlton's White Wine Vinegar, by Prof. Croft.**

B. E. CHARLTON, Esq., HAMILTON.

Toronto, February 29, 1861.

DEAR SIR,—I have examined the specimen of Vinegar manufactured by you, and sent to me for analysis, and find it to be a perfectly pure and wholesome article, containing nothing besides Acetic Acid\* and a small quantity of colouring matter. The amount of pure Acetic Acid contained in 100 parts of the Vinegar is 6.1-10, hence it is equal in strength to the best French Vinegars, and can be employed for the same purposes.

I remain yours truly,

(Signed)

HENRY CROFT.

\* Acetic Acid is the Chemical name for the pure sour principles of all good Vinegars.

## GREAT FIRE IN LONDON, 22nd June, 1861.

Within three days of the announcement of the fire to this Office, measures were taken that the London Branch should be in possession of ample funds to meet every loss. Before the expiration of a week from the date of the fire, immediate payment was ordered to such of the claimants as were enabled to give a statement of their respective claims.

No new Fire Insurance Company hereafter to be established will meet even with partial encouragement if it have not a full sufficiency, not of Subscribed, but of Paid-up Capital. No prudent Capitalist will embark in such a new enterprise, and yet ignore the possibility that, until an ample Reserve Fund is collected which requires several years to accomplish, his investment, and it may be a large portion of his subscription, might at any moment be required to meet some unexpected loss of an equal or even greater magnitude than the recent one. The amount to the Credit of the Reserve and Profit and Loss Accounts of this Company would be sufficient to pay its Loss sustained by this hitherto unexampled calamity, were it thrice the amount it proves to be.

The ROYAL INSURANCE COMPANY published late in the last year an account of the investigation into the Assets and Liabilities of its Life Department, under a novel form, and in as plain and intelligible a manner as the abstruseness of its subject admitted, together with the entire statements and valuations necessary for that purpose.

From the extensive Notices of this Pamphlet and its accompanying Diagrams, which have appeared in the Periodicals of the day, it has largely attracted the attention of vast numbers of persons in all parts of the United Kingdom, as well as in other parts of the World. A most satisfactory and conclusive evidence that such is the case, is afforded by the fact that the Sum Assured on New Policies in the six months to 31st June of the year 1861 is actually 50 per cent. in excess of the Sum Assured in the corresponding months of the year 1860, although the latter amount in itself exceeded the Sum Assured in any like previous period of time.

The Directors invite attention to a few of the Advantages the "Royal" offers to its Life Insurers:—

- I.—The Guarantee of an Ample Capital, and Exemption of the Insured from Liability of Partnership.
- II.—Moderate Premiums.
- III.—Small Charge for Management.
- IV.—Prompt Settlement of Claims.
- V.—Large Participation of Profits by the Assured amounting to TWO-THIRDS of their net amount, every Five Years, to Policies then two entire years in existence.
- VI.—Days of Grace Allowed, with the most liberal interpretation.

THE ROYAL INSURANCE COMPANY,  
NORTH JOHN STREET, LIVERPOOL, and 29, LOMBARD STREET, LONDON, E.C.

THE EXTRAORDINARY SUCCESS OF THE COMPANY  
AND THE

PERFECT SECURITY its GREAT RESOURCES afford to INSURERS,  
Have been commented upon by most of the leading Newspapers both in Great Britain and abroad.  
The following are Abstracts of a few of these Notices.

THE "TIMES" MONEY ARTICLE

At the Annual Meeting of the Royal Insurance Company to-day, the Report for 1880 stated that Premiums in the Fire Department amounted to £269,077, showing an Increase of £34,663 over the preceding year, and of £66,829 over the Premiums for 1858, being an Increase of 34 per Cent. in Two Years. The transactions of the year in the Fire Branch give a Profit of £41,067. In the Life Department the Premiums for the year on New Policies amounted to £15,079, being an Increase of £1,993 over the former year.—August 3, 1881.

**DAILY NEWS.**—These Tables prove the experience of the Royal to have been HIGHLY SATISFACTORY.—December 28, 1880.

**LEEDS MERCURY.**—It will be seen how very much less the mortality of the Royal has been than the mortality for which the Office was prepared.—Saturday 8, 1880.

**Atlas.**—Of the Reserved Fund the Manager has every reason to be proud, as it enables him to make the fair boast that in three days after the overwhelming catastrophe adverted to (the Great Fire in London), the Royal was in a position to pay, and did pay, its claims on presentation, thus vindicating its well-earned character for promptitude and liberality in loss settlement. The value to the general and community such honorable and timely promptitude as the Royal Insurance Company displays to us, cannot be too strongly insisted on.—August 10, 1881.

**Bristol Mercury and W. Counties Advertiser.**—The increase in the new duty of the Company last year was more than double that of any other Fire Office in the Kingdom, and equalled the increase of all the London Offices put together.—August 10, 1881.

**Edinburgh Evening News.**—The Royal Insurance Company has in some essential respects distanced all competitors.—August 10, 1881.

**Glasgow Examiner.**—If further proof is needed of the extraordinary resources of this Company, we may state that its London branch was provided with sufficient funds to meet every claim caused by the late terrible fire in London, without calling on the shareholders, or trenching on its paid-up capital.—August 10, 1881.

**Hull's Guardian.**—The report for the year 1880 was of a most gratifying nature, and most satisfactory to the shareholders.—August 10, 1881.

**Liverpool Mail.**—The Directors are fully justified in anticipating the time when the Company will be placed, with respect to the amount of its new business, at the head of all the Life Assurance Institutions in this country. Nor has the progress of the Fire Branch been at all less remarkable.—August 3, 1881.

**London Commercial Record.**—The judicious expansion of the Reserve Fund has been attended with the happiest results. It has ever been our opinion that no Fire Insurance Company can long maintain the ground without having a large positive capital available any moment for extraordinary contingencies; and this opinion is confirmed by the many failures that have taken place of public companies constituted on the unsound basis of a nominal capital.—August 9, 1881.

**Manchester Examiner and Times.**—In three days after the commencement of the fire, measures were taken to supply the London branch with ample funds to meet all calls that might be made upon them.—August 17, 1881.

**Waterford Mail.**—An accumulated fund of £200,000, and an annual revenue of £400,000 are features which might command confidence in any Insurance Company that could boast them; but they are not the least features in the character of the Royal Insurance Office.—August 18, 1881.

**Thacker's Overland News.**—Haro we have the secret of the power and resources by which, in the case of this Company, it was enabled to liquidate at once its heavy quota of £76,000. This secret is simply the comprehensive provision that in years of prosperity was not tempted to encourage a mushroom growth of business by half dividends and speculative losses, but held to the com-

mon sense of providing steadily from year to year a reserve fund, and one of such magnitude that we are not astonished to hear that, had the loss been three as great as it was, the Company could have met it without trenching on a farthing of their capital. In a business where security is the first and grand desideratum, this single fact is worth a volume of commentary.—August 10, 1881.

**Calcutta Phoenix.**—The Royal Insurance Company is one of the soundest and most secure means of effecting Life Assurance in the world.—December 4, 1880.

**Calcutta Singhshama.**—The Royal Insurance Company has been noticed by the leading London Journals in very favorable terms.

**Indian Herald.**—We are of opinion that the methods adopted by the Royal Insurance have been derived upon sound principles, and the success of the Company, as attested by the increase of business, the diminution of expenses, and the falling (unexpected, according to ordinary actuarial calculations) in the per centage of claims, may be accounted for by the close adherence to those principles manifest in the proceedings of the Society.—December 5, 1880.

**Falmouth Post, Jamaica.**—The Company is in a thriving condition.—April 23, 1881.

**Montreal Gazette.**—The Royal Insurance Company is an instance of almost unparalleled, and we believe, of most deserved success. Last year it lost heavily in South America; this year still more heavily (to the extent of £70,000 to £75,000 starting in London). By prudent management it had accumulated funds to meet these heavy losses, and has met them with the utmost promptitude. This is the true test of a Company's stability.—August 22, 1881.

**Montreal Herald.**—The prudent and cautious management of the Directors has enabled them, after paying a handsome dividend, to increase the Reserve Fund upwards of \$200,000.—August 22, 1881.

**Hamilton Daily Herald.**—The Royal Insurance Company has distanced, in the increase of its business for the past year, all other Companies in the United Kingdom. Advice received by Mr. Bellhouse, Manager of the Hamilton Branch, dated July 6th, states that the "Royal" had already commenced to pay losses incurred by the Great Fire in London, and that the Metropolitan Board was prepared, within four days of the catastrophe, to settle every claim the amount was ascertained. Such promptitude cannot fail to be a most convincing proof of the great advantages to be derived from dealing with a company whose ample means and high position enable them, without even the slightest temporary inconvenience, to grapple with a calamity almost unprecedented; in the present case payment will be made, without a moment's delay, of claims, the magnitude of which would be sufficient to embarrass weaker institutions, and, in some instances, to extinguish them altogether.—July 22, 1881.

**Hamilton Times.**—The advantages offered by the great Company cannot fail to be appreciated by all who take the trouble to make themselves familiar with them.—January 28, 1881.

**Toronto Globe.**—We hope that the business will as largely increase as the enterprise displayed richly merits.—May 29, 1881.

**Canadian Freeman (Toronto).**—The steadily increasing importance of the Royal marks it as one of the most reliable and safe Companies in which to insure against loss by fire.—August 8, 1881.

**Toronto Leader.**—The increase in the business of this Company is one of the best standards by which to judge of its popularity and soundness.—August 14, 1881.

**HASTINGS, C. W.**—A village of growing importance in the township of Asphodel, county of Peterboro', situated on and divided by the River Trent, six miles below Rice Lake. It is a place eminently suitable for manufacturing purposes, and has already in operation a cotton mill, employing 60 operatives; a knitting mill, employing 40 hands; and a woollen mill, giving employment to 20 hands. There are also two saw mills, making a very large amount of lumber. Several years ago the government built a dam and lock here as a part of the Georgian Bay or Trent Valley Canal, hence its water power is very extensive. It has communication to Cobourg in summer by steamer to Norwood, a station on the Cobourg and Peterboro' Railway, and a gravel road to Colborne, Brighton and Trenton, distant from each 26 miles. An excellent bridge connects the counties of Peterboro' and Northumberland. The surrounding country is a good farming region, and taken in connection with the great water privileges, Hastings bids fair to become, at no distant day, a place of considerable note. Distant from Peterboro', 24 miles; Colborne, 26 miles; and from Norwood, 6 miles. Daily mails. Population, 700.

**KINGSTON, C. W.**—One of the oldest localities in Upper Canada, and the capital of the united counties of Frontenac, Lennox and Addington, situated at the head of the St. Lawrence, where the waters of Lake Ontario, together with the Bay of Quinté and the great Cataraqui Creek unite and forms the St. Lawrence, and thence find their way to the Atlantic. Across the bay lie Wolfe and Garden Islands, a distance of three miles, forming the harbor, which is a beautiful sheet of water and a commodious and safe refuge for vessels of every class. Ship and boat building is carried on to a large extent, and vessels of every capacity for lake or ocean navigation are built and fitted out complete. All the timber necessary for ship and boat building is found in great abundance in the adjoining townships, and considerable quantities are shipped to other points in Canada as well as to England and the United States. There are a number of foundries and machine shops in constant operation here, which besides supplying the demand of the city, manufactures portable steam engines, mill machinery, locomotives, agricultural implements, stoves, iron axles, cut nails, screw bolts and all kinds of carriage and waggon work for many parts of the Province. There are also several large tanneries and breweries here. As a military station its defences are only second to Quebec, and Fort Henry together with the Martello towers have complete command of the harbor. The city possesses two colleges, the Queen's and Regiopolis. The public buildings are very fine, among which may be enumerated the City Buildings, Court House and Provincial Penitentiary. The head quarters of the Commercial Bank is here and the other principal banks of the Province each have branches in the city. It is a first class station on the Grand Trunk Railway, and distant from Montreal, 198 miles; and from Toronto, 165 miles. Population about 14,000.

**LONDON, C. W.**—A beautiful city, situated on the river Thames, in the township of the same name, county of Middlesex. It is the chief city of the western division of Upper Canada, and has sprung into existence since 1826, at which time the ground it occupies was a wilderness. It is a port of entry, thus securing to its merchants the advantages of having their goods shipped direct under bond. Its streets are wide, and run at right angles to each other, and the buildings are excellent, being mostly of brick or stone. The public buildings are a credit to the city; among which may be mentioned the English church, a gothic edifice, which has a magnificent chime of bells; the Exhibition buildings, and the Tecumseh House. The country surrounding London is rich in agricultural productions, and furnishes a large trade in wheat and other staples. There is a Board of Trade, and all the Banks of the Province have branches or agencies here. The Great Western Railway from Windsor to Suspension Bridge passes through London, and has a branch road thence to Sarnia. The Grand Trunk also has a branch from St. Mary's to London, and it is also the northern terminus of the London and Port Stanley Railway. It has two very creditable and influential daily newspapers—the *Free Press* and the *Prototype*—besides several weekly publications. Distant from Windsor, 107 miles; Hamilton, 76 miles; Toronto, 114 miles; Port Stanley, 24 miles; and from St. Mary's, 26 miles. Daily mail. Population about 12,000.

**MONTREAL, C. E.**—The metropolis of British North America, situated on a large and beautiful island of the same name, about 30 miles in length by 10 miles in extreme breadth, formed by the confluence of the Ottawa and St. Lawrence Rivers, and on the north bank of the latter. It is at the head of ocean navigation, and the foot of lake and river navigation, about 90 miles above tide water and 300 miles from salt water, possessing all the advantages of a sea coast city and inland navigation combined. It is accessible by vessels of over 1800 tons burthen, and has direct communication with London, Liverpool, Glasgow, and all foreign ports. It is the chief manufacturing city of the Province, and many of its establishments are costly, the productions of which will compare favorably with those of any other country. Montreal, as seen from any approach, with Mount Royal in the background, together with the beautiful villas, glittering roofs and domes, tall spires and lofty towers, present to the beholder, a vast, picturesque, and grand panorama. The principal streets are Great St. James, Notre Dame, St. Paul, Commissioners, and McGill. Among such a large number of elegant public buildings we will mention the Bonsecours-Market, built at a cost of \$287,300, one of the finest build-

ings on the continent, the Court House, costing \$296,569, the French Cathedral, the Bank of Montreal, Bank of British North America, the Custom House, McGill College, Jesuit College, Post Office, St. George's and many other churches, all ornaments to the city. The hotels compare favourably with any other city on this side of the Atlantic; those most worthy of notice being the St. Lawrence Hall, by Mr. Hogan, long and favourably known to the travelling public; the Donnegana, St. Julien & McKeogh, proprietors; and the Ottawa, Mr. Browning, proprietor; all first class hotels, and many more, which we have not the space to mention. The city is well lighted with gas, and the water works are almost unequalled. The water is drawn from the St. Lawrence about a mile and a half above theachine Rapids, and through an open canal led into a basin, from which it is forced to the reservoir upon the brow of the mountain, several hundred feet above the level of the city. The harbour and basin are good and safe, and capable of enlargement to almost any extent to accommodate the future wants of the city. The wharves, between one and two miles in length, are surmounted with a massive stone wall, upon the heights of which are a promenade and wide street, affording an excellent view of the river and shipping. There are numerous inclined planes from the wharves to the street above, by which carriages ascend and descend, and the whole for appearance, cleanliness and commodiousness, is unexcelled by any port on the continent. From Point St. Charles, at the head of the harbour, to St. Lambert, on the opposite side of the river, a distance of about two miles, has been built the Victoria Bridge, unsurpassed by any other structure of the kind in the world. It has two long abutments and twenty-four piers of solid stone masonry. The bridge is built of iron, on the tubular principle, and makes a complete line of railway from Sarnia, on the St. Clair River, in the extreme western section of the province, to Portland, Maine, giving Montreal an unbroken railway communication of over 1,100 miles in length, with numerous tributaries and connections. The trains of the Grand Trunk Railway leave Montreal daily for all points, both ways, on the line in Canada and the United States. A line of splendid steamers ply weekly between Montreal and Liverpool, carrying the mails, in summer; and between Liverpool and Portland semi-monthly in winter. In the season of navigation steamers ply daily from Montreal to all the principal towns and cities in the province situated on the lakes and rivers. Montreal is distant from Liverpool, 2,750 miles; Quebec, 180 miles; Kingston, 173 miles; from Toronto, 333 miles; Ottawa, 120 miles; Portland, 292 miles; New York, 400 miles; and from Boston, 334 miles. Population about 110,000.

# ST. LAWRENCE HALL,

GREAT ST. JAMES STREET,  
MONTREAL.

HENRY HOGAN, PROPRIETOR.

THIS FIRST CLASS HOTEL,

(THE LARGEST IN MONTREAL,)

IS SITUATED ON GREAT ST. JAMES STREET,

Immediately adjacent to the Post Office, Place d'Armes, and Banks;

Is only one minute's walk from the Grey or Black Nunneries, New Court House, Reading Rooms, Champ de Mars (where the Troops are reviewed), Mechanics' Institute, Bonsecour's Market, and Fashionable Stores.

The NEW THEATRE ROYAL is directly in the rear of the House, and several of the best boxes in the Theatre are regularly reserved for the guests at St. LAWRENCE HALL.

## ST. LAWRENCE HALL,

HAS LONG BEEN REGARDED AS THE

MOST POPULAR AND FASHIONABLE HOTEL IN MONTREAL.

It has been under the charge of its present Proprietor over 10 years.

The Building presents a front of some 300 feet on St. James Street, with a depth of over 800 feet, and has over 300 Apartments. A large part of the HALL was engaged by Government

For the Suite of His Royal Highness the Prince of Wales during his visit to this City.

The American Consul-General, the Hon. Mr. GIDDINGS, has his office at St. LAWRENCE HALL.

The "WITNESS" aims at giving the very LATEST NEWS; and is generally admitted to be the best COMMERCIAL authority in Canada.

The "WITNESS" supplies the best kind of FAMILY READING; consisting of articles selected from able sources; and all topics of passing interest. Though not connected with any Religious Denomination, it gives prominence to Religious matters, and advocates the Temperance Reform.

The "WITNESS" having the second largest circulation in the Province, and the largest in Montreal, affords an excellent medium for advertising.

No. 7 ST. URBAIN STREET, NEAR CRAIG, MONTREAL.

Patentee of ROSS' Patent Thermo-Electric Fire Alarm and Heat Detector.  
(Patented March 10th, 1863.)

This Instrument is self-acting, and will give notice of the increase or decrease of heat at any degree required; it will also convey that notice to an unlimited distance, continuing to ring until the temperature be corrected, and at the same time denoting in which apartment the change has taken place.

It will therefore be readily understood that its uses are innumerable; it can be used to regulate the temperature of rooms for various purposes; to save grain in store from injury by heating; or plants in a green house from frost; it is also valuable in chemistry and many other arts and manufactures; and in addition to all its other uses, it can at the same time be relied on in case of FIRE.

# Royal Insurance Company.

**FIRE.**

**LIFE.**

**CAPITAL,**

**£ 2,000,000**  
STERLING.

ROYAL INSURANCE BUILDINGS, MONTREAL.

Insurances against Fire are received upon nearly all descriptions of Property.

The Rates of Premium are exceedingly moderate, and governed in each case by a careful consideration of the Risk proposed. The Royal has ever distinguished itself by its promptness and liberality in the settlement of claims. In 1860 the remarkable position of the Royal, with respect to all other Offices, was thus shown:—

**ITS INCREASE**

WAS MORE THAN

**DOUBLE THAT OF ANY OTHER COMPANY,**

And more than 30 PER CENT. of the entire Increase of all the London Offices combined. Its increase was also more than 30 PER CENT. of the entire Increase of the other Twenty-eight Country Offices combined.

It is highly satisfactory to state that, in 1861, the Royal stood at the head of all Offices; its Increase being considerably more than 50 PER CENT. above that of the Company approaching nearest to it, and actually more than one-sixth of the entire Increase of the remaining forty-three Offices.

**THE TOTAL FUNDS IN HAND NOW EXCEED £800,000.**

**ANNUAL INCOME, nearly £500,000.**

Special advantages of the Life Branch.

**PROFITS—LARGE PROPORTION RETURNED EVERY FIVE YEARS TO POLICIES THEN IN EXISTENCE TWO ENTIRE YEARS.**

Expenses chiefly borne by the Fire Branch, in order to increase the Bonus to be Returned.

**LIFE BONUSES DECLARED,**

**TWO PER CENT. PER ANNUM ON THE SUM ASSURED:**

**The Greatest Bonus ever continuously declared by any Company.**
