WASHINGTON, Sept. 28.—President Taft to-night telegraphed Henry L. Stimson: "It gives me the greatest pleasure to hear that you have been chosen as the Republican candidate for governor of New York. Ontario! Is it Backward or Forward With You?

The World in this article proposes to approach from the highest standpoint the question of the Toronto Electric Light Company's attack on the public distribution of electrical energy, and especially from the standpoint of all Ontario and the maintenance of Ontario's supremacy or leadership, if that be possible,

in the Canadian confederation.

Our readers will recall that for some months now we have been exposing as best we can the unfair discrimination against this province by the Canadian Pacific Rallway and the Grand Trunk Railway, and that these two great corporations which were largely subsidized by the people of all Canada and both of which receive from the people of Ontario man for man more revenue than they receive in any other province in the Dominion, discriminate against Ontario at every turn. In other words, notwithstanding that their best business is in Ontario, they refuse to extend their that their best business is in Ontario, they refuse to extend their lines, improve their service, or give as good rates in this province as they give out of it; but the greatest injustice of all, these railways make their headquarters in Montreal, in the Province of Quebec, and spend in that city nearly all their money devoted to workshops, car building, engine building and a thousand other things, and refuse, notwithstanding the big revenue they have in Ontario, to spend a dollar in this province if they can possibly

avoid it.

We also pointed out that another significant thing was that this Montreal influence was persistently directed against putting Ontario in better railway touch with the capital at Ottawa and toward preventing the construction of canals that would make Toronto and the ports of the upper lakes practically sea ports—by deepening the St. Lawrence canals and the Welland canal.

Such is the outside influence that has helped to hold Toronto and Ontario back. But we wish to discuss to-day what is being done in our own province to hold our province back, and that is that a deliberate conspiracy has been under way for fifteen years now, headed by the Cataract Power Company of Hamilton and the Toronto Electric Light Company, to prevent public competition in the supply of electrical energy for the whole province, by a system owned and controlled by the province and the municipalities.

Ontario has a great future in spite of the treatment she has received from the two big railways if she can supply cheap energy for power and light and perhaps for fuel to all the people of the province. We have the rivers and the waterpower going to waste; private corporations seek to control this power and to boost it in price; in the same way as the Pennsylvania coal barons have put up the price of anthracite coal. If the province, however, controls electrical energy it will be cheap and Ontario will then have cheap power for factory purposes and for lighting and will be able to build herself up not only in Toronto but in every manufacturing town and village in the province by reason of the imfacturing town and village in the province by reason of the im-mense demand for goods that will come to our factories from the Canadian west provided always that we can compete with other places. But if we are to be handicapped by railway treatment meted out to us by the railways for which we do most and which have their headquarters in Montreal, and if we are to be handi-capped by power combines in our own province, then Ontario is bound to come to a standstill or to make progress in a slow way, and the manufacturing supremacy that we now have and are seek-ing to widen will pass from Ontario and Toronto to Montreal and

Toronto's future whether she is to be a city of a million or not absolutely depends on cheap electrical energy supplied by the people. Are we to have it or not? It is up to the people of To-ronto and it is up to the government of Ontario to defend us in this matter. It is now or never with the people of Toronto and the people of Ontario. They are being swamped in a good many ways, and they will be themselves to blame if they do not take care of their own interests.

And is it not a strange reflection on the whole situation that we have hardly one man in the legislature of Ontario who is willing and ready to fight the battles of this province on these lines and who sees the dangers that threatens us. If you read the American papers you see men, eminent in public life, great lawyers, great business men undertaking the defence of public rights; but here in this province and especially in the City of Toronto what one representative of the eight we have in the legislature is to-day ready to stand up and to lead the people towards the goal outlined above?

Oh, you people of Ontario, you had better bestir yourselves before it is too late. Where are your representative men?

North Toronto Must Also Go on Guard

The corporations are busy trying to get further rights in the Town of North Toronto before annexation can take place. Indeed, if they get what they are now after, annexation will be prevented, and the people up there will be for a long time under dis-

For instance, the York Radial Company is seeking to get a double-track franchise on upper Yonge-street, to be made a portion of its present franchise on that street. This move is to be made before the Ontario Railway and Municipal Board. doubt whether that board has the power to intervene in this mat-ter and make such an order. We believe that this is a new franchise, and, if it is, then it must be voted on by the people. But, passing that for the moment, the people of North Toronto will do the wise thing if they do nothing until they first vote on the question of annexation; and the council has promised to allow them to do that at the coming municipal election, the majority of the citizens of the town having already signed a petition to that effect. The city will be able to give North Toronto a double-track municipal service, connecting with the city system, on the two new streets parallel to Yonge that are now being constructed in the town; and as soon as the tubes are built, this North Toronto service, owned by the city, can be turned into the tubes and made for

The city would also, in the event of annexation, be in the best position to buy out the present surface rights on Yonge-street and the York Radial and make it a part of the city system and olve a universal five-cent fare from down town to the extreme limit of North Toronto. A double track makes it more complex and more expensive. The thing, therefore, for North Toronto to do is to do nothing and say to the Railway Board first that they regard the proposition as a new franchise and therefore to be voted on by themselves; and, second, that it would be a most improvident thing to do just now and would delay annexation and also tie the people up for twenty or thirty years to a double-fare pro-position. North Toronto, if it takes care of itself and keeps its freedom, will have a universal five-cent fare on Yonge-street for at least six miles and the benefit of the tubes as soon as they are built.

The other proposition made by Mr. Waddington and his associates is on behalf of the Toronto Electric Light Company, who want to get a franchise in North Toronto, so as to widen their franchise and list of customers, and in that way prevent the city from supplying the electrical energy for power and light in the new parts of the city and north of it. The more customers the city has, the cheaper will be the price. The more customers that are swept away from the city to the Toronto Electric Light Company. the higher the price, so that it is absolutely in the interests not only of North Toronto but of the city and the whole township that no further franchises for electrical energy be given in North Toronto; but that, on the contrary, all these people come in with the city in taking their energy from the city's new plant.

Let the people of North Toronto, therefore, be on their guard.

OTTAWA, Sept. 28 .- (Special.) -- The Evening Journal to-night says editor-

Several yestern papers unite on calling Hudson Bay the "American Mediterranean." But the name suggested some years ago by W. F. Maclean, M. P., a name which he took some steps to have adopted, namely the "Canadian Sea" is far more appropriate than the "American Mediterranean."

It is not, as a rule, well to change historical names that have stood for centuries. But the term "bay" as attached to Henry Hudson's discovery, is a misnomer. Far from being a bay, that body is the third largest sea in the Caribbean Seas surpassing it in size. It is by long odds the greatest land-locked body of water in the world surrounded by and owned by the one country, for both Mediterranean and bean are open seas, surrounded and bordered by many nations.

Thus, once convinced of the desirabil ity of a change in the name of Hud-son Bay, Canada's great possession should be stamped with the name Can-ada. There could be no better name chosen than the "Canadian Sea."

How United States Attitude Toward Tariff Matters Affects Canada — Our Natural Resources Are More Than Ever in Demand South of the Border.

Of intimate bearing upon the necessity of maintaining the National olicy in the fiscal system of the Dominion is the question of reciprocity with the United States. Canada has had no reason in the past to welcome the reopening of negotiations for that purpose. The United States, thru its government, and particularly thru its senate, whose con-currence must be obtained, has been thruout governed by the perfectly legitimate determination to further as far as it possibly can the interests of its own agricultural and industrial population. Its diplomacy has always been marked by the characteristic so happily featured in the

If ever and whenever the republic If ever and whenever the republic has departed from the invariable rule some ulterior motive lay behind its action, just as the notion that Canada could be coerced into annexation was in part responsible for the abrogation in 1866 of the trade agreement negotiated by Lord Elgin in 1854. Contrary to the belief that was then and later widely prevalent among United States statesmen, the Canadian people steadily refused to continue dependent on the good-will of their powerful neighbors, and at the cost of a period of considerable the cost of a period of considerable depression, set themselves to develop other outlets for their external trade. No real development of home indusmoderate and qualified protection provided by the National Policy began to be felt. Then indeed they expanded with remarkable rapidity, aided as they were by the discovery that the British market was equally accessible and more profitable than that of the United States. Canada had found herself and recognized independence. As that conviction grew the sentiment in favor of annexation, encour-

There is no political wisdom or business sense in truncating this all-invigorating combinental commerce at the Canadian frontien.

It is time that the discovery be made at Washington and at Ottava that the protective principle has been falsely applied in the building of the tariff stockades across the grand meridian trade-routes of North America.

The political annexation of Canada may be delayed a little.
But commercial annexation is overdue. This bears out exactly what The World said a few

days ago in discussing the dangers of a campaign of reciprocity, especially if Canada started out mission aries in the States to work it up. You may think that reciprocity means improved trade relations and Canadians generally may think

this, but Americans have only one meaning for comnercial union, or for trade annexation, or, as Mr. Hearst calls it. "commercial annexation," and that is in the end political annexation and nothing else. There is a great difference between the two views. We have one thing more to say about Mr. Hears, and that is, that he is the gentleman who precipitated the Spanish American war and forced President

McKinley into it against his wish and against the best opinion in the United States. All Mr. Hearst wants is a chance to start a campaign in his newspapers for the political incorporation of Canada with the United States. Will The Globe give him it? The World says here and now that it does not

benefit of Canadian industries. The whole crux of the situation lies here. Canada has prospered exceedingly under the moderate and qualified protection introduced by the National Policy. The call for a change in the fiscal policy of the Dominion does not come from the supporters of the present system. It has been the first and proved to be the banner attraction.

MILTON, Sept. 28.—(Special)—Forty-five hundred people attended the annual fall fair of the Halton Agricultural Society to-day.

For some years past the directors have dropped horse-racing as a feature of the fair, but this year three well-filled races were pulled off and proved to be the banner attraction. The whole crux of the situation lies does not come from the supporters of the present system. It has been prompted by the fact that the prices of agricultural products in the Unit ed States are considerably higher than in Canada. The free traders, who attack the National Policy on the ground that it increases the cost of manufactured articles, are the very people who want to see prices.

The reputation of the county for horse-breeding was sustained by the númerous entries in the different classes.

Cattle and other live stock of good quality filled the prize lists.

The show of domestic work, roots, vegetables and flowers in the main building was up to the standard of other years.

Prominent people present included: of manufactured articles, are the very people who want to see prices raised to the level prevailing in the United States when these happen to favor the Canadian producer. There is no principle in such an attitude. The arguments in favor of continuance of the National Policy are based on national, not sectional, interests. They have regard to the future of the Dominion, whether it is to be the Deminion, whether it is to be great /self-respecting, self-sustaining nation, freely ordering its own polfcy and destiny, or a mere appendage Third Man is Saved After Clinging to the United States. North America itself will be the better if Canada remains representative of the British parliamentary tradition under a thoroly democratic environment, adapted as it is to embody in their fulness the principles of genuine democracy. He is no friend of Canadian nationalism or of the Canadian spirit who seeks in any degree to impair the self-suffleing patriotism that to-day inspires the Canadian people. The National Policy fostered that spirit, and is the surest pledge that it will enduge.

TWO DROWN IN GULL LAKE

Eight Hours to Canoe. PORT ARTHUR, Sept. 28.—(Special.)
—W. M. Coleman of Renfrew and Aibert Dixon of Saskatoon are reported as having been drowned in Gull Lake, 150 miles north of Sioux Lookout, on the G.T.P. on Saturday. The sole survivor of the drowning was Nick Ellwood, who clung eight hours to the upturned cance, and then walked sixty miles without food to report the fatality to Sioux Lookout. The three menwere going to Cat Lake to trap for the winter.

Chef Struck the Waitress. Albert Butler, chef at the Grand Union Hotel, was fined \$5 by Magistrate Cohen in the afternoon police court, on a charge of striking Georgina Graham, a dining room girl. Butler's defence was that he had been subject to annoyance when the girl came to the pantry for orders, and that she required disciplining; also, she had slap-ped his face.

PROGRESS AT VARSITY HOW IT IS MEASURED

President Falconer Addresses the Students-Warning Against a Teo Effusive Patriotism.

"The real progress which gives distinction to any university is not only the actual addition it makes to knowledge, but it is to be gauged by the way in which that knowledge becomes an ingredient in the type of the people," said President Falconer to a gathering of students in Convocation Hall yesterday, on the occasion of the opening of the University of Toronto. The president spoke on "Progress" as revealed by the university, referring to the addition of new buildings and enlargement of the facilities for teaching, and pointed out that the university school for boys, on Bloor-street, would be constituted as a model school for experimental teaching, and would represent the work of the high schools and higher grades in public schools. Matriculation would still remain the means of entrance to the university, and he hoped the standard would continue to be raised higher.

The term progress could only be applied to the university as expressing a

tinue to be raised higher.

The term progress could only be applied to the university as expressing a characteristic. Scientific equipment, laboratories, libraries, lecture rooms and the like were essential to house the life of the university, but what really mattered was the life which that garb adorned. The professor would have his ideas of progress by the facilities which were given him to teach his best and make all the addition he can to the wealth of knowledge. From the to the wealth of knowledge. From the student's point of view it will depend upon the standard which is maintain-ed, and the preparation which the stu-

dent received before matriculation.

President Falconer issued a warning to Canadians against boastfulness. This was an age of optimism.

"There is a great deal in the man who will at all times keep his courage up, but when optimism becomes boastfulness, there is something indeed which is vicious," he said.

There was a great deal of talk about There was a great deal of talk about our connections with the British Em-

"That empire has given us the best that we have, but there is no need of effusive expressions setting forth the depth of our affection. Why is it that we hold to that empire? Why is it that we are proud of the empire? Why is that we in this university to it with such absolute loyalty? It is because of the character of the empire, and because of the virtues of empire, and because of the virtues the empire; not because of the extent of territory, not because of its wealth, of territory, not because of many failures but because—in spite of many failures and in spite of many disgraces, the Briton, from whom we draw our best, has shed forth in his life the virtues that the world needs, the virtue of justice, the virtue of humanity, the virtue of honesty, the virtue of freedom, and the virtue of duty."

tawa.

It is alleged that certain documents, which should have reached Rome, and which were in the interests of French-Canadians, here especially, have not reached there, and French-Canadians want to know the reason why. It is possible that a cable of protest against Archbishop Gauthier's appointment will be sent to the Vatican.

Hebrews Choose Protestant Schools.

MONTREAL, Sept. 27.—The difficulties of educating the Protestant population here were shown strongly to-day, when twenty children were refused admittance to Rosemount school because they did not know their alphacter. The accommodation is so smally according to the number of children, that this rule has to be put into force to have some basis of selection. The reason of the congestion is largely very many of whom are children, have the right to say which schools they colony voted Protestant.

BUFFALO, Sept. 28.—The fifth biennial national convention of the United Irish League closed this evening amid a remarkable scene of devotion to the motherland and fealty to the leaders of the Irish Nationalist movement who have attended the gathering. A recommendation by the committee on ways and means, that \$100,000 be subscribed to the work of the Irish parliamentary party for the next two years, was raised to \$150,000 by the committee on resolutions. The latter report was unanimously adopted, and within half an hour a total of \$151,000 had been paid in or pledged. White the secretary was recording the amounts given, the delegates in their enthusiasm several times doubled and trebled their original subscriptions, many of which ranged from \$1000 to \$20,000.

MARRIAGE AND DIVORCE KNOT SHOULD BE FAST

Unchastity or Desertion Only Two Good Reasons For Severing the Tie, Argues Rev. Prof. Law.

In the second of a series of papers on "The Social Teachings of Jesus," before Knox College Alumni Associa-tion, Prof. Robert Law dealt with the question of marriage and divorce. He declared that the church should stand for Christ's position, which was unequivocal. The New Testament teaching was quite different from the prac-tice Moses introduced. Divorce, he claimed, should not be granted except in cases of unchastity and neglect or desertion. The Apostle Paul admitted the latter of these causes, and it could easily be considered as coming within the same category as unchastity. Prof. Law went carefully into the whole question, showing what was Christ's conception and deploring the tendency to go back to the Mosaic custom, which repermitted the granting of divorce for secondary reasons. Moses compromisted what became the Christian standard under pressure from the moral turpitude of the time

The Historical View. In the discussion which followed. Prof. Robertson made a valuable contribution to the subject by showing the historical antecedents of the problem and the customs which underlie the the present law. The Scottish people, he pointed out, were practically of one church and were untrammeled by any precedents in the matter of moral standards. England was handicapped by the influence of Teutonic marriage customs, and the continental nations by the remnants of Roman law, and in our criticisms of the action of the law courts in the different countries, we should be possessed of the historical situation in order to express fair judg-

Principal Gandier gave a thoughtful paper on "The Priestly Element in the Christian Ministry," maintaining that the priestly function had always existed. He avoided the Scylla of super-stition and the Charybdis of rationalism, declaring that while he did not believe there should be any priests, in lieve there should be any priests, in the sense in which that term is ac-cepted, he thought that believers in Christ should reflect the priestly spirit and—the priestly element should form an integral part of a minister's life. Officers Elected.

The following officers were elected in the afternoon: President, Rev. H. A. Macpherson, Toronto; vice-president, Rev. R. B. Cochrane, Woodstock; secretary, Rev. R. Cockburn, Toronto; executive committee, Revs. W. R. Mackintosh (Elora), J. A. Wilson (Hamilton), H. Matheson (Caledon East), George Arnold (Guelph), H. E. Abraham (Port Hope), Prof. Ballantyne (Toronto),

Conference committee: Revs. Prof. Ballantyne, Toronto; R. Davidson, Toronto; R. Haddow, Westminster; Dr. Talling, Toronto; Roy VanWyck, Chat-Representatives on the college board

Revs. W. R. Mackintosh and D. C Representative on the University Senate: Rev. D. Tait, Teeswater. A report was read showing that the students and alumni had contributed

so far to the new building fund the sum of \$27,000, and that a total of \$220,-000 had been collected. The canvass will be prosecuted during the winter and it is expected that the new buildcommenced next spring. Would Retain Prof. Law.

In view of the call which Rev. Prof Law has received from the congregation of Old St. Andrew's Church, resolution was passed by the associa-tion expressing confidence in Prof. Law's teaching, coupled with the hope that he would not consider it necessary to sever his connection with the

Public Amusements

Mrs. Fiske, who is to open an enengagement of four performances at the Princess this evening, presenting "Becky Sharp" and "Pillars of Society," has the support of the trained Manhattan company, which contains a number of the best players on the American stage. "Becky Sharp" is the first successful dramatization of Thackeray's "Vanity Fair," a novel which has always been considered replete with dramatic material.

In "Pillars of Society," which will be given Saturday night only, Mrs. Fiske brings forth a new work of Henrik Ibsen, that master craftsman of the drama, and her interpretation of the play is said to have greatly increased public appreciation of the striking gifts of the great Norseman.

After completing his remarkably successful tour of the principal American cities, Henry E. Dixey will visit l'oronto next week in George Paston's and W. B. Maxwell's London comedy, "The Naked Truth." William A. Brady promises he will furnish at least one

The great outer walls, four feet six inches in thickness, the massive piers in the basement between which stretch low vaults of forty-five feet span, the huge steel stanchions, soaring upward to carry the dome, tell, in the language of the architect, of the Wesleyan Methodists' faith in their future. The great congress hall, which fills the centre of the building, still lies open to the sky. When the wide galleries now being constructed are complete it will accommodate two thousand five hundred and fifty people, who in case of fire or emergency could pass out in three minutes. At each corner of the hall, both on the gallery and main floors, are spacious foyers, where those attending the services or congresses may rest and chat; while on the entrance floor a suite of rooms will be set aside as a

women's club for the convenience of those coming up from the country. The entrance hall and grand staircase are in polished marble, giving a very rich effect, but apart from this the interior decoration of the building will be simple, almost to austerity. For six or eight years Scarboro Fair has labored under the disadvantage of storm and shade, but to-day all this was changed, and the glorious sunshine and beautiful blue sky attracted hundreds and hundreds of city people who otherwise would never have known the delights of riding out along the borders of Lake Ontario and seeing rural Ontario at its best. Notes From the Fair.

W. H. Pugsley of Richmond Hill, who returned last night from Arcola and Indian Head, says the wheat and other crops are all right—never better. "Nothing to complain about," said he." Stole His Wife's Furniture, Thomas Quinn was charged in the sessions yesterday with theft of house-hold furniture from Catharine Quinn his wife, from whom he had been separated four years. Mrs. Quinn, on the stand, told of being sent to Kingsten for two years for subornation of perjury. She had left the house well furnished and returned to find it almist empty. Cornelius Gorman swore that he had bought the goods from Quinn, who had stored them with him. The jury returned a verdict of guilty after twenty minutes' consideration.

Michael Gouroski, 494 West Ade-laide-street, was arrested yesterday by Policeman Craig (151) upon a warrant charging him with conduct. It is alleged that he was implicated in the row in Mulock-avenue, West Toronto, Saturday night, in which Policeman Devow was assault Visits Carmelite Monastery and Leaves

Why I Am Recommending Rochester

Some three years ago the owners of a property practically adjoining Rochester, found a small calcite vein carrying a little copper, and after sinking 60 feet found silver. To-day that little calcite-copper vein is being worked on the 500-foot level, and very rich in silver, and the deepest shaft in the Cobalt camp.

When Rochester made a surface discovery of 5000 ounces of ore, and Temiskaming only had a little copper, it looked good to me.

When Rochester made a surface discovery of 5000 ounces of ore, and Temiskaming only had a little copper, it looked good to me. Rochester shaft is down nearly 150 feet. The vein was rich on the 75-foot level, and is expected to be richer when cut on the 150-foot level.

I was looked upon as the official broker for Temiskaming & Hudson Bay at \$1.50 to \$3.00; for Temiskaming from 25c to \$2.00; for Beaver from 10c to 40c, and now Rochester. J. A. McILWAIN. 41 SCOTT STREET

NEW YORK, Sept. 28.—Cable advices announce that the public offering of £1,500,000 Union Pacific 1st and refunding 4 per cent. bonds in London has been completely successful and that the subscription has been closed. The Montreal market was not nearly so buoyant, selling being effective in Montreal Power and Dominion Steel Corporation, the latter, however, rally-ing at the close from the low price of

the day.

Bullish information is being handed out in connection with Dominion Steel Corporation on this market, but the stock is not at present attractive to local buyers.

A fair amount of investment purchases were reported, with transactions largely in Maple Leaf and Consumers' Gas.

Change markets were irregular at the close. Heavy tone prevailed in domestic securities owing to expectations that the Bank of England will advance its discount rate 1 per cent. to-morrow. To-day the bank is not discounting under 4 per cent. Americans finished heavy on advices from New York. Can. Pacs. were buoyant, mining shares closed below the best prices. We would prefer to buy on reactions, confining purchases to rails as a rule, especially protecting them with close stop order to safeguard against pro-fessional drives. Offerings appear in Union Pacific, Steel, Reading and St. Paul on rallies now. Sentiment still appears to be bullish on them in a number of offices. Favorable mention is still made of Beet Sugar. Profittaking is noted in the Interboros, it being said that the Morgan people want a clearer state political outlook before going ahead. - Financial Bulle-

Money for commercial purposes is extremely difficult to obtain and as the prospect is for no excessive rates in the near future, it is not unnatural to suppose that bankers are uneasy over the business outlook. During the present week New York banks are likely to sustain the heaviest cash loss of the year, while it also seems probable that e English discount rate will be advanced to-morrow. We strongly advise taking advantage of all bulges of moderate proportions to sell the active issues generally.-Town Topics

GRADUALLY WORKING HIGHER.

World Office Wednesday Evening, Sept. 28.

Trading was less active on the Toronto exchange to-day, but prices showed no weakness on that account. The South American tractions were in good demand, and it was said that London had awakened to the possibilities of Rio. While there was less speculation today, there was a better investment demand. This was acceptable as a guarantee for the future stability of prices. A further decline in Black Lake had a slight influence on speculative sentiment. Only a small amount of the Asbestos stocks are held here, however, and the effect of weakness in these issues should be of a temporary character. Reactions after good rallies are to be looked for, but quotations are gradually working higher.

Erickson Perkins & Co. had the following at the close:

Considerable strength was manifested and speculation broadened accordingly in the option market to-day. The old bull crowd took hold of the late winter and spring months and imparted some snap to the market for the first time in several weeks. Large shipments to Europe and fear of early frost about covered the news field. In the afternoon, considerable opposition developed against the advance and several active traders took turns in hammering January. They got it down 11 points from the high of the morning and the market closed rather heavy, but with gains for the day of 5 to 20 points. We are inclined to advise sales on these bulges on a scale up for the moment. 200 bulges on a scale up for the moment.

Boil the Water.

Dr. Sheard advises that it is better that the drinking water be boiled, but discussing the contradictions between the civic and provincial analyses of water, said: "The contamination floats in patches. Time and place are factors which, when applied to analyses, will produce totally different results. If 100 analyses of water were taken at the same time at 100 taps thruout the city it would be an accident if any two results would be identical. The water for one test might run thru a bad main, for another test from the reservoir, and so on."

NEW COMPANY A GOING CONCERN. THE PORT ARTHUR WAGON COMPANY, LIMITED, is a new Company, but will commence business under the most favorable austicus, having agreed to take over the Speight Wagon Company, Limited, of Markham, which is a going concern with a production capacity of the Company to a new factory to be erected at Port Arthur.

UNSURPASSED LOCATION OF PLANT. The location of the new factory is without doubt the finest in Canada, and will be situated on the shore of Thunder Bay at Port Arthur. It is unexcelled for the assembling of materials required in manufacturing wagons and sleighs, and has a commanding position in regard to the facilities for handling its freight by rail and water, which gives the Company a great advantage over its competitors.

CONCESSIONS. The Company has obtained valuable concessions from the City of Port Arthur, which include a grant of twenty acres of land, a 200-foot dock site, and exemption from taxation for twenty years, except local improvement and school rates.. The City of Port Arthur further guarantees bonds of the Company to the extent of \$100,000.00 at 5% for twenty years. NEW FACTORY 815 MILES NEARER THE GREAT NORTHWEST MARKET.

The new factory will be fireproof, built in the most modern style, equipped with machinery embodying all the latest improvements, and thoroughly up to date in every detail, with a capacity for turning out 10,000 wagons a year. The advantages derived by the Company in locating at Port Arthur are numerous, the chief one being, perhaps, the enormous saving in freight, Port Arthur being 30 cents per 100 lbs. nearer the market than any other wagon factory in Canada. This alone gives a saving in freight of \$3.50 per wagon. Coal can be delivered from the American ports to Port Arthur at a freight rate of 32 % cents per ton as compared with 90 cents per ton to Woodstock and \$1.00 to Petrolia.

This Company has a contract with the John Deere Plow Co., Limited, of Winnipeg, for supplying its total requirements of wagons and sleighs. That Company states that its requirements for the year 1911 will be 4,500 wagons and 1,500 sleighs.

The Company has a further contract with the Tudhope, Anderson Company, Ltd., of Winnipeg, to supply it with wagons for a period of five It is well known that thousands of farmers are annually pouring into the Northwest, and it is confidently estimated that the above requirements will be more than doubled in the near future. Last year an immense number of wagons was imported into Canada and sold in the Northwest, upon which a duty of 25% was paid.

RAW MATERIALS. This Company will be able to obtain much of its raw material in its immediate vicinity, thereby effect freight. With all the advantages enumerated, it is certain that within a very short time the plant will be taxed to its full extent.

The Company has been fortunate in being able to secure the services of Mr. T. H. Speight as its Manager. He has been associated with the Speight Wagon Company, Limited, for the past eighteen years, and is widely known for his integrity and business ability.

The following certificate has been prepared and certified by Messrs. Jenkins & Hardy, of Toronto, Chartered Accountants:

Secretary-Treasurer Port Arthur Wagon Co., Limited:

Dear Sir,—We have examined the books of The Speight Wagon Company, Ltd., at Markham, Ont., for the period December 1st, 1910, to July 31st, 1910, and certify that based upon the contract sale prices to the John Deere Plow Company, Limited, the net profit on its sales

No estimate has been taken of the saving in freight by reason of manufacturing point being nearer the market, and the closer proximity to points at which lumber can be more advantageously purchased and delivered than at Markham, Petrolia, Woodstock or Chatham, nor a further saving will also be made by the Company by reason of its recedom from all taxation (except school and local improvement
