Two Clubs ---That Thrifty Women Who Do Their Own Home Sewing Will Appreciate The "White" Sewing Machine Club and the "Hall-Borchert" Dress Form Club---Each Open to 100 Members Monday and Tuesday

To the woman who makes her own dresses as well as the professional dressmaker a good dress form and a good sewing machine are inseparable necessities.

Knowing that there are scores of women who for lack of sufficient cash to purchase outright either of these home necessities are without them, we have organized the two above-mentioned clubs, enabling those who join to at once own a genuine "White" Sewing Machine or a "Hall-Borchert" Dress Form—acknowledged by all the best in their respective lines—by merely paying little weekly sums.

One Dollar Makes You a Member of Either of These Clubs You can have the Dress Form or Sewing Machine you choose sent home at once-Small Weekly Dues Soon Pay for Them.

The immense advantage and pleasure that comes with having a Sewing Machine that does its work faultlessly and with ease, making the finest and most perfect stitches, tucks and frills and all the other fancy effects in sewing that the dainty woman likes, is a delight only known to those who own a "White" Sewing Machine. Will you let a mere \$1 a week stand in your way of owning one?

You have your choice of any of the new models of "White" Sewing Machines, which are marvels of perfection in construction and finish. Some of the special features are: Rotary and Improved Vibrator Shuttle, Automatic Lift, Tension Indicator, Stitch Regulator, Rotary Spool Pin, Dust Caps, Ball Bearings, High Speed, Noiseless Lock and Chain Stitch—cases are very handsome in quartered oak, fumed or golden finish.

Any style of 1915 "White" Sewing Machine may be purchased on the Club Plan—prices start at \$24.75. Just \$1 down—balance easy. No extras or interest charged. No Agents' or C a n vassers' c o mnissions to pay — we do not employ them.

ter of the bride, sang "All Mine Alone." The chancel of the church, was lovely with paims and ferns and pink and white snapdragon, flowers and rib-bon also marking the guests' pews. The bride was given away by her brother, Mr. Paul Gillespie, and was looking very sweet in her gown of ivory satin with overdress of ninon bordered with pearls. The full skirt was the new fashionable ankle length with a very long train of the satin. Her tulle vell was held with a wreath of orange blossoms, and she carried a shower of illies of the valley and roses and wore the bridegroom's gift, a string of pearls. The bridesmaids were Miss Laura Gillespie, the bride's sister, and Miss Kathleen Millman, sister of the bridegroom. They wore white slik volle frocks girdled with pink satin and with long sash ends and big pink chifton hats with black veivet strings. They carried bouquets of daisles and sweet peas. Their gifts were pearl and peridot brooches, and the best man, Mr. Norman Robinson and Mr. John Gillespie, who was wearing a handsome gown of black and white volle and black and white tulle hat and carrying Beauty roses, held a re-ception after the ceremony at her home in Warren road. HE task of providing for the many idle of Canada-namely the question of providing for the question of providing for the many tourists who can't travel in Europe on account of the war is a hard task. Trips to the Rockies, to the Muskoka lakes, or to the north-ern wilds, all these are offered, but they don't seem to solve the problem. The only way that they can be satis-fied is to give them a Europe that is "Made in Canada."

"Made in Canada." "Made in Canada." For, despite the war, Berlin, (Ont.), Paris (Ont.), and Brussels (Ont.), can still be visited with ease. Why should anyone patronize a German Dresden when we have a Canadian one in Ontario? Of course there is a certain amount of prejudice in favor of the European cities, but this war will do much to make us realize that home products are as good as foreign ones. Gradually we shall gain cognizance of the fact that Bremen (Sask.), Havre (Quebeo), Liverpool (Nova Scotia), are some of the great seaports in the world, and Liverpool (Nova Scotia), are some of the great seaports in the world, and of the vast trade that plies between London (Ont.), and Hamburg (Ont.). We shall soon recognize that strategic significance of Gibraltar (Ont.), Dun-kirk (Sask.), Metz (Ont.), and also re-cognize the literary traditions of Stratford (Ont.), and the educational atmosphere of Oxford (Nova Scotia), Heidleburg (Ont.), and Cambridge (New Brunswick). At last we shall come to cheristh the architectural glories of Milan (Que.), Florence (Nova Scotia), and Moscow (Ont.), and the famous galleries of Vienna (Ont.). We can also visit the famous summer resort of Naples (Manitoba), and also see the antique splendor of Athens (Ont.). In short, it is possible to enjoy all

Their Own Lives.

And then we started to talking of rights. We have a right to be brave, and a right to be free, and a right to be honest, and a right to be happy, so every one seemed to think. Especially the right to be happy.

That appeared to be the one important thing-happiness. We talked of the woman who left her own people and married a Chinaman and went to live in China in a little house of glass with a flower garden where they tied silver bells upon the roses.

And she never walks abroad, and she never sees white folks, and she wears, they say, a cherry blossom jacket and a pair of jade green trousers. "Well," said the University Girl, "it's her own life, why shouldn't she do

with it as she chooses?".

And we talked of the man we had all expected so much from - the man who took to drinking and became an ordinary tramp, begging for a meal

along the road. "If he is happier so," said the Poet, and we all nodded wisely. And we talked of the girl who threw away her good name and broke her mother's heart, and ran away with the husband of her best friend.

"After all." we said together very comfortably, "after all, it is her own life, d she has a right to be happy in her own way." Not one of us said one word about the right to be good or the right to be ad or the right to be generous.

Ran Railways in China

The railway engineer starts in a elightly different way, and the college course is not such an essential part of his training. Many a local engineer has advanced from 'carrying a chain' to the post of divisional engineer with-out having crossed the threshold of a university. But the college course will take off the first few years of struggle and place him at once in a higher sal aried position. During the last few months the railway engineers have, thru no fault of their work, been gradually losing their posiwork, been gradually losing their posi-tions, on the completion of the thru lines, and these men, practically trained, and with wide experience,— both in Canada and, sometimes, in other countries, are going into other branches of civil engineering. One of these, a graduate of Queens Univer-sity and the R. M. C., has taken up house contracting as a profession and Onio house contracting as a profession and Oni finds his technical knowledge to stand him in good stead. "A contractor cannot necessarily make an engineer cannot necessarily make an engineer but there's no reason why an engineer should not make a good contractor." This engineer spent several years in the west on railroad construction. Later he was engaged by one of the largest railways in China, where he had charge of five sections of a division, and had under him from one thousand to ten thousand coolies—both men and women." "I came back to Canada to do some special work for one of the do some special work for one of the railways, and was stationed in To-ronto, where I got interested in con-tracting, and decided to go into it on my own account." he said. "It is pretty difficult to start out without financial backing. I didn't have any-one behind me, and had just what I had saved up to depend on. But I found you could get on with stick-ing right to it. I started out with tate small buildings, and later on went into bigger work. At first I thought a \$7000 contract was a big thing. Now have no hesitation in undertaking a \$20,000 contract. I am not at all sorry that I took up this work, I had Cele come to the conclusion that there is sweet very little money for a civil engineer in railroad construction Per **Electrical Transmission** "The electrical engineer takes up his work from a very different standpoint. His chief success comes from his ap-pointment as the head of some municipal electrical concern, or power plant, and he is at all times the servant of the public. As with all the other engineers his chief training is practical, and the best man is usually found to be the man who at one phase of his career worked the hardest with his hands."

A special branch of civil engineer-ing, that of making out the plans of all the houses and buildings in a city for the records to be filed by various fire insurance companies has been the life work of a prominent engineer, in the city. In his work he has traveled over a streat many countries, and in Late over a great many countries, and in

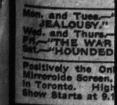

The machine must save him time, trouble and expense before it's any good to him. For example, the me-chanical stoker which is our work now, can use a cheaper grade of coal and get exactly the same energy as a more expensive grade used in the obsolete method of hand firing can get the same energy by using less of a more expensive grade. That's a great sav-ing to the man who instals it in his factory or the company that uses it in his factory or the company that uses it in his factory or the company that uses it. "The Spoilers"

SERIOUS

It must have cost W. N. Selig a small fortune to visualize Rex Beach's famous story, "The Spoilers," which is presented in three acts and nine parts,

famous story, "The Spoilers," which is presented in three acts and nine parts, especially when every foot contains a powerful punch, for in order to se-cure action of this character it re-guired no end of costly scenes for its production. In providing for a per-fect framework for this wonderful story, Mr. Selig stopped at nothing in order to secure the desired results. The Spoilers" exemplifies the fact that fiction may have as high or high-er aim than fact. In addition to tell-ing the gripping and absorbing story, it reflects certain phases of the onward march of civilization in America, which will never come again, for the which will never come again, for the investign phases of the onward march of civilization in America, which will never come again, for the of the great gold rushes. These plc-turesque pligrimages that commenced with the Spanish Invasion, were con-tinued with the journeys of the pioneers over the great plans and mountains of the far west in the days of '49. and concluded with the toil-some. These were potential periods in the big advance that made conquest of the unknown to gratify man's never ending thirst for gold. These have all gone to make a part of history.

PPORTUNITY knocks at the door for everyo Those who are alert, grasp at this elusive visitor quickly and surely. The placid, matter-of-fact peronage waits until opportunity has had time to enter by the front door, survey the interior and make an exit at the rear, before attempting to give it a strangle hold.

Motion-picture posing affords more opportunity than any other profession or industry. The chance is more frequent, the qualities necessary for success are not difficult of attainment or too numerous. The length of time required to learn the business is comparatively short. In my mail every day I receive dozens of letters requesting information.

from moving-picture aspirants as to "how they can get in the movies." There has been nothing that I could say to these correspondents except to come to the studio for a "try-out."

An Unusual Opportunity

An Unusual Opportunity Something more tangible now presents itself. I am looking for a young siri and a young man. If the right one appears a future of greatness awaits them. They can rise to the topmost rung in the ladder of motion-picture fame. An opportunity is here offered that will be hard to duplicate any-where in the world. The young man or young women that is chosen will appear at a Broadway Theatre in New York City and on the Strand in Lon-don. Their names will be as widely known as any motion-picture star in the world. Why should Toronto not develop great stars within its borders? If any young man or young wannes to enter the moving pictures and posessing intelligence, good breeding, ambition and with a desire to work week I will gladly advise them or give them an option as to their possi-bilities. Inderstand, this is not an advertisement. I am writing this article for the express purpose of assisting any young, ambitious person to realize his or her desire to become proficient in the art of moving-picture acting. They will be treated with the utmost courtesy and consideration, and every chance given them to make a sure, rapid advance. Stunendous Pictures to Be Made Here

Stella Razeto, the clever little Selig actress, has been quite sick. She was very close to appendicitis, and for over a week had a high fever. Fort-unately she is on the high road to recovery, and in the meantime is com-forted by the fact that her beloved wire-haired terrier (and terror) Paddy Wuffen, has covered his energetic body with glory in his star part in "The Ingratitude of Liz Taylor," which Ed. LeSaint is producing. Dur-ing the absence of Miss Razeto, Vivian Reed has been taking her part.

Stupendous Picture to Be Made Here

Stupendous Picture to be iviate fiere Now a word about the picture. The new management, the Beury Feature Film Company, have several enormous contracts under way. The first will be an eight-reel feature play already booked for a Broadway play-house, New York City. Most of the picture will be made in Toronto. but parts of it will be taken in New York, Washington, Detroit and Denver. It will be released in the early fall, and work is to commence almost immedi-ately. To make this picture, an expenditure of from \$40,000 to \$50,00 will be necessary. Many prominent men of the United States will be seen dur-ing the course of the action of the play. Many daring "stunts" will be shown here, and this city will be extensively advertised thereby. People are now going to California to see Universal City. On a miniature scale the same thing will take place in Your own city. Houses will be built only to be burned, and automobiles will be wrecked. In several of the scenes of this play as many as five hundred local people will be used.

The above is about the only information I dare give my readers now. I like them to know about the latest moves of the motion-picture industry in Canada, and that is why I am writing the above.

Novelty, Always Novelty

People You Often See on

the Screen---From the

Movie Studios.

Edna Maison is thru with the ori-ental series at the big "U", and is not sorry for many things. She thinks that serial work is rather monotonous, for one thing, and prefers the other kind of work, picture by picture, in which one has to change and so avoid monotony. Last week a camel ran away with her at Oxford, and fell down a sand bank and, of course, Edna is very emphatic in her opinions regard-ing camels as opposed to automobiles.

One of the greatest advantages in the motion-picture industry is novel And so, there is always a great air of mystery about the doings of the varie studios, a mystery which, after all, is more or less superfluous, for import as the novelty or "stunt" may be to the particular company doing it, any other organization it would be practically worthless. As a matter fact, many a producing organization has spent thousands and many hours secret work in the perfection of an effect which either had previously be thought out to an even greater degree of perfection by some other compa or which was later found commercially useless. However, each compa always hopes to have found the one wonderful innovation which will mean fortune.

M AURICE KAUFFMANN, recent-ly appointed manager of the local Pathe Exchange, was formerly with the local office of the World Film Corporation. Herbert Standing, the fine old actor, who is appearing in the Bosworth in-corporated films, and whose finished methods stand out so clearly in the films he appears in, is the father of seven sons and five daughters. Guy standing, the well known English ac-tor. is the eldest. Percy is with an uncle, W. T. Carleton, appearing in plctures: Aubrey is at present tra-velling with his own company in Eng-land: Cecil Wyndham is also in the old country, starring in "The Write Man": Herbert is playing in New York, while his twin, Harold, has the lead in "The Cardinal," and Jack is with Lubin in Philadelphia. The two girls, fourteen and ten, are at home with him.

FLICKERINGS Even merit has to be advertised beore it pays.

Turnips, lettuce and pictureplay olots are sprouting.

As to the effects of color music with Scriabine's "Poem of Fire," which re-presents the extreme of what musical psychologists have attempted, Mr. Chase said: "Enough red will make any audience see fire. Life, now, begins for him in earnest, and when he trots off by the soldier's side the last thing he sees as Ann Middleton, like many another girl, tired of spending her energies on ambulance work and Auction bridge, seeks pastures new and having a romantic view of herself, incidentally gets earnest, and when he trots off by the soldier's side, the last thing he sees as he looks back at the bend of the road, is the stiff, brave figure of his old master standing before the little farm-house. and the last thing he hears is the wild wailing of wee Lisa, who re-fused to be comforted. To show the kind of stuff this particular Belgian dog was made of one scene is suffi-cient. The German's stormed the trench. There was a frightful conon track of a lover or two with private means. This little frivolity on her part can easily be forgiven when one remembers that the Middleton home remembers that the Middleton home consists of a father step-mother and four step-sisters. Dr. Middleton's practice was not a lucrative one and the step-mother made all the family feel that they must "get off or get out." Ann tried to do both. Pierrot and Jef stood waiting, the impulse to flee not having come to them. They stood dazed and terrified. Then a big brute, his face distorted with the battle mad-ness which turns a man into a fiend, came cursing up the bank, and seeing the dogs, thrust his bayonet wanton-ly thru Jefs heart. Pierrot saw his team-mate fall without a cry. Un-reasoning rage seized him, and with what remained of his once agile strength, he leaped at the man's bhroat, and sank his fangs into the fiesh. INTERESTING addresses on India were given at the open meeting of the Sir Henry Pellat Chapter, I.O.D.E., Wednesday, at Columbus Hall, Dr. Sunder Singh gave a most pictur-escue story of his native land, taking his hearers thru the rich possessions of the Indian Empire, and on thru the historic cities of Bombay, Calcutta and Benares. It was all most delightful. The next speaker was Mr. Arthur Hawkes, who predicted that Canada would have a greater share in the policies of the empire after the war than now. He made a plea for a let-ting down of the barriers between the east and west, showing plainly that as they are so interdependent the wel-fare of one depends upon the fate of the other. He told of the mild manners and thoughtful intellectuality of even the uneducated in India, and supported the idea of a more open in-tercourse and greater friendship of the people of Canada for the people

who come to them from across the Pacific.

HE old poet who asked "What's in a name?" lived before the days of vaudeville, and the inistent demand of managers for billing that is different. Billing, be it known, is the descriptive line following the vaudeville artist's name in the newspaper advertisement, or theatre program. Hence, we have John Jones, monologist, or Mary Brown, singing comedienne. Those who patronize vaudeville of the primary grade are agreed that the custom is commendable. Otherwise, in some cases there might be doubt as to what John or

Mary were really doing. In higher class vaudeville, however, effort has been made to evade the

trite and conventional in billing. This endeavor is not always attended with success. For example, Lady Sen Mei, who is a feature attraction at the Shea theatre this work offering a relative theatre this week, offering a selection of the newest and best of the season's song successes, and one or two native numbers, is billed as the Chinese Nightingale. This play is in five fine acts, and Wil-liam H. Crane, who has been recently converted to the screen, will be seen in his most popular role—that of. "David Harum." The atmospheric ad-herence of the film to the original drama is marvelous. The scenes on the farm, in Harum's house, in the horse market, all provide a colorful setting for the play. During the latter half of the week, too, there will be a completely fresh instalment of the Pathe news pictures —a change in these always takes place at mid-week at the Strand—and an

Only 3 More Hudsons Per Dealer This Spring

HUDSON

\$2100

F. O. B. Terente

All the Hudsons in dealers' hands, plus the next two months' output, will supply an average of only about three cars per dealer. We believe that many men who want Hudsons this spring will find it out too late.

Last spring, thousands were delayed in getting their Hudson Light Six. All summer prompt delivery was impossible. We were always weeks behind.

This spring we have new attrac-tions. The Light Six is the vogue. And more than 12,000 Light Hudsos are running, each creating new desire for this car. So, despite our big winter output, it can hardly be possible to make prompt deliveries long.

That is true of First Choice cars of every class. There is never enough in the spring.

Hudson Comes First

We announce this because Hudson must come first with you, if you want a high-grade Light Six.

Hudson stands out as the class car. It shows the results of our years of refinement. It has proved itself on millions of miles of road. Everywhere there are users-over 12,000 in all-to vouch that the car is perfect.

It is the only Light Six designed by Howard E. Coffin. It is the lightest of all the 7-passenger Sixes. It is the most refined. It embodies Hudson' standards. In luxury, finish and equipment it matches the costliest cars.

You see in the Hudson the Light Six perfected. You see a four-year result, with every part and detail in a finished state. You will not becontent with any second choice.

This is a New Type

Bear that in mind. The Light Six involves new materials, a new-type motor, new designs for every part. The changes upset old standards. So a car of this type must prove itself free from mistakes.

The Light Six, beyond question, is the standard future type. No man would consider going back to heavy, clumsy cars. But it is wise in this type to get a well-tried car.

The Hudson Light Six has been run by owners at least 30 million miles. And all that experience has not uncovered a single fault or weakness.

You are certain to prefer it.

The cry for automobile materials from the manufacturers of parts and accessories is heartrending today, according to one representative. The makers of automobiles are forcing the makers of parts and accessories to makers of parts and accessories to night and day work. CREDULOUS MOTOR CAR BUYERS

CREDULOUS MOTOR CAR BUYERS. A little more healthy skepticism on the part of automobile buyers would profit them greatly, according to Mr. Thompson, manager of the Domlaion Automobile Co., the local Hudson dis-tributors. Most people are too ready to believe all they hear. They accept at face value wildly improbable stories and perfectly absurd statements male to them by salesmen. The result is they are carried off their feet, loge their sense of good business judgment and later are bitterly disappointed. A trap that catches many is the lure of the big trading allowance. Yet every buyer knows, if he would but apply his good business sense, that old motor cars have as definite and fixed a value on the market as have other articles. One dealer rarely can sell a used car for a much different figure than can his neighbor. Therefore, there must be some secondary motive or condition that leads one dealer to offer a much higher trading price than his neighbor. A little thought usually will demore

Roy D. Chapin, president of the Hudson Motor Car Company, and one of the most prominent Americans in connection with the good roads movement, has written an interesting appeal to American and Canadian motorists to take advantage of the natural beauties of this continent when planning their summer tours. Mr. Chapin after pointing out that the European war will effectually put a stop to all overseas touring, discusses the many natural beauties to be found in the United States and Canada. He draws favorable comparison between the different types of scenery met with in America and Europe. We have mounains, rivers, lakes and forests that

Mr. Chapin contends that too few of us are acquainted with our own continent. He heartily recommends hat everyone who can spare the time should make his vacation a motor one to some of the beauty spots which nature has so generously provided in the United States and Canada.

tary and educational institutions, and sporting, scientific and business organizations of the United States, to assist the war and navy departments in developing aviation corps for the national guard and naval militia, to demonstrate for the postoffice department the practicability of carrying mail by aeroplane to hundreds of places so isolated that it now takes days to deliver mail that could be delivered by aeroplane in a few hours, to develop the sport and to demon-strate the practicability of the aeroplane for general use.

A tentative schedule of prizes to be offered is as follows: A "best record" prize of \$10,100 to be awarded in daily prizes of \$100 each to the aviator who holds the best cross-country flying record at the end of each day, the record to have been made in a flight of not longer than ten hours' duration and the distance to be measured in a straight line. This prize has the special value of in-

ducing aviators to fly daily in order to beat the standing record. Eight "best record" prizes aggregat-ing \$10,100 to be awarded to the eight aviators who make the best records in the Daily Distance Competition, the prizes to be: \$3500, \$2500, \$1500, \$1000, \$750. \$500, \$250 and \$100.

A \$25,000 prize to be divided between the three aviators who make the best time in flights across the continent, starting from or ending at New York. This may induce the eastern aviators to continue their flights to the Pacific coast and the western aviators to the Atlantic, and possibly may result in

Atlantic, and possibly may result in a number of trans-continental flights during the competition. A prize of \$5000 or \$10,000 for the best demonstration of the practica-bility of mail-carrying, to be judged from the standpoint of regularity of service, protection afforded to mail matter from the elements and the ad-vantage of time saved over other me-thods of mail distribution. The post-office department has prepared a office department has prepared a schedule of isolated places in certain states where the delivery of mail be-tween points twenty and ninety miles apart now requires days, but which

would require only an hour or two by aeroplane. The principal value of this prize is that it will afford to the postoffice department the opportunity of determining if the people who want their mail delivered promptly will pay between 25 and 50 cents to have it delivered by aeroplane. If so, aero mail-carrying will be self-supporting,

as to begin the creation of an aviation reserve which will have the advantage of being used daily in peace, while being ever ready for service.

Prizes amounting to between \$5000 and \$10,000 to be divided among the aviators who cover the greatest number of miles during the competition, flying entirely by chart and compass. Prize of between \$1000 and \$5000 for: The best land and water aeroplanes. The best land and water aeropianes, participating in the competition, con-sidered from the standpoint of en-gineering and general fluish in con-struction of the machinesand comfort, afforded to the pifot and passengers; the best "schedule record" made, judg-ed by the number of times an avia[±] tor reaches previously designated, places on time; the best demonstra-tion given by both land and water aeroplanes equipped with automatic stabilizers; the lowest consumption of stabilizers; the lowest consumption of fuel and oil for miles covered; the largest number of passengers carried a given distance in land or water aero-planes, the construction of the ma-chines to afford the pilot and passen; gers the greatest amount of conven-ience and having proper seating ca² pacity for each; the best demonstra-tion given by either a land or water aeroplane equipped with two motors, which can be run independently of each other.

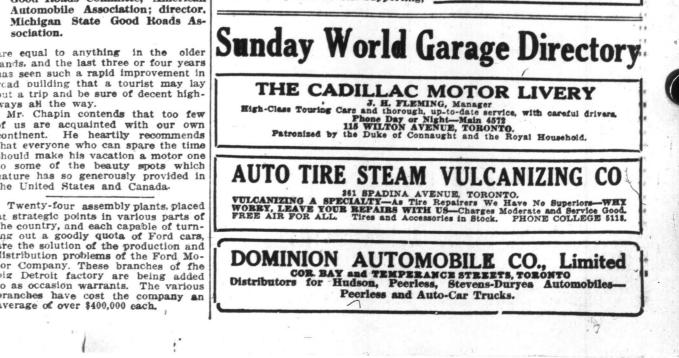

each other. All conditions are made principally with the intention of fostering normal flying by normal aviators. Therefore, while the world's record for continu-ous flying is of 24 hours and 12 minutes, and for distance covered in one day is of 1300 miles, the contest committee has limited th "flying day", to ten hours. to ten hours.

Prussia's Iron Rule

In the current issue of The Queen's Qua terly appears an interesting and suggestive article by E. F. Scott on "Germany's Contribution to Modern Culture." No one can deny that the older Germany contributed much to the higher intellectual life, more

ally in the realms of philosophy and music. But Mr. Scott holds that "the creative springs, which at one time yielded so abundantly, have for some reason, dried up during the last generation. And per-haps," he continues, "it is not difficult to discover the reason. The system, which has been imposed on the nation since 1870, has rushed out freedom and spontaneity. This, indeed, has been its very spirit—to substitute a mechanical regularity for the free movement in spirit." Prussian "Kultur" has had for its chief, and the subordination of the individual to the state, which, to the Prussian mind, is not synonymous with the people, but is distinct and separate from the The modern German has no use for the Lincoln idea of democracy—"Government of the people, by the people, for the people.' The state, embodied in the divinely-appointed Kaiser, must control all social forces, represented not by individuals, but by economic groups.

This conception is carried out in no depertment of national life with greater thoroness than in the organization of the German The difference between that army army. and the British army, in the types of officers and men that are the products, each of the

At the German front it was one incessant business of heel clicks and sword clanks. No re-mation of any kind, ramrod stiffness everywhere and an ever-present se of restriction as tho you were shut up in an ice chest. In a few ars, anyway, my marrow froze hard, and tho there was excessive ess everywhere, I was glad enough to get out of it and breather air once more, and not the rarefied atmosphere of Prussian fom." That is a vivid picture of the organized German, with all "mohlaban" the natural man driven out of him by an inexorable system. He may e a miracle of efficiency in his own way, but he is part of a machine that frowns on the free play of individuality, and on the games and ions, that accompany the voluntary armies of the British Empire.

The American was billeted with them and describes it as "the most gorious night's fun he had ever had in a peculiarly varied and mixed existence." He found the same spirit in Thomas Atkins—lightheartedness and good humor everywhere. "I shall never forget as long as I live," he is reported to have said. "The British Army, from G.H.Q. to drummer boy, is immense." Little wonder the Briton is an inscrutable mystery to the German product of the Prussian machine. With his peculiar notions of "Kultur," the "holiness" of war and the predestined achievement by Germany of world domination, the fun and frolic of the British soldier must be nothi that the beggars can fight him, and beat him, too.

Altho the war news no longer monopolizes the front page of the American newspapers, the politicians of the United States are watching its progress with no little interest. No president, since Lincoln, has been so unsparingly criticised at home and abroad.

The Society for Psychical Research would explain this, if it had the corroborated testi-mony of the young man that the horses and chariots of fire round is thing occurred at all, as a case of ye have done it unto one of these, my brethren, ye hallucination, and the prophet or unto me." And the parable of the God Master would be denounced from half Samaritan settles the our modern pulpits as a fraudulent therhood. There is far therhood, far more actual and practi-cal love among the soldiers of a regi-ment than there is among the members of the average church congregation. This is the test. It is deeds, not pro-fessions, that count. And it is this love, a divine fire, however feebly it may burn, which sets up the vital cur-rents, generates the new spiritual body and bestows the spiritual vision which the selfish and sordid social life renders impossible. So it is that Paul, who relied on no flesh and blood oracles for his philosophy, asperson and impostor, while Mr. Maskelyne would offer to reproduce the phenomena (with elaborate ma-chinery) in London. It is refreshing therefore to find in "Church Life," the organ of the Anglican Church in Canada, published weekly in Toronto, the following account, which I would scarcely have ventured to give with-out such orthodox backing, in the social life renders impossible. So it is that Paul, who relied on no flesh and blood oracies for his philosophy, as-sured the Corinthians (1.26) that "not many wise men after the flesh, not many mighty, not many noble" were of the fellowship, but the weak things, the base things that are. In the Graphic of Feb. 27, I find a, re-view of Arthur Applin's book on "Helldire Jack Jellicoe." which quotes a passage of some interest to those who understand the relation of the "invisible helpers" to ours. The Graphic tells us that it is a Devon-shire "superstition" that, when Eng-iand has need of a great man Drake's drum sounds, and Drake's spirit "in-habits the right man." That is to say. Drake incarnates when he is needed. Mr. Applin was in Devomshire a little while after the war broke out, and was talking to an ancient tar about the story. Suddeniy the old man's face grew grave, and for a long time he was silent. Then he spoke. "The drum was beat." he whispertd "Drake's drum was heered to beat a while back; our lads heered 'er, one night when they was puttin' out from Plymouth Sound." He nodded his head to and fro as he took off his issue of April 22: . . . THOSE who read an interesting sketch called "Bowmen" will also be impressed with the fol-lowing extract from a letter from England. The letter had nothing to do with the sketch, and it comes with very strong support as to its genu-ineness. "Last Sunday I met a lady who told me she knew two officers both of whom had themselves seen the Angels who saved their left wing from Germans when they came right from Germans when they came right from Germans when they came right upon them during our retreat from Mons. They expected annihilation as they were almost helpless, when to their amazement the Germans stood like dazed men, never so much as touched their guns nor stirred till we had turned round and escaped by some cross roads. One of her friends, who was not a religious man. told her he saw a troop of Angels told her he saw a troop of Angels between us and the enemy and he has been a changed man ever since. The other man she met in London last week, she asked him if he had heard week, she asked him if he had heard the wonderful stories of Angels. He said he had seen them himself, as while he and his Company were re-treating, they heard the German cav-alry tearing after them, they ran for a place where they thought they might make a stand with some hopes of safety, but before they could reach it the German cavalry were upon them, so they turned and faced the enemy expecting instant death, when the ad he come back, as he said he wull back; our lads heered 'er, one might when they was puttin' out from inght when they was puttin' out from the ad to and fro as he took off his cap: "But I knawed long back, when I stood afore Jacky Jellicoe, close as to standin' to yew; I caught his eye --and I knawed it was Drake come back. . . . This and more, too, can be said of the men of the Canadian Contingent who have distinguished themselves so gloriously in the last great battle. They, too, are volunteers, who trained for the joy of training that they might be the better able to obey the call of

King and Country. That training was long and laborious and performed under conditions that saving for the actual shock of battle, were not one whit less arduous and exacting than those they met in the waterlogged trenches of Flanders. These Canadians are of the true British breed in their love of sport and play their games of football and baseball in fields that are well within the zone of fire. That irrepressible gaiety and love. of fun, even under the constant shadow of death, is beyond the comprehension of the stolid German who pre-fers to cultivate his hate and his "Kultur" by gnashing his teeth at accursed England and dreaming of "The Day" that will never come. It is another aspect of the astonishing contrast in the temper of the British and German armies and in the Lational temperaments. One is based on free individuality and the sporting instinct-the other is the result of a mechanical and liberty crushing system.

WINDOW GLEAMS

At the same time, if the war should terminate in a year without the United States being drawn into hostilities and especially if Mr. Wilson should play even the small part in bringing about peace which Mr. Roosevelt did in the case of the Russo-Japanese war, the president may occupy a commanding position.

It looks now as tho no one would oppose his renomination and he may prove to be so much stronger than his party that very few politicians will be anxious to run against him for the election. Naming the Day

There is something to be said in favor of the statutory election day in national and provincial, as well as in municipal affairs. The election that comes along like Christmas, the taxes, or any other annual visitation, causes no great worry or excitement. We had a lively brush for mayor last January without greatly dislocating the city or interfering at all with the war.

There is great tyranny in words. If we call an official a premier and his district a province we fancy in some way that he is more important than the mayor of a city. Thus people believe that rites and ceremonies should be observed in provincial elections which would be laughed at if insisted upon in the municipal elections. Yet the City of Toronto has a greater population than any province in Canada outside of Ontario, except Quebec. The mayor of Toronto has about seven times the responsibility that rests upon the premier of Prince Edward Island.

We might go so far as to point out that the City of London has a greater population than the Dominion of Canada, but of course, a nation is more important than a city, however, populous. No doubt, they are electing their aldermen and city officials in the big cities of the empire without any difficulty or great excitement and no doubt we could elect our members of parliament without any great convulsion. It is the suspense and uncertainty about the date that makes all the trouble.

In other words, when we can use the weapons or the talents are PEOPLE AT once ask why such a story is not at once substanti-ated. It ought to be clear that any officer officially reporting such an incident would endanger his repu-tation for the rest of his career. We use the weapons or the talents we possess we are entrusted with others. They develop in us by reason of our own activity. Many soldiers would, perhaps, be inclined to let the Angels do all the fighting, if they tation for the rest of his career. We are too material at this stage of our development to accept the statements of individuals about such occurrences. Besides if they were true it would upset business and commerce and disorganize society generally on its present lines. Those who make this objection do not want another order of things, and they generally refuse to believe that there could be a better order. Eating and drinking and making money and sport is all there is in life for vast multitudes who cannot see the Angels and who regard such beliefs as rather uncomfortable. They probably make pessimistic deductions based on an erroneous conception of religious teachings which they fancy are confirmed by any phenomemon they are forced by their system to class as supernatural. ther corner, which Motfatt placed perfectly, but Tustain made a beautiful save. Unity now got away, but Hatton who behind when well placed. Wych wood came again and got another corner, Ransome shooting behind. The one-back game played by Unity was a big handicap to Wychwood, who were continually being pulled up, for offside. After a spell of midfield play Wychwood came down in a line, but Field spoiled a fine chance by shooting straight at Tustain. It was all Wychwood up to half time, which arrived with the score sheet blank. Wright restarted for Unity. Wychwood free spell of unity came right back, Will cock saving nicely from Wright. Wychwood put on the pressure and from a nice shot, giving Tustain no chance. A spell of very tame and uniteresting play followed. Wilding got away on the left for Unity, but shot behind. Unity were now further handleapped, Standing having to leave the field with a strained leg. Wychwood got down again, but Tustain made a miraculous sive from Field. Wychwood got two corners in as many minutes.

QUEEN'S PARK EDGED

OUT DAVENPORTS

Close Score in Fast Contest At **Dunlop** Field in First Division.

Queen's Park edged out Davenports goals to 1 at Dunlop's field, Saturday afternoon. The game which was fast and well contested thruout, was nevertheless clean and provided some highclass football for a good crowd of enthusiasts.

Both teams started the game at a fair pace and kept the ball swinging up and down the field. Sims livened Enfield up with a hard shot from close in. At the other end Gilbert just managed to tip Fidler's header around the post, conceding a corner, but it was cleared. Clever work on the part of Sims secured the first goal for Queen's Park. He broke away with Barclay, the rightwinger trailing, and with Wildash running over to tackle him. As he couldn't get a shot owing to the back coming across fast, he back-heeled, when still on the run, to Barker, who gave Enfield no chance to clear his fast drive. Play was transferred to the Parkers' half of field, where the wrole Davanport for-ward and half back lines maneouvred the ball around for fully five minutes, but couldn't beat the opposing defence. The black and white squad retaliated by forcing a corner at Daven's end but Acourt headed the kick past. Even play followed until half time was cal-led. The final period saw the play as fast as ever but very clean. Still, Davenports evened matters up thru a foul. Enfield, Queens Park goalkeeper, carried the ball with the result that Davenports scored from the foul kick, Ernie Fidler being the marksman. After rather even play another goal was counted thru a foul. Croucher, Daven's centre half, handled the ball inside the penalty area, and Jack Highet scored with the kick. The west Highet scored with the kick. The west end team forced the play after this but found a hard stumbling block in the opposing pair of backs, who played a strong defence game. McIntosh had a nice run down the left wing but fin-ished by shooting over the bar. The ball was kept going from end to end at a great clip, with the players on either side not sparing themselves, but with no more scoring when time was called.

The line-up: Queens Park (2)-Gil-bert, goal; Mawson and Highet, Acourt, Lowe, Martin, halves; Barclay, Owens, Lowe, Martin, halves; Barclay, Owens, Sims, Troke and McIntosh, forwards. In a Second Division T. and D. game at Willowvale Park Saturday between Lancashire and Orchard, the former monopolized the play, especially in the second half, and ran out winners by: Boals to 0. The teams were: Lancashire (S)-Laywock, Shaw, Con-way, Arden, S. Jones, Knowles, A. Jones, Wright, Bowman, Thompson, Abran. Orchard (0)-Sinciair, Reed, Balmer, Brownlee, Cowan, Athier, Davison, Smith, Batten, McCome, McColl. In the first half only the brilliant goal-keeping of Sinciair and the defence work of Balmer kept the score down. As si was goals were scored by S. Jones and A. Jones. A Jones played an excellent same at outside right. Half-time score: Lancashire 2. Orchard 0. In the second period the Orchard boys appeared to lose heart and were penned in their own half all the time. Goals were scored by Bowman (2), S. Jones a fair Medan from another. Arden made No. 8 in the last minute. Final score: Lancashire 8, Orchard 0.

The game between Don Valley and the Street Railway which resulted in a 5 to 2 win for the latter, was played at Willowvale Park Saturday after-noon. Many opportunities were miss-ed by both sides and the score re-presents the run of the play. The teams lined up as follows: Don Valley: Wallbanks, Duffin, Douglas, Sullivan Johnson, Grant, Bald-win, Beard, Morley. Hutchinson, Mac-Lean. Before a good crowd Saturday at Eaton's field, Eaton and Devonians, after a great game were even at the finish, the final score being 1-1. Eatons were the first to score, Muir finding the net with a nice shot. Altho a goal in arrear, Devonians had the best of the exchange, but it was after 15 minutes of the hal that they equal-ized. After this play was exciting, both teams trying hard to find the net, but both defences held out and one of the best games seen in a while ended as above.

one of the best games seen in a white ended as above. For Eatons, McCracken, Gilchrist, Balder, Muir, McNeilly and McAdam were best, while for the Devons, Hunt, Hopper, Horne, Leonard and Clancy were good. The teams: Eatons-McCracken, Tweedie, Gil-christ, McAdam, Baldwin, Givens, Phair, Muir, Worral, McNeilly and Molyneaux. Doyle, Dalgleish, McKenzie, Owens, Bryant. In the first twenty minutes there was not much to choose between the two teams. No attempt was made at passing and the ball was lobbed about over the field. From a breakway MacLean put in a fine shot, which Ben-nett tipped over the bar and from the ensuing corner Hutchinson put thru for the Valey. They did not hold their lead for long, however, McKenzie get-ting down and firing in a shot which gave the goalie no chance.

gave the goalie no chance. Five minutes from half-time Arrow-smith handled in the penalty area and Beard made no mistake with the kick,

putting Valley ahead. Halftime, Don Valley 2, Street Rail-

Referee—G. E. Mills. Devonians kicked and at once start-ed to press, but Gilchrist sent them to the rightabout, giving McNeilly pos-session. That player put in a swift ground shot, Hunt having to throw himself full length to save. After some nice combination by the Devon boys, Hopper misjudged a nice pass from Horne with nobody in front but the goalkeeper. The Devons still contin-ued to have slightly the better of the exchanges but found the Eaton de-fence solid. Eatons now woke up and R. Muir with a nice shot opened the scoring. The Devons went right back and Hopper strick the upright with a beauty. A foul against Baldwin broke bad for Eatons, but Leonard shot into McCracken's hands. Eatons got going again but Worrall spoilt by offside. Bruce, next had a try with a long shot, McCracken having no difficulty in clearing his line. Devons came again and forced two corners which proved a low line. Eatons again toop up the running and Worrall missed from a perfect centre by Phair. The interval arrived with the Big Store boys lead-ing 1-0. On restarting, play was even for a way, 0. arrived with the Big Store boys lead-ing 1-0. On restarting, play was even for a time, the ball traveling from end to end, with clocklike precision. Devon-ians, thru Bruce, here evened up the score, McCracken having no chance to save, he being sighted. Muir es-sayed a long shot from the side line which puzzled Hunt, but he managed to clear his lines. Both teams tried hard for the winning goal and both de-fences were sorely taxed, but held out, and a very interesting and cleverly fought game ended in a draw 1-1.

PURE FOOD is more than a matter of Parliamentary enactment. Food preparations may still legally contain ingredients which the Consumer, who takes an intelligent interest in his health, will not eat.

The spirit behind the movement for better food is more or less effectually expressed in the Food Laws, but the honest Caterer is not satisfied with a mere compliance with the letter of the law; having caught the spirit, he serves a food of a quality SURPASSING legal requirements. He states what he is doing, and patiently waits for public indifference to be replaced by public endorsement. If it looks good, and tastes good, it certainly must be good, and we have the best prepared food in our clean Kitchen and Bakery, which are always ready for your inspection.

We appreciate your trade-and deserve it.

Have you ever noticed the difference in Lunch Rooms? For instance, in our place, on coming in you take a check, then pass up to our counter, order your meal, get your check punched, and pay same on your way going out. Did it ever occur to you that this was the most sanitary way? If not, we will give you a word of explanation. Visit other Lunch Rooms in the City during the noon rush, where Cash Registers are on the Lunch Counter, order a glass of Milk. You will observe that it is served with dirty hands, consequently the glass of Milk will be dirty—this you can always observe on the outside of the glass—which is only one illustration of what you may see in the come place. is only one illustration of what you may see in the same places.

Why not be served in a sanitary place, by clean hands? This is the different place—it is positively sanitary. Our motto —which we never fail to make good—is: "CLEAN, PURE FOOD, QUICK POLITE SERVICE, AND POPULAR PRICES."

We appreciate any suggestions that our patrons may offer for the improvement of the business.

Tomorrow We Open Our Second Store

Game Was Even in First Half **But Thistles Pulled Away** in Second.

In the first division of the T. and D. League on Saturday afternoon Thistles defeated Caledonians at Fra-zer avenue by 4-0. The game was evenly contested first half, but This-tles notched one goal and led at half time by 1-0. In the second half Thistles took the game more in hand and scored three goals. Neither team played to form, but Thistles were full value for the number of goals scored.

Referee-J. H. Tilley. Thistles kicked off and made tracks for Caleys' goal, but McGraw cleared. Caledonias took up the running and carried the ball to Thistles' goal, Crawley's parting shot had rather much elevation. Thistles returned and a penalty against Caleys gave them an opportunity. Small took the kick, but Edward brought off a splendid save and cleared his goal. Nellson

Hearts defeated Bank of Commerce in a second division game of the T. & D. Soccer Langue, played at Little York on Saturday afternoon, by the score of 1 to 1. The game was a rather listless affair, neither team exerting themselves. Mc-Culsh of the Hearts team scored four of their seven goals, while Attwood and Ai-len were responsible for the other three, Winhall scored the only goal for the bank team when he dribbled the ball from cen-tre field and shot a hot one past Mc-Apine that no man could stop. Waterline had to retire in the first half when he fractured his shoulder while try-ing to bunt the ball. Hickman, in goal for the losers, played a good steady game all the way thru, while McCulen and Att-wood were best for the winners. Gas to Help Grow **GIANT TOMATOES**

THE VALUE of carbonic acid gas as a plant nutrient has been the

subject of considerable recen literature, including an interesting paper by H. Fischer, describing experiments in Europe, The author found that the development of both foliage and flowers was stimulated by an excess of carbonic acid in the air, while the yield of tomatoes was doubled, and that of cucumbers increased 12.5 per cent by carbonic acid

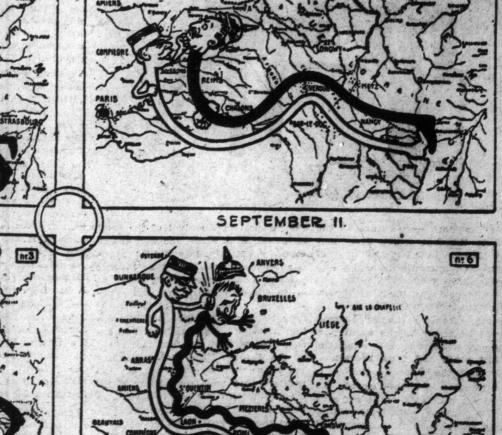

It has generally been held that .01 per cent of carbon dioxide in the air is sufficient for plant growth, but Mr. Fischer thinks that more than this can be utilized, provided there is am-ple light, and that experiments is this direction might give valuable results

On the other hand, Mr. I. F. Kidd an English investigator, finds that an excess of carbon dioxide in the atmosphere retards or inhibits the ger-mination of seeds, but without injuring them. He suggests that the pro-duction of carbon dioxide in nature by the decay of vegetable matter may play a part analogous to that

DEAR ANNIE LAURIE: I am a pretty nurse, twenty-two years of age, and am in love with a doctor in the same hos-pital, four years my senier. There is another nurse who adores him, and she tries to cut me out, and she also snubs me in the presence of the doctor. While he has been away, I have been in-troduced to another soldier boy in the Second Contingent, whim I like a lot better than my boy in the First Contingent. The boy in the Second Contingent has asked me to go out with him, but I re-fused because I didn't think it fair to the boy at the front who is fighting, with the thought that I am waiting for him to return. DEAR ANNIE LAURIE: I am a young man of twenty-five, and have been going with a girl of twenty, for two years and a half. I was engaged to her for one year, until three months ago her parents started to be very funny with me. I had no idea they were trying to break off our engagement, as they had always been so nice to me before this One Sunday I was asked out to tea; and was asked to bring my lady friend with me. I told her of this arrangement, and she said she would go. When the day came I went for her, and she told me she could not go because her parents would not let her. I thought I would overlook that, and sent word to my friends that I could not be there, as I didn't want to go without her. I went home after a while feeling rather blue, and thought something was going to happen the next time I went to see my girl. I was not made one bit welcome by her parents, and when I was leaving I said. "So long," to them, and they said in answer to that "So long, and make it as long as you Now, all the time this was go-

DEAR ANNIE LAURIE:

I am a girl of nineteen and have been going with a young man for nearly three months. We love each other very dearly and are engaged to be married, but he wants me to wait for a year before we get married and I know he is jealous and never wants me o go out with other boys. He is away eight months out of very year and I am a girl that s company. I have not any friends because I never liked mixing up with them but do you really think he is sincere when he asks me to wait that long? I really don't know what to do and wish you would advise me. MY Dear Very Anxious: Nineteen can afford to wait at least one short year-but do you love him ugh to wait and be glad that it is enough to wait and be glad that it is for him you are waiting? Y DEAR DARKY. it is the girl's place to ask a boy to come and call if she really wishes to see him again. Why don't you just say, him again. "I am very pleased to have met you, too," when a boy tells you that he is glad to have met you? Very pro-bably your friend did mean it as a hint for you to invite him to call upon you-and if you really wanted him to call you should have asked him to call.

Just be natural, my dear, and say what you mean, and what you want to say, don't make any mystery about it, and you will find that your life will be very much easier and pleasanter. If you want to go for a walk say so frankly-there is no mystery about it at all, my dear.

SYNOPSIS.

Sanford Quest, master criminologist of the world, finds that in bringing to justice Macdougal, the murderer of Lord Ashleigh's daughter, he has but just begun a life-and-death struggle with a mysterious master criminal. In a hidden hut in Professor Ashleigh's garden he has seen an anthropoid ape skeleton and a living inhuman creature, half monkey, half man, destroyed by fire. In his rooms have appeared from nowhere black boxes, one containing diamonds torn from a lovely throat by a pair of armless, threatening hands, both with sarcastic threatenting notes, signed by the in-scrutable hands. His valet, Ross Brown, and a caller, Miss Quigg, are murdered in his rooms. Laura and Lenora, his assistants, suspected Craig, the professor's valet. Lenora, abducted by the threatening hands, is rescued. Quest traps Craig, loses him, traps him again in the house where Lenora was imprisoned, and loses him yet again after a thrilling chase. The black boxes continue to appear in uncanny fashion with their notes of sarcasm, warning and suggestions of clues, all signed by the ihhuman, armless hands.

suddenly to a small shed. "This is an ancient gamekeeper's shelter." he explained; "built a long time' ago and almost for-gotten now. What Craig did, without doubt, was to hide in this. The Scotland Yard man who took the affair in hand found distinct traces here of re-cent occupation. That is how he made his first escape."

Quest nodded. "Sure!" he murmured. "Well, now, what about your more extended search?" "I am coming to that," Lord Ashleigh replied. "As Edgar will remember, no doubt, I have always kept a few bloodhounds in my kennels, and as Soon as we could get together one or two of the keepers and a few of the local constabulary, we started off again from here. The dogs brought us without a check to this shed, and started off again this way." They walked another half mile across a reedy swamp. "He scems to have picked up something, Edgar, in those South American trips of yours, for a cleverer thing I never saw. You see all these bullrushes everywhere—clouds of them all along the river?" "We call them tules," Quest muttered. "Well?" "When Craig arrived here," Lord Ashleigh con-tinued. "he must have heard the baying of dogs in the distance and he knew that the game was up unless he could put them off the scent. He cut a quantity of these bullrushes from a place a little farther behind those trees then, stepped boldly into the middle of the water, waded down to that spot where, as you see, the trees hang over, stood stock still and leaned them all around him. It was dusk when the chase reached the river bank, and I have no doubt the bullrushes presented quite a natural appearance. At any rate, altho the dogs came with-out a check to the edgs of the river, where he stepped off. they never picked the scent up again either on this side or the other. We tried them four or five hours before we took them home. Lenora wrote down the message and wont to the telephone to send it off. As soon as she had finished, Quest took up his hat again.

"Come on," he invited. "The machine's outside. We'll just go and look in on the professor and tell him the news. Poor old chap, I'm afraid he'll never be the same man again."

"He must miss Craig terribly," Lenora observed as they took their places in the automobile, "and yet, Mr. Quest, it does seem to me a most amazing thing that a man so utterly callous and cruel as Craig must be, should have been a devoted and faithful servant to anyone thru all these years."

Quest nodded. "I am beginning to frame a theory about that You see, all the time Craig has lived with the pro-fessor he has been a sort of dabbler with him in his studies. Where the professor's gone right into a thing and understood it. Craig, you see, hasn't managed to get past the first crust. His brain wasn't Aucated enough for the subjects into the consideration of which the professor may have led him. See what I'm driving at?"

"You mean that he may have been mad?" Lenora suggested.

"Something of that sort." Quest assented. "Seems to me the only feasible explanation. The professor's a bit of a terror, you know. There are some queer stories about the way he got some of 1.is earlier encoments in South America. Science is his god, What he has gone thru in some of those foreign countries, no one knows. Quite enough to unbalance any man of ordinary nerves and temperament."

"The professor himself is remarkably sane," Le-"Precisely," Quest agreed, "but then, you see,

his brain was big enough, to start with. It could held all there was for it to hold. It's like pouring stuff into the wrong receptacle when a man like Craig tries to follow him. However, that's only a theory. Here we are, and the front door wide open. I won der how our friend's feeling today."

They found the professor on his hands and kneez Carefully arranged before him upon a dusty floor. Carefully arranged before him were the bones of a skeleton, each laid in some appointed place. He had a chart on either side of him, and a third one on an easel. He looked up a little impatiently at the sound of the opening of the door, but when he recognized Quest and his companion the annoyance passed from his face.

"Say, are we disturbing you, Mr. Ashleigh?" Quest Inquired The professor rose to his feet and brushed the

dust from his knees.

"I shall be glad of a rest." he said, simply. "You nee what I am doing? I am trying to reconstruct, from memory—and a little imagination, perhaps the important part of my missing skeleton. It's a wonderful problem which those bones might have solved, if I had been able to place them fairly before the scientists of the world. Do you understand much about the human frame, Mr. Quest?" The professor smoked thoughtfully for some mo-ments. Then he rose deliberately to his feet. He had come to a decision. He announced it calmiy, but irrevocably.

"I shall come with you," he announced. "I shall glad to visit England, but apart from that I it to be my duty. I owe it to Craig to see that has a fair chance, and I owe it to the law to see feel that he pays the penalty, if, indeed, he is guilty of these crimes. Is Miss Laura accompanying you, these crimes. too?

Quest shook his head.

"From what the surgeons tell us." he said, will be some weeks before she is able to travel. At the same time, I must tell you that I am glad of your decision, professor."

"It is my duty,' the latter declared. I cannot rest in this state of uncertainty. If Craig is los-to me, the sooner I face the fact the better. At the same time I will be frank with you. Notwithstanding all the accumulated pile of evidence I feel in my heart the urgent necessity of seeing him face to face, of holding him by the shoulders and asking him whether these things are true. We have faced death together, Craig and I. We have done more than that -we have courted it. There is nothing about him I can accept from hearsay. I shall go with you to England, Mr. Quest."

HE professor rose from his seat in some excite-ment as the carriage passed thru the great grates of Hamblin park. He acknowledged with a smile the respectful curtsey of the woman who held it open.

You have now an opportunity, my dear Mr. he said, "of appreciating one feature of English life not entirely reproducable in your own won-derful country. I mean the home life and surround-ings of our aristocracy. You see these oak trees?" went on, with a little wave of his hand, were planted by my ancestors in the days of Henry VIII. I have been a student of tree life in South America and in the dense forests of Cent al Africa, but for real character, for splendor of growth and hardiness, there is nothing in the world to touch the Ashleigh oaks."

"They're some trees," the criminologist admitted. You notice, perhaps, the smaller ones, which seem dwarfed. Their tops were cut off by the lord of Ashleigh on the day that Lady Jane Grey was be-Queen Elizabeth heard of it and threatened headed. to confiscate the estate. Look at the turf, my friend. Ages have gone to the making of that mos sy, velvet carpet."

"Where's the house?" Quest inquired.

"A mile farther on yet. The woods part and make a natural avenue past the bend of the river there." the professor pointed out. "Full of trout, that river. Quest. How I used to whip that stream when I was a boy!"

They swept presently round a bend in the avenue. Before them on the hillside, surrounded by trees and with a great walled garden behind, wis Hamblin House Quest gave vent to a little exclamation of wonder as he looked at it. The older part and the whole of the west front was Elizabethan, but the Georgian architect intrusted with the task of building a great extension had carried out his work in a manner almost inspired. Lines and curves, sweeping everywhere towards the same constructive purpose, had been harmonized by the hand of time into a most surprising and effectual unity. The criminologist, notwithstanding his unemotional temperament, repeated his exclamation as he resumed his place in carriage.

"This is where you've got us beat, sure," he admitted. "Our country places are like gewgaw pal-aces compared to this. Makes me kind of sorry," he went on regretfully, "that I didn't bring Lenora along."

The professor shook his head.

"You were very wise," he said. "My brother and Lady Ashleigh have recovered from the shock of poor Lena's death in a marvellous mannet, I be-lieve, but the sight of the girl might have brought if back to them. You have left her with friends, I hop-, Mr. Quest?"

"Craig has escaped." Neither the professor nor Quest betrayed any

unusual surprise. So far as the latter was con-cerned, his first glimpse at Lord Ashleigh's face had

warned him of what was coming. "Dear me!" the professor murmured, sinking into an easy chair. "This is most unexpected:" "We'll get him again," Quest declared, quickly. "Can you let us have the particulars of his escape, Lord Ashleigh? The sooner we get the hang of things the better.'

Their host turned toward the butler, who was

arranging a tray upon the sideboard. "You must permit me to offer you some refresh-ments after your journey." he begged. "Then I will tell you the whole story. I think you will agree, when you hear it, that no particular blame can be said to rest upon anyone's shoulders. It was simply an extraordinary interposition of chance. There is tea, whisky and soda, and wine here, Mr. est. Edgar, I know you'll take tea." "English tea for me," the professor remarked Quest

watching the cream.

"Whisky and soda here," Quest decided. Lord Ashleigh attended himself to the wants of his guests. Then, at his instigation, they themselves comfortable in/easy chairs and he commenced his narration.

"You know, of course," he began, "that Craig was arrested at Liverpool in consequence of communica-tions from the New York police. I understand that it was with great difficulty he was discovered, and it is quite clear that someone on the ship had been heavily bribed. However, he was arrested, brought to London, and then down here for purposes of iden-tification. I would have gone to London myself, and in fact, offered to do so, but on the other hand, at there are many others on the estate to whom he was well known. I thought that it would be better to more evidence than mine alone. Accordingly, they the station to meet them. They arrived quite safely and started for here. Craig handcuffed to one of the Scotland Yard men on the back seat, and the other in front with the driver. About half a mile from the south entrance to the park the road runs across a rather desolate strip of country with a lot of low undergrowth on one side. We have had a little trouble with poachers there, as there is a sort of gypsy camp on some common land a little way away My head keeper, to whom the very idea of a poache way away. is intolerable, was patrolling this ground himself that afternoon and caught sight of one of these gypsy fellows setting a trap. He chased him, and more, I am sure, to frighten him than anything else, when he saw that the fellow was getting away. he fired his gun, just as the dogcart was passing. The horse shied, the wheel caught a great stone by the side of gun, just as the dogcart was passing. The hors whied, the wheel caught a great stone by the side of the road, and all four men were thrown out. The man to whom Craig was handcuffed was stunned, but Craig himself appears to have been inhurt. He stumped up, took the key of the handcuffs from the pock will officer, undid them and slipped off into the undergrowth before either the groom or the other Scotland Yard man had recovered their senses. To cut a long story short, that was last Thursday, and up till now not a single trace of the fellow has been scovered."

Quest rose abruptly to his feet.

"Say, I'd like to take this matter up right on the spot where Craig disappeared," he suggested. "Couldn't we do that?" "By all means." Lord Ashleigh agreed, touching

"We have several hours before we change for a bell. dinner. I will have a car round and take you to the spot.

The professor acquiesced readily, and very soon they stepped out of the automobile on to the side of a narrow road, looking very much as it had been described. Farther on, beyond a stretch of open common, they could see the smoke from the gypsy encampment. On their left-hand side was a stretch of absolutely wild country, bounded in the far dis-tance by the gray store wall of the park. Lord Ashleigh led the way thru the thicket, talking as he went

By the bye, Middleton, I heard this morning that you'd been airing your opinion down in the village. You seem to rather fancy yourself as a thief-catcher." "I wouldn't go so far as that, my lord." the man replied, respectfully, "but still. I hope I may say that I've as much common sense as most people. You see, sir." he went on, turning to Quest, "the spois where he could emerge from the track of country are pretty well guarded, and he'll be in a fine mess, when he does put in an appearance, to show himself upon pretty well guarded, and he'll be in a fine mess, when he does put in an appearance, to show himself upon a public road. Yet by this time I should say he must be nigh starved. Sconer or later he'll have to come out for food. I've a fittle scheme of my own, sir, I don't mind admitting," the man concluded, with a twinkle in his keen brown eyes. "I'm not giving it away. If I catch him for you, that's all that's want-ed. I imagine, and we shan't be any the nearer to it for letting anyone hat my little secret." His master nodded. "You shall have your rise, out of the polici if

That's what I did after I had written 'Down in the Doldrums,' and was fed with crumpets in consequence." A woman plumped down by my side and twisted her hands into knots and hung her eyes over her cheek bones. I thought it was too many muffins. There was a fine show of damp wraps in the hall and a cheerful babble of voices from the other side of the drawing-room door. The hostess ran at me, vehemently shouting: "Oh. I am so glad you have come. We were all talking about you." As the room was entirely filled with strangers, chieffy female, I reflected that they couldn't have said any-thing very bad. Then I was introduced to every-body, and some of the people were talking in couples and didn't want to be interrupted in the least, and some were behind settees, and some were in diff-culty with their teacups, and one and all had exactly the same name. They made their way, single file, to the road and up to the house. Lord Ashleigh did his best to dispel a queer little sensation of uneasiness which seemed to have risen in the minds of all of them.

Quest, perhaps for the first time in his life, felt almost lost, hop-lessly out of touch with his surroundings, an allen and a strug-gling figure. Nevertheless, he entertained the little against that queer sensation of anachfonism which now and then became almost oppressive. The professor's pleasure at finding himself once more amongst these familiar surroundings was ond his brother never flagged. There wore tenants and neighbors to be asked after, matters concerning the very servants' names he remembered. "We hear great things of you over here. Edgar. We hear that you have been on the point of proving most unpleasant things with regard to our origin." "Oh! there is no doubt about that," the professor observed. "Where we came from and where we are going to are questions which no longer afford room for the slightest doubt to the really scientific mind. What sometimes does elude us is the nature of our tendencies while we are here on earth." "Mine, I fancy, are obvious enough." Lord Ash-leigh interposed. "Mine, I fancy, are obvious enough." Man becomes what he is according to the circumstances by which he is assailed. Nov., your life here, George, must be a singularly uneventful one." "Not during the last six months." Lord Ashleigh remarked, with a sigh." "Even these last few days have been exciting enough. I must confess that they have left me with a queer sort of nervousness I find myself listening intently sometimes-- conscious, as it were, of the influence or presence of some in-definite danger." "Very interesting." the professor murmured. "Very interesting." the professor inurmured. "Very interesting." the professor murmured. "Spiritualism, as an exact science, has always inter-ested me very much." Lady Ashleigh made a little grimace. "Don't encourage George," she begged. "He is much too superstitious, as it is," There was a brief silence. The port had been placed upon the table and coffee served. The ser-vants, according to the custom of the house, had de-parted. The great apartment was empty. Even Quest was impressed by some peculiar significance in the long drawn-out silence. He looked around him uneasily. nice, round, healthy English maiden. "Go and task to him," she said. "Talk to him about his books." I gritted my teeth and waited till the maiden was close at hand and about to begin. There was a lovely Young man at the end of the room sucking a stick, and I felt sure that the maiden would much have preferred talking to him. She smiled prefa-

place for the malden. I was right. I signalled up the man who had written "Down in the Doldrums" and talked to him as fast as I knew how. When he had to go, and the young man with him, the malden became enthusiastic, not to say gushing. But I knew that those compliments were for value re-ceived. Then she explained that she was going out to India to stay with her married aunt, wherefore she became as a sister unto me on the spot. Her mamma did not seem to know much about Indian outfits and I waxed eloquent on the subject. "It's all nonsense," I said, "to fill your boxes with things that can be made just as well in the country. What you want are walking dresses and dinner dresses as good as ever you can get, and gloves tin-ned up and odds and ends of things generally. All the rest, unless you're extravagant, the dharzee can make in the veranda. Take underclothing, for in-stance." I was conscious that my loud and cheerful voice was ploughing thru one of those ghostly silences that sometimes fall upon a company. The English only want is the verande in the country is that sometimes for the set of voice was ploughing thru one of those ghostly silences that sometimes fall upon a company. The English only wear their outsides in company. They have mothing to do with underclothing. I could feel that without being told. So the silence cut short the one matter in which I could really have been of use. On the pavement my friend who wrote "Down in the Doldrums" was waiting to walk home with me. "What in the world does it all mean?" I said "Nothing," said he. "You've been asked there as a small deputy lion to roar in place of a much bigger man. You growled tho." "I should have done much worse if I'd known," I frunted. "Ah," said he, "you haven't arrived at the real fun of the show. Wait till they've made you jump thru hoops and your turn's over and you

At first, and several times afterward, I very greatly desired to talk to a thirteen-two subaltern -not because he or I would have anything valuable to say to each other, but just because he was a sub-altern. I wanted to know all about that evergreen polo pony that "can turn on a sixpence' and the second hand second charger that by a series of per-fectly unprecedented misfortunes just failed to win the Calcutta Deroy. Then, too, I wish to hear of many old friends across the sea and who had got his company and why and where the new Gen-erals were going next cold weather and how the Commander-in-Chief had been enlivening the Simia season. Hansi's latest cartoon, the battle of the Marne—This "battle scene" by the famous Alsatian cartoonist, who has been decorated for brav-ery at the front, is in the same charming vein as his illustrations for "Mon Village," for which a German tribunal sent him to prison. He escaped and has been fighting in the French army since. Last fall, The Sunday World published Hansi's "Mon Village" pictures. This quaint cartoon is of the same order of harmless humor; an old stove pipe is converted into a 42 cm. gun, while a coffee grinder serves the purpose of a machine gun.

Thus Tennyson's claim that this fine old world of ours is only a child, still in the go-cart, seems more than even correct.

A N INTERESTING example of the Brocken spectre was re-cently described by Sir Thomas Holdich at a meeting of the Royal Geographical Society. It ap-pears that there is a mountain called Omi on the borders of China and ing the mountain.

the beginning. When, therefore, Prof. M. A. Berget, the distinguished French meteorologist, announces a/grasp of natural law which enables science to make 24hour weather forecasts with something akin to certainty, the whole world is interested.

These predictions, as is known, are very largely a question of barometric pressure. The air moves from an area of high pressure toward a low pressure area, the intensity of the movement depending, of course, upon the extent of the latter area.

If upon reaching the area of low pressure the air circles about in the same direction in which the hands of a clock move, there develops what is called an anti-cyclone, a condition which is usually attended by dry weather.

But should the motion be in an opposite direction; that is, from right to left, we have what the weather condition which almost invariably re-

Now, in a mouse trap Pa had caught A mouse with sparkling eyes, And tail so long and nose so big, It really was a size.

Next day when school time came, alas! When no one else was near,

John got that trap with mouse inside, Oh, yes, he did my dear.

Then in a box he put it, yes, And off to school, Oh my! You'd think that mouse was just some lunch, Or, perhaps, a bit of pie.

Now Johnny never meant, my dears, To let that mousie out; He thought to show it 'round at noon-A treat without a doubt.

But mousie thought quite different, yes; HE said: "This box is wood; I'll make a hole, then out I'll go, As any smart mouse should."

And that is just what mousie did; When twelve o'clock had struck, That hole was finished, OUT HE JUMPED, "Ha! Ha!" he squealed, "What luck !"

Oh, dearie me! Oh, dearie me!! MY! up the aisle he flies; The teacher looks, then looks once more, But can't believe her eyes.

And then, say, look! What happens next? Why on her desk, my dear, The teacher jumps, "Oh! Oh!" she screams, "A MOUSE, A MOUSE is here."

She was very naughty. When her mother asked her to do anything she would say, "No, I won't." Her mother used to say, "My! I wish I had that little girl that lives across the way; she is always SMILING." One day, when Margaret (for that was the name of the little girl) was playing with Violet she showed her her SMILLING FACE Club button. Violet told her she wanted to get one. Then Margaret told her how so she sent for one. Ever since that she has been SMILLING, and a very happy little girl she has been. I'd like a little button To lead me all the way. By SUSANNE LATOUR

CARCELY do we pronounce our spring outfits complete in every Wetail than it is time to turn our attention toward clothes fit for summer wear. Already the call of summer is irresistibly felt in a longing for lighter attire.

There is something about the frock of transparent material with its trimmings of lace and ribbon which strongly appeals to the eternal feminine in us, and while the spring chill is yet in the air we satisfy the craving for dainty, frilly frocks by fitting out our summer wardrobes.

Never before have the wash fabrics been so sheer and lovely in design. It is an easy matter to believe that fairy looms have been at work, and it would not be an impossible task to fulfill the commands of the king who sent his sons forth to find "meh of material which would pass

easily through a finger ring." The finer batistes, linens and lawns are woven of threads which are almost as frail as the silk used for chiffons and mousselines. They appear in plain or flower-sprigged patterns which Dame Fashion must have taken straight from the old-fashioned gardens where moss roses, hollyhocks, lavender and heliotrope grew.

Harmonious Fabrics.

Of course, these fabrics were made to harmonize with the fashions, for who could think of fashioning wide, bepuffed and befrilled skirts and high-waisted bodices of the materials we used for the narrow-skirted frocks of past seasons?

For hot summer afternoons there is nothing lovelier than the lingerie frock of white batiste, hand-embroidered and lace trimmed, to meet the demands of Fashion's latest mandate. One pretty model has a wide band of embroidery about the hem of the ample skirt and frills of narrow Valenciennes lace edging the scallops. The bodice has long sleeves, also embroidered and lace frilled, and reversing the order of waist fastenings, it is closed down the back with bullet buttons and loops of narrow braid.

A wide sirdle of Nattier blue faille ribbon lends an effective touch ot color to this frock.

The element of the picturesque is introduced in a charming frock of embroidered white net by the Louis Philippe bodice of porcelain blue taffets. It is fitted to the figure, and the armholes and neckline are finished with a narrow side-pleated frill of the silk.

A tucker of shirred net and long sleeves of the embroidered net complete the bodice, while the skirt consists of a straight length of the embroidered net gathered several times at the waist. A Victorian bonnet, designed specially to wear with this frock, further carries out the idea of the picturesque. It is of Leghorn straw, faced with blue taffeta, to match the bodice, and is trimmed with clusters of pink and yellow roses intermingled with black velvet ribbon.

Of Exquisite Taffeta.

With silk frocks on every hand you will have to provide several afternoon and evening frocks of the exquisite chiffon taffeta or gros de Londres. As to the color, you can

"HE FOURTH PRESIDENT of the United States considered it a greater honor to be declared the Father of the Constitution than to have been elected twice to the highest office in the gift of his countrymen. No more ardent, intelligent, far-sighted and constant student of governmental problems ever lived than Madison. They were his life-long passion. He it was who labored with all his gigantic ability and indomitable will to have deeply imbedded in our National Law those vital principles which forever guarantee to all Americans Religious, Commercial and Personal Liberty. In private life he was genial and social-yet temperate. Many a foaming glass of good barley-malt beer he drank with his bosom friend Thomas Jefferson-"Father of the Declaration of Independence." Madison died at 85 and Jefferson at 83; both were unalterably opposed to tyrannous Prohibition Laws, and advocated legislation which encouraged the brewing industry. Upon the tenets of the Constitution of the U.S.A. (to which Madison devoted the best of his genius) Anheuser-Busch 58 years ago founded their great institution. To-day 7500 people are daily required to produce and market their honest brews. Their chief brand Budweiser is sold throughout the civilized world - the drink of your forefathers-the drink of the noblest men who ever lived-the drink of the great triumphant nations. Budweiser sales exceed any other beer by millions of bottles.
