London, Dec. 27, 1913,

The above is a reproduction of the "Votes for Women" literature that is eing mailed to those of the fair sex in the city entitled to exercise the franthise. This year local women, who are enthusiastic believers in the extension If the franchise to women, have held meetings, organized committees, and are sparing no pains to see that those of their sex already entitled to vote at municipal elections do not fail to do so. In other years only a small proportion of municipally-enfranchised London women have taken the trouble to cast their ballots, and the local suffrage organization and other women's societies in so doing, desire to deprive the city erly be done for \$1,000, but, according are determined that such will not be the case this year, but that the result will show that women are really interested in the ballot, and are capable of exer cising it intelligently and to good purpose.

But the genially as on the previous night The winter guests took their places at the table, and the second December dinner at Baldpate Inn got under way. But not so genially as on the previous night did it progress. On the faces of those about him Mr. Magee noted worry and suspicion; now and again menacing cold eyes were turned upon him; evidently first in the thoughts of those at table was a little package rich in treasure; and evidently first in the thoughts of most of them, as the probable holder of that package, was Mr. Magee himself. Several times he loked up to find Max's cat-like eyes upon him sinister and cruel behind the incongruous gold-rimmed glasses; several times he saw Hayden's eyes, hostile and angry, seek his face. "I wonder," answered Mr. Magee. It came to him suddenly that in each person's definition of this intangible thing might lie exposed something of both character and calling. At the far end of the table Mrs. Norton's lined, tired face met his gaze. To her he put his question.

"Well," she answered, and her voice seemed softer than its wont, "I ain't thought much of that word for a good many years now. LONDON, SATURDAY, DEC. 27. HIS OWN MAN.

There is a strong suspicion abroad that there is only one candidate for the London mayoralty, after all. At least Akl. Richter appears to be the only man who is his own man and no one else's; who does not need to be set up marked with anyone's stencil,

tagged to be carried through on some-

one else's ticket. Mayoralty candidates in a city the size of London should be able to stand on their own records. They should be of sufficient size to be considered for themselves alone. They assume very small proportions when they have to be rubber-stamped and labelled for election. When they are "third termers" they may need bolstering up, but London is a larger-sized city than to accept any man save on his own record and his own name.

CLEARING UP THE ISSUE.

The Advertiser is quite willing to publish letters of public interest in the discussion that has arisen over the natural gas situation. Some people think that the matter was rushed through without much opportunity for discussion, and that if the matter had been thoroughly threshed out some months ago the electors would be in a position to express their opinion.

At first it seemed that the city was to be made to smell to heaven, but on second thought it does not seem reasonable that the City Gas Company would place its entire business in Jeopardy unless it was prepared to

In Brantford and Paris, from which places the stories of headaches and dizziness have emanated, it seems that oretical propositions their objectiona brand of oderless gas has been used could not detect it. When the Tilbury questions just now, but merely men-business sacrificing each other to anyfor some time. If the gas leaked you gas, which has a strong odor of sul- tion them to show theat Mr. Hanna one else. Married people have to conphur, was turned into the mains at those places, it was effective in finding that the whole system of pipes was leaky. It is unlikely that a parallel situation could exist in London. The artificial gas at present used in almost every home, makes its presence quickly known by its odor, and there are few leaks that are not given immediate attention.

From an industrial point of view talking point in securing industries. There is a class of industry affecting the manufacture of glass, which depends upon natural gas, and it is likely that London would gain an advantage. The board of trade's report on the subject cannot be looked upon as biased.

The whole thing seems to be up to the City Gas Company. If the gas is not satisfactory all around the company is taking the gravest chances, and The Advertiser thinks too much of the business ability of its officers to believe that they will risk their entire connection unless they are certain of satisfactory service from natural gas. As Mr. J. C. Duffield has pointed out there are 75,000 satisfied users of the Tilbury gas at present: that is the best advertisement the article could have.

But if any citizen wishes to advance an opinion The Advertiser will gladly print his views. Now is the time to clean up the points at issue; not after the door has been shut.

OUR ASSOCIATE EDITOR.

Mr. A. A. MacIntosh, for some years city editor of The Toronto Globe, and prior to that time managing editor of The Syracuse Post-Standard, comes to The Advertiser as associate editor. Mr. MacIntosh will be immediately connected with the morning edition to be printed for the first time on Jan. 1, and the management feels that his long experience and recognized ability in the profession makes certain the production of a morning edition that will be second to hone in the country.

The Advertiser secures an addition to its present able staff who has. through force of sheer ability, become a prominent figure among newspapmen on both sides of the line. His name will grace the pages of The Advertiser's biography when it is written with the names of those who have passed along, all leaving some monuments to their abilities and dis-

tinctive personalities. The present members of The Adver tiser staff welcome Mr. MacIntosh, and bespeak for him the co-operation he has received on such papers as The Globe and The Post-Standard.

FOR CHEAPER FISH.

The Hon. Mr. Hanna, provincial secretary, has a very emphatic way of talking, and when you listen to him you get the idea that he has really done something or that he is going to do it. Unfortunately his performances do not always come up to his atterances. A short time ago, in a speech at Guelph, he was apparently very determined in his attitude towards the

up all the proceeds of our local fishermen, and carted it over to the United States. He was going to stop that

sort of thing. We should be pleased to see him successful in carrying out his promise. We all want cheaper fish, and we do not care who gets it for us. The fact that the fisheries are not in Mr. Hanna's department, and that he really proposes doing what Dr. Reaume ought to do, will not trouble us in the slightest. And we are not likel, to inquire very closely as to the means he may come a joke. Mr. Jones thinks it adopt for his purposes. The main thing is that he should do what he said

Apparently, however, the task he has set himself is not as arduous nor as comprehensive as was supposed. From all that can be learned he is going to confine himself to doing over there?" enough fishing to secure what is needed of this useful article to supply the tables of the prisons and asylums under control of the Government. That is all right as far as it goes. It will save the Government some money, and that is good as far as it goes, though it would be still better if we did not There's a hole in the toe of my sock, know that all the money the Government might save on its fish bill it would spend in some other direction. But the women folks cry, But no matter what it saves through Mr. Hanna's fishing expeditions it will not relieve the average housekeeper outside of the jail or the asylum. His fish will cost as much as ever. And that is where we want someone to take hold and do something besides talking.

It is unfortunate that the great fish It is unfortunate that the great fish [Kansas City Journal.] combines should control us nearly as My wife gave me a parlor rug much as they do our neighbors. We cannot blame our Ontario fishermen. They naturally want to sell their goods where they can get the best price. And if in seeking a quick sale in the United States they get into the clutches of those combines, who will insist on | having all of the catch, or taking none. it may be their misfortune; but they cannot be blamed for making what they think is the best bargain for themselves.

There are only two methods, apparently, for the Ontario Government to jects without embarrassment with interfere effectually. One is to place only men present," leads to a concluan export duty on fish and protect the sion that the theatre is not the only article, as they do certain kinds of pulpwood. Another is to go into the fishing business, not to the extent of supplying only Government institutions, but of supplying all the people at cost price. Theoretically, either But one sign I would like to see of these remedies looks satisfactory; insure an odorless service to the city. practically, we are sure there will be difficulties in attempting either. When one comes to consider promising the-

able features become apparent. We are not going to discuss these will have more to do than catch a few cede to each other every point of kindtons of fish each day in order to help the people who need cheaper fish more natural gas will give the city a strong barriers, and seller and buyer come selfish. Men and women of age should come to each other the more profitable the trade for each of them.

VOTE FOR SUNDAY CARS.

That argument about the rich man with his motor car may be hackneyed but it is nevertheless the strongest that can be advanced in favor of Sunday cars.

Sunday cars would be a great conenience to many people in London for church-going and for visiting the sick in the hospitals and friends residing at a distance. And we do not think that the poor man is committing any crime against religion or morality if he wants to take a ride on Sunday for the pleasure and relaxation he may get out of it. We would sincerely advocate that the cars should be run to Springbank on Sunday within certain hours, and that all God's great outdoors should be made more

accessible. We can understand the position of opposition many good people honestly take to this issue, but we believe that it is more traditional than spiritual.

TRUCK AND TRADE.

A Tory paper, commenting on our large and increasing trade with the United States, wants to know if this is satisfactory to the Grits, "or would they prefer to have all our truck and trade with the Yankees?" We never objected to trade with the Yankees or any other people, if the trade was going to be profitable to Canadians. But has the Government, which was opposed to "truck and trade with the Yankees," devised any plan to lessen that trade? Since it came into power our trade with the United States has increased, and with the new tariff across the lines it will increase still more. What have they done to prevent it? Can they find us better markets? Will they throw off all duties on English goods, so as to develop our trade with the motherland? Where is the "no truck, no trade" policy now? Never mind what those "Grits" may think, or what they may want; tell us what the Government is doing to increase imperial trade, or provide us with profitable markets, instead of those in the United States.

No third term.

No polities in municipal affairs. Some of the men on that petition just wanted to get him out.

Quite so; the "R" in that long name may stand for "rubber stamp." It's a bold admission to say that

American Fish Trust, which gobbled the affairs of the electrified line must be handled in the dark.

The Morning Advertiser will bring thousands more Western Ontarians in close touch with London.

Driving Up the Prices.

geese are going up in price. there may seem to be no elationship between the two statements, they are synonymous. Following traditional custom, the goose is the proper fowl for the New Year dinner. THE VOICE OF THE PEOPLE

The Natural Gas Question. To the Editor of The Advertiser:

Everyone who will take the trouble to Lyestigate the question of natural gas for London will undoubtedly be convinced of its desirability, and I feel that would be neglecting a plain duty if I did not take every opportunity to urge-ratepayers to make themselves conver-Industrially London has everything to

question of natural gas for domestic

ourposes is not so favorably considered,

owing to the publicity which has been given the experience of Brantford. This, however, should not be allowed to cloud the Tilbury field, and I am strangly of the issue. Brantford has been using an odorless natural gas, escapes of which are not easly detected, and the new gas has only demonstrated the faulty nature of the plumbing. In London, an escape ways of manufactured gas can be detected immediately, and as a matter of fact escapes are infrequent, and invariably caused by negligence. It may be taken for granted, therefore, that the plumbing in London is generally good, and that the experience of Brantford will not be repeated here.

The board of trade recently appointed a committee to investigate the advantages and disadvantages of natural gas As it happened, the three men chosen were opposed to it. They visited Chatham, Wallaceburg and Sarnia, where natural gas has been used for years. They found everyone they approached to be enthusiastic about it, and that ninehomes. This committee report, which has been printed, and of which copies may be had on application, forms absolutely convincing testimony of the desirability of securing natural gas

Natural gas is not recommended by them for lighting, but the price of hydro for this purpose is so low that it is used by small householders everywhere. The small householder, too, will natural gas a boon, effecting considerable saving in heating. For this pur-

London, Dec. 27, 1913. Mr. Hazen On Sunday Cars.

To the Editor of The Advertiser: The electors of the city of London New Year's Day is almost here, and will have the following question submitted to them at the next municipal election: "Are you in favor of operating street railways on Sunday?"

If the majority of those voting upon this question give an answer in the affirmative, the way is then clear for the city council to enter into arrangements with the street railway company for the running of street cars upon the Lord's Day.

This is a question of great import. nce, and should have the serious consideration of every elector. Therefore I wish to state a few reasons why I don

1. They are not necessary: (a) For Church Attendance—There city, looking for practical information, re Christian churches within easy should carefully read the report of the are Christian churches within reach of all our citizens, and those most deeply interested in church atcars. It has been found where Sunday more difficult to hold boys over 12 years of age to the Sunday school, and that

Winnipeg did not deem it necessary to run its cars on Sunday until it had attained a population of about 100,000; neither did Toronto until it had reach ed a population of nearly four times the resent population of London.

2. I am opposed to Sunday cars be cause it means enforced Sunday labor for many employees of the street railway company. Granted that they will be required to work only six days in seven, yet a rest day on a Monday is not as desirable or beneficial as upon a Sunday, because upon the week day the family are away to business or to school, and there are few if any oppor tunities for the uplifting associations of the house of God. The running of street cars upon the Sabbath day opens up the way to other Sunday work. Therefore, every true friend of the workingman will vote against Sunday

3. I am opposed to Sunday cars be cause it tends to the destruction of the quiet and sanctity of the Lord's Day, and to the secularization of the spiri of the people and the day. We must emember that the lowering of our ideals concerning the Sabbath Day and the slackening of our reverence for sacred things sap the very foundations of the moral life of the people. The First Birth In London.

To the Editor of The Advertiser: A dispatch from Detroit in your edition of last night says that Mr. Andrew B. Morden, the first white child born in king. I should be an ingrate if I said London, celebrated his 90th birthday in one unkind word of London, for it is Windsor lately. Ninety years ago there was no London, nor was anyone living on the site of what is now London. Mr. Morden may have been the first white child born to any of the settlers in states I have visited on this continent, London Township. The first white child tenths of the people used it in their born in London was Nathaniel Yerex, who saw light in a cottage on the northwest corner of York and Ridout streets somewhere between 1826 and 1830. Even Fur Is Draped Nowadays

Ermine is so enormously expensive in itself that the idea of draping it, with a consequent use of extra yards of the pelt, seems almost appalling. Yet draped ermine wraps are being turned out by the fashionable furriers for women of fashion—and substantial pocketbooks. This wrap of unspotted ermine has most beautiful lines, the snow white pelt being draped a bit around the feet. A collar and cuffs of civet fur make a striking contrast with the ermine, which is worn over a trailing gown of white satin.

New York, Dec. 27.-The entries

The decisive beating handed the De-troit team by the London intermediates minutes; Edwards, 21 minutes; R. Reid, 11 Reid, 21½ minutes; Edwards, 23 minutes. Second half—McAvoy, 6 minutes; Hall, 17 minutes. Stops, first half in the Michigan city last evening, demonstrates two things. It shows: first, that the London players are fast rounding into shape, and, secondly, that they are a fast, dangerous aggregation, fully up to last year's team. All this is gratifying to London fans. The Detroit games served to show just what kind of a team London will have this year if nothing else.

A Decisive Beating. Last night's score was 6 to 1, London winning the series by just that much margin. The score on the round was 11 to 6. The beating handed Detroit last evening was the worst suffered by the Arena seven for some years. In fact, London is one of the few teams that has beaten the Detroit sevene in Detroit for the past three years. Only two other teams have done it this season, Cleveland and Sarnia, but these teams won only by a scant margin of one goal.
Surprised Detroit Fans.

London gave a great exhibition of nockey in Tigertown last night. In the the locals played rings around the home team, and had the Detroit fans gasping at the speed and team play shown. London is undoubtedly the fastest team that has played in Detroit this season. At half time the score was 5 to 0 in favor of London, and had the visitors wished to they could have run up an ever greater score. In the second period they let up and played more of a defensive game than an offensive. Morenz and Edwards played in the first half on the forward line, and at half time McAvoy and Walden were put in to take their places. Meyers, of the Detroit team, had to retire at the end of the first half, and Johnson, the famous Paris "ringer," took his place. The going was too fast for Johnson in the second period, and he had to retire, Walden going off to even Jp.

Detroit Team Crippled. The Detroit News-Tribune in commenting on the game this morning,

It must be admitted that the Arena team was not in any condition to play the game of which it is capable when at its best. Capt. Kennedy was not on the ice at all. Hall, who took his place, has not yet recovered from injuries received earlier in the season, and Meyers went in suffering from a severe charley-horse, which necessitated his quitting toward the end of the first session, Hall taking his place, and Johnson going in as re latter suffered a dislocated shoulder late in the second period, and had to last nine minutes being

played with six on a side. Gillies Gets the First Again. Laurie Gillis scored the first goal of the evening after nine and one-half minutes of play, during which time Detroit was almost continually on the defensive, the visitors showing unusual ability in keeping the puck at the end of the ice where it would do them the least harm. Gillis' tally was made after a lone run up the side of the rink, during which he played the puck skillfully off the boards, and shot from a distance at an angle. A minute and a half later R. Reid, who starred throughout at centre, carried the puck right up centre ice to the second score, also made on a long

McAvoy, who subbed for Morenz in the next half, made the only Canadian counter of the period after six minutes, a high shot getting past Detchon, while the lone Detroit score of the evening was made by Hall after they had battled through 17 minutes of the last session.

LONDON HANDED DETROIT | JEFF TESREAU, SUCCESSOR OF CHAMPION GOTCH IS

WORST BEATING OF SEASON ED WALSH, SPIT KING

DUT DESILAN

With Ed Walsh Through, the Giants' Human Atomizer Will Wear Crown in 1914.

Charles ("Jeff") Tesreau, of the Giants, finished the season of 1912 as the best pitcher in the National League-judging pitchers by the method since adoptedwhich shows the pitcher's actual ability and not that of his fielders.

This year Christy Mathewson ranks -Detchon 17, Wardrope 5. Second half Detchon 17, Wardrope 5, Second half—Detchon 4, Wardrope 6, Penalties, first half—Meyers, Hall, of London; R. Reid, Second half—D. Reid, Skelley, Emery, Black, McAvoy, Gillies, all penalties 1 minute, Referee—Muir. Windsor, Goal umpires—Campbell, of Detroit; Morenz, London, Halves—30 first and Tesreau third. In 1914 Tesreau with another year's experience, will be recognized as the spit ball king, Ed. Walsh having pitched his last game, uness a miracle is worked in his behalf. Tesreau was introduced to major league baseball at the fag end of 1912, following months of toil under the tutelage of Wilbert Robinson, while he acquired

control of the spitter. Then, when the Giants were crumbling with Marquard "blown up" after 19 straight wins; with Mathewson wobbling, McGraw took the blankets off his human atomizer and Tesreau pitched wonderful ball-so wonderful that when the postseason games began McGraw sent him in against "Smoky" Joe" Wood.

Tesreau went to the Giants after a Maurice Pollick, of This City, wandering career that makes the travels of Ulysses look like an afternoon's stroll. He played in Perryville, Mo., Houston, Galveston, San Antonio and Austin, Tex., Shreveport, La., and Detroit. For Houston he lost every game he pitched by one rup—but he lost. At Detroit he was so wild he was given transportation within RUNS IN TWO-MILE RACE

Frank Navin, president of the Detroit club, says he didn't pull a "bonerr" when he released Tesreau, but that he was unable to devote the time necessary to develop the giant. He considers Mc-Graw fortunate in having Robinson, who also gets credit for making a pitcher out of Rube Marquard.

Following his exit from Detroit, Teseveral foreigners for the juntor indoor reau went to Shreveport, where he some. how found enough control to induce Me-6 have tended to give it an international Graw to sign him. McGraw gambled on "Jeff's" size and strength, not his past ners will be seen in the two-mile running race. In this event M. W. Pollick, of London, Ont., will make his first performances.

Just as Ed. Walsh spent two years before he became a great pitcher, so did Tesreau spend many months, with this difference-he had in Robinson a splendid year, and Willie Kronen, John Pieticia and Willie Lindfors, of Finland, who have been training here with Hannes coach, who started out with one object

Agreed to Come and Wrestle at Athletic Organization, But Failed to Put in an Appearance.

Chicago, Dec. 26. Frank Gotch will never be seen in Chicago again in a wrestling match, or even in an exhibition bout while the present city administration holds sway.

This was brought out after announcement had been made that the great Iowa athlete had decided to return to the game after a retirement of many months. Gotch incurred the displeasure of the city officials last summer when an effort was made to get him to come here and help out an athletic organization. cording to the story told today, Gotch agreed to come on and wrestle, but at the last minute nothing was heard of him. He did not appear as advertised, and it is said that Mayor Harrison then and there vowed that Gotch was through so far as Chicago is concerned.

Had Gotch declined to come when first approached no further attention would have been given the matter, but he promised to come and then failed to keep

MONDAY NIGHT'S JUNIOR GAME OPENS LOCAL O.H.A. SEASON

Ingersoll and London Juniors Will Lift Lid on Local Hockey Season With Fast Game-Dr. McKay, of Woodstock, Will Referee.

The O. H. A. hockey season will he is allowed to play two junior games,

The O. H. A. hockey season will open in London on Monday evening, when the fast Ingersoll juniors will stack up against the local youngsters. The game will be a good one, if dope on the two teams counts for anything. The London juniors will hold a practice in the Princess Rink this evening in preparation. The management want every candidate for a place on the team to attend this practice. The line-up for Monday night's game will be picked after the workout.

Wardrope to Play in Nets.

There are a number of good youngsters to pick from this year. About the only position there is little competition for is the goalkeeping job. George Wardrope will be between the nets on Monday night, however.Wardrope is still under 20 years of age, and

Reduction in Prices Loosened But Not in Quality

Because of advantageous buying, enlarged manufacturing facilities, and a tremendous increase in the demand for Dunlop Traction Tread Tires, we have adjusted our Consumers' Auto Tire

Price List. Note the great saving in "Tractions."

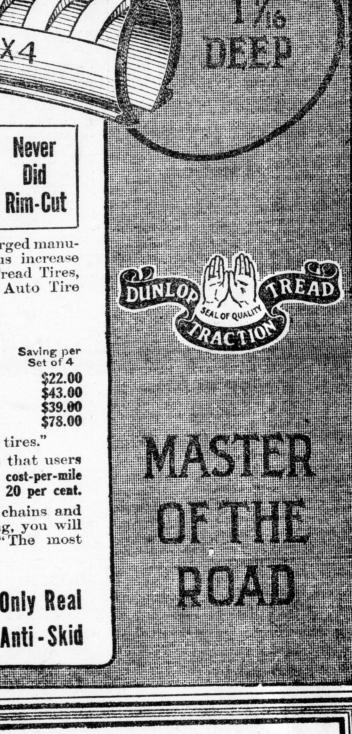

More me	Broat barring		
Size	Old List, Traction Tread	New List, Traction Tread	Saving per Set of 4
30x3½ 34x4 36x4½ 37x5	\$33.25 \$53.50 \$71.00 \$92.00	\$27.75 \$42.75 \$61.25 \$72.50	\$22.00 \$43.00 \$39.00 \$78.00

The drop in prices also covers "plain tires." This general price adjustment means that users of Dunlop Traction Treads have a cost-per-mile saving over other tire users of about 20 per cent. If you forever want to be free of chains and skidding, loosened treads, rim-cutting, you will not for long put off purchasing "The most

No. 49

O you say you can't write an ad.? Well. a great many are inclined to throw a lot of mysticism around the task of writing an ad. But they are the ones who are wrong. If a customer comes in for a pair of gloves, you talk gloves to him; you don't talk about the weather or your family history. So, when you write an ad., go straight to the point, and if you write a glove ad., don't say anything about your ability to make breeches." -5. C. Dobbs.

A great many people shy at writing an advertisement-even a little three or four-line Want Ad. They can write a good letter or an interesting story or a well-expressed essay-oh, my, yes; that's easy-but when it comes to writing something in the nature of a business announcement, they are suddenly afflicted with mental chills.

And why? Simply because of the erroneous impression that there is some magic about advertising-some black art, some deep-hidden formula that, to the initiated, makes the problem of successful advertising an open book.

Rot! Writing a good ad. means simply putting on paper, in the clearest possible manner, what you have or what you want. Want to sell that old square piano? Then don't go to the dictionary on a hunt for words that will look nice in print. Just say that you have an old piano for sale; say a word or two as to its make; its condition; the price you want for it. Put these facts together briefly, and you'll have a good ad.

Or do you want a cook? Well, don't try to tell your family history when you go about advertising for one. Say you want a cook-that's the Alpha and Omega of your want, isn't it? say you want an experienced one; say whether yours is a small or large family, so that the reader of your ad. may get some idea of your requirements; say what the wages will be. And you can say all this in three or four lines, which, inserted in the Classified columns of the newspaper you are reading, will carry your want straight to the attention of hundreds.

Magic? Mystery?? Science??? Bosh! Advertising-first, last and all the time-is COMMON

Leading Authority On Canadian Biography Died Suddenly of Heart Failure.

[Canadian Press.] Brockville, Dec. 27.—Dr. Henry J. Morgan, one of the greatest authorities

on Canadian biography, and the publisher of "Morgan's Men of the Times," died at his home here this morning of heart failure. He was born in Quebec City in

Mr. Morgan, after graduating from Morin College, received the appointment of private secretary to Hon, Isaac Buchanan, president of the council in the Tache-Macdonald administration. About that time he edited The Industrial Politics of America, embracing Mr. Buchanan's views on protection for home industries He was also secretary to Hon, Wm. Mac-Dougall, provincial secretary in the Belleau-Macdonald Government. When con-federation was accomplished, Dr. Morgan was appointed to a position in the de-partment at Ottawa. In 1868, at the outreak of the cattle plague in Texas, he was sent to the western states as a com nissioner to report upon the nature and extent of the disease. In 1873, Mr. Mor gan was placed in charge of the Canadian public records, and proceeding to Mont real he removed to the capital all the historical documents which had been ving in the old vaults since 1849 Two years later he was appointed seeper of the records, a position he held until his retirement on pension in 1895 Dr. Morgan commenced his literary career when quite young. As early as 1858 he was parliamentary correspondent

Eight fishermen's and many others badly wrecked.

Celebrates Christmas in His 99th Year

Able to enjoy all the delights of the Christmas season, although minety-nine years of age, Thomas Collins, of Clandeboye, spent a happy Christmas day at the home of his son, Mr. Irum Collins, 274 Piccadilly street. Not only was he able to enjoy all the merriment going on around him, but he contributed greatly to the entertainment of guests who came in during the evening, by singing a number of songs. "He sang many songs that I never heard before," his son told The Adver-"They were Christmas ballads of days long gone, but he rememboth words and music perfectly."

Friday, the aged gentleman, ignoring the cold, took a walk down town, and called at The Advertiser office to extend congratulations on the advent of the morning edition. Mr. Collins has been a reader of The London Advertiser since its inception, and will be one of the first to receive a copy of the new edition when it comes from the press on New Year's morning.

People Must Prevail. In beginning his address, Mr. Richer said he was glad to avail himself of this opportunity to thank the electors of ward four for the generous support hey had accorded him in past elections. If he had made mistakes, they had been mistakes of the head, not of He always had the best interests of London in view, although it was a difficult thing for all to see ye to eye. He had been blamed in ertain quarters, he said, for his attitude on the electrification question. But the reports submitted on electrifieation had not, to his mind, borne out the contentions of the supporters of the plan, and therefore he had closely scrutinized and criticized the scheme But now that the people had declared for electrification, there remained as mayor he would see that the peo-ple's money should be spent to the

very best advantage in electrifying the Good Financing Needed. He took issue with the statement hat every member of the commission should be in favor of electrification. There would be many questions that would require careful consideration. Opposition was essential to good legis-

lation, and competition in trade made for better service. There might be many things in connection with electrification of the road that should be fully inquired into. Referring to the board of control, he nust be content with a board of con-

trol. They had twice voted for a board of control, and for its successful workng a great deal would depend on its presiding officer, the mayor-elect. There was need of a man with experience in the financing of the city's work, and he pointed out that for several years he had been a member of the The Taxation Question.

Pocock, of the Cenbeen kept down in 1910, 1911 and 1912, but in 1913—well, perhaps the less said about it the better. The rate was the highest for many years, and even then was not sufficient to cover the needed expenditures. There had been large balances in other recent years, but this year, if everything were provided for, there would, he thought, be an overdraft of perhaps several thousand dollars. This coming year there would be a still greater need of exercising care in the expenditure of public money.

Mr. J. C. McDonald. Mr. J. C. McDonald, aldermanic candidate, and formerly county counciller, spoke of meeting Ald. Richter in conferences between the city and county Ald. Richter, from the county point of iew, was the hard man to deal with. He always had jealously guarded the city's interests. The rule which Mr. McDonald advocated was, always get one hundred cents of value for every dollar spent, and then there is no need to worry about the tax rate climbing

Mr. W. J. Underwood, also candidate

for the board of education, said that his one year of experience on the city council had opened his eyes to the need that had been made by his opponents of carefulness in handling money matters. "We have come to the where we will soon have to call a half or get into indebtedness that will take us centuries to get out of," he said. He advocated more attention to primary departments of the school system. Backs Ald. Richter.

WILL REPAY LOSSES

Former Bank President Hopes to Make Good \$500,000. [Canadian Press.]

Chicago, Dec. 27.—Paul Stensland, sident of the Milwaukee Avenue State Bank, with \$500,000 of its funds in 1906, is devoting his life to repaying losses of depositors. This announcement was made in an address last night at a dinner of the Association of Commerce by James Keeley, who traced the banker to Morocco, where he was captured.

Stensland was brought back to Chicago, where he made a full confession, in which he charged Henry W. Herring, cashier of the bank, with being responsible for the balance of the shortage of \$2,000,000. Stensland served four years in the penitentiary. New Concrete Road Over P. M. Tracks Has Been Completed.

[Special to The Advertiser.] Sarnia, Dec. 27.—The new concrete road crossing over the tracks of the Pere Marquette Railway below the plant of the H. Mueller Manufacturing Company, has now been completed and is open for traffic, although the electric signal bell has not as yet been placed in position.

Crossing here is ver ydangerous without the bell, as the railway takes a curve just past this point, while the side tracks on both sides of the mainline are crowded with cars. The company can keep its cars within 75 feet of the crossing. How the electric bell will be operated forthe sidetracks, and still not ring while cars are standing still on those tracks, is one of the points that the engineers of the company will have to figure out. The town will be called upon to pay the price of the bell and the installation at cost of \$400.

There has been a 35,000,000-pound shortage in the China tea crop this year. This only indirectly affects England and Canada, as practically all the eas used in these countries come from Cevion and India, but as it forces Russia to take larger quantities of Indian tea this year, the shortage in China affects the price of all teas, and gives us today the highest figure that tea has reached for twenty-five years.

Detectives Unearth Important Evidence in Recent Los

[Canadian Press.]

Los Angeles, Dec. 27 .- Information obtained by city detectives which showed, they declared, that Roy Glover, the San Antonio land agent, had purchased two ice at the Princess. — The Princess automatic pistols prior to the tragedy of the palace will open their season on last Sunday in which the former Roar soldier, Henry Devilliers, met death, resulted today in an announcement from the district attorney's office that Glover would be held for trial.

Devilliers was shot when he attempted o enter Glover's home, ostensibly to see his former wife, who claims now to be Mrs. Glover, and his two children, who Mrs. Glover, and his two children, who were brought here by Glover last October. Glover declared he shot Deviliers in self-defence. After the shooting an undischarged automatic pistol was found beside the body of the ex-sodier, and at the inquest the former Mrs. Devilliers said she had witnessed the struggle between the two men, and had seen Devillers with a weapon in his hand just before he fell mortally wounded. M. J. Shannon, a deputy district attorney, said today that information regarding the alleged purchase by Glover of the two weapons, convinced him that it was necessary to hold Glover.

GRAND PACIFIC GLACIER, YAKUTAT BAY, ALASKA

YAKUTAT BAY, Alaska, Dec. 27.— Nature is playing her biggest joke on two world powers through the medium of a big ice glacier. Although the spirit of the treaty of 1894 between the United States and England was that Canada should have no harbor through Alaskan waters, the Grand Pacific glacier, which had retreated 60

miles in 118 years on account of great. er melting in summer than freezing in winter, retreated 12 miles from 1894 to 1912. From June to August of that year it retreated one mile and went back so far that it crossed the bound-

ary and gave Canada a port. And the Canadians were jubilant! But! A little more snow fell last winter in the interior and now the

glacier has started in the other direction. Since August, 1912, it has advanced three-quarters of a mile or over 4,000 feet and is now on the American side of the line and Canada has been cheated out of her little port.

MUSICIAN AND REVOLUTIONARY. When for the free human beings of the future it will no longer be the purpose of life to obtain the means of sublief, or rather knowledge, they will be certain of obtaining the means of subsistence in return for an appropriate natural activity, when, in short, industry will no longer be our mistress, but our servant, the true purpose of life will become the enjoyment of life, and by education we will endeavor to make our children capable of its real enjoyment. An education, founded on the exercise of strength and the care of physical beauty, will, owing to the love for the child and the joy at the development of its beauty, become a purely artistic one, and every human being will in some way be a true artist. The diversity of natural inclination will develop the most manifold tendencies in an unthought-of wealth.

Secretary Changes Date of Their Load ... [Canadian Press.]

New York, Dec. 27.—Secretary Houston, of the United States department of agriculture, blocked a plan to rush foreign potatoes to the United States when he changed the date of their loading for the New York market from Jan, 1 to Dec. 23. After the recent hearing in Washington, when the secretary fixed January as the limit for loading potatoes abroad for this market. receivers here cabled orders to engage tramp steamers and load potatoes before the time expired. Arrangements had been made for 200,000 bags, which,

with the 250,000 on hand, would have made a stock of 450,000 bags of foreign potatoes for this market. Secretary Houston heard of the move and blocked it with the change of date. Several tramp steamers that had been, hartered were released.

BOARD OF TRADE URGES CITIZENS TO ADOPT NATURAL GAS

REPORT OF SPECIAL COMMITTEE ON NATURAL GAS. London, Dec. 23, 1913.

To the London Board of Trade:

Gentlemen,-Your special committee appointed by the executive council to investigate and report on natural gas, in view of the bylaw to be submitted to the ratepayers on Jan. 1, left London on Friday, the 19th, visiting Chatham, Wallaceburg and Sarnia.

These towns are supplied from the same field as the suggested supply for London, and the gas is similar to that which will be used here in the event of the bylaw being carried.

Your committee wish to acknowledge the consideration shown us everywhere by officials and citizens, and to take this opportunity to record their thanks for courtesy and kindness shown. We found objection to have this gas piped to London and eastern points, as the feeling is entertained that increased demand would more rapidly diminish the supply.

The following report records actual conditions as found by your committee, who have refrained therein from expressing personal opinions, although willing to do so if called upon. It is significant that whereas the members of your committee left London strongly opposed to natural gas and the bylaw, they are now unanimously in favor of natural gas at moderate prices, and believe the disadvantages and objections raised against it are insignificant in comparison with the advantages to be gained by its use.

We trust, therefore, that this report will receive the favorable consideration which we believe the importance of the subject demands.

Respectfully submitted,

E. C. MITCHELL, Convener. R. C. ECKERT, WM. TURNBULL.

M.C.R. DEPOT, DETROIT

Valuable Records of Freight and Express Were Burned in Mysterious Fire.

[Special to The Advertiser.] Detroit. Dec. 26. - A spectacular fire, starting from a cause undetermined, swept through the main depot of the Michigan Central Railway here this afternoon. The blaze, which started in one of the office rooms in an upper story, gained great headway before an employee discovered it, and, although several hundred persons were in the building at the time, only one, a male employee, was injured. His condition, however, is not serious.

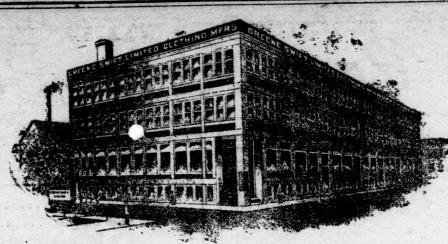

After three hours of hard fighting firemen had the conflagration apparently under control. The damage to the depot proper was estimated at \$150,000. Railway records, freight and express, were also consumed, and officials of the road said the total loss might be a quarter of

a million dollars. The depot was built about thirty years ago. The new Michigan Central terminus, a large and costly struc-ture, was recently completed, and it was announced earlier this week that the old building would be abandoned. so far as passenger service was con cerned, the first of the year. [Special to The Advertiser.] Toronto, Dec. 26. - Hotel accom modation in Ontario was a subject of discussion at the annual meeting of the Commercial Travellers' Association of Canada, at St. George's Hall, yesterday. President S. M. Sterling and Secretary James Sargant, in their report, expressed regret that the membership as a whole had not shown interest in providing information as to hotels not complying with the license law requirements.

They said that some hotels had been reported to the provincial license department and had been compelled to make improvements. Mr. G. Plan Is To Resist the Incorporation of Foreign Words.

[Canadian Press.]

London, Dec. 27. - An organization which promises to shake London's complacency as the fountain head of English as it should be spoken, has taken form at Oxford under the direction of the poet laureate, Robert Bridges, aided by such masters of English, as Thomas Hardy, Dr. Henry In Many Places No Provision Is Bradley, Sir Walter Raleigh and Prof. John W. Mackail.

While the objects of the association have not yet been fully defined, they probably will include the publication of literature, the delivery of lectures, attempts ultimately to influence the teachers over the whole country to aid in the restoration of the purity of the language, both written and spoken, and to resist the unnecessary incorporation of foreign words, and to encourage the adoption in polite speech of crisp. terse, vigorous words from the dialects. The English that Johnson spoke rather than the English that Johnson wrote is the object aimed at by the association. Johnson would have said the city today. 'rot," but he would have written 'putrefy."

In a tract prepared for the English Association Dr. Bridges declares that unemployed men in San Francisco will we say "neycher" for nature, and that have been solved. tune is well on its way to become "chiune." A professor of English has been heard to say "audjins" for audience. An Oxford professor says "cweshyun" for question, and is sadly addicted to the word. The younger generation say "pawing" for pouring. Fortunately the educated south is learning that there is an "h" in wheel and when. Ireland and Scotland never forget it.

Dr. Bridges concludes his tract as follows: "A Londoner will say that a Scotchman talks strangely and ill; the truth is that he himself is in the typical attitude of vulgar ignorance in these matters. He is disposed to look down upon all that he is accustomed to, and not knowing the true distinc-tions, he esteems his own degraded custom as correct."

'The Inner Shrine" At the Grand Furnishes Highly Dramatic S tuations.

Company Proves of Exceptional Excellence Throughout and Setting of High Class.

One of those really good plays that, while deeply impressive, serious and thoughtful in tone, and tense, with highly-dramatic situations, is yet splendidly entertaining, is "The Inner Shrine," a play in four acts, by Channing Pollock. It is a strong play, ringing true throughout, and presented by a thoroughly capable company, the audience at the Grand on Friday night received it with fine appreciation and enthusiastic favor. It is a play, witness which, is to be thrilled with a more clarified vision, a fairer, broader, more comprehensive and understanding outlook upon life.

In the opening scene, laid in Paris, the profligate husband of the butterfly young American is supposed to be killed in a duel. In the next scene, in New York, Diane Eveleth, the young widow, obliged to face a desperate financial situation, meets again Derek Pruyn, a big-hearted, jovial man, who had loved her long ago. Now with her husband dead, he is free to woo her But she is slandered by the Marquis of Bienville, from whose slanders, how-

ever, she eventually is cleared. Miss Justina Wayne, as Diane, is a superbly accomplished actress. Her works meets with an exacting nicety the critical situations in her part, and her versatility, coupled with her charm of personality, carries her through in a way that could hardly be improved skillful, strong and capable actor. The Marquis of Bienville's part is splendidy played by William S. Phillips.

One of the most capable and accomplished members of the caste is Miss Hazel Harroun, as Dorothea Pruyn. With Frederick Bond, jun., as Carli Wrappinger, Miss Harroun furnishes artistic comedy of a very high order. Harry P. Waple plays the part of George Eveleth, and Miss Jeanette Cass that of Mrs. Naomi Eveleth, his mother. All the members of the company may be said to have been remarkably happily cast, each showing special fitness and adaptability required by his or her part. In stage settings, scenery and costumes, nothing has been overlooked to make the production a first-class one in all respects. It will be repeated at the Grand this fternoon and evening.

Forbes Pobertson has received round robin, signed by most of the eading actors and actresses in New York, requesting him to give a matinee of "Hamlet" at which they could be present. They say "such a performance would be most enjoyable o the seasoned actors and highly educational to the younger ones, and to all would be a lasting and delightful nemory of having seen the greatest

The Movies Reign and Doom of the Play Is Certain, Says Belasco.

[Special to The Advertiser.] New York, Dec. 27. - The jig is up! Actors have got to go to work; managers have got to open some other kind of shop-suspenders or women's underwear or second-hand clothing from the storehouse; the day of the drama is done. When we heard this rumor we were on the study of Celtic literature. Mr. Belasco's right-hand man will doubtless recall this essay, and Mr. Arnold's preface to the second edition, wherein he replied to the attacks of the London Times. When he read these reminded of Matthew Arnold's essay London Times. When he read these attacks, which were, he declared, attacks on himself, his attitude and temperament, what he said was, "Behold England's difficulty in governing Ire-

SURPRISED MR. JOHN DREW

Theatrical people who visit Toronto are went to complain of the absence of "night life" in that city. In New York it is their custom, after the performance, to adjourn to some cafe for a meal before retiring, and this is usually their principal meal of the day. The "proession" does not eat much before an evening's performance.

John Drew, who appeared in Toronto recently, invited a few members of his company to join him at supper after one of the performances at the Princess Theatre. When the party entered the dining-room of one of the best-known restaurants at 11:30 p.m., only one table in the room was occupied. This was a sad contrast to the appearance of

most New York restaurants at that hour. Summoning the head waiter, Mr. Drew inquired whether this was the usual condition of the rooms at that hour. "Don't you ever have more people here than these after the theatre?" he said.

"Oh, yes," replied the waiter, apologetically. "When there is a good ow at the Princess we usually have quite a crowd for supper.

ALD. RICHTER AND

He Believes the Voice of the Electors as Expressed a Year Ago Should be Respected.

Ald, Richter's position in regard to the separation of the water and electrical departments is that the expression of the electors on the subject a year ago should be respected, and that Following the last regular meeting the proposal for the council to take of No. 2 committee of the board of education in the Western Fair offices works, thereby obtaining complete control of the city streets, should given one year's trial. Instead of that the electors are being asked to reverse their former verdict without being allowed opportunity of learning whether it was wise or not.

There is no good reason for supposing that if matters are allowed to stand as approved of by the electors a year ago the management of the waterworks will be seriously interfered with. The commissioners can manage the works as at present, subject to the council's approval in like manner as the parks commissioners now manage the parks of the city; at any rate it and J. ly demonstrated in touching incidents that occurred in connection with the City Mission entertainment for children on Tuesday evening.

51st Year.

Over three hundred of the little folks of the downtown district assembled at the mission. Long before the hour of 8 o'colck, at which time the festivities were to commence, the large room was packed with youngsters. In groups and alone, big and little, thin and chubby, tall and short, they came. Everybody Happy.

There were some who were not familiar with the significance of the Christmas spirit. Perhaps it was because they were too young, or perhaps the parents had never told them. Others, more fortunate, and perhaps remembering other events of a similar nature, were also among the throng that crowded the room. And there were some, too, who were turned away. Loth as he was to do so, the superintendent was unable to admit them, for space was at a premium. But if they could not be taken inside, at least their ragged pockets could be filled with candy, nuts and the innumerable other Christmas goodies that make happy the heart of the child. And so they vere satisfied. And if they felt a mofloated out to them standing in the crowded doorway, it was quickly dispelled when they glanced at the bulging pockets with the priceless treasures-a golden orange and a handful of hard candy!

Fun and Food.

Inside the fun waxed furious. When

As stated, it was a children's evening, but there were numerous older friends of the mission present as well. And it is through the efforts of these people that the work of the mission is accomplished. Upstairs, above the mission, a wardrobe has been established. To be sure, the fashions displayed are not in accordance with the latest modes of Paris or London,. But there are clothes for men, women and children-principally children, of all shapes and sizes, and many of the youngsters were dressed from tip to toe Tuesday evening by the mission folk. Ragged newsies, who rejoiced in trousers with more patches than original material, were turned out after a moment's se clusion, behind curtains, in nifty new outfits, including collars, ties and

Practical Christianity.

"Here! See here!" called the super form when the fun was at its highest. He held in his arms a girl of perhaps 7 years. The child's appearance was suggestive of direst poverty. The shoes were pitifully large, and it was only with difficuytl that she could walk, so clumsy were they. In a moment the audience were all attention.

"Look!" the secretary reiterated. Then when the crowd was still and even the happy children had ceased their prattle, he said:

The Smile Did It.

RARRATER ARESTRATER AR of the appeal that was being made on her behalf she smiled. The smile went straight to the hearts of two strong looking men in the back seat. Without a word they left their places. A short interval elapsed and they returned. They walked to the platform where the still-smiling child nestled in the arms of the superintendent. "Shoes for the kid," one said huskily. That was all. The shoes were put on the little feet, and the child cast admiring glances at them.

"Now I tan come to Sunday school," she explained to the reporter. "I didn't have no shoes last Sunday, and touldn't

Another bright little chap, who is a gum salesman on the local corners and who makes a modest living for himself in this manner, was also among the needy cared for. He resembled a Turk somewhat in appearance as he was led to the platform for inspection. The trousers were once of the bloomer variety, but had long since lost their "lines," and had "decrepitated" into a mere bag. They were also the worse for wear, and at several intimate places the bare skin peeped coyly through the rents. The coat was indescribable, and completed the "toute ensemble" of negligence. Calls The following morning, with a new suit and shoes, he was again at his accustomed post and accosted the reporter, who his sharp eyes recognized, with: What do y'u think of muh new outfit

For I knew by then, that the "Fourteenth Number" is not such a terrible place, and that, in fact, it was better than many other prisons. But I also knew that this place was used only for very important "politicals." I had not much time, however, to think, for a door help comparing the other confinements, opened, and the gendarme-warden greeted me very politely, and locked the door behind me, leaving my two -and the warden showed me up to the

"Why?"

"Because we want to see what you are doing during the night."

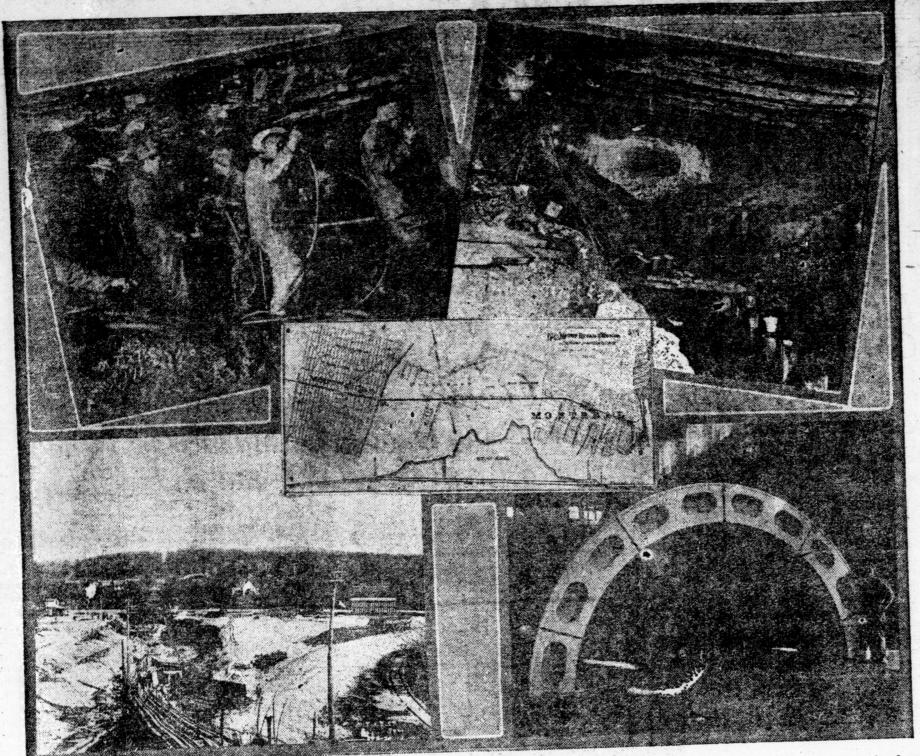

When left alone, I started to examine the room and its contents. The room was quite large, and the walls were oil painted.

Ah, ha! thought I; oil painted, so that nobody should be able to write on them, or leave a message for his successors. Well, well!

I began to examine every piece of woodwork and plain plaster, and sure enough found names, well known to me—

get used to your comrades, you know all that they could tell you. You don't speak as much as in the beginning. You begin to find it hard. When I wanted to talk to No. 10 (there were only ten rooms), I had to eall my neighbor No. 4, he would call No. 5, he No. 6, and so on, till he was transferred to No. 10. The same way in talking, your voice could not be carried to the further end, so we had to transfer everything from one to the other, and receive the reply in the same way.

Weeks passed, months passed and nothing new happened. During that time, new politicals came. Some of the old ones were gone, but in general the situation remained the same. His conduct is more insolent than the Aisatians are in the habit of experiencing at the hands of their military masters, but it is only a question of degree, and its arrogant inspiration is common to the whole administration, civil and military, of the Reichsland. We have here, in short, an example of the characteristic Prussian spirit in which Alsace and Lorraine have been treated for forty odd worm with the German

After Independence. Sir Harry Johnston recently visited Alsace-Lorraine, and writing in the Daily Chronicle points out the main

ssues of today.

"Alsace and Lorraine," he says.

"have been so much detached from the making of modern Germany during the eighteenth and nineteenth centuries that, in addition to their mixed population (though nearly its entirety sneaks the German lanentirety, speaks the German they still have a hankering after independence. I am inclined to think that if a plebiscite could be taken at the present day and be absolutely uninfluenced or controlled, a guage), solutely uninfluenced or controlled, a small majority of votes in Alsace-Lorraine would declare for an autonomous position like that of Luxemburg, but doubt very much its deciding as an alternative, to come once more under the sway of the French Republic.

"Is lessening this anti-German the feeling. Keeping his eyes on the future, the impartial outsider feels that it is altogether for the best that the bulk of Alsace and Lorraine should incline to the German sphere.

After all, community of language counts for much; and, on the whole, the balance of community in race lies more with Germany than with France. A few thinkers would be in favor of uniting Alsace (which still differs in many particulars from Lorraine), with the Grand Duchy of Baden, and raising the conjoined territories to the rank of a German kingdom. The business relations of German Lorraine lie more in the direction of Cologne and the towns of

That is the region round Metz and to the west of the little River Seille. Nine-tenths of the people in this region (soldiers and officials excluded) would vote for re-incorpora-tion with France, if they were asked for their opinion. It is this small portion of Alsace-Lorraine—quite inconsiderable in area, some 450 square miles out of 5,604 — which really keeps alive the agitation for a revision of the Treaty of Frankfort. Metz has been a French city for more than a hundred years longer than Strassburg—in fact, ever since 1554.

The Core of the Trouble. "And one feels that in the matter of Metz lies really the core of the trouble between France and Germany. which will never be eradicated without a small revision of frontier. If Metz and the line of the Seille were restored to France (with some French colonial territory as an equivalent) the powers of Western Europe would feel that Germany had given the clearest proof that she entertained no designs on the independence of Luxemburg and Belgium; and France might rest assured thenceforth that she could not be attacked by Germany at a disadvantage and

unprovoked. "As against this, the whole of the world of Western and Central Europe might wel constitute itself the guarantors that France should keep the peace with Germany, since in recovering Metz she would no longer have any ground for just resentment or anxiety

Prince Bulow's View. Prince Bulow, writing in the new book, "Germany Under the Emperor William II.," lays it down that the irreconcilability of France is a factor which Germany must never forget, and that it would be feeble to hope for a "real and sincere" reconciliation as long as Germany does not intend to abandon Alsace-Lerraine. As Germany has not this intention, the only possibility is co-operation in minor ques-tions and an effort to maintain "courteous, quiet and peaceful" re-

show sets the world free. Whether science ever achieves Mr. Wells' forecast or not, his profound and daring imagination excites the mind and makes one feel that all things are possible if we are not stupid enough to prevent their being.

Atoms in Full Blast. What Mr. Wells foresees is an in-dustrial revolution caused by the progress of science and a further attainment by man of mechanical power -to which our tin-pot steam age and our age of railways is nothing. There are men living today who were living when there were no railways. And Mr. Wells gives the year 1954 as the date when the next revolution is in full blast, or, in the light of what he says.

boundary in the march of human progress was crossed in 1933." And when he made the discovery he knew by intuition that "in the end before many years are out this must eventually change war, transit, lighting, building, and every sort of manufacture -" Holsten the Genius.

Holsten, the genius who harnessed the atom to do the world's work, wrote in his diary: "It is not for me to reach out to consequences I cannot foresee. I am a part, not a whole; I am a little instrument in the armory of change." When Holsten was a boy a certain professor of physics is reported by

Mr. Wells to have said: "A little while ago we thought of the atoms as we thought of bricks - as solid building materials, as substan-tial matter, as unit masses of lifeless stuff, and behold! these bricks are boxes, treasure boxes, boxes full of the

The New Epoch. This new epoch in human history which made the past years the "preatomic time" began, according to Mr. Wells, in 1953. "By the autumn of 1954 a gigantic replacement of industrial methods and machinery was in progress all about the habitable globe. Small wonder was this when the cost even of these earliest and clumsiest of atomic engines is compared with that of the power they superseded. Allowing for lubrication, the Dass-Tata blast, or, in the light of what he says, it would be more correct to say when the atoms are in full blast.

At the same time ridiculous in appearance as well to preposterously costly. . . . At the same time a new impetus was given to aviation by the relatively enormous power for weight of the atomic engine. . . The last dread of flying vanished. As the journalists phrased it, this was the epoch of the Leap into the Air.

"Atomic engines invaded industrialism. The railways paid enormous premiums for priority in the delivery of atomic traction engines, atomic smelting was embarked upon so eagerly as to lead to a number of disastrous explosions due to inexperienced handling of the new power, and the evolutionary cheapening of both materials and electricity made the entire reconstruction of domestic buildings a matter merely dependent upon a reorganization of the methods of the builder and the the the thinker Viewed from the side louse furnisher. Viewed from the house furnisher. Viewed from the side of the new power and from the point of view of those who financed and manufactured the new engines and material it required, the age of the Leap into the Air was one of astonishing prosperity."

Will it Come True?

But as the world was not really governed at all, even in 1955 there were great social catastrophes following on the com-

social catastrophes following on the com ing of the atomac engine. Coal mines were doomed. Oil shares fell, men were thrown out of work, as Mr. Wells proceeds

to show.

The world has not yet been set free in this installment of the story. But as one closes it and realizes the possibilities of Mr. Weils's great dream—which at present lies in an atomic grave with cereclothes upon it—one asks, as they asked of old—Who will roll away the stone which prevents it from coming to life?

Binds Men Helpless and Then Kills Them With His Own Hands.

Bandit For Twenty Years With a Price Placed Upon His Head.

General Villa, the successful leader of the revolutionist forces in Mexico, is a murderer and a thief, according to a wealthy mine owner who has just returned from that troublous country.

"Villa," said he, "is half devil and half cur. He is the most unspeakable wretch that ever straddled a horse, but he doesn't expose himself to danger if he can keep out of it. I suppose he has killed as many men with his own hands as any other man in Mexico. I doubt if half a dozen were given the chance to shoot back."

He told of one occasion in the early days of the present insurrection in Mexico when Villa captured twenty men of a band that had been badgering him. He condemned them to death in his usual way, never bothering with court-martials or other flub-dubbery. Then he designated himself as the executioner of his own decree. He had the men bound, hands behind backs, but with eves unbandaged.

"This will seem impossible to you," said the mine owner, "but Villa walked down that line of men, revolver in hand. From time to time he shot a man through the heart, and stood by him until the victim had kicked his last kick. He taunted the bound men." Prolonged Torture.

"I want you to enjoy this, as I do," he told them. Those who gave way to terror he put aside, to be shot last of all. In that way they savored to the last twinge of the full agony of their position. Some of them he half encouraged to believe that he might spare them. Then he killed them, fairly licking his lips as he did so."

There was another story of Villa's garroting half a dozen men one day. For some reason, he did not want to shoot. He slipped a short loop over the head of each man, thrust a stick through it, and twisted. As the victim gasped for breath he let up on the pressure, so that the death agonies might be as sweetly prolonged as possible. An eye-witness told the mine owner of this series.

"When they were all dead," said the witness, "Villa was so tired, he slept like a babe."

"For years," said the man from "Villa has made a practice of robbing isolated ranches or little First he killed every man he could find, both because he liked to an absurd excess. Then he took the women. He led his men in the excesses that followed.

I do not say that the man is a coward. I merely declare that fair play, as Anglo-Saxons understand it, is folly to Mexicans. They hate and fear Villa, but it has never occured to them that he was anything but superlatively sane in lying behind a rock when he shot down his man, or in approaching a man with a smile, only to thrust a knife through him when his back was safely turned. In the case of the German nobility it had been found during the last 150 years that 50 per cent of the families had died out, leaving no one to bear their names. Again, they had no evidence that there was a possibility of improving the human stock for more than three generations from the standard level. They could keep the stock improving somewhat for two or three generations, but beyond that they had no evidence at all that any further improvement occur-

And in this age of ours ideas onies, which anyone else may covet, march with a kind of silent celerity, states of war or of preparation of war which reproaches both the skepticism of the age and its indifference. Who, for example, would have believed six it a little, or wrap it up a little. But months ago that a powerful anti-militarist movement would have invaded rance and Germany, and for the moment dislocated the governing systems of both countries? On the face of it, olitical society is peculiarly conservative, and it is conservative partly because of the extreme timidity of Immense, treasures call for strong locks and steel doors: and as many men's imagination is still in the primitive stages in which it conceives one body of working people as threatening the well-being of another-as, in fact, the mind of the Middle Ages subsists with the works of the twentieth century-we think that all nations (or all rich and big nations; the small ones somehow escape) must be assured against all the others because some rich men are accused against some thieves. A few acts of national theft keep this tradition alive, and it is firmly held by all "statesmen."

But there is a change. The "statesmen" are not in such good repute as they were. A few accredited and acknowledged blunders have shown them to be not only short-sighted men like the rest of us, but, by the nature of their craft, to be liable to error and miscalculation. For they do not move with the real, large movement of the world, and in time they even cease to

Knowledge and Power. Take the present position of armaments. The true paradox of the situation is that while for purposes of life the world has become one state, it still acts as if there were many states, and all against each other. Needs are so great, men's ideas have become so expansive and delicate, that they live off each other in a good sense, just as in a bad sense the rich live off the poor. More inter-state knowledge, inter-state trade, is what we want. The moment a nation becomes an active, ambitious unit, it calls in the older nations to help it to live. Moreover, the mass of people in all countries are of the same stuff, and of a natural kindliness to each other, as witness the international movements, such as religion, Socialism. In other words, neither interest nor inclination separates them: only suspicion, which in its turn arises from ignorance and fear. But power is in no country in the hands of the "masses." It is in the

hands of small coteries of aristocrats, plutocrats, bureaucrats, aided by skilled bodies of professional advisers. These men—if I may analyse them a little more closely—are timid, and for the most part do not want war. But they are skeptical and material in their general view of human nature, and (with some reason) they have little faith in each other. They consider that wars will always be (though these events are increasingly foolish, for the richer the world gets the more it suffers from the destruction of obvious.

"Truth is on the march, and nothing | wealth and credit), that one war be- | admittedly produce only higher esti-'marching" Alfred Dreyfus out of another, or possesses wealth, or colmust be inevitable or eternal. This is their simple no-faith. They conceal it always comes out in the end. Asquith holds it a little shame-facedly Mr. Churchill professes it without any shame at all.

Discredited War-Makers.

Now, it was possible to maintain this view, and to impose it on the peoples so long as armaments were not especially costly in the intervals of peace, and so long as this increasing demand for a fuller life did not press upon statesmanship. But this is no longer the case. Now, with effrontery, the statesman must meet the folk e rules, and to their request for the longer lives, healthier dwellings and cities, better-trained minds for their children, which we now know the State can insure if it will reply-"No; the state of my war insurance fund will not permit it. It is the first charge on the estate I manage; you and yours are the second." The more provident minds discuss the weakness of this reply, and they anticipate the people's rejoinder. So they retreat to second defensive position. emedy," they say, "Is not in our hands but in yours. No nation by itself can do anything. No statesman can do anything. There must be a general movement against armaments, and the peoples must lead it."

Well, this is the point at which many of us have long ago arrived, and at which some, I hope, propose to act The people, at least, retain one power in nearly all countries where some form of parliamentary government exists, and that is the power of the purse. Let them use it.

Our only leverage is in our own representatives, and it is on them, as on Herr von Bethmann-Hollweg and M. Barthou, that the stimulative action of public opinion, enforced by votes, should fall. Having been warned not to take a cab, Eleanor abode by the warning, but she noticed casually that all the cabs drawn up in the station bore the name of a firm which even out in Caryville stood for sobriety and stability, and she thought that romance must have departed from the cab business as well. This certainly wasn't what happened to Nellie, the Beautiful Cloak Model, nor to the heroines of those masterpleces which she had cried over at home.

A policeman told her which car to take, and she boarded it. Here, also, there were plenty of young men, but they apparently did not know she was on the car, for the seats were full and they busied themselves in their papers that they might not notice her.

THE GARDEN OF THE LORD. The garden of the Lord-what dreams The words suggest,
if sweet and never-fading bloom,
Of joy forever blest,

Of love is never dumb. These are the blissful dreams, but all Around us lies The garden of the Lord on earth

Beneath our seeking eyes. Where from the clasping hands the weeds

Of self are torn, And from the heart the bleeding flow'rs Of earthly pride are shorn. Where ceaselessly the scythe of time

Sweeps o'er the sward-There in the souls He prunes behold The garden of the Lord.

In the back end o' the year,
It's a song of silent watchful things,
The waiting leaf grown sere,
The mist across the turnin-field The mist across the The cautious weed unsown Within his capsule, still afraid To venture life alone,

The darkness longer than before-You cannot wonder why When it must be the secret door The toadstools enter by— The crimson toadstools and the gold Oh! that's the song I'd hear, The glad song of the little folk That leap the back o' the year.

The chestnut in his warrior coat,
The acorn in his cup,
The gold potato, treasure-trove

Reluctant earth gives up.
The lonely plowman in the field,
White drift of guils behind—
It's the back end o' the year that sings The song that's to my mind.

Itching and Burning Pimples Spread. Clothing Irritated. Used Cuticura Soap and Cuticura Ointment.

High River, Alta. - "My baby was a

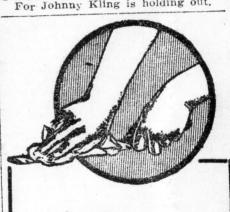

sufferer from an itching and a burning on chest and back. The trouble began with a fine small rash and got quite a size. The pimples spread until his whole chest and back were covered. Some of them festered and on some the top looked clear. He was fretful and cross and was always rubbing. His clothing irritated him. The trouble caused itching, burning and loss of sleep. His chest and back grew worse and worse; they were a mass of itching pimples. The trouble had lasted two or three weeks and we tried remedies but they failed. Cuticura Soap and Ointment afforded relief in about ten days. I washed the eruption with hot water and Cuticura Soap four times a day, then used the Cuticura Ointment and in three weeks he was well again. He owes it to Cuticura Soap and Ointment. STARVING IN A SAFE

Christmas Eve, 1902, I was helping the head clerk at some offices, where I was engaged in Norwich, to lock up. He was in a hurry to eatch a train, and asked me to put some books in the big iron stronghold in the inner office and lock it up after him. While doing so, my jacket caught against the door handle and before I could prevent it the door slammed to.

I yelled and kicked, but no one could hear me because the clerk had ocked the front door. For hours I endured the most awful suspense and agony, and I was wondering whether I should die of foul air and starvation, when I was startled to hear a knock on the door. While I was wondering what it was I heard the lock being prised. Then I knew it was burglars. The thought arose-would they murder me? Perspiring and trembling, waited a bit. Then, as I heard the door move as if being opened, I shouted: The thieves dropped something and scuttled along the passage.

I then tried the door, but I couldn't open it. Oh, God! the horror of that noment. I tried to resign myself. But the weary, waiting hours of the miserable Christmas Day I shall never forget. Then, feeling that my last moments were approaching, in my despair I dashed myself against the door. To my amazement it yielded and opened. For, as I afterwards discovered, the burglars had actually opened it, and I might have had my Christmas dinner at home in comfort instead of starving in the safe!

WEDDINGS.

PHILLIPS-BUTT.

The home of Mrs. A. M. Butt, of Toronto, was the scene of a beautiful but quiet wedding on Christmas Day, when her eldest daughter, Laura Rosamond was united in the holy bonds of matrimony to Mr. William A. Phillips, of Semans, Eask. The ceremony was performed by Rev. R. B. Rowe, of Norwich, assisted by the brother of the bride, A. T. F. Butt, of Granada, Minn. After extending the usual congratulations to the newly wed, the guests, consisting only of the bride's brothers and sisters, sat down with the bride and

groom to a wedding dinner. The couple left for points in Western Ontario, and will be at home to The bride is the daughter of the late H. Butt, formerly pastor of one of the Methodist churches of this

If two men are estranged the surest road of reconciliation is not through a patient investigation of all the quarrels of the past, but along the highway of a common enterorise which lays hold on the future. The binding power of responsibility is me of the factors ordained by God in the development of human-kind. Geting under a common load is a sure vay of keeping step with those who carry it. Every movement for sound reform illustrates afresh the conolidating power of common activiies carried on for the accomplish ment of common ends.

Why Not Agree on a Campaign? "Why should we not expect just such results if the various branches of the universal church should some day agree to enter upon a world-wide campaign for the overthrow of some one colossal world-evil, or for the coronation of some particular Chris tian principle in the policies of the the church truly unless we see it large. The church is never faithful to her calling unless she has her hands upon a task too great for human strength to accomplish.

"Already the experiment is in pro gress on a small scale both in the home and foreign fields. The modern emphasis on social service is a mighty forwarder of Christian union. It is a striking fact that men will work together long before they are willing to worship together. Her priests more than two degrees of latitude, are numbered by the tens of thousands her soldiers by the millions. Around all her coasts play constantly huge ships of war. On land and water is heard incessantly the boom of guns engaged in target practice. Through the streets of her capitals there march daily battalions of armed men. The insignia of force are everywhere before the eye. The latest instruments of destruction are pictured from week to week in pictorial magazines, and skilful writers thrill their readers by vivid descriptions of the appalling havoc which these instruments can work The minds of men, to an amazing extent, are kept on wars past or wars to come, and the air is darkened again and again by sombre and terrifying

Words that Scorch and Sting. "A noted writer has recently said in words that scorch and sting: 'If one were to dramatize the world movement of the struggle between Christ and Mars, Christ is down and out; despised and rejected of men; spat upon; nailed up and laughed to scorn; not even allowed the right not to be kicked when

"Here then we are face to face with

the most infamous scandal of Christendom. This is the running sore of the world. It is more heart breaking than African slavery, or any other tragedy which the non-Christian world can show. It is not a tragedy which is decreasing, but running from bad to worse.

This is the Situation.
"This is the situation, and the question is what shall the church do with it? Is she to be the deliverer which was promised for this and all other scourges, or must the nations look for another? The world's political leaders confess themselves baffled. They have searched in every quarter for a way of deliverance, but no way has been found. The political economists have presented their figures and arguments, but all in vain! Peace congresses have suggested one panacea after another, but all alike have been rejected. "It is a noteworthy fact that the man in the street searching for a deliverer

does not look in the direction of the Christian church. It does not seem to occur to him that in these high and difficult matters the church can be of service. In his dreams of emancipation from the armed peace he does not put his trust in pope or cardinals, in patriarchs, archbishops or bishops, in pastors and teachers or Elders. The whole organized body of those who have been baptized into the name of Jesus are brushed aside as a negligible force in humanity's greatest struggle. That the church of Jesus Christ is not ordinarily taken into account by those who are most earnestly seeking deliverance from the weight of armaments which lies like a vast incubus on the hearts of the nations is the severest

he present generation. "Yet why should not the world look confidently to the church as the mightiest of all the forces to be invoked for philosophic lantern in search of a assistance in ending the galling thrall-moral equivalent of war. He felt the necessity of disciplining and utilizing by the terms of their calling peace-

judgment, apportioning among the nations praise and blame. Who made her a judge or a divider over the nations of the earth? It is not her pro-vince to make programs, or to determine the size of military and naval budgets, but rather to create the at-mosphere in which all such budgets shall shrink, and public officials shall find it easier to lay out programs which merit Christ's approbation. Militarism will be overthrown not by the smashing of its armaments, but by the growth of a fraternal spirit. "Icebergs melt under the kiss of the

sun, and so will armour plate melt under the touch of a spirit made kindller by a fuller knowledge of God in Christ. If war is hell, then armed peace is purgatory, and it is the mission of the church to save the world from both. Unite! Unite!

"That is a thrilling cry of Karl Marx: Proletarians of all lands unite!' But this is a cry more thrilling still: 'Christians of all lands unite! Unite in abolishing the appeal to arms! Unite in stopping the wasting of the people's treasure on instruments of Unite in extending in public thought and feeling the boundaries of mutual appreciation and goodwill!

"Nothing is too good or great to hope for if the gospel of Christ is true. God loves and reigns. Christ is His eternal Son. His kingdom shall surely be established on this earth. The church exists to bring humanity to God. It is a heavy load, and the united strengths of the entire apostolic company are needed.

"We connot agree yet on many points in doctrine and practice, but arraignment of the church leaders of if we are willing to toil and sacrifice in delivering the world from human-Christendom which has been made in ity's most conspicuous and devastating scourge we shall find at the end of the day that in our efforts to build up in the hearts of nations the ideals of brotherhood, our own hearts have been wondrously sweetened and enmakers.

What the Church Can Do.

"What then can the church do? It is not for her to chide because of

I am a woman.

I know a woman's trials.

I know her need of sympathy and help.

If you, my sister, are unhappy because of ill-health, and feel unfit for household duties, social pleasures, or daily employment, write and tell me just how you suffer, and ask for my free ten days' trial of a home treatment suited to your needs; with references to Canadian ladies who gladly tell that here here they are here they have they are received health, strength, and with references to Canadian ladies who gladly tell how they have regained health, strength, and happiness by its use. I want to tell you all about this successful method of home treatment for yourself, my reader, for your daughter, your sister, or your mother. I want to tell you how to cure yourselves at home at trifling cost, and without aid from anyone. Men cannot understand women's sufferings; what we women know from experience, we know better than any doctor; and thousands have proved there is hope even for the hopeless in my method of home treatment. If you suffer from pain in the head, back, or bowels, feeling of weight and dragging down sensations, failing or displacement of internal organs, bladder irritation with frequent urination, obstinate constipation or piles, pain in the sides regularly
